

GLORIA CALVO DÍAZ, SECRETARY OF BANKINTER'S BOARD OF DIRECTORS

I HEREBY CERTIFY THAT:

- a) The Bank's individual and consolidated annual financial statements for 2022 have been translated into English.
- b) The Spanish version will prevail in the event of any discrepancy.
- c) Neither the individual audit report nor the statement of responsibility for the annual financial report have been translated.

In witness whereof, I issue this certificate for the Spanish National Securities Market Commission in Madrid, 15th March 2023.

Signed: Gloria Calvo Díaz
Secretary of the board

bankinter.

**Consolidated
Annual
Accounts**

2022

Bankinter, S.A. and its subsidiaries

Auditor's report

Consolidated annual accounts at December 31, 2022

Consolidated management report

This version of our report is a free translation of the original, which was prepared in Spanish. All possible care has been taken to ensure that the translation is an accurate representation of the original. However, in all matters of interpretation of information, views or opinions, the original language version of our report takes precedence over this translation.

Independent auditor's report on the consolidated annual accounts

To the shareholders of Bankinter, S.A.

Report on the consolidated annual accounts

Opinion

We have audited the consolidated annual accounts of Bankinter, S.A. (the Parent company) and its subsidiaries (the Group), which comprise the balance sheet as at 31 December 2022, and the income statement, statement of recognised income and expense, total statement of changes in equity, cash flow statement and related notes, all consolidated, for the year then ended.

In our opinion, the accompanying consolidated annual accounts present fairly, in all material respects, the equity and financial position of the Group as at 31 December 2022, as well as its financial performance and cash flows, all consolidated, for the year then ended, in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU) and other provisions of the financial reporting framework applicable in Spain.

Basis for opinion

We conducted our audit in accordance with legislation governing the audit practice in Spain. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated annual accounts* section of our report.

We are independent of the Group in accordance with the ethical requirements, including those relating to independence, that are relevant to our audit of the consolidated annual accounts in Spain, in accordance with legislation governing the audit practice. In this regard, we have not rendered services other than those relating to the audit of the accounts, and situations or circumstances have not arisen that, in accordance with the provisions of the aforementioned legislation, have affected our necessary independence such that it has been compromised.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated annual accounts of the current period. These matters were addressed in the context of our audit of the consolidated annual accounts as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters	How our audit addressed the key audit matters
<p data-bbox="277 448 805 537">Measurement adjustments for impairment of financial assets at amortised cost, loans and advances – customers</p> <p data-bbox="277 571 813 716">The Group applies the International Financial Reporting Standard 9 Financial instruments (IFRS 9) when it comes to measurement impairment adjustments under an expected loss model.</p> <p data-bbox="277 750 837 907">The calculation of impairment adjustments to the credit portfolio is one of the most significant estimates in the preparation of the accompanying annual accounts, reason why it has been considered as a key audit matter.</p> <p data-bbox="277 929 837 1153">This estimation has increased its complexity due to the situation of uncertainty derived from the current macroeconomic situation , which implies the incorporation of additional elements of judgment in the internal models. The internal models used by the Group take into account items such as:</p> <ul data-bbox="277 1176 837 1803" style="list-style-type: none"> <li data-bbox="277 1176 805 1276">• The classification of the various credit portfolios and debtors based on their credit risk profile. <li data-bbox="277 1299 829 1400">• The identification and classification of assets under special supervision or that are impaired (“Stage 2” or “Stage 3”). <li data-bbox="277 1422 813 1523">• The estimation of the probability of default (PD) and the loss given default (LGD) for each of the models. <li data-bbox="277 1545 837 1803">• The use of prospective information in the different scenarios considered in the models, as well as the probability of their occurrence. The most relevant prospective information refers, among others, to the expected evolution of unemployment rates, the gross domestic product and the price of housing. <p data-bbox="351 1825 821 1948">To define the base scenario, the Group has considered the macroeconomic forecasts published by central banks of Spain, Portugal and Ireland.</p> <ul data-bbox="277 1971 837 2049" style="list-style-type: none"> <li data-bbox="277 1971 837 2049">• The reasonableness of applying expert judgements to models, when applicable. 	<p data-bbox="861 571 1452 750">Our work has focused primarily on the analysis, evaluation and verification of the general internal control framework, as well as the performance of detailed tests on provisions that are collectively and individually estimated, in collaboration with our internal specialists in credit risk models.</p> <p data-bbox="861 772 1460 974">With respect to internal control system, we have obtained an understanding of the general internal control framework and main procedures and controls implemented by the Group, including the validation of key controls. Our procedures have focused on the following aspects:</p> <ul data-bbox="861 996 1468 1400" style="list-style-type: none"> <li data-bbox="861 996 1452 1120">• Analysis the methodologies developed by the Group for the calculation of provisions, including an understanding and validation of updates made during the period. <li data-bbox="861 1142 1468 1220">• Evaluation of regulatory compliance and the operation of the internal models approved. <li data-bbox="861 1243 1420 1310">• The reasonableness of macroeconomic scenarios used. <li data-bbox="861 1332 1436 1400">• The periodic evaluation of risks and monitoring for the classification of assets. <p data-bbox="861 1422 1460 1489">We have also performed detailed tests consisting of:</p> <ul data-bbox="861 1512 1468 2105" style="list-style-type: none"> <li data-bbox="861 1512 1460 1736">• Selective checks of the calculation methods, the portfolio segmentation, the classification of loans, the information used for the estimations, the criteria for determining a significant increase in credit risk and the inclusion of certain attributes in the databases. <li data-bbox="861 1758 1468 1960">• Replication of a sample of models, considering the prospective information and the scenarios used by the Group, in order to check the results obtained in the calculation of the impairment collectively estimated for certain credit portfolios. <li data-bbox="861 1982 1460 2105">• Obtaining of a selection of individual files to evaluate their adequate classification and the recognition, if appropriate, of the relevant impairment.

Key audit matters	How our audit addressed the key audit matters
<ul style="list-style-type: none"> The realisable value of the collateral associated with credit transactions. <p>On the other hand, during the year 2022, the Group has carried out an update of the models as a result of the gained experience, with regard to the estimation of the expected losses in the different stages and the criteria for determining the existence of a significant increase in risk.</p> <p>In addition, the Group carries out an individual estimation in the impairment calculations for those assets considered as significant, based on a detailed future cash flows analysis.</p> <p>See Notes 5, 10 and 44 to the accompanying consolidated annual accounts.</p>	<p>As result of the procedures described above, no differences have arisen outside of a reasonable range, with respect to the amount of measurement adjustments for impairment of financial assets at amortised cost, loans and advances – customers in the context of the applicable accounting framework and under the accompanying consolidated annual accounts are prepared.</p>

Provisions for litigation and claims

The Group is involved in some administrative, judicial or other proceedings, relating primarily to legal matters deriving from the normal course of its business.

The Group's directors and management have designed a policy in this respect, under which they decide when to recognize a provision for these items.

Specifically, for certain legal processes, the Group estimates the provision amount, applying consistent calculation procedures with the experience of success, legal analysis and uncertainty inherent conditions of in the obligations they cover.

Both the determination of the expected result of those proceedings and the evaluation of their financial effect are generally particularly complex and uncertain in terms of their possible outcome, the period end and/or the definitive amount.

As a result, the estimate of provisions for litigation and claims is one of the largest components of judgment and estimated items with respect to their possible impact on the accompanying consolidated annual accounts, reason why it has been considered as a key audit matter.

We have carried out our understanding and analysis of the process implemented by the Group to identify and assess open litigation and proceedings as well as the Group's process for recognizing provisions and the relevant internal controls, focusing our procedures on aspects such as:

- Understanding the internal control environment and the policy for classifying claims and litigation approved by the Group, and the assignment of any provision, including controls related with calculation and analyses of legal provisions.
- Evaluation of the methodology used by the Group in the estimation of the main open legal processes.
- Analyzing the main types of claims and litigation relating to legal matters, in progress at December 31, 2022.
- Testing of the information related with the lawsuits evolution and the sentences evolution in the main open legal processes
- Analysis of a selection of lawsuits, verifying the proper grouping of cases by type, in order to calculate provisions.

Key audit matters	How our audit addressed the key audit matters
See Notes 20 to the accompanying consolidated annual accounts.	<ul style="list-style-type: none">• Testing of the historical data used to determine the provisions to be maintained, regarding the results of the main judicial process. <p>As a result of the procedures performed regarding the provisions for litigation and claims, no differences were shown outside of a reasonable range, regarding to the amounts recognized on the accompanying consolidated annual accounts</p>

Automation of the financial reporting systems

The Group's operations are largely dependent on the calculations, processing and information managed automatically by the diverse information systems that are used.

The effectiveness of the general internal control framework for information systems relating to the accounting recognition and closing process is essential for the performance of certain audit procedures based on internal controls.

The knowledge, evaluation and validation of general controls relating to financial reporting systems, due to their nature and the extension of the necessary audit procedures, constitute a critical area of our work, reason why it has been considered as a key audit matter.

Our work has consisted of performing certain procedures within the general internal control area associated with information systems, and the processes that support the Group's accounting recognition and closings. We have obtained an understanding of the functionalities and involvement of the various Group information systems within the accounting recognition and closing process, with the support of our internal specialists in information systems.

With respect to information systems considered to be relevant in this context, we performed tests regarding the validation of the following aspects:

- General controls over the management of authorization to access financial reporting systems and with respect to authorization of personnel to implement changes in computer processes.
- The existence of management and control tools for automatic processes and potential issues.
- Analysis of the manual entry generation process and selective extraction and filtering tests for the unusual entries included in the financial reporting systems.
- Verification of the automatic controls that support the main key business processes that affect the recognition of items in the accounting systems.

As a result of the procedures described above, we did not identify relevant issues that could affect the accompanying consolidated annual accounts.

Other information: Consolidated management report

Other information comprises only the consolidated management report for the 2022 financial year, the formulation of which is the responsibility of the Parent company's directors and does not form an integral part of the consolidated annual accounts.

Our audit opinion on the consolidated annual accounts does not cover the consolidated management report. Our responsibility regarding the consolidated management report, in accordance with legislation governing the audit practice, is to:

- a) Verify only that the consolidated statement of non-financial information, certain information included in the Annual Corporate Governance Report and the Annual Report on Directors' Remuneration, as referred to in the Auditing Act, have been provided in the manner required by applicable legislation and, if not, we are obliged to disclose that fact.
- b) Evaluate and report on the consistency between the rest of the information included in the consolidated management report and the consolidated annual accounts as a result of our knowledge of the Group obtained during the audit of the aforementioned financial statements, as well as to evaluate and report on whether the content and presentation of this part of the consolidated management report is in accordance with applicable regulations. If, based on the work we have performed, we conclude that material misstatements exist, we are required to report that fact.

On the basis of the work performed, as described above, we have verified that the information mentioned in section a) above has been provided in the manner required by applicable legislation and that the rest of the information contained in the consolidated management report is consistent with that contained in the consolidated annual accounts for the 2022 financial year, and its content and presentation are in accordance with applicable regulations.

Responsibility of the directors and the audit commission for the consolidated annual accounts

The Parent company's directors are responsible for the preparation of the accompanying consolidated annual accounts, such that they fairly present the consolidated equity, financial position and financial performance of the Group, in accordance with IFRS-EU and other provisions of the financial reporting framework applicable to the Group in Spain, and for such internal control as the aforementioned directors determine is necessary to enable the preparation of consolidated annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated annual accounts, the Parent company's directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the aforementioned directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Parent company's audit commission is responsible for overseeing the process of preparation and presentation of the consolidated annual accounts.

Auditor's responsibilities for the audit of the consolidated annual accounts

Our objectives are to obtain reasonable assurance about whether the consolidated annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with legislation governing the audit practice in Spain will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated annual accounts.

As part of an audit in accordance with legislation governing the audit practice in Spain, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Parent company's directors.
- Conclude on the appropriateness of the Parent company's directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated annual accounts, including the disclosures, and whether the consolidated annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated annual accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Parent company's audit commission regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Parent company's audit commission with a statement that we have complied with relevant ethical requirements, including those relating to independence, and we communicate with the aforementioned those matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Parent company's audit commission, we determine those matters that were of most significance in the audit of the consolidated annual accounts of the current period and are therefore the key audit matters.

We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

European single electronic format

We have examined the digital files of the European single electronic format (ESEF) of Bankinter, S.A. and its subsidiaries for the 2022 financial year that comprise an XHTML file which includes the consolidated annual accounts for the financial year and XBRL files with tagging performed by the entity, which will form part of the annual financial report.

The directors of Bankinter, S.A. are responsible for presenting the annual financial report for 2022 financial year in accordance with the formatting and markup requirements established in the Delegated Regulation (EU) 2019/815 of 17 December 2018 of the European Commission (hereinafter the ESEF Regulation). In this regard, the Annual Corporate Governance Report and the Annual Report on Directors' Remuneration have been incorporated by reference in the consolidated management report.

Our responsibility is to examine the digital files prepared by the Parent company's directors, in accordance with legislation governing the audit practice in Spain. This legislation requires that we plan and execute our audit procedures in order to verify whether the content of the consolidated annual accounts included in the aforementioned digital files completely agrees with that of the consolidated annual accounts that we have audited, and whether the format and markup of these accounts and of the aforementioned files has been affected, in all material respects, in accordance with the requirements established in the ESEF Regulation.

In our opinion, the digital files examined completely agree with the audited consolidated annual accounts, and these are presented and have been marked up, in all material respects, in accordance with the requirements established in the ESEF Regulation.

Report to the audit commission of the Parent company

The opinion expressed in this report is consistent with the content of our additional report to the audit commission of the Parent company dated 22 February 2023.

Appointment period

The General Ordinary Shareholders' Meeting held on 23 March 2022 appointed us as auditors of the Group for a period of one year, for the year ended 31 December 2022.

Previously, we were appointed by resolution of the General Ordinary Shareholders' Meeting for a period of three years and we have audited the accounts continuously since the year ended 31 December 2016.

Services provided

Services provided to the Group for services other than the audit of the accounts are disclosed in note 41 to the consolidated annual accounts.

Of which: Interest received		1,692,647	1,317,773
Of which: Interest paid		260,396	198,439

The accompanying notes 1 to 52 and appendices I through VI attached hereto form an integral part of the consolidated statement of cash flows for the year ended 31 December 2022.

(*) Presented for comparison purposes only.

Bankinter Group

Notes to the consolidated financial statements for the year ended 31 December 2022

1. Nature, activities and composition of the Group, and the most significant events during the year

Bankinter, S.A. was incorporated in Spain by notarial deed issued in Madrid on 4 June 1965, under the name Banco Intercontinental Español, S.A. On 24 July 1990 it acquired its current name. It is entered in the Official Banks and Bankers Register. Its Tax Identification number is A-28157360 and it belongs to the Deposit Guarantee Fund with code number 0128. The company address is Paseo de la Castellana 29, 28046 Madrid, Spain. Bankinter, S.A.'s legal entity identification (LEI) code is VWMYAEQSTOPNVOSUGU82.

Bankinter, S.A. (the "Bank" or the "Entity") engages in banking activities and is subject to the legislation and regulations applicable to banks operating in Spain.

In addition to the activities it directly carries out, the Bank is the parent company of a group of subsidiaries that are dedicated to various activities (mainly banking services, investment services, asset management and credit cards) and which constitute, together with the Bank, the Bankinter Group (hereinafter the "Group" or "Bankinter Group"). As a result, the Bank is obliged to prepare, in addition to its own separate financial statements, the Group's consolidated financial statements, including investments in joint ventures and associates.

The subsidiaries forming part of Bankinter Group are listed in Note 13 "Business combinations, investments in joint ventures and associates".

The Group's consolidated financial statements have been prepared in accordance with the accounting principles described in Note 5 "Accounting principles and measurement bases applied".

Bankinter, S.A.'s separate balance sheet as at 31 December 2022 and 2021 and the separate income statement for the years then ended are presented in Appendix IV.

Key highlights for Bankinter Group in the year include:

- In the year, Bankinter and Liberty Seguros reached an agreement to jointly carry out their insurance businesses through **Bankinter Liberty Hogar y Auto, S.A.**, whose main focus will be marketing car and homeowners' insurance products and services. With this transaction, which is subject to securing the pertinent authorisations from regulators, Liberty will acquire 50.01% of Bankinter Hogar y Auto, S.A. from Bankinter and Bankinter will retain the remaining 49.99%. The products' design and

development will benefit from Liberty Seguros' expertise, and they will be distributed exclusively through Bankinter's online and offline retail networks in Spain and Portugal, including EVO Banco, Bankinter Group's fully digital bank. At the end of the reporting period, the company was still not operating, and the regulatory authorisations required to execute the agreement were still being processed.

- In the first half of the year, Bankinter, S.A. set up a wholly subsidiary, **Bankinter Investment, S.A.U.** Bankinter, S.A. has spun off to Bankinter Investment S.A.U. the assets and liabilities of the economic unit that the investment banking business had been running, until now, essentially: i) origination and structuring of alternative investment operations; ii) advice on corporate operations (mainly M&A) and; iii) advice on structured and alternative financing operations.
- **Bankinter Investment SGEIC**, alternative investment fund management firm subordinate to Bankinter Investment, S.A.U., was also incorporated. This firm aims to make progress in alternative investing options. It offers alternative investing under delegated management, tailored to each customer's profile and striving for appropriate investment diversification. Under the new, recently approved regulatory framework (Law 18/2022, of 28 September, on creating and growing businesses), this alternative investment platform, through the management firm, will be available for investments from 10,000 euros. The firm will keep the Bank's model: investments in real-economy sectors carefully selected for their potential for growth, search for the best professional management for each investment type, close tracking of all investments to protect the interests of investors, and co-investment of Bankinter Investment S.A.U. and its expert sectoral partners, and other investors.
- **Bankinter International Notes S.à r.l.**, a wholly owned Bankinter Group subsidiary located in Luxembourg, began operations during the year. It was set up for the issuance of structured bonds, which are marketed by the Bankinter, S.A. parent.
- At the end of the reporting period, Bankinter Group, through its subsidiary engaged in consumer lending (Bankinter Consumer Finance, E.F.C.), was at an advanced stage of negotiation with Sonae SGPS, S.A. to create a joint venture to become leaders in consumer lending in Portugal. This partnership will rely on the combination of the current consumer businesses held by both partners in Portugal.
- The period also featured the early redemption of the entire series of fixed-rate 2.50% **subordinated notes**, with a nominal amount of 500 million euros, issued in April 2017 (Note 19). In the period, **covered bonds** amounting to 750 million euros with maturity at 5.5 years (note 19) were issued.
- Also, 2,550 million euros drawn by the Bank from the lines of the European Central Bank's **third series of targeted longer-term refinancing operations** (TLTRO III) expired, with 11,682 million euros still to expire. The conditions of these TLTRO III lines have

been recalibrated by the ECB as part of its monetary policy measures to fight inflation. Specifically, the ECB has set its interest rate as the average of the interest rate of its own deposit facility during the remaining period until each drawdown expires; and has enabled early repayment of the drawdowns (Note 19).

- Law 38/2022 was approved in December 2022, establishing a **temporary tax rate** on credit institutions: credit institutions and credit financial establishments operating in Spanish territory whose total income from interest and fees and commissions, calculated according to the applicable accounting regulations, for 2019 is equal to or higher than 800 million euros must pay this temporary tax rate for 2023 and 2024. This temporary tax rate will have the legal consideration of public non-tax charges. The amount to be paid by each liable party will be the result of applying 4.8% of the sum of the net interest income plus the revenue and expenses from fees and commissions derived from their operations in Spain. Note 52. Events after the reporting period).

2. Accounting standards applied

a) Basis of preparation of the consolidated financial statements

In accordance with Regulation (EC) No. 1606/2002 of the European Parliament and of the Council of 19 July 2002, all companies that are governed by the Law of a member state of the European Union, and whose equity securities are listed on a regulated market of any of the States that constitute it, must prepare their consolidated financial statements in accordance with the International Financial Reporting Standards ("IFRS") that have been previously adopted by the European Union.

In order to adapt the accounting regime of Spanish credit institutions to the principles and criteria of the International Financial Reporting Standards adopted by the European Union regulations (IFRS-EU), the Banco de España published Circular 4/2017, of 27 November, entry into force scheduled for 1 January 2018.

Bankinter Group's consolidated financial statements were authorised for issue by the Bank's directors (at the meeting of the board of directors held on 22 February 2023) in accordance with the regulatory framework applicable to the Group, as set out in the Code of Commerce and other company law, and the International Financial Reporting Standards as adopted by the European Union, and taking into account Banco de España Circular 4/2017, of 27 November, and subsequent amendments, and other regulations. The consolidated financial statements will be presented for approval at the Annual General Meeting and it is expected that they will be approved with modification.

The notes to the consolidated financial statements contain information in addition to that presented in the consolidated balance sheet, the consolidated income statement, the consolidated statement of total changes in equity, the consolidated statement of recognised

income and expense and the consolidated statement of cash flows. They contain narrative descriptions or breakdowns of these statements in a clear, relevant, reliable and comparable manner.

The Group's consolidated financial statements for 2021 were approved at the Annual General Meeting held on 23 March 2022.

The accounting policies and methods used in preparing these consolidated financial statements are the same as those applied in the consolidated financial statements for the previous year, taking into consideration the Standards and Interpretations that became effective in the current year.

Appendix II describes the changes in standards and Interpretations classified into the following categories:

- Mandatory standards, amendments and interpretations for all annual periods beginning on or after 1 January 2022.
- Standards, amendments and interpretations of existing standards that cannot be adopted early or that have not been endorsed by the European Union.
- Standards, amendments and interpretations that have not yet become effective but may be adopted early the annual periods beginning on or after 1 January 2023.

b) Accounting principles and measurement bases

The consolidated financial statements were prepared in accordance with generally accepted accounting principles and measurement bases, as described in Note 5 "Accounting principles and measurement bases applied".

Unless stated otherwise, these consolidated financial statements are presented in thousands of euros. The accounting balances have been rounded to present amounts in thousands of euros. Therefore, amounts appearing in certain tables may not be the exact arithmetic sum of the figures preceding them.

c) Judgements and estimates used

The information included in these consolidated financial statements is the responsibility of the Group's directors. Estimates were used to measure certain assets, liabilities, revenue, expenses and obligations, which were made by the Group's senior management and confirmed by the directors. These estimates relate mainly to:

- Impairment losses on certain assets, including the value of real estate collateral and the definition of significant increase (Notes 10 and 44).

- the useful life attributed to tangible and intangible assets, and the recoverability of goodwill on consolidation (Notes 14, 15 and 16).
- the fair value of certain unlisted assets and properties (Notes 43 and 12).
- the actuarial assumptions used to calculate liabilities post-employment benefit obligations (Note 27).
- the calculation of legal and tax-related provisions (Note 20).

Although these estimates were made using the best information available at the end of the reporting period, future events may require it necessary to change them in future periods. In accordance with IAS 8, changes in accounting estimates are made prospectively, with any effects recognised in the consolidated income statement of the period or periods affected.

d) Basis of consolidation

The definition of the Group is based on prevailing accounting legislation. Investees are all subsidiaries, joint ventures and associates.

Subsidiaries are entities over which the Group has the ability to exercise control. The Group controls a company when it is exposed, or has rights, to variable returns from its involvement with the investee and it has the ability to affect those returns through its power over the investee. No company in which the Group holds less than 50% is considered a subsidiary.

The financial statements of subsidiaries were fully consolidated. Accordingly, all significant balances and transactions between consolidated companies have been eliminated in the consolidation process.

For companies acquired by the Group in the year, only the profit or loss for the period between the acquisition date and the end of the reporting period is included in the consolidated financial statements. Similarly, for companies sold by the Group during the year, the profit or loss for the period between the beginning of the period and the date of disposal is consolidated.

Investees that are not subsidiaries but are jointly controlled by the Group and another company or companies unrelated to the Group are joint ventures. A joint venture is also a contractual arrangement whereby two or more entities or venturers carry out transactions or hold assets so that strategic financial and operating decisions affecting the joint venture require the unanimous consent of the venturers, provided that these transactions or assets are not integrated in financial structures other than those of the venturers. In the consolidated financial statements, the financial information of joint ventures is accounted for using the equity method.

Associates are companies over which the Group has significant influence. Significant influence exists generally, but not exclusively, exists when the Group holds, directly or indirectly through other investees, 20% or more of the voting power of the investee. Investments in associates are accounted for using the equity method.

Consequently, investments in associates and joint ventures were measured at the percentage of the Group's interest in their capital adjusted for the dividends received and other equity eliminations. The Group's share of gains or losses on transactions with associates or joint ventures is eliminated. If as a result of losses the equity of an associate or joint venture is negative, the Group's presents the investment in the consolidated balance sheet with a value of zero, it is required to provide financial support.

In accordance with IAS 36, if there is any evidence of impairment of an investment in a joint venture or an associate, the carrying amount of the investment is compared with its recoverable amount, which is the higher of its value in use and fair value plus costs of disposal.

IFRS 3 defines a business combination as a transaction or other event in which an acquirer obtains control of one or more businesses.

Structured entities are investees of the Group designed so that voting and other rights are not a determining factor in deciding who controls the entity. Where the Group incorporates these companies to allow customers access to certain investments or to transfer risks to other purposes, whether or not it has control over the investee and, therefore, whether or not it should be consolidated is determined in accordance with current regulations. Note 13 provides a detail of structured entities.

e) Comparison of information

The information referred to 2021 in these notes to the consolidated financial statements for last period is presented exclusively for comparison with the information for this period.

There are no additional significant matters that may have a material effect on the comparability of the figures presented in relation to this year with those of the previous year.

3. Distribution of profit for the year

The proposed distribution of the profit obtained by Bankinter, S.A. during the year ended 31 December 2022 prepared by the Bank's directors and to be submitted for approval at the Annual General Meeting is as follows:

Distribution:	
Voluntary reserves	176,329
Legal reserve	-
Dividends (Note 21)	280,101
Profit distributed	456,430
Profit or loss for the period	456,430

Shareholders at the Annual General Meeting held on 23 March 2022 approved the distribution of 2021 profit, which consisted of earmarking 1,152,663 thousand euros to "Voluntary reserves" and 218,687 thousand euros to "Dividends".

Details of the interim dividends distributed and the relevant liquidity statements are set out in Note 21.

The proposed distribution of profit for the year ended 31 December 2022 of Bankinter, S.A. subsidiaries is as follows:

Proposed distribution of 2022 profit

	Thousands of euros		
	Profit/(loss)	Dividend	Reserves
Bankinter Consultoría, Asesoramiento y Atención Telefónica, S.A.	82		82
Bankinter Gestión de Activos, S.A., S.G.I.I.C.	39,015	39,015	
Hispanmarket, S.A.	515		515
Intermobiliaria, S.A.	(11,292)	-	(11,292)
Bankinter Consumer Finance, E.F.C., S.A.	55,447		55,447
Bankinter Sociedad de Financiación, S.A.U	4		4
Bankinter International Notes, S.L.	(669)		(669)
Bankinter Investment, S.A.	33,019	-	33,019
Bankinter Investment Gestora	(16)	-	(16)
Relanza Gestión, S.A.	183	183	
Bankinter Global Services, S.A.	4,240	4,240	
Bankinter Luxembourg, S.A.	(4,436)		(4,436)
BK Hogar y Auto	(1)	-	(1)
Naviera Goya, S.L.	(9)	-	(9)
Naviera Sorolla, S.L.	(7)	-	(7)
Evo Banco, S.A.	(18,098)		(18,098)
Avantcard D.A.C	19,406		19,406

The distribution of profit obtained by Bankinter, S.A. subsidiaries in the year ended 31 December 2021 approved by their respective Annual General Meetings was as follows:

Proposed distribution of 2021 profit

	Thousands of euros		
	Profit/(loss)	Dividend	Reserves
Bankinter Consultoría, Asesoramiento y Atención Telefónica, S.A.	839	-	839
Bankinter Gestión de Activos, S.A., S.G.I.I.C.	45,582	45,582	-
Hispanmarket, S.A.	369	-	369
Intermobiliaria, S.A.	(8,013)	-	(8,013)
Bankinter Consumer Finance, E.F.C., S.A.	7,699	-	7,699
Bankinter Sociedad de Financiación, S.A.U	3	-	3
Relanza Gestión, S.A.	73	73	-
Bankinter Global Services, S.A.	3,100	3,100	-
Bankinter Luxembourg, S.A.	7,164	-	7,164
Naviera Goya, S.L.	(4)	-	(4)
Naviera Sorolla, S.L.	(6)	-	(6)
Evo Banco, S.A.	(23,716)	-	(23,716)
Avantcard D.A.C	13,738	-	13,738

4. Deposit Guarantee Fund and Single Resolution Fund

The expense recognised for the Group's contributions to the Deposit Guarantee Fund and the Single Resolution Fund was recognised under "Other operating expenses" in the consolidated income statement (Note 33).

5. Accounting principles and measurement bases applied

These consolidated financial statements have been prepared in accordance with the accounting principles and measurement bases established by current accounting legislation. Following is a summary of the most significant ones:

a) Going concern principle

When preparing the consolidated financial statements the consideration was that the companies included in the Group will continue to operate on a going-concern basis. The application of the accounting standards is therefore not intended to determine the value of consolidated equity for the purposes of its complete or partial transfer or the resulting amount in the event of liquidation.

b) Accruals principle

Except with respect to the consolidated statement of cash flows, these consolidated financial statements have been prepared based on the actual flow of assets and services regardless of the date of payment or collection.

Interest accrued on both credit and debit transactions with settlement terms in excess of 12 months is calculated using the financial discounting method. In transactions with shorter terms, interest is accrued indistinctly using the financial discounting or the linear method.

Following general financial practice, transactions are recorded on the date on which they occur, which can differ from their corresponding value date. This date is used to calculate finance income and expenses.

c) Foreign currency transactions and balances

The functional and presentation currency for these annual financial statements is the euro. Accordingly, all balances and transactions in currencies other than the euro are considered to be denominated in "foreign currency".

Balances and transactions in foreign currency are translated to euros using the following rules:

- Monetary assets and liabilities have been converted to euros using the average spot exchange rates in the currency market at the year-end.
- Non-monetary items valued at historic cost have been converted to euros using the exchange rates in force on the acquisition date.
- Non-monetary items stated at fair value have been converted to euros using the exchange rates in force on the date on which the fair value was determined.
- Income and expenses have been converted to euros using the exchange rates in force on the transaction date (using the average exchange rates for the year for all transactions carried out during that year). Depreciation and amortisation charges has been translated to euros at the exchange rate applied to the related asset.
- Forward currency contracts: These transactions are translated at the rate of exchange at the reporting date in the forward foreign exchange market, bearing in mind the term of maturity.

Foreign exchange differences have been recognised in the consolidated income statement with the exception of non-monetary items measured at fair value whose fair value gain or loss is recognised in equity.

d) Consolidated statements of cash flows

The Group has used the indirect method for preparing the statements of cash flows, which contain the following expressions including the following classification criteria:

- Cash flows: inflows and outflows of cash and cash equivalents; such equivalents are as short-term investments with high liquidity and a low risk of alterations in their value. Cash and cash equivalents include the balances of "Cash, cash balances at central banks and other demand deposits" in the accompanying balance sheet.
- Operating activities: typical activities of credit institutions, as well as other activities that cannot be classified as investment or financing activities.
- Investment activities: the acquisition, disposal or use by other means of long-term assets and other investments not included in cash and cash equivalents.
- Financing activities: activities that produce changes in the size and composition of the shareholders' assets and of the liabilities that do not form part of the operating activities.

e) Consolidated statement of recognised income and expense

This part of the consolidated statement of changes in equity presents the income and expenses generated by the Group as a result of its business during the period. A distinction is made between items recognised in profit or loss in the consolidated income statement for the period and other income and expenses recognised directly in consolidated equity, in accordance with prevailing regulations.

Therefore, this statement presents:

- a. Consolidated profit or loss for the period.
- b. The net amount of income and expenses temporarily recognised as valuation adjustments in consolidated equity.
- c. The net amount of income and expenses definitively recognised in consolidated equity.
- d. Income tax accrued on b) and c) above, except for the valuation adjustments arising from investments in associates or joint ventures accounted for using the equity method, which are shown net.
- e. Total consolidated recognised income and expenses, calculated as the sum of the preceding points, showing the amount attributable to the parent company and amount attributable to minority interests (non-controlling interests) separately.

The amount of income and expenses related to companies accounted for using the equity method and recognised directly in equity are presented in this statement, regardless of their nature, under "Entities accounted for using the equity method".

Changes in income and expense recognised in equity as valuation adjustments are broken down into:

- **Valuation gains (losses):** records the amount of income recognised directly under consolidated equity, net of expenses arising during the year. The amounts recognised during the period in this item remain in this item, even if in the same period they are transferred to consolidated profit or loss or reclassified to another item.
- **Amounts transferred to profit or loss:** records the amount of valuation gains or losses previously recognised under consolidated equity, even if in the same year, that are recognized in the consolidated income statement.
- **Amount transferred to the initial carrying amount of the hedged items:** Records the amount of valuation gains or losses previously recognised under consolidated equity, even if in the same year, that are recognised in the initial value of assets or liabilities as a result of cash flow hedges.
- **Other reclassifications:** includes the amount of the transfers made in the period between valuation adjustment items, in accordance with the criteria established in the prevailing legislation.

The amounts of these items are presented gross, showing the relevant tax effect in "Income tax" except for the items relating to valuation adjustments for entities accounted for using the equity method, as indicated above.

f) Consolidated statement of total changes in equity

The consolidated statement of changes in equity presents all changes in equity, including those arising from changes in accounting policies and corrections of errors. This statement therefore shows a reconciliation of the carrying amount at beginning and end of the period relating to all items in consolidated equity, grouping together changes based on their nature into the following items:

- **Effect of changes in accounting policies and error corrections:** which includes the changes in consolidated equity that arise as a result of the retroactive restatement of the balances in the financial statements originating from changes in accounting policies or error corrections.
- **Total comprehensive income for the year:** includes, in aggregate, the total of the items recorded in the statement of recognised income and expense indicated above.

- **Other changes in equity:** records the rest of the items recognised under equity, such as increases or decreases in the appropriation fund, distribution of earnings, transactions involving treasury shares, payments involving equity instruments, transfers between equity items and any other increase or decrease in consolidated equity.

g) Recognition, measurement and classification of financial instruments

Financial assets and liabilities are recognised when the Group becomes party to the contractual provisions of the instrument.

Financial assets

In general, financial assets are initially measured at their fair value. Unless there is evidence to the contrary, the fair value of a financial instrument and initial recognition is the transaction price. For instruments without an active market, the transaction price is used in the initial recognition unless there is evidence from the specific terms of the instrument in the transaction that its fair value is represented by another value.

Fair value is understood as the price that would be received to sell a financial asset or paid to transfer a financial liability in an orderly transaction between market participants at the measurement date. The best evidence of the fair value is the quoted price in an active market, which is an organised, transparent and deep market.

To estimate the fair value of specific financial assets with no market price, valuation techniques are used that must have the following characteristics:

- They shall be the most consistent and suitable techniques and they shall incorporate observable market data, such as: recent transactions of other instruments that are substantially the same; discounted cash flows and market models for valuing options.
- They shall be techniques that provide the most realistic estimate on the price of the instrument, and preferably, they shall be those which, usually, use participants in the market when valuing the instrument.
- They shall maximise the use of observable market data, limiting the use of unobservable data as much as possible. The measurement method shall be applied over time so long as the reasons for choosing it do not change. In any event, the entity must regularly assess the valuation technique and examine its validity by using observable prices from recent transactions and from current market data.
- Consideration will be made of factors such as the temporary value of money, credit risk, the exchange rate, equity instrument prices, volatility, liquidity, the risk of early repayment and administration costs, among others.

Financial asset not at fair value through profit or loss are measured at fair value plus or minus transaction costs that are directly attributable to the acquisition or the issue of the financial

asset. For financial instruments at fair value through profit or loss, any directly attributable transaction costs will be recognised immediately in profit or loss.

The Group classifies financial assets, for measurement purposes, into the following categories:

- a) Financial assets at amortised cost.
- b) Financial assets at fair value through other comprehensive income.
- c) Financial assets required at fair value through profit or loss:
 - Financial assets held for trading.
 - Non-trading financial assets mandatorily at fair value through profit or loss.
- d) Financial assets designated at fair value through profit or loss.
- e) Derivatives – hedge accounting.
- f) Investments in subsidiaries, joint ventures and affiliated businesses.

This decision will be taken on the basis of:

1. the Group's business model for managing the financial assets, and
2. the contractual cash flow characteristics of the financial asset.

1. Business model:

A business model refers to how the Group manages its financial assets in order to generate cash flows. It is determined based on the principles and structures followed by senior management, in addition to how these are reflected in the day-to-day management of individual portfolios. An assessment is performed at portfolio and not individual level, and consideration is given as to how management manages portfolios (collection of cash flows, sale of assets or both).

There are three different business models:

- Traditional business model to collect contractual cash flows.
- Mixed model to both collect contractual cash flows and sell.
- Trading business model to obtain capital gains on the sale.

Under certain relevant circumstances, the Entity may decide to change the definitions of business models. These changes in business models may involve prospective reclassifications between accounting portfolios of the affected assets, with effective date from the first business day of the next financial reporting period. The change in model must comply with the requirements of IFRS 9: a) infrequent; b) change of management determined by the Group's competent governing body; and c) originated by external factors with a relevant, observable impact.

2.- Contractual cash flow characteristics:

Analysis of cash flows collected aims to specify whether the cash flows to be received with the financial asset analysed meet the "solely payments of principal and interest" (SPPI test) criterion. Accordingly, 'principal' is the fair value of the financial asset at initial recognition and 'interest' is the consideration for the time value of money, the credit risk associated with the principal amount outstanding during a specific period of time, and other financing or administrative costs, plus a profit margin. On initial recognition of a financial instrument, the Group assesses whether the instrument passes the SPPI test. Contractual terms with a minimal or unlikely impact on cash flows of a financial instrument do not imply failure to pass the SPPI test.

When assessing criteria for passing the SPPI test, the contractual cash flow analysis process considers all financial assets, so no exceptions have been made in the materiality analysis. When there are contractual conditions that could have an impact on passing the SPPI test, a benchmark analysis is performed to verify that the impact of these conditions on cash flows is not significant, specifically, that it is less than 5%.

This situation has only become apparent in financial assets (loans) where the term of the reference interest rate differs from the repricing term of the benchmark (e.g. a loan at a Euribor 12-month interest rate that reprices every 6 months). In these situations, the contractual flows of the financial asset have been analysed, and they have been compared with those of a similar instrument in which the benchmark term matches its repricing term, to verify that the cumulative difference between the two is no more than 5%. The aggregate amount of the financial assets affected is not material.

The following two conditions have to be met for a financial asset to be classified in the **financial assets at amortised cost portfolio**, for valuation purposes:

- a) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows (Traditional business model) and,
- b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The amount at which the financial asset is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance. The effective interest rate method is used in the calculation of the amortised cost of a financial asset and in the allocation and recognition of the interest revenue or interest expense in profit or loss over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset to the gross carrying amount of a

financial asset, without considering expected credit losses. The calculation includes all fees, transaction costs and all other premiums or discounts that are an integral part of the return or effective cost of the instrument.

A financial asset must be classified in the portfolio of **financial assets at fair value through other comprehensive income** if the following conditions are met:

- a) The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets ("Mixed" Business Model), and
- b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset must be classified in the portfolio of **financial assets at fair value through profit or loss** provided that, due to the business model chosen for managing the asset and the contractual cash flow characteristics, it cannot be measured at amortised cost or at fair value through other comprehensive income.

In this portfolio, regular purchases and sales are recorded using the settlement date.

In addition, the portfolio of financial assets at fair value through profit or loss must necessarily include in the **trading portfolio** all assets that meet the following conditions:

- a) They are originated or acquired for the purpose of realising them in the short term.
- b) They are part of a group of identified financial instruments that are managed together for which there is evidence of a recent pattern of short-term profit taking.
- c) They are derivative instruments that do not meet the definition of financial guarantee contracts and have not been designated as hedging instruments.

Nonetheless, the Group may make an irrevocable election on initial recognition to include specific investments in equity instruments in the portfolio of financial assets at fair value through other comprehensive income that otherwise would be measured at fair value through profit or loss.

The Group may also irrevocably designate a financial asset as measured at fair value through profit or loss at initial recognition if by doing so it eliminates or significantly reduces a recognition inconsistency (also referred to as an "accounting mismatch") that would otherwise arise from measuring assets or liabilities or recognising gains and losses on them on different bases.

As previously indicated, after initial recognition, the Group will measure financial assets at amortised cost, at fair value through other comprehensive income, at fair value through profit or loss, or at cost, depending on their classification.

Investments in subsidiaries, joint ventures and associates are measured at cost less any cumulative impairment losses estimated.

Financial liabilities

Financial liabilities are classified for measurement purposes into one of the following categories:

- a) Financial liabilities held for trading.
- b) Financial liabilities designated at fair value through profit or loss.
- c) Financial liabilities at amortised cost.
- d) Derivatives-hedge accounting, which includes financial derivatives acquired or issued by the Entity that qualify for hedge accounting.

Financial liabilities at amortised cost are measured in the same way as financial assets at amortised cost. By default, the Group shall classify financial liabilities in the portfolio of financial liabilities at amortised cost, except under any of the circumstances for classifying them under another portfolio, as described below

The portfolio of financial liabilities held for trading shall include all financial liabilities having any of the following characteristics:

- a) They are issued with an intention to repurchase them in the near term.
- b) They are short positions on securities.
- c) They are part of portfolio of identified financial instruments that are managed together for which there is evidence of a recent pattern of short-term profit taking.
- d) They are derivative instruments that do not meet the definition of financial guarantee contracts and have not been designated as hedging instruments.

The mere fact that a financial liability is used to finance trading activities does not mean that it will be included under this category.

The portfolio of financial liabilities designated at fair value through profit or loss will include financial liabilities that meet one of the following conditions:

- a) They have been irrevocably designated as measured at fair value at initial recognition. A financial liability can only be designated irrevocably if:
 - it is hybrid financial instrument and meets certain conditions.
 - if doing so eliminates or significantly reduces a measurement or recognition inconsistency (accounting mismatch) that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases; or

- when doing so results in more relevant information, because a group of financial liabilities, or financial assets and liabilities is managed and its performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy, and information about the group is provided on that basis to the entity's key management personnel.
- b) They were designated at, or subsequent to, initial recognition by the end as a hedged item to manage credit risk by using a credit derivative that is measured at fair value through profit or loss.

After initial recognition, the entity shall measure a financial liability at amortised cost or at fair value through profit or loss.

Equity instruments

A financial instrument is an equity instrument if, and only if, the two conditions a) and b) below are met:

- a) The instrument does not include a contractual obligation:
 - (i) to deliver cash or another financial asset to another entity; or
 - (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the issuing entity.
- b) If the instrument will or may be settled in the issuer's own equity instruments, and is:
 - (i) a non-derivative instrument that carries no contractual obligation for the issuer to deliver a variable number of its own equity instruments; or
 - (ii) a derivative instrument that will only be settled through the exchange by the issuer of a fixed amount of cash or another financial asset for a fixed number of its own equity instruments.

A contractual obligation, including any that arises from a derivative financial instrument that gives rise or may give rise to future receipt or delivery of the issuer's own equity instruments, shall not be considered an equity instrument if it does not meet conditions (a) and (b) above.

h) Recognition of income and expenses

Interest income, interest expenses and similar items are generally recognised on an accrual basis using the effective interest rate method. The calculation includes all fees, transaction costs and all other premiums or discounts that are an integral part of the return or effective cost of the instrument.

Dividends received from other entities are recorded as income where the entity's right to receive payment is declared.

Fees and commissions paid or received for financial services, however denoted contractually, are classified in the following categories, which shall determine their recognition in the income statement:

- I. Credit fees and commissions, which are an integral part of the effective cost or yield of a financial transaction and are recognised in the income statement over the expected life of the transaction as an adjustment to its cost or effective yield. These include asset product arrangement and analysis fees and commissions, overdrawn credit fees and overdraft fees and commissions on liability accounts.
- II. Non-credit fees, which are those derived from the provision of financial services other than financing transactions and can arise in services rendered over a period of time and in services rendered in a single act.

Income and expenses are generally recognised in the consolidated income statement in accordance with the following criteria:

- I. Those related to financial assets and liabilities measured at fair value through profit or loss are recorded upon settlement.
- II. Those related to transactions or services performed over a period of time are recognised over the period of related transactions or services.
- III. Those related to a transaction or service provided in a single act are recognised when the single act is carried out.

Non-financial income and expenses are recognised on an accrual basis. Receipts and payments deferred over periods greater than one year are recognised at the present value of the discounted cash flows at market rates.

Tax charges and obligations are recognised when the event that triggers payment takes place.

i) Impairment of financial assets

Debt instruments and off-balance-sheet exposures

Impairment losses for the period on debt instruments are recognised as an expense in the income statement. Impairment losses on debt instruments at amortised cost are recognised through an allowance account that reduces the carrying amount of the asset, while those on debt instruments at fair value through other comprehensive income are recognised in "Accumulated other comprehensive income".

Subsequent reversals of previously recognised impairment losses are recognised as income in the income statement for the period.

Expected credit losses relate to the difference between all contractual cash flows that are due to the entity in accordance with the financial asset contract and all the cash flows that the

entity expects to receive discounted at the original effective interest rate, or a reasonable approximation thereof, or the credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets.

Future estimated cash flows from a debt instrument consist of all principal and interest amounts that the Group estimates it will obtain over the life of the instrument. This estimate takes into consideration all relevant information available at the date of preparation of the consolidated financial statements that provides updated and reliable information regarding the possible future collection of the contractual cash flows. Also, in estimating the future cash flows of instruments supported by collateral, the flows that would be obtained from foreclosure on the collateral less the costs of obtaining and selling the collateral, irrespective of whether enforcement of the collateral is probable.

Credit exposures are classified, in accordance with their credit risk, into one of the following categories:

- 1) Performing exposures (Stage 1)
- 2) Underperforming exposures (Stage 2)
- 3) Non-performing exposures (Stage 3)
- 4) Write-offs

At initial recognition, purchased or originated credit-impaired financial assets, such as those purchased at a large discount that reflects credit losses, are classified as non-performing exposures. The expected credit loss on the purchase or origination of these assets will not be included in the loss allowance or the gross carrying amount at initial recognition. Irrespective of how they are subsequently categorised, when the entity purchases or originates a credit-impaired financial asset, it recognises the cumulative changes in credit losses from initial recognition as a loss allowance and interest income on these assets by applying the credit-adjusted effective interest rate to the amortised cost of the financial asset.

Expected credit losses are determined and assigned individually to each instrument. Models that provide estimates of the probability of default (PD), loss given default (LGD) and the exposure at default (EAD) are used, depending on the specific situation of each of the exposures and their obligors, which enables a collective estimate of expected losses to be made available on a daily basis. However, in Stages 2 and 3, an individualized evaluation of the instruments considered significant is carried out on a systematic basis. Conversely, in the case of Stage 1 and also for non-significant exposures in Stages 2 and 3, the use of expert analysis may exceptionally be triggered when certain results provided by the models are deemed inadequate in the monitoring of the collective estimation.

Further information on this point is provided in Note 44, Risk Policies and Management.

Equity instruments: Joint ventures and associates

The Group recognises impairment losses on investments in joint ventures and associates whenever there is objective evidence that the carrying amount of the investment is not recoverable. The amount of impairment losses will be the difference between the carrying amount of the instrument and its recoverable amount. The recoverable amount is the higher of fair value less costs of disposal and value in use.

For these purposes, the entity will estimate the value in use of an investment as:

- a) the present value of its share of the cash flows expected to be generated by the investee, which will include both those from ordinary activities and from the gains or losses on its sale or disposal, or
- b) the present value of the cash flows expected to be received by the investee in the form of dividends and those relating to the sale or disposal of the investment.

Impairment losses are recognised immediately as an expense in profit or loss for the period in which they occur. Subsequent reversals of previously recognised impairment losses are recognised immediately as income in consolidated profit or loss.

There is objective evidence that equity instruments are impaired when an event (or the combined effect of several events) occurs after their initial recognition that indicates that their carrying amount is no longer recoverable. The bank will use all the information available on the performance and operations of its investee in order to determine whether there is objective evidence of impairment.

j) Financial derivatives

The Group uses financial derivatives traded on organised markets or bilaterally with organised off-market counterparties (OTC) both in its own transactions and in transactions with the customer wholesale or retail segments.

The Group enters into derivatives to arrange hedges, actively manage other financial assets and liabilities, or benefit from changes in their prices. Financial derivatives which cannot be classified as hedges are classified as trading derivatives.

Derivatives with an active market are measured based on the quoted price in that market. If, for exceptional reasons, their quoted price cannot be established on a given date, similar methods to those used to measure financial derivatives not traded in organised markets are used.

Derivatives without a market, or for which a market with little activity exists, are valued following the most consistent and adequate financial methods, maximising the use of observable data and taking into consideration any factor that a market participant would evaluate, such as: a) recent transactions of other instruments that are substantially the same; b) discounted cash flows; and c) market models for valuing options. The techniques applied are those used by the market participants which provide the most realistic estimate of the price of the instrument.

On initial recognition, all financial derivatives are recognised at their fair value. The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price. If an entity determines that the fair value at initial recognition differs from the transaction price, it shall account for that instrument at that date as follows:

- a) If that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. a Level 1 input) or based on a valuation technique that uses only data from observable markets, the entity recognises the difference between the fair value at initial recognition and the transaction price as a gain or loss.
- b) In all other cases, the difference between the fair value at initial recognition and the transaction price is deferred, recognising that deferred difference as a gain or loss only to the extent that it arises from a change in a factor (including time) that market participants would take into account when pricing the asset or liability.

Bankinter does not carry out relevant transactions with derivative instruments whose fair value at initial recognition differs from the transaction price.

The Group has elected to maintain the hedge accounting of the previous accounting standards under International Accounting Standard 39 (IAS 39), until the new standard on the hedging framework is issued.

A derivative may be designated as a hedging instrument only if it meets the following criteria:

- i. It can be designated in its entirety as a hedging instrument, even when only for a proportion of its entire, except for options, in which case the change in its intrinsic value may be designated as a hedging instrument excluding the change in its time value or the value of forward contracts, which may be designated as such for the difference between the spot prices and forward prices of the underlying asset.
- ii. It is designated as a hedge for the entirety of its remaining term.
- iii. For a hedge of more than one risk, provided the different risks hedged can be clearly identified, and each part of the instrument can be designated as a hedge of specific hedged items and the effectiveness of the different hedges can be demonstrated.

