THIS REGISTRATION DOCUMENT IS IMPORTANT AND REQUIRES YOUR IMMEDIATE ATTENTION. If you are in any doubt about the contents of this Registration Document, or as to what action you should take, you should immediately consult an appropriately authorized professional advisor.

This document constitutes a registration document (the "**Registration Document**") prepared in accordance with Annex 1 of Commission Delegated Regulation (EU) 2019/980 of March 14, 2019, supplementing Regulation (EU) 2017/1129 of the European Parliament and of the Council as regards the format, content, scrutiny and approval of the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Commission Regulation (EC) No 809/2004 ("Delegated Regulation 2019/980") relating to Ibercaja Banco, S.A. ("**Ibercaja Banco**" or the "**Company**").

On May 3, 2022, this Registration Document was approved by and registered with the Spanish Securities Market Commission (*Comisión Nacional del Mercado de Valores*, the "**CNMV**"), as the competent authority under Regulation (EU) 2017/1129 of the European Parliament and of the Council of June 14, 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC (the "**Prospectus Regulation**"), the consolidated text of the Securities Market Act approved by Royal Legislative Decree 4/2015 of October 23 (*texto refundido de la Ley del Mercado de Valores aprobado por el Real Decreto Legislativo 4/2015, de 23 de octubre*, the "**Securities Market Act**") and the relevant implementing measures in Spain, and shall be valid for a period of 12 months after its approval, that is, until May 3, 2023. This Registration Document is available on both the CNMV's website (www.cnmv.es) and the Company's website (www.ibercaja.com), subsection "Shareholders and Investors".

This Registration Document has been prepared to provide information on the Company and no ordinary shares or other securities are being offered for subscription or sale pursuant to this Registration Document.

THIS REGISTRATION DOCUMENT SHOULD BE READ IN ITS ENTIRETY, INCLUDING THE SECTION ENTITLED "RISK FACTORS" BEGINNING ON PAGE 9 THEREOF WHICH INCLUDES A DISCUSSION OF CERTAIN RISKS RELATING TO THE COMPANY.

iberCaja

IBERCAJA BANCO, S.A.

(a sociedad anónima incorporated in the Kingdom of Spain)

No representation or warranty, express or implied, is made and no responsibility or liability is accepted by any person other than the Company, as to the accuracy, completeness, verification or sufficiency of the information contained herein, and nothing in this Registration Document is, or may be relied upon as, a promise or representation in this respect, as to the past or future. No person is or has been authorised to give any information or to make any representation not contained in or not consistent with this Registration Document and, if given or made, such information or representation must not be relied upon as having been authorised by or on behalf of the Company. Without limitation, the contents of the website of the Company do not form part of this Registration Document and information contained therein should not be relied upon by any person. The delivery of this Registration Document shall not, under any circumstances, create any implication that there has been no change in the business or affairs of the Company since the date of this Registration Document or that the information contained herein is correct as of any time subsequent to its date.

This Registration Document may be combined with a securities note and summary to form a prospectus in accordance with the Prospectus Regulation. A prospectus is required before an issuer can offer transferable securities to the public or request the admission of transferable securities to trading on a regulated market. However, this Registration Document, where not combined with the securities note and summary to form a prospectus, does not constitute neither a prospectus nor an offer or invitation to sell or issue, or a solicitation of an offer or invitation to purchase or subscribe for, any securities in the Company in any jurisdiction, nor shall this Registration Document alone (or any part of it), or the fact of its distribution, form the basis of, or be relied upon in connection with, or act as any inducement to enter into, any contract or commitment whatsoever with respect to any offer or otherwise.

The distribution of this Registration Document in certain jurisdictions may be restricted by law. Thus, this Registration Document may not be used in any such jurisdictions, and no action has been taken or will be taken by the Company to permit the possession or distribution of this Registration Document in any jurisdiction where action for that purpose may be required or doing so is restricted by law. Accordingly, this Registration Document may not be distributed or published except under circumstances that will result in compliance with any applicable laws and regulations in any such jurisdiction.

The contents of this Registration Document are not to be construed as legal, financial or tax advice. Each recipient of this Registration Document should consult his, her or its own legal, financial or tax adviser for advice.

You are deemed to agree to each of the notices set forth below by accepting delivery of this Registration Document.

In this Registration Document, “we”, “us”, “our” and “ours” refers to the Company, unless otherwise indicated or the context otherwise requires.

TABLE OF CONTENTS

DEFINITIONS

Unless otherwise specified or the context requires otherwise in this Registration Document:

- references to the "**2019 Annual Accounts**" refer to the Company's audited consolidated annual accounts, prepared under IFRS-EU, as of and for the year ended December 31, 2019;
- references to the "**2020 Annual Accounts**" refer to the Company's audited consolidated annual accounts, prepared under IFRS-EU, as of and for the year ended December 31, 2020;
- references to the "**2021 Annual Accounts**" refer to the Company's audited consolidated annual accounts, prepared under IFRS-EU, as of and for the year ended December 31, 2021;
- references to "**Act 10/2014**" refer to Act 10/2014, of June 26, on organization, supervision and solvency of credit institutions (*Ley 10/2014, de 26 de junio, de ordenación, supervisión y solvencia de entidades de crédito*);
- references to the "**ALCO portfolio**" refer to the fixed income portfolio of Ibercaja Banco, including low-risk bonds, mainly Spanish government debt and SAREB bonds, with an average duration, including coverage, of 3.9 years and excluding the portfolio of our insurance business;
- references to the "**Annual Accounts**" refer to the 2021 Annual Accounts, the 2020 Annual Accounts and the 2019 Annual Accounts;
- references to "**APMs**" refer to alternative performance measures. Items identified in this Registration Document as APMs are defined together with their related reconciliation, under "Alternative Performance Measures";
- references to the "**Appointments Committee**" refer to the appointments committee of the Board of Directors;
- references to "**asset management and bancassurance**" refer to the management of mutual funds (including third party funds, but excluding, for the avoidance of double-counting, the assets of funds that invest in Ibercaja Gestión funds), the management of pension funds and our insurance business activity (which includes life-savings insurance and risk insurance products);
- references to "**asset management and life savings insurance**" refer to the management of mutual funds, the management of pension funds and the part of our insurance business activity related only to life savings insurance products;
- references to "**AT1**" refer to additional tier 1;
- references to "**ATMs**" refer to automated cash machines;
- references to the "**Audit and Compliance Committee**" refer to the audit and compliance committee of the Board of Directors;
- references to "**AuM**" refer to assets under management;
- references to "**Banco Caja3**" refer to Banco Grupo Cajatrés, S.A.U.;
- references to "**Bank of Spain Circular 2/2016**" refer to Bank of Spain Circular 2/2016, of February 2 (*Circular 2/2016, de 2 de febrero, del Banco de España, a las entidades de crédito, sobre supervisión y solvencia, que completa la adaptación del ordenamiento jurídico español a la Directiva 2013/36/UE y al Reglamento (UE) n.º 575/2013*);
- references to the "**Banking Foundations Act**" refer to Act 26/2013, of December 27, on savings banks and banking foundations;
- references to the "**Board of Directors**" refer to the board of directors of the Company;
- references to the "**Board Regulations**" refer to the regulations that govern the Board of Directors;

- references to the "**BRRD**" refer to Directive 2014/59/EU, of May 15, establishing a framework for the recovery and resolution of credit institutions and investment firms, as amended;
- references to "**CASER**" refer to Caja de Seguros Reunidos, Compañía de Seguros y Reaseguros, S.A.;
- references to the "**CCPs**" refer to central counterparties;
- references to "**Cerro Murillo**" refer to Cerro Murillo, S.A.;
- references to "**CET1**" refer to common equity tier 1;
- references to "**CET1 ratio**" refer to CET1 capital expressed as a percentage of RWAs;
- references to "**CIT**" refer to corporate income tax;
- references to "**CIT Act**" refer to the Spanish Corporate Income Tax Act 27/2014, of November 27 (*Ley 27/2014, de 27 de noviembre, del Impuesto sobre Sociedades*);
- references to the "**CNMV**" refer to the Spanish National Securities Market Commission (*Comisión Nacional del Mercado de Valores*);
- references to the "**Code of Good Practices**" refer to the code of good practices approved by the Spanish government on May 11, 2021 in order to establish the framework under which those credit institutions voluntarily acceding to such code could negotiate with their customers the implementation of different measures in relation to their Guaranteed Credit Lines, as amended, and which is available at https://www.boe.es/eli/es/res/2021/05/12/(1);
- references to "**combined buffer requirement**" refer to the combination of up to five capital buffers, as applicable to each institution or group, to be satisfied with CET1 capital: the capital conservation buffer, the institution-specific counter-cyclical capital buffer, the systemic risk buffer, the G-SII buffer and the O-SII buffer;
- references to "**Common Reporting (COREP) Statements**" refer to the formats for the declaration of solvency statements, both for individuals and companies which were defined by the EBA (European Bank Authority) to cover the information to be reported by financial institutions regarding credit risk, market risk and operational risk;
- references to the "**Company**" refer to Ibercaja Banco, S.A., a company incorporated under the laws of Spain on September 22, 2011 as a public limited liability company (*sociedad anónima*) pursuant to a notarized public deed of incorporation granted before the public notary of Zaragoza Mr. Francisco de Asís Pizarro Moreno under number 3,169 of his records and registered with the Commercial Registry of Zaragoza under volume 3,865, page Z-52186, book 0 and sheet 1, and as a credit institution with the Special Registry at the Bank of Spain (*Registro Administrativo de Bancos y Banqueros del Banco de España*) under number 2,085, and holder of Spanish tax identification number A-99319030, with registered office at Plaza de Basilio Paraíso, 2, 50008 Zaragoza, Spain, and phone number +34 976 76 79 83;
- references to the "**Compensation Committee**" refer to the compensation committee of the Board of Directors;
- references to the "**Corporate Governance Code**" refer to the Spanish Corporate Governance Code for Listed Companies (*Código de Buen Gobierno de las Sociedades Cotizadas*) approved by the CNMV in February 2015, as amended in June 2020;
- references to the "**Costa Transaction**" refer to the sale in December 2019 of a portfolio of NPLs for an aggregate nominal amount of €73 million to DSSV S.à R.L.;
- references to "**CRD IV**" refer to Directive 2013/36/EU of the European Parliament and of the Council of June 26, 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC and repealing Directives 2006/48/EC and 2006/49/EC, as amended;

