### Glossary

- Chain sales: Chain sales are own store sales plus franchised and master franchised store sales as reported to us by the franchisees and master franchisees
- LfL chain sales growth: LfL chain sales growth is chain sales growth after adjustment for the effects of changes in scope and the effects of changes in the euro exchange rate as explained below
  - Scope adjustment. If a store has been open for the full month, we consider that an "operating month" for the store in question; if not, that month is not an "operating month" for that store. LfL chain sales growth takes into account only variation in a store's sales for a given month if that month was an "operating month" for the store in both of the periods being compared. The scope adjustment is the percentage variation between two periods resulting from dividing (i) the variation between the chain sales excluded in each of such periods ("excluded chain sales") because they were obtained in operating months that were not operating months in the comparable period, by (ii) the prior period's chain sales as adjusted to deduct the excluded chain sales of such period (the "adjusted chain sales"). In this way, we can see the actual changes in chain sales between operating stores, removing the impact of changes between the periods that are due to store openings and closures; and
  - Euro exchange rate adjustment. We calculate LfL chain sales growth on a constant currency basis in order to remove the impact of changes between the euro and the currencies in certain countries where the Group operates. To make this adjustment, we apply the monthly average euro exchange rate of the operating month in the most recent period to the comparable operating month of the prior period
- **EBITDA:** EBITDA is operating profit plus asset depreciation and amortization
- Underlying EBITDA: Underlying EBITDA is EBITDA excluding IPO related costs in FY2016 and the extraordinary corporate deal costs in FY2017.
- **Digital delivery chain sales:** Digital delivery chain sales are the delivery chain sales made through digital channels (PC, web responsive and Telepizza application), expressed in percentage terms. Digital delivery chain sales (both own and franchised) are recorded automatically in the Company's SAGA store information system when the online order is placed by the customer