The effectiveness of the hedge of derivatives defined as hedges is duly documented through effectiveness testing, which is the tool that tests that the differences arising from fluctuations in market prices between the hedged item and its hedge remain within reasonable parameters throughout the life of the transactions, thereby fulfilling the predictions established at the time they were entered into. If this is not the case at any time, the related transactions in the hedge group would be considered trading transactions and reclassified as such in the balance sheet.

The Group enters into fair value and cash flow hedges:

- Micro hedges or individual hedges (for which there is a specific identification of hedged instruments and hedging instruments) cover the exposure to changes in the fair value

or the cash flows relating to the hedged item. In the case of fair value hedges, the gain or loss arising on measurement of both the hedging instruments and the hedged items is recognised immediately in profit or loss. For cash flow hedges, the (effective) portion of the gain or loss on the hedging instrument will be recognised temporarily in an item of "Accumulated other comprehensive income" in consolidated equity. The ineffective portion of the gain or loss on the hedging instrument is recognised immediately in profit or loss.

- Portfolio hedges of interest-rate risk (also known as "macro-hedges") are those in which the interest-rate risk exposure of a certain amount of financial assets or financial liabilities that make up a set of financial instruments in the portfolio is hedged; however, specific instruments are not hedged. For fair value portfolio hedges of interest rate risk that are highly effective, the gain or loss arising from measuring hedging instruments is recognised immediately in profit or loss. For the hedged amount, the gain or loss arising on measurement is recognised directly in the income statement using as a balancing entry in "Fair value changes of the hedged items in portfolio hedge of interest rate risk" on the asset or liability side if the hedged amount relates to financial assets or financial liabilities. For cash flow portfolio hedges of interest rate risk, the effective portion of the change in value of the hedging instrument is recognised temporarily in equity under "Accumulated other comprehensive income" until the forecast transactions occur, when it is recognised in profit or loss. The ineffective portion is recognised directly in profit or loss.

k) Transfers and derecognition of financial instruments

Transfers of financial instruments are accounted for taking into account the way in which the transfer of the risks and rewards associated with the financial instruments transferred occurs, based on the following criteria:

- i. If the risks and rewards are substantially transferred to third parties, such as in the case of unconditional sales, sales with a repurchase agreement at its fair value at the repurchase date, sales of financial assets with a purchased call option or written put option that is deeply out of the money, securitisations of assets in which the transferor does not retain a subordinated debt or grants any credit enhancement to the new holders, etc., the financial instrument transferred is derecognised, and any rights or obligations retained or created as a result of the transfer are simultaneously recognised.
- ii. If the risks and rewards associated with the financial instrument transferred are substantially retained, such as in the case of sales of financial assets with an agreement to repurchase at a fixed price or at the sale price plus interest, a securities lending agreement in which the borrower undertakes to return the same or similar assets, etc., the financial instrument transferred is not removed from the balance

sheet and continues to be measured using the same criteria as before the transfer. However, the related financial liability is recognised for an amount equal to the consideration received, which is subsequently measured at amortised cost. The income from the financial asset transferred but not derecognised and the expenses incurred on the new financial liability are recognised directly in profit or loss.

- iii. If the entity neither transfers nor retains substantially all the risks and rewards of ownership of the transferred financial instrument, such as in the case of sales of financial assets with a purchased call option or written put option that is not deeply in or out of the money, securitisations in which the transferor assumes a subordinated debt or another type of credit enhancement for a portion of transferred asset, etc., a distinction is made between:
- If the Group does not retain control of the transferred financial instrument, in which case it is derecognised and any right or obligation retained or created in the transfer is recognised.
 - If the Group retains control of the transferred financial instrument, it continues to recognise it for an amount equal to its exposure to changes in value and recognises a financial liability related to the transferred financial asset.

The net amount of the transferred asset and of the related liability will be the amortised cost of the rights and obligations retained, if the transferred asset is measured at amortised cost, or the fair value of the rights and obligations retained, if the transferred asset is measured at fair value.

Therefore, financial assets are only removed from the consolidated balance sheet when the cash flows that are generated have been extinguished or when THE risks and rewards of ownership have been substantially transferred to a third party. Similarly, financial liabilities are only removed from balance sheet when the obligations they generate have been extinguished or when they are acquired for the purpose of cancelling or reselling them.

When the transferred financial asset is completely eliminated from the balance sheet, the income statement will recognise the difference between its carrying amount and the sum of: a) the payment received, including any new asset obtained less any liability assumed, and b) any accumulated profit or loss recognised directly as 'Other cumulative comprehensive income' within equity attributable to the transferred financial asset.

According to accounting regulations, under certain circumstance, amending a contract may lead to the source account being derecognised from the balance sheet and the destination accounting being considered a "new" transaction. This paragraph is generally interpreted as meaning that the recognition and derecognition from the balance sheet is justified from a substantial change of the financial instrument's conditions.

Consequently, the Bank's internal procedures set out that refinancing and restructuring can be considered new transactions only if the following conditions are met simultaneously, duly justified:

- a) Non-performing transactions are refinanced or, otherwise, the new refinancing transactions is reclassified as non-performing exposure.
- b) The contract's terms are changed substantially. This includes:
- Adding parties that substantially change the transaction's risk profile
 - Presenting additional guarantees that substantially improve the recovery expectations in case of default
 - Refinancing is the result of court or bankruptcy proceedings that result in debt settlement and a sustainability agreement relating to part of the debt.

I) Tangible assets

As a general rule, tangible assets are measured at cost less accumulated depreciation and any impairment losses.

Depreciation is calculated systematically on a straight-line basis or using the sum-of-the-years' digits method, applying the years of estimated useful life of the various items to the cost of the assets less their residual value. The land on which the buildings and other constructions are located is understood as having an indefinite life and, therefore, not depreciated. The annual depreciation charge for tangible assets is recognised in consolidated profit or loss calculated based on the estimated useful life of the related asset, which coincides with the legal minimums:

	Depreciation method
Properties	Straight line over 50 years
Fixtures and fittings and other	Straight line between 6 and 12 years
Computer equipment	Straight line up to 4 years

The Group reviews the depreciation period and method for each of its tangible assets at least at the end of the reporting period.

The costs of conservation and maintenance of property, plant and equipment that do not improve their use or lengthen the asset's useful life are recognised in profit or loss when they are incurred.

The Group assesses at each reporting date whether there is any internal or external indication that the net value of its tangible assets exceeds their recoverable amount. If so, the Group reduces the carrying amount of the asset to its recoverable amount and adjusts the future depreciation charges in proportion to the adjusted carrying amount and the new remaining

useful life, where it must be re-estimated. When there are indications of a recovery in the value of an asset, the Group recognises the reversal of the impairment loss recognised in previous periods and adjusts the future depreciation charges. The reversal of the impairment loss on an asset may not raise its carrying amount above that which it would have if no impairment losses had been recognised in prior years.

"Investment property" in the consolidated balance sheet includes the net value of land, buildings and other constructions that are owned or held under lease to earn rentals or for capital appreciation, or both. There are no restrictions on realising investment property in the market.

The criteria applied for recognising the cost of acquiring investment property, its depreciation, the estimation of useful lives and the recognition of potential impairment losses are the same as those described above.

m) Intangible assets

Intangible assets are identifiable non-monetary assets without physical appearance that arise as a result of a legal business or have been developed internally by the consolidated entities. The Group only recognises those intangible assets whose cost can be estimated in a reasonably objective manner, those that are separable, and those for which it is probable that the expected future benefits will flow to the consolidated entities.

Intangible assets are recognised initially at cost of acquisition or production and subsequently measured at cost less any accumulated amortisation and any subsequent impairment losses.

Goodwill

Differences between the cost of investments in the equity of consolidated entities and companies accounted for using the equity method and other types of business combinations and the acquisition-date fair values of the net assets acquired and liabilities assumed, adjusted by the percentage interest acquired in those net assets and liabilities in the event of a purchase of shareholdings, are recognised as follows:

1. Allocating them to specific assets and liabilities of the companies or businesses acquired, by increasing the value of the assets or reducing the value of the liabilities.
2. Allocating them to specific intangible assets by recognising it explicitly in the consolidated balance sheet.
3. Recognising any excess of the acquisition price over this fair value as goodwill in "Intangible assets - Goodwill" on the asset side of the consolidated balance sheet. In acquisitions of investments in associates or joint ventures accounted for using the equity method, any goodwill arising on acquisition is recognised as forming part of the value of the investment and not individually under "Intangible assets - Goodwill".

4. Negative differences between the acquisition cost less the aforementioned fair value are recognised once the measurement process has been reviewed as income in the consolidated income statement under "Negative goodwill recognised in profit or loss".

Positive goodwill (excess between the acquisition price of an investee or business and the fair value of the net assets, liabilities and contingent liabilities acquired from that company or business) - which is only recognised in the consolidated balance sheet when they have been acquired for consideration - therefore represent prepayments made by the acquirer of the future economic benefits arising from the assets of the entity or business acquired that are not individually and separately identifiable and recognisable.

Impairment losses on goodwill recognised in "Intangible assets - Goodwill" cannot be subsequently reversed.

According to IFRS 3, goodwill should not be amortised and instead the acquirer should test goodwill for impairment annually, or more frequently, if events or changes in circumstances indicate that it might be impaired.

Other intangible assets

Intangible assets other than goodwill are recognised in the consolidated balance sheet at acquisition or production cost net of any accumulated amortisation and any impairment losses.

Intangible assets may have an indefinite useful life when, based on an analysis of all relevant factors, there is not foreseeable limit to the period over which the asset is expected to generate net cash inflows for the consolidated entities- or a finite useful life in all other cases.

Intangible assets with an indefinite useful life are not amortised, although at each reporting date the consolidated entities review the assets' respective remaining useful lives in order to ensure that they are still indefinite and, if that is not the case, take appropriate action. At year-end 2022 and 2021, there were no intangible assets with an indefinite useful life other than goodwill.

Intangible assets with a finite life are amortised on a straight-line basis over their life. The annual amortisation of intangible assets with a finite useful life is recognised under "Depreciation" in the consolidated income statement. The useful life of software recorded as an intangible asset is estimated based primarily on expected usage, typical product life cycles and obsolescence, industry stability, maintenance costs, historical experience and market peers. Accordingly, the entity's accounting policies classify activated software into three categories: architecture and structural software (with useful lives between 10 and 15 years), software developed in banking applications (with useful lives between 10 and 15 years) and digital software (with useful lives between 3 and 5 years).

The consolidated entities recognise any impairment loss on intangible assets with an indefinite and finite useful life using as a balancing entry "Impairment losses on other assets (net) - Goodwill and other intangible assets" in the consolidated income statement. The assessment of

impairment is carried out at each reporting date by estimating recoverable amount. If the recoverable amount is less than the net cost recognised, the related impairment loss is recognised in the consolidated income statement. The criteria for the recognition of impairment losses on these assets and, where applicable, of the recoveries of the impairment losses recorded in prior periods are similar to those applied tangible assets for own use.

n) Leases

Lease contracts are presented on the basis of the economic substance of the transaction regardless of its legal form:

- i. A lease is classified as a finance lease when it transfers substantially all the risks and rewards incidental to ownership of the asset that is the subject of the lease.

When the Group is lessor, the sum the present values of the payments receivable from the lessee during the term of the lease plus any guaranteed residual value, normally the exercise price of the purchase option by the lessee on expiry of the lease, is recognised as finance granted to third parties, so it is included under "Loans and receivables" in the balance sheet in accordance with the nature of the lessee.

When the Group is the lessee, it recognises the cost of the leased asset in the balance sheet based on the nature of the asset that is the subject of the lease and, simultaneously, a liability for the same amount, which is the lower of the fair value of the leased asset or the sum of the present value of the lease payments accruing to the lessor plus, where appropriate, the exercise price of the purchase option. These assets are depreciated using the same criteria as those applied to all tangible assets for own use.

- ii. Lease contracts that are not considered finance leases are classified as operating leases.

When the Group acts as lessee, it recognises the cost for acquiring the leased assets under "Tangible assets". These assets are depreciated according to the policies adopted for similar tangible assets for own use and the income from the lease contracts is recognised in the income statement on a straight-line basis.

- iii. Leases where the entity is lessee are treated as follows:

No distinction is made between operating and finance leases. All leases (with certain exceptions) must be recognised as right-of-use assets in the lessee's balance sheet with a lease liability measured at the present value of the expected lease payments over the term that it is reasonably certain that the lease will be in force. The discount rate is the interest rate implicit in the lease or, if it cannot be determined, the lessee's incremental borrowing rate. The entity calculates this incremental borrowing rate based on the quoted debt instruments issued by the Group.

The leased asset is depreciated from the commencement date to the end of the lease, while the lease liability shall be treated similarly to a financial liability, i.e. increasing the carrying amount to reflect the interest on the lease liability, reducing the carrying amount to reflect the lease payments made, and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments.

Lessees are not required to apply the standard to leases of intangible assets, short-term leases (i.e. with a lease term of 12 months or less), and leases for which the underlying asset is of low value (less than 5,000 euros) and can recognise them as an expense.

In determining the lease term, management considers all the relevant facts and circumstances that create an economic incentive for the lessee to exercise an option to extend and not an option to terminate the lease. Options to extend (or periods beyond options to terminate) are only included in the lease term if it is reasonably certain that the lease will be extended (or not terminated).

The Group assesses at each reporting date whether there are indications of impairment of right-of-use assets using the same criteria as for tangible assets.

o) Non-current assets and disposal groups classified as held for sale

Non-current assets held for sale are assets whose carrying amount will be recovered principally through sale, provided that they are available for immediate sale and this is highly probable.

Foreclosed assets or assets received in payment of debt are assets that the Group receives from its borrowers or other debtors as payment, in full or in part, of financial assets representing receivables from them, and that are classified as "Non-current assets and disposal groups classified as held for sale".

Non-current assets held for sale are recognised at the lower of their fair value less costs to sell and their carrying amount and they are not depreciated.

The estimation of the fair value of real estate assets foreclosed or received in payment of debt at the time of the foreclosure or receipt must use, as a reference value, the market value granted by means of a complete individual appraisal. Subsequent to the foreclosure or receipt, the reference value used to estimate the fair value should be updated, at least annually. Automated valuation methods may be combined with complete individual appraisals, with the latter carried out at least every three years.

In the process of estimating the fair value of the asset foreclosed or received in payment of debt, an assessment is carried out as to whether it is necessary to apply to the reference value a discount derived from the specific conditions of the assets, such as their location or state of conservations, or the markets for these assets, such as declines in the volume or level of

activity. In this assessment, the Group will take into account its sales experience and the average time that similar assets remain on balance sheet.

The Group has its own methods to estimate the discounts applicable to the reference value and the costs to sell of the assets foreclosed or received in payment of debt, taking into account its experience of sales of similar assets, in terms of time scales, prices and volumes, and trends in the time the asset has remained on its balance sheet. These methods are developed within the framework of internal models for collective estimation risk allowances. Nonetheless, losses on foreclosed assets are calculated on an individual basis where assets that remain on the balance for longer than period than initially expected for their sale.

Impairment losses on non-current assets held for sale are recognised in "Profit or loss from non-current assets and disposal groups classified as held for sale not qualifying as discontinued operations" in the consolidated income statement. Recoveries in value are recognised in the consolidated income statement up to an amount equal to the previously recognised impairment losses.

Classification of an operation as discontinued requires changes in the accounting policies applied to the operation and in its presentation in the balance sheet and income statement:

- Assets that comprise the discontinued operation are presented separately in the balance sheet under "Non-current assets and disposal groups classified as held for sale" and the liabilities are presented under "Liabilities included in disposal groups classified as held for sale". The amounts of these items recognised in "Other comprehensive income" in equity are classified under "Non-current assets and disposal groups classified as held for sale". The presentation criteria shall not be applied retrospectively in the comparative balance sheets included in the annual financial statements.

- The income and expenses, regardless of their nature, arising from the discontinued operation in the reporting period, even if it arises before this classification, are presented, net of tax, in the income statement as a single amount in "Profit or loss after tax from discontinued operations", along with the gains or losses on the disposal.

- In the income statement included in the financial statements for purposes of comparison, the net amount of all income and expenses of the discontinued operation for the prior period is included in "Profit or loss after tax from discontinued operations".

- The entity shall not depreciate (or amortise) assets from discontinued operations while they are classified in this category.

p) Offsetting

Assets and liabilities, as well as income and expenses, are not offset unless required or allowed by an IFRS. Examples of income and expenses whose offset is required or permitted include:

- a. Gains and losses on the sale or disposal of non-current assets, including investments and operating assets, are presented by deducting the carrying amount of the asset and the related costs relevant selling expenses from the amount received from the disposal.;
- b. Payments relating to the provisions recognised in accordance with IAS 37 that have been repaid under a contractual agreement with a third party (e.g., a guarantee from a supplier) may be offset against the relevant repayment.
- c. Gains and losses arising from a group of similar transactions are presented net (e.g., exchange gains or losses or those arising from financial instruments held for trading). However, these gains and losses are presented separately if they are material.

q) Securities loaned or pledged

Securities lending involves transactions in which the borrower receives full title to securities without making any payment, except fees and commissions, with the commitment to return other securities of the same class as those received to the lender.

Security lending in which the borrower has the obligation to return the same assets or substantially the same assets or other similar ones having the same fair value are considered transactions in which the risks and rewards associated with the ownership of the asset are substantially retained by the lender.

r) Financial guarantees

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument, irrespective of the legal form it may have, such as a guarantee, a letter of credit, an insurance contract or credit derivative.

The Group recognises financial guarantee contracts in "Other financial liabilities" at fair value plus transaction costs that are directly attributable to their issue. At inception, and unless there is evidence to the contrary, the fair value of financial guarantee contracts issued to an unrelated third party in a stand-alone arm's length transaction will be the premium received plus, where appropriate, present value of the cash flows to be received, using an interest rate similar to that of the financial assets granted by the entity with a similar term and risk. Simultaneously, a

credit is recognised in assets for the present value of the future cash flows receivable using the aforementioned interest rate.

Subsequent to initial recognition, the contracts are treated as follows:

- a. The value of the fees or premiums receivable for financial guarantees will be discounted, with the differences recognised in the income statement as interest income.
- b. The value of financial guarantee contracts not classified as non-performing will be the amount initially recognised in liabilities less the portion recognised in profit or loss, allocated on a straight-line basis over the expected life of the guarantee, or by another method, provided that it more adequately reflects the economic risks and rewards of the guarantee.

Financial guarantees are classified based on the risk of insolvency attributable to the customer or the transaction and, where appropriate, the need to recognise provisions by applying the same criteria as in section (i) of this Note for debt instruments measured at amortised cost.

Where a provision must be recognised for the financial guarantee contract, the fees and commissions pending accrual are reclassified to the relevant provision.

s) Staff expenses

Post-employment benefits

The Group's post-employment obligations with its employees are considered to be "Defined contribution plans", where the Group makes pre-determined contributions to a separate entity with no legal or effective obligation to make further contributions if the separate entity cannot pay the employee benefits with relating to the services rendered in the current and prior periods. Post-employment obligations that do not meet the above conditions are considered "Defined benefit plans". The characteristics of those obligations are described in Note 27.

Defined contribution plans

contribution accrued in the period in this connection is recognised under "Staff expenses" in the consolidated income statement.

Any amounts not yet contributed at 31 December to the external plan covering those obligations are recognised at their present value under "Provisions - Pension and similar obligations". At year-end 2022 and 2021, there was no outstanding amount to be paid into external defined contribution plans.

Defined benefit plans

The Group recognises the present value of defined benefit post-employment benefits under "Provisions for pensions and other post-employment defined benefit obligations", net, and is

explained below, of the fair value of assets that meet the requirements for consideration as "Plan assets".

'Plan assets' are considered to be those associated with a certain defined-benefit commitment under which the obligations will be directly satisfied and the following conditions are met: They are not owned by the Group but rather by a separate legal entity that is not a related party, they are only available to pay or finance employee post-employment compensation and cannot return to the consolidated entities unless the assets remaining in that plan are sufficient to comply with all of the obligations falling to the plan or the entities relating to the benefits for current or past employees or to reimburse employee benefits already paid by the Group.

If the Group can look to an insurer to pay part or all of the expenditure required to settle a defined benefit obligation, and it is practically certain that said insurer will reimburse some or all of the expenditure required to settle that obligation, but the insurance policy does not qualify as a plan asset, the Group recognises its right to reimbursement -which, in all other respects, is treated as a plan asset- in "Insurance contracts linked to pensions" on the asset side of the consolidated balance sheet.

Post-employment benefits are recognised as follows:

- The income statement includes the following components of post-employment benefits:
 - The cost of services in the current period (understood to be an increase in the present value of the obligations arising as a result of the services rendered during the year by employees) is recognised under 'Staff expenses'.
 - The cost of past services, which originate from modifications made to already existing post-employment compensation or the introduction of new benefits and including the cost of reductions, is recognised under 'Appropriations to provisions (net)'.
 - Any gain or loss that arises from a settlement of the plan is recognised under 'Appropriations to provisions (net)'.
 - Net interest on the net defined benefit commitment liability (asset) (understood to be the change during the year in the net defined benefit liability (asset) that arises due to the passage of time) is recognised in the heading Interest expense and similar charges (interest and similar income in the case of income) in the income statement.
- The remeasurement of the net defined benefit liability (asset) is recognised in "Valuation adjustments" and includes:

- The actuarial gains and losses arising the period, arising from the differences between the previous actuarial assumptions and what as actually occurred and the effects of changes in actuarial assumptions.
- The return on plan assets, excluding the amounts included in net interest on the net defined benefit liability (asset).
- Any change in the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability (asset).

Other long-term employee benefits

Early retirements

The Group guarantees certain obligations with employees taking early retirement -with respect to both salaries and other employee benefits- from the time of early retirement until the date of their effective retirement.

Early retirement obligation up until the date of effective retirement are treated for accounting purposes, where applicable, using the same criteria as explained above for defined-benefit post-employment benefits, except for actuarial gains and/or losses, which are recognised immediately when they arise with a balancing entry in the consolidated income statement.

Death and disability of current employees

The obligations assumed by the Group regarding death and disability of employees while they are actively employed, covered by a co-insurance policy arranged with Axa and Caser, are recognised in the income statement at an amount equal to the premiums accrued on that insurance policy each period.

Share-based payments

Certain groups of Group employees receive remuneration in the form of shares; i.e. own equity instruments in exchange for services rendered.

In accordance with the accounting regulations, the services received under this remuneration scheme are recognised in the income statement, with a balancing entry in equity.

Termination benefits.

Compensation for termination is recognised as a provision for pension funds or similar obligations and as a staff expense only when the bank has demonstrably undertaken to terminate the link to an employee or group of employees before the usual retirement ages, or to pay compensation for termination as a result of an offer to incentivise the voluntary resignation of employees. Compensation to be paid after the twelve months following the date of the financial statements will be valued by its discounted amount, as per the discount rate used for the defined benefit plans. If the bank has presented an incentive for the contract's

voluntary termination, the compensation will be valued on the number of employees expected to accept the offer.

t) Provisions and contingencies

The Group recognises provisions at the amount estimated to settle present obligations arising from past events whose nature at the reporting date is clearly specified but whose amount or settlement date is uncertain and the settlement of which is expected to result in an outflow of resources embodying economic benefits. These obligations may arise from:

- A legal or contractual requirement.
- An implicit or tacit obligation arising from valid expectations created by the Group in third parties regarding the assumption of certain types of responsibilities. Such expectations are created when the entity publicly accepts responsibilities, or derive from past practice or from publicly known business policies.
- Virtual certainty as to the future course of regulation in particular respects, especially proposed new legislation that the Group cannot avoid.

Contingent liabilities are possible obligations of the Group that arise from past events and whose existence is conditional on the occurrence or non-occurrence of one or more future events beyond the control of the Group. They include the present obligations of the Group when it is not probable that an outflow of resources embodying economic benefits will be required to settle them or when, in extremely rare cases, their amount cannot be measured with sufficient reliability.

Contingent obligations are considered probable when the event is more likely than not to occur, possible when it is more likely than not that they will not occur, and remote when it is extremely rare that they occur.

The Group's consolidated financial statements include all the material provisions with respect to which it is considered that it is more likely than not the obligation will have to be settled. Contingent liabilities are not recognised in the consolidated financial statements, but rather are disclosed, unless the possibility of an outflow of resources embodying economic benefits is considered to be remote.

Provisions are quantified taking into consideration the best information available regarding the consequences of the events giving rise to them and estimated at each reporting date, taking into the financial effect, where significant. They are used to cover the specific obligations for which they were recognised, and are fully or partially reversed when such obligations cease to exist or are reduced.

At the ends of the reporting periods covered in these financial statements, various court proceedings and claims against the Group were in progress stemming from the ordinary course of business. Both the Group's legal advisers and the Entity's Directors understand that the

conclusion of these proceedings and claims will not have a significant effect on the consolidated financial statements beyond the amounts included as a provision where applicable.

At the end of the reporting periods for these annual financial statements, no contingent assets of a significant amount occur.

u) Tax expense or income related to profit or loss from continuing operations

Income tax is considered to be an expense and is recognised under "Tax expense or income related to profit or loss from continuing operations" in the consolidated income statement, except where it arises from a transaction recognised directly in equity, in which case it is recognised directly in equity, or a business combination, in which case the deferred tax is recognised as an additional item of equity.

The expense recognised under "Tax expense or income related to profit or loss from continuing operations" is determined by the tax payable on the taxable profit of a period after taking account of any changes in that period due to temporary differences, tax credits for tax deductions and benefits, and tax losses. The tax base for the period may differ from profit or loss for the period presented in the consolidated income statement since it excludes taxable or deductible income or expenses from other periods and items that are never taxable or deductible.

Deferred tax assets and liabilities include temporary differences, which are identified as the amounts expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities and their related tax bases. They are recognised using the liability method in the consolidated balance sheet and are measured by applying to the relevant temporary difference or credit the tax rate at which they are expected to be realised or settled.

A deferred tax asset, such as prepaid tax, a tax credit for tax deductions and benefits and a tax credit for tax losses, is recognised whenever it is probable that the Group will obtain sufficient future taxable profit against which the deferred tax asset can be utilised. It is considered probable that the Group will obtain sufficient taxable profit in the future in the following cases, among others:

- i. There are deferred tax liabilities that can be settled in the same period that the deferred tax asset is realised, or in a subsequent period in which the existing tax loss or that resulting from the amount carried forward can be offset.
- ii. The tax losses result from identifiable causes which are unlikely to recur.

Notwithstanding the foregoing, a deferred tax asset that arises in accounting for investments in associates or joint ventures is only recognised if it is probable that it will be realised in the foreseeable future and it is expected that sufficient future taxable profits will be available against which the deferred tax asset can be utilised. Furthermore, a deferred tax asset is not

recognised if it arises from the initial recognition of an asset or liability other than a business combination that at the time of recognition affects neither accounting profit nor taxable profit.

Deferred tax liabilities must also be recognised, except when goodwill is recognised or it arises in the accounting of investments in joint ventures or subsidiaries where the Group is able to control the timing of the reversal of the temporary difference and, in addition, it is probable that the temporary difference will not reverse in the foreseeable future. Furthermore, a deferred tax liability is not be recognised if it arises from the initial recognition of an asset or liability other than a business combination that at the time of recognition affects neither accounting profit nor taxable profit.

The deferred tax assets and liabilities recognised are reviewed at each reporting date in order to verify that they remain in force and any necessary corrections are made.

The Group only recognises deferred tax assets arising from deductible temporary differences, tax credits for tax deductions or benefits, or the carry forward of tax losses, if the following conditions are met:

- Deferred tax assets are recognised only if it is considered probable that the consolidated entities will have sufficient future taxable profits against which the deferred tax assets can be utilised; or they are guaranteed in accordance with legislation, and
- In the case of deferred tax assets arising from tax losses, the tax losses result from identifiable causes which are unlikely to recur.

At each reporting date, the deferred tax recognised (assets and liabilities) are reviewed in order to verify that they remain in force and any necessary adjustments are made, in accordance with the results of analyses performed.

v) Off-balance sheet customer funds

Customer funds held in custody or marketed by the Group are not included in the balance sheet as the equity belongs to third parties outside the group. Similarly, assets managed by the Bank are owned by its customers and therefore are also not recognised in the balance sheet. The nature and volume of these activities are disclosed in the notes to the financial statements. The fees and commissions generated by this business are included in "Fee and commission income" and "Fee and commission expenses" in the income statement.

w) Assets and liabilities under insurance contracts

In accordance with generally accepted accounting practices in the insurance industry, insurance companies recognise the amounts of the premiums written as income and take the cost of claims to profit or loss when the contract when they are definitively settled. These accounting practices require insurance companies to accrue at the end of each reporting period both the

amounts paid for the premiums written but not accrued at that date and the foreseeable costs of claims occurred that have yet to be taken to profit or loss. At year-end 2022 and 2021, there were no assets of this nature.

x) Business combination

The acquisition method is used to account for all business combinations, regardless of whether or not equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary includes:

- the fair values of the assets transferred
- liabilities incurred to former owners of the acquiree
- equity interests issued by the Group
- the fair value of any asset or liability arising from a contingent consideration arrangement, and
- the fair value of any previously held equity interest in the subsidiary

The identifiable assets acquired and the liabilities and contingent liabilities assumed in a business combination, with limited exceptions, are initially measured at their acquisition-date fair.

The acquisition-related costs are accounted for as expenses when incurred.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of the acquirer's previously held equity interest in the acquiree prior interest in the acquired company over the fair value of the net identifiable net acquired is recognised as goodwill. If these amounts are lower than the fair value of the net identifiable assets of the subsidiary acquired, the difference is recognised directly in profit or loss as a bargain purchase.

When the settlement of any portion of the consideration in cash is deferred, the future amounts payable are discounted at the present value on the exchange date. The discount rate used is the entity's incremental borrowing rate of interest, which is the rate at which the borrower could obtain a similar loan from an independent finance company under comparable terms and conditions.

Contingent consideration is classified as an asset or liability, or a financial liability. The amounts classified as financial liabilities are subsequently remeasured at fair value, recognising the changes in fair value in profit or loss.

In a business combination achieved in stages, the acquirer remeasures its previously held equity interest in the acquiree at its acquisition-date fair value and recognise the resulting gain or loss, if any, in profit or loss.

y) Equity

The equity items in the balance sheet are grouped into the following categories: "Shareholders' equity", "Other comprehensive income" and, where appropriate in consolidated equity, "Minority interests".

"Shareholders' equity" includes equity amounts that correspond to contributions made by shareholders or partners; comprehensive income previously recognised through the income statement; comprehensive income reclassified from "Other comprehensive income"; and other instruments that are permanent equity. It will also include amounts from expenses issuing or reducing own equity instruments and results from disposals of own equity instruments and the retroactive restatement of financial statements due to errors and changes in accounting criteria.

"Other comprehensive income" will include the comprehensive amounts, net of tax effect, of adjustments made to the assets and liabilities whose changes in value are recognised in other comprehensive income. Items included in this category are broken down, according to their nature, into "Items that will not be reclassified to profit or loss" and "Items that may be reclassified to profit or loss".

Treasury shares and other acquired own equity instruments:

The value of equity instruments issued by the Bank, or its group, held by the Bank is recognised by reducing the net equity in the corresponding item. These instruments are recognised at their cost of acquisition. The income from their disposal is recognised under "Other reserves".

The information on gains per share will be added at the end of the financial statement, distinguishing the basic from the diluted amount. Basic earnings per share will be calculated as the coefficient between the period's income attributable to holders of the parent's ordinary equity instruments (numerator) and the weighted average of ordinary shares outstanding during the period (denominator). To calculate the diluted earnings per share, the bank will adjust the numerator and denominator for all diluting effects inherent to the potential ordinary shares.

6. Cash, cash balances at central banks and other demand deposits

This item includes cash, cash balances at Banco de España and at other central banks, and other demand deposits. The breakdown of this item is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Cash	181,502	193,420
Cash balances at central banks	12,087,843	21,750,547
Banco de España	11,826,827	21,029,107
Other central banks	260,553	723,590
Valuation adjustments	462	(2,149)
Other demand deposits	1,081,873	429,122
Of which managed as cash	1,081,873	429,122
	13,351,217	22,373,090
In euros	12,699,889	22,188,329
In foreign currency	651,329	184,760
	13,351,217	22,373,090

7. Financial assets and liabilities held for trading

"Financial assets held for trading" on the balance sheet:

	Thousands of euros	
	31.12.2022	31.12.2021
Assets:		
Loans and advances	1,734,598	2,251,575
Debt securities	974,684	1,246,748
Equity instruments	164,756	197,862
Derivatives	1,181,732	342,070
	4,055,770	4,038,256
In euros	3,876,396	3,923,593
In foreign currency	179,374	114,663
	4,055,770	4,038,256
Memorandum items		
Assets loaned or pledged	524,832	667,722

The amount recorded in "Loans and advances" relates mainly to assets acquired under reverse repurchase agreements.

Almost all of the assets loaned or pledged are for periods of less than a year.

The detail of the portfolio of financial assets held for trading by type of instrument and counterparty is as follows:

	Thousands of euros			
	At 31 December 2022			
	General governments	Credit institutions	Other private sectors	Total
Loans and advances	-	1,320,483	414,115	1,734,598
Debt securities	962,584	12,100	-	974,684
Equity instruments	-	62,626	102,129	164,756
Derivatives	-	1,084,500	97,233	1,181,732
	962,584	2,479,709	613,477	4,055,771

	Thousands of euros			
	At 31 December 2021			
	General governments	Credit institutions	Other private sectors	Total
Loans and advances	-	2,251,575	-	2,251,575
Debt securities	1,239,992	6,756	-	1,246,748
Equity instruments	-	103,826	94,036	197,862
Derivatives	-	252,327	89,743	342,070
	1,239,992	2,614,484	183,779	4,038,256

The detail of "Financial liabilities held for trading" in the balance sheet by type of instrument is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Liabilities		
Deposits	1,288,147	1,785,370
Trading derivatives	1,140,068	438,795
Short positions in securities	918,983	1,472,332
	3,347,198	3,696,496
In euros	3,183,267	3,579,488
In foreign currency	163,931	117,008
	3,347,198	3,696,496

The amount recognised in "Deposits" relates mainly to assets sold under repurchase agreements. Short positions in securities relate to the sale of financial assets received as a loan or collateral.

The net gains or losses (Note 30) on the transactions carried out in the portfolio of financial assets and liabilities held for trading amounted to 26,251 thousand euros in 2022 (2021: 16,559 thousand euros).

The portfolios of financial assets and liabilities held for trading are managed jointly. Note 44 "Risk Policies and Management" describes the joint management of these portfolios.

a) Debt securities

The detail of this item by nature of security is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Treasury bills	125,300	229,781
Bonds	53,958	258,730
Debentures	570,128	504,287
Strips	225,298	253,950
	974,684	1,246,748

All amounts under this item are denominated in euros. The portfolio of debt securities held for trading consists of securities traded on organised markets.

b) Equity instruments

The composition of quoted and unquoted equity instruments is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Quoted	164,756	197,862
Unquoted	-	-
	164,756	197,862

Practically all equity instruments are denominated in euros.

c) Derivatives

The composition of this item of financial assets held for trading and financial liabilities held for trading in the consolidated balance sheet is as follows:

Carrying amount	Thousands of euros			
	31.12.2022		31.12.2021	
	Financial assets held for trading	Financial liabilities held for trading	Financial assets held for trading	Financial liabilities held for trading
Interest rate	413,832	459,559	100,377	143,647
Equity instruments	72,777	107,320	55,688	118,488
Currencies and gold	695,124	573,190	186,005	176,659
Credit	-	-	-	-
Commodities	-	-	-	-
Other	-	-	-	-
DERIVATIVES	1,181,732	1,140,068	342,070	438,795

d) Short positions

This balance sheet item includes financial liabilities arising from short sales. These short positions on sales are due to the outright sale of financial assets acquired under reverse repurchase agreements. The amounts are denominated in euros.

The procedure for estimating the fair value of these assets and liabilities is described in Note 43.

8. Non-trading financial assets mandatorily at fair value through profit or loss

The breakdown of this item is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Debt securities	884	738
Equity instruments	160,046	130,328
Loans and advances	466	250
Total	161,397	131,316
In euros	151,302	121,578
In foreign currency	10,094	9,738
Memorandum items	-	-
Assets loaned or pledged	-	-

The breakdown of this balance sheet item by instrument and counterparty is as follows:

Thousands of euros

31.12.2022			
	Credit institutions	Other private sectors	Total
Debt securities	-	884	884
Equity instruments	-	160,046	160,046
Loans and advances	-	466	466
	-	161,397	161,397

9. Financial assets at fair value through other comprehensive income

The breakdown of this item in the consolidated balance sheet is as follows:

Thousands of euros

	31.12.2022	31.12.2021
Debt securities	2,615,303	2,446,624
Equity instruments	195,617	304,893
	2,810,920	2,751,517
In euros	2,755,054	2,694,749
In foreign currency	55,865	56,768
	2,810,920	2,751,517
Memorandum items		
Assets loaned or pledged	618,859	868,516
Debt securities		
Stage 1	2,615,303	2,446,624
Stage 2	-	-
Stage 3	-	-

Almost all of the assets loaned or pledged are for periods of less than a year.

By geographical area, the portfolio of financial assets at fair value through other comprehensive income is mainly concentrated in Spain (Note 47).

There are no amounts of financial assets at fair value through other comprehensive income that have significantly increased credit risk since initial recognition.

The Group's interest in Línea Directa Aseguradora, S.A. is recognised within equity instruments in the portfolio of "Financial assets at fair value through other comprehensive income", exercising the irrevocable option in accounting standards to designate equity instruments at fair value through other comprehensive income. Included in "Other comprehensive income" in the "Consolidated statement of recognised income and expense" "Items that will not be reclassified to profit or loss" include the valuation adjustments related to these equity instruments recognised in the period.

The breakdown of this balance sheet item by instrument and counterparty is as follows:

Thousands of euros

31.12.2022				
	Credit institutions	General governments	Other private sectors	Total
Debt securities	826,199	1,592,108	196,996	2,615,303
Equity instruments	-	-	195,617	195,617
	826,199	1,592,108	392,613	2,810,920

Thousands of euros

31.12.2021			
	Credit institutions	Other private sectors	Total
Debt securities	-	738	738
Equity instruments	-	130,328	130,328
Loans and advances	-	250	250
	-	131,316	131,316

Thousands of euros

31.12.2021				
	Credit institutions	General governments	Other private sectors	Total
Debt securities	894,075	1,342,308	210,242	2,446,624
Equity instruments	-	-	304,893	304,893
	894,075	1,342,308	515,135	2,751,517

Gains or losses recognised in equity (Note 30) and those transferred to profit or loss (Note 30) relating to debt securities included in this portfolio are disclosed in the "Consolidated statement of recognised income and expense" in these financial statements.

In 2022, the Group recognised an impairment amounting to 80 thousand euros (2021: 166 thousand euros), mainly in relation to debt securities under "Impairment or reversal of impairment or gains or losses due to modifications of cash flows of financial assets not measured at fair value through profit or loss" in the consolidated income statement. These amounts are also reported in the "Statement of recognised income and expense" in "Transferred to profit or loss" under e) "Debt instruments at fair value through other comprehensive income". Accumulated impairment at 31 December 2022 amounted to 1.004 thousand euros (2021: 921 thousand euros).

The detail of the carrying amount of "Accumulated other comprehensive income" disclosing separately capital gains and losses is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Debt securities: Capital gains	10,573	59,746
Debt securities: Capital losses	(82,349)	(5,795)
Total fixed income	(71,776)	53,951
Equity instruments: Capital gains	-	54,330
Equity instruments: Capital losses	(53,306)	-
Total equities	(53,306)	54,330
Balance at the end of the period	(125,082)	108,281

Movement in gains and losses of this portfolio recognised in "Accumulated other comprehensive income":

	Thousands of euros	
	2022	
Closing balance at 31 December 2021	108,281	
Revaluation gains and losses	(286,821)	
Amounts transferred to profit or loss	(2,065)	
Income tax expense	55,522	
Valuation adjustments at 31 December 2022	(125,083)	
Debt securities	(71,776)	
Equity instruments	(53,306)	

	Thousands of euros	
	2021	
Valuation adjustments at 31 December 2020	99,711	
Revaluation gains and losses	(8,669)	
Amounts transferred to profit or loss	(3,821)	
Income tax expense	21,060	
Valuation adjustments at 31 December 2021	108,281	
Debt securities	53,951	
Equity instruments	54,330	

In 2022, the assets and liabilities committee decide to nullify its prior decision of changing the "mixed business model (to collect contractual cash flows and selling)" and "business model to collect contractual cash flows" of private institutional debt securities. This decision would have entailed the accounting reclassification of the affected securities from the portfolio of "Financial assets at fair value through other comprehensive income" to the portfolio of "Financial assets at amortised cost".

10. Financial assets at amortised cost

The breakdown of this item in the consolidated balance sheet is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Loans and advances to credit institutions:	3,758,111	2,407,367
Valuation adjustments	455	(59)
Total loans and advances to credit institutions	3,758,565	2,407,309
Loans and advances to customers:	72,608,547	67,167,868
Valuation adjustments	(856,949)	(885,800)
Total loans and advances to customers	71,751,598	66,282,067
Debt securities	9,688,083	7,387,972
Valuation adjustments	(335,464)	208,015
Total debt securities	9,352,619	7,595,987
	84,862,782	76,285,363
In euros	79,852,980	71,882,254
In foreign currency	5,009,802	4,403,109
	84,862,782	76,285,363
Memorandum items		
Assets loaned or pledged	9,285,766	7,095,267
Total loans and advances acquired with impairment	22,690	37,914

Valuation adjustments to financial assets at amortised cost:

	Thousands of euros	
	31.12.2022	31.12.2021
Impairment on assets	(1,083,489)	(988,358)
Discount on the acquisition of financial assets - Portugal	(57,846)	(75,049)
Accrued interest	144,912	68,781
Micro-hedges	(370,929)	217,684
Other	175,392	99,099
	(1,191,960)	(677,844)

Set out below is the detail of movements in the balance of financial assets at amortised cost classified as non-performing due to credit risk:

	Thousands of euros	
	2022	2021
Opening balance	1,680,310	1,669,985
Net additions	157,674	181,401
Transfers to write-offs	(119,282)	(171,076)
Balance at the end of the period	1,718,702	1,680,310

In 2022, 106.9 million euros of non-performing loans and write-offs have been sold (2021: 110.5 million).

The detail of this consolidated balance sheet item, by type of instrument and counterparty, irrespective of the fair value of any type of guarantee ensuring compliance, is as follows:

Thousands of euros				
31.12.2022				
	Loans and advances to credit institutions	Loans and advances to customers	Debt securities	Total
Credit institutions	3,758,565		1,008,815	4,767,380
General governments		968,190	7,761,616	8,729,806
Other private sectors		70,783,407	582,188	71,365,596
	3,758,565	71,751,598	9,352,619	84,862,782

Thousands of euros

Discount on the acquisition of financial assets	(2,095)	(2,444)
Accrued interest	3,152	1,401
Other	(4,314)	(5,204)
Other private sectors	70,783,407	65,550,391
Commercial credit	3,757,316	3,004,677
Secured loans	38,993,523	36,452,675
Reverse repurchase agreements	-	-
Other term loans	23,234,615	21,914,197
Finance leases	703,487	867,900
Receivable on demand and other	3,230,586	2,511,217
Non-performing assets	1,717,571	1,679,278
Total without considering valuation adjustments	71,637,099	66,429,943
Valuation adjustments	(853,692)	(879,552)
Impairment on assets	(1,081,433)	(986,771)
Discount on the acquisition of financial assets	(55,750)	(72,604)
Accrued interest	141,246	67,345
Micro-hedges	(37,521)	8,081
Other	179,766	104,396
	71,751,597	66,282,067
In euros	68,804,137	63,312,412
In foreign currency	2,947,461	2,969,655
	71,751,598	66,282,067

The most significant items under "Other" of valuation adjustments under "Loans and advances - Customers" refer to the commissions and transaction costs (primarily costs assumed by the Group in connection with mortgage lending), which form part of the effective interest rate used to calculate the amortised cost of these transactions in Bankinter, S.A. The item's amount will be recognised in the financial statement throughout the expected life of the corresponding instruments. Specifically, in 2022, the net interest income accrued 37,804 thousand euros in these commissions (2021: 50,883 thousand euros), and 26,476 thousand euros in transaction costs (2021: 19,865 thousand euros).

Non-performing assets by maturity:

	Thousands of euros	
	31.12.2022	31.12.2021
Less than 90 days	287,731	302,433
Over 90 days, but no more than 180 days	141,747	111,241
Over 180 days, but no more than 1 year	201,373	232,411
More than 1 year	1,086,996	1,033,393
	1,717,848	1,679,478

Past due amounts receivable not impaired related to non-performing transactions at 31 December 2022 totalled 104,550 thousand euros (2021: 55,481 thousand euros).

c) Debt securities

The composition of debt securities on the asset side of the consolidated balance sheet is as follows:

	Thousands of euros	
	2022	2021
General governments	8,095,190	6,140,923
Credit institutions	1,008,989	826,021
Other private sectors	583,148	420,272

GUARANTEES RECEIVED	31.12.2022	31.12.2021
Value of collateral	40,736,904	38,448,284
Of which: guarantees underperforming loans	1,318,892	1,151,493
Of which: guarantees non-performing exposures	441,325	571,358
Value of other guarantees	12,058,697	11,579,944
Of which: guarantees underperforming loans	723,339	512,208
Of which: guarantees non-performing exposures	286,081	168,778
Total value of guarantees received	52,795,601	50,028,228

FINANCIAL GUARANTEES GIVEN	31.12.2022	31.12.2021
Loan commitments given	16,370,121	15,963,920
Of which: classified as underperforming	412,554	106,144
Of which: classified as non-performing	-	-
Amount recognised under liabilities on the balance sheet	28,699	24,221
Financial guarantees given	1,976,956	1,676,285
Of which: classified as underperforming	55,442	17,049
Of which: classified as non-performing	8,438	4,174
Amount recognised under liabilities on the balance sheet	4,996	6,122
Other commitments given	9,682,797	8,405,185
Of which: classified as underperforming	75,947	46,070
Of which: classified as non-performing	5,943	7,248
Amount recognised under liabilities on the balance sheet	5,448	7,873

(*) The gross amount in the table above includes the discount obtained on the purchase of the Portuguese loan book from Barclays Plc for 58 million euros at 31 December 2022 (all in "Loans and advances") and 75 million euros at 31 December 2021. These amounts therefore do not appear among the "impairment losses" in the table above, but constitute a hedge of customer receivables that must be considered when assessing the risk to which the entity is exposed.

11. Derivatives - asset and liability hedge accounting

The detail of the outstanding hedging instruments at the end of the last two reporting periods is as follows:

	Thousands of euros			
	Nominal		Fair value of hedging instrument

Changes in the cash flow hedges reserve as at the end of the last two reporting periods:

Amounts recognised in other comprehensive income	Cash flow hedge reserve
Balance at 1 January 2022	(452)
Interest rate risk	(14,142)
- Changes in fair value	(20,203)
- Taxes	6,061
Other	19,028
- Changes in fair value	27,183
- Taxes	(8,155)
Balance sheet at 31 December 2022	4,435

Amounts recognised in other comprehensive income	Cash flow hedge reserve
Balance at 1 January 2021	(962)
Exchange rate risk	(117)
- Changes in fair value	(167)
- Taxes	50
Interest rate risk	(96)
- Changes in fair value	(137)
- Taxes	41
Other	722
- Changes in fair value	1,032
- Taxes	(310)
Balance sheet at 31 December 2021	(452)

Bankinter, S.A. performs and documents the assessment to verify that, at inception of the hedge and during its life, it can expect, prospectively, that the changes in fair value or cash flows of the hedged item that are attributable to the hedged risk are nearly completely offset by changes in the fair value or cash flows of the hedging instrument and, retrospectively, that the actual results of the hedge are within a range of 80% to 125% of the results of the hedged item. Bankinter Group's hedges are highly effective.

The interbank offered rate (IBOR) reform (Note 44) did not, and is not expected to, have any material impact on the hedges entered into the Bank.

12. Non-current assets and disposal groups classified as held for sale

The breakdown of the balance recognised for this item is as follows:

	Thousands of euros	
	2022	2021
Assets foreclosed or received in payment of debt	54,052	80,889
Gross value	122,865	170,656
Valuation adjustments	(68,813)	(89,767)
Other assets	208,942	25,295
Carrying amount	262,994	106,184

"Other assets" includes mainly owner-occupied properties currently being sold. It also includes financial assets acquired solely for subsequent disposal within less than one year in the course of the operations of investment banking.

The balances and movements relating to assets foreclosed or received in payment of debts are as follows:

	Thousands of euros	
Balance at 31.12.2020	116,905	
Additions	41,665	
Valuation adjustments	20,474	
Disposals	(98,155)	
Balance at 31.12.2021	80,889	
Additions	35,004	
Valuation adjustments	20,954	
Disposals	(82,794)	
Balance at 31.12.2022	54,052	

Changes in valuation adjustments made to assets foreclosed or received in payment of debt classified as held for sale are as follows:

	Thousands of euros	
	2022	2021
Opening balance	89,767	110,241
Net allowances taken to profit or loss	16,070	17,585
From loan losses (Note 44)	8,035	8,994
From ageing effect (Note 34)	8,035	8,591
Amounts used	(37,199)	(38,059)
Other movements	175	-
Closing balance	68,813	89,767

Net gains on the disposal of non-current assets held for sale are explained in Note 34.

The classification of non-current assets held for sale from foreclosed properties, by category and average period held in the portfolio, is as follows:

	Thousands of euros							
	Residential assets		Industrial assets		Other assets		Total	
	31.12.2022	31.12.2021	31.12.2022	31.12.2021	31.12.2022	31.12.2021	31.12.2022	31.12.2021
Up to one month	2,799	1,114	683	224	110	-	3,591	1,337
More than one month and up to three months	1,407	2,365	1,927	1,534	375	-	3,709	3,899
More than three months and up to six months	1,810	1,658	822	1,617	-	109	2,632	3,384
More than six months and up to one year	5,100	5,691	1,504	4,293	177	805	6,781	10,789
More than one year	22,350	32,901	7,715	15,077	7,275	13,503	37,339	61,480
Total	33,466	43,728	12,651	22,745	7,937	14,417	54,052	80,889

The distribution of assets foreclosed or received in payment of debts by business segment is as follows:

Segment	31.12.2022	31.12.2021
Corporate Banking	42%	45%
Commercial Retail Banking	58%	55%
Total	100%	100%

Between 31 December 2022 and the date of authorisation for issue of these consolidated financial statements were prepared no significant amounts were classified in "Non-current assets and disposable groups of assets classified as held-for-sale" in the consolidated balance sheet.

