

- Good performance in a challenging environment
- Group sales €9.9 billion (Q3 2017: €8.0 billion; Fx & portfolio adj. +1.9%)
- EBITDA before special items level year on year at €2.2 billion (-0.1%)
- Business performance at Pharmaceuticals remains strong
- Consumer Health with increase in sales (Fx & portfolio adj.), while currency effects weigh on earnings
- Crop Science posts substantial rise in sales and earnings due to Monsanto contribution – successful start to integration process
- Sales and earnings of Animal Health decline following a strong second quarter
- €3.9 billion one-time gain (before taxes) from divestments
- Net income €2.9 billion
- Core earnings per share €1.19
- Adjusted 2018 Group outlook confirmed •

2017 figures restated

Sales and Earnings Contribution from Monsanto

• The Monsanto business contributed €2,199 million in sales and €255 million in EBITDA before special items in the quarter.

Bayer Group Forecast 2018

• We confirm the outlook for the Bayer Group that was updated in the second quarter of 2018 to reflect the acquisition, although the forecasts for Consumer Health and Animal Health are now becoming increasingly ambitious.

%y-o-y cpa: Currency and portfolio adjusted sales growth

- Price -2.3%, volume +7.1%, currency -2.1%, portfolio -0.3%
- At Pharmaceuticals, our key growth products Xarelto, Eylea, Xofigo, Stivarga and Adempas once again • showed strong performance overall, with their combined sales rising by 15.7% (Fx & portfolio adj.) to €1,730 million (Q3 2017: €1,522 million). Combined sales of the 15 best-selling Pharmaceuticals products advanced by 7.8% (Fx & portfolio adj.). All regions contributed to this growth on a currency- and portfolio-

adjusted basis, with an especially positive development registered in Europe and China. Sales were held back by expected temporary supply disruptions for some of our established products, such as Adalat and Aspirin Cardio, as was the case in the first six months.

- We once again posted robust sales gains for Xarelto, due mainly to higher volumes in Europe, particularly in Germany, and China. Our license revenues recognized as sales in the United States, where Xarelto is marketed by a subsidiary of Johnson & Johnson were up slightly year on year.
- We significantly increased sales of **Eylea** compared with the prior-year quarter, primarily due to higher volumes in Europe and Canada. We also benefited from the differentiated clinical profile of Eylea compared with rival products.
- We registered a significant decline in sales of **Xofigo** that was attributable to lower volumes particularly in the United States and Japan. This was mainly due to the Phase III trial of radium-223 dichloride in combination with abiraterone acetate and prednisone / prednisolone being halted prematurely in November 2017.
- Business with Adempas expanded significantly due to positive business development in the United States and Europe. As in the past, sales reflected the proportionate recognition of the upfront and milestone payments resulting from the sGC collaboration with Merck & Co., United States.
- We registered a slight increase in sales of **Stivarga** on a currency- and portfolio-adjusted basis, primarily in China, where we continued to benefit from the market launches undertaken in previous years. In the United States, however, sales were down due to a highly competitive market environment.
- Sales of the **Mirena** product family (Mirena, Kyleena and Jaydess / Skyla) were flat with the prior-year quarter. Business in China, Canada and Brazil benefited from a considerable expansion of volumes, while sales declined in the United States due to lower demand.
- Sales of Kogenate / Kovaltry / Jivi came in slightly below the level of the prior-year quarter. Sales declines for Kogenate were almost completely offset by encouraging sales gains for Kovaltry.
- Sales of **Nexavar** declined in the face of continuing high competitive pressure in the United States and Japan. Strong sales growth in China was not sufficient to offset this effect.
- Sales were down for Adalat. Expanded volumes in China did not suffice to compensate for declines in Japan and Canada.
- Sales of YAZ / Yasmin / Yasminelle saw encouraging development on a currency- and portfolio-adjusted basis. This was primarily attributable to good business development in China and Japan following a product line extension in those countries in the previous year to include YAZ Flex, which more than offset the lower demand in the United States.
- We posted strong gains for **Glucobay** that were driven by a robust expansion of volumes in China.
- Sales of Aspirin Cardio were level with the prior-year quarter on a currency- and portfolio-adjusted basis. Gains in China stood against declines in Europe.
- The decline in sales of **Betaferon / Betaseron** was mainly attributable to the competitive market environment in the United States.
- Business with our **Stellant** contrast agent injection system benefited from higher volumes, particularly in the United States.
- EBITDA before special items of Pharmaceuticals rose by 4.1%. Adjusted for negative currency effects in the amount of €73 million, earnings were up by 9.0%. This increase was predominantly attributable to the very good development of business especially for our key growth products and to income of approximately €190 million from a Xarelto development collaboration with Janssen Research & Development, LLC, a subsidiary of Johnson & Johnson. The principal negative effects on earnings resulted from temporary supply disruptions and an increase in the cost of goods sold. In addition, the prior-year figure included a one-time gain in the mid-double-digit millions.

