Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.
7. Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact the BNP Paribas Group and the financial and economic environment in which it operates.
8. The BNP Paribas Group may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.
9. Epidemics and pandemics, including the ongoing coronavirus (COVID-19) pandemic and their economic consequences may adversely affect the Group's business, operations and financial condition.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Principales factores de riesgo que afectan al garante

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

2. Una interrupción o un fallo en los sistemas informáticos del Grupo BNP Paribas podría causar pérdidas sustanciales de información de clientes, dañar la reputación del Grupo BNP Paribas y provocar pérdidas financieras.
3. El Grupo BNP Paribas podría incurrir en pérdidas sustanciales en sus actividades comerciales y de inversión debido a las fluctuaciones y la volatilidad del mercado.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.
7. Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact the BNP Paribas Group and the financial and economic environment in which it operates.
8. The BNP Paribas Group may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.
9. Epidemics and pandemics, including the ongoing coronavirus (COVID-19) pandemic and their economic consequences may adversely affect the Group's business, operations and financial condition.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Most material conflicts of interest pertaining to the offer or the admission to trading

Any Manager and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and the Guarantor and their affiliates in the ordinary course of business. Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

BNP Paribas Arbitrage SNC, which acts as Manager and Calculation Agent is an Affiliate of the Issuer and the Guarantor and potential conflicts of interest may exist between it and holders of the Securities, including with respect to certain determinations and judgments that the Calculation Agent must make. The economic interests of the Issuer and of BNP Paribas Arbitrage SNC as Manager and Calculation Agent are potentially adverse to Holders interests as an investor in the Securities.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Principales factores de riesgo que afectan al garante

3. El Grupo BNP Paribas podría incurrir en pérdidas sustanciales en sus actividades comerciales y de inversión debido a las fluctuaciones y la volatilidad del mercado.
4. Los ajustes del valor contable de las carteras de valores y derivados del Grupo BNP Paribas y de la propia deuda del Grupo BNP Paribas podrían tener un efecto adverso en sus ingresos netos y en su patrimonio neto.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.
7. Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact the BNP Paribas Group and the financial and economic environment in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("Stapled Shares")), similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Most material conflicts of interest pertaining to the offer or the admission to trading

Any Manager and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and the Guarantor and their affiliates in the ordinary course of business. Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

BNP Paribas Arbitrage SNC, which acts as Manager and Calculation Agent is an Affiliate of the Issuer and the Guarantor and potential conflicts of interest may exist between it and holders of the Securities, including with respect to certain determinations and judgments that the Calculation Agent must make. The economic interests of the Issuer and of BNP Paribas Arbitrage SNC as Manager and Calculation Agent are potentially adverse to Holders interests as an investor in the Securities.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Most material conflicts of interest pertaining to the offer or the admission to trading

Any Manager and its affiliates may also have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform other services for, the Issuer and the Guarantor and their affiliates in the ordinary course of business. Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

BNP Paribas Arbitrage SNC, which acts as Manager and Calculation Agent is an Affiliate of the Issuer and the Guarantor and potential conflicts of interest may exist between it and holders of the Securities, including with respect to certain determinations and judgments that the Calculation Agent must make. The economic interests of the Issuer and of BNP Paribas Arbitrage SNC as Manager and Calculation Agent are potentially adverse to Holders interests as an investor in the Securities.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition.
2. An interruption in or a breach of the BNP Paribas Group's information systems may cause substantial losses of client or customer information, damage to the BNP Paribas Group's reputation and result in financial losses.
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.
7. Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact the BNP Paribas Group and the financial and economic environment in which it operates.
8. The BNP Paribas Group may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties.
9. Epidemics and pandemics, including the ongoing coronavirus (COVID-19) pandemic and their economic consequences may adversely affect the Group's business, operations and financial condition.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Fluctuations in exchange rates are affected by complex political and economic factors, including governmental action to fix or support the value of a currency, regardless of other market forces. If the rate of issuance of exchange rate instruments (such as warrants, securities or options relating to particular currencies or currency indices) increases, the value of Currency Securities in the secondary market will decline.

Holders of Currency Securities risk losing some or all of their investment if exchange rates of the relevant currency (or basket of currencies) do not move in the direction they had anticipated. Additionally, if Currency Securities are settled in a currency other than the Holder's home currency, the negative effects of exchange rate fluctuations will be greater: exposure to a currency, similar market risks to a direct currency investment and market disruption and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Various entities within the BNPP Group (including the Issuer and Guarantor) and Affiliates undertake different roles in connection with the Securities, including Issuer of the Securities and Calculation Agent of the Securities and may also engage in trading activities (including hedging activities) relating to the Underlying and other instruments or derivative products based on or relating to the Underlying which may give rise to potential conflicts of interest.