The following table provides details of the appraisal companies that have valued assets foreclosed or received in payment of debts in 2022 and 2021, as well as total appraised amount for each type of asset.

Appraisal companies	Thousands of euros							
	Residential assets		Industrial assets		Other assets		Total

The appraisals used by the Group are primarily performed by Eurovaloraciones, Sociedad de Tasación, Técnicos en Tasación S.A. and Gesvalt Sociedad de Tasación. Virtually all of these appraisals are performed in accordance with Ministerial Order ECO 805/2003 and applicable legislation. The customarily used technical methods of measurement are: the cost method, the comparison method, the discounted income method and the residual method. The main assumptions of these models are:

- The equalisation ratio of the price per square meter in the case of appraisals carried out using the comparison method.
- The equalisation ratio of annual estimated income and the discount applied for appraisals carried out using the discounted income method.
- The construction term and discount rate for appraisals carried out using the residual method.

Bankinter Group uses its subsidiary Intermobiliaria, S.A. to manage the assets arising from problematic risks (e.g. foreclosures, transfers in lieu of payment). The company was created on 16 February 1976 and has its registered office at Paseo de la Castellana, 29, Madrid. The Group's general policy is for all assets originating from problematic risks to be recognised by this subsidiary. However, occasionally there may be circumstances that make it advisable for the assets to be directly recognised by the parent company.

The acquisition of those assets by Inmobiliaria, S.A. is financed by the parent company on an arm's length basis. The resources contributed by the parent company to Intermobiliaria are summarised in the following table:

	Thousands of euros	
	31.12.2022	31.12.2021
Capital contributions	7,319	7,319
Participating loans	680,000	680,000
Credit account	48,000	72,800
	735,319	760,119

The outstanding balances collateral or guarantees enforced (foreclosures) owned by Bankinter and Intermobiliaria are as follows:

	Thousands of euros	
	2022	2021
Bankinter	12,215	18,074
Intermobiliaria	77,127	96,752
	89,342	114,826

The outstanding balances financed for buyers in sales of assets included under this item are as follows:

	Thousands of euros	
	2022	2021
Bankinter	1,582	4,727
Intermobiliaria	7,029	11,941
	8,611	16,669

13. Business combinations, investments in joint ventures and associates

The breakdown of "Investments in joint ventures and associates" in the consolidated balance sheet is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Associates	59,960	78,642
Joint ventures	118,242	91,329
	178,202	169,971

Movements in the balance of this item are shown below:

	Thousands of euros	
	2022	2021
Balance at the beginning of the year	169,971	109,526
Inclusion of companies	27,081	55,324
Exclusion of companies	-	-
Reduction of ownership interest in companies	(1,331)	(1,123)
Share of the profit or loss of entities accounted for using the equity method (Note 21)	36,600	33,368
Dividends received by the Bank	(34,263)	(25,661)
Other movements	(19,855)	(1,463)
Balance at the end of the year	178,203	169,971

The most significant events with an impact on the Group's scope of consolidation arising during the year were as follows:

- In the year, Bankinter and Liberty Seguros reached an agreement to jointly carry out their insurance businesses through **Bankinter Liberty Hogar y Auto, S.A.**, whose main focus will be marketing car and homeowners' insurance products and services. With this transaction, which is subject to securing the pertinent authorisations from regulators, Liberty will acquire 50.01% of Bankinter Hogar y Auto, S.A. from Bankinter and Bankinter will retain the remaining 49.99%. The products' design and development will benefit from Liberty Seguros' expertise, and they will be distributed exclusively through Bankinter's online and offline retail networks in Spain and Portugal, including EVO Banco, Bankinter Group's fully digital bank. At the end of the reporting period, the regulatory authorisations required to execute this agreement were still being processed.
- On 17 February 2022, Bankinter, S.A. set up a wholly subsidiary, **Bankinter Investment, S.A.U.** On 20 April 2022, the board of directors agreed to spin off part of the assets of Bankinter, S.A., to Bankinter Investment, S.A.U. (Beneficiary Company), as per the common spin-off project of 23 March 2022, subject to receiving the corresponding authorisation from the competent authorities. The assets spun off are an economic unit that has been rendering individualisable services and activities typical of origination and structuring of alternative investment transactions, advice in corporate transactions (mainly in mergers and acquisitions) and advice in structured and alternative finance.

The spin-offs legal structure is a simplified spin-off, since the Beneficiary Company is fully and directly owned by Bankinter, S.A. Consequently, the spin-off is subject to the provisions of article 49 of Law 3/2009, of 3 April, on structural modifications of companies.

After it received the corresponding authorisation from the competent authorities, the Company has registered the spin-off and derecognised the net assets in the amount of 184.7 million euros against a higher stake in Bankinter Investment, S.A.U., all with accounting effects from 1 January 2022, according to the prevailing accounting legislation. The assets spun off have the following balance sheet:

		Millions of euros	
ASSETS		LIABILITIES	
Cash and other demand deposits	4.8	Financial liabilities at amortised cost	0.1
Non-trading financial assets mandatorily at fair value through profit or loss	71.5	Other liabilities	9.0
Investments in subsidiaries, joint ventures and associates	116.2	TOTAL LIABILITIES	9.0
Other assets	1.2	SHAREHOLDERS' EQUITY	184.7
TOTAL ASSETS	193.7	TOTAL EQUITY AND LIABILITIES	193.7

- **Bankinter Investment SGEIC**, alternative investment fund management firm subordinate to Bankinter Investment, S.A.U., was also incorporated. This firm aims to make progress in alternative investing options. It offers alternative investing under delegated management, tailored to each customer's profile and striving for appropriate investment diversification. Under the new, recently approved regulatory framework (Law 18/2022, of 28 September, on creating and growing businesses), this alternative investment platform, through the management firm, will be available for investments from 10,000 euros. The firm will keep the Bank's model: investments in real-economy sectors carefully selected for their potential for growth, search for the best professional management for each investment type, close tracking of all investments to protect the interests of investors, and co-investment of Bankinter Investment S.A.U. and its expert sectoral partners, and other investors.
- **Bankinter International Notes S.à r.l.**, a wholly owned Bankinter Group subsidiary located in Luxembourg, began operations during the year. It was set up for the issuance of structured bonds, which are marketed by the Bankinter, S.A. parent.
- At the end of the reporting period, Bankinter Group, through its subsidiary engaged in consumer lending (Bankinter Consumer Finance, E.F.C.), was at an advanced stage of negotiation with Sonae SGPS, S.A. to create a joint venture to become leaders in consumer lending in Portugal. This partnership will rely on the combination of the current consumer businesses held by both partners in Portugal.

The most significant changes in the consolidation perimeter during 2021 were as follows:

- The resolution passed at the Annual General Meeting of Bankinter, S.A. on 19 March 2020 for the distribution in kind of its entire share premium (1,184 million euros) was executed in April 2021. This involved the delivery to shareholders of securities representing 82.6% of the share capital of subsidiary Línea Directa Aseguradora, S.A., Compañía de Seguros y Reaseguros. The valuation of the company based of market prices at the transaction date did not differ significantly from the appraisal by independent experts.

The impact of this distribution on "Profit or loss for the period" amounted to 895,732 thousand euros (910,797 thousand euros before tax), recognised in "Profit or (-) loss after tax from discontinued operations" in the consolidated income statement. The gain on transaction arose from the difference between the consolidated carrying amount of Línea Directa Aseguradora, S.A. and its fair value.

Prior to this, Línea Directa Aseguradora, S.A. distributed a dividend of 120 million euros, as planned, leaving its capital adequacy ratio at a normal level for this type of insurance company. This dividend was eliminated on consolidation and therefore had no impact on consolidated profit or loss.

- In May 2021, the Annual General Meeting of Bankinter Capital Riesgo, S.G.E.I.C., S.A. agreed to its dissolution and liquidation. The Bankinter Capital Riesgo I, FCR fund, which was managed by the former, was dissolved and liquidated in financial year 2020.
- Also incorporated in 2021 were Bankinter Hogar and Auto Sociedad Anónima de Seguros y Reaseguros as part of the reorganisation of Bankinter Group's insurance businesses. At the close of the financial year, Bankinter International Notes S.à rl was in the process of being incorporated for the purpose of issue structured bonds.

The list of the Group's fully consolidated companies as at the end of the reporting period, and their most significant data, is as follows:

No impairment losses on tangible assets were recognised in 2022 and 2021.

The cost of fully depreciated items for own use still in use at 31 December 2022 amounted to 366,585 thousand euros (2021: 345,763 thousand euros).

The profits and losses recognised in 2022 and 2021 on the disposal of investment property and other items by type of asset are presented in Note 34.

As at 31 December 2022 and 2021, the Group had no tangible assets for its own use or under construction with restrictions on ownership or which have been pledged to secure repayment of debts. Additionally, as at these dates there were no commitments with third parties for the acquisition of tangible assets. In these periods, no amounts have been received or were expected to be received from third parties as compensation or indemnity for the impairment or loss of value of tangible assets for own use.

Other assets leased out under an operating lease

The amount of minimum lease payments receivable under operating leases in which the Group acts as the lessor at the end of the reporting period is as follows:

	Thousands of euros	
	2022	2021
Operating leases - Minimum payments:		
Within one year	2,491	2,402
After one year but not more than five years	6,447	6,306
More than five years	-	-

There were no contingent rents at 31 December 2022 and 2021 on operating leases currently in force.

All of the Group's tangible assets for own use as at 31 December 2022 and 2021 were denominated in euros.

15. Leases of right-of-use assets

The Group has rights to use assets under leases, mainly of buildings, premises and offices where it carries out its business and, to a lesser extent, motor vehicles, IT equipment and car parks.

Right-of-use assets under leases and changes in 2022 and 2021:

	31.12.2022				
	Initial cost	Additions	Disposals and other	Final cost	Accumulated depreciation
Right-of-use assets:	192,880	33,765	(12,156)	214,489	(79,441)
Land and buildings	187,251	32,529	(10,840)	208,940	(76,690)
IT equipment	46	0	(46)	0	-
Vehicles	4,621	1,227	(1,270)	4,578	(2,446)
Other	962	9	-	971	(305)

	31.12.2021				
	Initial cost	Additions	Disposals and other	Final cost	Accumulated depreciation
Right-of-use assets:	159,070	42,584	(8,774)	192,880	(62,141)
Land and buildings	154,553	40,499	(7,801)	187,251	(59,487)
IT equipment	41	5	-	46	(36)
Vehicles	3,593	2,001	(973)	4,621	(2,389)
Other	883	79	-	962	(229)

The detail of the lease liabilities related to the right-of-us assets is as follows:

	31.12.2022	31.12.2021
Other liabilities - Lease liabilities	138,976	134,779
Current lease liabilities	25,177	21,524
Non-current lease liabilities	113,799	113,255

The weighted average incremental borrowing rate applied to lease liabilities in 2022 was 0.49% (2021: 0.53%).

The Group's lease liabilities at 31 December 2022 and 2021 by maturity are as follows:

	31.12.2022				
	Up to one month	Between one and three months	Between three months and one year	After one year but not more than five years	More than five years
	2,048	3,994	17,113	70,127	45,694

	31.12.2021				
	Up to one month	Between one and three months	Between three months and one year	After one year but not more than five years	More than five years
	1,860	3,729	15,934	66,129	47,126

The impact on the income statement of right-of-use assets in the Group's leases is as follows:

	31.12.2022	31.12.2021
Depreciation expense of right-of-use assets	21,650	22,037
Land and buildings	20,263	20,732
IT equipment	8	12
Vehicles	1,303	1,217
Other	76	76
Interest expense on lease liabilities	1,124	909
Cash outflows	23,345	21,176

Lastly, the Group did not apply the general accounting treatment of leases to leases with terms of 12 months or less where the value of the underlying asset is 5,000 euros or less. Although the assets excluded were of insignificant amounts, the following table presents the impact on the Group's income statement for the year ended 31 December 2022 and 2021:

	31.12.2022	31.12.2021
Expense relating to short-term leases	101	113
Expense relating to leases of low-value assets	549	778

16. Intangible assets

Software in progress	71,879	42,848	(17)	(67,414)	47,296
	258,075	12,627	(1,017)	-	269,685

The goodwill recorded at the end of 2022 and 2021 arose in 2013 from the acquisition of Bankinter Luxembourg, S.A. It is subject to annual impairment testing in accordance with accounting standards to determine whether its carrying amount should be written down.

As a result of the integration of Avantcard DAC in 2019, an intangible asset was recognised in the consolidation balance sheet for 36,100 thousand euros related to the measurement of the relationship with Avantcard customers, which was not recognised in this company's financial statements because it was generated organically. The amortisation period of this intangible asset was estimated at 10 years. The impact in 2022 of this amortisation on profit or loss for the year amounted to 3,610 thousand euros (2021: 3,610 thousand euros). There were no indications of impairment of these intangible assets at the reporting date.

One of the Bankinter Group's objectives for the coming years is to renew its technology platform, redesign its processes and develop digital banking, taking into account the Group's growth and its growing needs of operational and technological transformation. In line with these objectives, capitalisation of IT developments was the Bank's main source of generating new intangible assets in the year.

17. Tax assets and liabilities

The breakdown of these consolidated balance sheet items as at 31 December 2022 and 2021 is as follows:

	Thousands of euros			
	Current		Deferred	
	31.12.2022	31.12.2021	31.12.2022	31.12.2022
Withholdings and payments on account	11,965	13,131	-	-
Income tax expense	169,330	335,401	264,829	273,808
VAT	14,116	16,104	-	-
Other	-	-	-	-
Tax assets	195,411	364,636	264,829	273,808

Other	-	-	-	-
Tax liabilities	231,931	139,054	59,200	115,489

The movement in deferred tax assets and liabilities in 2022 and 2021 is as follows:

	Thousands of euros	
	Deferred taxes	
	Assets	Liabilities
Balance at 31.12.2020	270,032	129,612
Additions	46,560	53,282
Disposals	42,784	67,405
Balance at 31.12.2021	273,808	115,489
Additions	21,122	3,038
Disposals	30,101	59,326
Balance at 31.12.2022	264,829	59,200

The reconciliation of the movement of deferred taxes in 2022 is as follows:

	Thousands of euros			
	31.12.2021	Charge/credit to profit or loss	Charge/credit to equity	31.12.2022
Deferred tax assets	273,808	(13,200)	4,221	264,829
- Arising from the branch in Portugal	6,419	1,229	-	7,648
Deferred tax liabilities	115,489	(8,367)	(47,922)	59,200
- Arising from the branch in	29,586	(2,113)	-	27,473

	Thousands of euros		
	31.12.2021	Charge/credit to profit or loss	Charge/credit to equity
Portugal			

Charges/credits for deferred taxes recognised in the income statement (4,833 thousand euros) include the deferred tax expense corresponding to 30% of the temporary differences for 2022 from the business in Spain (4,378 thousand euros). The remaining amount relates mainly to charges/credits recognised in the income statement for 2022 as a result of the definitive accounting of corporate income tax of the previous year (-561 thousand euros), the accounting of the deferred tax expense related to the branches in Portugal (-3,342 thousand euros) and other deferred tax charges/credits that do not necessarily relate to temporary differences.

The reconciliation of the movement of deferred taxes in 2021 is as follows:

	Thousands of euros		
	31.12.2020	Charge/credit to profit or loss	Charge/credit to equity
Deferred tax assets	270,032	4,026	(251)
- Arising from the branch in Portugal	5,618	-	801
Deferred tax liabilities	129,612	1,339	(15,461)
- Arising from the branch in Portugal	31,856	(2,113)	(157)

Of the amount of deferred tax liabilities recognised at 31 December 2022, 27,473 thousand euros related to the amount recognised in 2016 for temporary difference of liabilities arising from the negative goodwill recognised in the acquisition of the business of the branch in Portugal of 40,152 thousand euros. The Group recognises this amount as income for the purpose of calculating income tax over a 20-year period, under the framework of prevailing tax legislation in Portugal.

The detail of deferred tax assets and liabilities is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Deferred tax receivables arising in:	264,829	273,808
Expected recovery within 10 years:		
Pension funds	1,033	2,155
Impairment of property assets	18,498	17,214
Other provisions and accruals	209,894	221,694
Loan fees and commissions	388	465
Tax losses	3,460	3,460
Other	15,972	17,859
Financial assets at fair value through other comprehensive income	3,560	64
Consolidation adjustments	12,024	10,898
Deferred tax payables arising in:	59,200	115,489
Reversible within 10 years		
Financial assets at fair value through other comprehensive income	(21,514)	26,410
Other	8,207	8,208
Consolidation adjustments	3,035	8,540
Reversible in more than 10 years		
Revaluation of properties	41,999	42,745
Negative goodwill	27,473	29,586

As at 31 December 2022, the Group recognised deferred tax assets from EVO Banco, S.A. amounting to 8,097 thousand euros (3,460 thousand euros related to tax losses) as the directors considered that at that date they satisfied the requirements for the recognition of the related tax assets.

Royal Decree-Law 14/2013, of 29 November, on urgent measures to adapt Spanish law to European Union regulations regarding the supervision and solvency of financial institutions, added the twenty-second additional provision to the consolidated text of the Spanish Corporate Income Tax Act, establishing the conversion of certain deferred tax assets into loans payable to the taxation authorities. The Group estimates that approximately 83,495 thousand euros in deferred tax assets will be monetisable (2021: 96,846 thousand euros). Nevertheless, Royal Decree Law 3/2016, of 2 December, introduced certain amendments to Corporate Income Tax Law 27/2014, of 29 November. Specifically, the law sets a limit of 25% on inclusion of monetisable assets in the tax base and tax loss carryforwards.

Also, there is a new limit for applying double taxation relief: 50% of the full tax base for companies with net turnover over 20 million euros. This was also applicable in 2022.

The Group has analysed the recoverability of the deferred tax assets recognised at 31 December 2022, which supports their recoverability within a maximum of ten years.

18. Other assets and other liabilities

The breakdown of these consolidated balance sheet items is as follows:

	Thousands of euros			
	Assets		Liabilities	
	31.12.2022	31.12.2021	31.12.2022	31.12.2021
Accruals and prepayments	125,642	119,075	227,037	207,159
Transactions in transit	17,093	19,012	35,689	30,827
Other	14,024	15,559	86,552	35,817
	156,759	153,646	349,279	273,803

"Other" includes transitional items pending allocation based on their nature.

19. Financial liabilities at amortised cost

The breakdown of this item in the consolidated balance sheet is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Deposits from central banks	11,699,869	14,190,714
Deposits from credit institutions	3,363,827	3,026,174
Customer deposits	72,902,036	70,778,756
Debt securities issued	6,433,093	7,689,865
Payables represented by marketable securities	5,352,165	5,996,675
Subordinated liabilities	1,080,928	1,693,190
Other financial liabilities	3,418,257	2,124,464
	97,817,081	97,809,974
In euros	94,014,938	94,256,428
In foreign currency	3,802,143	3,553,546
	97,817,081	97,809,974

The breakdown includes "Valuation adjustments", with the following detail:

Note 44 "Risk policies and management" provides details of maturities and interest rate review

	Thousands of euros	
	31.12.2022	31.12.2021
Accrued interest-	(109,470)	(108,813)
Deposits from central banks	(169,643)	(174,730)
Deposits from credit institutions	4,141	161
Customer deposits	9,371	4,309
Payables represented by marketable securities	41,522	46,266
Subordinated liabilities	5,138	15,180

Other	(12,902)	(13,220)
	(495,419)	(80,150)

periods of the items comprising financial liabilities at amortised cost.

Note 43 "Fair value of assets and liabilities" provides fair value by type instrument of financial liabilities at amortised cost and the calculation methodology used.

Annexe V to these annual financial statements itemises information on the main issuances, repurchases or redemptions of debt securities.

a) Deposits from central banks

The composition of this item under "Financial liabilities at amortised cost" on the liability side of the consolidated balance sheet is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Central Banks	11,869,512	14,365,444
Valuation adjustments	(169,643)	(174,730)
Accrued interest	(169,643)	(174,730)
Micro-hedges	-	-
	11,699,869	14,190,714

Balances with Central Banks at year-end include 11,682,000 thousand euros (31 December 2021: 14,232,000 thousand euros), obtained in 4 transactions of the third series of targeted longer-term refinancing operations (TLTRO III) of the European Central Bank (ECB). The Bank participated in 5 of these transactions, one of which, amounting to 2,550,000 thousand euros, matured in December 2022. Valuation adjustments included the negative interest accrued thereon to date, amounting to 169,643 thousand euros (31 December 2021: 174,730 thousand euros).

The TLTRO III operations started in the 2019 financial year, originally within a period of three years. As in the previous series, these operations accrued a more favourable interest rate for those institutions that met certain thresholds of qualifying investment growth during the period from 31 March 2019 to 31 March 2021 ("original period"). Specifically, in Bankinter's case, the transactions accrued interest at the ECB's deposit facility rate, as it was above these thresholds.

However, during the financial year 2020, the Governing Council of the ECB decided to modify some of the conditions of its TLTRO III, to better support lending to households and businesses in the face of economic shocks and heightened uncertainty against the background of the spread of the coronavirus disease (COVID-19).

It decided to establish a "special interest rate" for TLTRO IIIs – provided that positive growth of the eligible investment was achieved during "special reference periods" – as well as making certain other changes. Two "special reference periods" were set: from 1 March 2020 to 31 March 2021 (special period 1) and from 1 October 2020 to 31 December 2021 (special period 2), to be eligible for the "special interest rate" for TLTRO III operations from June-2020 to June-

2021 and from June-2021 to June-2022, respectively. Specifically, this "special interest rate" is set as 50 basis points below the average interest rate on the deposit facility, and may in no case be higher than -1%. At the end of 2020 and 2021, this special rate was -1%.

In 2022, the European Central Bank changed the terms of these TLTRO III transactions. These changes included setting the interest rate of the ECB's deposit facility as the interest rate receivable for these transactions from 23 November 2022.

The bank recognises interest on these transactions by applying the effective interest rate, calculated for each transaction based on the following:

- The bank had exceeded the investment growth thresholds established for the original period. Therefore, TLTRO III transactions will accrue at least the ECB deposit facility rate over their estimated life.
- The bank had exceeded the investment growth thresholds set for special periods 1 and 2. Therefore, TLTRO III transactions will accrue the "special interest rate" 50 basis points below the average deposit facility rate for the fixed part of their estimated life.
- The Bank projects the performance of the ECB's deposit facility rate over the expected life of TLTRO III's operations to determine their expected flows.
- The estimated life of TLTRO III transactions is the same as their original term.

b) Deposits from credit institutions

The composition of this item under "Financial liabilities at amortised cost" on the liability side of the consolidated balance sheet is as follows:

c) Customer deposits

The composition of this item under "Financial liabilities at amortised cost" on the liability side of the consolidated balance sheet is as follows:

At 31 December 2022, "Treasury shares" included the covered bonds amounting to 13,950,000 thousand euros (2021: 12,950,000 thousand euros).

As a result of the planning required for management of the Bank's liquidity and capital, Bankinter, S.A. maintains various financing programmes and instruments, both in the domestic

Spanish market and in the international markets, in order to raise finance or to issue securities of all types, both short-term (promissory notes, Euro Commercial Paper) and long-term (bonds, debentures and notes, covered bonds), in any form of debt (e.g. guaranteed, senior, subordinated).

Promissory notes and bills

The detail of outstanding promissory note issues at 31 December 2022 and 2021 is shown below, by redemption value:

	Thousands of euros	
	Outstanding balance at 31.12.2022	Outstanding balance at 31.12.2021
CNMV registration date		
10.10.2021	-	243,462
10.10.2022	199,633	-
Promissory notes	199,633	243,462
Outstanding interest at discount	(16,292)	(17,358)
Total	183,341	226,104

These issues are denominated in euros.

The interest accrued by these promissory note issues in 2022 totalled 10,930 thousand euros (2021: 13,878 thousand euros). (Note 29)

Mortgage securities

Mortgage-backed securities include the outstanding balance of bond, debenture and covered bond issues made by the Bank. Outstanding covered bonds at 31 December 2022 and 2021 (nominal amounts in thousands of euros):

31.12.2022

The interest accrued by these covered bond issues in 2022 amounted to 30,239 thousand euros (2021: 28,407 thousand euros). (Note 29)

Hybrid securities

Detail of outstanding issues of hybrid liabilities (structured bonds) as at 31 December 2022 and 2021, by original term:

	TERM	BALANCE
	31.12.2022	31.12.2021
Up to one year	-	-
Over one year and up to two years	-	-
Over two years and up to three years	13,320	-
Over three years and up to four years	22,151	23,825
Over four years and up to five years	272,246	50,792
Over five years	380,829	603,712
Total	688,546	678,328

In accounting for hybrid financial liabilities (structured bonds), embedded derivatives have been separated from the main agreement. These embedded derivatives are recorded at their fair value under the "Derivatives" captions of the "Assets or liabilities held for trading" portfolios in the consolidated balance sheet. At year-end 2022, the underlying asset positions of these embedded derivatives amounted to 32,230 thousand euros (2021: 44,824 thousand euros).

Hybrid liability issues (structured bonds) basically consist of taking out a bond whose remuneration is linked to the risk performance of equity financial markets (mainly equities and indices). Structured bonds have a maximum duration of 7 years, and may have different percentages of initial capital guaranteed to the investor (between 0% and 100%). In the accounting process, the host contract (a debt instrument) is segregated from the embedded derivative reflecting the exposure to the aforementioned risks in financial markets, pursuant to the applicable accounting rules and, in particular, considering that the economic characteristics and risks of the embedded derivative are not closely related to those of the host contract.

The interest accrued by these issues of hybrid liabilities in 2022 amounted to 1,346 thousand euros (2021: 1,270 thousand euros). (Note 29)

Other non-convertible securities

Outstanding non-convertible bonds as at 31 December 2022 and 2021 (nominal amounts in thousands of euros):

31.12.2022					
Issue	Nominal amount (thousands of euros)	Type of security	Interest %	Quoted price	Final maturity of the issue
Other non-convertible securities					
Mar-19	500,000	Bonds Fixed rate	0.875%	YES	Mar-24
July-19	750,000	Bonds Fixed rate	0.875%	YES	July-26
Feb-20	750,000	Bonds Fixed rate	0.675%	YES	Oct-27
	2,000,000				
Discounted interest	(4,262)				
	1,995,738				

31.12.2021					
Issue	Nominal amount (thousands of euros)	Type of security	Interest %	Quoted price	Final maturity of the issue
Other non-convertible securities					
Mar-19	500,000	Bonds Fixed rate	0.875%	YES	Mar-24
July-19	750,000	Bonds Fixed rate	0.875%	YES	July-26
Feb-20	750,000	Bonds Fixed rate	0.675%	YES	Oct-27
	2,000,000				
Discounted interest	(4,262)				
	1,995,738				

All these outstanding issues are denominated in euros.

The interest accrued by the issues of other non-convertible securities in 2022 amounted to 16,931 thousand euros (2021: 16,931 thousand euros) (Note 29).

e) Debt securities issued: Subordinated liabilities

The composition of this item of the portfolio of financial liabilities at amortised cost in the balance sheet is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Payables represented by marketable securities	1,180,371	1,678,376
Non-convertible securities (subordinated debentures)	830,371	1,328,376
Convertible contingent preference shares	350,000	350,000
Valuation adjustments	(99,444)	14,814
Accrued interest	5,138	15,180
Micro-hedges	(100,442)	5,476
Other	(4,140)	(5,841)

	Thousands of euros	
	31.12.2022	31.12.2021
	1,080,928	1,693,190
In euros	1,080,928	1,693,190
	1,080,928	1,693,190

The interest accrued by issues of non-convertible subordinated debentures in 2022 amounted to 20,425 thousand euros (2021: 23,477 thousand euros) (Note 29).

The interest accrued by issues of contingent convertible preference shares at 31 December 2022 and 2021 is recognised in equity, as explained in Note 21. g).

Subordinated debentures

Subordinated debentures (nominal amounts in thousands of euros):

Balance at 31 December 2022					Thousands of euros	
	Issue	Nominal	Interest %	Issue maturity		
III SUBORDINATED DEBENTURES 1998	14.05.1998	81,893	Fixed rate 6.00%	18.12.2028		
I SUBORDINATED DEBENTURES June 2021	23.06.2021	750,000	Fixed rate 1.25%	23.12.2032		
		831,893				
Interest and other items		(1,522)				
		830,371				

Balance at 31 December 2021					Thousands of euros	
	Issue	Nominal	Interest %	Issue maturity		
III SUBORDINATED DEBENTURES 1998	14.05.1998	81,893	Fixed rate 6.00%	18.12.2028		
I SUBORDINATED DEBENTURES April 2017	6.04.2017	500,000	Fixed rate 2.50%	6.04.2027		
I SUBORDINATED DEBENTURES June 2021	23.06.2021	750,000	Fixed rate 1.25%	23.12.2032		
		1,331,893				
Interest and other items		(3,517)				
		1,328,376				

In April 2022, Bankinter redeemed an issue of subordinated debt for 500 million euros issued in April 2017 at 2.50% interest rate.

In June 2021, Bankinter issued subordinated debt (considered tier 2 for the purposes of capital adequacy regulations) in the amount of 750 million euros, for a term of 11 and a half years (to 23 December 2032) with a call redemption option after 6 and a half years, on 23 December 2021. The interest rate on this issue was 1.25% (Note 29).

Preference shares

On 17 July 2020, Bankinter, S.A. launched a new issue of perpetual non-cumulative, contingent convertible instruments classified as Additional Tier 1 (AT1), in the form of preference shares, of 350 million euros.

These preference shares accrue an initial coupon of 6.25%. The Bank reserves the right, at its sole discretion, to cancel the payout of any accrued coupon at any time. As a contingent condition for the irrevocable and mandatory conversion of the preference shares into ordinary shares, the Common Equity Tier 1 (CET 1) ratio must fall below 5.125%. In this case, the holders of the preference share will receive a variable number of ordinary shares depending on the higher of i) the market price of the share at the time of conversion, ii) a floor price of 4.1686 euros subject to adjustments, or iii) the par value of the ordinary shares (0.30 euros).

This preferred share issue targeted investors authorised under Legislative Royal Decree 4/2015, of 23 October, approving the Restated Spanish Securities Market Act, with sales to minority shareholders not allowed. The securities issued were admitted to listing on Irish Stock Exchange (ISE).

In accordance with the characteristics of the issue, the conversion into shares of the nominal amount of these instruments would occur if the CET1 ratio of the Bank's consolidated group were to fall below a certain level, in which case the issuer could not avoid delivery of a variable number of shares. Consequently, in accordance with IAS 32, the principal amount of the instruments issued was classified as a financial liability. Moreover, the Group has decision-making power on payment of the coupon, so it considered it has a component of equity under IAS 32. At 31 December 2022, the Group had recognised 97,581 thousand euros (net of tax) in retained earnings for the coupon accrued by preference shares issued (2021: 82,272 thousand euros).

In 2021, it redeemed an issue of perpetual non-cumulative, contingent convertible instruments classified as Additional Tier 1 (AT1), in the form of preference shares, of 200 million euros.

Issues of preference shares on the balance sheet at 31 December 2022 and 2021:

31.12.2022

	Issue	Nominal	Interest %	Issue maturity
Bankinter, S.A.	17.07.2020	350,000	6.250%	PERPETUAL
		350,000		

31.12.2021

	Issue	Nominal	Interest %	Issue maturity
Bankinter, S.A.	17.07.2020	350,000	6.250%	PERPETUAL
		350,000		

f) Other financial liabilities

"Other financial liabilities" on the liability side of the consolidated balance sheet:

	3,418,257	2,124,464

20. Provisions

Balances and movements in provisions in 2022 and 2021:

	Thousands of euros				
	Total	Pensions and other post-employment defined benefit obligations	Commitments and guarantees given	Pending legal issues and tax litigation	Other provisions
Balance at 31.12.2020	438,512	1,265	37,787	100,098	299,361
Net increases in the period	182,834	-	332	128,048	54,454
Amounts used	(193,716)	-	-	(86,049)	(107,667)
Other movements	(7,720)	404	96	(5,489)	(2,732)
Balance at 31.12.2021	419,911	1,669	38,216	136,609	243,417
Net increases in the period	107,016	-	800	69,456	36,760
Amounts used	(140,519)	-	-	(79,223)	(61,296)
Other movements	(10,250)	(376)	126	(4,087)	(5,912)
Balance at 31.12.2022	376,159	1,292	39,143	122,754	212,969

Of the total amount set aside as a provision at the close of the financial year, 22,642 thousand euros relate to tax contingencies and 313,081 thousand euros to legal contingencies (2021: 37,691 thousand and 342,335 thousand euros, respectively).

Based on available information, the Group estimated the extent of the obligations relating to each claim and/or lawsuit and recognised, where necessary, appropriate provisions to reasonable cover liabilities that could arise from claims received and/or ongoing lawsuits.

Specifically, estimating provisions related to lawsuits with customers is a particularly complex process given the uncertainty surrounding the timing of the final outcome and/or the final amount of the loss. This estimate is based on a detailed analysis of the nature and amount claimed by the customer. Subsequently, the Group estimates the amount of the provisions, taking into account such aspects as the number and type of claims received, the amount subject to the risk of an outflow of resources and the probability that this outflow will ultimately occur considering, among other factors, past experience in rulings handed down against the Entity in claims already resolved. The assumptions used to establish the provisions are reviewed on an ongoing basis and validated in accordance with the historical outcomes of claims brought against the Group and rulings handed down against the Group.

Provisions for legal contingencies include mainly provisions arising from multicurrency loan agreements through which the Group has claims for which a ruling has yet to be handed down by the courts. These provisions are estimated for all ongoing legal proceedings. The Entity monitors the contingencies and obligations associated with these types of instruments periodically. At each reporting date, the Bank's management analyses and determines the best estimate of the legal provisions to be recognised in the consolidated financial statements, taking into account the number of claims submitted by customers and the outcome of the rulings handed down in judgements of second instance on the various proceedings initiated by customers. Specifically, to calculate the provision associated with these types of transactions, the average record of adverse rulings handed down by the courts against the Entity and the estimated average loss per case are taken into account. The governance bodies and management consider that the provision recognised at year-end is the best estimate of the probable outflow of resources that the Entity would have to make as a result of the actual contingency arising from multicurrency loans sold to customers.

The estimated maximum amount of the obligation at year-end arising from pending claims for multi-currency loans marketed to customers, assuming that all claims were settled in favour of the customer, would amount to 188.1 million euros (2021: 239.3 million euros).

Regarding the schedule for the outflow of resources, the average weighted maturity in 2022 was 2.8 years for tax contingencies and 2 years for legal contingencies (2021: 3.2 and 2 years, respectively).

The Group considers that there will not be any future reimbursements giving rise to the recognition of assets.

The main tax contingencies are described in Note 42 "Tax situation" of the notes to the consolidated financial statements. Note 27 "Staff expenses" gives further details on the provision for pensions and similar obligations. Furthermore, Note 44 "Risk policies and management" provides additional disclosures on provisions for contingent liabilities and commitments.

The crisis caused by the COVID-19 pandemic did not give rise to any changes in the Group's approach to estimating provisions to cover these contingencies.

Revolving credit cards

Group management and directors have assessed the potential impact on the Group's related portfolio of Supreme Court ruling 149/2020 nullifying a revolving credit facility after deeming that the interest rate charged was usurious, and estimated the provisions required to cover the potential losses from lawsuits that could be brought against the Group in this connection.

At the end of the reporting period, the accumulated provisions linked to lawsuits whose purpose is the potential consideration of usurious interest remunerative rates reached 77,685.2 thousand euros (2021: 76,615.2 thousand euros).

Supreme Court ruling number 149/2020, of 4 March 2020, on the usurious nature of revolving credit, stipulated a reference to determine the existence of usury from average rates (TEDR) of revolving card contracts published by Banco de España in 2017 (with a historical series from 2011). However, it is still not clear which spread in relation to these published average rates would mean that a remunerative interest rate is considered usurious.

This ruling coincided with the start of the COVID-19 health crisis and subsequent stop to the court activity after the state of emergency was declared (*Royal Decree 463/2020, of 14 March, declaring the state of emergency to manage the COVID-19 crisis situation*). For this reason, the immediate impact of this court ruling was not felt until months after the gradual return to normal, which led to an increase in this contingency.

There was an increase in the number of lawsuits filed due to the potential usurious nature of remunerative interest on revolving cards, with a peak number of lawsuits in the first quarter of 2022.

As for the future contingency of the potentially usurious nature of remunerative interest set forth in the contract, we expect that the situation will slowly improve and the number of lawsuits will decrease. This estimate is based on the following assumption and certain proven facts:

- The interest rate of these cards was proactively repriced from March 2020, with the maximum applicable interest rate lowered and in under no circumstances exceeding 20.00% (APR).

- We also redesigned the product to increase the minimum monthly payment that, in conjunction with the reduced interest rate, means reducing the repayment period of the balance drawn and the payable interest. Additionally, our contracts now require that the customer expressly chooses the revolving card option before activation, so that the customer must choose the monthly amount for payment if they choose revolving, and the minimum payment is no longer the default option.
- Further, we have enhanced the delivery of pre- and post-contractual information as per *Order ETD/699/2020, of 24 July, on the regulation of revolving credit and amending Order ECO/697/2004, of 11 March, on the risk information centre, Order EHA/1718/2010, of 11 June, on the regulation and control of advertising of banking services and products, and Order EHA/2899/2011, of 28 October, on customer transparency and protection in banking services*, which encompasses changes to the assessment of solvency in responsible lending.
- These enhancements have been applied to new cards as well as existing cards through initiatives like encouraging active revolving card customers to sign a new contract to replace their previous contract (including all the enhancements mentioned above), inform the rest of customer segments of the changes in conditions with greater detail about how the product works, etc.
- We have reduced our risk perimeter through portfolio sales, and the liability derived from this situation has been reduced qualitatively ("caps") and in terms of time.
- Courts are accepting our arguments with increasing frequency.

The maximum sum that the Group may have to pay is uncertain. There are diverse positions held by different courts about lawsuits of similar characteristics because there are no uniform criteria, as mentioned before, on what is notably (or not) above the normal revolving credit interest rate when the contract is signed. And this is particularly evident as refers to cards issued before Banco de España published the statistics.

Considering the average period between the complaints and filing the lawsuits (less than a year) and their resolution, in the interest rate environment to date, we believe this has no significant impact on the financial statements.

Although we endeavour our best efforts, when the lawsuit is filed, to calculate the effect of an unfavourable ruling and then make the provision, there is uncertainty about the concrete amount since the calculation basis could vary, for example, due to settlements, payment of pending balances by the customers, partial estimate of the ruling, etc. In general, variations are minimal and the average amounts of each lawsuit are not very high, and the risk can be considered low.

We consider that there will not be any future reimbursements giving rise to the recognition of assets.

Finally, below are the details of lawsuits received by the Group as at 31 December 2022 and 2021:

	31.12.2022		31.12.2021	
	Number	Maximum loss (thousands of €)	Number	Maximum loss (thousands of €)
Lawsuits with no final ruling	6,840	50,218	4,631	30,735
Pending ruling	5,584	40,582	3,863	26,033
Unfavourable	1,113	8,964	719	4,467
Favourable	143	672	49	234
Closed lawsuits with final ruling	7,282	45,912	3,634	23,095
With agreement	782	4,801	770	4,792
Unfavourable	6,156	39,916	2,702	17,616
Favourable	344	1,195	162	687
TOTAL	14,122	96,129	8,265	53,830

Below are details of the complaints filed by the customers:

	31.12.2022	31.12.2021
Customers with formal complaints (number)	21,302	13,660
Customers with signed agreements (number)	7,812	6,694
Total agreements signed and settled (thousands of €)	19,354	17,030

Additionally, the Bank is including as provisions the impact of the lawsuits and complaints that it believes could be filed by customers within 12 months.

21. Shareholders' equity

The composition of, and changes in, the Group's own funds in 2022 and 2021 are included in the consolidated statement of total changes in equity.

a) Capital

At 31 December 2022 and 2021, Bankinter, S.A.'s share capital was represented by 898,866,154 fully subscribed and paid shares with a par value of 0.30 euros each. These shares confer the same voting and dividend rights.

All the shares are represented by book entries, are listed on the Madrid and Barcelona Stock Exchanges and are traded on the Spanish continuous market.

There were no movements in share capital in 2022.

	Thousands of euros	
	Number of shares	Nominal value
Balance at 31.12.2020	898,866,154	269,660

Share of profit or loss of entities accounted for using the equity method	(13,289)	(12,092)
Bankinter Investment S.A.U	990	-
	4,393,463	3,294,761

Legal reserve: Companies must earmark 10% of profit for the year to the legal reserve fund until it reaches at least 20% of the share capital. The legal reserve cannot be distributed to shareholders and can only be used to offset losses, provided that other reserves are not available for this purpose. Also, under certain circumstances, it may be used to increase the share capital in the portion of this reserve that exceeds 10% of the share capital amount after the increase. At 31 December 2022 and 2021, the legal reserves were fully allocated.

Revaluation reserves: This item includes the revaluation reserves arising in business combinations.

Reserves (losses) of entities accounted for using the equity method: Reserves and losses in companies accounted for using the equity method:

	Thousands of euros	
	31.12.2022	31.12.2021
	Reserves	Reserves
Bankinter Seguros Generales, S.A.	(6,095)	(5,861)

Bankinter Logística, S.A.	(121)	86
Victoria Hotels & Resorts, S.L	276	(13)
Atrium Bire SIGI SA	(284)	-
	(13,289)	(12,092)

Capitalisation reserve: This reserve is established to comply with section 1.b) of article 25 of Law 27/2014, on Corporate Income Tax, as a result of the Bankinter Group's use in 2022 and 2021 of the tax credit for the capitalisation reserve regulated by this article.

With the exception of unrestricted reserves, the rest of the reserves are restricted.

d) Other equity

This item includes share-based payments.

e) Treasury shares

At 31 December 2022, the Group held 221,302 treasury shares of 0.3 euros par value each (2021: 227,619 shares).

In 2022, the Bank purchased 15,481,298 shares (2021: 10,001,096) and sold 15,487,615 shares (2021: 10,426,025) on the stock market, giving rise to a loss of 145 thousand euros recognised under "Reserves" on the balance sheet (2021: profit of 733 thousand euros).

f) Profit/(loss) attributable to the Group

Breakdown of profit(loss) before tax before consolidation adjustments of each company comprising the Group in 2022 and 2021:

	Thousands of euros

Share of profit or loss of companies accounted for using the equity method in 2022 and 2021:

Thousands of euros

	31.12.2022	31.12.2021
Bankinter Seguros Generales, S.A.	281	(235)
Bankinter Seguros de Vida, S.A. de Seguros y Reaseguros	34,321	32,098
Olimpo Real Estate Socimi	438	838
Olimpo Real Estate Socimi Portugal	88	75
Atom Hoteles, S.A.	1,798	342
Bankinter Logística, S.A.	(639)	(32)
Victoria Hotels & Resorts, S.L	113	282
Atrium Bire SIGI SA	201	
	36,600	33,368

g) Earnings per share

The earnings per share are calculated by dividing the earnings attributable to the Group, adjusted by the profit after tax in equity of contingent convertible preference shares, by the weighted average number of ordinary shares outstanding during the period, excluding, where applicable, the treasury shares acquired by the Group. Earnings per share in 2022 and 2021:

	2022	2021
Profit for the period (thousands of euros)	560,203	1,333,108
Coupon amount of perpetual non-cumulative contingent convertible instrument	(15,309)	(19,306)
Earnings for the period (thousands of euros)	544,894	1,313,802
Average number of shares (thousands of shares)	898,866	898,866
Average number of treasury shares (thousands of shares)	274	1,151
Basic earnings per share (euros)	0.62	1.49
Diluted earnings per share (euros)	0.61	1.46
Memorandum items:		
Continuing operations.		
Earnings for the period (thousands of euros)	544,894	378,127
Basic earnings per share (euros)	0.62	0.44
Diluted earnings per share (euros)	0.61	0.42
Discontinued operations		
Earnings for the period (thousands of euros)	0	935,674
Basic earnings per share (euros)	0	1.04
Diluted earnings per share (euros)	0	1.04

The convertibility of the Group's perpetual non-cumulative contingent convertible instruments (preference shares, Note 19) is conditional on compliance with certain terms and conditions other than the Group's earnings or the market price of the Bank's shares. In accordance with international financial reporting standards, as these terms and conditions were not met at 31

December 2022 and 2021, these convertible instruments have not considered to have any effect on the weighted average number of shares outstanding and, accordingly, do not affect the Group's diluted earnings per share at 31 December 2022 or at 31 December 2021.

These perpetual non-cumulative contingent convertible instruments accrue a coupon (Note 19), with the Bank reserving the right to cancel the payout of any accrued coupon at its own discretion. Under applicable financial regulations, this right is considered an equity item, recognised in "Other increases or (-) decreases in equity" in the consolidated statement of total changes in equity. The coupon accrued during the year by these perpetual non-cumulative contingent convertible instruments, net of tax, is adjusted to the profit (loss) for the period from continuing operations for calculation of diluted earnings per share.

h) Dividends and remuneration

Dividends distributed and distributable charged to profit or loss for 2022 and 2021, excluding treasury shares held by the Bank:

Date	Dividend per share (euros)	Number of shares	Amount (thousands of euros)	Date of board approval	Profit (loss) for the year
Oct-2021	0.13328659	898,866,154	119,780	Sept-2021	2,021
Dec-2021	0.05148231	898,866,154	46,265	Dec-2021	2,021
Mar-2022	0.05857824	898,866,154	52,642	Feb-2022	2,021
	0.24334714		218,688		
June-2022	0.07412058	898,866,154	66,610	June-2022	2,022
Sept-2022	0.06453401	898,866,154	57,995	Sept-2022	2,022
Dec-2022	0.08371622	898,866,154	75,233	Dec-2022	2,022
Mar-2023	0.08931488	898,866,154	80,264	Feb-2023	2,022
	0.31168569		280,101		

The provisional accounting statements of Bankinter, S.A. justifying the existence of sufficient resources for the distribution of interim dividends were as follows:

	May 2022	August 2022	November 2022
	First	Second	Third
Profit after tax (thousands of euros)	206,285	372,709	503,385
Prior dividends paid (thousands of euros)		66,610	124,605
Interim dividend for the period (thousands of euros)	66,610	57,995	75,233
Accumulated interim dividends (thousands of euros)	66,610	124,605	199,838
Gross dividend per share for the period (euros)	0.07412058	0.06453401	0.08371622
Payment date	June-2022	Sept-2022	Dec-2022

22. Accumulated other comprehensive income

Breakdown of this consolidated balance sheet item at 31 December 2022 and 2021:

	Thousands of euros	
	31.12.2022	31.12.2021
ACCUMULATED OTHER COMPREHENSIVE INCOME	(129,028)	115,539
Items that will not be reclassified to profit or loss	(47,171)	57,602
Actuarial gains or (-) losses on defined benefit pension plans	6,135	3,272
Non-current assets and disposal groups classified as held for sale	-	-
Fair value changes of equity instruments measured at fair value through other comprehensive income	(53,306)	54,330
Items that may be reclassified to profit or loss	(81,857)	57,937
Foreign currency translation	-	-
Hedging derivatives. Cash flow hedges [effective portion]	4,434	(452)
Financial assets at fair value through other comprehensive income	(71,776)	53,951
Debt instruments	(71,776)	53,951
Equity instruments	-	-
Non-current assets and disposal groups classified as held for sale	-	-
Share of other recognised income and expense of investments in joint ventures and associates	(14,515)	4,438

23. Offsetting of financial assets and liabilities and collateral

The Group does not carry on activities involving the net recognition of assets and liabilities. It does, however, carry out activities that require the deposit of mutual collateral with counterparties, calculated on the basis of net risks.

The products subject to collateralisations are mainly the derivatives under CSAs (Credit Support Annex) signed, and repurchase and reverse repurchase agreements under GMRA (Global Master Repurchase Agreement) or GMSLA (Global Master Securities Lending Agreement). The main characteristics and counterparties of these guarantees are as follows:

Counterparty	Assets	Liabilities	Net	Collateral received	Collateral provided
Company 1	378,019	(26,288)	351,731	358,020	-
Company 2	433,257	(231,086)	202,171	202,270	-
Company 3	121,366	(21,016)	100,350	100,350	-
Company 4	661,112	(633,191)	27,921	27,930	-
Company 5	67,657	(89,630)	(21,972)	-	21,980
Company 6	77,809	(98,961)	(21,152)	-	21,150
Company 7	59,218	(41,366)	17,852	17,653	-
Company 8	17,494	-	17,494	17,490	-
Company 9	87,092	(5,133)	81,959	82,000	-
Company 10	28,448	(11,180)	17,268	17,270	-
Company 11	19,936	(3,031)	16,906	16,910	-
Company 12	16,029	-	16,029	15,180	-
Company 13	23,669	(9,550)	14,119	14,120	-
Company 14	37,726	(47,947)	(10,221)	-	10,230
Company 15	18,776	(9,517)	9,259	9,260	-
Company 16	12,698	(4,608)	8,090	8,100	-
Company 17	14,703	(21,933)	(7,230)	-	5,480
Company 18	17,896	(10,789)	7,106	7,110	-
Company 19	8,483	(14,013)	(5,529)	-	4,490
Company 20	32,025	(26,619)	5,406	5,410	-
Company 21	-	(5,326)	(5,326)	-	5,520
Company 22	7,699	(3,271)	4,427	4,350	-
Company 23	24,350	(28,529)	(4,179)	-	4,200
Company 24	1,563	(3,483)	(1,920)	-	1,930
Company 25	-	(1,698)	(1,698)	-	1,700
Company 26	3,011	(1,407)	1,605	1,650	-
Company 27	3,945	(5,492)	(1,548)	-	1,520
Company 28	42,762	(44,031)	(1,269)	-	1,410
Company 29	1,103	(109)	994	870	-
Company 30	2,489	(1,525)	964	900	-
Company 31	75	(997)	(922)	-	910
Other entities	34,527	(34,768)	(242)	1,601	1,677

The differences at 31 December 2022 between the measurement and the collateral are adjusted through contributions of collateral between the counterparties on the next business day, if the transfer minimums are reached.