- references to the “**CRD IV Implementing Measures**” refer, together, to Royal Decree-law 14/2013, Act 10/2014, Royal Decree 84/2015 and the Bank of Spain Circular 2/2016;
- references to “**CRR**” refer to Regulation (EU) 575/2013, of June 26, on prudential requirements for credit institutions and investment firms, as amended;
- references to “**customer**” refer to a holder of the first rank of our product or service (for commercial purposes a couple is considered as one customer);
- references to the “**Delegated Committee**” refer to the delegated committee of the Board of Directors;
- references to the “**Deposit Guarantee Schemes Directive**” refer to Directive 2014/49/EU of the European Parliament and of the Council on deposit guarantee schemes;
- references to “**Directive 93/13**” refer to Council Directive 93/13/EEC of April 5, 1993 on unfair terms in consumer contracts;
- references to the “**EBA”** refer to the European Banking Authority;
- references to the “**EBA Guidelines**” refer to the guidelines on the revised common procedures and methodologies for the SREP and supervisor stress testing revised by the EBA on March 18, 2022;
- references to the “**ECB**” refer to the European Central Bank;
- references to the “**EEA**” refer to the European Economic Area;
- references to “**ESMA**” refer to the European Securities and Markets Authority;
- references to the “**ESMA Guidelines**” refer to the guidelines issued by the European Securities and Markets Authority on October 5, 2015 on alternative performance measures;
- references to the “**EU**” refer to the European Union;
- references to “**euro**”, or “**€**” or “**EUR**” are to the single currency of the participating member states of the European and Monetary Union of the Treaty Establishing the European Community, as amended from time to time;
- references to the “**Financial Group**” refer to Ibercaja Gestión, Ibercaja Pensión, Ibercaja Vida, Ibercaja Mediación and Ibercaja Leasing, a group of subsidiaries responsible for the management of mutual funds, the management of pension funds, our insurance business and our leasing and renting business;
- references to “**FSB**” refer to Financial Stability Board;
- references to “**Fundación Caja Badajoz**” refer to Fundación Ordinaria Caja Badajoz, formerly, Monte de Piedad y Caja General de Ahorros de Badajoz;
- references to “**Fundación Círculo de Burgos**” refer to Fundación Círculo Católico de Burgos, formerly, Caja de Ahorros y Monte de Piedad del Círculo Católico de Obreros de Burgos;
- references to “**Fundación Inmaculada de Aragón**” refer to Fundación Caja de Ahorros de la Inmaculada de Aragón, formerly, Caja de Ahorros de la Inmaculada de Aragón;
- references to the “**GDP**” refer to gross domestic product;
- references to “**GDPR**” refer to Regulation (Regulation (EU) 2016/679 of the European Parliament and of the Council of April 27, 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation);
- references to the “**General Shareholders’ Meeting Regulations**” refer to regulations governing our general shareholders’ meeting;
- references to the “**Group**” refer to the Company together with its subsidiaries;

- references to “**Growth Markets**” refer, together, to the autonomous regions or provinces where we expanded our business starting in 1989, namely, Madrid and the Mediterranean basin (Catalonia and Valencian Community);
- references to “**G-SII**” refer to the global systemically important institutions. As of the date of this this Registration Document Ibercaja Banco is not a G-SII;
- references to our “**Home Markets**” refer, together, to the autonomous regions or provinces that were originally serviced by the Ibercaja Savings Bank, namely, Aragón, La Rioja and the province of Guadalajara, together with, as result of the integration of Banco Caja3, the provinces of Burgos and Badajoz;
- references to “**Ibercaja Banco**” refer to Ibercaja Banco, S.A. or the Company;
- references to “**Ibercaja Directo**” refer to the Company’s online banking platform;
- references to the “**Ibercaja Foundation**” refer to the Ibercaja banking foundation (*Fundación Bancaria Ibercaja*);
- references to the “**Ibercaja Foundation Protocol**” refer to the protocol governing the management of the financial stake held by the Ibercaja Foundation in Ibercaja Banco (*Protocolo de gestión de la participación financiera de la Fundación Bancaria Ibercaja en Ibercaja Banco*);
- references to “**Ibercaja Foundation Services Agreement**” refer to the services agreement entered into by Ibercaja Banco and the Ibercaja Foundation on December 20, 2019;
- references to “**Ibercaja Gestión**” refer to Ibercaja Gestión S.G.I.I.C., S.A., a wholly owned subsidiary that manages our investments funds;
- references to “**Ibercaja Leasing**” refer to Ibercaja Leasing y Financiación, S.A., Establecimiento Financiero de Crédito, a wholly owned subsidiary that manages our leasing and renting arrangements;
- references to “**Ibercaja Mediación**” refer to Ibercaja Mediación de Seguros, S.A.U., a wholly-owned subsidiary that manages our general insurance brokerage business;
- references to “**Ibercaja Pensión**” refer to Ibercaja Pensión, E.G.F.P., S.A.U., a wholly-owned subsidiary that manages our pension funds;
- references to the “**Ibercaja Savings Bank**” refer to the former savings bank Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja, now transformed into the Ibercaja Foundation;
- references to “**Ibercaja Vida**” refer to Ibercaja Vida Compañía de Seguros y Reaseguros, S.A.U., a wholly-owned subsidiary that manages our life savings insurance and life risk insurance products;
- references to “**Iberclear**” refer to *Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.U.*;
- references to “**ICAAP**” refer to the internal capital adequacy assessment process;
- references to “**IFRS-EU**” refer to International Financial Reporting Standards as adopted by the EU;
- references to “**ILAAP**” refer to internal liquidity adequacy assessment process;
- references to “**INE**” refer to National Statistical Institute (*Instituto Nacional de Estadística*);
- references to “**Initial Ibercaja Foundation Services Agreement**” refer to the services agreement entered into by Ibercaja Banco and the Ibercaja Foundation on December 22, 2011;
- references to the “**Insurance Distribution Directive**” refer to Directive 2016/97, of January 20, on insurance distribution;

- references to the "**Internal Code of Conduct**" refer to the internal securities markets code of conduct (*Reglamento Interno de Conducta en los Mercados de Valores*) of the Company;
- references to the "**JSTs**" refer to joint supervisory teams;
- references to the "**Large Risks and Solvency Committee**" refer to large risks and solvency committee of the Board of Directors;
- references to "**Market Abuse Regulation**" refer to Regulation (EU) 596/2014, of April 16, 2014, on market abuse, as amended;
- references to "**Maximum Distributable Amount**" refer to maximum distributable amount calculated in accordance with Article 73 of the Royal Decree 84/2015, of February 13, 2015, which develops Act 10/2014;
- references to "**MiFID II**" refer Markets in Financial Instruments Directive 2014/65/EU, as amended;
- references to "**MREL**" refer to minimum requirements for own funds and eligible liabilities;
- references to "**NPEs**" refer to non-performing exposures;
- references to "**NPLs**" refer to non-performing loans related to gross loans and advances to customers[APM];
- references to the "**Ordesa Transaction**" refer to the sale in June 2019 of a portfolio of NPLs with an aggregate nominal amount of €534 million to MELF Investment Holding II S.à. r.l.
- references to the "**Oroel Transaction**" refer to the sale in December 2021 of a portfolio of NPLs with an aggregate nominal amount of €51,260 thousand to LM IV B S.V. and Axactor España, S.L.
- references to "**O-SII**" refer to other systemically important institutions;
- references to "**our**", "**us**" and "**we**" refer to the Company and its subsidiaries;
- references to "**P2G**" refer to pillar 2 guidance;
- references to "**PEPs**" refer to politically exposed persons;
- references to "**PoS terminal**" refer to a point-of-sales terminal, which is a device that, by means of software applications, allows a business to manage the collection by credit card of the payments by its customers for its products or services;
- references to the "**Prospectus Regulation**" refer to European Parliament and Council Regulation (EU) No 2017/1129, of June 14, 2017, on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC, as amended;
- references to "**RAF**" refer to the risk appetite framework of the Company;
- references to "**Regulation (EU) 2021/451**" refer to Commission Implementing Regulation (EU) 2021/451 on implementing technical standards for the application of Regulation (EU) No 575/2013 of the European Parliament and of the Council with regard to supervisory reporting of institutions and repealing Implementing Regulation (EU) No 680/2014;
- references to the "**Relevant Resolution Authority**" refer to FROB, the SRB or, as the case may be and according to Act 11/2015, the Bank of Spain or the CNMV or any other entity with the authority to exercise any such tools and powers from time to time;
- references to "**Residencial Murillo**" refer to Residencial Murillo, S.A.;
- references to the "**Royal Decree 84/2015**" refer to Royal Decree 84/2015, of February 13, implementing Act 10/2014 (*Real Decreto 84/2015, de 13 de febrero, por el que se desarrolla la Ley 10/2014, de 26 de junio, de ordenación, supervisión y solvencia de entidades de crédito*);

- references to "**Royal Decree-law 14/2013**" refer to Royal Decree-law 14/2013, of November 29, on urgent measures to adapt Spanish law to EU regulations on the subject of supervision and solvency of financial entities (*Real Decreto-ley 14/2013, de 29 de noviembre, de medidas urgentes para la adaptación del derecho español a la normativa de la Unión Europea en materia de supervisión y solvencia de entidades financieras*);
- references to "**RWAs**" refer to risk-weighted assets;
- references to "**SAREB**" refer to the Spanish company for the management of assets arising from the restructuring of the banking system (*Sociedad de Gestión de Activos Procedentes de la Reestructuración Bancaria, S.A.*);
- references to the "**SCIIF**" refer to the internal management of financial information (*Sistema de Control Interno de Información Financiera*);
- references to the "**Securities Market Act**" refer to the reinstated text of the Securities Market Act approved by Royal Decree 4/2015, of October 23 (*Texto Refundido de la Ley del Mercado de Valores aprobado por el Real Decreto Legislativo 4/2015, de 23 de octubre*), as amended;
- references to the "**Shares**" refer to the Company's ordinary shares;
- references to the "**Single Resolution Fund**" refer to the single resolution fund provided by the SRM Regulation;
- references to "**SMEs**" refer to small and medium enterprises;
- references to the "**Spanish Companies Act**" refer to the reinstated text of the Spanish Companies Act approved by Royal Decree 1/2010, of July 2 (*Texto Refundido de la Ley de Sociedades de Capital aprobado por el Real Decreto Legislativo 1/2010, de 2 de julio*), as amended;
- references to the "**Spanish Stock Exchanges**" refer to the Madrid, Barcelona, Bilbao and Valencia stock exchanges;
- references to the "**SRB**" refer to the Single Resolution Board;
- references to the "**SREP**" refer to the ECB's supervisory review and evaluation process, which is an assessment of the overall viability of a credit institution and includes the imposition of capital requirements determined in accordance with such assessment;
- references to the "**SRM**" refer to the Single Resolution Mechanism providing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms;
- references to the "**SRM Regulation**" refer to Regulation (EU) No 806/2014 of July 15, 2014, establishing uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of a Single Resolution Mechanism and a Single Resolution Fund and amending Regulation (EU) No 1093/2010;
- references to the "**SSM**" refer to Single Supervisory Mechanism;
- references to the "**SSM Regulation**" refers to Council Regulation (EU) No 1024/2013 of October 15, 2013 conferring specific tasks on the European Central Bank concerning policies relating to the prudential supervision of credit institutions;
- references to the "**Strategy Committee**" refer to strategy committee of the Board of Directors;
- references to the "**TLAC**" refer to total loss-absorbing capacity;
- references to the "**TLTRO**" refer to TLTRO II and TLTRO III;
- references to the "**TLTRO II**" refer to the long-term refinancing program "Targeted Longer-Term Refinancing Operations" introduced in 2016, a monetary tool of the ECB;
- references to the "**TLTRO III**" refer to the long-term refinancing program "Targeted Longer-Term Refinancing Operations" introduced in 2019, a monetary tool of the ECB;

- references to the "**UBO**" refer to the ultimate beneficial owner;
- references to the **"U.S. Securities Act**" refer to the United States Securities Act of 1933, as amended; and
- references to "**U.S. dollars**", "**dollars**", "**U.S.$**", "**USD**" or "**$**" refer to the lawful currency of the United States of America.

