NOTIFICATION OF OTHER RELEVANT INFORMATION

GREENERGY RENEWABLES, S.A.

27 April 2026

GREENERGY RENEWABLES, S.A. (hereinafter, the "COMPANY"), in compliance with the provisions of Article 227 of Law 6/2023 of 17 March on Securities Markets and Investment Services, hereby notifies the National Securities Market Commission of the following

GREENERGY signs a financial tolling agreement for its Escuderos project (200 MW + 680 MWh)

GREENERGY has signed a financial tolling agreement for its Escuderos hybrid project (200 MW + 680 MWh) with the Spanish subsidiary of an international utility rated investment grade by the main credit rating agencies.

The financial tolling agreement covers the spread of daily prices on 80% of the total capacity and will have a duration of 12 years, coming into effect in July 2028.

In addition to total revenue from daily trading, revenue will also be generated from participation in all available markets, including ancillary services. If capacity payments are implemented in Spain, they would represent additional potential revenue for the project.

Currently, the 200 MW Escuderos solar farm is in operation and has a 12-year daytime PPA with Galp, signed in 2020, as reported in Privileged Information under registration number 638.

Construction of the BESS system will begin in the second half of this year, with the aim of becoming operational in 2027. GREENERGY will be responsible for the operation and management of the batteries.

Madrid, 27 April 2026.

Mr David Ruiz de Andrés
Chairman of the Board of Directors and Chief Executive Officer