In addition, guarantees for 529 million euros have been deposited in clearing houses.

For repurchase and reverse repurchases, the situation of collateral is as follows, by whether they represent a positive or negative valuation for the Group:

Counterparty	Exposure	Collateral
Company 1	56,077	57,050
Company 2	53,577	51,232
Company 3	23,944	23,940
Company 4	10,788	10,774
Company 5	10,656	10,650
Company 6	7,841	7,840
Company 7	5,974	5,878
Company 8	5,026	5,030
Other	16,223	15,754

Furthermore, at year-end the Group had special guarantees for its securitisation transactions, which are set out below (thousands of euros):

Counterparty	Special guarantee
FIANZA 13 FTA	12,640
FIANZA 10 FTA	6,830
FIANZA 11 FTH	4,420
FIANZA BK 9 FTA	1,990

24. Contingent liabilities and commitments

The composition of this item is as follows:

	Thousands of euros	
	31.12.2022	31.12.2021
Contingent liabilities:		
Financial guarantees	1,976,956	1,676,285
Irrevocable documentary credits	417,002	971,636
Other guarantees and sureties provided	4,930,742	4,084,451
	7,324,700	6,732,371
Contingent commitments:		
Drawable by third parties	16,370,121	15,963,920
Regular way financial asset purchase contracts	4,272,071	3,321,934
Other contingent commitments	62,982	27,165
	20,705,174	19,313,018

"Contingent commitments drawable by third parties" consists entirely loan commitments to customers immediately drawable.

25. Transfers of financial assets

Breakdown of the transfers of financial assets by the Group as at 31 December 2022 and 2021:

	Thousands of euros	
	31.12.2022	31.12.2021
Removed from the balance sheet	-	-
Retained fully on the balance sheet	771,878	905,583
	771,878	905,583

No securitisation funds were redeemed in 2022. In 2021, the Bankinter 6 FTA, Bankinter 7 FTH and Bankinter 8 FTH funds were redeemed for 131,680 thousand euros, 48,502 thousand euros and 102,750 thousand euros, respectively.

The main characteristics of asset transfers completed via loan securitisations are as follows:

Fund	Series	Rating	Nominal amount	Coupon	Maturity
BK 13 FTA	Series A1	Aaa/AAA:	85,000	3M EUR + 0.06%	17.07.2049
	Series A2	Aaa/AAA:	1,397,400	3M EUR + 0.15%

At 31 December 2022, the securitisation bonds issued by securitisation funds integrated and acquired or retained by the Bank amounted to 524,662,173 euros (2021: 600,553,913 euros). These securities are recognised under "Debt securities issued" on the liabilities side of the balance sheet with a reduction to the amount of the corresponding issues.

There are no agreements through which the Entity must recognise a financial liability on the balance sheet as a result of undertaking to provide financial backing to securitised assets.

Securitisations fully maintained on the balance sheet:

	Thousands of euros				
	Outstanding balance as at 31.12.2022	Carrying amount of associated liabilities (bonds)	Fair value of assets transferred	Fair value of associated liabilities	Net position
Fully maintained on the balance sheet:					
Bankinter 9 Fondo de Titulización de Activos	112,700	41,652	114,464	41,640	72,824
Bankinter 10 Fondo de Titulización de Activos	211,633	68,962	214,944	69,113	145,831
Bankinter 11 Fondo de Titulización Hipotecaria	135,122	55,552	137,237	55,772	81,465
Bankinter 13 Fondo de Titulización de Activos	312,422	81,050	317,310	81,575	235,735
	771,878	247,215	783,954	248,099	535,855

	Thousands of euros				
	Outstanding balance as at 31.12.2021	Carrying amount of associated liabilities (bonds)	Fair value of assets transferred	Fair value of associated liabilities	Net position
Fully maintained on the balance sheet:					
Bankinter 9 Fondo de Titulización de Activos	135,274	54,689	138,464	55,002	83,462
Bankinter 10 Fondo de Titulización de Activos	252,750	89,294	258,709	89,873	168,836
Bankinter 11 Fondo de Titulización Hipotecaria	158,426	67,759	162,161	68,289	93,872
Bankinter 13 Fondo de Titulización de Activos	359,133	93,287	367,601	94,222	273,379
	905,583	305,030	926,935	307,386	619,550

26. Financial derivatives

Notional amounts of financial derivatives held by the Group:

	Thousands of euros	
	31.12.2022	31.12.2021
Financial derivatives (Notes 7 and 11):		
Foreign currency risk	45,593,217	31,021,071
Interest rate risk	27,096,536	24,466,728
Equity risk	3,030,232	1,822,004
Commodity risk	366	-
Credit risk	-	-
	75,720,351	57,309,803

The breakdown above shows the notional amount of the formalised contracts, which does not represent the actual risk assumed by the Group, since the net position in these financial instruments results from their offsetting and/or combination.

27. Staff expenses

Composition of the amounts under this item of the consolidated income statement for 2022 and 2021:

	Millions of euros	
	2022	2021
Salaries and bonuses of current employees	375,508	347,948
Social security contributions	84,867	80,415
Contributions to defined benefit plans	1,541	2,321
Contributions to defined contribution plans	6,366	6,454
Termination benefits	4,086	5,602
Other staff expenses	36,491	30,046
	508,860	472,786

The Group remunerates certain groups of employees with shares, i.e. providing shares in exchange for services rendered. In accordance with the accounting standards, the services received are recognised in the income statement, with a corresponding increase in equity. The amount recognised under "Shareholders' equity" at 31 December 2022 is 11,905 thousand euros (6,163 thousand euros at 31 December 2021).

The breakdown of Group staff (number of employees) at 31 December 2022 and 2021 according to the pension obligations is as follows:

	31.12.2022	31.12.2021
Employees in Spain with recognised service prior to 8 March 1980	18	26
Employees in Portugal with recognised service prior to March 2009	603	617
Staff beneficiaries of a vested pension	132	126
Former employees with vested rights	138	119
Other current employees	5,798	5,495

Post-employment benefits

In relation to pension obligations, in accordance with the Collective Bargaining Agreement in force, for staff hired prior to 8 March 1980, as well as for certain staff in accordance with individually established agreements, the Bank has assumed an obligation to supplement Social Security benefits in the event of retirement (under a defined benefit system). This pension scheme is managed and guaranteed externally from the Bank through various insurance policies covering all their economic (returns and interest rate fluctuation) and demographic (survival) risks, thereby obtaining, firstly, a high level of immunity from the above risks and their diversification across different insurance companies; and, secondly, the guarantee of the plan being managed externally from the risks of the Bank itself.

The defined benefit obligations in the Collective Bargaining Agreement affect staff that have not yet retired, which have yet to receive the benefit (considered current employees or staff in active service and staff who have taken early retirement, or staff in early retirement), and staff who have earned a benefit for retirement, widowhood, orphanage, or permanent disability and are receiving a pension (non-active staff).

In order to cover these pension obligations, the Bank has an insurance contract with AXA Seguros y Reaseguros S.A., ("Axa"), with the unconditional guarantee of its Parent Company, that guarantees the future coverage of all pension supplements for non-active staff vested prior to 2003. Additionally, for non-active staff starting from 2003 and to cover staff in active service, these benefits are guaranteed through a co-insurance policy, in which AXA Seguros y Reaseguros S.A. participates at the rate of 40% acting as the company leading the co-insurance, and Caser S.A. de Seguros y Reaseguros and Allianz, Compañía de Seguros y Reaseguros S.A. ("Allianz") at the rate of 30% each.

In addition, for a small group of retired staff (non-active), in-kind remuneration is guaranteed (a Christmas basket). This post-employment obligation is not externalised as it is a non-monetary obligation, but rather it is provisioned in the balance sheet.

Lastly, for top executives, the following contributions will be made:

- For top executives appointed from 2012, in the year of appointment as top executive, an initial contribution equal to 656,560 euros to a unit-link policy taken out with AXA Seguros y Reaseguros S.A. and, from the sixth year from when this initial contribution was made, they will have a regular annual contribution to a savings insurance policy taken out with Generali España S.A. Seguros y Reaseguros ("Generali"), equal to a percentage of their annual gross salary according to their professional category and year of appointment.
- For top executives appointed between 2000 and 2010, from 2019, they will be entitled to a regular annual contribution to a savings insurance policy taken out with Generali España S.A. Seguros y Reaseguros, equal to a percentage of their annual gross salary according to their professional category and year of appointment.

In the event of retirement, death or disability, top executives or their designated beneficiary(ies) will receive the accumulated funds under the unit-linked policy and savings insurance policy at the time of the contingency.

For Bankinter Portugal, for all employees in service prior to March 2009, taking account of the seniority date of Barclays Bank, they shall be entitled to receive at retirement age a pension in accordance with the Collective Labour Agreement in banking in Portugal or, if greater, a top-up for the retirement pension of social security, where the sum total of the two pensions shall be equal to 70% of fixed salary at the time of retirement.

This pension plan has been externalised through a pension fund managed by BPI Vida e Pensões – Companhia de Seguros de Vida, S.A.

In addition, the pension fund indicated above includes SAMS coverage for the post-employment period for all Bankinter Portugal employees.

Lastly, the Bank's collective bargaining agreement in Portugal includes a retirement bonus for all employees, which consists of a 1.5 monthly salary payment upon retirement, whereby this obligation is part of the internal fund.

Other long-term employee benefits

Similarly, in accordance with the Collective Bargaining Agreement in force, the Bank has assumed the obligation to supplement the Social Security payments up to certain amounts, where necessary, for permanent disability, widowhood or orphanage.

In addition, the premium paid for death and disability coverage in Spain amounted to 65 thousand euros in 2022 (2021: 197 thousand euros).

Main assumptions used to determine pension obligations

The following table sets out the basic actuarial assumptions used to calculate the defined benefit obligations to current employees, non-active employees and early retirees of Bankinter at 31 December 2022 and 2021:

	Spain		Portugal	
	31.12.2022	31.12.2021	31.12.2022	31.12.2021
Survival	PERM/F-2020p	PERM/F-2020p	TV88/90	TV88/90
Disability	N/A	N/A	EKV80	EKV80
Discount rate:	3.50%	1.00%	3.20%	1.65%
Expected rate of return:	3.50%	1.00%	3.20%	1.65%
Marital status	Actual marital status	Actual marital status	70% married, where the spouse is 3 years older/younger than the employee	70% married, where the spouse is 3 years older/younger than the employee
CPI	2.00%	2.00%	2.00%	2.00%
Salary increase	3.50%	3.50%	5% for 2023; 4% for 2024, and 1.75% for 2025 and after	1.75%
Pension increase	2%	2%	4% for 2023; 3% for 2024, and 0.75% for 2025 and after	0.75%
Retirement age in the Bank	65	65	65	65
Retirement age in the Social Security	65	65	66 years and 4 months in 2023 and 2024, projecting that age to the future in accordance with the Eurostat forecast for the Portuguese population	66 years and 7 months in 2022, projecting that age to the future in accordance with the Eurostat forecast for the Portuguese population

The PERMF2020p survival table has been used in the valuation of year-end 2022 pension commitments.

The financial term of all payment obligations assumed or accrued at the end of the year (post-

employment and long-term remuneration) is 14.40 years at Bankinter Spain (2021: 15.00 years) and 19.83 years at Bankinter Portugal (2021: 22.95 years), distributed as follows:

	2022		2021	
	Spain	Portugal	Spain	Portugal
Within 5 years	21%	0%	21%	0%
Between 5 and 10 years	20%	3%	21%	0%
Between 10 and 15 years	18%	28%	18%	24%
Between 15 and 20 years	14%	16%	14%	7%
Beyond 20 years	27%	53%	26%	69%

The fair value of plan assets was calculated in accordance with the following methodology:

- To value the co-insurance contracts taken out with AXA, Allianz and Caser (in which the pension obligation of employees covered under the Banking Agreement prior to 8 March 1980 is externalised since these are savings insurance policies at a "matched rate"), the actuarial present value of the insured benefits discounted at the discount rate used for calculating the obligation are used for insured benefits that are "perfectly matched" with the associated obligations; and the actuarial present value of the insured benefits discounted at the estimated divestment rate used by insurance companies will be used for insured benefits that are not "perfectly matched" with associated obligations.
- The value of the pension fund at year-end will be used to measure the pension plan in which Bankinter Portugal's pension obligations are externalised.

Set out below is the reconciliation of the value of the obligations and the fair value of the assets assigned to cover them for 2022 and 2021:

	Spain		Portugal	
	Pension obligations	Fair value of plan assets	Pension obligations	Fair value of plan assets
Balance at 31 December 2020 – Total	21,461	23,783	95,211	94,957

Balance at 31 December 2022 – Total	11,027	12,045	75,412	80,643
Active staff – Banking agreement	3,390	4,426	55,255	58,838
Staff beneficiaries of a vested pension	7,637	7,619	18,669	20,248

	Spain		Portugal	
	Pension obligations	Fair value of plan assets	Pension obligations	Fair value of plan assets
Former employees from			1,488	1,557

Key features of the difference between actuarial valuations at 31 December 2022 and 2021:

- Provisions for pension obligations - Spain: these provisions decreased as a result of employees leaving the company in 2022 with the resulting loss of pension obligations, and the retirements that took place in 2022, whereby benefits were received in almost all cases in the form of a single payment.
- Provisions for pension obligations - Portugal: these provisions were decreased owing to two factors:
 - First, the provisions increased as a result of the early retirements occurring in 2022, requiring recognition of 100% of the obligation assumed by these early retirees during the year.
 - Second, they decreased due to employee departures in 2022, thereby decreasing the obligations to be assumed since they then became considered former employees.

In Portugal, net provisions decreased from the year before.

- Actuarial gains/(losses) - Spain: valuation has gone down significantly, both in terms of pension obligations and the Fund's value (plan assets) due to an increase in the interest rate curve in 2022, which has led to a substantial reduction of both figures (long-term payment obligations). This reduction is also due to the homogeneous hedging level of the plan assets when compared with Bankinter's pension obligations.

At the start of the year, the expected income from the plan assets was estimated at 156 thousand euros, whereas the actual income was -3,888 thousand euros.

- Actuarial gains/(losses) - Portugal: valuation has gone down significantly, both in terms of pension obligations and the Fund's value (plan assets) due to an increase in the interest rate curve in 2022, which has led to a substantial reduction of both figures (long-term payment obligations).

The expected return on plan assets at the beginning of the year was estimated at 1,608 thousand euros, while the actual return obtained was -17,837 thousand euros due to the market drop, which reduced the value of the assets in which the pension fund was invested.

- Accounting cost of the pension obligations: the total amount recognised in the consolidated income statement in 2022 to cover defined-benefit pension obligations was 541 thousand euros in Spain and a cost of 502 thousand euros in Portugal (2021: 1,212 thousand euros in Spain and 868 thousand euros in Portugal).

The Company's estimate at the beginning of the year for pension costs in 2023 is -62 thousand euros.

Provisions for pensions and other post-employment defined benefit obligations and long-term remuneration at 31 December 2022 and 31 December 2021:

	31.12.2022			31.12.2021		
	RD 1588/1999			RD 1588/1999		
	Externalised	Internal	Other	Externalised	Internal	Other
Present value of committed remuneration	85,285	1,154		110,774	1,109	-
Value of related funds	92,688			116,528	-	-
Pension liability		1,154		-	1,109	-
Pension asset	7,402			5,755	-	-
Insurance contracts linked to pensions				-	-	-

"Pensions and other post employment defined benefit obligations" also includes the provision for the pension obligations of Bankinter Luxembourg, which at 31 December 2022 amounted to 139 thousand euros (2021: 370 thousand euros).

Breakdown of the changes in the present value of defined benefit pension obligations and plan assets covered at the close of each year

Thousands of euros

Year	Defined benefit obligations	Plan assets	Other funds	Deficit/surplus	Total actuarial gains and losses
2018	109,153	112,462	509	3,818	(2,425)
2019	117,573	118,510	751	1,688	(3,102)
2020	116,671	118,739	932	3,000	5,046
2021	111,883	116,528	1,109	5,755	4,326
2022	86,439	92,688	1,154	7,402	2,671

Accumulated actuarial gains and losses recognised in reserves

At 31 December 2022, the Group's accumulated actuarial gains recognised under "Accumulated other comprehensive income" amounted to 6,135 thousand euros (2021: 3,272 thousand euros of gains).

Sensitivity to changes in the main valuation assumptions:

	Year-end	Interest rate		Salary increase		Pension increase		Mortality table
		-50 bp	+50 bp	-50 bp	+50 bp	-50 bp	+50 bp	-1 year
Present value of committed remuneration	86,439	95,281	79,689	81,471	92,226	84,783	88,488	88,992
Value of plan funds	92,688	93,229	92,130	92,687	92,688	92,688	92,688	92,973

Detail of plan assets associated with the coverage of defined-benefit pension obligations

Main categories of plan assets:

	2022	
	Percentage	Amount (in thousands of euros)
Fixed income	69.24%	64,181
Equity	17.34%	16,068
Real estate	0.00%	4
Cash	0.42%	391
Unrelated insurance policies	12.99%	12,045

The Bank's estimate of the expected contributions to the plan (net of recoveries) in 2023 amounts to 0 thousand euros.

Pension costs incurred in 2022 due to defined contribution obligations

The total expense recognised in the income statement in 2022 for coverage for defined contribution pension commitments amounts to 6,366 thousand euros (2021: 6,454 thousand euros).

This cost is due practically entirely to the Company Pension Plan implemented in 2014 and managed by Mutuactivos Pensiones, fulfilling the requirements of the 22nd Collective Bargaining Agreement for Banking, which establishes the creation of a defined contribution Supplementary Pension Scheme for employees hired from 8 March 1980 onward that have accumulated at least two years of service in the Company and with a minimum annual contribution of 450 euros, and to contributions to the unit linked contracts and savings insurance the cover the pension obligations of senior officers.

Average number of employees by category and gender in 2022 and 2021:

	2022		2021	
	Male	Female	Male	Female
Managers	102	48	107	44
Middle managers	1,021	700	978	663

Total	5,860,102	3,829,028	4,777,190	3,552,539

32. Other administrative expenses

Composition of the amounts under this item of the consolidated income statement for 2022 and 2021:

	Thousands of euros	
	2022	2021
Property, fixtures and material	21,603	20,574
Information technology	109,014	103,922
Communications	31,598	27,851
Advertising and publicity	36,774	36,481
Legal and lawyer expenses	5,359	8,780
Technical reports	11,041	7,494
Surveillance and security carriage services	3,516	3,538
Insurance and self-insurance premiums	6,194	4,653
Governing and control bodies	3,900	3,977
Entertainment and staff travel expenses	6,575	4,171
Association membership fees	10,001	9,519
Outsourced administrative services	61,935	51,931
Contributions and taxes	16,030	15,838
Other	5,551	3,903
	329,091	302,631

In 2022, the premium was paid for a group civil liability insurance policy for all Bankinter Group directors and executives for potential damage caused by wrongful acts committed or allegedly committed in the performance of their duties, for a total amount of 373 thousand euros (2021: 295 thousand euros).

33. Other income and other operating expenses

Breakdown of this heading of the consolidated income statement for the years ended 31 December 2022 and 2021:

	Thousands of euros			
	2022		2021	
	Income	Expenses	Income	Expenses
Income from exploitation of investment property and other operating leases	3,929	-	5,033	-
Financial fees and commissions offsetting direct costs	19,466	-	17,714	-
Contribution Deposit Guarantee Fund and Single Resolution Fund (Note 4)	-	115,791	-	98,849
Income and expenses from insurance and reinsurances contracts written	-	-	-	-
Other	7,339	98,807	5,810	81,395
	30,734	214,598	28,556	180,244

34. Gains or losses on derecognition of non-financial assets and investments and profit or loss from non-current assets classified as held for sale not qualifying as discontinued operations

Detail of these items of the consolidated income statement for the years ended 31 December 2022 and 2021:

	Thousands of euros	
	2022	2021
Gains (losses) on disposal of non-financial assets and investments:		
Tangible assets (Note 14)	(45)	335
Investments	-	(76)
Investment property (Note 14)	-	-
Intangible assets (Note 16)	(1,269)	(1,000)
Other	-	-
Total	(1,313)	(742)
Gains (losses) of non-current assets classified as held for sale:		
Impairment of assets (see Note 12)	(8,470)	(11,583)
Gains on disposals	38,376	37,993
Losses on disposals	(40,593)	(37,991)
Total	(10,686)	(11,581)

Impairment losses on assets in 2022 include mainly an amount of 8,035 thousand euros (8,591 thousand euros in 2021) related to a charge for ageing of assets foreclosed or received in payment of debt classified as held for sale.

35. Related party transactions and balances

The breakdown of transactions and balances with Group companies and other related entities and natural persons at 31 December 2022 and 2021 is set out in Appendix I and Note 36 below. Transactions with related parties are carried out on an arm's length basis and the corresponding remuneration in kind has been recognised.

36. Remuneration of and balances with members of the board of directors

Remuneration of the board of directors

The director remuneration policy for years 2022, 2023 and 2024 was approved by the Annual General Meeting held on 21 April 2021 with 86.475% approval.

In addition, Bankinter submits the annual report on directors' remuneration, which is presented using the template provided in the CNMV Circular, to consultative vote at the Annual General Meeting. The latest report on the remuneration of directors was approved at the Annual General Meeting held on 23 March 2022, with 89.508% of total capital present and represented voting in favour. The report included information on the general remuneration policy, its application in 2022 and the remuneration system applicable in 2021. While this practice has only been mandatory for listed companies since 2014, Bankinter has been submitting this report to the General Meeting since 2008, in line with the recommendations of the Good Governance Code of Listed Companies. Also, this report is included in a separate section of the management report in these annual financial statements.

i) Remuneration of directors for carrying out their director functions:

According to Bankinter's corporate by-laws, directors may be compensated for performing the duties entrusted to them as mere members of the board of directors in the following manner:

- annual fixed amount;
- Fees for attending meetings of the board of directors and any board committees to which they belong, and
- Delivery of shares, share options or any remuneration linked to the value of the shares following a resolution by the general meeting regarding the number and price of the shares, and other items required by law.

The shareholders at the Annual General Meeting on 21 April 2021 voted to set the maximum annual remuneration of directors in their status as such at 2,200,000 euros, pursuant to articles 217 and 529 septdecies of the Spanish Companies Act.

The board of directors, on the recommendation of the remuneration committee, determined the specific amount that has corresponded to each of the directors, in their capacity as such, conforming to the agreement of the General Meeting when legally required. In this regard, and within the limit set by the Meeting, the board of directors, at its meeting on 20 December 2021, following a proposal from the remuneration committee, approved increasing the amounts established for the previous year by 3 percent, in line with the general increase applicable to the employees of Bankinter Group.

For 2022, the total remuneration received by directors individually in that capacity has been paid by means of: i) an annual fixed amount for their role on the board of directors and their duties as the chairs of board committees, and ii) attendance fees for meetings of the board and board committees. As it has happened since 1 January 2015, no Bankinter shares have been delivered to directors as compensation for their role as directors.

Remuneration of non-executive directors does not include any variable components, insofar as it is not subject to the achievement of objectives, therefore complying with corporate governance recommendations.

Itemised total individual remuneration of members of Bankinter's board of directors in their capacity as such (supervisory and collective decision-making duties) in 2022 and 2021:

	In euros	
Directors	2022	2021
Pedro Guerrero Guerrero	244,561	238,553
Alfonso Botín-Sanz de Sautuola y Naveda (1)	174,226	0
María Dolores Dancausa Treviño	203,801	196,193
Fernando Masaveu Herrero	129,170	114,819
Marcelino Botín-Sanz de Sautuola y Naveda	121,133	127,079
María Teresa Pulido Mendoza	114,818	113,145
Teresa Marín-Retortillo Rubio	155,578	153,276
María Luisa Jordá Castro	157,874	165,538
Álvaro Álvarez-Alonso Plaza	168,208	154,948
Fernando José Francés Pons	148,689	129,866
Cristina García-Peri Álvarez (2)	145,819	92,461
Former directors (3)	53,113	282,955
	1,816,990	1,768,833

(1) Due to the expiry of the term of office of CARTIVAL as director in 2022, and because a legal entity cannot be re-elected as a director of Bankinter, the appointment of Alfonso Botín-Sanz de Sautuola y Naveda as proprietary director was proposed and approved on 23 March 2022 (Mr Botín-Sanz de Sautuola y Naveda was until that date the representative of CARTIVAL on the board of directors of Bankinter, S.A.).

(2) Cristina García-Peri Álvarez was appointed member of the board of directors (independent external director) at the Annual General Meeting held on 21 April 2021.

(3) Remuneration paid is included: (i) in 2021 to Rafael Mateu de Ros Cerezo, who ended his term of office as a director of Bankinter on 21 April 2021 and was not proposed for re-election by the board of directors because he had lost his status as an independent external director after

more than 12 years as such; and (ii) in 2021 and 2022 to director CARTIVAL (legal entity), who ceased to be a director of Bankinter on 23 March 2022, as described in note (1) to this table.

Breakdown of the total amounts shown in preceding table for each directors as such between the fixed remuneration and the amount received in fees for attending meetings of the board of directors and board committees in 2022 and 2021:

	In euros			
	2022		2021	
Directors	Fixed remuneration	Attendance fees	Fixed remuneration	Attendance fees
Pedro Guerrero Guerrero	195,190	49,371	189,504	49,049

Teresa Marín-Retortillo Rubio	114,818	40,760	111,474	41,802
María Luisa Jordá Castro	114,818	43,056	111,474	54,064
Álvaro Álvarez-Alonso Plaza	114,818	53,390	111,474	43,474
Fernando José Francés Pons	97,595	51,094	94,752	35,114
Cristina García-Peri Álvarez (2)	114,818	31,001	77,413	15,048
Former directors (3)	42,779	10,334	218,301	64,654
Subtotals	1,406,517	410,473	1,365,859	402,974
Total	1,816,990		1,768,833	

(1) Due to the expiry of the term of office of CARTIVAL as director in 2022, and because a legal entity cannot be re-elected as a director of Bankinter, the appointment of Alfonso Botín-Sanz de Sautuola y Naveda as proprietary director was proposed and approved on 23 March 2022 (Mr Botín-Sanz de Sautuola y Naveda was until that date the representative of CARTIVAL on the board of directors of Bankinter, S.A.).

(2) Cristina García-Peri Álvarez was appointed member of the board of directors (independent external director) at the Annual General Meeting held on 21 April 2021.

(3) Remuneration paid is included: (i) in 2021 to Rafael Mateu de Ros Cerezo, who ended his term of office as a director of Bankinter on 21 April 2021 and was not proposed for re-election by the board of directors because he had lost his status as an independent external director after more than 12 years as such; and (ii) in 2021 and 2022 to director CARTIVAL (legal entity), who ceased to be a director of Bankinter on 23 March 2022, as described in note (1) to this table.

ii) **Fixed remuneration of the chairman of the board of directors** for his additional institutional and non-executive duties since January 2013¹ as chairman (the latter remunerated in accordance with the previous point). Pedro Guerrero Guerrero received 748,083 euros as fixed remuneration in 2022. This amount has been updated with respect to 2021, by 3%, as well as the remuneration of the directors detailed in the previous section and in line with the general increase applicable to Bankinter Group employees.

¹ Details of these functions are set out in the corporate governance report, which forms part of the management report in the notes to the annual financial statements.

The chairman of the board of directors has also received as beneficiary of medical insurance policies and other items of remuneration in kind and other corporate benefits totalling 4,930 euros (2021: 5,428 thousand euros).

The chairman of the board does not receive any variable remuneration and is subject to the scheme described in the previous paragraph for non-executive directors. The chairman is also not a beneficiary of any pension scheme.

The SLA signed between Bankinter and Pedro Guerrero Guerrero does not include any golden parachute clauses, or any clauses that link the accrual of financial rights to situations of change of control over the Bank (standard clauses in these types of contracts in large corporations), as specified in the directors' remuneration reports that will be submitted to a consultative vote at Annual General Meeting, as in previous years.

iii) Remuneration of executive directors for their executive duties.

a) Components of remuneration of executive directors for their executive duties

Components of remuneration of executive directors in 2022 for their executive duties:

- basic fixed remuneration, which primarily reflects the professional experience and organisational responsibility; and
- variable remuneration, which reflects sustainability of performance and is adapted to risk.

Fixed remuneration:

Basic fixed remuneration, which primarily reflects the professional experience and organisational responsibility.

Executive directors may be beneficiaries of health insurance policies taken out by the Bank. The Bank pays the related premiums, which are attributed to the directors as remuneration in kind. The Bank also compensates certain of these directors with other remuneration in kind, such as the leasing of vehicles and other corporate benefits that apply to all other staff.

Bankinter also has a "Supplementary pension scheme for executive directors and management committee members" in which currently only the chief executive officer among executive directors takes part.

Bankinter's pension scheme is a defined contribution plan. To implement it, the Bank has taken out a unit-linked group insurance policy and a guaranteed return group insurance policy covering retirement, death and disability.

It consists of an initial contribution, which is a fixed contribution for the same amount for all beneficiaries, and an annual contribution, which varies in accordance with the responsibilities and functional scope of each employee.

This System and contribution is explained in the Directors' remuneration policy and also in the reports on the remuneration of directors approved via consultative vote at the Annual General Meetings in recent years.

Variable remuneration:

- **Annual variable remuneration:**

The annual variable remuneration system for executive directors was the same as that for other Bankinter Group employees who receive this type of remuneration.

The variable incentive for 2022 has been calculated annually. This annual variable remuneration had the following financial indicators for the annual incentive: i) Earnings before tax (EBT) for banking business in Spain, Portugal and Ireland (including EVO), to achieve appropriate risk management and engagement to performance over the medium and long term, and ii) Pre-provision operating profit for the banking business in Spain, Portugal and Ireland (including EVO), as a critical factor for the sustainability of the business over the medium and long term and alignment with the Entity's risk policy. Each one of the indicators, PBT for the banking business and gross operating income of the banking business for Spain, Portugal and Ireland (including EVO), represent 40% and 60%, respectively, of variable remuneration, independently. The variable component accrues from the achievement of 90% and up to a maximum of 120% of the targets, potentially resulting in between 80% and 120% of the variable amount assigned to each beneficiary, according to the aforementioned achievement percentages. Therefore, the total incentive amount to be received for the maximum level of achievement of targets is 120% of the benchmark incentive. Pursuant to these tables of achievement and accrual, the overall percentage accrual of the incentive in 2022 was 113.97% (2021: 106.62%). Furthermore, to earn this 2022 variable remuneration, the following indicators (which may reduce accrued variable remuneration to zero but may never increase the amount) had to be met cumulatively:

- Risk appetite framework ratios, which measure the following risks: credit risk, solvency risk, liquidity risk, interest rate risk and reputational risk, which must meet the condition of not exceeding the risk level defined in the risk appetite framework. The level of achievement of these ratios in 2022 was 100%. Therefore, the amount

of the variable remuneration receivable for the PBT and gross operating income targets before provisions will not be reduced.

- RoE TTC (through the cycle); i.e. return on equity invested factoring in the structure perspective which eliminates the effect of the cycle, thereby providing the ideal measurement of performance, must be above 7% to accrue 100% of the incentive achieved. If this ratio were between 6% and 7%, 50% of the incentives achieved would accrue; however, if it were below 6%, no amount whatsoever would be accrued. The level of achievement of this indicator in 2022 was over 100% (reaching 10.15%), so the amount of variable remuneration receivable for the PBT and gross operating income targets before provisions is not reduced.

Thus, the percentage of annual variable remuneration was earned was: 113.97%, as indicated above.

- **Multi-year variable remuneration:**

The 2022-2023 multi-year incentive plan is currently in force. Executive directors are beneficiaries of this plan, and its characteristics are described in the directors' remuneration report.

One of the indicators used in this plan is the Group's RoE - the stated objective is to have the indicator score above the average of its comparison group when measured at 31 December of each year. The 2022 comparison group comprises: Banco Santander, BBVA, CaixaBank, Unicaja Banco, Sabadell and Bankinter.

The Group's RoE on 31 December 2022 reportedly scored above the average of the comparison group.

b) Amounts of remuneration accrued in 2022 by the executive vice chairman:

As for the executive vice chairman, this role was performed by legal person director CARTIVAL, S.A. between 1 January 2022 and 23 March 2022, the end of its term as a director. Since this legal entity could not be re-elected as director of Bankinter, the Annual General Meeting held on 23 March 2022 approved the appointment of Alfonso Botín-Sanz de Sautuola y Naveda as a new proprietary director (Alfonso Botín-Sanz de Sautuola y Naveda had been representing CARTIVAL, S.A. in the board of directors of Bankinter, S.A. up

to that date). He was appointed executive vice chairman by the board of directors on that same date.

b.1.) Amount of fixed remuneration received by the executive vice chairman in 2022.

CARTIVAL, S.A., as Bankinter's executive vice chairman, received the proportional portion for its performance of its executive duties between 1 January 2022 and 23 March 2022, amounting to 145,049 euros as fixed remuneration.

Alfonso Botín-Sanz de Sautuola y Naveda, as Bankinter's executive vice chairman, received the proportional portion for his performance of his executive duties since 23 March 2022, amounting to 697,500 euros as fixed remuneration.

CARTIVAL, S.A. (or its natural person board representative), while performing its duties as executive vice chairman, has not been beneficiary of health insurance policies underwritten by the Bank or of other remuneration in kind such as car hire and other social benefits applicable to all other employees.

Alfonso Botín-Sanz de Sautuola y Naveda, as the executive vice chairman, has also received, as a beneficiary of medical insurance policies and other items of remuneration in kind and other corporate benefits, a total of 3,037 euros.

This pension scheme described above does not apply to the executive vice chairman, CARTIVAL or Alfonso Botín-Sanz de Sautuola y Naveda.

b.2.) Amount of annual variable remuneration accrued by the executive vice chairman in 2022:

Considering the changes mentioned before occurred on 23 March 2022 (expiry and new appointment of a executive vice chairman), the amount accrued for variable incentive in 2022 by the executive vice chairman, proportional in each case, was as follows:

- **CARTIVAL, S.A.:** 56,861 euros, for the performance of its executive duties from 1 January 2022 until the end of its term in office, to be paid in the form and within the deadlines below:
 - **In cash** (the gross amounts accrued are provided below. These amounts will be paid net of tax):
 - 50% of the **non-deferred** variable remuneration accrued under the variable incentive in 2022: €17,058.

- 50% of the **deferred** variable remuneration accrued from the 2022 variable incentive will be paid in cash, according to the following schedule:
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2024: 2,274 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2025: 2,274 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2026: 2,274 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2027: 2,274 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2028: 2,274 euros.
- In shares² (as stated above, conditional upon shareholders' approval in the Annual General Meeting). The maximum number of Bankinter shares to be delivered, as calculated over gross amounts accrued, is shown below. The average quoted price of the Bankinter share at the close of business for the trading sessions between 2 January and 20 January 2023, inclusive, will be used as a benchmark to determine the number of shares to be delivered. This share price is 6.5928 euros per share:

- 50% of the **non-deferred** variable remuneration accrued by the 2022 variable incentive will be paid through the delivery of 2,587 shares. If shareholders at the General Meeting approve this delivery of shares, the shares will be delivered within 15 business days after approval.
- 50% of the **deferred** variable remuneration accrued from the 2022 variable incentive will be paid in shares, in the following way:
 - 344 Bankinter shares will be delivered in the month of January 2024, corresponding to 1/5 of 50% of the deferred remuneration accrued by the

variable incentive in 2022.

- 344 Bankinter shares will be delivered in the month of January 2025, corresponding to 1/5 of 50% of the deferred remuneration accrued by the variable incentive in 2022.
- 344 Bankinter shares will be delivered in the month of January 2026, corresponding to 1/5 of 50% of the deferred remuneration accrued by the variable incentive in 2022.
- 344 Bankinter shares will be delivered in the month of January 2027, corresponding to 1/5 of 50% of the deferred remuneration accrued by the variable incentive in 2022.
- 344 Bankinter shares will be delivered in the month of January 2028, corresponding to 1/5 of 50% of the deferred remuneration accrued by the variable incentive in 2022.

The shares will be delivered net of taxes and in accordance with the schedule provided previously.

- **Alfonso Botín-Sanz de Sautuola y Naveda:** 279,326 euros, for the performance of his executive duties from 23 March 2022 to 31 December 2022, to be paid in the form and within the deadlines below:
 - In cash (the gross amounts accrued are provided below. These amounts will be paid net of tax):
 - 50% of the **non-deferred** variable remuneration accrued under the variable incentive in 2022: €83,798.
 - 50% of the **deferred** variable remuneration accrued from the 2022 variable incentive will be paid in cash, according to the following schedule:
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2024: 11,173 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2025: 11,173 euros.

² For the executive vice chairman, shares will be delivered if they are approved by shareholders at the Annual General Meeting of Bankinter in 2023 (one year after remuneration has accrued), as required by article 219 of the Spanish Companies Act.

- 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2026: 11,173 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2027: 11,173 euros.
 - 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2028: 11,173 euros.
- In shares³ (as stated above, conditional upon shareholders' approval in the Annual General Meeting). The maximum number of Bankinter shares to be delivered, as calculated over gross amounts accrued, is shown below. The average quoted price of the Bankinter share at the close of business for the trading sessions between 2 January and 20 January 2023, inclusive, will be used as a benchmark to determine the number of shares to be delivered. This share price is 6.5928 euros per share.
 - 50% of the **non-deferred** variable remuneration accrued by the 2022 variable incentive will be paid through the delivery of 12,710 shares. If shareholders at the General Meeting approve this delivery of shares, the shares will be delivered within 15 business days after approval.
 - 50% of the **deferred** variable remuneration accrued from the 2022 variable incentive will be paid in shares, in the following way:
 - 1,694 Bankinter shares will be delivered in the month of January 2024, corresponding to 1/5 of 50% of the deferred remuneration accrued by the variable incentive in 2022.
 - 1,694 Bankinter shares will be delivered in the month of January 2025, corresponding to 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive in 2022.
 - 1,694 Bankinter shares will be delivered in the month of January 2026, corresponding to 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive in 2022.

³ For the executive vice chairman, shares will be delivered if they are approved by shareholders at the Annual General Meeting of Bankinter in 2023 (one year after remuneration has accrued), as required by article 219 of the Spanish Companies Act.

- 1,694 Bankinter shares will be delivered in the month of January 2027, corresponding to 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive in 2022.
- 1,694 Bankinter shares will be delivered in the month of January 2028, corresponding to 1/5 of 50% of the deferred variable remuneration accrued by the variable incentive in 2022.

The shares will be delivered net of taxes and in accordance with the schedule provided previously.

c) Amounts of remuneration accrued in 2022 by the chief executive officer:

c.1) Amount of fixed remuneration received by the chief executive officer in 2022:

María Dolores Dancausa Treviño, chief executive officer of Bankinter, received a total of 971,043 euros as fixed remuneration. This remuneration was increased from 2021 by 4%, in line with the average increase applied to the management team, for dedication and performance in recent years, and still shows a significant difference relative to peers of other companies according to the remuneration studies used.

The chief executive officer also received 13,391 euros (13,966 euros in 2021) as remuneration in kind and other items in corporate benefits as chief executive officer.

c.2) Contributions to the pension scheme in 2022 and accumulated amounts

An annual contribution in 2022 of 582,626 euros was made to the CEO in 2022 (2021: 560,217 euros). These contributions are not vested, but the accumulated amount is reported in the directors' remuneration report submitted to consultative vote at the 2023 Annual General Meeting.

c.3) Amount of annual variable remuneration accrued by the chief executive officer in 2022:

At the end of 2022, as a result of the achievement rate previously mentioned, the amount of variable incentive accrued by the chief executive officer was 387,331 euros. This amount will be paid in the form and time frame indicated below:

- In cash (the gross amounts accrued are provided below. These amounts will be paid net of tax):

- 50% of the **non-deferred** variable remuneration accrued under the variable incentive in 2022: 77,466 euros.
- 40% of the **deferred** variable remuneration accrued from the 2022 variable incentive will be paid in cash, according to the following schedule:
 - 1/5 of 40% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2024: €18,592.
 - 1/5 of 40% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2025: €18,592.
 - 1/5 of 40% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2026: €18,592.
 - 1/5 of 40% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2027: €18,592.
 - 1/5 of 40% of the deferred variable remuneration accrued by the variable incentive for 2022 will be paid in January 2028: €18,592.
- In shares⁴ (as stated above, conditional upon shareholders' approval in the Annual General Meeting). The maximum number of Bankinter shares to be delivered, as calculated over gross amounts accrued, is shown below. The average quoted price of the Bankinter share at the close of business for the trading sessions between 2 January and 20 January 2023, inclusive, will be used as a benchmark to determine the number of shares to be delivered. This share price is 6.5928 euros per share.
- 50% of the **non-deferred** variable remuneration from the 2022 variable incentive will be paid through the delivery of 11,750 shares. If shareholders at the General Meeting approve this delivery of shares, the shares will be delivered within 15 business days after approval.
- 60% of the **deferred** variable remuneration accrued under the variable incentive in 2022 will be paid in shares, as follows:

- 4,230 Bankinter shares will be delivered in the month of January 2024, corresponding to 1/5 of 60% of the deferred variable remuneration accrued by the variable incentive in 2022.
- 4,230 Bankinter shares will be delivered in the month of January 2025, corresponding to 1/5 of 60% of the deferred variable remuneration accrued by the variable incentive in 2022.
- 4,230 Bankinter shares will be delivered in the month of January 2026, corresponding to 1/5 of 60% of the deferred variable remuneration accrued by the variable incentive in 2022.
- 4,230 Bankinter shares will be delivered in the month of January 2027, corresponding to 1/5 of 60% of the deferred variable remuneration accrued by the variable incentive in 2022.
- 4,230 Bankinter shares will be delivered in the month of January 2028, corresponding to 1/5 of 60% of the deferred variable remuneration accrued by the variable incentive in 2022.

The shares will be delivered net of taxes and in accordance with the schedule provided previously.

During 2022, the corresponding shares for the deferral of the variable remuneration accrued in the years 2018, 2019 and 2020, as well as the shares corresponding to the immediate payment of the remuneration accrued in 2021 and the shares corresponding to the extraordinary remuneration accrued in 2018, have been delivered to the Executive Directors in accordance with the agreements approved at Annual General Meeting between 2019 and 2022, respectively. Detail of the shares delivered in 2022:

Executive director	Delivery of shares corresponding to the annual variable remuneration accrued in 2018		Delivery of shares corresponding to the annual variable remuneration accrued in 2019		Delivery of shares corresponding to the annual variable remuneration accrued in 2020		Delivery of shares corresponding to the annual variable remuneration accrued in 2021		Delivery of shares corresponding to the multi-year variable remuneration accrued in 2018	
	Unit price assigned to each share ¹	In shares ⁵	Unit price assigned to each share ²	In shares ⁵	Unit price assigned to each share ³	In shares ⁵	Unit price assigned to each share ⁴	In shares ⁵	Unit price assigned to each share ¹	In shares ⁵
CARTIVAL, S.A. (*)	7.022	1,509	6.44708	1,694	4.8014	634	4.9125	14,076	7.022	10,760
María Dolores Dancausa Treviño	7.022	2,539	6.44708	2,914	4.8014	1,122	4.9125	9,220	7.022	16,947

⁴ Nonetheless, for the chief executive officer, shares will be delivered if they are approved by the shareholders at the Annual General Meeting of Bankinter in 2023 (one year after remuneration has accrued), as required by article 219 of the Spanish Companies Act.

(*) Term ended on 23 March 2022

1 Average quoted price of the Bankinter share at market close for each trading session held between 2 January and 20 January 2019. Price per share at time of delivery: 5.156 euros per share (annual variable remuneration 2018) and 5.042 euros per share (multi-year variable remuneration 2018).

2 Average quoted price of the Bankinter share at market close for each trading session held between 2 January and 20 January 2020. Price per share at time of delivery: 5.156 euros per share.

3 Average quoted price of the Bankinter share at market close for each trading session held between 2 January and 20 January 2021. Price per share at time of delivery: 5.156 euros per share.

4 Average quoted price of the Bankinter share at market close for each trading session held between 2 January and 20 January 2022. Price per share at time of delivery: 5.252 euros per share.

5 Number of shares delivered net of the related tax. For shares corresponding to variable remuneration from years prior to 2021, the original number of shares to be delivered needs to be adjusted in the manner approved by Bankinter's board of directors in order to mitigate the impact of Línea Directa Aseguradora, S.A., going public on the price of the share. This means the delivery of 1.28379 shares for each share pending delivery.

The recognition of variable remuneration that may be settled in shares with respect to compensation for the board of directors did not have an impact on the income statement for 2022 and 2021, as provisions were recognised in the years in which it accrued. Economic value of the shares delivered (amounts in euros):

	2022(*)	2021(*)
Directors	-	-
Executive directors	409,805	332,384
Total	409,805	332,384

(*) Figures gross of taxes

The impact of these share deliveries on equity amounted to 409,805 euros at 31 December 2022.

iv) Other remuneration:

No remuneration has accrued to Bankinter directors by way of a consideration for services provided other than those inherent to their posts, or remuneration at companies for their services at a third-party company at which the director provides services.

Bankinter does not have any pension obligations to external or non-executive directors.

Bankinter has not agreed any golden parachute clauses with the chairman in his services contract, or any clauses that link the accrual of financial rights to situations of change of control over the bank, which are common clauses in these types of contracts in large companies, as specified in the directors' remuneration report that will be submitted to a consultative vote at the 2022 General Meeting, as in previous years.

Summary of director remuneration, loans and other benefits

Remuneration by type

	Thousands of euros	
	2022	2021
Fixed remuneration (1)	2,583	2,297
Variable remuneration (2)	724	579

By-law allowances (4)	1,407	1,366
Share options and/or other financial instruments	-	-
Other	-	-
	5,124	4,645

(1) Fixed remuneration accrued in 2022 corresponding exclusively to executive directors in their capacity as executives and to the chairman of the board of directors for their non-executive institutional functions. For the executive vice chairman, this includes the amount received by CARTIVAL, S.A. until the end of its term of office on 23 March 2022, and the amount received by Alfonso Botín-Sanz de Sautuola y Naveda from his appointment as executive vice chairman on that same day. Includes the remuneration in kind and other items of corporate benefits received by the chairman, executive vice chairman and chief executive officer (amounting to 21 thousand euros in 2022 and 19 thousand euros in 2021).

In 2022, an annual contribution of 582,625.80 euros was made to the chief executive officer's pension scheme (2021: 560,217 euros). These are not included in fixed remuneration, since they have not vested.

(2) Variable remuneration corresponding exclusively to Executive Directors in their capacity as executives, as annual variable remuneration accrued in 2022 and 2021. Each Executive Director was assigned an amount that he or she would receive if the goal was achieved, as explained under 'Remuneration of Executive Directors for their executive duties'. For the executive vice chairman, this includes the amount received by CARTIVAL, S.A. until 23 March 2022 and the amount received by Alfonso Botín-Sanz de Sautuola y Naveda as executive vice chairman from that same day. For purposes of clarification, the chairman of the board does not receive variable remuneration. No multi-year remuneration was accrued in either 2021 or 2022.

(3) Attendance fees for board and committee meetings (directors).

(4) Includes fixed remuneration of the board (for seats on the board)

Remuneration by director type including all items

	Thousands of euros			
	2022		2021

	5,124	72	4,645	108

1 Includes the in-kind remuneration received by the chairman, executive vice chairman and chief executive officer or other corporate benefits received (which amount to 21 thousand euros).

2 Includes the remuneration in kind received by the chairman and the chief executive officer or other corporate benefits received (which amount to 19 thousand euros).

(*) The following are executive directors: i) executive vice chairman, duties performed between 1 January 2022 and 23 March 2022 by the legal person CARTIVAL, S.A., and from 23 March 2022, by Alfonso Botín-Sanz de Sautuola y Naveda, and ii) María Dolores Dancausa Treviño, chief

executive officer. The same annual contribution was made to the chief executive officer's pension scheme in 2022 of 582,625.80 euros (2021: 560,217 euros). These are not included in fixed remuneration, since they have not vested.

(**) Includes amounts received for:

- Rafael Mateu de Ros was appointed chairman of Bankinter's board of directors until 21 April 2021, under the category of independent external director. He was also a board member of Línea Directa Aseguradora, S.A. as a non-executive director, and received 13,733 euros for attendance fees between 1 January 2021 until the time he resigned from his position in that company, in April 2021.
- Teresa Martín-Retortillo Rubio is a member of the board of directors of EVO Banco, a subsidiary of Bankinter, as well as a member of several of its supervisory committees. Teresa Martín-Retortillo Rubio received 66 thousand euros for these components in 2021 and 44 thousand euros in 2022.
- Cristina García-Peri Álvarez was a board member at EVO Banco, a subsidiary of Bankinter, as well as member of several of its supervisory committees until 6 July 2022. Between her appointment in Bankinter (21 April 2021) until the end of 2021, Cristina García-Peri received 37,600 euros, and 28 thousand euros in 2022 until she resigned on 6 July 2022.

(***) The chairman, Pedro Guerrero Guerrero, is classified as an "other external director".

See section 5 (related party transactions) of the 2022 annual corporate governance report for significant transactions implying a transfer of resources or obligations between Bankinter and Bankinter Group companies and directors of Bankinter, S.A., its significant shareholders, executives and related parties outside the ordinary course of business of Bankinter, S.A., or any transactions that were not carried out at arm's length.

Overall information and characteristics of the credit facilities and guarantees granted to directors are provided below:

- The amount drawn down on credit facilities granted to directors at 31 December 2022 was 1,341 thousand euros, with a limit of 12,338 thousand euros (2021: 745 thousand euros drawn down and 11,842 thousand euros limit). as at 31 December 2022, the Entity had no guarantees extended to directors (2021: 0 euros).
- The average remaining term on the loans and credit facilities granted to the Entity's directors in 2022 was approximately 4 years and 9 months (2021: 1 year and 11 months). Interest rates in 2021 ranged between 0.30% and 1.55% (2021: 0.15% and 1.25%).