Consumer Health in Q3 2018

Euro million	Q3 2017	Q3 2018	% у-о-у	Consensus**
Sales	1,320	1,297	-1.7 / 3.0*	1,294
EBITDA before special items	274	248	-9.5	271
EBITDA-margin before special items	20.8%	19.1%		20.9%

*) Currency and portfolio adjusted sales growth **) Consensus figures as of November 5, 2018 provided by Vara Research GmbH

- Price -0.5%, volume 3.5%, currency -4.1%, portfolio -0.6%
- Sales of Consumer Health increased by 3.0% (Fx & portfolio adj.) in the third guarter of 2018, to €1,297 million. All regions contributed to this growth on a currency- and portfolio-adjusted basis. We registered a substantial increase in Asia / Pacific in particular.
- **EBITDA before special items** of Consumer Health declined by 9.5%. Adjusted for negative currency • effects of €23 million, earnings were almost level with the prior-year period (-1.1%). Higher volumes, lower selling expenses and a decrease in general administration expenses had a positive impact on earnings. By contrast, prior-period earnings included one-time gains of approximately €30 million that mainly related to the sale of non-core brands.

%y-o-y cpa: Currency and portfolio adjusted sales growth

- Price 1.0%, volume -10.5%, currency -3.0%, portfolio +96.3%
- Crop Science posted sales of €3,733 million. The businesses divested to BASF contributed approximately €100 million to third-quarter sales prior to the closing of the respective transactions in August. Sales increased by 83.8% on a reported basis, thanks mainly to a positive portfolio effect of 96.3% due to the acquisition of Monsanto (€2,199 million) less the prorated contribution from the divested businesses in the prior year (€243 million). Sales were also impacted by a negative currency effect of 3.0%. The 9.5% decline on a currency- and portfolio-adjusted basis resulted especially from the accounting measures taken in Brazil in the prior year and lower volumes in the Europe / Middle East / Africa region.
- Sales in the Europe / Middle East / Africa region increased by 59.3% (Fx adj.) to €817 million, with a portfolio effect of €353 million. Sales fell by 7.9% on a currency- and portfolio-adjusted basis. The SeedGrowth business (Other) saw a decline due to a loss of registration in France. We also saw a decline in sales at Herbicides and Fungicides as a result of the dry weather.
- Sales in North America increased by 145.5% (Fx adj.) to €948 million, with a portfolio effect of €541 million. The 5.4% increase on a Fx- and portf.-adjusted basis was mainly attributable to the Fungicides business, which posted gains due partly to a product launch in Canada, and the SeedGrowth business (Other). We also registered double-digit-percentage sales growth at Environmental Science. By contrast, there was a decline in sales at Soybean Seed & Traits, and sales of selective herbicides were down in the U.S.
- In the Asia / Pacific region, sales increased by 23.1% (Fx adj.) to €452 million, with a portfolio effect of €107 million. Sales fell by 5.3% on a Fx- and portf.-adjusted basis. Insecticides in particular saw a decline in sales in India against a strong prior-year quarter due to the introduction of a new sales tax system in the previous year.
- In Latin America, sales advanced by 108.7% (Fx adj.) to €1,516 million, with a portfolio effect of €955 million. Sales fell by 20.4% after adjusting for currency and portfolio effects, due primarily to the accounting measures taken in Brazil in the prior year. We posted a slight increase in sales overall in the other Latin American countries on a currency- and portfolio-adjusted basis.
- EBITDA before special items of Crop Science climbed by 25.7% to €386 million. This increase was primarily attributable to earnings contributions from the newly acquired business in the amount of €255 million. Negative factors included the aforementioned accounting measures taken in Brazil in the prior year, lower volumes in Europe, higher other operating income in the prior-year quarter, the prorated Q3 2017 earnings contributions from the businesses divested to BASF, and a negative currency effect of €59 million (excluding the acquired business).

Pro-forma Sales of Crop Science by Business Unit (unaudited)

Due to the scope of the acquired activities and the seasonality of the business, we are presenting sales by strategic business entity on an unaudited, pro-forma basis, to more transparently reflect the underlying operational business development for the combined business of Crop Science and Monsanto, among other reasons. In this context, sales are presented as if both the acquisition of Monsanto and the associated divestitures had taken place already as of January 1, 2017.