RISK FACTORS

Any of the following risks and uncertainties could have a material adverse effect on our business, financial condition, results of operations and prospects.

The risks described below are not the only risks that we face. There may be additional risks and uncertainties that are currently unknown or that our management believe to be immaterial but which, if materialized, could harm our business, financial condition, results of operations and prospects.

We declare that in the preparation of this Registration Document we have taken into account the instructions and recommendations received from our prudential supervisors (ECB and Bank of Spain) that may have a material impact on our financial statements and the risks described herein.

RISKS RELATING TO OUR OPERATIONS

Our businesses are concentrated in Spain and primarily depend on the condition of the Spanish economy

We conduct all of our business in Spain, particularly in the autonomous regions of Aragón and La Rioja and the provinces of Guadalajara, Burgos and Badajoz (together, our "**Home Markets**") which represented 62.07% of our recurring revenues^{APM} for the year ended December 31, 2021 (59.18% and 57.00% for the years ended December 31, 2020 and 2019, respectively) and in Madrid and the Mediterranean basin, which includes the autonomous regions of Catalonia and the Valencian Community (together, our "**Growth Markets**") which represented 30.54% of our recurring revenues^{APM} for the year ended December 31, 2021 (32.53% and 34.04% for the years ended December 31, 2020 and 2019, respectively). All of our consolidated assets are located in Spain and all of our revenue is derived from Spain. Consequently, the income generated by most of the products we sell and by the services we provide depends on the performance of the Spanish economy. Economic conditions affect demand for our products and services, our funding costs and our asset quality.

The performance of the Spanish economy is highly correlated to the performance of other economies so it could be negatively affected by weak economic conditions in other economies, whether developed or emerging, particularly within the EEA, which may be caused by the consequences of the withdrawal of the United Kingdom from the European Union, global trade tensions and several political and geopolitical risks. In particular, on February 24, 2022, Russia launched a full-scale invasion of Ukraine. As a result of the invasion, the European Union, the United Kingdom and the United States, among others, have developed and continue to develop coordinated sanctions and export-control measure packages. The uncertain nature, magnitude and duration of Russia's invasion of Ukraine and actions taken by Western and other states and multinational organizations in response thereto, including, among other things, the potential effects of sanctions, export-control measures, travel bans and asset seizures, as well as any Russian retaliatory actions, including, among other things, restrictions on oil and gas exports and cyber-attacks, have contributed to increased market volatility and uncertainty and could lead to significant disruption, as well as higher inflation (including by contributing to further increases in the prices of energy, oil and other commodities and further disrupting supply chains) and lower or negative economic growth. Such geopolitical risks may adversely impact macroeconomic factors, which could in turn have a negative effect on our business, financial condition, results of operations and prospects. In addition, the spread and effects of the COVID-19 pandemic have adversely affected all economies, including the Spanish economy, which has negatively impacted all financial metrics of the Group and deteriorated the solvency of certain of our clients and counterparties. See "*Risk Factors— The Group is subject to several risks as a result of the effects of the COVID-19 pandemic*".

The Group is subject to several risks as a result of the effects of the COVID-19 pandemic

On March 11, 2020, the World Health Organization classified COVID-19 as an international pandemic. To cope with this situation in Spain, the Spanish government declared a State of Alarm by virtue of Royal Decree 463/2020, of March 14, imposing several restrictions on mobility and on the exercise of non-essential activities, which was extended until June 21, 2020. In light of a further COVID-19 outbreak, in October 2020, pursuant to Royal Decree 926/2020, of October 25, the Spanish government declared a new State of Alarm which was extended until May 9, 2021.

Several measures were implemented to try to limit the impact of the COVID-19 pandemic both by European and Spanish authorities (see "*Regulation – COVID-19 mitigation measures*"), including:

(i) the European Central Bank ("**ECB**") adopted measures to grant liquidity to the system, to favour credit and to allow European governments to temporarily adopt expansionary fiscal policies. These measures included, among others, the relaxation of solvency and liquidity demands, the flexibilization of the handling of doubtful loans backed by public guarantees (as indicated below) or affected by the Legal Moratoria, and the review of the capital requirements banking regulations by the European Commission, known as the CRR Quick Fix which came into force on June 27, 2020. Among others, the CRR Quick Fix has delayed the application of the leverage ratio buffer requirement for G-SIIs which was due to come into force on June 28, 2021 and will now not be implemented until January 1, 2023, and introduced a more favorable treatment of certain types of exposures and risks when calculating the leverage ratio for all credit institutions, as a result of which the banks will be allowed to exempt certain exposures from the total exposure measure until March 31, 2022. See "*Regulation – Pillar 2 requirements (P2R) and Pillar 2 Guidance (P2G)*". As of December 31, 2021, our leverage ratio (phased-in) excluding the impact of the temporary exemption from computing exposures to central banks, would have been 5.32% which represents a decrease of 69 basis points compared to the leverage ratio (phased-in) considering this temporary exemption which is no longer applicable (6.01% as of December 31, 2021). In addition, the EU approved the European Recovery Fund which, through transfers and loans, will support the most affected European economies during the coming years, including Spain;

(ii) the Spanish Government established a legislative moratoria for individuals and professionals which, under certain vulnerability requirements, could temporarily suspend their payment obligations (such as receivables) (the "**Legal Moratoria**"). In addition to the Legal Moratoria, those credit institutions, including Ibercaja, which are members of the "Confederación Española de Cajas de Ahorro" ("**CECA**") agreed to implement a sectorial moratoria in order to extend the scope of the Legal Moratoria (the "**Sectorial Moratoria**"). The deadline for beneficiaries to apply for the Legal Moratoria and the Sectorial Moratoria expired on March 30, 2021;

(iii) credit facility lines partially guaranteed by the Spanish government through the "*Instituto de Crédito Oficial*" ("**ICO**") were made available to companies facing liquidity constraints (the "**Guaranteed Credit Lines**"). The Royal Decree-law 6/2022 of March 29, extended the application period for Guaranteed Credit Lines until December 31, 2022; and

(iv) on May 11, 2021 the Spanish government approved a code of good practices in order to establish the framework under which those credit institutions voluntarily acceding to such code could negotiate with their customers the implementation of different measures in relation to their Guaranteed Credit Lines which was subsequently amended on March 29, 2022 (the "**Code of Good Practices**"). Among other measures, the Code of Good Practices provides clients who have been granted Guaranteed Credit Lines the ability to request from the Group, among others, (i) the extension of their maturity (subject to certain eligibility requirements) or grace periods (which we were not obliged to accept), (ii) the conversion of certain Guaranteed Credit Lines into guaranteed profit-linked loans (*préstamos participativos*) and (iii) a partial write-off (*quita parcial*) of their principal amount. Generally, the impact of the Code of Best Practices has been very low and with the information available as of the date of this Registration Document we do not expect it to be material for us. As of December 31, 2021, we had only granted the extension of the maturity or grace periods in relation to an amount of €6.8 million in Guaranteed Credit Lines. With respect to the other measures contemplated in the Code of Good Practices, there had been no demand from our customers as of December 31, 2021. The deadlines for applying for these measures have been extended to June 1, 2022 with respect to (i) and (ii) and June 1, 2023 with respect to (iii).

Up to December 31, 2021, we had formalized Legal Moratoria and Sectorial Moratoria measures affecting 8,927 transactions amounting to €740,683 thousand. As of December 31, 2021, Legal Moratoria and

Sectorial Moratoria measures affecting transactions amounting to €715,150 thousand had expired (i.e. the debtors' payment obligations under these transactions had been resumed) with the following impact in asset quality: 3.28% of matured Legal Moratoria and Sectorial Moratoria had been classified as Stage 3 (NPLs) as of such date and 26.54% have been classified as Stage 2[1], thus resulting in an outstanding balance of €25,533 thousand in transactions affected by these measures, representing 0.08% of our gross loans and advances to customers[APM2]. The expiration calendar of the Legal Moratoria and Sectorial Moratoria measures affecting such outstanding balance as of December 31, 2021 was as follows: (i) €22,757 thousand expiring within 3 months (representing 89.1% of the outstanding principal amount of loans and advances subject to Legal Moratoria and Sectorial Moratoria); (ii) €622 thousand expiring within 3 and 6 months (representing 2.4% of the outstanding principal amount of loans and advances subject to Legal Moratoria and Sectorial Moratoria); and (iii) €2,154 thousand expiring within 6 and 9 months (representing 8.5% of the outstanding principal amount of loans and advances subject to Legal Moratoria and Sectorial Moratoria).

The detail of these transactions as of December 31, 2021 was as follows:

	As of December 31, 2021 (€ thousands)						
	Total data				Breakdown of principal amount granted by risk stage[(1)]		
	Number of transactions granted	Principal amount granted	Principal amount expired	Principal amount outstanding	Stage 1	Stage 2	Stage 3
Loans and advances subject to Legal Moratoria and Sectorial Moratoria	**8,927**	**740,683**	**715,150**	**25,533**	**522,391**	**194,417**	**23,875**

Other transactions	922	43,760	42,348	1,412	26,509	15,342	1,909
Accumulated impairment	—	—	—	—	1,025	10,258	4,804

Notes:—

(1) A transaction is considered to be at Stage 1 (performing) when no significant increase in risk has occurred since its initial recognition. A transaction is considered to be at Stage 2 (performing on special watch) when the risk has significantly increased from the date on which the transaction was initially recognised, but without yet leading to impairment. A transaction is considered to be at Stage 3 (NPL) when it shows effective signs of impairment as a result of one or more events that have already occurred and is expected to result in a loss.