Additional disclosures on related-party transactions appearing in Appendix I of to these notes are provided below:

- The average remaining term on the finance agreements listed in that Appendix is 7 years and 10 months (2021: 6 years and 11 months).
- The average effective interest rate on credit facilities granted to directors and managers is 2.868% (2021: 0.374%). Of these credit facilities, 55% was backed by personal guarantees and the remaining 45% by collateral (2021: 58% and 42%, respectively).
- The average effective interest rate on credit facilities granted to other related parties was 2.660% (2021: 0.431%). Of these credit facilities, 71% was backed by personal guarantees and the remaining 29% by collateral (2021: 89% and 11%, respectively).

At the end of 2022 and 2021, no loss allowance was recognised for doubtful receivables relating to amounts included in the outstanding balances.

At the end of 2022 and 2021, no expenses were recorded for uncollectible or doubtful receivables from related parties.

Conflicts of interest of members of the board of directors

Article 229 of the Spanish Companies Act states that directors must notify the board of directors of any direct or indirect conflict of interest that they or persons related to them may have with the interests of the company. Bankinter also has a Conflict of Interest Prevention Policy, adopted by the board on 22 April 2015 and amended on 16 November 2016. No member of the board of directors has reported a situation of conflict of interest as defined under Article 229 of the Spanish Companies Act; and the board members have made an express record thereof as per section 3 of said Article.

Directors' stakes in share capital

Shareholdings owned by members of the board of directors in the Entity's share capital are disclosed in the annual corporate governance report for 2022.

Remuneration of senior management

At 31 December 2022, the Bank had seven senior managers excluding executive directors and chairman, given the status as non-executive directors (2021: seven). Therefore, the aggregate remuneration of senior management in 2022 by item was as follows:

- Fixed salary: 2,670 thousand euros (2021: 2,406 thousand euros).
- Annual variable remuneration: 940 thousand euros (2021: 940 thousand euros).
- Multi-year variable remuneration: 31 thousand euros (2021: 839 thousand euros).
- Contributions to social benefit schemes: 726 thousand euros in 2022 (2021: 624 thousand euros).

37. Information on sustainability management

In carrying on their businesses, the companies in Bankinter Group (“the Group” or “BANKINTER”), in addition to meeting their own goals in benefit of shareholders, aim to generate shared value with stakeholders by implementing guidelines for responsible behaviour with a view to becoming the benchmark bank in sustainability.

To achieve this, a comprehensive corporate responsibility management process was implemented that is sustainable, lasting, focused on value creation, and integrated in the Bank’s management in a global, transversal and gradual manner.

In March 2021, the board of directors approved a new sustainability policy, which sets out corporate-wide guidelines for Bankinter Group to integrate values and principles of responsible management into its activity so it can contribute to the prosperity of society and sustainable development. Compared to previous versions of the policy, this one factors new trends; e.g. biodiversity impact management, cybersecurity and a human rights policy, and includes subsidiaries Evo and Avant Money in the scope.

The policy’s principles aim to contribute to the sustainable and inclusive development of the environment in which the entity operates based on the three strategic pillars of quality, innovation and technology, in line with Bankinter’s corporate values of agility, enthusiasm, integrity and originality.

The principles of the Bankinter Group’s sustainability policy are:

1. Good governance in the organisation, promoting best corporate governance practices in management that ensure compliance with applicable legislation, promotion of sustainable finance, transparency, business ethics, proper risk management, transparent tax policy with responsible and prudent criteria, and the application of best practices in information security.
2. A balanced, transparent and clear relationship with our stakeholders, as well as our clients, developing products and services tailored to their needs.

3. The inclusion of ESG (environmental, social and governance) criteria when analysing investments and funding.
4. The consideration of social and environmental impacts when designing products and services, promoting those that generate added environmental or social value.
5. The integration of sustainability risks into investment decisions and advice on investments and insurance.
6. Financial inclusion, facilitating access to Bankinter services and financial education under equal conditions, ensuring non-discrimination.
7. The advanced management of people as the Bank’s most important capital, promoting their well-being and motivation through work-life balance, personal and career development and health and safety, and promoting inclusion and employee diversity.
8. The responsible and sustainable management of the chain of suppliers, fostering a positive mutual influence society for a better the social, ethical and environmental performance.
9. The contribution to the social development of the communities where the Bank operates, through both its own activity and initiatives aimed at social investment via the Bankinter Innovation Foundation (Fundación para la Innovación Bankinter), collaboration with the third sector and the corporate volunteering programme.
10. An environmentally conscious approach to its business activities, involving its main stakeholders in the global challenge posed by climate change and loss of biodiversity.
11. The assumption of the obligations set out in international protocols and standards, implementing their best practices.

The Group implements its sustainability policy while always guaranteeing its full suitability and consistency with the Bank’s strategy and the demands of an ever-changing environment, through the following instruments:

- Strategic sustainability plans, drawn up on a multi-year basis;
- Strategic lines, which structure and implement these plans;
- Related programmes and their economic, social and environmental goals arising from implementation of the strategic lines;
- The Group’s other internal policies, which reflect the guidelines set out by the Bank for various areas.

The Board of Directors is the body responsible for establishing and overseeing compliance with the Sustainability Policy and its implementing instruments, and deciding on any amendments that may be necessary.

The board sustainability and appointments committee is tasked with monitoring implementation of the policy.

The Sustainability Committee is responsible for proposing and executing the strategic plan by planning and implementing the initiatives set out in it and integrating in each area of the Bank the principles set forth in the sustainability policy in a manner that is consistent and integrated with the Bank's overall strategy. Committee resolutions must be adopted by a majority of votes, with the chairman having a casting vote in case of a tie. The Sustainability Committee meets at least once every four months and reports to the board of directors, through the Appointments and Corporate Governance Committee, at least once a year and whenever required, on the degree of deployment of the strategic lines included in the strategic sustainability plan.

The chairman of the Sustainability Committee is in charge of coordinating and supervising the committee's activities, as well as the duties inherent as Chairman of a collective body.

The sustainability division is responsible for coordinating and monitoring the actions defined in the strategic sustainability plan's lines and programmes, verifying the level of compliance with the related goals and identifying areas of improvement based on ongoing engagement with stakeholders and in accordance with recognised standards and sustainability indices.

Internal audit supervises the non-financial information reported at least annually by the Sustainability Committee to the board through the sustainability and appointments committee.

Following the approval of the sustainability policy, a strategic sustainability plan was drawn up for the 2021-23 period called "3D", as it addresses management of the three dimensions of sustainability: environmental, social and governance (ESG). This plan contains 20 strategic lines, which contribute to the achievement of 11 of the 17 sustainable development goals (SDGs) of the United Nations Agenda 2030, as verified by certification firm EQA (European Quality Assurance) in an independent report.

Its design was based on the outcome of a materiality assessment performed using a questionnaire in which the Bank's main stakeholders took part and aimed to identify the matters they considered to be the most relevant for the Bank's sustainability management.

The plan was also inspired by recognised standards, such as the ISO 26000 corporate responsibility guidance standard or the Forética SGE21 standard; and following recommendations from international influencers, such as sustainability rating agencies and corporate responsibility observatories.

The Bank's sustainability management was recognised in 2022 when Bankinter was included in the Dow Jones Sustainability Europe Index for the fifth straight year, as one of the institutions with the best corporate governance and best environmental and social performance. In addition, the Bank maintained its position on the FTSE4Good and MSCI indices, among others, and on that of environmental management of the CDP, along with other global large-cap

companies. Additionally, Bankinter was included in Bloomberg's 2023 Gender-Equality Index for the first time.

Bankinter adheres to the main international sustainability and climate change initiatives commitments, e.g.: the UN Global Compact, the Equator Principles, UNEPFI (United Nations Environment Programme Finance Initiative), the Principles for Responsible Banking and, more recently, the Net Zero Banking Alliance. Through the Net Zero Banking Alliance, signatory banks are committed to aligning their lending and investment portfolios net-zero emissions by 2050, setting an intermediate target for 2030.

In line with these goals, the Group's sustainability and appointments committee approved in February 2021 a roadmap for decarbonisation until 2020 for the corporate banking business in Spain, consistent with the emission reduction target set in the Spanish Integrated Energy and Climate Plan (PNIEC). Every month, we track the emissions financed in this segment and compare them to the target. Also, in 2022 corporate banking in Portugal was added to the roadmap. We have made major progress in managing climate change risk both in corporate and mortgage business (for details see the note 44 on risk management).

Other milestones in terms of ESG (environment, social and governance) in 2022:

- Group policies were updated, such as the Environmental and Climate Change Policy, the Accessibility Policy and the sectoral financing guides.
- A Social Investing Procedure has been established.
- The 3D Sustainability Plan has been extended to Bankinter's business in Portugal.
- The sustainable turnover has increased.
- The ESG training programme has been extended to all of the Bank's workforce.
- The scope of the environmental management system has been expanded.
- The scope of the physical and digital accessibility management system has been expanded.
- The "Bankinter Te Cuida" programme for employee health and safety has been developed.

Bankinter is also a member of Forética (the Spanish association of businesses whose mission is to promote a culture of business ethics) and also collaborates with Corporate Excellence for Reputation Leadership, a corporate foundation created to pursue excellent management of intangible assets, and Fundación Lealtad, a not-for-profit institution whose mission is to strengthen confidence of Spanish society in NGOs by promoting their transparency.

The Group saw no need in the year to set aside provisions for any environmental risks and liabilities, as there were no contingencies linked to environmental protection and improvement, and no penalties or fines were imposed on Bankinter Group for its environmental management.

The Group also did not incur any expenses or receive subsidies related to such risks. The Group's directors consider that any environmental risks that may arise from its operations are minimal and adequately covered, although it working actively on managing the climate change risks associated with its financial activity.

38. Customer Service area

The Customer Service area is available to Bankinter Group customers and users to respond to and resolve any complaints or claims about transactions and banking and financial services stemming from their relationship with the entity. Its exercises independent judgement and its decisions are binding for the Bank. It is separate from the commercial and business services, and has the right means for correct response to and resolution of the cases presented.

In addition, Bankinter has an independent Customer Ombudsman, who is equally competent in resolving claims by customers with full autonomy in its decisions, which are binding for the Entity.

The Customer Service area guarantees appropriate attention, resolution and communication to customers. Bankinter Group customers and users can send their complaints and claims to the CSA through the various communication channels (e.g. online, e-mail, mobile, branch office, telephone).

The activities of Bankinter's Customer Service area and Customer Ombudsman are carried out in accordance with article 17 of Ministry of Economy Order 734/2004, of 11 March. In accordance with this article, following is a summary of their activity.

Customer Service area activity.

In accordance with Ministerial Order 734/2004, Bankinter Group's CSA must address and resolve any complaints and claims submitted by customers related to their legally recognised interests and rights and arising from services provided by BANKINTER, S.A., Bankinter Gestión de Activos SGIIC, S.A. and Bankinter Consumer Finance E.F.C., S.A. (all other investees have their own CSA).

In 2022, the CSA handled 22,598 cases, of which 3,377 were complaints (14.9%) and 19,221 were claims (85.1%). Of these claims, 85.4% were resolved in favour of Bankinter and 14.6% in favour of the customer.

Regarding response time, 57.5% of cases were resolved within 48 hours. The average resolution time in 2022 was 5.4 days.

The CSA has a specific tool for following up and assessing the reasons for the complaints and controlling the customer response time. Further improvement was made during the year to the systems used to enhance the efficiency of the department's performance. Communication with customers has been reinforced by sending its response via email and posting it through a link to the website.

In 2022, the training plan proceeded as scheduled. The main purpose is to ensure that managers in the CSA have the knowledge needed to perform their functions in controlling the Bank's activities so that they comply with prevailing regulations. Training on banking transparency, products, services and risk transactions (anti-money laundering and terrorist financing).

Customer Ombudsman activity

In addition to the CSA, customers and users can file claims and complaints with a competent and independent body.

The customer ombudsman, José Luis Gómez-Dégano y Ceballos-Zúñiga, handles claims where customers or users disagree with the CSA's decision or they prefer to contact this body directly.

In 2022 the Customer Ombudsman handled 1,015 cases, of which 3 were complaints and 1,012 were claims. A total of 172 of the financial claims were resolved in favour of the customer (17%) and 840 in favour of the Bank (83%).

Banco de España

Banco de España handled a total of 377 cases in 2022, of which:

In the Bank's favour:	49
In the customer's favour:	38
Uncontested:	78
No competence:	4
Withdrawn:	12

Pending: 196

Spanish National Securities Market Commission

In 2022, 27 cases were presented through the Spanish National Securities Market Commission, of which:

- Against the bank: 9
- In favour of the bank: 5
- Uncontested: 5
- Pending: 8

EVO BANCO's CSA handled 4,055 cases in 2022. Of the claims with a response, 48% were resolved in favour of Entity and 52% in favour of the customer.

In 2022, claims were responded to within 15 days on average.

Banco de España

Banco de España handled a total of 127 cases in 2022. Banco de España's reports on these cases to date ruled in favour of EVO in 29% of cases, in favour of the complainant in 31% of the cases, the claim was uncontested in 32% of the cases, and the regulator archived the cases with no resolution in 7% of the cases. Banco de España has not yet sent the report on around 60 cases.

Spanish National Securities Market Commission

In 2022, only 3 cases were processed through the Spanish National Securities Market Commission, all uncontested.

Avant Money received 556 complaints in 2022, of which 487 were in favour of the bank and 69 were in favour of the customer.

Bankinter Luxemburgo, S.A. received 1 claim in 2022, ruled in favour of the bank.

39. Branches, centres and agents

Bankinter, S.A. branches, centres and agents at 31 December 2022 and 2021:

	31.12.2022	31.12.2021
Branches	446	446
Other business units		
Corporate banking	25	25
SMEs	77	77
Private banking and personal banking	49	50
Virtual branches	355	346
Number of agents and financial advisory companies (EAFIs)	367	379
Telephone and Internet branches	3	3

At 31 December 2022, Bankinter, S.A. had a network of 337 agents plus seven agents at Bankinter branch in Portugal (2021: 353), composed of natural or legal persons granted powers to deal with the Bank's customers generally on its behalf in negotiating and arranging transactions that are typical of a credit institution, and with 23 financial advisory companies (2021: 26). At 31 December 2021, this network managed 3,293 million euros of average customer deposits (2021: 2,599 million euros) and 1,997 million euros of average loans and receivables (2021: 1,874 million euros). A list is on file at the Banco de España's Office of Financial Institutions (Oficina de Instituciones Financieras). Financial advisory companies are regulated by the Spanish Securities Market Act, Royal Decree 217/2008, of 15 February, on the legal framework for investment services companies and, in particular, Spanish National Securities Market Commission Circular 10/2008, of 30 December, on financial advisory companies.

40. Fiduciary businesses and investment services

Fees and commissions recorded in 2022 and 2021 for investment services and ancillary activities provided by the Group:

	Thousands of euros	
	2022	2021
For securities services-	132,613	136,188
Underwriting and placement of securities	29,416	36,106
Purchase and sale of securities	35,892	36,416
Securities administration and custody	45,291	41,707
Asset management	22,014	21,959
For marketing of non-banking financial products-	256,603	261,232
Investment funds	159,884	164,410
SICAVs	10,611	15,436
Pension funds	26,303	26,524
Insurance	57,896	52,787
Other (advisory services)	1,910	2,075
Total fees and commissions received	389,216	397,420

Balances of assets of investment funds, pension funds, customer portfolios and SICAVs managed by the Group together with the external investment funds marketed (Note 28):

	Thousands of euros	
	31.12.2022	31.12.2021
Own investment funds (Note 13)	11,315,840	10,958,792
External investment funds marketed	17,685,511	20,366,577
Pension funds (Note 13)	3,497,603	3,792,735
Asset management and SICAVS	4,716,542	5,940,968
	37,215,496	41,059,071

41. Remuneration of auditors

The fees for the audit of the annual financial statements and other services provided by the auditor of the Bank and the Group, PricewaterhouseCoopers Auditores, S.L., or by a company related to the auditor as a result of control, common ownership or common management, in 2022 and 2021 were as follows:

Fees for services charged by the auditor and related companies

Description	Thousands of euros			
	Bankinter, S.A.		Bankinter Group	
	2022	2021	2022	2021
Audit services	1,080	972	1,967	1,685
Other assurance services	135	86	244	141
Total audit and related services	1,215	1,058	2,211	1,826
Tax advisory services	5	40	5	40
Other services	257	107	257	175
Total professional services	1,477	1,205	2,473	2,041

In 2022, the Group's auditor, PricewaterhouseCoopers Auditores, S.L., and its related companies due to control, ownership or management, provided non-audit services. These services are primarily of the following types:

- Other assurance services:
 - Report on agreed-upon procedures regarding certain information included in the Form related to ex ante contributions to the Single Resolution Fund in 2023.
 - Issue of the auditor's report on the "Internal Control over Financial Reporting (ICFR) System".
 - Annual Report on Customer Asset Protection of several Group companies.
 - Other reports on agreed procedures required by Banco de España.
- Other services:
 - External expert review report on anti-money laundering and terrorism financing.
 - Assurance report on the non-financial statement.
 - Financial due diligence on the acquisition of companies that are not part of the consolidation perimeter.

42. Tax situation

On 27 December 2000, the Bank notified the National Revenue Agency of its decision to apply the tax consolidation system from 2001 onwards. The Tax Group number 13/2001 was allocated by the National Revenue Agency.

Bankinter subsidiaries comprising the tax group at 31 December 2014:

Bankinter Consultoría, Asesoramiento y Atención Telefónica, S.A.

Bankinter Gestión de Activos, S.A., S.G.I.I.C.

Hispanmarket, S.A.
 Intermobiliaria, S.A.
 Bankinter Consumer Finance E.F.C., S.A.
 Bankinter Capital Riesgo, S.G.E.C.R, S.A.
 Bankinter Emisiones, S.A.
 Bankinter Sociedad de Financiación, S.A.
 Arroyo Business Consulting Development, S.L.
 Relanza Gestión, S.A.
 Bankinter Global Services, S.A.
 Línea Directa Aseguradora, S.A.
 Línea Directa Asistencia, S.L.U.
 Motoclub LDA. S.L.U.
 Centro Avanzado de Reparaciones CAR, S.L.U.
 Ambar Medline, S.L.U.
 LDActivos, S.L.
 Naviera Goya S.L.U.
 Naviera Sorolla, S.L.U.
 Bankinter Securities, S.A.

Law 27/2014, of 27 November 2014, on Corporate Income Tax ("LIS"), became effective on 1 January 2015, replacing the previous consolidated text of the Spanish Corporate Income Tax Law approved by RDL 4/2004, of 5 March, and amending the tax rates with a reduction in the general rate from 30% to 25% (2015: 28%). However, the tax rate for credit institutions remains at 30%.

As a result of this modification and the developments in the tax consolidation system arising therefrom, the Bank has changed the composition of the tax group such that, as 1 January 2015, tax group no. 13/01 is composed of Bankinter, S.A., Bankinter Consumer Finance E.F.C., S.A. and Intermobiliaria, S.A. Also, effective from 1 January 2016, the companies Naviera Goya S.L.U and Naviera Sorolla S.L.U. were added to the tax group 13/01, the parent company of which is Bankinter, S.A.

The other companies that formed part of tax group no. 13/01 in 2014 were removed and now file individual tax returns, with the exception of Línea Directa Aseguradora, S.A., Línea Directa

Asistencia, S.L.U., Motoclub LDA, Centro Avanzado de Reparaciones CAR, S.L.U., Ambar Medline, S.L.U., and LDActivos, S.L., which have formed their own consolidated tax group effective as from 1 January 2015 (Group no. 486/15). LDA Reparaciones, S.L. was included in this tax group with effect from 1 January 2017.

On 31 May 2019, EVA Banco S.A. was removed from VAT Group 0066/16 and tax group 269/15 following the acquisition of EVO Banco S.A. and Avantcard by Bankinter, S.A. It had been filing consolidated taxes since 2015 and in 2019 filed individual tax returns in Spain. In 2020, EVO Banco S.A. has joined the tax group 13/01, whose parent company is Bankinter, S.A., with effect from 1 January, 2020.

Avantcard continues to file individual taxes in its jurisdiction (Ireland).

Reconciliation between the consolidated accounting profit (loss) and consolidated taxable profit (loss) for 2022 and 2021:

	Thousands of euros	
	31.12.2022	31.12.2021
Accounting profit (loss) for the year before tax	785,037	1,500,804
Permanent differences-	(51,888)	(950,028)
Utilisation of previously unrecognised tax losses	(5)	-
Share of the profit or loss of entities accounted for using the equity method	(36,600)	(33,368)
Exemption, branch in Portugal	(63,276)	(36,164)
Exemption, LDA transaction	-	(862,893)
Other	47,992	(17,603)
Accounting tax base	733,149	550,776
Temporary differences	(12,564)	(2,737)
Tax base	720,584	548,039

Positive temporary differences in 2022 included mainly differences due to adjustments for non-tax deductible provisions. Negative temporary differences included mainly differences due to reversals of adjustments for provisions and other items that were not tax deductible in previous years.

Calculation of income tax expense for 2022 and 2021:

	Thousands of euros	
	2022	2021
Tax charge for the year (Spain)	201,594	158,441
Tax charge for the year (Portugal branch)	20,573	11,154
Tax relief and credits	(1,569)	(4,866)
Other	4,733	2,672
Tax adjustments from previous financial years	(497)	295
Total tax expense	224,835	167,696

"Tax adjustments from previous financial years" in 2022 reflects the income tax expense for tax adjustments made in the settlement of the Group's income tax for 2021 not foreseen at 31 December 2021.

Current tax expense for the period and the amount of deferred tax expenses (income) for 2022 and 2021:

	Thousands of euros	
	31.12.2022	31.12.2021
Current tax expense	220,002	170,384
Deferred tax expense	4,833	(2,687)
Total tax expense	224,835	167,696

Reconciliation of profit (loss) before tax and tax expense:

	Thousands of euros	
	2022	2021
Accounting profit (loss) before tax:	785,037	1,500,804
Tax at 30%/25%/12.5%	217,161	433,439
Items for reconciliation of tax payable at the tax rate and income tax expense for the year:		
Non-deductible expenses	19,260	7,789
Non-eligible income	(34,826)	(282,787)
Total deductions applied during the year	(1,569)	(4,866)
Tax losses	-	-
Other:		
Tax adjustment from previous financial year	(497)	295
Tax expense, Portugal branch	20,573	11,154
Other	4,733	2,672
Income tax expense for the year	224,835	167,696
Effective tax rate for the year	28.64%	11.17%

On 18 June 2021, the Bank, as parent of Tax Group 13/01 and VAT Group 0066/15, received notification of the commencement of partial and limited inspections of the tax deduction for technological innovation from corporate income tax in 2017-2019 and the share of the volume of transactions in the Common Territory (i.e. Spain excluding Navarre and the Basque Country) and in Navarre and the Basque Country of Intermobiliaria, S.A. for value added tax purposes for the February 2017-2019 period.

On 10 February 2022, it was announced that these partial inspections were to be extended to 2020 for VAT and to 2017-2020 for the check on the share of the volume of transactions in the Common Territory (i.e. Spain excluding Navarre and the Basque Country) and in Navarre and the Basque Country for corporate tax. After these checks, on 22 March 2022, Intermobiliaria, S.A. signed certificates with no regularisation of VAT and corporate tax because of the checks. On 3 June 2022, Bankinter signed a certificate of compliance A01 with VAT, not regularised, as the parent company of the VAT group.

As for the check on the deduction by Innovación Tecnológica on the corporate tax for 2017-2019, on 11 July 2022 the certificate of compliance was settled, and the inspection of the Bank was concluded.

Regarding proceedings arising from tax inspections of previous years, in the inspection of corporate tax for 2007 to 2009, on 26 July 2022, a notice was received that the appeal against the decision had been accepted, and the appeal was filed with hearing, vote and ruling expected in 2023.

As for the partial checks and inspection of income tax (IRPF) for compensation paid in 2010-2012 in Bankinter Global Services, S.A., on 27 January 2022, a notice was received that the appeal against the proceedings had not been accepted, and the payment was made on 10 February 2022. On 2 February 2022, Bankinter, S.A. received the ruling from the Spanish high court rejecting the appeal against these proceedings, and the pending amount was paid on 10 February 2022, and the proceedings closed.

The proceedings arising from general inspection for 2011-2013 have been appealed before the Spanish high court in relation to the added-value tax. As regards corporate tax, on 13 December 2022, a ruling was received from the central administrative and economic court partially upholding our arguments; the portion not upheld will be appealed at the Spanish high court.

Lastly, as at 31 December 2022 the inspection in EVO Banco S.A. regarding R&D deductions from corporate income tax for 2014 and 2015 are under appeal before the courts.

Because of the possible interpretations of tax legislation applicable to some transactions carried out in the banking sector, certain tax liabilities of a contingent nature could exist. However, in the opinion of the Bank's directors, the possibility of such liabilities arising is remote, and if they did arise, the resulting tax charge would not have a material impact on the consolidated financial statements.

In any case, the tax liabilities that might derive from the claims lodged against the disputed assessments were adequately provided for at the end of 2022 and preceding financial years.

In 2005, the Group elected to apply the tax regime for foreign holding companies regulated in Chapter XIII of Title VII of Corporate Income Tax Law 27/2014, of 27 November, notifying the competent body of the Spanish Tax Administration Agency (Agencia Estatal de la Administración Tributaria) of its decision to do so on 21 April 2005.

In accordance with article 108.3 of this Law, the Bank reported that it did not obtain any gains or dividends in 2022 and 2021.

Finally, in relation to the merger between Bankinter, S.A. (acquiring company) and Bankinter Securities, Sociedad de Valores, S.A. (absorbed company) in 2018, the required disclosures in the notes according to 86.3 of Law 27/2014, of 27 November, on Corporate Income tax are included in the annual report approved in 2019 corresponding to the consolidated annual accounts for 2018.

Lastly, in 2022, the company that until then had been engaging in investment banking was spun off from Bankinter, S.A. to a new company called Bankinter Investment, S.A., with retroactive accounting effects to 1 January 2022.

This transaction was subject to the tax regime set forth in article 86.1 of chapter VII of title VII of Law 27/2014, of 27 November, on corporate tax. The tax authority was duly notified in proper form and in the right time.

As for compliance with the accounting and registration requirements laid down in article 86.1 of Law 27/2014, of 27 November, on corporate tax, the accounting and tax sum of the sums delivered and received by Bankinter, S.A. is 184,655 thousand euros.

43. Fair value of assets and liabilities

a. Fair value of financial instruments

Breakdown of fair value of financial instruments and the procedure used to obtain the price:

2022:

ASSETS	Carrying amount	Fair value	Fair value hierarchy	Fair value	Valuation techniques	Main inputs
Cash, cash balances at central banks and other demand deposits	13,351,217	13,351,889	Level 2	13,351,889	Present value	Discounted expected cash flows with market curve
Financial assets held for trading						
Loans and advances to credit institutions	1,320,483	1,320,483	Level 2	1,320,483	Price calculation using market inputs and explicit formulae	Yield curves and interest rate fixing
Loans and advances to customers	414,115	414,115	Level 2	414,115	Price calculation using market inputs and explicit formulae	Yield curves and interest rate fixing
Debt securities	974,684	974,684	Level 1	974,684	Directly capturing quoted prices in markets	Observable market data
Equity instruments	164,756	164,756	Level 1	164,756	Directly capturing quoted prices in markets	Observable market data
			Level 1	699	Directly capturing quoted prices in markets	Observable market data
			Level 2	413,832	Price calculation using market inputs and explicit formulae and counterparty credit-risk adjustments, where applicable	Yield curves and interest rate fixing
			Level 2	521,250	Price calculation using market inputs and explicit formulae and counterparty credit-risk adjustments, where applicable	Currency fixing and yield curves
			Level 2	182,082	Price calculation using market inputs and explicit formulae and counterparty credit-risk adjustments, where applicable	Currency fixing, yield curves and exchange rate volatility
			Level 2	38,530	Price calculation using market inputs and explicit formulae and counterparty credit-risk adjustments, where applicable	Equity fixing and volatility of the underlying
Derivatives	1,181,732	1,181,732	Level 2	25,339	Price calculation using market inputs and standard techniques, and counterparty credit-risk adjustments, where applicable	Equity fixing, volatility of the underlying, yield curves and interest rate fixing

ASSETS	Carrying amount	Fair value	Fair value hierarchy	Fair value	Valuation techniques	Main inputs
Non-trading financial assets mandatorily at fair value through profit or loss						
Equity instruments	160,046	160,046	Level 1	9,500	Directly capturing quoted prices in markets	Observable market data
			Level 3	150,546	Discounted cash flow method, net asset value	NAV of fund management company; the entity's business plans
Debt securities	884	884	Level 1	884	Directly capturing quoted prices in markets	Observable market data
Financial assets at fair value through other comprehensive income						
			Level 1	2,615,303	Directly capturing quoted prices in markets	Observable market data
Debt securities	2,615,303	2,615,303	Level 2		Price calculation using market inputs and explicit formulae	Yield curves and interest rate fixing
			Level 3		Calculation of the present value of the future cash flows using internal estimates. Cost less impairment.	Discounted expected cash flows with the entity's market curve and business plans
Equity instruments	195,617	195,617	Level 1	195,617	Directly capturing quoted prices in markets	Observable market data
			Level 3		Discounted cash flow method, net asset value	NAV of fund management company; the entity's business plans
Financial assets at amortised cost						
Loans and advances to credit institutions	3,758,565	3,855,977	Level 2	3,855,977	Present value	Discounted expected cash flows with market curve
Loans and advances to customers	71,751,598	73,439,185	Level 2	73,439,185	Present value	Discounted expected cash flows with market curve
Debt securities	9,352,619	8,307,922	Level 1	7,861,193	Directly capturing quoted prices in markets	Observable market data

"Level 1" in the hierarchy includes data on financial instruments whose fair values are obtained from quoted prices in active markets for identical instruments; i.e. without modification or reorganisation. "Level 2" in the hierarchy includes data on financial instruments whose fair value is obtained from quoted prices in active markets for similar instruments or other valuation techniques in which all significant inputs are based on observable market data. "Level 3" in the hierarchy includes data on financial instruments whose fair value is obtained from valuation techniques in which some significant input is not based on observable market data. There were no transfers between stages in the hierarchy for significant amounts in 2022.

Certain equity instruments are measured at cost where fair value cannot be estimated reliably. The lack of reliability of a fair value estimate is due to the wide range of estimates and the impossibility of measuring the probabilities of each estimate within the range reasonably.

The fair value of financial instruments derived from internal models considers the contractual terms and the market data, including interest rates, credit risk, exchange rates, share prices, volatility, etc. It is assumed that the markets where trading is done are efficient, and that their data is representative. The valuation models do not factor in subjective considerations.

In addition, in some cases, the price published by the counterparty in official media, such as Reuters, is used given the complexity of the products measured.

At 31 December 2022 and 2021, the main techniques used by internal models to determine the fair value of financial instruments were the present value model (which discounts future cash flows to present value using market interest rates) and the Black-Scholes model and its derivative (which allow, through a closed formula and using only market inputs, the valuation of interest rate options). Credit derivatives are measured like any other interest rate derivative, but include (market) spreads in the market inputs related to underlying of the issue. Counterparties are reviewed on an ongoing basis during the different valuation processes to ensure that the models and inputs used remain valid at all times.

When calculating the fair value of derivative liabilities, the entity distinguishes between collateralised positions, for which the impact of own credit risk is estimated as zero, and uncollateralised positions, for which the own credit risk adjustment is estimated objectively based on the probability of default by the entity observed in data published by the market's main financial news agencies.

When calculating the fair value of derivative assets, the entity distinguishes between collateralised positions, for which the impact of counterparty credit risk is estimated as zero, and uncollateralised positions, for which the counterparty credit risk adjustment is estimated based on internal probability of default models constructed on the basis of historical information from the Bank's databases.

When determining fair value of equity investments in subsidiaries, jointly controlled entities or associates, the entity's accounting policy is to consider the whole investment as the unit of account.

b. Fair value of non-financial assets and liabilities

Detail of fair value of non-financial assets and liabilities at 31 December 2022 and 2021:

	Thousands of euros			
	31.12.2022		31.12.2021	
	Amount recognised	Fair value	Amount recognised	Fair value
Assets:				
Tangible assets	447,853	473,380	450,436	479,714
Non-current assets held for sale	262,994	318,156	106,184	224,748

The fair values of properties were calculated based on observable market prices provided by appraisal reports certified by appraisal companies, not including any potential discounts required to liquidate the assets.

44. Risk policies and management

Risk appetite

Bankinter understands the risk function as a core element of its competitive strategy, which is translated into its risk management and differentiates the Entity in the financial system.

Adequately identifying, measuring, managing and controlling the relevant risks of all the Group's businesses is a priority of the board of the directors. Therefore, it establishes the basic risk management mechanisms and principles to achieve the Group's strategic goals, protect the Group's earnings and reputation, defend the interests of shareholders, customers, other stakeholders and society at large, and ensure business stability and financial soundness on a sustained basis over time.

The board of directors approves and reviews the risk appetite framework, which defines the risk appetite and tolerance that the Entity is willing to assume in its activities, on a regular basis. The Framework contains a set of key metrics for the levels of the various risks, and the quality and recurrence of earnings, liquidity and capital adequacy. Risk tolerance levels that Bankinter Group is willing to assume are defined for each metric.

These metrics are monitored on a quarterly basis. Where a negative trend is seen in any of them, action plans are drawn up and monitored until the metrics return to appropriate levels.

Therefore, the risk appetite framework is a governance tool to ensure that the risks assumed are consistent with Bankinter Group's strategy and business plans, irrespective of any limits established for the various risks and monitored regularly through the relevant committees and organisational structures. See the chapter on "Risk appetite framework" in the Pillar III Report for more information.

Corporate governance of the risk function

Following is a brief description of the corporate governance and organisation of the risk function. For a broader description, see the following sections of the Pillar 3 Disclosures Report: "Corporate governance of the risk function" and "Structure and organisation of the risk management and control function".

Bankinter Group has a corporate governance system that is in line with the industry best practices and adapted to regulatory requirements.

The board of directors, according to the rules and regulations of the board of directors, approves the risk management and control framework. The rules and regulations of the board of directors stipulated that "the board of directors shall organise its work by setting up committees. Board committees will be vested with decision-making powers as well as the authority to provide expertise and propose motions in relation to specific matters, while subjecting the board to additional scrutiny and control". As per the aforementioned document, the board committee responsible for risk control and management are as follows:

Executive committee

The executive committee is vested with all of the functions of the board, except those that cannot be delegated by law or under the corporate by-laws or the rules and regulations of the board of directors. It takes decisions for managing and monitoring all types risks and, in turn, delegates to the following first-level committees:

Credit risk, in the Executive Risk Committee, which in turn sets the limits on the delegation of powers to the lower-ranking internal bodies, within the limits set by the board of directors. (The Executive Risk Committee is the top risk committee, except for risks that fall under the Management Committee's and the Assets and Liabilities Committee's remit).

Business risk, to the Management Committee.

Structural risk (liquidity, interest rate, foreign currency) and market risk, to the assets and liabilities committee (ALCO).

Risk and compliance committee

The risk and compliance committee has supervisory duties related to risks and its the board of directors main support in risk-related matters.

Its duties include: i) advising the board of directors on the entity's overall risk propensity and on its strategy in this regard, and assisting the board of directors in the effective implement of that strategy, determining, together with the board of directors, the nature, quantity, format and frequency of the information on risks to be received. And ii) agree on the appointment and removal of the chief risk officer and the head of control and compliance, based on a suitability assessment in both cases by the pertinent committee, and iii) oversight of the Group's control

and compliance function, and specifically risk control, internal validation, regulatory compliance and anti-money laundering and counter-terrorist financing.

Audit committee

Body delegated by the board of directors to exercise the board's powers relating to the oversight and monitoring of the company's activity; the accuracy, objectivity and transparency of its accounting practices; its economic and financial reporting; and its compliance with legislation and regulations by which the Bank is bound. As a general rule, it acts by making recommendations of good practices for the Bank's areas albeit it may also reach resolutions about issues under its supervision.

The audit committee directs the internal audit activity. Its annual plan focuses closely on work related to the measurement, monitoring and management of risks.

Remuneration committee

The committee's remit includes annually reviewing the remuneration policy of directors and employees whose activities have a material impact on the Company's risk profile (in general all members of identified staff for remuneration purposes) to ensure that it is aligned with the Bank's short-, medium- and long-term situation and strategy and with market conditions and to assess whether it contributes to the creation of long-term value and to adequate control and risk management.

Sustainability and appointments committee

The committee is also involved in risk management by assuming the following specific duties relating to sustainability: i) reviewing Bankinter Group's sustainability policy and corporate governance policy and ensuring that it is aimed at creating value at all times; ii) monitoring the sustainability strategy and practices -best practices- and evaluating their level of achievement; iii) assessing all of the Company's social, environmental, political and reputational risks, irrespective of the powers granted to the risk and compliance committee or other board committees.

Organisation of the risk function

Bankinter's organisational structure is based on the principle of independence and separation of functions between the various units that assume and manage risks and those that monitor and control risks.

The board of directors is ultimately responsible for managing and controlling Bankinter's risks.

The managing director of risk is the CRO ("*chief risk officer*") in accordance with current regulations. The board risk and compliance committee appoints and removes the chief risk officer on the recommendation of the chairman, vice chairman (if an executive) or the chief executive officer of the Entity.

There are two differentiated and separate functions under the oversight of the Risk division/CRO:

- Risk management.
- Control and compliance function.

The organisation of these functions is described below.

Risk management

The risk management function covers that main risks (credit and counterparty, market, liquidity, structural, operational and model), with global and corporate-wide responsibilities and support to Bankinter Group's governance bodies. It is charged with defining the methods and executing the risk controls as the first line of defence. It is also geared towards executing and integration the risk function into the management of the various businesses of Bankinter and Bankinter Group. It comprises the following first-line divisions and units:

Credit risk: tasked with defining the risk policies associated with each of the segments. It is delegated powers that allow it to authorise customer transactions. It oversees the entire risk process, from approval (which requires IT support capable of achieving the highest level of efficiency) to monitoring and recovery.

Global Risk Management: responsible for developing, improving, controlling, implementing and regularly monitoring statistical and risk parameter models for the various credit portfolios, and enhancing the integration of these models into management. The internal models perform a key role in the approval process, in the calculation of regulatory and internal capital, in the collective estimation of provisions, in recovery processes and in the establishment of risk-adjusted return measures (RARORAC). It also oversees, together with the global risk division, the development of the specific policies and procedures that must be included in the framework for the risk management model. Its responsibilities also include supervisor relations, official announcements and regulatory reporting in regard to models, and monitoring the sequentially implementation plan for IRB models in the Bank.

Risk Assessment and Processes: mainly defining and supporting risk reporting, and designing, implementing, maintaining and evolving credit risk approval and monitoring systems.

Global Risk: coordinates the different Risk areas in activities and projects related to methodologies, policies, procedures and regulations, seeking to adopt industry best practices in the measurement and management of risks and, in particular, management of the Group's global risk profile.

The Risk Assessment unit acts on cross-cutting factors, coordinating and promoting: a sectoral approach to credit portfolio management, analysing sectors and promoting the most appropriate information and management processes at all times. As managing climate- and environment-related factors and their translation into different risks.

Market risk and institutional control: Reporting to the managing director of risk/chief risk officer, its function is to control and monitor structural risks (liquidity, interest rate and foreign currency) and market risks arising from the Entity's institutional and trading operations.

As discussed further on, the balance sheet management area and the trading department, which report to the general capital markets division, are responsible, respectively, for managing liquidity, interest and foreign currency risks (structural risks) and market risk. Market risk has the independent duty of measuring, monitoring and controlling changes in interest rate, liquidity, foreign currency, market and counterparty risks in 'institutional' positions; i.e., those taken by the Assets and Liabilities Committee (ALCO) and by the treasury department for trading purposes.

Operational risk: responsible for promoting and coordinating the procedures and tools for the identification, measurement, control and reporting of operational risks, providing the organisation with a uniform vision of operational risk. First-line management of operational risk is delegated to the Group's various subsidiaries, support areas and business units. Operational risk is occasionally managed by specialised or centralised departments when necessary given the circumstances (complexity, size, cross-sector corporate processes, etc.).

Non-performing loans and incidence: It is responsible for running and managing the process for recovering outstanding loans in early stages of default, by implementing and promoting internal and external tools and actions for this purpose with a view to minimising new non-performing loans. It is also responsible for running and managing the control, monitoring and non-amicable recovery of loans in accordance with prevailing legislation by creating and promoting automatic systems that make management more efficient and by implementing more efficient and effective mechanisms and processes to improve outstanding debt collection. It is also responsible for all matters related to the policy, analysis, approval and monitoring of refinancing and forbearance arrangements.

Real Estate Assets: setting and updating the price of foreclosed assets and determining their purpose. Its duties include the adapting the assets technically and legally and monitoring them to prevent impairment. Its purpose and main responsibility is to proactively seek out buyers by publicising and managing assets in accordance with principles of transparency, sufficient publicity, competition and effectiveness in order to obtain the highest price possible. It prioritises quick selling.

Control and Compliance function

The Corporate Control and Compliance division, as the second line of defence, reports to the risk and compliance committee and is integrated into the Bank's organisation through the Risk division (CRO). The corporate responsibilities in its remit extend to all areas and include providing support to the Group's governance bodies. It is organised into the following units with the following responsibilities:

Risk control unit: The purpose of this area is to oversee the quality of Bankinter Group's risk management. More specifically, it seeks to guarantee that the systems for managing and controlling the various risks involved in its activity meet the most demanding criteria and the best practices in the banking sector and/or required by regulators, overseeing that the actual risk profile assumed is in line with that established by senior management. It also oversees credit risk management at regional organisations.

Technical division: This area is in charge of procedural aspects of the risk appetite framework and the corporate risk map, and oversight of the second line of defence of certain specific risks (e.g. reputational risk). It also oversees the second lines of Group subsidiaries.

Internal validation unit: It is in charge of validating the advanced risk models and their results. To do so, it analyses them and issues reports with opinions on their validity for risk management and on their use in managing risks, and issues the related recommendations.

Regulatory compliance unit

The board of directors is responsible for overseeing compliance with the Group's general code of conduct, the general anti-money laundering and terrorist financing policy and the products and services marketing policy.

The risk and compliance committee is charged with functions that include overseeing compliance with legal requirements, supervising the effectiveness of internal control and risk management systems, supervising compliance with the Group's code of conduct in securities markets, anti-money laundering manuals and procedures and, in general, the Bank's governance and compliance rules, and making any necessary proposals for their improvement, as well as reviewing fulfilment of any actions and measures arising from reports or actions by government supervisory and control authorities.

The duties of the Regulatory Compliance unit, which is integrated in the Corporate Control and Compliance division and reports to the risk and compliance committee, include **the following**: Advising of senior management, employees and the Group's business and operating areas. Supervising and controlling compliance with rules of conduct. Detecting and managing non-compliance risks. Relations with regulatory and oversight authorities and bodies in matters that fall within its remit.

Financial control and analysis unit

The Financial Control and Analysis, integrated in the Corporate Control and Compliance division, reports directly and regularly to the audit committee.

Its mission is to assess the effectiveness of the general internal financial control framework, to ensure the reliability of the Group's financial information. Its scope includes the functions and competencies of all Bankinter Group entities, subsidiaries and branches. It can also consider activities performed as outsourced services.

Applying a systematic and methodological approach to overseeing the existence of an effective control framework (ICFR), performing internal control over financial reporting. This helps to improve the effectiveness of management processes for financial risks and their internal control framework.

This function also includes control over outsourced services, in accordance with the guidance in the EBA guidelines on outsourcing arrangements.

Anti-money laundering unit

This is the technical unit under the Control and Compliance division that reports to the internal control body. It is staffed by specialist, full-time personnel with suitable training in analysis, as established in prevailing legislation.

It reports to the board risk and compliance committee on progress in measures and action plans concerning anti-money laundering and counter-terrorist financing (AML/CFT).

Its aim is to guarantee adequate coverage of the risks arising from money laundering and terrorist financing, complying with all related legislation.

Other risks managed indirectly by the managing director of risk/CRO

Structural risks

The board of directors sets the strategy and policy for structural risks (interest rate, liquidity and foreign currency risks) and market risks and designates various bodies to manage, monitor and control them. It also sets the risks profile to be assumed by the Group, setting maximum limits that it delegates to such bodies, as defined in the risk control and management framework.

The board of directors confers powers upon the assets and liabilities committee (ALCO), authorising it to continuously monitor decisions regarding structural balance sheet risks (interest and liquidity risk), stock market risk and the exchange rates of the Bank's institutional positions, while also establishing financing policies. It reviews and approves the relevant limits for the management of all such risks every year and delegates such powers to the ALCO.

The ALCO is directly responsible for managing all interest rate and liquidity risks, as well as stock exchange and institutional change risks and group financing policies. However, capital markets, within its powers or following the guidelines of the chairman, chief executive officer or managing director of capital markets may carry out actions aimed at protecting the Bank from its risks or taking advantage of trading opportunities that arise.

The board of directors reviews the framework and policies for managing these risks and the appropriateness of changing the operating limits established therein as often as it deems necessary and at least annually.

The Treasury and Balance Sheet Management areas, which are part of the Capital Markets division, implement the decisions taken by the ALCO in relation to the functions in the previous section. It has powers to act immediately if market circumstances require, with subsequent reporting to the ALCO.

Technology risks

These risks are supervised by the Digital Security area, which reports hierarchically to the Digital Banking division. Functionally, it reports regularly to Bankinter's chief risk officer (CRO). Its main responsibilities regarding management of these risks include: training and awareness-raising on information security; coordination of technology environment improvement plans; management of system vulnerabilities; coordination of certified risk management systems; cryptographic key custody; identification and definition of the security requirements for new projects and developments; definition, approval and maintenance of business continuity plans, technological contingency and incident response plans; implementation of security measures on operating systems, databases and middleware; and identification and management of any vulnerabilities detected.

Reputational risk

The first-line management of this risk is delegated to the Bank's various subsidiaries, support areas and business units, operating within the scope of the policies and guidelines issued by the Corporate Reputation unit. This unit, which is part of the corporate communication and responsibility area, also draws up reputational risk metrics, oversees the preventive management of this risk and mitigates potential reputational risks by taking part in crisis response actions.

Other units completing the risk control and management framework

Data protection officer.

The corporate privacy and data protection officer reports to Legal Counsel and has the following functions: Coordinating the privacy and data protection officers of Group companies, to guarantee that they apply the same criteria in matters of privacy and personal data protection. Approving new initiatives that affect the right to privacy and personal data protection that are different to those already approved in the organisation the responsibility for which exceeds that of the privacy and data protection officers of the Group entities. Advising the data controller of their obligations in relation to data privacy and protection. Overseeing compliance with the requirements of privacy and data protection regulations.

Customer Service area

The Customer Service area analyses complaint and claims management data continuously to identify and address recurring or systemic issues, and potential legal, operational, conduct and other risks, reporting the findings to the board of directors. Given the importance of the information it handles, these findings constitute an early warning mechanism for issues arising

from the marketing of products or services and/or the Bank's relationship with its customers, which is considered the Bank when selecting and adopting the appropriate measures to address or prevent the issues.

Risk diversification is an essential management principle, as illustrated in the successive financial crises. The Bank regularly monitors risk diversification by sectors, geographic location, products, guarantees, customers and counterparties.

Classification of the portfolio based on credit risk

Credit risk is the main risk to which the Group is exposed. The procedures and criteria used to estimate credit risk are set out below. This section starts with their classification and the next explains how expected credit losses are estimated.

Credit exposures are classified, in accordance with their credit risk, into one of the following categories:

- 1) Performing exposure (Stage 1): includes transactions for which credit risk has not increased significantly since initial recognition. The loss allowance will be measured at an amount equal to 12-month expected credit losses. Interest income will be calculated by applying the effective interest rate to the financial asset's gross carrying amount.
- 2) Watchlist exposures (Stage 2): includes transactions with a significant increase in credit from initial recognition, but no default event or impairment. The loss allowance will be measured at an amount equal to the financial asset's lifetime expected credit losses. Interest income will be calculated by applying the effective interest rate to the financial asset's gross carrying amount.
- 3) Non-performing exposures (Stage 3): includes credit-impaired assets; i.e. that present a default event or impairment. The loss allowance is measured at an amount equal to the financial asset's lifetime expected credit losses. Interest income will be calculated applying the effective interest rate to the financial asset's amortised cost (i.e., adjusted for any impairment losses). If these positions are reclassified to Stage 1 or Stage 2, the reversal of previously recognised impairment losses is recognised as a loss allowance update, not as interest income.
- 4) Risks in default: Transactions for which there is no reasonable expectation of recovery, or which are over 4 years past-due, will be included in this category. Classification in this category will entail recognising losses in profit or loss at the financial asset's carrying amount and its full derecognition, although the Group may take any actions necessary to attempt to collect until its rights have been definitively extinguished due to statute of limitations, forgiveness or other causes.

The criteria used by the Bank to determine whether a significant increase in risk has occurred can be divided into three categories:

- Objective increase in Probability of Default (PD), according to estimates provided by daily provisions models. Once this objective increase in PD is identified, depending on the significance of the transaction and the customer's rating, it is assessed whether to automatically reclassify to Underperforming Exposures (Stage 2) or if this needs to be confirmed or rejected by an expert analyst. This will always apply to exposures above 1 million euros. The analysis to be performed is set out in an internal procedure detailing the circumstances for both individuals and legal entities to verify a substantial change in an instrument's risk profile from its origination. As for the exemption for low risk set forth in paragraph 5.5.10 of the IFRS 9, Bankinter Group analyses the significant increase in risk in all its exposures. However, significant risk increases are not considered automatically due to an objective increase in the PD when the 12-month PD is less than 0.3% or the internal rating is more than 7, on a scale of 1 to 9, as explained below.
- Expert assessment: In addition, a reclassification based on an expert's opinion may take place if a situation is observed that might lead to the conclusion that there is a significant increase in the risk. Therefore, there is system of warnings that contributes to the early identification of these situations, and a procedure of expert assessment of the significant increase in risk that includes the following indicators:
 - Changes in the economic or regulatory environment or in conditions of markets to which the customer may be particularly sensitive.
 - Deterioration of the customer's economic and financial structure (e.g. income, debt levels, margins, cash flows, debt service ratios)

- Technological risks
- Pending litigation
- Pre-insolvency proceedings
- Significant downgrade of internal and/or external rating
- Significant deterioration of market indicators
- Waivers, breach of covenants, standstill, etc.
- Potential contagion effects
- Defaults in other exposures

These indicators address the guidelines contained in the IFRS9 standards, the EBA - Guidelines on accounting for expected credit losses or Annex 9 of Banco de España Circular 4/2017.

