

TO THE NATIONAL SECURITIES MARKET COMMISSION

Madrid, 25 April 2018

Ref.: presentation to analysts announced this morning relating to the results of Ebro Foods Group for the first quarter 2018.

Find enclosed the presentation to analyst announced this morning, relating to the results for the first quarter 2018 that will be held today in the Board Meeting Room located in the second floor of our Head office in Paseo de la Castellana 20th, Madrid.

Yours faithfully,

Luis Peña Pazos Secretary of the Board of Directors

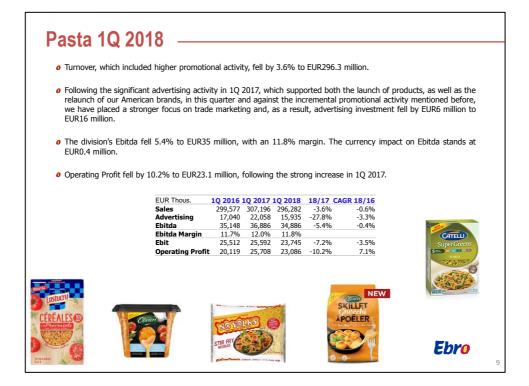

Pasta 1Q 2018 — Prices for durum wheat have been very stable, with a downward trend, and harvests are expected to be strong in Europe. In North America the outlook for the coming planting season, suggests that the harvest will be similar to the previous year. • The current raw materials situation is driving promotional activity in the sector, which is highly competitive not only among private labels and food service, but also among the major brands. • We are redefining our sandwich business in France, which is facing strong competition and the fact that it requires a labour intensive business model. In spite of this, Panzani has increased its market share and consolidated its leading position in the market, which is reassuring in terms of strategy. • Garofalo continues to be successful in markets such as Spain and France, but it is expensive to enter these mature markets. In the USA, we have been hit by rising logistics costs, which were already mentioned in the rice section. Against this complicated backdrop, however, Riviana has increased its market share, confirming the success of the ongoing recovery strategy for our American brands. We would highlight the following successful outcomes of this strategy: • We have recovered a key distributor for the American southeast, who we had lost some years ago. • Distributors are reacting very positively to the new products that we are to launch this year, such as Thick & Hearty and Homestyle pasta O During the first quarter, we completed the acquisition of Bertagni, a strategic move that now makes us the second biggest competitor in the global fresh pasta market, and which we are convinced will drive synergies with Panzani and Olivieri. **Ebro**