Up to December 31, 2021, we had entered into 19,643 Guaranteed Credit Lines transactions, both for SMEs and self-employed and for large companies, with the principal granted on an accumulated basis amounting to €2,137,350 thousand (€1,829,587 thousand as of December 31, 2020). The outstanding balance of the total principal amount granted by us under Guaranteed Credit Lines amounted to €1,667,880 thousand, representing 19.95% of the Group's loans to businesses[3] as of December 31, 2021 (€1,454,067 thousand representing 18.28% of the Group's loans to businesses[3] as of December 31, 2020). As of December 31, 2021,

[1] See definition, explanation, use, calculation and breakdown of Loans with outstanding moratoria over gross loans and advances to customers[APM] which are set out in "Alternative Performance Measures".

[2] See definition, explanation, use, calculation and breakdown of Loans with outstanding moratoria over gross loans and advances to customers[APM] which are set out in "Alternative Performance Measures".

[3] See definition, explanation, use, calculation and breakdown of Guaranteed Credit Lines drawn over loans to businesses[APM] which are set out in "Alternative Performance Measures"

the amount guaranteed by the Spanish government through the ICO amounted to 77%[4] of the balance outstanding. The majority of Guaranteed Credit Lines granted by us until December 31, 2021 mature between 2023 and 2028. However, on March 29, 2022, the Spanish government approved further extensions of the maturity or grace periods of the Guaranteed Credit Lines in light of the macroeconomic situation caused by the full-scale invasion of Ukraine by Russia. This could pose additional challenges for the banking sector, including us, as the ECB would force credit entities to increase their provisions.

	As of December 31, 2021 (€ thousands)						
	Total data				Breakdown of balance outstanding by risk stage(1)		
	Number of transactions	**Principal amount granted**	**Balance outstanding(2)**	**Guaranteed Balance outstanding[5]**	**Stage 1**	**Stage 2**	**Stage 3**
Guaranteed Credit Lines	**19,643**	**2,137,350**	**1,667,880**	**1,286,160**	**1,365,390**	**270,266**	**32,224**

Large companies.............	1,195	422,950	329,222	229,338	262,235	62,057	4,930

Notes:—

(1) A transaction is considered to be at Stage 1 (performing) when no significant increase in risk has occurred since its initial recognition. A transaction is considered to be at Stage 2 (performing on special watch) when the risk has significantly increased from the date on which the transaction was initially recognised, but without yet leading to impairment. A transaction is considered to be at Stage 3 (non-performing) when it shows effective signs of impairment as a result of one or more events that have already occurred is expected to result in a loss.

(2) The balance outstanding under the Guaranteed Credit Lines represents the amount that has been drawn and has not been repaid out of the principal amount granted under the Guaranteed Credit Lines. Those amounts that have been repaid can be withdrawn again up to the limit of the principal amount granted under the Guaranteed Credit Line.

The distribution of balance outstanding between guaranteed and non-guaranteed balance is:

	As of December 31, 2021 (€ thousands except %)						
	Guaranteed balance outstanding		Non-guaranteed balance outstanding		Breakdown of non-guaranteed balance outstanding by risk stage(1)		
	Balance	**%**	**Balance**	**%**	**Stage 1**	**Stage 2**	**Stage 3**
Guaranteed Credit Lines	**1,286,160**	**77.1**	**381,720**	**22.9**	**311,637**	**63,148**	**6,935**
Self-employed.................	57,087	80.0	14,284	20.0	11,954	2,052	278
SMEs	999,735	78.9	267,552	21.1	220,228	42,074	5,250

4 This amount was calculated as the principal amount guaranteed over the outstanding balance of Guaranteed Credit Lines. Following the criteria established by the resolution of the Secretary of State for Economy and Business support dated March 25, 2020 by virtue of which the order of the Council of Ministers dated March 24, 2020 regarding the granting of Guaranteed Credit Lines the maximum percentage of coverage of the guarantee is: (i) in the case of self-employed and SMEs, the guarantee shall cover 80% of the principal of the new financing and renewals of Guaranteed Credit Lines; (ii) for the rest of companies, the guarantee shall cover 70% of the principal of the new financing and 60% of the renewals of Guaranteed Credit Lines. The guarantee shall not cover items other than the principal of the transaction such as interest payments, commissions or other expenses incurred in the transaction.

	As of December 31, 2021						
	(€ thousands except %)

Accumulated impairment .	—	—	—	—	3,076	6,752	5,784

In addition, pursuant to Royal Decree-law 34/2020, customers have been able to apply for a voluntary extension of their Guaranteed Credit Lines or of the applicable grace periods under their Guaranteed Credit Lines, which we were required to accept. Under Royal Decree-law 34/2020, Guaranteed Credit Lines could be extended for up to a maximum of three years and their applicable grace periods could be extended up to 24 months. On average, under Royal Decree-law 34/2020, our customers have extended their Guaranteed Credit Lines with us for 28.7 months and the grace periods applicable to Guaranteed Credit Lines granted by us have been extended by 11.8 months on average. Although some of our customers applied for an extension or grace periods of their Guaranteed Credit Lines because it did not imply any additional costs for them, we believe that customers who have requested an extension or grace periods of their Guaranteed Credit Lines could be more likely to result in default in the future. See "*Regulation – COVID-19 mitigation measures*".

As of December 31, 2021, we had extended the initial maturity of 36.6% of the total principal amount granted by us under Guaranteed Credit Lines, amounting to €781,870 thousand of which €582,839 thousand were classified as Stage 1, €188,972 thousand as Stage 2 and €10,059 thousand as Stage 3. As of December 31, 2021, the provisions related to these Guaranteed Credit Lines which initial maturity had been extended amounted to €7,904 thousand, of which €1,325 thousand, €4,990 thousand and €1,589 thousand related to Guaranteed Credit Lines classified as Stage 1, 2 and 3, respectively.

As of December 31, 2021, Guaranteed Credit Lines subject to grace periods amounted to €756,692 thousand, of which €572,302 thousand were classified as Stage 1, €174,719 thousand as Stage 2 and €9,671 thousand as Stage 3. The expiration of these grace periods is concentrated in the second quarter of 2022.

The most relevant impact of the COVID-19 pandemic on our results in 2020 was an extraordinary credit risk provision of €90,124 thousand, of which €52,000 thousand was recorded as a post-model adjustment to cover the increase in credit risk of customers who were not in default at the end of 2020, but who, due to the persistent deterioration of the macroeconomic situation, were expected to move to Stage 2 in 2021. Due to the extensions and increases in government support programs described above, and the recovery of economic activity, the expected defaults and stage transitions at year-end 2020 were not observed in 2021. As of December 31, 2021, we maintained, for reasons of prudence and in view of the validity and extension of the government support measures, the post-model adjustment in the amount of €52,000 thousand. The allocation of this post-model adjustment by stage and purpose is explained on the basis of the expected evolution of the transactions mainly for Guaranteed Credit Lines for 2022. The breakdown by stage and by purpose of the post-model adjustment due to the COVID-19 health crisis in 2021 and 2020 is presented below:

	As of December 31, 2021			
	(€ thousands)			
	Stage 1	**Stage 2**	**Stage 3**	**Total**
Self-employed and SMEs	-	28,933	19,614	48,457
Mortgages to individuals	-	3,453	-	3,453
Other segments	-	-	-	-
Total..............................	-	**32,386**	**19,614**	**52,000**

	As of December 31, 2020			
	(€ thousands)			
	Stage 1	**Stage 2**	**Stage 3**	**Total**
Self-employed and SMEs	-	31,720	-	31,720
Mortgages to individuals	-	19,240	-	19,240
Other segments	-	1,040	-	1,040
Total..............................	**-**	**52,000**	**-**	**52,000**

This post-model adjustment is of a temporary nature, until the reasons for the adjustment disappear or materialize. We are closely monitoring the evolution of both the sectors and the most relevant individual borrowers that may be affected by this crisis, in order to adapt their credit risk coverage to the different scenarios that may arise.

In relation to the quality of our credit portfolio, the main impact of the COVID-19 pandemic on our results for the year ended December 31, 2021 was the increase of transactions classified as Stage 2 (over 11.2% volume increase since December 31, 2019[5]), which meant that the impairment risk of our credit portfolio had significantly increased since the date on which they were initially recognized. We cannot give assurance that transactions classified as Stage 2 will not end up being classified as Stage 3 (NPL) transactions in the next months or years, which could result in losses. As of December 31, 2021, 5.00% of our gross loans and advances to customers[APM] (€1,559,842 thousand) was classified as Stage 2[6] (4.31% as of December 31, 2019).The NPL coverage ratio[APM] associated with loans and advances to customers classified as Stage 2 was 7.13% as of December 31, 2021 (4.65% as of December 31, 2019).

The COVID-19 pandemic, together with the exceptional measures implemented to mitigate its effects, could continue to have a material adverse effect on our business, financial condition, results of operations and prospects due to, among other factors:

(a) longer periods of negative or low interest rates as a consequence of the economic contraction and the efforts by the ECB to reactivate the global and local economy by means of repurchase programs affecting the Group which concluded at the end of March 2022 as described in "*Risk factors - Changes in interest rates, continued low interest rates or persistent inflation may negatively affect our business*", and

(b) despite the economic rebound experienced in the second and third quarters of 2021, a potential decrease in the global and local economic activity could lead to an increase in unemployment, a reduction in our customers' income and an increase of the probability of default in our credit portfolio, negatively affecting our credit risk and cost of risk. In particular, there are economic sectors which have been particularly adversely affected by the economic consequences of the COVID-19 pandemic, such as transport and storage, accommodation and food service activities and arts, entertainment and recreation, which together amounted to €631,293 thousand representing 2.02% of our gross loans and advances to customers[APM] as of December 31, 2021[7] (of which €197,024 thousand corresponded to Guaranteed Credit Lines, representing 31.2% of the total exposure to the sectors most affected by the COVID-19 pandemic).

---

5 The evolution of transactions classified as Stage 2 is shown since 2019 in order to show the impact of COVID-19 pandemic.

6 See definition, explanation, use, calculation and breakdown of Loan portfolio by stages[APM] which are set out in "Alternative Performance Measures".

7 See definition, explanation, use, calculation and breakdown of Loans to sectors most affected by the COVID-19 pandemic over gross loans and advances to customers[APM] which are set out in "Alternative Performance Measures".