BNP Paribas Arbitrage SNC, which acts as Manager and Calculation Agent is an Affiliate of the Issuer and the Guarantor and potential conflicts of interest may exist between it and holders of the Securities, including with respect to certain determinations and judgments that the Calculation Agent must make. ¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Las fluctuaciones en los tipos de cambio se ven afectadas por factores políticos y económicos complejos, incluida la acción gubernamental para fijar o respaldar el valor de una moneda, independientemente de otras fuerzas del mercado. Si aumenta la tasa de emisión de los instrumentos de tipo de cambio (como warrants, valores u opciones relacionados con divisas o índices de divisas particulares), el valor de los Valores de divisas del mercado secundario disminuirá. Los Titulares de Valores de divisas corren el riesgo de perder parte o la totalidad de su inversión si los tipos de cambio de la divisa pertinente (o cesta de divisas) no se mueven en la dirección que habían previsto. Además, si los Valores de divisas se liquidan en una divisa distinta de la divisa local del Titular, los efectos negativos de las fluctuaciones del tipo de cambio serán mayores.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility.
4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.
5. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors.
6. Adverse economic and financial conditions have in the past had and may in the future have an impact on the BNP Paribas Group and the markets in which it operates.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Depending on the terms of the Securities, the amount due on redemption will be determined by reference to the value of the Commodity. If the Commodity does not perform as expected, this will have a material adverse impact on the amounts that Holders will receive in respect of the Securities and may also negatively affect the value of the Securities: exposure to one or more commodity and/or commodity index, similar market risks to a direct commodity investment, market disruption and adjustment events which may have an adverse effect on the value or liquidity of the Securities, delays to the determination of the final level of a commodity index resulting in delays to the payment of the Cash Settlement Amount and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

También hay riesgos asociados a los Valores, incluidos :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s). Additionally, the return may depend on other market factors such as interest rates, the implied volatility of the Underlying Reference(s) and the time remaining until exercise (in case of European Style Warrants). The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Depending on the terms of the Securities, the amount due on redemption will be determined by reference to the value of the Commodity. If the Commodity does not perform as expected, this will have a material adverse impact on the amounts that Holders will receive in respect of the Securities and may also negatively affect the value of the Securities. The value of the Securities will be dependent on the performance of a future or option contract. If such underlying futures or options contract does not perform as expected, an investor in such types of Securities may receive a lower return (and could receive a significantly lower return) than anticipated: exposure to one or more commodity and/or commodity index, similar market risks to a direct commodity investment, market disruption and adjustment events which may have an adverse effect on the value or liquidity of the Securities, delays to the determination of the final level of a commodity index resulting in delays to the payment of the Cash Settlement Amount and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de. Además, la rentabilidad puede depender de otros factores de mercado tales como tipos de interés, la volatilidad implícita del(de los) Subyacente(s) de Referencia y el tiempo restante hasta el ejercicio (en el caso de Warrants de estilo europeo). El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Dependiendo de los términos de los Valores, el importe adeudado en la fecha de amortización se determinará por referencia al valor de la Materia prima. Si la Materia prima no obtiene el rendimiento esperado, los importes que los Titulares recibirán con respecto a los Valores, y posiblemente también el valor de los Valores, se verán afectados negativamente de forma significativa. El valor de los Valores dependerá del rendimiento de un contrato de futuros u opciones. Si dicho contrato de futuros u opciones subyacente no obtiene el rendimiento esperado, un inversor en este tipo de Valores puede recibir un rendimiento más bajo (y podría recibir un rendimiento significativamente más bajo) de lo previsto.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of knock-out and automatic early redemption features. The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to

be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de knock-in. El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Leverage Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of knock-out and automatic early redemption features. The effect of leverage on the Securities may be either positive or negative.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to

be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Principales factores de riesgo que afecten al garante

2. Una interrupción o un fallo en los sistemas informáticos del Grupo BNP Paribas podría causar pérdidas sustanciales de información de clientes, dañar la reputación del Grupo BNP Paribas y provocar pérdidas financieras.
3. El Grupo BNP Paribas podría incurrir en pérdidas sustanciales en sus actividades comerciales y de inversión debido a las fluctuaciones y la volatilidad del mercado.
4. Los ajustes del valor contable de las carteras de valores y derivados del Grupo BNP Paribas y de la propia deuda del Grupo BNP Paribas podrían tener un efecto adverso en sus ingresos netos y en su patrimonio neto.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Apalancamiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia y de si se aplican características de knock-in. El efecto de apalancamiento sobre los Valores puede ser tanto positivo como negativo.

