You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

It is a bond for which the Client pays a purchase amount and the Issuer assumes, on the Maturity Date, the obligation to pay part of the Nominal amount of the bond or all the Nominal amount of the bond ("Nominal Amount"), depending on the evolution of one or several Underlying Assets, with no commitment of paying back the whole Nominal Amount. Furthermore, the product grants to its holders the right to receive a Payout (as defined below), provided that certain conditions related to the evolution of one or more Underlying Assets are met.

Objectives

The Payout and the payment of the Nominal Amount depend on the fulfilment of certain conditions, related to the performance of the Underlying Asset

- Payout:

If, on a Reference Date or the Final Reference Date, the Value of the Underlying Asset is higher than or equal to the Coupon Trigger, the Issuer settles a Payout equal to Nominal Amount x Coupon for each bond. Furthermore, the Issuer pays for each previous Reference Date in which this condition was not fulfilled an additional payout equal to Nominal Amount x Coupon, for each bond.

In all other cases, the Issuer does not settle any Payout.

- Payment of the Nominal Amount

- a) If on a Reference Date or the Final Reference Date, the Value of the Underlying Asset is higher than or equal to the Trigger, the product redeems and the Issuer pays the Nominal Amount for each bond.
- b) If on the Final Reference Date, the Value of the Underlying Asset is lower than the Trigger and the Barrier Activation Condition has not been verified, the Issuer pays the Nominal Amount for each bond.
- c) If on the Final Reference Date, the Value of the Underlying Asset is lower than the Trigger and the Barrier Activation Condition has been verified, the Issuer does not pay the Nominal Amount for each bond but delivers a Quantity of Asset shares per bond equal to the following formula:

Nominal Amount / Strike

If there is a residual quantity of Asset that is not possible to deliver, its value is paid in cash and is equal to such residual quantity multiplied by the Value of the Underlying Asset on the date 21/12/2020

In this situation, the Nominal Amount may not be returned..

What are the risks and what could I get in return?

Summary Risk Indicator

The risk indicator assumes you keep the product for 3 years; until the date 28 December 2023. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay a significant extra cost to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 6 out of 7, which is 6 the second-highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions are very unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

	Average return each year	-76.86%	-38.52%	-38.19%
Unfavourable scenario	What you might get back after costs	EUR 9,724	EUR 8,699	EUR 5,598
	Average return each year	-2.76%	-6.73%	-17.58%
Moderate scenario	What you might get back after costs	EUR 10,301	EUR 10,243	EUR 10,193
	Average return each year	3.01%	1.21%	0.64%
Favourable scenario	What you might get back after costs	EUR 10,653	EUR 11,294	EUR 11,940
	Average return each year	6.53%	6.27%	6.09%

This table shows the money you could get back over the next 3 years, under different scenarios, assuming that you invest EUR 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor. The figures do not take into account your personal tax situation, which may also affect how much you get back. Payments made to a client during the life of a product requires BBVA to make certain assumptions. This is for the purpose of undertaking scenario analysis and the calculation of product profitability as shown in the table. BBVA has chosen to capitalize on these payments, assuming a reinvestment until maturity at a risk-free rate of interest.

What happens if the Issuer is unable to pay out?

Banco Bilbao Vizcaya Argentaria, S.A. guarantees the payment obligations that the Issuer assumes in the Product, in its same terms. The Product is not covered by the Credit Institutions Deposit Guarantee Scheme or any other guarantee scheme. In the event that BBVA as guarantor could not pay, the Client would face a financial loss.

In the event of the resolution of the Guarantor of such financial instrument (applicable process when the Guarantor is insolvent or it is expected that it will become insolvent in the near future and due to public interest and financial stability it is necessary to avoid its insolvency), such product could be converted into shares or its Nominal Amount and, as a result, the Client could make losses in their investment

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10,000 EUR. The figures are estimates and may change in the future.

Costs Over Time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time..

How long should I hold it and can I take money out early?

Recommended Holding Period: 3 years