Our business is significantly affected by the credit risk of our customers and counterparties

We are exposed to the creditworthiness of our customers and counterparties. Credit risk can be defined as potential losses resulting from the full or partial breach of the debt repayment obligations by a counterparty or customer (including, but not limited to, the insolvency of a counterparty or customer), and also includes the value loss as a consequence of the deterioration of the credit quality of a counterparty or a customer. Credit risk is the most significant risk in respect of our business activities.

The following table sets forth below our credit exposure as of December 31, 2021:

	Gross loans and advances to customersAPM	**NPLs by sector**APM	**NPL provisions by sector**APM	**Net NPLs by sector**APM	**NPL ratio by sector**APM	**NPL coverage ratio by sector**APM	**Refinanced and restructured loans**(1)

Adverse changes in the credit quality[8] of our customers and counterparties could affect the recoverability and value of our assets and require us to increase our provisions for bad and doubtful debts and other related provisions.

In particular, we routinely transact with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds and other institutional clients. Our credit exposure to counterparty risk calculated pursuant to Common Reporting (COREP) Statements amounted to €249,370 thousand as of December 31, 2021 (€306,671 thousand and €941,988 thousand as of December 31, 2020 and 2019, respectively).

Defaults by, and even rumors or questions about the solvency of, certain financial institutions and the financial services industry generally have led to market-wide liquidity problems and could lead to losses or defaults by other institutions. These liquidity concerns have had, and may continue to have, an unsettling effect on inter-institutional financial transactions in general. Many of the routine transactions we enter into expose us to significant credit risk in the event of default by one of our significant counterparties.

A weakening in our customers' and counterparties' creditworthiness would also impact our capital adequacy. The regulatory capital levels we are required to maintain are calculated as a percentage of our risk-weighted assets ("**RWAs**"). If the creditworthiness of a customer or a counterparty declines, we would lower their rating, which would presumably result in an increase in our RWAs, which potentially could deteriorate our capital adequacy ratios and limit our lending or investments in other operations.

On March 15, 2018, the ECB published an addendum (the "**Addendum**") to the ECB guidance to banks on NPLs published on March 20, 2017, which specifies the ECB supervisory expectations for prudent levels of provisions for new NPLs. In this respect, the ECB assesses any differences between banks' practices and the prudential provisioning expectations at least annually and links the supervisory expectations in the Addendum to new NPLs classified as such from April 1, 2018 onwards. The ECB supervisory measures are adapted to each entity based on the evolution of its NPL coverage levels. Such supervisory expectations for NPL provisioning have added more pressure on financial results and regulatory capital. As part of the European Commission's package of measures aimed at addressing the risks related to high levels of NPLs in Europe, Regulation (EU) 2019/630 of April 17, 2019 amending CRR as regards minimum loss coverage for non-performing exposures ("**NPEs**") ("**Regulation 2019/630**") introduced a clear set of conditions for the classification of NPEs. The ECB further revised its supervisory expectations for prudential provisioning of new NPEs taking into account Regulation 2019/630. See "*Regulation—Other relevant regulations—NPL coverage requirements*".

Notwithstanding the foregoing, on March 20, 2020, among the package of measures adopted by the ECB in response to the COVID-19 pandemic, there were certain measures introducing supervisory flexibility regarding the treatment of NPLs, in particular to allow banks to support credit flows to companies and households and at the same time benefit from the guarantees and moratoriums put in place by public authorities to tackle the COVID-19 distress. However, when the abovementioned flexibility expires or is limited, we could be required to classify certain of our exposures under forbearance or as defaulted under distressed restructuring, and in consequence, we may need to increase our provisions which could negatively impact our results from operations. Given the evolution of the Legal Moratoria and Sectorial Moratoria in recent months and the low impact on Stage 3 exposures produced by the expiration of Legal Moratoria and Sectorial Moratoria we believe that the provisions booked for this concept should be sufficient. See "*Regulation—Other relevant regulations—NPL coverage requirements*". In addition, given the evolution of the Guaranteed Credit Lines in recent months and their low impact on Stage 3 exposures we believe that the provisions booked for this concept should be sufficient.

---

[8] The methodology of calculation of impairment losses is detailed in Note 2.3 to the Annual Accounts.

Changes in interest rates, continued low interest rates or persistent inflation may negatively affect our business

Our results of operations depend upon the level of our net interest income, which is the difference between gross interest income from loans and other interest-earning assets and interest expense paid to our depositors and other interest-bearing liabilities. Our net interest income amounted to €492,826 thousand, €533,673 thousand and €547,246 thousand in the years ended December 31, 2021, 2020 and 2019 representing 51.75%, 53.27% and 59.06% of our consolidated gross income in those years[9], respectively. The low interest rate environment has caused our net interest income to recurrently fall since December 31, 2019, falling by 7.65% and 2.48% during the year ended December 31, 2021 and the year ended December 31, 2020, respectively.

Interest rates are highly sensitive to many factors beyond our control, including fiscal and monetary policies of governments and central banks and regulation of the financial sector in the European Union, as well as domestic and international economic and political conditions and other factors. In particular, interest rates have been negatively impacted by the debt securities purchase programme established by the ECB in March 2020 to mitigate the impact of the COVID-19 pandemic (the "**PEPP programme**") which concluded at the end of March 2022. In addition, on July 7, 2021 the ECB announced its new monetary policy strategy, setting a symmetric two per cent inflation target. On March 10, 2022, in light of the impact of the invasion of Ukraine by Russia on economic activity and inflation through higher energy and commodity prices, the disruption of international commerce and weaker confidence, the ECB announced that interest rates on the main refinancing operations, the interest rates on the marginal lending facility and the deposit facility would remain unchanged at 0.00%, 0.25% and -0.50% respectively.

Changes in market interest rates affect the spread between interest rates charged on interest-earning assets and interest rates paid on interest-bearing liabilities and subsequently affect our results. For instance, a 200 basis points increase in the interest rate would have increased our net interest income for the year ended December 31, 2021 by €79.0 million, whereas a 200 basis points decrease would have decreased our net interest income for the year ended December 31, 2021 by €70.6 million, assuming the maintenance of the size and structure of our balance sheet and assuming that the movements in interest rates occur instantly and equally on all points of the yield curve, with a -1% interest rate floor. Meanwhile, a 200 basis points increase in interest rates would have decreased the economic value of our assets for the year ended December 31, 2021 by €245.7 million and a 200 basis points decrease in interest rates would have increased the economic value of our assets for the year ended December 31, 2021 by €83 million, assuming the maintenance of the size and structure of our balance sheet and assuming that the movements in interest rates occur instantly and equally on all points of the yield curve, with a -1% interest rate floor.

In addition to this sensitivity analysis, we monitor the impact of changes in interest rates with alternative sensitive analysis. See "*Risk Management – Types of Risk – Interest rate risk*".

Our business and performance have been adversely affected by the low interest rate environment in recent years. As of the date of this Registration Document, the interest rate on the deposit facility set by the ECB is -0.50% and the interest rates on the main refinancing operations and marginal lending facility are 0.00% and 0.25%, respectively. In general, quantitative easing has exerted downward pressure on interest rates and yield curves. A continued period of flatter than usual interest rate yield curves and low (or even negative) interest rates could, in particular, have a material adverse effect on our net interest income given the current low yields of our loan and our debt securities portfolios.

In addition, changes in the yield of our assets might not be mirrored by changes in the cost of our liabilities. Our loan portfolio is primarily linked to the Euro Interbank Offered Rate ("**Euribor**") while our retail term deposit base cost is not directly linked to the Euribor but to deposit facility market rates and therefore, a further decrease in Euribor might not be offset by a similar fall in the cost of retail term deposits, which would negatively impact our net interest income.

---

9 See definition, explanation, use, calculation and breakdown of Net interest income over gross income[APM] which are set out in "Alternative Performance Measures".

Additionally, the level of, and changes in, interest rates (including the relationship between short-term and long-term rates) can affect our asset management and life savings insurance results and interest payable on debt. In particular, interest rates can affect consumer behavior (especially in the asset management and life savings insurance businesses), the availability of disposable income for investments in life assurance and other savings products. Asset management and bancassurance products generated 42.75% of our recurring revenues[APM] for the year ended December 31, 2021 (37.53% and 38.07% for the years ended December 31, 2020 and 2019, respectively).

Our insurance business is also exposed to a significant extent to fluctuations in interest rates due to the special characteristics of certain life savings insurance products providing for a guaranteed return. If interest rates remain at low levels for prolonged periods, our insurance business might not achieve the returns on investments that are needed to cover the interest payments on fixed-rate products.

Since 2021, inflation pressures emerged driven by several factors, mainly: (i) the rise in energy and commodity prices from the abnormally low levels recorded in 2020 as a consequence of the economic meltdown produced by the COVID-19 outbreak; (ii) a significant increase in pent-up demand driven by the re-openings of the developed world economies; (iii) the impact of global supply chain disruptions as a result of shortages and transportation bottlenecks affecting manufacturing sectors, and (iv) more recently, the invasion of Ukraine by Russia. The persistence of these factors could result in a pronounced and long-lasting rise in inflation, generating a transfer of cost increases to our cost base and a general deterioration of economic conditions, negatively affecting our credit risk and cost of risk.

We are particularly exposed to the creditworthiness of individuals, families and small and medium enterprises ("SMEs")

Net loans and advances to customers[APM] represented 52.28% of our total assets as of December 31, 2021 (52.98% and 57.59% as of December 31, 2020 and 2019). Our gross loans and advances to customers[APM] primarily consist of mortgage loans to individuals and families to purchase housing (62.15%, 63.58% and 63.18% of our gross loans and advances to customers excluding reverse repurchase agreements[APM] as of December 31, 2021, 2020 and 2019, respectively[10]) and loans to businesses non-related to the real estate sector (mainly to SMEs) (24.73%, 23.09% and 22.84% of our gross loans and advances to customers excluding reverse repurchase agreements[APM] as of December 31, 2021, 2020 and 2019, respectively[11]).

As a Spanish bank primarily focused on serving individuals, households and SMEs, our business performance is dependent on the economic health and employment status of our customers. According to the National Statistical Institute (*Instituto Nacional de Estadística* ("**INE**")), as of December 31, 2021, the Spanish unemployment rate was 13.3%. As of December 31, 2021, the unemployment rates in Aragón and Madrid, our main markets by retail business volume[APM], accounting for 44.16% and 17.69% of our retail business volume[APM], respectively, as of December 31, 2021 (43.74% and 17.81% and 43.41% and 17.88%, respectively, as of December 31, 2020 and 2019, respectively), were 9.0% and 10.1%, respectively, which is below the Spanish average. However, in some of our Home Markets, such as Badajoz (which represented 3.80% of our retail business volume[APM] as of December 31, 2021 (3.86% and 3.73% as of December 31, 2020 and 2019, respectively)), the unemployment rate was 19.7% as of that date, which is above the Spanish average (*source: INE*). High levels of unemployment have historically resulted in lower demand for new mortgage loans, lower deposit levels, reduced or deferred levels of consumer spending and an increase in customer loan arrears, forbearance, impairment provisions and defaults. The COVID-19 pandemic has perpetuated Spanish higher unemployment levels relative to other European countries as well as an increase in the level of

indebtedness of our clients which may make them unable to discharge their payment obligations when due, all of which may adversely affect the Group's results.