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Yield Enhancement Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of a cap features.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Mejora del Rendimiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia [y de si se aplican características de límite máximo (cap)].

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

Los Valores vinculados a un índice están vinculados al rendimiento de un índice subyacente (un "Índice"), que puede tomar como referencia varias clases de activos, como acciones, bonos, tipos de cambio de divisas o datos de precios de propiedades, o bien una combinación de estos. Los inversores en Valores vinculados a un índice se enfrentan al riesgo de un conjunto más amplio de circunstancias que pueden hacer que los activos subyacentes al Índice no obtengan los rendimientos esperados en comparación con una inversión en valores de deuda convencionales. En consecuencia, el rendimiento de una inversión en Valores vinculados a un índice tiene más probabilidades de verse afectado negativamente que una inversión en valores de deuda convencionales.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Warrants, including:

1. Risk relating to the structure of the Warrants:

Yield Enhancement Products: Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of a cap features.

2. Risk relating to the Underlying and its Disruption and Adjustments:

Unlike a direct investment in any Share(s), Stapled Share(s), GDR(s) and/or ADR(s) comprising the Underlying Reference(s) (together the "Share(s)"), an investment in Share Securities does not entitle Holders to vote or receive dividends or distributions (unless otherwise specified in the Final Terms). Accordingly, the return on Share Securities will not be the same as a direct investment in the relevant Share(s) and could be less than a direct investment: exposure to one or more share(s) (including shares which are attached to each other trading as a single unit ("**Stapled Shares**")), similar market risks to a direct equity investment, global depositary receipt ("**GDR**") or American depositary receipt ("**ADR**"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference.

3. Risks related to the trading markets of the Warrants:

Factors affecting the value and trading price of Securities: The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risk:

Meeting of Holders: The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

¿Cuáles son los principales riesgos específicos de los valores?

Factores de riesgo más esenciales específicos de los valores

También hay riesgos asociados a los Valores, incluidos :

1. Riesgo relacionado con la estructura de los Valores :

Productos de Mejora del Rendimiento : Los inversores pueden estar expuestos a una pérdida parcial o total de su inversión. La rentabilidad de los Valores depende de la rentabilidad del/de los Subyacente(s) de Referencia [y de si se aplican características de límite máximo (cap)].

2. Riesgo relativo al Subyacente y a su Interrupción y Ajustes :

A diferencia de una inversión directa en cualquiera de las Acciones, acciones atadas, GDR y/o ADR que comprendan los Subyacentes de referencia (en conjunto, las "Acciones"), una inversión en Valores de acciones no da derecho a los Titulares a votar o recibir dividendos o distribuciones (a menos que se especifique lo contrario en las Condiciones finales). En consecuencia, el rendimiento de los Valores de acciones no será el mismo que el de una inversión directa en las Acciones pertinentes y podría ser inferior a este.

3. Riesgos relativos a los mercados de negociación de los Valores :

Factores que afectan al valor y al precio de cotización de los Valores : El precio de cotización de los Valores puede verse afectado por una serie de factores que incluyen, entre otros, el precio, el valor o el nivel pertinentes del Subyacente de referencia, el tiempo restante hasta la fecha de amortización prevista de los Valores, la volatilidad real o implícita asociada con los Subyacentes de referencia y el riesgo de correlación de los Subyacentes de referencia pertinentes. La posibilidad de que el valor y el precio de cotización de los Valores fluctúen (ya sea al alza o a la baja) depende de una serie de factores que los inversores deben considerar cuidadosamente antes de comprar o vender los Valores.

4. Riesgos legales :

Juntas: Las condiciones de los Valores contendrán disposiciones para convocar juntas de titulares de dichos Valores para considerar cuestiones que afecten a sus derechos de forma general. Estas disposiciones permiten que las mayorías definidas vinculen a todos los titulares, incluidos los titulares que no asistan y voten en la junta pertinente y los titulares que voten de forma contraria a la mayoría.