- Backstops: Moreover, the following additional criteria are taken into account:
 - Forbearance is objective evidence of a significant increase in risk, and therefore reclassification to Stage 2, provided there are no indications of impairment.
 - In general, the Bank adds the accumulation of more than 35 days past due as additional objective evidence of a significant increase in risk. The rejection of the general approach in paragraph 5.5.11 of IFRS 9 to the presumption of a significant increase in risk when a default occurs that is more than 30 days past due is based on the example set out in paragraph B5.5.20 of the same standard. It is based on the empirical analysis of observed default frequencies conditional on days of non-payment as well as collection activity. This analysis shows that there is a significant volume of collections between days 30 and 35 of non-payment, which can be explained for several reasons:
 - The regular income from customers, although occurring on a monthly basis, does not necessarily have to be exactly 30 days apart due to the length of the months and the effect of holidays.
 - Exposures from 30 days past due are given a different management status and, as a result, recovery actions are stepped up.

- In products such as factoring, 30 days of non-payment can accumulate without triggering recourse to the assignor, so there is not really a significant increase in risk.

Consequently, the Bank opted to adjust the general criterion by five days with the sole objective of not automatically classifying exposures where no significant increase in risk is actually observed in Stage 2, so making the classification system more stable.

- As for the exemption for low risk provided in the standard, Bankinter Group analyses the significant increase in risk in all its exposures.

The credit risk monitoring and provisions committee governs the entire classification system and approves the criteria and procedures for analysing and determining the existence of a significant increase in risk. Specifically, this committee approves the thresholds set with respect to the increases in PDs and days past due, by which any significant increase in risk is determined in each of the categories into which the loan portfolio is divided. For this purpose, quantitative analyses are taken into consideration to check the stability of the system (and certain other factors) taking into account that the classification is updated daily and that entering Stage 2 means a change in customer management.

B5.5.1 to B5.5.6 of the IFRS 9 allow for the possible implementation of a collective approach to measure significant risk increases. The aim is to detect that these increases exist at an early stage, even when there is not enough evidence or information to move them to instrument level. Therefore, the standard even provides for the possibility of recognising expected losses over the life of a portion of assets with common characteristics, when it is assumed that there may have been a significant increase in risk in part of the assets.

Following from the above, although the Group carries out collective analysis in certain portfolios, as a result thereof, the Group always identifies the instruments for which there is a significant risk increase individually. This is a relevant consideration since this collective analysis is not exactly as set forth in B5.5.1 to B5.5.6 of the IFRS 9.

Firstly, as explained below, the expected loss is calculated and assigned on a contract-by-contract basis, taking into account its specific characteristics, and which are used to determine EAD, PD and LGD risk parameters. There is, therefore, no estimation on the basis of aggregated groups of exposures with a homogeneous risk profile, except in those portfolios where what are known as the "practical expedients" provided for in paragraph B.5.5.35 of IFRS 9 are used, and which are residual when we exclude the categories for financial institutions and public sector, as described in the next section.

Although a big part of the loan book is subject to collective estimation of expected losses through provision models, these models offer individualised values for each instrument, considering not only the portfolio they belong to but also a series of clarifying variables linked to the profile of holders, default history, product characteristics and the class and value of guarantees. Additionally, the estimates depend on macroeconomic expectations, taking account of various scenarios and therefore arriving at a forward-looking view of risk parameters.

However, there may be specific situations with a very unequal impact on certain portfolio segments and that are not reflected in the empirical evidence used for the models. This type of situation has been seen as a consequence of the health crisis and the war in Ukraine. For this reason, we must incorporate a forward-looking approach that does not restrict itself to the projected general economic scenario, and that instead considers specific effects that may lead to a significant increase in risk. This type of analysis is part of the identification of significant risk increase by expert judgement carried out on a recurring basis, and which includes two different, complementary approaches:

- Individualised analysis of instruments that share a series of common characteristics or for which certain relevant events take place.
- Collective analysis. Nevertheless, as a result of this analysis, a specific set of instruments is always identified for which there is a significant risk increase individually. The Group has sufficient classification criteria to be able to differentiate the risk at exposure level, by either using its own provision models or the internal rating.

Specifically, during the health crisis and currently with the effects of the war in Ukraine, during the expert assessment of significant risk increase, we have identified groups that are especially vulnerable and may be subject to individual review or directly moved to stage 2. This is always done on an instrument-by-instrument basis. Consideration has been given to indicators like the sector of activity, assessed together with other variables such as the rating from internal models and its progress, the follow-up alerts or greater use of aid instruments set up since the pandemic.

The following criteria are used to identify impairment:

- Over 90 days past due: Includes all positions with amounts more than 90 days past due, without applying any material filter.
- Carry-forward: This category includes the amounts of all transactions with a holder when the transactions with amounts overdue for more than 90 days exceed 20% of the amounts pending collection.
- Refinancing, refinanced and restructured transactions that meet the following characteristics:
 - The transaction has a grace period of more than 24 days.
 - If any contract to be refinanced was already impaired, including successive refinancing of positions that were already refinanced and impaired.
 - If a haircut is arranged on the principal amount of the transaction.

The Group's forbearance policy, which includes the criteria for determining the existence of impairment, is described later in this note.

- Other criteria for reasons other than late payment, including the following indicators:
 - Transactions in which legal proceedings have been taken to recover the debt.
 - The transactions of borrowers that are or will be declared in insolvency proceedings without a winding up petition. The guarantees granted to borrowers declared subject to insolvency proceedings for whom there is a record that the winding up stage has been or will be declared, or who undergo a considerable and unrecoverable impairment in their solvency, even though the guarantee beneficiary has not ordered payment.
 - Finance lease transactions in which the entity has decided to terminate the contract in order to repossess the asset
 - The set of transactions of borrowers with a balance categorised as doubtful due to delinquency, that do not reach the percentage indicated in the carry-forward scenario, in the event that there are conclusively reasonable doubts about their total repayment following an individualised study.
 - Purchased or originated credit-impaired transactions or transactions with a considerable discount.

- Sales of loans of a borrower with significant losses.
- Exposures fall under a situation of no interest accrual or conditional interest accrual.

The Group also considers the following indicators in performing impairment tests:

- Significant financial difficulties of the borrower that seriously affect its ability to comply with its loan obligations.
- Continuous losses that have comprised the debtor's solvency.
- Generalised delay in payments to settle debts and other obligations.
- Existence of an internal or external credit rating that shows the borrower to be in default.
- Existence of impaired positions in other Group companies to which the debtor belongs or in companies where a relationship of contagion on the debtor has been identified.

All these criteria established for the recognition of impairment are fully consistent with the definition of "Impaired asset" in Appendix A of IFRS 9 as well as with the indications in paragraph B5.5.37, considering in all cases that an instrument is recognised as doubtful when it is 90 days past due.

Section 4.1 "Accounting definitions" in Bankinter Group's Pillar 3 report describes the differences between the definition of default applied for prudential purposes (as set out in article 178 of Regulation (EU) No 575/2013 of the European Parliament and of the Council of 27 June 2013 - CRR) and the guidelines issued by the European Banking Authority on the application of the definition of default and the definition of credit-impaired. Although there are certain differences between the definition of "default" used by the Group and the concept of non-performing/doubtful, these have no substantial effect. Therefore, the differences between portfolios in default and those classified as non-performing/doubtful are in practice limited.

The main differences are as follows:

- The concept of non-performing/doubtful is applied at exposure level, which means that transactions from the same debtor with different ratings (e.g. sustainable and unsustainable tranches in a restructuring agreement). On the other hand, for legal entities, the concept of default is applied at obligor level and, once they are considered to be in default, a carry-over of all of their exposures takes place. However, it should be noted that, where carry-over criteria are observed in relation to assets classified as non-performing/doubtful and, in general, for assets

seen as "subjective doubtful", then this carry-over effect is also applied at individual level.

- The definition of default includes material thresholds not considered in past due/non-performing, although these thresholds are extremely limited according to Commission Delegated Regulation (EU) 2018/171.
- On the other hand, for individuals, the concept of default is applied at exposure level, without considering automatic carry-over criteria like those anticipated in the case of non-performing/doubtful exposures.
- Prudential default considers a three-month "testing period" during which the situation remains the same even if payment has been made. Past due/non-performing does not consider automatic criteria, so the position may be reclassified from Stage 3 once payment is made and there are no other additional criteria for considering impairment.

Transitions between a stage of credit risk and another arise depending on when a financial asset meets or no longer meets the definitions of impairment and significant increase in credit risk. However, the Group has established minimum cure periods for forbore exposures and minimum terms for the individualised analysis. In addition, the forbearance measures constitute indicators of impairment and/or significant increase of credit risk. Treatment of these types of transactions is similar to the standards issued by the European Banking Authority and Banco de España Circulars.

Estimation of expected credit losses

The expected loss is calculated and assigned on a contract-by-contract basis, taking into account its specific characteristics, and which are used to determine EAD, PD and LGD risk parameters. There is, therefore, no estimation on the basis of aggregated groups of exposures with a homogeneous risk profile, except in those portfolios where what are known as the "practical expedients" provided for in paragraph B.5.5.35 of IFRS 9 are used. However, a distinction must be made between two different procedures:

- The individualized estimation of coverage based on a detailed analysis of future flows performed by an expert analyst.
- The collective estimation of hedges obtained automatically through internal provisioning models.

The first of these procedures is applied systematically in the following cases:

- From 2 million euros of credit risk (which includes the drawn amount plus the undrawn commitment) for exposures in Stage 3.

- From 3 million euros of credit risk for exposures in Stage 2.

These thresholds, which are applied without exceptions, follow a customer risk criterion so that, for example, if a customer is doubtful and has a risk of more than 2 billion, it will be analysed under an individualised methodology even if not all its positions are doubtful. Moreover, the worse customer rating prevails. In other words, if a customer has only one exposure in Stage 2 and the rest in Stage 1, the Stage 2 methodology will be applied for all exposures, unless the Stage 2 risk is considered residual (no more than 5% of the client's total risk).

On the other hand, operations classified as performing (Stage 1) are generally only subject to the collective estimation of expected losses. However, it should be noted that in the coverage estimation procedure, the individualised analysis can be applied to those transactions, irrespective of their classification, where it is found that the model provides an inadequate estimate of the coverage. This exceptional treatment is carried out under governance criteria, so that all proposals are submitted to the monitoring and provisions committee, leaving a trace of the justification, validity and proponent. Moreover, this extension is not limited to a particular segment of the portfolio as forward-looking valuation criteria may emerge that are not adequately captured by the models.

It might be thought that the collective estimate is simply a shared estimate for groups of instruments with similar characteristics. However, bearing in mind that there are 21 internal models for estimating PD and 19 models for estimating LGD, and, also, these models are broken down into sub-models, each of which has its own explanatory variables, the combination of possible situations characterised by a given expected loss is extremely high and incompatible with an alternative non-parametric procedure, as there are not enough individuals in each homogeneous group to estimate losses with a minimum degree of precision.

In addition, an individualised estimate in the case of an unimpaired exposure classified as Stage 2 also requires the probabilities of default provided by the collective estimation models. So the individualised analysis and the collective analysis differ in that the former provides a detailed analysis of the potential losses in the event of default under three alternative scenarios that are weighted according to their probability of occurrence, taking into account the evolution of the exposure over the life of the instrument. A hypothetical calculation of the provision through a case-by-case analysis for Stage 1 exposures is simplified since it is reduced to the expected loss in the first 12 months from the reference date and should therefore not differ significantly (except for possible LGD expert valuation biases referred to in the next paragraph) from the collective calculation since both procedures are based on the PD estimates provided by the models.

Also, a hypothetical individualised analysis applied to performing exposures for the determination of 12-month expected losses should be based on probabilities of default provided by the models, analysing potential losses based on the assumption of default. There is a risk of this analysis being biased, however, because the starting conditions in terms of revenue generation capacity or even the value of collateral if liquidated may be far removed from those that would exist under a hypothetical default situation, also taking into account that there has not been a significant increase in risk. In fact, in LGD models, a very relevant factor is the so-called probability of cure, a parameter which is difficult for analysts to specify and which must be supported by empirical evidence. That is why we do not think it is appropriate to establish a threshold in Stage 1 that would systematically lead to replacing collective estimation with individualised analysis.

The internal provisioning models are the key part of the impairment calculation methodology, providing the various components that affect the expected loss over both a twelve-month horizon from the reference date (Stage 1) and the life of the instrument (Stages 2 and 3): EAD ("exposure at default") reflects the exposure drawn on transactions at the time the impairment is incurred. It therefore incorporates the estimate of the amounts expected to be paid on off-balance sheet exposures through a conversion factor applied to the nominal value of the transaction. PD ("probability of default") reflects the probability that a borrower will not meet its payment obligations in the time horizon considered (one year or at maturity). Lastly, the LGD ("loss given default") reflects the part of the EAD that is assumed to be a loss in the event of such an event. These parameters are calculated and adjusted taking into account the economic climate at each reporting date.

The following table presents the different categories into which the Bank's credit risk portfolio is divided at year-end 2022. The approach used for the collective estimation of expected losses is also shown:

Application	Category	Approach from 1 January 2018 on
BK Spain	Mortgages to individuals Personal loans to individuals Bankinter non-company cards Other Individual transactions Small businesses Medium-sized companies Large companies Very large companies Very large insurers Developer project finance Comp. without valid balance sheet	Collective models

It can be seen that the portfolio is subdivided using a highly granular segmentation according to different criteria, such as the geographical location, nature and size of borrowers. The type of financing, the collateral or even the distribution channel (Bankinter business or open business) is also considered for individuals. In legal persons, certain activities and specific types of financing, such as project developers, are separated into specific categories. The public sector is also separated, distinguishing between private companies and local, regional or state administrations.

In general, each of these categories has shared risk characteristics and in most cases, this means that collective models can be developed, to make a causal relationship between a set of

attendant variables and credit risk. Each of these models may in turn contain submodels, however, which can give a specific response when, for example, instruments are past due. Clearly, the same category may show very substantial differences in the risk profile. These models are able to find these differences according to the explanatory variables that characterise the borrower and the instrument.

At the end of 2022, 85,5% of the provisions for instruments and assets subject to collective estimation correspond to the categories for which collective internal models are applied. The "practical expedients" (IFRS 9, paragraph B.5.5.35), which include both the so-called alternative solutions provided by Banco de España and other simple solutions applied in other geographies, are rarely used if we exclude the categories corresponding to financial institutions and the public sector. In the specific case of Evo Banco, sufficient historical information referring to its current business model and Bankinter Group's risk policy applicable to this institution will have to be accumulated for the future development of collective internal models.

The Group has established regular procedures to analyse the reliability and coherence of the results obtained through its collective estimation methods concerning credit risk hedges through back testing. These tests assess accuracy by subsequently comparing actual losses effectively observed on transactions.

Alternative solutions are used to calculate expected loss of exposures to financial institutions, the public sector and fixed income. This is because the Group does not have sufficient historical experience of defaults in these portfolios to develop internal models, especially when various types of customers and instruments have to be covered, and the fact that they must be sensitive to the economic scenario. Alternatively, Banco de España has estimated coverage percentages for the different Stages drawing on its experience and the information it has on the Spanish banking sector, and forecasts on future conditions. These strike us as being the best option, and fit in with our limited experience and future expectations in this type of exposures. However, the decision needs to be continuously reviewed according to possible events and analysts' expectations.

In this respect, we highlight the following:

- Up to now, the forward-looking assessment of expected loan losses has been based on various scenarios assuming the continuity of the euro.
- Exposure to the public sector is limited under the Group's risk appetite framework.
- Ratings issued by rating agencies are a key benchmark in this area, an investment grade rating being needed.
- Other indicators such as risk premiums, which have a more situational nature, are also relevant as indicators of a potential structural change.

The Group takes into consideration forward-looking information to determine expected **credit losses** and to identify significant increases in risk. In this regard, the Group has defined a

baseline macroeconomic scenario it uses to draw up the Group's budgets, business projections and capital planning. This scenario covers a 5-year period, with growth gradually converging towards levels consistent with the potential growth of the economy. The Group considers that it is not possible to make forecasts with a minimum degree of precision beyond this period, although it still considers the contractual terms of transactions to determine expected losses. The Group considers alternative forward-looking information to the baseline scenario as follows:

- The Group has two alternative scenarios to the baseline scenario: a pessimistic and an optimistic scenario. It uses these to estimate the risk parameters for calculating expected credit losses by applying collective assessment approaches. The outcome of each scenario –baseline, optimistic and pessimistic– is weighted in accordance with its probability of occurrence, with 40% for the baseline scenario, and 30% for each of the alternative scenarios.
- The function of these scenarios is to correct for possible biases in the estimation of expected losses. They must thus adequately reflect the dispersion of the business cycle in both directions and in a balanced manner. They therefore represent equiprobable deviations from the baseline scenario, converging to the latter at the end of the projection period, and are constructed by Monte Carlo simulation, in accordance with the historical evidence of relationships between the various macroeconomic variables considered and their uncertainty. The probabilities of occurrence attributed as based on empirical evidence, minimising the difference between the dispersion of thousands of scenarios simulated and the three scenarios chosen.
- For Spain, each scenario features specific amounts for year-on-year growth in GDP, the unemployment rate, year-on-year growth in housing prices, and year-on-year growth in the business turnover index (ICNE). In Ireland, the year-on-year rate of GDP, the unemployment rate, and the year-on-year rate of housing prices are used. For Portugal, they consider the same variables with the exception of the ICNE, and also include the headline inflation rate. The following table summarises the various scenarios through the three common variables to all geographies:

Average of the first three years of the projection*					
Country	Scenario	Prob.	GDP Unemployment rate		Property price
Spain	Baseline	40%	2.6	12.9	(0.4)
	Pessimistic	30%	1.1	17.4	(2.7)
	Optimistic	30%	4.1	8.6	2.0
Ireland	Baseline	40%	5.8	5.1	3.0
	Pessimistic	30%	2.0	6.9	(2.7)
	Optimistic	30%	9.5	3.3	8.8
Portugal	Baseline	40%	2.2	5.4	6.0
	Pessimistic	30%	1.5	8.8	4.7
	Optimistic	30%	3.0	2.0	7.3

(*) 2023-2025. Housing prices in Spain are taken from appraised value statistics published by the Ministry of Transport.

- Averages for the first three years of the project are shown, since there is a reversion back to the baseline scenario in the next two years to complete the five-year period. In the three countries considered, this reflects the macroeconomic projects published in 2022 by their central banks in coordination with the European Central Bank, as detailed in section "Disclosures and impacts of the war in Ukraine in the post-pandemic era" of this Note.
- Provision models, which estimate the expected losses, are sensitive to these scenarios to the extent that they incorporate a causal link between the structural components of the expected loss (probability of default, PD, loss given default, LGD, and credit conversion factor, CCF) and macroeconomic variables. Since this relationship is multi-factor, the sensitivity of expected loss to each of these variables is minor, i.e. excluding common effects that may be attributed to other variables. Also, since the expected loss is calculated by unit exposed as the product of its structural components, there is a multiplication effect between the macroeconomic variables. For this reason, single-factor sensitive analyses may be relatively deceiving and, therefore, it is preferable to assess the sensitivity of expected loss to scenarios other than the base scenario. This considers simultaneously the joint effect of the concomitant variables. As it is explained in the next section about the changes made in 2022 to the provision models, it has been observed that sensitivity to the macroeconomic environment is much greater in non-impaired exposures, both in stage 1 and stage 2, when compared with stage 3. This is due to the aforementioned multiplication effect, and to the fact that the recovery capability is much more conditioned by variables such as the length of default in relation to the variables that characterise the short-term macroeconomic environment. Consequently, the sensitivities in each stage should be offered. The following table shows the impact on

the estimated expected losses⁵ from the collective models, considering the two alternative scenarios:

Relative variation of the estimated expected losses by collective models versus baseline scenario

Alternative scenarios			
Stage	Optimistic	Pessimistic	
1	-10.95%	13.16%	
2	-5.41%	5.91%	
3	-0.49%	0.51%	

These impacts include the effect associated with the migrations between stages, as a consequence of greater or lesser recognition of significant risk increase due to a change in the PD. However, these movements between stages are not solely dependent on the probability of default provided by provision models. In fact, in the current climate, stage 2 ratings are heavily weighed by expert forward-looking judgement.

Complementarily, this table shows the impact that a reduction/increase in GDP by one percentage point, *ceteris paribus* and most relevant variable, would have on the expected estimated loss by collective models of each of stages:

Relative variation of the estimated expected losses by collective models versus a one percentage point change in GDP, with the remaining variables unchanged

Variable	Stage	Change -1%	Change +1%
GDP	1	3.93%	-3.70%
	2	2.39%	-2.37%
	3	0.03%	-0.03%

- The individualised estimations also take into consideration the scenarios established and are weighed taking into account the probability of occurrence of each scenario and, in the case of financial assets in Stage 2, the probability of default of a counterparty in each scenario.
- The prospective idiosyncratic elements are captured in the collective models with ad hoc adjustments governed in a Provisions Committee to adjust elements that the expected credit loss models are unable to capture. Here, we highlight the explanation provided in the section on the impacts of the health crisis regarding maintenance of the overlay adjustment caused by lingering uncertainty over the pandemic's potential impact on the loan book.

⁵ This sensitivity is determined without considering the overlay adjustments, described in section "Information and impacts of the health crisis" of this Note.

The forward-looking assessment of expected losses must consider certain emerging risks, especially those related to climate and the environment. Climate change has some specific characteristics that entail a very different approach to other risks. Firstly, its potential capacity to cause radical and irreversible damage. However, these effects would materialise in the very long term, much later than the periods normally used in financial planning. Secondly, its uncertainty given its effect in the very long term and, above all, the scope of the mitigating measures deployed and that must be implemented globally. Thirdly, the lack of comparable historical references.

Provision models are used to determine the expected losses and, to a large extent, to identify significant risk increases, and are calibrated from historical information. As a consequence, considering the specific characteristics mentioned above, it is currently really difficult for the models to be a full reflection of climate change risks. But even if that were the case, their impact on risk measures in relatively short terms (12 months for the portfolio in a normal situation) would currently be relatively minor.

However, other mechanisms are having some impact on the estimation of expected losses and will have even more of an impact in the future:

- First, the value of real estate collaterals, which has a direct influence on the estimated recovery rate, will be increasingly dependent on the properties' energy efficiency, a factor of increasing importance against a scenario of a sharp increase in energy prices.
- Second, the forward-looking approach introduced through the definition of future scenarios can also be affected by climate factors.
- During the pandemic, significant risk increases were predominantly recognised from a forward-looking approach and this is still the case, with a focus on certain very energy intensive activities. Naturally, this is linked to the transition risks associated with climate change.
- The individualised analysis of expected losses can also include factors relating to climate risks.

In short, although the models cannot incorporate relationships that are not backed by empirical evidence, climate risks can be included through means that give a forward-looking vision to estimates. Also, this empirical evidence will emerge in the future and be incorporated during the models' frequent recalibration.

At the moment, the priority is to gain a better grasp of the issue, find out how our customers are adapting, and how we can help them, and to gather information about climate factors. Right now, this type of information is pretty scarce, not sufficiently well-founded and even of questionable quality. Major regulatory changes are being introduced to revert this situation, and financial and non-financial institutions are required to further disclose their emissions and operations.

Update of provision models

In the first half of 2022, Bankinter performed a major update of its provision models, which extended to the second half of the year with some additional adjustments and which affects the estimate of expected losses in the various stages and the determination of whether there has been a significant increase in risk.

This was prompted by the experience gained since implementation of IFRS 9 in January 2018 in both empirical evidence and consolidation of the standard and related criteria of interpretation. Moreover, during this period the entire system was subject to highly exceptional conditions caused by the health crisis.

This update did not lead to any meaningful increase in coverage of the loan book, but it did in stage 2 exposure and, therefore, provisioning per instrument. This does not mean the recognition of any increase in the overall risk of the portfolio.

Firstly, the specification models for estimating PDs, LGDs, depreciation adjustments and conversion factors for the various categories of exposure were updated and improved. Key results from this exercise include:

- Expected losses on the portfolio in stage 1 and 2 were, systematically, including a certain conservative bias, which has been addressed with the new developments.
- Conversely, the sensitivity of the stage 3 portfolio to time of exposures past-due in the new model increased. This is related to the longer foreclosure periods or time involved in resolving court proceedings.
- In addition, performing exposures in stage 1 and 2 show significantly higher sensitivity to the macroeconomic environment than exposures in stage 3. This correlation is much stronger in PD than LGD.
- Elsewhere, greater importance is attached to certain related factors, e.g. sector of economic activity, or collateral/guarantees.

Secondly, the criteria for identifying whether there has been a significant increase in risk related to an objective increase in probability of default were modified, resulting in considerable reclassification of exposures to stage 2. Even though IFRS 9 leaves the meaning of "significant" open to interpretation, a more financial and less risk-based approach has consolidated over time.

The financial approach is underpinned by a hypothetical loss in value of the instrument due to the increase in credit risk. Therefore, assuming that prices adjusted perfectly to the risk

assumed at the grant date, the loss in value in terms of a lower margin net of impairment adjustments is related to relative changes in probability of default.

Conversely, there are two core ideas behind a risk-based approach:

- The circumstances giving rise to the recognition of a significant increase in risk may not be short-lived or irrelevant from a risk perspective. This is especially important in estimation and classification systems executed daily, such as Bankinter's.
- Stage 2 is likely to show a far worse risk profile than stage 1.

In practice, this leads to an approach in which relative increases in PD are assessed differently depending on the absolute value of current PD.

So that the two approaches are more aligned, the standard introduces the "low risk" exception; i.e. a PD below which it is considered that there has not been a significant increase in credit risk. However, during the years since IFRS 9 became effective, the 'financial approach' has clearly become the dominant approach, also adjusting low risk to PD levels equated to an investment rating.

Accordingly, Bankinter decided to adapt its classification system for objective increase in PD from the grant, adjusting the thresholds for determining a significant increase in credit risk and thus introducing higher sensitivity to relative increases in PD.

Since the IFRS 9 became effective in 2018 and until 31 December 2021, these thresholds translated into two criteria to be met simultaneously:

- PD Lifetime should show a significant relative increase set at 100% in most portfolios, except for the mortgage portfolio and in large and very large businesses, which was set at 200%. This difference is due to the lower average PD in these portfolios.
- As a result of the significant increase, the 12-month PD should reach a minimum value. This criterion, supported by the concept of "low risk" introduced by the IFRS 9, can be specific to each sub-portfolio, albeit almost all companies share the same threshold.

However, from 2022, the concept of "low risk" was simplified and unified for all portfolios, with a 12-month PD of less than 0.3% or an internal rating of more than 7, on a scale of 1 to 9. From this level of PD, 200% relative increases in the PD lifetime are considered the only applicable value in all cases ("threefold criterion").

This resulted not only in an increase in the stage 2 portfolio, but also a healthy improvement in the portfolio's profile as new additions are characterised by lower PDs than the exposures classified in stage 2 before the changes were made.

Note that the review of the target PD affects mostly SMEs and individuals; i.e. the most diversified portfolios. This is because major customers are subject to individual assessment which, because of the health crisis, led to a significant volume of prospective reclassifications to stage 2 based on expert assessment including forward-looking information.

In sum, the changes explained result in a readjustment of cover between the stages, with a transfer of provisions to stage 3.

Disclosures and impacts of the war in Ukraine in the post-pandemic era

On 14 September 2022, the Director-General of the World Health Organisation (WHO) stated that the end to the pandemic was in sight, after the lowest recorded number of deaths since the start of the crisis. Given the uncertainty at close of 2021 because of the fast spreading omicron variant, this is undoubtedly a sign of the extraordinary progress in the fight against coronavirus, reliant on the efficacy of the vaccines, which guarantee peace of mind for the moment despite the sharp increase in cases in China.

Therefore, at least in terms of the health crisis, what many thought was a temporary shock has been confirmed. This was the theory behind the extraordinary measures taken by governments around the world aimed at slowing the spread of the virus while work was being done to come up with an effective remedy, at the same time protecting production and employment. The Government in Spain passed a raft of legislative initiatives in 2020⁶ and 2021⁷ including the rollout of 'aid instruments' in the form of legislative and non-legislative moratoria on loan repayments and government-backed liquidity facilities through the official credit institute (ICO). The Portuguese Government has also implemented a package of similar aid measures the past two years with the same objective. This involves moratoria for individuals and companies and lines of support for the economy in response to COVID-19 coordinated by the Mutual Guarantee Companies (SGM). Compared to Spain, it gives considerably greater weight to the use of moratoria.

These initiatives led to a sizeable portfolio of this type of aid instruments. At year-end 2021, the carrying amount of payments in moratoria for the Group stood at 2,068 million euros, of

⁶ Royal Decree-Laws 6/2020, 8/2020, 11/2020, 15/2020, 18/2020, 19/2020, 25/2020 and 26/2020

⁷ Royal Decree-Laws 3/2021, 5/2021 and implementation of the Code of Good Practices, approved on 11 May 2021 in a resolution by the Council of Ministers and set out in RDL 5/2021.

which 98.3% were past-due at that date. Therefore, their original repayment schedule had been recovered. Loans and advances under government-backed schemes at that date stood at 6,524 million euros. These represented new money, thereby increasing borrowings, especially in the sectors hit hardest by the health crisis that, as a result, had higher liquidity requirements to tackle the drop in activity.

Economic recovery did take place in 2021, although it was more moderate than originally expected by the organisations whose forecasts Bankinter used during this crisis as benchmarks, especially the European Central Bank (ECB) and the central banks of Spain, Portugal and Ireland, which liaise with the ECB. The reasons recovery was slower than anticipated were the series of ensuing waves of contagions that occurred during 2021 and the 'frictions' related to the rebound in activity seen in the last couple of months of 2021 in supply shortages and rising energy prices which, in turn, led to overall inflation, as noted by Banco de España in its December 2021 report on economic forecasts for the Spanish economy.

This slower-than-expected recovery prompted governments to take additional measures, which entail primarily extending the maturities and/or grace periods of the aid instruments, bearing in mind that as of April 2021 many of the grace periods would run out. And this was the main goal of the Code of Best Practices, set forth in Royal Decree-Law 5/2021, of 12 March, on new extraordinary measures to support business solvency as response to the COVID-19 pandemic, in Spain, and the *Linha Retomar* in Portugal⁸.

While the frictions undermined the recovery, war in Ukraine broke out on 24 February 2022. Using European Central Bank terminology, this gives rise to three types of economic effects:

⁸ Spanish Royal Decree 5/2021, of 12 March, ushered in a raft of extraordinary measures to keep afloat sustainable businesses that had been seriously affected by the health crisis. This involved support of 11 billion euros earmarked for direct aid (7 billion euros), financial debt restructuring support for companies (3 billion euros) and the establishment of a recapitalisation fund (1 billion euros) supplementing the fund already managed by SEPI. This Royal Decree set out the actions on the drawing board and announced the approval of a Code of Good Practices to contain the specific criteria for the effective implementation of these actions and proper coordination among creditors.

This Code of Good Practices was approved on 11 May 2021 in a resolution by the Council of Ministers and published on 13 May. Its main aim is to reinforce the solvency of viable businesses with debt endorsed by the government, so that productive activity carries on. Bankinter formally submitted its adherence to this Code of Best Practices on 1 June.

With the 1 October 2021 deadline looming of a large percentage of moratoriums granted, in Portugal, Banco Português de Fomento presented the "Linha Retomar" facility. This facility, with total guarantees to be provided of 1 billion euros, targets viable non-financial undertakings of any size through three mechanisms: restructuring of all loans under a moratorium, partial refinancing of all loans under a moratorium, or guarantee loan to cover liquidity requirements.

- First-round, for exposures to counterparties resident in any of the countries at war.
- Second-round, for exposures through investments or trade ties in Russia, Belarus or Ukraine.
- And third-round, for the knock-on effect of impacts related to rising energy, food and commodity prices on the overall economy.

The first- and second-round effects on Bankinter's lending portfolio have been very limited. Specifically, direct exposures to residents of Russia, Belarus or Ukraine are basically limited to mortgage-backed loans in the amount of €14.2 million at 31 December 2022. The potential third-round effects are the real concern, specifically their impact on economic recovery in the post-pandemic era.

Measures taken by the Spanish government to cushion the economic impact of the war in Ukraine include enactment of Royal Decree-Law 6/2022, of 29 March. This Royal Decree provides for the rollout of new government-backed guarantee and financial facilities, equivalent to those rolled out during the pandemic, for businesses and self-employed people affected by the war's economic effects. These facilities are broad reach, excluding the financial and insurance sectors only.

This was completed by the resolution of the Council of Ministers of 29 March amending the Code of Good Practices for the debt renegotiation framework with customers granted secured financing provided for in Royal Decree-Law 5/2021, of 12 March. The biggest change was the removal of the eligibility requirement for the mandatory extension of deadlines for government-backed transactions of a decline in revenue of at least 30% in 2020 from 2019. Also, self-employed professionals and SMEs in the agricultural, livestock, fishing and road transport sectors were given a six-month grace period for extensions to maturities applied for and granted as of 31 March.

The following tables provide a summary of legislative and non-legislative moratoria in Bankinter Group as at 31 December 2022 and 31 December 2021, respectively:

Legislative and non-legislative moratoria – 31.12.2022		Gross carrying amount, thousands of euros			Distribution by stages		
	Number of obligors	Total	Legislative moratoria	Unexpired moratoriums	1	2	3
Households		1,373,589	673,409	0	81.0%	15.6%	3.4%
Collateralised by residential immovable property		<i>1,278,846</i>	<i>646,429</i>	<i>0</i>	<i>82.0%</i>	<i>15.6%</i>	<i>2.4%</i>
Non-financial corporations		320,027	319,656	6,996	83.0%	14.5%	2.5%
Small- and medium-sized enterprises		<i>271,367</i>	<i>270,997</i>	<i>6,996</i>	<i>80.3%</i>	<i>16.9%</i>	<i>2.7%</i>
Collateralised by commercial immovable property		<i>140,699</i>	<i>140,616</i>	<i>5,161</i>	<i>83.7%</i>	<i>15.7%</i>	<i>0.6%</i>
Total loans and advances	19,178	1,702,518	1,001,966	6,996	81.5%	15.3%	3.2%

Legislative and non-legislative moratoria – 31.12.2021		Gross carrying amount, thousands of euros			Distribution by stages		
	Number of obligors	Total	Legislative moratoria	Unexpired moratoriums	1	2	3
Households		1,589,890	765,606	11,148	80.7%	16.5%	2.8%
Collateralised by residential immovable property		<i>1,460,992</i>	<i>730,043</i>	<i>10,159</i>	<i>81.3%</i>	<i>16.9%</i>	<i>1.8%</i>
Non-financial corporations		461,763	461,199	23,006	81.5%	7.4%	11.0%
Small- and medium-sized enterprises		<i>356,587</i>	<i>356,023</i>	<i>12,577</i>	<i>88.7%</i>	<i>9.6%</i>	<i>1.7%</i>
Collateralised by commercial immovable property		<i>202,971</i>	<i>202,874</i>	<i>18,886</i>	<i>70.5%</i>	<i>7.1%</i>	<i>22.4%</i>
Total loans and advances	22,257	2,068,190	1,243,342	34,153	81.0%	14.3%	4.7%

As illustrated, the gross carrying amount of the Group's moratoriums is 1,703 million euros, of which only 7 million euros has not expired. As for the distribution by stage, the percentage of stage 2 portfolio went up by one percentage point due to a pure denominator effect since the portfolio is becoming extinct as the exposure in this stage decreases. In terms of non-performing exposure, there is a substantial reduction in the ratio from 4.7% to 3.2% in 2022.

The following table sets out transactions with public guarantee schemes in response to the COVID-19 crisis as at 31 December 2022 and 31 December 2021, respectively:

Newly originated loans and advances subject to public guarantee schemes in the context of the COVID-19 crisis – 31.12.2022		Gross carrying amount (thousands of euros)			
	Number of obligors	Gross carrying amount (thousands of euros)	1	2	3
Households		56,337	97.3%	0.0%	2.7%
Non-financial corporations		5,657,234	87.6%	8.8%	3.7%
Total loans and advances	29,189	5,742,545	87.7%	8.7%	3.7%

Newly originated loans and advances subject to public guarantee schemes in the context of the COVID-19 crisis – 31.12.2021		Gross carrying amount (thousands of euros)			
	Number of obligors	Gross carrying amount (thousands of euros)	1	2	3
Households		67,792	99.0%	0.0%	1.0%
Non-financial corporations		6,424,919	93.3%	5.4%	1.3%
Total loans and advances	31,073	6,523,733	93.4%	5.3%	1.3%

This information refers to the entire Group and, as a result, includes loans backed by the ICO, CESCE and FEI (the latter two with a minor weight) and loans backed by Portuguese mutual guarantee companies in coordination with the Portuguese government. They all share similar characteristics and the same purpose. As illustrated, at end-year 2022, the gross carrying amount of the Group's moratoria amounted to 5,743 million euros, with a non-performing loan ratio of 3.7%, i.e. an increase of 2.4 percentage points in one year, of which 0.4 points can be attributed to the denominator effect. Even though a substantial part of the debt of these

instruments is ultimately guaranteed by the government, at year-end 2022, the Group recognised them as a single risk, so that their classification in any of the stages corresponds to a full amount. For this reason, at this date, the derecognition from the balance sheet of none of these exposures was considered since they are guaranteed.

The sum of moratoriums and facilities backed by government guarantee schemes represents 9% of eligible exposures. Analysing the distribution of aid by branches of activity, the wholesale and retail trade sectors stand out considerably, Next is manufacturing, given the relatively large scale of this sector aggregate, followed by accommodation and food service.

The set of measures implemented to date has clearly had a positive effect on containing the economic damage caused by the pandemic, which was exacerbated by the war in Ukraine. Evidence is the trend in cost of risk in 2021 and the first half of 2022, with an accumulated total in 2022 of 253.8 million (253 million euros recognised under "Impairment on financial assets not measured at fair value through profit or loss" and 0.8 million in "Provisions for commitments and guarantees given").

However, we must remain prudent because of how uncertain the current climate is, and the accumulated impacts. In fact, the rapid and strong interest rate hike and the loss of purchasing power as a consequence of the price increase may leave families with mortgage loans and low income in a particularly vulnerable position. That is why Spain approved RDL 19/2022, of 22 November, establishing a Code of Good Practices to alleviate the effects of higher interest rates on mortgages for first homes, amending RDL 6/2012, of 9 March, on urgent measures to protect mortgage holders without funds, and adopting other structural measures to improve conditions in the market for mortgage loans. This Royal Decree not only adapts the previous Code of Good Practices to the current situation but also introduces a new temporary and broader reaching Code of Good Practices. Considering that most of Bankinter's mortgage loans in recent years have been at a fixed interest rate, applying these frameworks (to which the Bank has adhered) should not have a significant impact on the Group's earnings.

Following the recommendation of the European Central Bank, Bankinter has been taking the quarterly forecasts published by the ECB for the European Union and the country-specific forecasts issued by the central banks, consistent with the former, as its benchmark since the start of the health crisis. Banco de España released its updated forecasts in April, June, October and December 2022 to include the new scenario caused by the war in Ukraine. Faced with continued inflationary pressures, which reach double digits, and the measures taken by central banks to control them with a substantial rate hike, these forecasts have started assuming slower growth of activity in 2023, together with still high inflation in the next year. The forecasts from December are summarised below:

Annual variation rate (%), unless otherwise indicated	Forecasts as at December 2022					
	2020	2021	2022	2023	2024	2025
GDP	-11.3	5.5	4.6	1.3	2.7	2.1
Harmonised consumer price index (HCPI)	-0.3	3.0	8.4	4.9	3.6	1.8
Unemployment rate (% of the active population) Annual average	15.5	14.8	12.8	12.9	12.2	12.0

*Source: Banco de España: Macroeconomic scenarios for the Spanish economy 2022-2025. Dec 2022

With these forecasts, recovery is pushed back from 2019 to 2024, with a major downward adjustment of growth in 2023, when pressure over prices will continue. However, forecasts for unemployment for 2022 improve based on Social Security registrations, which has been the underlying trend in all the forecasts published since September 2020. Unemployment is a key indicator to determine the expected losses of loan books of natural persons.

As remarked by Banco de España, this macroeconomic scenario is based on certain assumptions that may not materialise, with downward risk in activity growth and upward risk in prices. The economy may reach a stagnation situation with high inflation.

Since one of the most important focal points of risk is the change in energy prices, these unfavourable scenario would have an impact across Europe and, therefore, the countries where Bankinter operates. Even if the underlying assumptions regarding energy markets are correct, there are other elements of risk, including the possible activation of a redistributive spiral that increases the risk of sustained price growth and forces more aggressive policies that could, overall, significantly affect both economic activity and employment.

An important element in supporting economic recovery is also the implementation of the EU's Next Generation Fund programme, which has been delayed and may have a lower take-up than expected. The European Union approved the national recovery plans presented by Spain and Portugal. This will enable the effective application, between 2021 and 2026, of 70 billion euros in aid and 70 billion euros in loans to Spain, and 14 billion euros of aid and 2,600 million euros of loans to Portugal.

In short, even if the scenario proposed by the Banco de España, which was developed in coordination with the European Central Bank and is therefore in line with the hypotheses of other central banks such as Ireland's or Portugal's, proves true, the combined effect of higher prices and higher interest rates undermines both the cash flow of companies and the disposable income of individuals, affecting their ability to pay. Therefore, an uptick in non-performing loans and the cost of risk is very likely in 2023. However, if the central scenario materialises and growth continues, this uptick would be moderate.

In 2020, as a consequence of the pandemic, the Group made a major provision allocation due to the change in the macroeconomic scenario, with a particular characteristic: under the assumption of a transitory shock, deploying aid measures would have a positive effect on containing the effects of the pandemic. As a consequence, a forward-looking assessment of expected losses had to consider both the decline in activity in 2020 and the subsequent recovery expected for the following years, and how this recovery, together with these measures, could support the economy's productive fabric. This extraordinary allocation was called "macroeconomic effect" and was not considered an "overlay adjustment" since it derived directly from applying internal provision models. In 2021, macroeconomic projects came to light that reflected growing optimism backed by the evidence of the progress and efficacy of the vaccination process, the economy's performance and the European recovery funds. The application of these new scenarios resulted in a more favourable estimate of expected losses. However at the same time, emphasis was placed on greater uncertainty insofar as there were forecasts of a slower pace of recovery of the activity lost with the pandemic, happening in 2021 and 2022 and, to a lesser extent, in 2023. Faced with this situation, at year-end 2021, the Group recognised an overlay adjustment amounting to 141 million euros that was not aimed at covering the impacts of an adverse scenario; instead, it was meant to cover the model risk associated with the estimates that, against such a particular situation as the health crisis, was very high.

At year-end 2022, the Group has decided to keep an overlay adjustment of additional provisions amounting to 135.1 million euros for the same reasons; it is determined as the difference between the estimate adjusted to the updated macroeconomic scenario and an estimate for a more pessimistic scenario.

This adjustment has not impacted the staging of financial instruments. During the pandemic, this staging was primarily forward-looking and with a strong link to expert assessment, both individually and collectively.

Aside from the risks mentioned above that may lead to a reduction in activity and an increase in inflation, we must not dismiss the background situation: a major shock caused by the coronavirus, mitigated by the assumption that it would be temporary, hence the ability of activity to return to pre-crisis levels relatively quickly. A slower economic recovery could have considerable implications for customers affected by the pandemic, a situation compounded by increased financial and non-financial costs. Therefore, greater growth does not necessarily justify lesser losses when growth is slower in the context of recovering lost activity and when businesses had to assume more debt to finance their drop in production in 2020.

In any case, Bankinter maintains its activity and has increased its operating income before provisions in 2021 by 13.9% vs 2020, and by 16.4% in 2022. In addition, the pandemic alone has required a continuous exercise in risk management preparedness, not mention reinforcement of the risk function with additional resources and tools.

Performance in the year

As explained in the previous section, 2022 saw uncertain economic recovery due to supply chain disruptions and the energy crisis, caused by the relaunch of the economic activity after the health crisis and due to the war in Ukraine.

Against this backdrop, Bankinter's activity remained buoyed by lending growth, mostly in the corporate banking and residential mortgage businesses, which featured the activity rolled out the EVO Banco subsidiary in Spain and Avantmoney in Ireland.

Therefore: Loans and advances to customers at amortised cost increased by 8.3% (Note 10) and eligible exposures (which include off-balance-sheet exposures) increased 8.9%.

Underperforming loans increased by 35.2% due mostly to the reclassification of customers in the sectors affected most by the health and energy crisis. Non-performing exposures rose by 2.4% and the NPL ratio fell to 2.10%; i.e. a reduction of 6% in the year. This is 62% of the sector average in Spain (3.77% according to Banco de España data from October 2022).

Provisions for credit risk rose by 6.9%, as explained at greater length in the section on the impacts of the war in Ukraine in the post-pandemic context.

At the end of December 2022, the foreclosed asset portfolio stood at 123 million euros, representing 0.1% of total credit risk, after falling by 28% during the course of the financial year.

Asset quality – Credit risk

Thousands of euros	31.12.2022	31.12.2021	Change	% change
Eligible exposures	82,426,636	75,667,818	6,758,818	8.93%
Stage 1 (Performing loans)	77,840,753	71,864,821	5,975,932	8.32%
Stage 2 (Underperforming exposures)	2,851,278	2,109,457	741,821	35.17%
Stage 3 (non-performing exposures)	1,734,606	1,693,541	41,065	2.42%
Credit risk allowances and provisions	1,150,700	1,076,381	74,319	6.90%
Stage 1 (Performing loans)	175,134	203,711	-28,576	-14.03%
Stage 2 (Underperforming exposures)	108,039	102,973	5,066	4.92%
Stage 3 (Non-performing exposures)	867,527	769,698	97,829	12.71%

Foreclosure coverage (%)	56.01%	52.60%	3.41%	6.47%

Non-performing loan ratio (%)

Source: Banco de España, October 2022 for industry figure.

Following is a description of the trend and main figures for eligible exposures in Spain by internal business segments:

Natural persons

Lending to individuals increased by 6.8% in 2022 in Spain. The individual lending portfolio totalled 33,897 million euros at year-end, with an NPL ratio of 1.77%.

The residential mortgage loan book for individuals showed a *loan-to-value* (LTV) ratio of 50% at 2021 year-end and 88% of these loans were secured by the primary residence of the owners. The NPL ratio of this portfolio ended the year at 1.4%. The average effort (measured as the proportion of income that the customer allocates to paying mortgage loan instalments) remained extremely low (23%).

Bankinter Consumer Finance contributed with an investment of 2,828 million euros in consumer lending in Spain, an increase of 26% year-on-year and an NPL ratio of 7.2%. Risk-adjusted margins, and NPLs and NPL ratios remained under control and in line with typical levels for this type of business.

Corporate banking

Credit risk in Corporate Banking rose by 9.7% to 19,684 million euros, with an NPL ratio of 0.57%. In 2022, Bankinter has prioritised growth in this segment, which is more resilient to the adverse economic circumstances.

Small- and medium-sized enterprises

The SMEs Banking (small and medium-size enterprises) segment grew by 4.7%, ending the year with a loan book of 15,881 million euros and an NPL ratio of 5.5%.

EVO Banco

Evo Banco conducts its banking business in the natural persons segment. It contributed to the Group in Spain an additional credit risk of 2700 million euros, an increase of 45% on the previous year and an NPL ratio of 0.51% at the end of the reporting period.

Portugal

Bankinter Portugal's loan book contributed 8,634 million euros of exposures to the balance sheet at year-end, an increase of 13.4% in the year, and an NPL ratio of 1.31%.

Ireland

Lending activity in Ireland is conducted through the subsidiary Avant Money Plc, integrated into Bankinter Consumer Finance. At the end of the reporting period, Avantmoney had 2,258 million euros in credit risk, of which 1,560 million are house mortgages and 698 consumer lending. Avantmoney grew by 132% in the period, with an NPL ratio of 0.40% at the end of the reporting period. The weight of the mortgage business means its risk profile is very moderate.

Maximum exposure to credit risk

The table below shows the maximum level of exposure to credit risk assumed by the Group at 31 December 2022 and 2021 for each type of financial instrument, without deductions for collateral or other credit enhancements to ensure compliance by borrowers.

At 31 December 2022

Types of instruments	Thousands of euros						Total
	Asset balances					Memorandum accounts	
	Financial assets held for trading	Financial assets at fair value through other comprehensive income	Financial assets at amortised cost	Non-trading financial assets mandatorily at fair value through profit or loss	Derivatives – hedge accounting

Ageing analysis of past due amounts receivable from unimpaired financial assets at 31 December 2022 and 2021:

	Thousands of euros	
By type of guarantee or collateral	31.12.2022	31.12.2021
Transactions with mortgage collateral	4,260	12,378
Transactions with other collateral	796	818
Other	99,494	42,285
<i>of which Bankinter branch in Portugal</i>	1,835	1,091
Total	104,550	55,481
By term		
0-30 days past-due	84,849	42,843
30-60 days past-due	12,323	7,811
60-90 days past-due	7,378	4,827
Total	104,550	55,481

The interest receivable recognised in the balance sheet at 31 December 2022 related to unimpaired past-due transactions payable amounted to 1,914 thousand euros (2021: 1,394 thousand euros).

Risk mitigation

Key criteria for approval in the Group's risk policy are payment capacity and solvency, with collateral and guarantees providing additional assurance of obligations. Collateral and guarantees should not be the primary means of recovering amounts from transactions, and not the determining factor in the decision regarding approval. However, provided they meet certain requirements, they provide an element of credit-risk mitigation and are required where possible.

For accounting purposes, effective collateral and guarantees include collateral and personal guarantees shown to be valid as a means of mitigating risk considering the time needed to realise them, the ability to do so, and past experience.

Personal guarantees, barring certain exceptions, cover the total amount of the transaction and imply the Bank's direct and joint liability. The guarantor's payment capacity and solvency to meet the obligation guaranteed is assessed. Personal guarantees are particularly relevant in transactions with businesses, often requiring the guarantee of the owners.

Real estate mortgages are generally first mortgages, constituted and registered in favour of the Bank. The properties provided to the Bank as collateral are generally located in urban areas and are highly liquid.

Collateral in the form of pledged financial assets are generally deposited at the Bank and operations with them are blocked. More or less strict coverage criteria are applied depending on the nature and liquidity of the pledged assets.