Indebted and over-indebted families and SMEs are more sensitive to a downturn in the economy and are more likely to have difficulties in meeting their debt obligations as they fall due, which could have a negative effect on our income and also limit our ability to increase our customer base due to the significant portion of individuals and SMEs failing to comply with our credit rating levels.

The availability of complete and accurate financial information, as well as general credit information, on the basis of which we can make decisions concerning loans, is more limited with regard to SMEs than with regard to large-scale corporate customers, and even more limited in the case of individual customers. As a result, it is possible to make mistakes when assessing the creditworthiness of these borrowers.

As part of our strategy, we intend to increase the amount of credit we grant to SMEs, whose risk profile is higher than that of retail borrowers of mortgage loans and therefore are subject to higher capital requirements due to higher RWAs. The economic recovery experienced before the COVID-19 pandemic led most of Spanish financial entities to also focus on increasing the flow of credit in the SME sector, thereby creating more competition.

As a result of these factors, it might be difficult for us to identify suitable customers to whom we can lend, which could in turn decrease our base of loans or increase our credit risk exposure. If we are unable to adequately evaluate prospective customers through the application or use of our credit risk evaluation models, we could suffer losses, which could have a material adverse effect on our business, financial situation, results of operations and prospects.

We are vulnerable to adverse developments in the Spanish real estate market

A significant portion of our business is related to the Spanish real estate market. On the one hand, as a result of our commercial activity, our business is exposed to direct risk in connection with net value of foreclosed assets which amounted to €216,044 thousand as of December 31, 2021 (€252,114 thousand and €278,857 thousand as of December 31, 2020 and 2019, respectively). As of December 31, 2021, the net value of foreclosed assets represented 0.4% of our total assets.

On the other hand, we are exposed to indirect risk related to mortgage loans which amounted to €20,714,558 as of December 31, 2021 (€21,568,967 and €22,521,864 as of December 31, 2020 and 2019, respectively), of which €17,993,549 as of December 31, 2021 (€18,614,980 and €19,127,294 as of December 31, 2020 and 2019, respectively) correspond to mortgage loans for home purchases. As of December 31, 2021, mortgage loans represented 35.3% of our total assets. Additionally, as of December 31, 2021 our loans for real estate construction and development without real estate guarantee amounted to €25,461 thousand[12], representing 0.04% of our total assets.

As of December 31, 2021, the loan to value ratio (LTV ratio[APM]) of our mortgage loans was 50.16% (51.14% and 51.82% as of December 31, 2020 and 2019, respectively).

As a result, Spanish real estate assets secure many of our outstanding loans. Additionally, we hold Spanish real estate assets on our balance sheet, including real estate received in lieu of payment for certain underlying loans. In addition, we have restructured and extended the maturity of certain of the loans we have made relating to the acquisition or development of real estate assets, and the capacity of such borrowers to repay such restructured loans may be materially adversely affected by declining real estate prices. Although during 2021 the demand for housing and related real estate loans increased compared to 2020, any decrease in prices of real estate assets in Spain would reduce the value of the collateral securing our mortgage loans and the credit quality of real estate related financings. The value of the related collateral may fall below the original appraised value and, as a result, in default scenarios, we could incur higher losses than we would not have

[12] See note 3.5.5.1 to our 2021 Annual Accounts. It is calculated as the total amount of Real estate construction and development (including land) (993,549) less the amount of mortage collateral of Real estate construction and development (including land) (968,088).

otherwise expected. As a result, a deterioration of Spanish real estate prices could have a material adverse effect on our business, financial condition, results of operations and prospects. Additionally, we may not be able to enforce collateral assets due to factors such as inadequate documentation, legal uncertainty, unfavorable regulatory or case law developments or customer fraud.

A decline in real estate prices or business would also reduce our capacity to grow our real estate development and construction loan portfolio and, consequently, our business opportunities in retail mortgage financing arising from the subrogation by retail customers on the loans to real estate developers and constructors.

The impact of the COVID-19 pandemic in the real estate sector was significant, primarily during the first half of 2020, with new construction decreasing by 19.5%, real estate assets acquisitions decreasing by 14.5% in 2020 compared to the previous year (although they recovered after the limitations on mobility were removed) and a minimal drop in asset value (1.1% in 2020 compared to the previous year) (*source: Spanish Ministry of Transport, Mobility and Urban Agenda (Ministerio de Transportes, Movilidad y Agenda Urbana)*). Although these indicators have experienced a swift recovery since the second half of 2020 through 2021, uncertainties remain in relation to the recent development of several factors that could adversely affect the recovery trend, mainly (a) the rapid spread of the COVID-19 Omicron variant, (b) the impact of global supply chain disruptions as a result of shortages and transportation congestions affecting the manufacturing sectors; and (c) the increase in uncertainty due to geopolitical tensions after the invasion of Ukraine by Russia. Adverse developments in the health situation as a consequence of the COVID-19 Omicron variant or other new variants may require the introduction or tightening of restrictions on certain activities. In addition, the intensification of global supply chain disruptions and the increase in the prices of energy, oil and other commodities as a consequence of the invasion of Ukraine by Russia could result in prolonged inflationary pressures that could lead to a deterioration of financing conditions and negatively affect growth.

We are exposed to market risk associated with fluctuations in debt securities and equity instruments prices and other market factors

All of our businesses are exposed to market risk as a consequence of our trading activities in financial markets and through the asset and liability management of our overall financial position, including our trading portfolio and other equity investments. Therefore, we are exposed to losses arising from adverse movements in levels and volatility of interest rates, foreign exchange rates, and commodity and equity prices.

As of December 31, 2021, our total exposure of the fixed income and equity instruments portfolio^{APM} was €18,214,267 thousand (€16,464,946 thousand and €15,787,100 thousand as of December 31, 2020 and 2019, respectively), which represented 31.07% of our total assets (28.19% and 28.49% as of December 31, 2020 and 2019, respectively)[13]. The exposure of our ALCO portfolio amounted to €10,462,235 thousand as of December 31, 2021 (€8,439,326 thousand and €7,724,942 thousand as of December 31, 2020 and 2019, respectively). Our exposure to the insurance business fixed income portfolio amounted to €5,603,155 thousand as of December 31, 2021 (€6,701,773 thousand and €7,202,960 thousand as of December 31, 2020 and 2019, respectively)[14].

The performance of financial markets generally may cause changes in the value of our investments, assets held for sale and trading portfolios. The volatility of global capital markets due to recent economic and political uncertainty may affect the value of our investments and, depending on their fair value and future recovery expectations, could result in a permanent impairment, which would be subject to write-offs against our results and cause volatility in capital ratios. In particular, the global spread of the COVID-19 pandemic had a significant adverse impact on financial markets, especially in the second quarter of 2020, following the announcement of tightening lock-down measures affecting most of the world’s economies. Since the second

[13] See definition, explanation, use, calculation and breakdown of Total exposure of the fixed income and equity instruments portfolio over total assets^{APM} which are set out in “Alternative Performance Measures”.

[14] See definition, explanation, use, calculation and breakdown of Total exposure of the fixed income and equity instruments portfolio over total assets^{APM} which are set out in “Alternative Performance Measures”.

half of 2020 market conditions started to normalize and volatility decreased in most markets although with some episodes of volatility caused by the emergence of new COVID-19 variants and uncertainties in relation to the evolution of the pandemic.

In addition, the invasion of Ukraine by Russia, as well as the uncertain nature, magnitude and duration of the war and actions taken by Western and other states and multinational organizations in response thereto and any Russian retaliatory actions, are contributing to further increases in the prices of energy, oil and other commodities and to volatility in financial markets globally.

Adverse market movements, particularly asset price declines, can reduce the volume of activity in the market or reduce market liquidity. As a result, we can be exposed to material losses if we are unable to close out deteriorating positions on satisfactory terms or in a timely manner, particularly in less liquid markets. The volatile nature of the financial markets could result in unforeseen losses for us.

Furthermore, fluctuations in financial markets affect consumer behavior, thereby specifically and negatively affecting our commission- and fee-based businesses (asset management and life savings insurance businesses). Net fee income and exchange differences[APM] amounted to €438,543 thousand for the year ended December 31, 2021 (representing 47.09% of our recurring revenues[APM] for the year ended December 31, 2021) (€374,987 thousand and €394,843 thousand for the years ended December 31, 2020 and 2019, respectively, representing 41.27% and 41.91% of our recurring revenues[APM] for the years ended December 31, 2020 and 2019, respectively). The demand for products benchmarked to fixed income securities, such as pension funds that typically invest in this type of assets, may decrease if equity capital markets perform favorably and may increase when equity capital markets are weaker. Demand for products benchmarked to equity securities, such as mutual funds that typically invest in this type of assets, may increase when equity markets perform favorably, and usually decrease when markets show a downward trend.

A market downturn or an increase in competition in the future could also cause a decrease in the number of transactions carried out on behalf of our customers and, as a consequence, a decrease in our income from commissions. In addition, because the fees that we charge for managing our clients' portfolios are, in many cases, based on the value and performance of those portfolios, a reduction in such value and an increased amount of withdrawals, could reduce our revenues from our asset management business.

We are subject to sovereign risk

As of December 31, 2021, the gross carrying value of our total exposure to sovereign debt amounted to €15,219,821 thousand (€12,298,909 thousand and €11,843,970 thousand as of December 31, 2020 and 2019, respectively), which represented 26.0% of our total assets as of December 31, 2021 (21.1% and 21.4% as of December 31, 2020 and 2019, respectively). Of our total sovereign exposure as of December 31, 2021, 72.2% was held by Ibercaja Banco (59.9% and 55.2% as of December 31, 2020 and 2019, respectively) and 27.6% was held by Ibercaja Vida (39.8% and 44.4% as of December 31, 2020 and 2019, respectively).

Based on geographic markets, Spain accounted for 88.2% of our total sovereign exposure as of December 31, 2021 (90.7% and 90.6% as of December 31, 2020 and 2019, respectively) and Italy accounted for 9.1% of our total sovereign exposure as of December 31, 2021 (8.3% and 8.7% as of December 31, 2020 and 2019, respectively). The remaining geographic markets accounted for less than 3% as of December 31, 2021 (less than 2% as of each of December 31, 2020 and 2019).