Euro million	Q3 2017	Q3 2018	% у-о-у	%y-o-y Fx and portf. adj.
Crop Science	3,704	3,578	-3.4	1.4
Herbicides	1,079	1,132	4.9	9.7
Corn Seed & Traits	572	600	4.9	9.2
Soybean Seed & Traits	303	375	23.8	39.8
Fungicides	552	453	-17.9	-13.8
Insecticides	421	353	-16.2	-12.7
Environmental Science	208	206	-1.0	0.7
Vegetable Seed	217	228	5.1	7.3
Other	352	231	-34.4	-31.0

The unaudited pro forma data are presented as if both the acquisition of Monsanto and the associated divestments had taken place as of January 1, 2017. Sales of Monsanto are presented in periods as per the Bayer fiscal year. One-time effects of business operations, the accounting for discont. operations and the recognition and measurement of sales from certain business transactions have been adjusted in line with our accounting. Due to this simplified procedure, they explicitly do not reflect sales according to IFRS or IDW RH HFA 1.004.

- Sales in the third quarter of 2018 increased by 1.4% (Fx adj.) on a pro-forma basis.
- The increase at Herbicides resulted mostly from higher prices and from higher volumes in Latin America and North America. This was partly offset by the accounting measures taken in Brazil in the prior year.
- Corn Seed & Traits developed positively, particularly in North America, thanks to seasonal shifts and a strong start to the season in Latin America.
- The increase in sales at Soybean Seed & Traits was attributable especially to phasing from the upcoming quarters as well as the higher market penetration achieved by Intacta RR2 PRO[™] in Latin America.
- At Fungicides and Insecticides, we registered a decline in sales due to the accounting measures taken in Brazil in the prior year and weather conditions in Europe.
- The decline at Other was attributable particularly to SeedGrowth and the aforementioned loss of registration in France, as well as to a decline in the rapeseed / canola market in Europe.

Animal Health in Q3 2018

Euro million	Q3 2017	Q3 2018	% у-о-у	Consensus**
Sales	359	304	-15.3 / -13.5*	358
EBITDA before special items	81	44	-45.7	75
EBITDA-margin before special items	22.6%	14.5%		20.9%

*) Currency and portfolio adjusted sales growth **) Consensus figures as of November 5, 2018 provided by Vara Research GmbH

- Price -0.6%, volume -12.9%, currency -1.8%, portfolio ±0.0%
- Sales of Animal Health in the third guarter of 2018 fell by 13.5%. Business in the North America region declined sharply due to shifts in demand from the third quarter into the first six months. Sales were also down year on year in the Europe / Middle East / Africa and Latin America regions. By contrast, we achieved gains in the Asia / Pacific region on a currency- and portfolio adjusted basis. Sales continue to be negatively impacted by amended financial reporting standards (IFRS 15).
- EBITDA before special items of Animal Health declined by 45.7%. Adjusted for negative Fx-effects in the amount of €3 million, earnings were down by 42.0%. This significant decline is primarily attributable to lower volumes, mainly due to shifts in demand from the third quarter into the first half of the year, and to a negative impact on earnings from the application of IFRS 15. A decline in expenses, especially selling expenses, was insufficient to offset these negative factors.

Cautionary Statements Regarding Forward-Looking Information

Certain statements contained in this communication may constitute "forward-looking statements." Actual results could differ materially from those projected or forecast in the forward-looking statements. The factors that could cause actual results to differ materially include the following: the risk that the parties may be unable to achieve expected synergies and operating efficiencies in the merger within the expected timeframes (or at all) and to successfully integrate the operations of Monsanto Company ("Monsanto") into those of Bayer Aktiengesellschaft ("Bayer"); such integration may be more difficult, time-consuming or costly than expected; revenues following the transaction may be lower than expected; operating costs, customer loss and business disruption (including difficulties in maintaining relationships with employees, customers, clients or suppliers) may be greater or more significant than expected following the transaction; the retention of certain key employees at Monsanto; the parties' ability to meet expectations regarding the accounting and tax treatments of the merger; the impact of refinancing the loans taken out for the transaction; the impact of indebtedness incurred by Bayer in connection with the transaction and the potential impact on Bayer's rating of indebtedness; the effects of the business combination of Bayer and Monsanto, including the combined company's future financial condition, operating results, strategy and plans; other factors detailed in Monsanto's Annual Report on Form 10-K filed with the U.S. Securities and Exchange Commission (the "SEC") for the fiscal year ended August 31, 2017, and Monsanto's other filings with the SEC, which are available at http://www.sec.gov and on Monsanto's website at www.monsanto.com; and other factors discussed in Bayer's public reports which are available on the Bayer website at www.bayer.com. Bayer assumes no obligation to update the information in this communication, except as otherwise required by law. Readers are cautioned not to place undue reliance on these forwardlooking statements that speak only as of the date hereof.