In line with regulations, the appraisals of real estate collateral are updated as follows:

Performing portfolio: The policy for updating the portfolio of residential and commercial properties (commercial premises, warehouses and offices) is to update the appraisal where there are significant declines in value through full individual appraisals or automated appraisals by independent appraisal companies. For individual assets, such as land or plots, or assets used for financial exploitation, and all transactions with significant risk, a full individual appraisal is made every three years, or less if there are significant declines in value. Potential declines in value are verified annually.

Transactions classified as underperforming are updated annually. The appraisal of collateral and guarantees for non-performing loans is updated on classification as non-performing and annually thereafter. The appraisal of assets foreclosed or received in payment of debt is updated at the time of foreclosure or receipt and annually thereafter.

Bankinter's Risk Control function verifies compliance with the procedure for approving collateral and guarantees and the estimate of value approved by the board of directors.

Non-performing loans and foreclosed assets

The Group defines its exposure to credit risk in terms of eligible exposures, as indicated above. Eligible exposure represents the risk assumed in relation to the borrowers, as well as the committed amount drawable or off-balance-sheet risk.

At year-end 2022, total non-performing eligible exposures stood at 1,734 million euros, up 41 million euros (or 2.4%) from the year before. The NPL ratio was 2.10% at year-end, with a reduction of 13 basis points (6.0%).

The portfolio of forbearance transactions at the end of 2022 was 779 million euros, considering as forbearance any modifications in the credit risk conditions.

Flow of non-performing loan balances in the year:

	Change in non-performing exposures (including contingent risk)			
Thousands of euros	31.12.2022	31.12.2021	Change	% change
Opening balance	1,693,541	1,685,207	8,333	0.49
Net additions	160,347	179,410	-19,063	-10.63
Transfers to write-offs of the principal	-119,282	-171,076	51,794	-30.28
Balance at the end of the period	1,734,606	1,693,541	41,065	2.42
Impairment allowances	1,150,700	1,076,381	74,319	6.90

Write-offs in the year

Thousands of euros	Movement of write-offs	
	31.12.2022	31.12.2021
Balance at the beginning of the year	1,074,204	1,021,535
Additions (including contractually requirable interest)	137,635	202,153
Disposals	91,492	149,485
For recovery in cash	8,889	7,853
For disposal of written-off assets	37,951	98,983
For forgiveness, statute of limitations and other	44,652	42,648
Balance at the end of the year	1,120,347	1,074,204

Movements between stages 1, 2 and 3 in 2022 and 2021 in the gross carrying amount of the loans and advances of the portfolio of financial assets at amortised cost (Notes 10 (a), (b)) and changes in the corresponding impairment allowances:

	Loans and advances			
	Stage 1	Stage 2	Stage 3	Total
Gross carrying amount at 31.12.2021	66,019,507	2,022,468	1,634,172	69,676,147
Additions, disposals and changes in balance	7,652,335	(437,458)	(184,251)	7,030,626
Transfers between stages	(1,457,301)	1,105,878	351,423	-
<i>Removals from Stage 1</i>	(2,118,670)	2,078,702	39,968	-
<i>Removals from Stage 2</i>	624,290	(1,035,443)	411,153	-
<i>Removals from Stage 3</i>	37,079	62,619	(99,698)	-
Write-offs	-	-	(115,177)	(115,177)
Gross carrying amount at 31.12.2022	72,214,541	2,690,888	1,686,167	76,591,596

	Loans and advances			
	Stage 1	Stage 2	Stage 3	Total
Gross carrying amount at 31.12.2020	63,024,120	1,562,772	1,612,566	66,199,459
Additions, disposals and changes in balance	4,004,746	(235,547)	(126,638)	3,642,561
Transfers between stages	(1,009,360)	695,243	314,117	-
<i>Removals from Stage 1</i>	(1,504,790)	1,467,831	36,959	-
<i>Removals from Stage 2</i>	462,307	(831,572)	369,265	-
<i>Removals from Stage 3</i>	33,123	58,984	(92,108)	-
Write-offs	-	-	(165,873)	(165,873)
Gross carrying amount at 31.12.2021	66,019,507	2,022,468	1,634,172	69,676,147

(*) The gross carrying amount is the sum of the carrying amount and the amount of impairment of the assets. Therefore, it includes the value of the discount on the acquisitions of financial assets from Portugal and other valuation adjustments from loans and advances to customers and credit institutions. (Note 10)

At 31 December 2022, including these figures, the "Gross carrying amount" of the portfolio of impaired loans and advances acquired amounted to 22,690 thousand euros (31 December 2021: 37,914 thousand euros), representing an average discount of 59.9% (31 December

2021: 55.3%) with respect to the principal owed in these exposures, plus an impairment loss of 6,423 thousand euros (31 December 2021: 4,982 thousand euros).

	Loans and advances. Impairment losses			
	31.12.2022			
	Stage 1	Stage 2	Stage 3	Total
Closing balance at 31.12.2021	176,946	89,224	720,601	986,771

<i>Removals from Stage 3</i>	6,831	13,580	(20,411)	-
Write-offs	-	-	(109,653)	(109,653)
Closing balance at 31 December 2021	176,946	89,224	720,601	986,771

Despite the growth of the gross carrying amount of loans and advances classified as Stage 1, in 2021 and 2022, the volume of provisions in this stage went down. In 2021, the Group did not release provisions during the year as a consequence of better expectations linked to the end of the pandemic. It maintained an overlay adjustment of 141 million euros, as explained in the section "Disclosures and impacts of the war in Ukraine in the post-pandemic era" of this Note. And it did not introduce significant adjustments to the procedures for estimated expected losses. The table above also shows that the transfers between stages only represent a new removal from stage 1 of around 3 million euros. Therefore, the reduction in the average coverage in this stage can only derive from the portfolio's rotation to a lower risk level. There has been an increase in exposure with mortgage loans exceeding 4 billion euros, particularly the house loan portfolio for natural persons, with an increase of 2,515 million euros.

In 2022, there was a greater reduction of provisions in stage 1 when compared to 2021. Again, this is not due to a more favourable forward-looking scenario since the overlay adjustment is still at 135.1 million euros. The main reason for the changes in the estimate of expected losses are, inter alia, a readjustment of coverage in the different stages, as explained in detail in section "Update of provision models" of this Note. Also, as it happened in 2021, there was a rotation effect perfectly visible in tables "Distribution of loans and advances to customers by activity (carrying amount)" for 2021 and 2022, presented in Note 47 to this annual report. Specifically, exposures with non-financial companies, primarily SMEs and individual entrepreneurs, lost relative weight in favour of the portfolio of natural persons and other financial firms.

The gross balance of the portfolio of foreclosed assets at year-end stood at 123 million euros, with a reduction in the year of 48 million euros.

The real estate assets are highly diversified geographically and by type of property, which facilitates their sale.

The portfolio of real estate portfolio assets does not include hardly any developments in progress and the weight of rural land is negligible.

Foreclosed assets				
Thousands of euros	31.12.2022	31.12.2021	Change	% change
Opening balance	170,655	227,145	(56,490)	(24.87)

Net balance of foreclosed assets	54,052	80,888	(26,836)	(33.18)

Forbearance policy

The Group's refinancing policy still conforms to best practices set out in prevailing legislation. The main objective is to recover all amounts due, which means any amounts considered unrecoverable must be recognised immediately.

The Group's refinancing policy described below has not been altered by the COV SARS 2 health crisis. The Group has simply followed the recommendations of banking regulators and supervisors to make appropriate use of the flexibility implicit in the regulatory framework, and has sought to avoid automatically recording measures deployed to support families and companies as a result of the pandemic as refinancing arrangements. Both the legislative and industry moratoriums and the government-backed liquidity facility schemes described in last section of this Note should be considered macroprudential mechanisms designed essentially to

help customers cope with the temporary difficulties arising from the health crisis. It is not automatically assumed that they should be considered as refinancing and that they therefore constitute a significant increase in risk.

Forbearance measures must take into account:

- An up-to-date and **individualised assessment** of the economic and financial situation of the borrowers and guarantors, as well as their capacity and willingness to pay.
- The situation and effectiveness of the guarantees and collateral provided.
- Past **Experience** with the borrower: sufficiently extensive history of debt repayment or, failing that, of an equivalent amount of repayment of the principal.

The refinancing or restructuring of transactions that are not current with payments **will not interrupt the period of their default status**, nor will it result in them being reclassified-

The solution that best adapts to the situation of the obligor will be chosen through individual analysis from among the potential forbearance options, for the purpose of recovering all amounts owed. In this regard, a suitable repayment plan without any grace periods will be chosen, unless there are short-term liquidity restrictions or a disposal plan needs to be executed to cover all or part of the debt. In general, measures that allow payments to be deferred in the short term or leave open refinancing terms and conditions in the long term must be based on the temporary nature of the situation of the obligors that warranted adopting these types of measures and on the clear willingness of customers to fulfil their payment obligations.

When a transaction is refinanced, it will be classified under one of the following categories:

- Underperforming refinancing transaction: Those for which there is objective evidence that the recovery of all outstanding amounts is highly probable. In this regard, the following factors will be taken into consideration:
 - Grace period of less than 24 months.
 - Existence of a suitable repayment plan. In the case of transactions with individuals structured via monthly payments, the debt burden should not exceed 50 per cent.
 - Addition of guarantors of unquestionable solvency, or of new effective guarantees or collateral.
- Non-performing forborne exposures: Transactions where there is evidence of weaknesses in the borrower's repayment capability will be classified as non-performing. In this regard, the following factors will be taken into consideration:
 - They rely on an inappropriate payment plan. For example, a payment plan is not appropriate when failure to pay is repeated, the plan has been changed to avoid

failures to pay, or it is based on expectations not backed by macroeconomic forecasts.

- The grant of grace periods on capital repayment exceeding 24 months.
- The need to write off amounts from the balance sheet estimated as irrecoverable for the arrangement to continue.
- Failure to provide new effective guarantees or collateral or where not all outstanding interest is received.
- Acceptability of previous forbearance measures.

Borrowers will be classified as non-performing unless there is evidence of sufficient capacity to fulfil their contractual obligations.

Distress restructuring: Due to Bankinter's size and risk management, in general it appears as a minority entity among the creditors in debt restructuring processes and, therefore, it does not have a leading role in these processes. However, the various proposals submitted must be assessed for the purpose of defending the one with greater expectations of recovering the debt within a context of uncertainty. The conditions under which business continuity is viable and likely, as well as the reasonableness of the disposal plans and their implications, must therefore be analysed in detail.

According to the IFRS 9, under certain circumstance, amending a contract may lead to the source account being derecognised from the balance sheet and the destination account being considered a "new" transaction (paragraph B.5.5.25). This paragraph is generally interpreted as meaning that the recognition and derecognition from the balance sheet is justified from a substantial change of the financial instrument's conditions.

Consequently, the Bank's internal procedures set out that refinancing and restructuring can be considered new transactions only if the following conditions are met simultaneously, duly justified:

1. Non-performing transactions are refinanced or, otherwise, the new refinancing transaction is reclassified as non-performing exposure.
2. The contract's terms are changed substantially. This includes:
 - Adding parties that substantially change the transaction's risk profile
 - Presenting additional guarantees that substantially improve the recovery expectations in case of default
 - Refinancing is the result of court or bankruptcy proceedings that result in debt settlement and a sustainability agreement relating to part of the debt.

Reclassification of forbearance

The reclassification between forbearance categories requires an exhaustive review of the equity and financial position that concludes that it is not likely that the holder will encounter financial difficulties. In this regard, it must assess:

- For reclassification from non-performing forborne exposure to underperforming forborne exposure:
 - That 12 months have elapsed since the date of the refinancing
 - That the renegotiated principal amount has decreased since the date of the transaction and there should be no past-due amounts from that time.
 - That the holder does not have any other amounts more than 90 days past due.
- For reclassification from underperforming to performing:
 - That 24 months have elapsed from the date of the forbearance or, if later, or from the date of reclassification as non-performing loans
 - That the borrower has settled an amount equivalent to the amount past due on the date of the forbearance and there are no past-due amounts from that point on.
 - That the holder does not have any other amounts more than 30 days past due.

Accounting classification

Refinancing means any transaction, irrespective of the borrower or the guarantees or collateral given, granted or used for economic or legal reasons related to the -current or foreseeable-- financial difficulties of the borrower(s) in order to cancel one or more transactions granted by the Bank or by other Group entities to the borrower(s) or to one or more other companies of the borrower's economic group, or whereby such transactions are brought totally or partially up to date with payments, so as to help the borrower(s) under the cancelled or refinanced transactions repay their debts (principal and interest) because they cannot, or it is thought that they will not be able to comply in time and form with the terms of the arrangement.

Regarding modifications of terms and conditions, transactions can be classified as:

- **Refinancing transaction:** any transaction, irrespective of the borrower or the guarantees or collateral given, granted or used for economic or legal reasons related to the -current or foreseeable-- financial difficulties of the borrower(s) in order to cancel one or more transactions granted by the Bank or by other Group entities to the borrower(s) or to one or more other companies of the borrower's economic group, or whereby such transactions are brought totally or partially up to date with payments,

so as to help the borrower(s) under the cancelled or refinanced transactions repay their debts (principal and interest) because they cannot, or it is thought that they will not be able to comply in time and form with the terms of the arrangement.

- **Refinanced transaction:** a transaction that is brought totally or partially up to date with payments as a consequence of a refinancing transaction carried out by the Bank or another entity in its economic group.
- **Restructured transaction:** a transaction in which, for economic or legal reasons relating to the current or foreseeable financial difficulties of the borrower(s), the financial terms and conditions are modified in order to help the borrower(s) under the cancelled or refinanced transactions repay their debts (principal and interest) because they cannot, or it is thought that they will not be able to comply in due time and form with its conditions, even if such modification is envisaged in the contract. In any case, the following transactions shall be considered to be restructured: transactions involving a 'haircut' or debt forgiveness or where assets are received to reduce the debt, or where the terms and conditions are modified to extend the maturity, change the repayment schedule to reduce the amount of the instalments in the short term or reduce their frequency, or establish or extend a grace period for principal, interest or both, except when it can be shown that the conditions are modified for reasons other than the borrower's financial difficulties and are analogous to those applied in the market at the date of the modification to transactions granted to customers with a similar risk profile.
- **Rollover transaction:** a transaction executed to replace another previously granted by the entity itself without the borrower having any financial difficulties or foreseeably having any in the future, i.e. the transaction takes place for reasons other than refinancing.
- **Renegotiated transaction:** a transaction whose financial terms and conditions are changed without the borrower having any financial difficulties or foreseeably having any in the future; i.e. the terms and conditions are changed for reasons other than restructuring.

In any case, for a transaction to be classified as a rollover or as renegotiated, the borrowers must be able to obtain transactions on the market and at the date of the rollover or renegotiation for a similar amount and under substantially similar financial conditions to those applied by the Bank, and these must also be in line with those granted at that date to other borrowers with a similar risk profile.

Structural and market risks

Structural liquidity risk

Structural liquidity risk is associated with the Entity's ability to meet the payment obligations it acquires and to fund its investment lending business. The Bank actively monitors its liquidity position and forecasts, as well as the actions to taken both in business as usual market situations and in exceptional circumstances arising due to internal causes or market behaviours.

The ALCO is in charge of managing this risk by delegation of the board of directors.

The liquidity management principles, strategies and practices are set out in the Liquidity Planning Framework and that the ensure that the Entity has sufficient liquidity to meet its day-to-day liquidity obligations and to cope during a period of liquidity stress. Liquidity management is underpinned by the following strategic principles:

- Limited reliance on wholesale markets to fund operations through balanced growth in retail funds.
- Diversification of wholesale funding sources by instruments and markets, and maintenance a balanced maturity schedule.

To comply with these principles, the following strategic liquidity management lines have been established:

- Maintaining a customer funding gap with a loan-to-deposit (LtD) ratio below 120%
- Being present in all wholesale markets, with frequent issues depending on market needs and opportunities
- Offering maximum transparency to investors and regularly providing them with information on Bankinter
- Keeping an adequate wholesale maturities profile and avoiding credit risk concentrations

- Maintaining a sufficient buffer of liquid assets to cover a possible shutdown of wholesale markets

Customer funds increased by more than 2,000 million euros in 2022, with contributions from all business areas. Consequently, the figure for customer funds remains considerably higher than lending, with the customer loan ratio at 102.8% at the end of the reporting period.

In wholesale funding, a 1,000 million euro covered bond issue matured in August and was partially replaced with a 750 million euro covered bond issue in November, with strong take-up by wholesale investors. In December, 2,550 million euros from the TLTRO liquidity auction matured.

As a consequence of these changes in liquidity, the liquidity buffer was lower than in the previous year. However, the liquidity position at year-end 2022 made it possible to keep LCR levels substantially above the internal and regulatory limits, with 193.54% at year end.

Wholesale funding maturities are distributed over time so as to minimise refinancing difficulties.

Moreover, the measures used by the market risks department to control liquidity risk include verifying compliance with the limits set by the board and delegated to the market risk offers and the ALCO. The market risks department calculates the limits based on information prepared for the various regulators.

The limits are grouped into large classes:

1) Determining the liquidity buffer

The Bank uses both the definition of regulatory LCR and a similar ratio extended to 90 days and with a definition of liquid assets in accordance with assets accepted by the European Central Bank as collateral for liquidity. Another reference for calculating the liquidity buffer is the schedule of maturities of wholesale issues over the ensuing months.

2) Wholesale funding concentration ratios

With the aim of not subjecting Bankinter to stress as a result of a possible sudden shutdown of the wholesale markets, limits are established on short-term wholesale funding, as well as on the concentration of issue maturities.

3) Ratio of stable deposits to total loans.

In order to reduce the reliance on wholesale funding, a minimum ratio of stable deposits to total loans is established. In order to establish the stability of the deposits, the regulatory definition of the net stable funding ratio (NSFR) and the experience of the Spanish financial sector are combined.

In addition to the limits established by the board of directors, trends in the liquidity gap or liquidity map are monitored, and information is obtained and analyses performed on the specific situation of balances resulting from commercial transactions, wholesale maturities, interbank assets and liabilities and other funding sources. These analyses are performed both under normal market conditions and simulating different scenarios of liquidity needs that could arise from different business conditions or changes in market conditions.

For contingent liabilities shown below, 16,930 million euros are stated as demand deposits, but this does not mean they will be demanded in the immediate future. Credit accounts, which make up the bulk of the amount, are drawn by customers depending on their financing needs over time.

Contingent liabilities

Figures at December 2022 in millions of euros	On demand	1D at 1M	1M at 3M	3M at 12M	12M at 5Y	> 5Y	TOTAL

Commitments drawable by third parties	16,370	-	-	-	-	-	16,370
							0

Bankinter has implemented a liquidity contingency plan that specifies the persons responsible and the lines of action to take in order to raise liquidity in the event of adverse conditions in financial markets. This plan identifies three levels of alert: minor problems, serious problems and severe liquidity crisis. Besides including the procedure for identification, it outlines the action to take for persons affected in each scenario. The activation of the contingency plan is also decided by the ALCO. The alerts included in the contingency plan are monitored by both the balance sheet management and market risk areas, which notify the ALCO members in the event of deterioration of the objective conditions identified.

Structural interest rate risk

Structural interest risk is the Group's exposure to changes in market interest rates arising from the different timing structure of maturities and repricing of global balance sheet items.

The Group actively manages this risk to protect net interest income and preserve the Group's economic value in the event of fluctuations in interest rates.

To control exposure to structural interest rate risk, the Group has established a limits structure that is reviewed and approved annually by the parent company's board of directors in accordance with the Group's risk management strategies and policies.

The Group has tools to control and monitor structural interest rate risk. The main measurements used by the Group to manage and control the interest rate risk profile approved by the board of directors of the parent company are as follows:

a) Sensitivity of net interest income:

The exposure of net interest income to different scenarios of interest rate fluctuations and for a 12-month time horizon is measured monthly using dynamic measurements. The sensitivity of net interest income is obtained as the difference between the net interest income projected with the market curves at each analysis date and the net interest income projected with the interest rate curves altered in different scenarios, of both parallel movements of interest rates and changes in the slope of the curve.

b) The sensitivity of Bankinter's net interest income to parallel shifts of 100 basis points in market interest rates is approximately +6.1% for increases and -6.2% for decreases, both for a 12-month horizon.

c) Sensitivity of economic value:

This is a supplementary measure to the two previous measures and is calculated monthly. It allows the Group to quantify the exposure of its economic value to interest rate risk, and it is obtained as the difference between the net present value of the items sensitive to the interest rates calculated using the interest rate curves in different scenarios and the curve quoted in the market at each analysis date.

The sensitivity of economic value to parallel shifts of +/- 100 basis points was +0.9% and -2.1%, respectively, of own funds at year-end 2022.

Management assumptions were used to calculate both measures, considering negative interest rates, except for items with a Euribor floor.

Market risk

The board of directors delegates proprietary trading in financial markets to the general capital markets management area through the trading area. The financial instruments traded must be sufficiently liquid and be associated with hedging instruments. The risk that may arise from managing the Bank's proprietary accounts relates to changes in interest rates, stock market prices, exchange rates, volatility and credit spreads.

The board of directors delegates to the ALCO the continuous monitoring of the proprietary trading activities carried out by treasury's trading area and establishes maximum limits for authorisation of the possible excesses that may occur in this activity.

Market risk, which reports to the managing director of risk/CRO, independently measures, monitors and controls the Entity's market risks and the limits delegated by the board.

Market risk is measured mainly using the Value at Risk (VaR) methodology.

Value at Risk (VaR)

Value at Risk (VaR) is defined as the maximum expected loss in a given portfolio of financial instruments, in normal market conditions, for a specific confidence interval and time horizon as a result of variations in market prices and variables.

VaR is the principal indicator daily by Bankinter to comprehensively and globally measure and control exposure to market risk due to interest rates, equity, exchange rates, volatility and credit.

The historical simulation approach is used to measure VaR. VaR is calculated with a 95% confidence interval and a 1-day time horizon, although additional monitoring is carried out with other confidence intervals.

Set out below are comparative figures of VaR by risk factor for 2022 and 2021 of the Group's positions in overall figures and by portfolio:

VaR financial assets held for trading in 2022		VaR financial assets held for trading in 2021	
Millions of euros	Last	Millions of euros	Last
Interest rate VaR	0.44	Interest rate VaR	0.46
Equity VaR	1.13	Equity VaR	0.40
Exchange rate VaR	0.33	Exchange rate VaR	0.06
Volatility rate VaR	1.26	Volatility rate VaR	0.40
	2.55		0.71

VaR financial assets at fair value through other comprehensive income 2022		VaR financial assets at fair value through other comprehensive income 2021	
Millions of euros	Last	Millions of euros	Last
Interest rate VaR	13.03	Interest rate VaR	0.90
Equity VaR	-	Equity VaR	-
Exchange rate VaR	-	Exchange rate VaR	-
	13.03		0.90

VaR non-trading financial assets mandatorily at fair value through profit or loss 2022		VaR non-trading financial assets mandatorily at fair value through profit or loss 2021	
Millions of euros	Last	Millions of euros	Last
Interest rate VaR	0.04	Interest rate VaR	0.00
Equity VaR	0.10	Equity VaR	0.08
Exchange rate VaR	-	Exchange rate VaR	-
	0.11		0.08

Moreover, the VaR of the portfolio positions of the Bankinter Luxembourg subsidiary are monitored on a monthly basis using the historical simulation approach. The estimated VaR of Bankinter Luxembourg in its financial assets at fair value through other comprehensive income for 2022 was 1.77 million euros.

Operational risk

Operational risk is the risk of incurring losses from failed internal processes, people and systems or from external events, including legal risks. These are risks encountered in processes and generated internally by people and systems or that arising as a result of external agents, such as natural disasters.

Bankinter's operational risk management model is the "standardised approach" in accordance with prevailing solvency regulations. This method requires the existence of systems for identifying, measuring and managing operational risks with prior authorisation by Banco de España and an annual audit. Bankinter ensures access to best sector management practices by participating in the Spanish Operational Risk Consortium (Consortio Español de Riesgo de Operacional), a forum of financial institutions for sharing experiences regarding operational risk management.

Principles of action and management framework

With a view to achieving an adequate system for managing operational risk, Bankinter has established the following basic principles of action:

- The main goal is to identify and mitigate the major operational risks, seeking to minimise any possible losses.
- Systematic procedures are defined for assessing, analysing, measuring and reporting risks.
- In exploring the Bank's operations to inventory risks, the business units are chosen as the analysis unit, so that after analysing their risks, the institution's total risks are arrived at by aggregation.

The main elements of Bankinter's operational risk management framework are:

- Identification and assessment of risks, by developing risk maps that estimate the importance of the risk and assess the appropriateness of its control environment.
- Registration of loss events, with information on their management.
- Preparation of continuity and contingency plans, outlining the alternative procedures to business as usual to restore critical services in the event of interruptions.
- Generation and dissemination of management information adapted to the needs of each governing body.

Governance structure

Bankinter follows a decentralised model in which ultimate responsibility for managing operational risk falls on the respective business and support units.

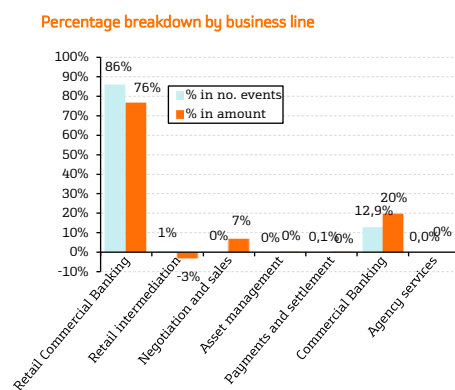

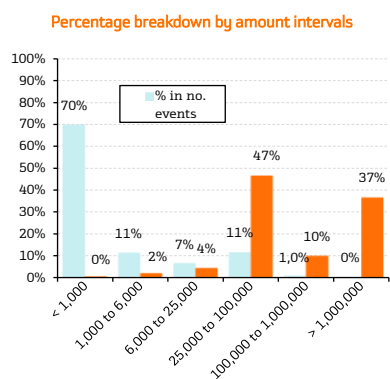

For governance purposes, the following control bodies and lines of responsibility have been established:

- Board of directors: It approves the policies and the management framework, establishing the level of risk that Bankinter is willing to assume.

- Risk and compliance committee: It assumes the following operational risk management functions:
 - Promote the implementation of operational risk management policies.
 - Monitor the significant operational risks.
 - Resolve conflicts of responsibility and decide on the proposals made by the operational risk area.
- The products and operational risk committee. It assumes the following operational risk management functions:
 - Oversee compliance with procedures for identifying and assessing operational risks associated with the launch of new products and business lines. Authorise or reject, as appropriate, the sale of products with relevant operational risks.
 - Review operational risks associated with the sale of existing products, their sales policies and the materialisation of these risks in relations with customers, partners and suppliers.
 - Monitor plans for mitigating the risks associated with launching and selling products and services.
 - Monitor and analyse the main indicators associated with operational risk management, such as operational losses, monitoring of current or potential risks, monitoring the effectiveness of controls, monitoring the risk profile and appetite.
- Operational risk: It assumes the following functions:
 - Promote the management of operational risks in the areas and units, encouraging their identification, allocation of responsibility, establishment of controls, generation of indicators, design of mitigation plans, regular review and the actions to be taken in the event of new losses or material risks.
 - Provide the areas with the necessary methodologies, tools and procedures for managing their risks.
 - Ensure that the Bank's operational losses are correctly and accurately recorded.
 - Provide the organisation with a uniform vision of its exposure to operational risk, identifying, integrating and assessing existing operational risks.
 - Provide the information on operational risk for disclosure to regulators, supervisors and external institutions.

- Business units: They have the following functions:
 - Manage operational risks and specifically, identify, assess, monitor, analyse, mitigate and control the operational risks on which they have the ability to act.
 - Record incidents and communicate the operational losses incurred in their business activities.
 - Study, define, prioritise and fund plans to mitigate the operational risks under their management.
 - Maintain and test the business continuity plans for which they are responsible.

With regard to loss events databases, Bankinter's operational risk profile is summarised in the charts below:

Insurance in operational risk management

Bankinter uses insurance as a key element in managing certain operational risks, thereby complementing the mitigation of those risks that require it due to their nature. Accordingly, the insurance area, together with the Bankinter various other areas and taking into account the operational risk assessments and loss history, assesses the advisability of modifying the scope of coverage of the insurance policies for the various operational risks.

Examples are the insurance taken out with various companies of recognised solvency for contingencies affecting the Bank's property (e.g. earthquake, fire insurance), internal or external fraud (e.g. robbery, embezzlement), employees' civil liability, etc.

Reputational risk

Reputational risk is the risk arising when the expectations of stakeholders (e.g. customers, shareholders, employees, investors) are not met and their reaction can adversely affect existing or new business relationships with them. They are unique because they depend on external

assessments and can originate from a wide variety of sources, including other risks and the social, economic or sectoral environment.

The reputational risk management model involves preventing such risks, identifying and controlling them proactively to reduce their probability of occurrence and mitigate their impact. The entity has various tools at its disposal for this:

- Regular measurement of the perception and expectations of the main stakeholders (through reputation, customer satisfaction, internal climate, analyst ratings, etc.).
- Monitoring and analysis of mentions of the entity in conventional and social media, in addition to active listening to gauge trends in the market and environment.
- Assessment of reputational risk before marketing a product, outsourcing a service or partnering with a third party.
- Reputational risk map, which includes a catalogue of 33 possible events linked to products and services, conduct, finance, leadership, innovation, labour aspects, sustainability and image. They are all associated with performance indicators, impact and control mechanisms.
- Crisis management protocol to preserve reputation and business continuity.
- Employee training and awareness-raising within the Bank to reinforce a preventive culture.
- Reporting to governing bodies.

In 2022, we carried out several actions for continuous improvement of management and control processes. These includes the creation of a management manual for this risk, to document the identification, measurement, surveillance and control measures. Also, the risk map hierarchisation criteria have been revised.

Legal risk

Bankinter's lending transactions, retail mortgage segment and denominated in foreign currency ("multicurrency loans"): the Parent has received claims whose estimated obligations have been recognised by the Entity at 31 December 2022 under "Other provisions" (Note 20).

A lawsuit filed by one consumer association in 2016 is still ongoing; it claims to represent Bankinter's consumer customers with multi-currency mortgages. Bankinter submitted its reply to the lawsuit on 17 May 2021. It is still ongoing, with no ruling having been made regarding the underlying case.

The Entity has policies and procedures aimed at adequately managing the legal risk arising from these transactions. Some of the main features can be summarised as follows:

- The Entity has a policy for estimating legal provisions, defined in Note 20, which includes regular monitoring of the main variables, such as the average record of adverse rulings handed down against the Entity and the average loss per case, in order to estimate the allowances necessary for the legal risk associated with the transactions against which claims are filed.

- The Entity carries out an individual analysis, by court and by geographical area, of the key factors that give rise to the adverse rulings in the judgements received, and their possible ramifications on the maximum risk and the estimate, at each review date, of the legal provisions required and associated with multicurrency loan transactions. The Entity is also tracking case law handed issued by the Supreme Court and the Court of Justice of the European Union, assessing potential impacts on the Entity's multi-currency loan portfolio with the assistance of independent experts.

- The Entity has also identified the multicurrency mortgage loan portfolio as a separate segment within the mortgage loan portfolio. In this regard, to calculate the expected loss on multicurrency loans, the Entity's internal models include certain elements that affect the estimate of the probability of default and loss given default associated with these transactions, resulting in greater coverage of credit risk for the multicurrency loan segment.

The Entity considers that the provisions recognised at 31 December 2022 were sufficient to cover any potential losses arising from the multicurrency loan portfolio and to face the outcome of any risks that may affect it.

Climate change risk

In line with supervisory expectations, Bankinter works actively to identify, assess, manage and reduce the impact of climate change on its loan book. In 2021, it set up four lines of work: identification and measurement, assessment, action and monitoring.

Identification and measurement:

A large portion of data used are estimates and weights due to the scant information and previous measurements available. The Group keeps working to improve this aspect, thanks largely to the introduction of regulatory initiatives to significantly improve disclosure by financial and non-financial companies of information related to sustainability (specifically, the NFRD and CSRD directives⁹).

Three complementary approaches are taken to risk identification and measurement:

- The PCAF approach for calculating financed emissions. According to this approach, Bankinter's financed emissions generated by companies in Spain and Portugal through

loans and investments of 27,051 million euros amount to 1.8 million tonnes. Thanks to the composition of our portfolio, with less financing of high emission intensity industries (e.g. agriculture or refineries) and the significant weight of renewables in energy financing, we have a better starting point than the system.

- Bankinter has implemented a system of assigning a climate rating to all companies that tells how likely they are to be affected by climate change risks, so it can initiate dialogue with them for an assessment.

- In the mortgage portfolio of natural persons, Bankinter joined an industry project in 2021 to secure energy efficiency certificates for all its mortgaged properties. This information was used for an initial estimate of the issuances financed in Bankinter Spain for this portfolio, and EVO Banco's will soon be added. There are various physical risk indicators depending on the geographic location of the guarantees, such as the risks of flooding by rivers or seawater and desertification. Considering the geographical areas where Bankinter focuses its operations, flooding risks are very limited.

Assessment

Bankinter is aware that this poses a serious challenge to financial institutions because of the potential long-term effects, the problems obtaining reliable and verified data, and how new the exercises are. Therefore, it is working on three methodological approaches, in line with the recommendations by the EBA in the "*EBA Report on management and supervision of ESG risks for credit institutions and investment firms*":

- Portfolio alignment. Measuring financed emissions has allowed financial institutions to have a decarbonisation strategy, and build characteristics on concentrations of direct and indirect emissions, and carbon footprint by branch of activity.

- Sensitivity analysis, including the European Central Bank 2022 stress test. Bankinter has also developed its own climate sensitivity analyses from NGFS scenarios and projections, assessing the potential impact by sector of activity and the long-term effects.

- Exposure method, which entails understanding the risks to which customers are exposed and how they are mitigating, or plan to mitigate, them. This climate rating system has been implemented to Corporate Banking in Spain and Portugal.

Action.

This entails essential two lines of action

Inclusion of climate change risk in the credit risk approval process.

The corporate climate rating has been implemented in the risk approval process since October 2021. This aim is focus dialogue with customers, especially those exposed to higher levels of risk. By doing this, we incorporate climate and environmental factors into our risk decision-

⁹ NFRD: Non Financial Reporting Directive; CSRD: Corporate Sustainability Directive

making and attempt to identify opportunities to assist these customers financially in their transition.

Definition of a new business strategy because of climate change risk. Bankinter is working on the four pillars that should underpin this:

- Sustainability policy. Bankinter has been managing sustainability for over a decade now through successive policies and strategic plans. It is also a signatory of the leading international sustainability and climate change initiatives and commitments; e.g. the United Nations Global Compact, the Equator Principles, UNEPFI (the United Nations Environment Programme Financial Initiative), the Responsible banking Principles and the *Net Zero Banking Alliance*.
- Scenario analysis. Using the baseline scenario; i.e. *Net Zero 2050*, and assessing the entity's strength according to its strategy and assuming that a set of other plausible scenarios may occur.
- Decarbonisation strategy. Bankinter is well aware that the financial sector must assume its role as an enabler of the transformation towards a sustainable economic model that can mitigate or adapt to the impact of climate change and protect the environment. Its commitment in this respect is firm, as illustrated by its membership of the Global Compact Network Spain, UNEP FI and the Net Zero Banking Alliance. By belonging to this alliance, Bankinter undertakes a commitment to making its financial and investment activity emissions neutral by 2050, in line with the objectives of the Paris Agreement on Climate Change. To deliver on this commitment, in February 2022 the Group drew up its own decarbonisation strategy, approved by the Group's administrative body through the sustainability and appointments committee. This involved establishing specific quantitative targets for financed emissions intensity to 2030 in line with the emission reduction plans laid down in Spain's Integrated National Energy and Climate Plan (PNIEC). To meet its decarbonisation targets, Bankinter is firmly committed to an inclusive strategy that helps our customers transform and adapt to a lower-emission and more eco-friendly economy. That being said, we must remember that the combustion of fossil fuels is the main source of greenhouse gases, so efforts over the coming years must focus on considerably reducing our reliance on fossil fuels. Against this backdrop, Bankinter will become increasingly demanding in terms of compliance with decarbonisation objectives, limiting funding of activities that are incompatible with emissions reduction or customers who are not willing to change.
- Sustainable businesses. Bankinter has designed several products linked to sustainability criteria; e.g. sustainable investment funds, green mortgages, debt issues, renewable energy project finance, alternative venture capital funds, pension funds managed using criteria of sustainability and financing of energy efficiency activities in homeowners' associations.

Disclosure and monitoring

The final line of work is the definition of indicators that help in monitoring the management and progress of climate risk through Bankinter's information. The information is gradually conveyed to senior management and the board for monitoring and specific tracking of climate risks.

Despite the lack of specific customer information and the uncertainty regarding climate risk at present, this risk is not expected to have a material short-term impact on the Group's financial statements based on the estimates and weightings used by the Group and its active management to identify, assess and reduce this risk.

IBOR reform

The LIBOR's discontinuance, confirmed in March 2021, has meant that the market must transition to alternative rates that, in accordance with the recommendations of the FSB and other authorities, must be based on the risk-free rates designated by the working groups in each of the affected jurisdictions.

The transition to risk-free rates is, therefore, one of the most complex issues facing the financial industry in recent years. The impact is corporate-wide, involving practically all the Bank's operations, transactions, contracts, market risks, accounting, etc. To help banks that use the benchmark in their financial transaction and contracts adequately manage the transition, the CNMV has stressed the importance of monitoring the developments and actions of the working groups, the main advances in the reform process, and the identification and assessment of the risks and possible impacts arising from their exposure.

In 2022, the working group set up within Grupo Bankinter, S.A. to ensure a smooth transition to risk-free rates has continued with the lines of work set up in 2021 and has kept working to prepare the operational and technological systems, on the necessary contractual amendments and on training the workforce.

The roadmap was prepared and the associated risks were measured taking consideration of the different approaches and transition timeframes to the new indices. Of particular notice in 2022 was the end of JPY LIBOR in December.

The working group also monitored closely the consultations of the United Kingdom's Financial Conduct Authority (FCA) about the intention to keep demanding that the ICE Benchmark Administration (IBA, which administers LIBOR) publish the three-month synthetic GBP LIBOR until the end of March 2024, and 1, 3 and 6-month USD LIBOR under synthetic methodology until the end of September 2024. They will disappear after this date.

Lastly, as for LIBOR indices, the Group's exposure can be considered non-significant since there is a very low volume of assets and liabilities indexed to these indices. USD LIBOR is the most representative in terms of exposure. Other LIBOR currencies affect some of the Group's products, but do not pose any material risk considering that the exposure of JPY LIBOR has migrated with the end of this rate.

Below is the detail of the carrying amount as at 31 December 2021 and 2022 of loans and advances and deposits referenced to the indices subject to the reform.

Benchmarked to the LIBOR at 31.12.2022				Products

45. Required disclosures regarding the mortgage market

The board of directors of Bankinter declares that the Bank has express policies and procedures in place to carry out its business activities in the mortgage market. It is responsible for complying with all mortgage market regulations and as such has approved these policies and procedures.

Each year, the board of directors sets out the basic principles regarding its risk policy for each business segment in a document titled The Risk Management and Control Framework. The board also approves a responsible lending policy, in accordance with the Transparency Act, which sets forth the principles that the Bank has always applied in this field.

Bankinter has adapted its products and processes to the Real Estate Credit Act 5/2019.

The policies regarding the granting of mortgage loans include, , the following criteria:

- The ratio between the loan amount and the appraisal value of the mortgaged property, as well as the existence of other guarantees and collateral.
- The ratio between the borrower's debt and income, as well as verification of the information provided by the borrower and its solvency.

The key elements of the risk policies for this product are:

Automatic authorisation and discrimination by rating.

- In home mortgage loan transactions the maximum authorisation is sought via automatic systems.
- Bankinter has an internal rating model, developed and improved over the years, based on statistical systems in accordance with solvency regulations. Obtaining a rating for each transaction implies a certain probability of default, which is estimated on the basis of historical performances and projections of future scenarios. The rating is the main indicator of transaction quality and the main variable in the automatic authorisation and in manual approval.
- The internal rating model and risk policies are reviewed regularly to adapt them to the economic and social situation at any given time.

Customer classification and repayment capacity

- Transactions are accepted based on an individual study of customers, the rating and economic capacity. Prices are customised according to the transaction rating and the customer's socio-economic profile.
- The maximum burden that customers may take on must always be taken into account. The following information must be available in order to make this calculation: servicing of all debts in the financial system and their net recurring income (extraordinary income should not be taken into account). This verifies whether the final disposable net income is enough to service the financing and usual expenses. The documentation used to calculate the burden of the transaction is tax related, and must be as up-to-date as possible.

Financing the primary residence and second home.

- Broadly speaking, Bankinter's mortgage loan policy targets financing of primary residences and second homes for individuals, and not investment financings.

LTV (Loan to Value; relationship between the amount of the loan and the value of the property).

- The Bank's general policy is to finance homes up to an LTV of 80%. Exceptionally, for transactions involving customers with a high socio-economic profile, and a strong repayment ability and solvency, a higher LTV may be permitted. It also factors in the location and features of the property used as collateral. The collateral must be appraised correctly, both on authorisation of the transaction and throughout its life.
- On authorisation, the value of the collateral will be determined by the lower of the official appraisal or the purchase value executed by deed. There may not be any major difference between the two values.

Non-residents

- In these transactions, the required debt burden ratio is stricter.

Type of asset

- The home subject to finance must be located in established areas or urban locations, where there must be a real estate market with extensive supply and demand.

Standardisation of the mortgage process

- Standardisation is crucial to achieve a process where efficiency is its core element, particularly in retail commercial banking.
- End-to-end management of the process and coordination with all parties involved (mostly agencies and appraisal companies) is entrusted to a specialised department, which is in charge of establishing the procedures, applications, organisation and control of the process. This ensures that the process will be undertaken correctly, with optimal customer service and excellent credit quality in mortgage transactions.

Independent appraisal process

- The appraisal process is completely independent of the commercial network. Generally speaking, it is carried out centrally and the appraiser appointed for each appraisal is selected randomly. This ensures that the transactions carried out by a branch have been appraised by different appraisal companies.

Monitoring of the real estate market

- Official reports are collected and examined on a regular basis so as to monitor the value on the real estate market. The value of the mortgage collateral is updated in accordance with prevailing legislation.

Multi-currency

- Given the volatility of the currency-linked portfolio, specific monitoring and control is performed. This product is not marketed at present (see Note 44).

Sales policy for foreclosed assets

Prior to foreclosure, the team of specialised professionals forming the real estate assets unit first conducts an on-site inspection of the property to perform a technical analysis that covers the characteristics, type, description and condition of the property, as well as a study of the market and prices in the area.

Selling prices are set centrally based on objective criteria and are reviewed periodically to ensure that they are in line with the market, following an active real estate management policy as quickly and efficiently as possible.

For the sale of real estate assets, the Bank has created a network of external partners specialising in the property market. These specialist partners are selected individually based on their proximity, knowledge of the local market and product suitability. The effectiveness of this network is monitored closely, with daily contact and assessment of the level of sales and commitments.

By way of sales support the Bank relies on:

- The branch network, which has a financial incentive for referring potential buyers.
- Its own real estate portal on the Bank's website: <https://www.bankinter.com/www/es-es/cgi/ebk+inm+home>
- The assets are published on the main national portals.
- Sales service call centre.
- An active policy is in place aimed at studying the possibility of disposing of the entire portfolio or in batches of foreclosed assets.

Land and construction in progress

Due to the highly restrictive risk policy on developer finance, the amount for foreclosed land is low relative to the Bank's share and particularly compared to the banking sector as a whole.

Knowing the developer, the size of the development and the risk policy pursued has enabled us to support these developers to ensure at least that the financed projects are completed.

Therefore, there are virtually no developments in progress among the foreclosed assets. In any case, the land management policy is aimed at establishing controls to prevent impairment of the asset and improving its condition to ensure a quick sale.

Specific examples of these procedures include:

- Selecting and controlling specialist service providers to resolve planning issues with land and unfinished developments, accepting budgets and monitoring budget execution.
- Supervising and monitoring the procedures to obtain the necessary sale permits from official bodies or municipalities.
- Proposing the analysis of viability studies for the real estate development to investors and property promoters.

Policy on lending to problematic real estate developers

Bankinter maintains a limited risk appetite in this business, closely monitoring exposures to ensure that they are within the authorised frameworks and that the strict risk policy established for authorisation of the developer loan transactions is respected scrupulously.

You can find below the information required by Circular 4/2017 of Banco de España from institutions that issue covered bonds in their annual financial statements: statements PI 11, 1 to 7. The regulations governing these statements is still not adapted to Decree-Law 24/2021, of 2 November, on the transposition of European Union directives relating to, inter alia, covered bonds. Consequently, they must be interpreted taking this into account.

Decree-Law 24/2021, of 2 November, entered into force in July 2022 (hereinafter, RDL 24/2021). It transposes the European Union directives on, inter alia, covered bonds.

Since RDL 24/201 entered into force, the bonds issued are now covered by assets incorporated by Bankinter to the pool of cover assets provided for in the regulation (the Cover Pool), which differs in its composition and value from the pool of assets that used to cover covered bonds until then.

The Cover Pool is composed of the cover assets that Bankinter has incorporated into to the Special Cover Register subject to authorisation from the Cover Pool Monitor, according to RDL 24/2021.

Article 34 of RDL 24/2021 stipulates that issuing institutions must have a covered bond programme in place with prior authorisation from Banco de España. Intermoney Agency Services, S.A. ("IMAS") has been chosen as the Cover Pool Monitor. Bankinter received approval from Banco de España for its covered bond programme on 4 July 2022.

46. Exposure to the construction and real estate development sector

Exposure to real estate credit risk (business in Spain)

Information on exposure to real estate credit risk and assets foreclosed or received in payment of debts at 31 December 2022 and 31 December 2021:

GROSS AMOUNT (THOUSANDS OF EUROS)	31.12.2022	31.12.2021
Financing for real estate construction and development (including land)	329,580	384,467
Of which: non-performing	3,631	5,884
Total gross amount	329,580	384,467

The items included in the tables in this note are as explained in Note 5.

IMPAIRMENT LOSSES (THOUSANDS OF EUROS)	31.12.2022	31.12.2021
Financing for real estate construction and development (including land)	2,727	3,016
Of which: non-performing	1,786	1,842
Total impairment losses on assets	2,727	3,016

CARRYING AMOUNT (THOUSANDS OF EUROS)	31.12.2022	31.12.2021
Financing for real estate construction and development (including land)	326,853	381,451
Of which: non-performing	1,845	4,041
Total carrying amount	326,853	381,451
Total carrying amount of financing granted to customers	62,403,592	58,606,568

GUARANTEES RECEIVED	31.12.2022	31.12.2021
Value of collateral	307,318	363,227
Of which: guarantees non-performing exposures	1,610	2,758
Value of other guarantees	3,210	7,141
Of which: guarantees non-performing exposures	30	-

48. Own funds and minimum reserves.

a) Own funds

Applicable legislation

At 31 December 2022, the Bankinter Group's consolidated eligible capital was calculated in accordance with Regulation (EU) No. 876/2019 of the European Parliament and of the Council of 20 May 2019 amending the previous Regulation (EU) No. 575/2013 on prudential requirements for credit institutions and investment firms, and Directive 2019/878/EU of the European Parliament and of the Council, amending Directive 2013/36/EU on access to the activity of credit institutions and the prudential supervision of credit institutions. Both regulations govern the levels of solvency and composition of eligible capital with which credit institutions must operate. In 2020, to mitigate the potential effects of the COVID-19 pandemic on the financial system, the European Parliament and the European Council approved Regulation 2020/873 ('CRR Quick Fix') which amends both Regulation 575/2013 ('CRR') and Regulation 2019/876 ('CRR2') including certain measures that contribute positively to capital ratios, highlighting the new support factors for SMEs and infrastructures, which reduce capital consumption and the level of risk-weighted assets (RWAs).

The minimum capital requirements are calculated, in compliance with these regulations, on the basis of the Group's exposure to credit and dilution risk, counterparty risk, market risk of the trading book, foreign currency risk and operational risk. The Group is also subject to compliance with limits to large exposures, with liquidity and leverage ratios and with the internal corporate governance obligations established by law.

The Bankinter Group requested from its supervisor an exemption from individual compliance with the requirements established in solvency regulations for Bankinter, S.A. and Bankinter Consumer Finance, E.F.C., S.A. for purposes of efficiency and better management and since, given that the Group's characteristics, the adequate distribution of own funds between the parent undertaking and its subsidiaries is guaranteed. The supervisor authorised both exemptions on 8 October 2009.

Consolidated shareholders' equity and related capital ratios at 31 December 2022 and 2021:

Thousands of euros				
	31.12.2022	31.12.2021	Change	% chg
Capital	269,660	269,660	-	0.00%
Reserves	4,537,767	4,513,848	23,919	0.53%
CET 1 deductions	(463,542)	(529,305)	65,763	(12.42)%
Common Equity Tier 1 (CET 1)	4,343,884	4,254,202	89,682	2.11%
AT1 instruments	350,000	350,000	-	0.00%

Additional Tier 1 capital (AT1)	350,000	350,000	-	0.00%

Thousands of euros				
	31.12.2022	31.12.2021	Change	% chg
Tier 1 capital (TIER 1 = CET 1 + AT1)	4,693,884	4,604,202	89,682	1.95%
TIER 2 instruments	830,371	830,371	-	0.00%
TIER 2 deductions	-	-	-	0.00%
Tier 2 capital (TIER 2)	830,371	830,371	-	0.00%
Total capital (TIER 1 + TIER 2)	5,524,256	5,434,574	89,682	1.65%
Risk-weighted assets	36,174,282	35,303,115	871,167	2.47%
Of which credit risk	31,024,308	30,248,699	775,609	2.56%
Of which market risk	200,019	389,100	(189,081)	(48.59)%
Of which operational risk	3,346,804	3,096,891	249,913	8.07%
CET1 (%)	12.01%	12.05%	(0.04)%	(0.35)%
Tier 1 (%)	12.98%	13.04%	(0.07)%	(0.51)%
Tier 2 (%)	2.30%	2.35%	(0.06)%	(2.41)%
Solvency ratio (%)	15.27%	15.39%	(0.12)%	(0.80)%

The changes in the Common Equity Tier 1 (CET1) ratio are mainly due by the retained annual recurring profit, and the decrease in deductions.

