

TECNICAS REUNIDAS

## **SAUDI ARAMCO awards Técnicas Reunidas packages 9 and 11 of Marjan Upstream program**

Saudi Aramco, the Saudi Arabian state-owned oil company, has awarded Técnicas Reunidas part of the facilities of its new gas plant in Tanajib, with a total capacity of 2,500 MMSCFD and 85 MBCD of condensate from the oil and gas fields of Marjan, Safaniyah and Zuluf, in eastern Saudi Arabia.

The contracts, that have a total duration of 44 months and a combined value of approximately 3,000 million USD, include gas inlet facilities, storage and compression packages, as well as the recovery and fractionation of NGL.

The scope of works related to these packages include engineering, supply of equipment and materials, construction, installation and commissioning until mechanical completion. The new facilities will supply gas to the gas country's network, will be reinjected to the offshore fields and will be used to produce of ethane, butane, propane, pentane and other associated products for multiple clients.

The award of this contract demonstrates the position of Técnicas Reunidas in Saudi Arabia and confirms the continued confidence placed by one of its most important clients, Saudi Aramco. Since 2003, Técnicas Reunidas has contributed to the development of nineteen of the most relevant investments in the country. Técnicas Reunidas has participated in the Production Facilities of some of the most important upstream oil and gas fields in Saudi Arabia (Berri, Qatif, Abqaiq, Hawiyah, Khursaniyah, Hasbah and Haradh). Also, the company is the only contractor that has been awarded contracts for the five largest refineries of the country (Jubail, Yanbu, Rabigh, Jizan and Ras Tanura).

Saudi Aramco is the largest oil company in the world and also the leader in exploration, production, refining and distribution of oil and petroleum products, as well as the largest and exporter of LNG. Based in Dhahran (Saudi Arabia), Saudi Aramco has subsidiaries and branches in Saudi Arabia, China, Japan, India, the Netherlands, South Korea, Singapore, the United Arab Emirates, Egypt, the United Kingdom and the United States.

Técnicas Reunidas is one of the leading international engineering and construction companies in the oil and gas, refining, petrochemical and power generation sectors for a wide variety of clients around the world. Since 1960, it has designed and built more than 1,000 industrial plants in more than 50 countries.