Therefore, any decline in Spain's sovereign credit ratings could adversely affect the value of these and other securities we hold in our various portfolios. It could also adversely impact the extent to which we can use Spanish government bonds we hold as collateral for the ECB refinancing and, indirectly, the extent to which other securities held could be used for such same purpose, which would adversely affect our cost of funding and our ability to access funds, raise capital and meet minimum regulatory capital requirements and adversely affect our interest margins. Furthermore, any downgrades of Spain's credit ratings may increase the risk of a downgrade of our own credit ratings by the rating agencies, which could have similar effects. As such, a downgrade or series of downgrades in the sovereign rating of Spain or our own credit rating or a perceived increase in risk and any resulting reduction in the value of Spanish government bonds may have a material adverse effect on our business, results of operations, financial condition and prospects.

Funding and liquidity risk are inherent in our operations

Liquidity risk comprises uncertainties in relation to our ability, under adverse conditions, to timely access funding necessary to cover our obligations to customers, to meet the maturity of our liabilities as they become due and to satisfy our liquidity requirements. It includes both the risk of unexpected increases in our cost of funding and the risk of not being able to structure the maturity dates of our liabilities reasonably in line with our assets. For a description of the contractual maturities of our assets and liabilities (liquidity gap) as of December 31 2021, see the breakdown included in "*Operating and financial review for the years ended December 31, 2021, 2020 and 2019 —Liquidity*".

Our main source of liquidity and funding is our customer deposit base, as well as funds derived from the access to wholesale lending markets, including interbank deposits and covered bonds. Our ability to obtain funds or to access them could be harmed by factors that are intrinsic to our operations, such as a decline in our performance, credit rating or creditworthiness, or extrinsic to us, such as general macroeconomic and market conditions, including, any major turbulence or closure in the financial markets, a negative view of the perspectives of the sectors that predominate in our lending business (particularly, real estate, consumer and public sectors) or uncertainty as to the availability of funds to market participants in general or their ability or perceived ability to discharge their liabilities as they fall due. These factors could generate a negative perception of our liquidity among creditors and result in a decrease in credit ratings, higher funding costs and a reduction in our ability to access funds or result in our inability to continue to operate without additional funding support, which may be unavailable to us. Our financial position could be adversely affected if access to liquidity and funding is limited or becomes more expensive for a prolonged period of time.

Retail deposits[APM], our main source of liquidity and funding, accounted for 79.76% of our external funding[APM] as of December 31, 2021 (78.36% and 76.77% as of December 31, 2020 and 2019, respectively). As a result of the short-term nature of part of this source of financing, we could suffer from liquidity problems if deposits do not reach the expected volumes or are not renewed because a significant number of depositors withdraw their deposits or do not reinvest their deposits at the end of their term. Large denomination term deposits may, under some circumstances, such as during periods of significant interest rate-based competition for these types of deposits, be a less stable source of deposits than savings and demand deposits. Our level of retail deposits[APM] may fluctuate due to factors outside our control, such as loss of public confidence (including as a result of political initiatives, such as bail-in and/or the confiscation and/or taxation of creditors' funds) or competition from investment funds and other new players in the banking business or other products (see "—*Increased competition in the markets where we operate may adversely affect our growth prospects and operations*"), which could result in a significant outflow of deposits within a short period of time. In the event of a sudden or unexpected withdrawal of deposits or shortage of funds in the banking systems or money markets in which we operate, we might not be able to maintain our current levels of funding without incurring higher funding costs or having to liquidate certain of our assets. If any of these factors were to occur, our net interest income would be reduced, and our interest margins adversely affected.

Financing from wholesale lending markets amounted to €9,419,733 thousand, representing 20.24% of our external funding[APM] as of December 31, 2021 (€9,985,634 thousand and €9,915,818 thousand representing 21.64% and 23.23% of our external funding[APM] as of December 31, 2020 and 2019, respectively). In the event such funding were to no longer be available or become too expensive, we could be forced to raise interest rates paid on deposits to attract more customers and/or sell our assets at or below their expected price. The persistence or worsening of adverse market conditions or rising interest rates could have a material adverse effect on our ability to access liquidity and negatively impact our financing costs (either directly or indirectly).

Our financing capacity also depends on our credit rating. As of the date of this Registration Document, our ratings and outlooks are as follows:

Agency[(1)]	**Long-term**	**Short-term**	**Outlook**	**Date of latest rating**
Moody's	Ba1	NP	Stable	October 1, 2021
S&P	BB+	B	Stable	January 27, 2022

Agency[(1)]	Long-term	Short-term	Outlook	Date of latest rating
Fitch	BB+	B	Positive	September 9, 2021

Notes:—

(1) Each of Moody's Investors Service España, S.A. ("**Moody's**"), S&P Global Ratings Europe Limited ("**S&P**") and Fitch Ratings Ireland Limited ("**Fitch**") is registered under Regulation (EC) No 1060/2009 (as amended) on credit rating agencies ("**CRA Regulation**"). As such, each of Moody's, S&P and Fitch is included in the latest update of the list of registered credit rating agencies (as of March 24, 2022) on the ESMA website in accordance with the CRA Regulation.

Any downgrade in our ratings could limit our access to capital markets, reduce our prospective investor base, increase our borrowing costs and adversely affect our interest margins, require us to post additional collateral or take other actions under some of our derivative contracts, any of which would materially adversely affect our business, financial condition, results of operations and prospects.

Additionally, corporate and institutional counterparties may seek to reduce aggregate credit exposures to us (or to all banks), which would increase our cost of funding and restrict our access to liquidity.

On June 6, 2019 the ECB announced a new program of targeted long-term refinancing operations ("**TLTRO III**"). In April 2020, the Governing Council of the ECB made a number of amendments to the TLTRO III to support the provision of credit to households and business to mitigate the economic effects of the COVID-19 pandemic. The Governing Council of the ECB adopted, in December 2020, additional monetary policy measures aiming to contribute to preserve the favourable financing conditions over the pandemic period and, as part of these measures, decided to further recalibrate the conditions of the TLTRO III (in particular, it decided to extend the period over which considerable more favourable terms would apply to June 2022, that three additional operations would be conducted between June and December 2021 and to raise the total amount that Eurosystem counterparties would be entitled to borrow in TLTROs-III from 50% to 55% of their stock of eligible loans). The aforementioned measures were introduced by way of the adoption of ECB Decision ECB 2021/21 of April 30, 2021. As of December 31, 2021, financing from the ECB, all of which was obtained in the context of TLTRO III, amounted to €5,959,000 thousand (of which €5,400,000 thousand was tendered in June 2020 and matures in June 2023 and €559,000 thousand was tendered in March 2021 and matures in March 2024) and represented 10.87% of our total liabilities at such date. It is not possible to predict the term or the quantum of these extraordinary liquidity support programs in the future, or whether they will be implemented at all. As a result, we may need to seek alternative sources of funding, which may be difficult to obtain or may only be available to us at a higher cost.

As of December 31, 2021, we had liquid assets[APM] amounting to €15,250,171 thousand (€14,959,441 thousand and €11,467,882 thousand as of December 31, 2020 and 2019, respectively), substantially all of which were eligible to be used as collateral to obtain ECB funding. In addition, as of such date, we had an additional issuance capacity[15] of €8,776,402 thousand (€8,379,866 thousand and €7,307,407 thousand as of December 31, 2020 and 2019, respectively), so our available liquidity position[APM] was €24,026,573 thousand (€23,339,307 thousand and €18,775,289 thousand as of December 31, 2020 and 2019, respectively). Any changes to the policies and requirements for accessing funding from the ECB, including any changes to the criteria for identifying the asset types admitted as collateral or their relative valuations, could have a material adverse effect on our liquidity and cost of funding.

[15] Calculated in accordance with applicable regulations which, as of December 31, 2021, were Law 2/1981, and Law 44/2002 as the sum of the amount representing 80% of eligible mortgage portfolio (less mortgage covered bonds outstanding) and the amount representing 70% of public sector portfolio (less public sector covered bonds outstanding).

The factors described above may also have a material adverse effect on our regulatory position, including our ability to meet our regulatory minimum liquidity requirements. As of December 31, 2021, our liquidity coverage ratio ("**LCR**") was 452.0% (excluding Ibercaja Vida) (468.1% and 307.1% as of December 31, 2020 and 2019, respectively) and our net stable funding ratio ("**NSFR**") (excluding Ibercaja Vida) was 152.2% (151.5% and 131.4% as of December 31, 2020 and 2019, respectively), both above their respective minimum requirement of 100%. However, there can be no assurance that we will be able to maintain our ratios in excess of regulatory requirements in the future. See "*Regulation—Liquidity requirements*" for a further description of these liquidity and funding ratios.

Our insurance business is exposed to actuarial risk

Our insurance business, which is carried out through our subsidiaries Ibercaja Vida and Ibercaja Mediación de Seguros, S.A.U. ("**Ibercaja Mediación**"), is significant to our overall business. Life savings insurance products represented 5.56% of our recurring revenues^{APM} for the year ended December 31, 2021 (6.18% and 6.66% for the years ended December 31, 2020 and 2019, respectively) and risk insurance products (which include life risk and non-life risk insurance products) represented 10.82% of our recurring revenues^{APM} for the year ended December 31, 2021 (10.27% and 9.66% for the years ended December 31, 2020 and 2019, respectively).

Actuarial risk reflects the risk arising from the execution of life and other insurance contracts, considering events covered and the processes used in the conduct of business, and any risks related to it, including longevity risk (risk related to an increase in the survival of insured parties compared to forecasts), policy lapse risk (risk related to variations in surrender rates compared to forecasts) and mortality risk (risk related to an increase in the mortality rates compared to forecasts). The management of these risks depends on actuarial management policies relating to subscription and pricing rates.

Our business requires using models, assumptions and estimates, which present the risk of reality not matching the assumptions initially used to assess or predict future events. Reserves are calculated based on the assumption that the factors applied will be sufficient to cover the claims and expense rates in all current contracts until their expiry date.