The change in TIER 1 capital ratio and in TIER 2 is in line with the change in CET 1.

Reconciliation of the Bankinter Group's equity for accounting purposes with its regulatory capital:

	31.12.2022	31.12.2021
Shareholders' equity	5,034,001	4,736,621
(-) Retained earnings	(80,264)	(52,642)
(+/-) Other	(3,042)	1,025
(+) Valuation adjustments	(129,028)	115,539
CET1 deductions	(477,783)	(546,341)
Common equity Tier 1	4,343,884	4,254,202

Management of own funds

The principle laid down by Bankinter's Board of Directors in relation to the management of own funds consists of operating with a level of solvency in excess of the level established by applicable legislation adapted to the risks inherent in its business and its operating environment. The goal is the continuous reinforcement of solvency as a basis for sustained growth and creating long-term value for shareholders.

To meet this objective, the Bank has a number of management processes and policies for managing own funds, the main guidelines of which are:

- The board of directors and senior management are actively involved in the strategies and policies affecting the Group's capital management.

- The Group's capital management is based on the following fundamental pillars:
 - Maintaining robust solvency ratios and adequate quality, consistent with the Bank's risk profile and business model.
 - Maximising return on capital and sustained value creation over time without losing focus on preserving the Bank's solvency and ensuring it adapts to its entity's risk profile, balancing solvency and profitability to maintain sound ratios and capital composition.
- The capital management and monitoring function is independent from the areas in charge of managing, developing and maintaining risk measurement methodologies and the areas that validate, control and independently review the results.
- Internal ratings-based (IRB) approaches are used to measure risk and calculate the own fund requirements for certain credit portfolios, which have been validated and approved by the supervisor.

The Bank considers its eligible own funds and own funds requirements established by regulations as key elements of its management, which affect investment decisions, the analysis of the viability of transactions, the strategy for distributing profit or loss and issues by the Parent, subsidiaries and the Group, etc.

b) Minimum reserves ratio

At the end of the current and previous reporting period, and throughout the periods, the consolidated entities met the minimum reserves ratio required by applicable legislation.

49. Segment information

The highest authority in operational decision-making is the management committee of Bankinter, S.A. The main segments into which the Bank organises its business activities are described below:

Commercial Banking: encompasses the following, due to the similarity of the nature of the products and services offered, the type of customers targeted and the distribution methods:

Private Banking: a line of business specialising in integrated asset and investment advisory and management services. It is made up of customers with a financial assets, in and out of Bankinter, of over €1,000,000.

Personal Banking: Customers not included in Private Banking with:

- Household income of over 70,000 euros;
- Assets+securities+brokerage between 75,000 and 1,000,000 euros
- Financial assets in or out of Bankinter between 75,000 and 1,000,000 euros.

Individual Retail Banking: includes the products and services offered to domestic economies. Other individuals.

Foreigners: Non-Spanish European customers of any of the following organisations: Catalonia, Eastern Spain-Balearic Islands, Andalusia, Canary Islands.

Corporate Banking: offers specialised services aimed at large enterprises, the public sector, and medium and small enterprises. Because of the similar nature of the products and services offered, the category of target customers and the distribution methods, this segment encompasses all of the Bank's activity with companies.

Consumer Finance: encompasses the consumer finance business managed mainly by Bankinter Consumer Finance, E.F.C., S.A., via credit cards and consumer loans. Customers in this segment may be either exclusive or shared with the Commercial Retail Banking segment.

Bankinter Portugal: Bankinter operates in Portugal through the Individual Retail Banking, Private Banking and Corporate Banking businesses, which were acquired from Barclays on 1 April 2016.

Bankinter Ireland: Bankinter has consumer and mortgage lending operations in Ireland. It was acquired in 2019.

Other businesses comprises the following groups:

- The net interest income/expense and gains or losses on financial assets and liabilities generated by the **institutional portfolio**.
- Differences between the analytical accounting records and the general accounting records.
- The operations of EVO Banco acquired in 2019.

Appendix III provides detailed information and comparisons of profit or loss of the Bank's main business segments and key business indicators.

50. Equity investments in credit institutions

The following table presents the Bank's holdings in Spanish and foreign credit institutions or banks that exceed 5% of their share capital or voting rights:

	Percentage ownership
Bankinter Consumer Finance, E.F.C., S.A.	100%
Bankinter Luxemburgo, S.A.	100%
EVO Banco, S.A.	100%
Avantcard D.A.C.	100%

In accordance with article 20 of Royal Decree 1245/1995, of 14 July, regarding holdings of more than 5% of the share capital or voting rights of the Bank's financial institutions held by Spanish or foreign credit institutions or banks, as defined in article 4 of the Spanish Securities Market Act, including a Spanish or foreign credit institution, at 31 December 2021 there was no institution or bank with a holding exceeded this percentage.

51. Information on the average period of payment to suppliers.

In accordance with the resolution of the Spanish Accounting and Audit Institute (ICAC), of 29 January 2016, on the disclosures to be included in the notes to the consolidated financial statements regarding the average period of payment to suppliers in commercial transactions, the following information is provided:

	2022	2021
	Days	Days
Average period of payment to suppliers	13.58	15.19
Ratio of transactions paid	13.51	15.17
Ratio of transactions pending payment	28.88	19.93
Total payments made	619,969	712,627
Total payments outstanding	2,833	2,128

Additionally, Law 18/2022 stipulates that additional information must be included about the monetary volume and number of invoices paid within a shorter period than the maximum timeframe (30 days), and the percentage of these invoices over the total. The breakdown is shown below:

Invoices paid within a shorter period than the maximum set by the regulations on non-performing loans	2022	2021
Number of invoices paid within less than 30 days	143,586	147,071
% invoices paid within less than 30 days	81%	73%
Amount of invoices paid within less than 30 days (thousands of euros)	542,278	638,180
% amount paid within less than 30 days	87%	90%

The calculation above not include the Bk Luxemburg SA, Evo Banco SA and Avantcard DAC subsidiaries.

52. Events after the reporting period

Law 38/2022, which sets forth a temporary tax rate on credit institutions (Note 1), stipulates that this tax is a temporary payment for two years, from 1 January 2023 and 1 January 2024. This payment must be made within the first twenty calendar days of September of that year, without prejudice to the early payment of 50% of the amount, to be made within the first twenty days of February of that year. Bankinter, S.A has recognised in 2023, before these annual financial statements were drafted, the estimated amount for this tax (78 million euros).

On 6 February 2023, Bankinter issued perpetual securities potentially convertible into newly issued Bankinter shares in an amount of 300 million euros. The issue's value date was 15 February 2023. The securities are expected to register as additional tier 1 capital of Bankinter Group, according to the applicable capital adequacy regulations. This issue has similar characteristics to the preference shares in the 2022 year-end balance sheet.

These preference shares accrue a quarterly coupon of 7.375%. The Bank reserves the right, at its sole discretion, to cancel the payout of any accrued coupon at any time. As a contingent condition for the irrevocable and mandatory conversion of the preference shares into ordinary shares, the Common Equity Tier 1 (CET 1) ratio must fall below 5.125%. In this case, the holders of the preference share will receive a variable number of ordinary shares depending on the higher of i) the market price of the share at the time of conversion, ii) a floor price of 4.32036 euros, or iii) the par value of the ordinary shares (0.30 euros).

In accordance with the characteristics of the issue, the conversion into shares of the nominal amount of these instruments would occur if the CET1 ratio of the Bank's consolidated group were to fall below a certain level, in which case the issuer could not avoid delivery of a variable number of shares. Consequently, in accordance with IAS 32, the principal amount of the instruments issued will be classified as a financial liability. The Group has the power to decide on the coupon payout and, for this reason, the coupon has been considered a component of equity, as per IAS 32.

APPENDIX II - Standards and interpretations

Mandatory standards, amendments and interpretations for all annual periods beginning on or after 1 January 2022

During the year ending on 31 December 2022, the following International Financial Reporting Standards and their interpretations have become mandatory and, as a consequence, these consolidated Group annual financial statements have been prepared with them in mind:

IAS 16 (Amendment) "Property, plant and equipment: Proceeds before Intended Use": The amendments prohibit entities deducting from the cost of an item of property, plant and equipment, any proceeds from selling items produced while preparing the asset for its intended use. Instead, an entity recognises the proceeds from selling such items, and the cost of producing those items, in profit or loss. The amendment also clarifies that an entity is testing whether the asset is functioning properly when it assesses the technical and physical performance of the asset. The financial performance of the asset is not relevant to this assessment. An asset might therefore be capable of operating as intended by management and subject to depreciation before it has achieved the level of operating performance expected by management. The amendments are effective from 1 January 2022.

Adoption of this standard did not have any significant impacts on the Group's profit or loss in 2022.

IAS 37 (Amendment) "Onerous Contracts: Costs of Fulfilling a Contract": The amendment explains that the direct cost of fulfilling a contract includes both incremental costs of fulfilling that contract and an allocation of other costs directly related to contract activities. The amendment also clarifies that, before a separate provision for an onerous contract is established, an entity recognises any impairment loss that has occurred on assets used in fulfilling the contract, rather than on assets dedicated to that contract. The amendments are effective from 1 January 2022.

Adoption of this standard did not have any significant impacts on the Group's profit or loss in 2022.

IFRS 3 (Amendment) Reference to the Conceptual Framework: IFRS 3 "Business Combinations" has been updated to refer to the 2018 Conceptual Framework for Financial Reporting, to determine what constitutes an asset or a liability in a business combination (previously it referred to the 2001 Conceptual Framework for Financial Reporting). It also adds a new exception in IFRS 3 for liabilities and contingent liabilities. The amendments are effective from 1 January 2022.

Adoption of this standard did not have any significant impacts on the Group's profit or loss in 2022.

Annual Improvements to IFRSs. 2018-2020 cycle: The amendments affect IFRS 1, IFRS 9, IFRS 16 and IAS 41¹⁰ and are effective for annual periods beginning on or after 1 January 2022. The main amendments relate to:

- IFRS 1 "First-time Adoption of International Financial Reporting Standards": IFRS 1 provides an exemption if a subsidiary becomes a first-time adopter of IFRS later than its parent. This amendment permits an entity that applies the exemption to measure cumulative translation differences using the amounts reported by its parent, based on the parent's date of transition to IFRSs.
- IFRS 9 "Financial instruments": The amendment to IFRS 9 addresses which fees should be included in the 10% test for derecognition of financial liabilities. Costs or fees could be paid to either third parties or the lender. Under the amendment, costs or fees paid to third parties will not be included in the 10% test.
- IAS 41 "Agriculture": The amendment removes the requirement for entities to exclude cash flows for taxation when measuring fair value under IAS 41.

Adoption of this standard did not have any significant impacts on the Group's profit or loss in 2022.

2.2 Standards, amendments and interpretations that have not yet become effective but may be adopted early [IAS 8.29]

IFRS 17 "Insurance Contracts"¹¹: IFRS 17 replaces IFRS 4 "Insurance Contracts", which permitted a wide variety of accounting practices. The new standard fundamentally changes the accounting by all entities that issue insurance contracts and investment contracts with discretionary participation features. In June 2020, the IASB amended the standard, developing specific amendments and clarifications to assist entities implementing the new standard, although they did not change its fundamental principles.

The standard is applicable for annual periods beginning on or after 1 January 2023. Earlier application is permitted if the entity applies IFRS 9 "Financial Instruments" at or before the date of initial application of IFRS 17.

¹⁰ The Annual Improvements to IFRSs, 2018-2020 Cycle, issued by the IASB include amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41. The Annual Improvements approved by the European Union only relate to IFRS 1, IFRS 9 and IAS 41. This is because the change to IFRS 16 "Leases" only involves amendment of Illustrative Example 13 (removing the illustration of lessor payments in relation to lease improvements, thus eliminating possible confusion about the treatment of lease incentives). The illustrative examples accompany but are not part of the IFRS.

¹¹ In 2017, the IASB issued IFRS 17, with an effective date of 1 January 2021. Subsequently, in June 2020, it amended IFRS 17, introducing certain clarifications to make it easier to implement the standard and changed the effective date of IFRS 17 to 1 January 2023. The European Union endorsed IFRS 17 as amended, with its updated text and effective date, in November 2021.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

IFRS 17 (Amendment) "Initial application of IFRS 17 and IFRS 9 – Comparative information": The IASB has published an amendment to IFRS 17 that introduces narrow scope amendments to the transition requirements of IFRS 17 "Insurance Contracts" and does not affect any other requirements of IFRS 17. IFRS 17 and IFRS 9 "Financial Instruments" have different transition requirements. For some insurers, these differences may cause specific accounting mismatches between financial assets and insurance contract liabilities in the comparative information they present in their financial statements on initial application of IFRS 17 and IFRS 9. The amendment will help insurance companies to avoid these mismatches and therefore improve the usefulness of comparative information for investors.

This amendment is effective for annual periods beginning on or after 1 January 2023.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

IAS 1 (Amendment) "Disclosure of accounting policies": IAS 1 has been amended to improve disclosures about accounting policies to provide more useful information to investors and other primary users of financial statements. The amendments are effective from 1 January 2023.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

IAS 8 (Amendment) "Definition of accounting estimates": IAS 8 has been amended to help distinguish between changes to accounting estimates and changes to accounting policies. The amendments are effective from 1 January 2023.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

IAS 12 (Amendment) "Deferred tax related to assets and liabilities arising from a single transaction": Under IAS 12, companies are in certain circumstances exempt from recognising deferred taxes when they recognise assets or liabilities for the first time ("initial recognition exemption"). There was some uncertainty as to whether this exemption applied to transactions such as leases and decommissioning obligations, where both an asset and a liability are recognised upon initial recognition. The amendment clarifies that the exemption does not apply and that, therefore, there is an obligation to recognise deferred taxes on such transactions.

The amendment is effective for annual periods beginning on or after 1 January 2023, although early application is permitted.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

Standards, interpretations and amendments to existing standards that cannot be adopted early or that have not been endorsed by the European Union.

At the date of authorisation for issue of these consolidated financial statements, the IASB and the IFRS Interpretations Committee had issued the following standards, amendments and interpretations that have yet to be adopted by the European Union.

IFRS 10 (Amendment) and IAS 28 (Amendment) "Sale or contribution of assets between an investor and its associate or joint venture": These amendments clarify the accounting treatment for sales and contributions of assets between an investor and its associates and joint ventures, which will depend on whether or not the non-monetary assets sold or contributed to an associate or joint venture constitute a "business". Where the non-monetary assets constitute a business, the investor will recognise the full gain or loss. If the assets do not meet the definition of a business, the investor will recognise the gain or loss only to the extent of the other investors' interest. The amendments will only apply when an investor sells or contributes assets to its associate or joint venture.

Originally, these amendments to IFRS 10 and IAS 28 were prospective and effective for annual periods beginning on or after 1 January 2016. However, at the end of 2015 the IASB decided to defer their effective date (although it did not set any specific new date), as it is planning to undertake a more extensive review that could lead to the simplification of accounting for these transactions and other aspects of accounting for associates and joint ventures.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

IFRS 16 (Amendment) "Lease Liability in a Sale and Leaseback": IFRS 16 sets forth requirements on how to post a sale with leaseback on the date the transaction takes place. However, it did not specify how to recognise the transaction after that date. This amendment explains how to post a sale with leaseback after the transaction date.

The amendment is effective from 1 January 2024, although early application is permitted. This amendment has yet to be endorsed by the European Union.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

IAS 1 (amendment) "Non-current Liabilities with Covenants"¹²: The IASB released an amendment to IAS 1 "Presentation of Financial Statements", in response to the concerns raised about the application of prior amendments (in January and July 2020) on the classification of liabilities as current or non-current, which had become effective for reporting periods starting and after 1 January 2023.

The new amendment aims to improve the information provided when the right to defer the payment of a liability is subject to covenants, within the 12 months after the reporting period.

The new amendment is effective for annual periods beginning on or after 1 January 2024, and nullifies prior amendments. The amendment may be applied before this date, but it is pending approval by the European Union.

Adoption of this standard is not expected to have significant impacts on the Group's financial statements.

¹² Previous amendments to the IAS 1 stated the following, which has been nullified with this amendment to IAS 1 of 31 October 2022:

IAS 1 (Amendment) "Classification of liabilities as current or non-current": These amendments clarify that the classification of liabilities as current or non-current should be based on rights that are in existence at the end of the reporting period. The classification is unaffected by the expectations of the entity or events after the reporting period (e.g. the receipt of a waiver or a breach of covenant). The amendment also clarifies what IAS 1 means when it refers to the "settlement" of a liability. The amendments are effective from 1 January 2022, although early application is permitted.

However, in July 2020 there was an amendment to change the effective date of the amendment to 1 January, 2023. These amendments are pending approval by the European Union.

APPENDIX III - Segment information

APPENDIX VI - Annual Banking Report

Bankinter Group information for compliance with article 87 of Law 10/2014, of June 26 (Annual Banking Report):

This information has been prepared in compliance with the article 87 and transitional provision twelve of Law 10/2014, of June 26, additional provision twelve of Law 10/2014, of 26 June, on the organisation, supervision and solvency of credit institutions, published in the Spanish Official State Gazette on 27 June 2014, which transposes article 89 of Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC (CRD IV) and repealing Directives 2006/48/EC and 2006/49/EC.

a) Name(s), nature of activities and geographical location.

Bankinter, S.A. was incorporated by notarial deed issued in Madrid on 4 June 1965, under the name Banco Intercontinental Español, S.A. On 24 July 1990 it acquired its current name. It is entered in the Official Banks and Bankers Register. Its Tax Identification number is A-28157360 and it belongs to the Deposit Guarantee Fund with code number 0128. The Bank's registered office is located Paseo de la Castellana 29, 28046 Madrid, Spain.

Bankinter, S.A. engages in banking activities and is subject to the laws and regulations applicable to banks operating in Spain.

In addition to the activities it directly carries out, the Bank is the parent company of a group of subsidiaries that are dedicated to various activities (essentially banking services, investment services asset management and credit cards) and which constitute, together with the Bank, the Bankinter Group. As a result, the Bank is obliged to prepare, in addition to its own separate financial statements, the Group's consolidated financial statements, including investments in joint ventures and associates.

The consolidated group conducts its business in Spain, except its subsidiary Bankinter Luxembourg S.A., which conducts its business in another European Union member state, Luxembourg, Bankinter's branches in Portugal, which, since the acquisition of a part of Barclays Bank PLC's banking business in Portugal was completed on 1 April 2016, conduct their business in another European Union member state, Portugal, and, since 1 June 2019, Ireland, before acquiring 100% of EVO BANCO, S.A.U. and, consequently, of its consumer finance subsidiary in Ireland, Avantcard D.A.C.

Bankinter Consumer Finance, E.F.C., S.A. is currently the parent of AvantCard, D.A.C. after acquiring all the shares comprising its share capital.

b) Turnover.

This section presents information on turnover by country on a consolidated basis. Turnover is considered to be gross operating income, as presented in the Group's consolidated income statement at year-end 2022:

	Figures at 31 December 2022
	Turnover (in thousands of euros)
Spain	1,793,602
Luxembourg	20,293
Portugal	190,728
Ireland	79,678
Total	2,084,301

c) Number of employees on a full-time equivalent basis.

Full-time employees per country at year-end 2022:

	Figures at 31 December 2022
	No. of employees
Spain	5,327
Luxembourg	39
Portugal	780
Ireland	273
Total	6,419

d) Gross profit or loss before tax

This item shows gross profit before tax on a consolidated basis.

	Figures at 31 December 2022
	Gross profit or loss (in millions of euros)
Spain	675,475
Luxembourg	9,853
Portugal	77,517
Ireland	22,193
Total	785,037

e) Tax on profit or loss

This item shows tax on profit or loss on a consolidated basis.

Figures at 31 December 2022

	Income tax (in millions of euros)
Spain	201,475
Luxembourg	-
Portugal	20,573
Ireland	2,786
Total	224,835

f) Public subsidies received

Neither Bankinter, S.A. nor any Group company have received any public subsidies.

g) Return on assets.

As set forth in Law 10/2014, of 26 June, the return on the Group's assets, calculated by dividing net profit by total assets at 31 December 2022, was 0.52%, including the profit or loss from discontinued operations.

Management report for the year ended 31 December 2022

1 Performance of the Group in the period

1.1 Corporate activity

Note 13 "Business combinations, investments in joint ventures and associates" of the annual financial statements describes the Group's structure: main subsidiaries and associates, percentages of direct and indirect participation, activity, main economic data, among other information of interest. Also disclosed are the Group's consolidated and unconsolidated structured entities, investment funds, pension funds and SICAVs managed by the Group.

The most significant changes in the Group's scope of consolidation arising during the year are shown below:

- In 2022, Bankinter and Liberty Seguros reached an agreement to jointly carry out their insurance businesses through **Bankinter Liberty Hogar y Auto, S.A.**, whose main focus will be marketing car and homeowners' insurance products and services. With this transaction, which is subject to securing the pertinent authorisations from regulators, Liberty will acquire 50.01% of Bankinter Hogar y Auto, S.A. from Bankinter and Bankinter will retain the remaining 49.99%. The products' design and development will benefit from Liberty Seguros' expertise, and they will be distributed exclusively through Bankinter's online and offline retail networks in Spain and Portugal, including EVO Banco, Bankinter Group's fully digital bank. At the end of the reporting period, the regulatory authorisations required to execute this agreement were still being processed.
- In the first half of the year, Bankinter, S.A. set up a wholly subsidiary, **Bankinter Investment, S.A.U.** Bankinter, S.A. has spun off to Bankinter Investment S.A.U. the assets and liabilities of the economic unit that the investment banking business had been running, until now, essentially: i) origination and structuring of alternative investment operations; ii) advice on corporate operations (mainly M&A) and; iii) advice on structured and alternative financing operations.
- **Bankinter Investment SGEIC**, alternative investment fund management firm subordinate to Bankinter Investment, S.A.U., was also incorporated. This firm aims to make progress in alternative investing options. It offers alternative investing under delegated management, tailored to each customer's profile and striving for appropriate investment diversification. Under the new, recently approved regulatory framework (Law 18/2022, of 28 September, on creating and growing businesses), this alternative investment platform, through the management firm, will be available for

investments from 10,000 euros. The firm will keep the Bank's model: investments in real-economy sectors selected for their potential for growth, search for the best professional management for each investment type, close tracking of all investments to protect the interests of investors, and co-investment of Bankinter Investment S.A.U. and its expert sectoral partners, and other investors.

- **Bankinter International Notes S.à r.l.**, a wholly owned Bankinter Group subsidiary located in Luxembourg, began operations during the year. It was set up for the issuance of structured bonds, which are marketed by the Bankinter, S.A. parent.
- At the end of the reporting period, Bankinter Group, through its subsidiary engaged in consumer lending (Bankinter Consumer Finance, E.F.C.), was at an advanced stage of negotiation with Sonae SGPS, S.A. to create a joint venture to become leaders in consumer lending in Portugal. This partnership will rely on the combination of the current consumer businesses held by both partners in Portugal.

The most significant changes in 2021 were:

- The resolution passed at the Annual General Meeting of Bankinter, S.A. on 19 March 2020 for the distribution in kind of its entire share premium (1,184 million euros) was executed in April 2021. This involved the delivery to shareholders of securities representing 82.6% of the share capital of subsidiary Línea Directa Aseguradora, S.A., Compañía de Seguros y Reaseguros.

The impact of this distribution on "Profit or loss for the year" amounted to 895,732 million euros (910,797 million euros before tax), recognised under "Profit or (-) loss after tax from discontinued operations" in the consolidated income statement.

- In May 2021, the Annual General Meeting of Bankinter Capital Riesgo, S.G.E.I.C., S.A. agreed to its winding up and liquidation. The Bankinter Capital Riesgo I, FCR fund, which was managed by the former, was dissolved and liquidated in financial year 2020.

At the close of the financial year, Bankinter International Notes Sàrl was in the process of being incorporated for the purpose of issue structured bonds.

1.2 Results

At 31 December 2022, Bankinter Group reached a pre-tax profit of 785 million euros, up by 46.3% on the previous year. The net profit amounted to 560.2 million euros, up by 28.1% even though 2021 still included four months of income from the insurance company; the comparison did not include the gains generated by Línea Directa's IPO that year.

Consequently, the Bank has reached the profit targets for 2023 one year earlier, and exceeded the results before the pandemic and the Línea Directa spin-off. This performance derives from a substantial improvement of all margins, as a consequence of greater commercial boost and the ability to attract business that has led the Bank to grow across all lines, customer segments and geographies.

The ratios and indicators are in line with this business strength. RoE (return on equity) is 12% versus 9.6% in 2021, and without including Línea Directa's extraordinary gains; ROTE of 12.7%. Cost-to-income ratio improved to 44%, or 40.5% in Spain. These figures are among the best in the sector in Europe.

As for solvency, the CET1 fully-loaded capital ratio increased to 12%, much higher than the minimum requirement set by the ECB for Bankinter for the whole of 2023 (7.726%, as in the previous year).

At the same time, Bankinter keeps its NPL ratio under control, despite worse macroeconomic conditions: the ratio is down to 2.10% versus 2.24% in 2021, and the cover rose to 66.3% from 63.6% in 2021. As for liquidity, Bankinter maintains a negative commercial funding gap since it has a higher volume of deposits than credit, 102.8%. Also, the Bank has no wholesale issues maturing this year. Special mention must be made of the performance of BKT shares, which went up in value by 39% and guaranteed a total return for shareholders, including dividends, of 45%.

Thanks to a well defined, strategic, consistent focus, a solid reputational position and the greater boost of the commercial network, all businesses, products and geographies have seen major growth.

In corporate banking, contributing 33% of the Bank's gross operating income, loans and receivables have gone up by 9.3% on 2021, with new business going up by 28% in one year. Corporate loans and receivables in Spain have gone up by 8.2% versus the sector (1.8%), according to Banco de España figures through to November. This means that Bankinter has increased its market share and has remained by its customers' side, financing their corporate operations in a pressured environment. The support given to companies in their foreign operations, with new services and increasingly specialised teams, has translated into 25% growth in the investment in corporate international business, to 8,000 million euros. Bankinter's relationship with its corporate customers keeps getting stronger, as shown by the greater importance of transactional business, with net interest margin up by 48% on 2021.

As for commercial or individual banking, assets under management have gone up among the higher profiles, such as private banking and retail banking. The assets for the first segment amount to 51,100 million euros (2021: 49,900 million euros), even though a market effect has had a negative impact of 3,300 million euros on the value of these assets. Bankinter has raised more than 4,000 million euros in new equity.

In retail banking, the assets under management reached 41,400 million euros (2021: 39,700 million euros), in spite of a negative market effect of 1,500 million euros. Bankinter has raised 3,400 million euros in new equity in 2022 for this segment.

The main hook for commercial retail banking customers was the salary account, the only account of this type with the same advantageous terms as when it was launched over 10 years ago. The portfolio of salary accounts amounted to 16,700 million euros, 2.7 times the volume of 2017, five years ago.

As for mortgage lending, the portfolio accounted for 33,700 million euros. Growth in the mortgage loan book in Spain was 2.8%, compared to the sector average of 0.4% according to Banco de España figures. New loans, including all geographies and EVO, amounted to 6,700 million euros in 2022, up by 13% on 2021, and a 6.7% market share in new transactions.

Mention should be made of investment banking and, specifically, alternative investment, by the subsidiary Bankinter Investment. The institution launched 19 investment vehicles to date, with an invested capital of more than 4,000 million euros. This business generated a gross operating income of 154 million euros in the year, and will start 2023 with a new growth journey after the launch of the new alternative investing management firm, for retail customers to access these assets.

The countries where Bankinter operates had a very positive performance. This is the case of Portugal, where the volume of assets under management has not stopped growing since Bankinter arrived in the country. This business, including funds, on and off balance sheet and investment, amounts to 18,200 million euros (2017: 11,400 million euros). In 2022, investments went up by 15% to 8,000 million euros, and customer funds have gone up by 9% to 6,400 million euros. Bankinter Portugal's income statement features very relevant data, derived from a 35% growth of the net interest income, 25% growth of the gross operating income, and 47% growth of the pre-provision profit. All amounting to a pre-tax profit of 78 million euros, up by 54% on 2021.

Business in Ireland has shown excellent performance in mortgage loans, with a clear impact on the gross operating income. Loans and receivables of Avant Money (Bankinter's brand in Ireland) amounted to 2,300 million euros, 132% more than in 2021. Of this volume, 1,600 million refer to mortgage loans, three times the book in 2021, with an NPL ratio of just 0.4%. Avant Money ended 2022 with a gross operating income of 80 million euros, up 34% on 2021.

Bankinter Consumer Finance, the Bank's subsidiary when Ireland's figures are consolidated, has also performed positively. Loans and receivables amount to 5,500 million euros, 1,600 million of which are mortgages loans in Ireland and the rest consumer business: 2,600 million euros in loans and the rest in card business. EVO Banco's investment figures show that the subsidiary's new strategy is being welcomed by digital customers. New mortgage loans signed in 2022 amounted to 984 million euros, up by 35% on 2021, 98% of which are fixed-rate mortgages thanks to one of the most competitive offers on the market. Loans and receivables rose 45% to

2,700 million euros. Gross operating income totalled 37 million euros at 2022in 2022, up by 55% on 2021.

Finally, some data on sustainability: Environmental, Social and Governance. Environmentally, the Bank has kept progress in the decarbonisation process of its corporate portfolio and will be adding the mortgage portfolio to this roadmap. Also, sustainable business has kept its upward pace, including more than 1,600 million euros in sustainable finance for companies and the increase in its own ESG investment funds and pension plans, which have gone over 1 billion euros for the first time. As for the social and governance aspects, mention should be made of the data on digital accessibility on the Bank's websites and app, its commitment to employment and the full compliance with the good governance recommendations.

Net interest income in 2022 totalled 1,536.7 million euros, up 20.5% from 2021, driven by higher volumes and higher interest rates.

The net interest margin has grown consistently in recent years and ended December 2022 at 2.05%, up from 1.82% the year before. This increase is based on the strong growth of loans and advances to customers, which closed at 2.15% (2021: 1.85%). Customer deposits closed 2022 at 0.05%, compared to 0.00% in 2021.

Net fees and commissions rose by 0.44%. A highlight of Bankinter Investment's activity in the year was the 47.9 million euros of commission income from the sale of the assets of the renewable energy fund Helia I to Northland Power, despite the extraordinary performance in 2021. There was also a growth in charges and payments, guarantees and documentary credits, and foreign exchange.

TOTAL NET FEES AND COMMISSIONS:	606,092	603,459	2,633	0.44

Gross operating income totalled 2,084.3 million euros at 31 December 2022, up 12.34% year on year. Growth was driven by the increase in net interest income (+20.50%), and the share of profit companies accounted for using the equity method (+9.69%, due to the higher profits from BK Vida and Bankinter Investment). Other operating income, which mainly includes regulatory charges, increased by 21.21%. The sum of ROF and dividends went down by 6.5%. The increase of the net interest margin is once again explained by customer activity.

Operating costs (including staff expenses, general expenses, depreciation and amortisation) have gone up by 7.6%. The banking business cost-to-income ratio including depreciation and amortisation was 44.1%, signalling a vast improvement from 46.0% the year before.

1.3 Performance of customer deposits and loans

Loans to customers were 6,194.7 million euros or 9.10% higher than the year before, driven by growth in mortgages and personal loans.

	Thousands of euros

1.4 Liquidity

Bankinter's liquidity management includes monitoring of short-term (the liquidity coverage ratio or LCR) and long-term (net stable funding ratio or NSFR) regulatory ratios. Both ratios are also included in the liquidity metrics of the Risk Appetite Framework (RAF).

The Entity's liquidity position remained at a high level in 2022, with customer funding gap, i.e. the difference between customer loans and deposits, that was still negative. Customer funds went up, albeit this did not match the growth of loans and receivables. The LCR stayed well above both the internal limits set in the RAF and regulatory limits. The LCR stood at 193.5% at year-end 2022, up from 228.6% at year-end 2021, with an average for the year of around 208.4%.

1.5 Activity in business segments

Appendix III provides detailed information and comparisons of profit or loss of the Bank's main business segments and key business indicators.

2 Solvency and management of own funds

Bankinter's capital management, business model and prudent risk policy allow it to operate with comfortable levels of capital, of high quality and far above that the requirements of the regulatory authorities and supervisors.

Note 48 of the notes to the annual financial statements describes the adequacy and management of the Group's own funds.

3 Economic environment

At the end of the reporting period, global growth had slowed down somewhat, affected by the war in Ukraine and stricter monetary policies. The rise of inflation to levels not seen in decades reduces the purchasing power of families and companies, and slows down consumption and investment. Leading international bodies, like the IMF and World Bank, revised their growth forecast down for 2022 and 2023.

Price pressures became generalised by countries and categories of goods and services, reaching double digits in some regions. In the euro area, it reached highs not seen in decades of +10.6% in October; +10.8% in July in Spain; +9.1% in June in the USA. Even though the latest figures are moderate, long-term inflation expectations are above the targets of central banks. Wage growth remains subdued, but increases are gathering momentum in certain countries.

Labour markets are still fairly dynamic in the main developed markets, particularly the US, where there is a large imbalance between labour supply and demand. Jobless rates there are still falling towards all-time lows.

Against this backdrop, central banks continue to tighten monetary policy, hiking interest rates sharply and starting or announcing the start of reductions in their balance sheets. The Fed raised its key rate by a total of 425 bp during the year, to 4.25/4.50%, first embarking on its tightening campaign in March. The ECB raised the deposit rate by 250bp from July, to 2.0%.

At the end of the year, China cast aside its "zero COVID" strategy and is gradually lifting restrictions. This, coupled with the implementation of stimuli, particularly in the real estate sector, eases the risk of new supply chain disruptions. It also bodes well for a rebound by private consumption, especially in the services sector.

Risk assets performed poorly throughout the year. The last time stocks and bonds fell so sharply and at the same time was all the way back in 1973. Starting with equity indices, the EuroStoxx 50 fell by 11.7%, the Ibex 35 by 5.6%, the S&P 500 by 19.4% and the Nasdaq 100

by 33.0%. In fixed income, the Bloomberg Barclays Global Aggregate Total Return Index plummeted by 16.3%. The only positive performances were by commodities; e.g., crude (Brent +10.5%), natural gas (+20.0%) and nickel (+44.8%). In the foreign exchange market, after the euro and dollar lost their parity, the euro staged a rebound in the fourth quarter thanks to a stronger stance by the ECB and the decrease in risk perception. The yen weakened sharply due to monetary policy divergence. Japan has yet to raise interest rates, with its key rate still at -0.10%.

4 Risk management

Note 44 of the notes to these financial statements describes the Group's risk policy and risk management in 2021. We refer to that note, which specifically relates to:

- Risk policy framework established by the board of directors.
- Credit risk: organisation, policies and management, performance in the year, maximum exposure to credit risk, refinancing and restructuring policy, trends in customer risks, control, monitoring and recoveries, non-performing loans and foreclosures, provisions and allowances
- Structural risk management policies: structural interest rate, liquidity and market risks.
- Market risk management policies
- Operational risk
- Reputational and compliance risk.
- Climate change risk.

Note 11 lists the asset and liability hedging operations carried out by the Bank.

5 Other relevant information

Bankinter's share performed extraordinarily in 2022, and its return was one of the best figures in the year. Shareholders who kept their shares throughout the year benefited from total return in excess of 45%, including the dividend, which went up by more than 20% on 2021. Share price revaluated at 39%, while Spanish listed banks stayed at 27% on average. The Bank's market capitalisation at 31 December 2022 rose to 5,634 million euros.

The improved share price contrasts with the negative performance of risk assets, affected by the war in Ukraine, stricter monetary policies and rising inflation. The IBEX 35 fell by 5.6% and the Eurostoxx 50 by 11.7%.

Share capital

At the end of 2022, Bankinter, S.A.'s share capital was represented by 898,866,154 fully subscribed and paid shares with a par value of 0.30 euros each. All the shares are represented by book entries, admitted for listing on the Madrid and Barcelona Stock Exchanges and traded on the Spanish continuous market.

Bankinter had 55,088 shareholders at 31 December. Residents in Spain held 54% of the share capital and non-residents the remaining 46%. Registered shareholders with significant holdings are detailed in the table below.

Key data and ratios for Bankinter shares in 2022 are detailed in the following tables:

After the pandemic and the invasion of Ukraine, Bankinter went back to normal in 2022 as regards its quarterly distribution of dividends. The three dividends paid out on the 2022 account statement were 0.222 euro per share, with a distributed total of 200 million euros.

In addition to these interim dividends, the final dividend approved at the 2023 Annual General Meeting on the recommendation of the board of directors at its previous meeting will be paid.

Dividends distributed or proposed in 2023 out of 2022 profit, excluding treasury shares held by the Bank:

Table on dividend distributions

Date	Dividend per share (euros)	Number of shares	Amount (thousands of euros)	Date of board approval	Profit (loss) for the year
June-22	0.07412058	898,866,154	66,610	June-2022	2,022
Sept-22	0.06453401	898,866,154	57,995	Sept-2022	2,022
Dec-22	0.08371622	898,866,154	75,233	Dec-2022	2,022
Mar-23	0.08931488	898,866,154	80,264	Feb-2023	2,022
Total	0.31168569		280,101		

American Depositary Receipts (ADR)

Bankinter has a Level 1 ADR programme managed by Bank of New York-Mellon, with 1,514,883 ADRs outstanding at the end of 2022. This allows US residents to invest in foreign companies through a US dollar-denominated product and to receive dividend payments in their own currency.

Commercial Retail Banking

In 2022, the WHO did not declare the end of the COVID-19 pandemic. However, its effects on people and the economic activity were substantially mitigated and the end is expected to be in sight (Joe Bien talked about the end of the pandemic in September 2022).

Although we must not forget that COVID-19 was still present, 2022 is bound to be remembered for Russia's invasion of Ukraine and the effects of this unprecedented situation in Europe in the 21st century. It has resulted in an increase in the price of raw materials and resources that, together with post-pandemic job and production recovery, has resulted in high inflation and the subsequent increase in the price of money. As a result, the hike in interest rates in general, and Euribor in particular, has come earlier and faster than expected at the start of the year.

This has led to the publication of Royal Decree-Law 19/2022, of 23 November, on relief measures for mortgage borrowers at risk of exclusion, with a two-fold purpose:

Creation of a new Code of Good Practices (transitory until 31 December 2024) with a view to mitigating the effect of the Euribor hike for variable-rate mortgage borrowers.

Amendment of the 2012 Code of Good Practices to relax the access requirements for borrowers and improve the conditions applicable to borrowers under the code.

In line with our social pledge, Bankinter has informed all customers with a Bankinter mortgage loan that we have adhered to the new Code of Good Practices. Consequently, we have rolled out all of the developments and adaptations needed in our products to apply the terms and conditions therein.

Also and before the Spanish government legislated thereon and before the end of the legal and sectoral COVID-19 mortgage moratoria, Bankinter developed and made available to our branches and customers a new renegotiation simulator to offer the best finance solution and repayment schedule to borrowers with difficulties making their payments.

As part of our commitment to society, we have launched the Joven 90 Plus mortgage, aimed at making it easier for young people to buy a home, lending them up to 90% of the purchase-sale price or the appraisal value of the property, even without requiring additional collateral.

As for customer funds, the salary account has remained the leading, most attractive product with over 470,000 salary accounts at the end of 2022 (5% more than in 2021). In addition to keeping the 5% and 2% interest in the first and second years of the account (even when the interest rate is negative) or the possibility of having a free credit card associated with the account, we have improved the product and, since March 2022, salary account holders now have access to two additional, commission-free accounts.

Lastly, we made further efforts in 2022 to strengthen our multi-channel approach, digitalisation and transparency in the range of products and services we offer customers. For example, at the end of the year, we launched a salary account for new customers online, which has all of the advantages of our salary account as well as the option to receive a free debit card.

Still on the subject of multichannel and digitalisation, the website for legal entities now has a reporting or investment portfolio tool, a power consultation tool enabling our customers to analyse the performance of their assets at the Bank.

Corporate Banking

In 2020, because of the COVID-19 pandemic, extraordinary measures had to be implemented to mitigate the negative effects of the world activity coming to a standstill. One of these measures was the COVID-19 ICO guarantee facility that, for two years, has been widely taken up by customers. In 2021, the Bank has adhered to the Code of Good Practices to help Spain's business community and economic recovery. This Code provided for three measures to help customers:

- Extensions of transaction terms (including new grace periods)
- Conversion into participating loans
- Requests for transfers

These measures ended on 1 June 2022 with limited response from customers due to their relative complexity, with a low number of applications. However, at the end of this Code of Good Practices, it was necessary to have new tools in place to help customers who needed it and were facing difficulties because of increased inflation, interest rates and fuel prices. Consequently, on 27 June 2022, the Spanish Council of Ministers published a resolution dated

21 June 2022 for customers to once again be able to apply for an extension of their transactions' terms within the deadlines set by the government's temporary aid framework.

Also, in 2022 Russia invaded Ukraine, leading to a sharp price hike, particularly in fuel and raw materials. In order to mitigate these problems, the government has restored one of the most successful pandemic measures, described in the previous paragraph – the ICO-UKRAINE guarantee facilities, backed by the new temporary aid regulation. Bankinter was one of the few banks to join this measure in 2022 since the facility's horizon was initially very short (ending on 1 December 2022) and the developments involved were more complex than they first appeared to be. This has earned us about 40% market share in this facility, according to the ICO's internal sources.

In 2022, we also marketed, together with Bankinter Portugal, the agreement with the European Investment Fund (EIF), which offers Bankinter a 70% guarantee and enables us to target small enterprises to help them with their new growth projects. This agreement is backed by the European Guarantee Fund (EGF), part of the 540,000 million euro EU rescue package approved by the European Council to tackle the economic impact caused by the pandemic. The agreement closed with an approximate portfolio of 265 million euros.

In 2021, we reviewed our entire account portfolio for SMEs and launched the Plan Empresa account as a supporting account for our customers, which aims to gain the customer's loyalty to reduce fees and commissions. The options vary depending on the type of contract (Plan 0, 10 or 20). In 2022, we have kept improving the product and will continue to do so in 2023. These enhancements include the overall picture of both the customer and their accounts to measure their loyalty, and the possibility of tracking their Plan's status online with details about their contract and direct access to operations and transactions to reach the best level (Plan 0).

As for products related to international business, worked focused mainly on two areas that are particularly important for our customers:

- Supply Chain Finance - reverse factoring: after a substantially complex development, the new Supply Chain platform has gone live in 2022, for an innovative and differential payment instrument. Our customers can pull the maximum value from their supply chain and strengthen their company's image abroad. This formula allows them to delegate management of the FX payments to their international suppliers. The product offers:
 - Finance for payment to their suppliers.

- The suppliers can have their payments made in advance and guaranteed.
 - From a simple, intuitive interface with detailed information that can easily integrate with corporate management systems.
- "Single-currency" loan: we have standardised a very popular product among Corporate Banking customers for term financing in the currency they invoice in (always limited to the currencies listed and convertible in Bankinter). This avoids the exchange rate risk when the loan is repaid.

As in recent years, the Bank has a firm commitment to improving its finance solutions for working capital, particularly its investments in factoring, reverse factoring and multi-line products. As for the latter, we have launched the Reverse factoring discount, to optimise our customers' cash flow without increasing their CIRBE risk. Multi-line is a global product. With a single signature before a notary public, our customers can manage all of their company's finance. In 2022, we have changed the product to make it more digital so that our customers enjoy online operations that are as convenient as possible.

In July 2020, the European Council approved an exceptional temporary recovery instrument called Next Generation EU amounting to 750 billion euros to be distributed among the Member States. The Recovery Fund ensures a coordinated European response to the economic and social consequences of the pandemic.

Several products were created to help to distribute the EU funds:

- NextGeneration UE guarantees: when customers apply for aid, they are usually asked for a guarantee of developing the project; we offer the possibility of issuing that guarantee
- Advance of funding: when funding is granted, it usually takes the government several months to pay it, so we offer products for advance payments and faster project development
- NextGeneration loans: funding may not be sufficient to finance our customers' projects so we are offering loans to complement these financial needs

7. Outlook

Going forward, the Group will continue to develop its business model based on the value creation through differentiation, focused on quality of service and underpinned by a multichannel approach and ongoing innovation, together with rigorous monitoring of asset

quality and solvency. With this model, the outlook is to maintain the positive trend in earnings and value creation.

8 Events after the reporting period

The relevant events after the end of the reporting period and until these annual financial statements were drafted are included in Note 52.

9 Research and development activities

At year-end 2022, the Group was not involved in any significant research and development activities.

10 Reliance on patents and licences

At year-end 2022, Bankinter Group was not subject to any significant degree of reliance on issuers of patents, licences, industrial, commercial or financial contracts, or new manufacturing processes.

11 Transactions involving treasury shares

These transactions are described in Note 21 to the consolidated financial statements.

12 Annual Corporate Governance Report

The annual corporate governance report, under the format outlined in Circular 5/2013, of 12 June, of the Spanish National Securities Market Commission (including subsequent amendments) and which is included in the management report as a separate section, in accordance with article 538 of Legislative Royal Decree 1/2010, of 2 July, approving the consolidated text of the Spanish Companies Act, is available for consultation the CNMV website under Other relevant information (OIR), and on Bankinter's website, under "Corporate gov.-remuneration pol."

Link to the report on the CNMV website: [CNMV - Information of corporate governance](#)

13. Annual report on directors' remuneration

The annual report on director remuneration, using the format provided in Circular 4/2013, of 12 June, of the Spanish National Securities Market Commission (including subsequent amendments), which is part of the management report, after the entry into force of Law 5/2021, of 12 April, amending the consolidated text of the Spanish Companies Act approved by Legislative Royal Decree 1/2010, of 2 July, and other financial regulations, with regard to the

promotion of long-term shareholder involvement in listed companies, is available for consultation on the CNMV website as Other relevant information (OIR) and on Bankinter's website under "Corporate gov.-remuneration pol."

Link to the report on the CNMV website: [CNMV - Information of corporate governance](#)

14 Non-financial statement

The non-financial statement, which is part of the consolidated management report, in accordance with Law 11/2018, of 28 December, amending, inter alia, article 49.5 of the Code of Commerce, and which includes non-financial information for the year ended 31 December 2022, is available for consultation on CNMV website as Other relevant information (OIR) and on Bankinter's website under the "Sustainability" section.

Link to the report on the CNMV website: [CNMV - Other relevant information](#)

15 Alternative performance measures

Bankinter Group uses certain "Alternative Performance Measures" ("APMs"). These APM are not subject to audit. These measures help readers to better understand the Group's financial performance and should be considered as additional information. In no case do they replace the financial information prepared under IFRSs. Furthermore, these measures can, both in their

definition and in their calculation, differ from other similar measures calculated by other companies and, therefore, may not be comparable.

The ESMA Guidelines define APMs as a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework.

The main APMs used by Bankinter Group are as follows:

Alternative performance measure	Definition	Purpose
Eligible exposures	Loans and advances to customers (without valuation adjustments) for each portfolio of financial assets + Loans and advances to credit institutions from customer activity (without valuation adjustments) + Fixed Income from customer activity (without valuation adjustments) + Contingent risks + Securitised assets derecognised from the balance sheet (before 2004)	It measures the total credit risk assumed by the Group with customers.
NPL ratio	Calculated as non-performing loans (with off-balance sheet exposure) divided by total exposure.	It measures the quality of the entities' loan book, indicating the percentage of non-performing loans of total loans.
Non-performing loan coverage ratio (%)	Calculated as provisions and allowances divided by non-performing loans (with off-balance sheet exposure).	It measures the percentage of non-performing loans portfolio covered by provisions and allowances for credit risk.
Cost-to-income ratio	This is the result of dividing the sum of staff expenses, other general administrative expenses and depreciation and amortisation by gross operating income.	It measures the amount of general administrative expenses and depreciation required to generate income.
Return on equity (ROE)	Net profit from continuing operations divided by average equity for the period (excluding profit or loss for the year, dividends and remuneration, and valuation adjustments). In the denominator, average own funds is the moving average of own funds of the previous 12 calendar months, or the corresponding period, excluding the profit/(loss) attributed to the Group as part of own funds, as well as dividends and accumulated other comprehensive income.	It measures the return obtained on funds invested in/held by the Company.

Alternative performance measure	Definition	Purpose
Earnings per share (EPS)	Earnings per share are calculated by dividing the earnings attributable to the Group, adjusted by the profit after tax arising recognised in equity from contingent convertible preference shares, by the weighted average number of ordinary shares outstanding during the period, excluding, where applicable, the treasury shares acquired by the Group.	It measures the net profit generated by each share, and enables shareholders to measure their return on their investment per share.
Loan-to-deposit ratio	The loan-to-deposit ratio is the result of dividing customer deposits by customer loans.	It measures the percentage of investment financed with customer funds and, therefore, represents the degree of reliance on wholesale funding.
Customer funding gap	The customer funding gap is the amount of customer loans not funded with retail deposits, but rather with funds raised on wholesale markets and the Bank's own funds Loans and receivables are considered to include: Loans to the public sector, commercial loans (including ICO loans), foreign-currency effect, secured loans, other term loans, demand loans, non-performing loans and valuation adjustments, non-resident customers, Portugal debt securities which are not bills of exchange and lending to credit institutions. Customer deposits are considered to include: Demand accounts, term deposits, promissory notes placed by the network, repos of promissory notes, structured bonds, subordinated debt placed by the network and ICO funds.	As an additional measure of reliance on wholesale funding, it measures the amount of business activity requiring finance with own funds or wholesale funding.
Liquidity gap	The liquidity gap is defined as the liquidity needs arising from the business that are covered by funds obtained on wholesale markets and the Bank's own funds. It includes the customer funding gap (the difference between customer loans and deposits) plus other items that generate inflows and outflows of funds. On the asset side of balance sheet: foreclosed assets, net of collateral and derivatives; and on the liability side: external securitisation fund accounts and BK securitisation fund accounts, net of other financial assets and liabilities (such as temporary accounts of transactions in progress).	As an additional measure of reliance on wholesale funding, it measures the amount of business activity requiring finance with own funds or wholesale funding.

RAF	Description	31.12.2022	31.12.2022
Eligible exposures	A Loans and advances to credit institutions from customer activity (without valuation adjustments)	2,047,711	1,540,662
	B Loans and advances to customers (without valuation adjustments) for each portfolio of financial assets	72,608,547	67,167,868