Similarly, claims provisions are calculated by estimating the final cost of any claims, and life insurance technical provisions are calculated on the basis of estimates related to, among others, mortality, longevity, expenses and lapses. These estimates and assumptions are based on actuarial and statistical studies based on the facts and circumstances known at a specific time, but performance may depend on many different factors and may be affected by changes in applicable laws or in the general economic scenario. Actual future events may differ from our estimates, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

The following table shows the breakdown of technical provisions for life insurance as of December 31, 2021, 2020 and 2019:

	As of December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Technical provisions for:			
Life insurance:	5,326,263	6,573,738	7,393,305
Unearned premium reserve and current risks	23,260	*22,475*	*22,856*
Mathematical provisions	*5,303,003*	*6,551,263*	*7,370,449*
Benefits pending payment	96,055	92,728	71,710
Profit sharing and returned premiums	5,470	4,396	5,026
Life insurance in which the investment risk is borne by the policyholders (Unit linked)	1,693,706	851,005	314,496

	As of December 31,		
	2021	**2020**	**2019**
Liabilities under insurance or reinsurance contracts[16]	**7,121,494**	**7,521,867**	**7,784,537**

In addition, our insurance subsidiaries regularly enter into contracts with reinsurance companies not belonging to our Group in order to control their risk exposure. Market conditions beyond our control determine the availability and cost of the reinsurance protection we purchase. Accordingly, our insurance subsidiaries may be forced to incur additional expenses for reinsurance or may not be able to obtain sufficient reinsurance on acceptable terms, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Our businesses are heavily exposed to operational risks

Our businesses depend on our ability to process a large number of transactions efficiently and accurately on a daily basis and to manage personal financial information on behalf of our customers. The operational risks to which we are exposed include, among others, those deriving from processing errors, system failures, internal and external fraud, compliance risks, low productivity and the inadequate training or qualifications of staff, deficient customer service, external system failures (such as administrative or accounting mistakes, errors in the computer or communication systems or IT security breaches) as well as external events that could undermine our operations or our image. Given the large number of transactions that we carry out on a daily basis, such mistakes could be made repeatedly before they are discovered and remedied. As of December 31, 2021, the losses associated to our operational risk amounted to €13,121 thousand (€6,936 thousand and €5,728 thousand as of December 31, 2020 and 2019, respectively).

As of December 31, 2021, the own funds requirements associated to our operational risks[17] amounted to €108,929 thousand (€108,314 thousand and €110,077 thousand as of December 31, 2020 and 2019, respectively).

Any failure causing an interruption of our service or that slows down our response capacity could adversely affect our customers' ability to use our systems, as well as damage our reputation, business and brand. We could be subject to claims filed by our customers aimed at recovering losses they might have suffered as a result of any of the aforementioned events or be subject to penalties and disciplinary sanctions, in the event of any delay or omission by us in the processing and registration of transactions, or any breach in internal control. As a result, we could suffer financial damage or harm to our reputation, which could in turn have a negative effect on our business, financial condition, results of operations and prospects.

In particular, our technological infrastructure is critical to the operation of our business and the delivery of products and services to clients. Our information technology ("**IT**") systems are vulnerable to a series of problems, such as the malfunctioning of hardware and software, computer virus, hacking, phishing or similar attacks and cyber-attacks. In particular, the risks associated with cyber-attacks are a material risk to us and the Spanish financial system as a whole, which has a high degree of interconnectedness between market participants, centralized market infrastructure and in some cases complex legacy IT systems. Cyber-attacks could give rise to the loss of significant amounts of customer data and other sensitive information, as well as significant levels of liquid assets (including cash). These threats are increasingly sophisticated and any absence of or failure of existing controls could result in significant financial losses and a material adverse effect on our operational performance and reputation. As attempted attacks continue to evolve in scope and sophistication, we may incur significant costs in order to modify or enhance our protective measures against such attacks, or to investigate or remediate any vulnerability or resulting breach, or in communicating cyber-attacks to our

---

[16] See Note 20 to the Annual Accounts for the information as of December 31.

[17] It refers to the impact of operational risk on own funds calculated following the standard method pursuant to Regulation (EU) 575/2013.

customers or other affected individuals. Any external attack aiming to circumvent our security measures could result in the unlawful use of our and our customers' confidential information, which could expose us to the risk of losses, disciplinary measures from regulatory authorities, lawsuits and harm to our reputation.

Furthermore, our technology and operations depend on a number of specialized technology and service providers. See "*Business—Technology*" for a description of our most relevant technology and service providers.

If any of our key technological and service providers fails to perform its services effectively or not in accordance with the terms of the relevant service agreements with us, this could lead to interruptions in our business operations, services offered or information provided to our customers or may have a material adverse effect on the availability of our banking services, including our online services and on the productivity of our employees.

Finally, we manage and use confidential information from customers when processing banking transactions. Any unlawful or unauthorized disclosure may trigger legal actions and administrative fines together with damages and could result in reputational damage, any of which could have a material adverse effect on our business, financial condition, results of operations and prospects.

Increased competition in the markets where we operate may adversely affect our growth prospects and operations

The markets in which we operate are highly competitive. Financial sector reforms in these markets (mainly in Spain) have increased competition among both local and foreign financial institutions, and we believe that this trend will continue in the future. In addition, the banking sector has experienced in the last few years a trend towards consolidation which has been accelerated by the impact of the COVID-19 pandemic (especially in Spain), where four of the 12 most significant financial institutions in the sector have merged recently. In particular, Bankia, S.A. and Liberbank, S.A. have merged with and into CaixaBank, S.A. and Unicaja Banco, S.A., respectively, creating larger and stronger banks with which we must now compete. It cannot be ruled out that more consolidation transactions are executed in the financial sector in the coming months or years.

We also face competition from non-bank competitors, such as department stores (for some credit products), automotive finance corporations, leasing companies, factoring companies, mutual funds, pension funds and insurance companies. In addition, we face increasing competition from shadow banking entities that operate outside the regulated banking system. Furthermore, "crowdfunding" and other social media developments in finance are expected to become more popular as technology becomes a key driver of the banking sector. In particular, non-traditional providers of banking services, such as internet-based e-commerce providers, mobile telephone companies, social media companies, FinTech's, digital banks and internet search engines may start to offer or increase their existing offerings of financial products and services directly to customers. In July 2018, the EBA published a report on the impact of FinTech's on the banking sector identifying the main factors related to FinTech's companies that could significantly affect the sustainability of the credit institutions' business model which included, among others, a more digital and innovative strategy, their operational capacity to implement changes and their capacity to attract and retain staff. These providers may be able to innovate more quickly than we can, as they are not constrained by any legacy IT systems and face fewer regulatory requirements and lower fixed costs than us. The ongoing FinTech's development has resulted in increasing competition within the financial services sector, not only direct competition with the FinTech's firms but also among the traditional providers of banking services, who are competing in terms of technological development to achieve the first-mover advantage.

In our asset management business, we face competition from exchange-traded funds (ETFs) and other investment products, which may negatively impact the margin from our asset management products.

If we are unable to successfully compete with current and new competitors, or if we are unable to anticipate and adapt our offerings to changing banking industry trends, including technological changes, this could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are subject to conduct and reputational risks that could result in fines, sanctions and reputational damage

Reputational risk is a particular concern for companies operating in the financial sector (including us), where participants need to maintain the confidence of customers, investors, regulators, creditors and financial markets generally. We are subject to the risk that inappropriate execution of our business activities causes harm to our customers or counterparties or to us and our employees, third-party service providers and external staff. In addition, we are subject to reputational risk to our brands arising from any inappropriate actions by us or our employees, customers or counterparties (including breaches of laws, regulations and internal policies, money laundering, terrorism financing and tax evasion), or by any association, action or inaction that is perceived by stakeholders to be inappropriate, unethical or not sustainable.

In particular, we are required to comply with applicable anti-money laundering ("**AML**"), anti-terrorism, anti-bribery and corruption, sanctions and other laws and regulations applicable to us. AML, antiterrorism, anti-bribery and corruption and sanctions laws and regulations are increasingly complex and detailed. Compliance with these laws and regulations requires automated systems, sophisticated monitoring and skilled compliance personnel, which puts a significant burden on banks and other financial institutions. The reputational damage to our business would be severe if we were found to have breached AML, anti-terrorism, anti-bribery and corruption or sanctions requirements. Our reputation could also suffer if we are unable to protect our customers' products and services from being used by criminals for illegal or improper purposes.

Failure to appropriately manage conduct and reputation risks may reduce our attractiveness to stakeholders, including customers, and may lead to negative publicity, loss of revenue, litigation (including class actions), increased regulatory scrutiny and sanctions, reduced workforce morale, and difficulties in recruiting and retaining talent. Any event arising from conduct or reputation risks could cause damage to our business, regardless of whether the negative publicity is factually accurate. Our reputation may also suffer by association with fraudulent or criminal acts committed by customers or by employees for activities unrelated to their position with us.

The occurrence of any of these events may cause customers, investors, creditors and financial markets generally to lose confidence in us and materially and adversely affect our business, financial condition, results of operations and prospects.

Market positioning in this Registration Document is based on peers' publicly available information which may not be homogeneous and comparable and therefore could potentially be misrepresented or inaccurate

We have used publicly available information reported by our peers to set out our positioning in the market in this Registration Document. There is no assurance that the elaboration of this publicly available information has followed the same criteria within the applicable accounting framework across peers and we have not analyzed whether this information is homogeneous and comparable with the corresponding metrics used by us or the rest of our peers. In addition, with respect to Caixabank and Unicaja we have used the aggregated financial information reported by each of the merging entities after their respective merger processes. Moreover, in certain circumstances we have used publicly available information from peers from prior time periods because of the lack of more recent information.

Furthermore, we have also compared certain of our APMs with our peers' corresponding APMs. For the calculation of our peers' APMs in all cases with the only exception of the cost of risk^{APM} we have applied the same method of calculation as for our corresponding APM, using for such calculation the publicly available information reported by our peers referred to in the previous paragraph (i.e. we have not used our peers' reported APMs). We have compared our cost of risk^{APM} to the cost of risk reported by our peers and we have not analyzed whether the method of calculation of such APM by our peers is homogeneous and comparable with the calculation of our cost of risk^{APM}.

Therefore, there is a risk that the market positioning set out in this Registration Document could potentially be misrepresented or inaccurate.

LEGAL, REGULATORY AND COMPLIANCE RISKS

We are subject to substantial regulation and regulatory and governmental oversight which imposes significant costs on us and drives how we conduct our business

The financial services industry is among the most regulated industries in the world. Our operations are subject to substantial regulation that we may be unable to comply with, including as a result of changes in laws, regulations, guidelines, policies and interpretations, as well as judicial interpretations of new laws and regulations, in Spain and the EU. In addition, regulatory scrutiny under existing laws and regulations has become more stringent. This is particularly the case in the current market environment, which is witnessing increased levels of government and regulatory intervention in the banking sector, and which is expected to continue for the foreseeable future. This creates significant uncertainty for us and the financial industry in general.

The wide range of actions or regulatory proposals adopted during the last few years include, among other things, provisions for more stringent regulatory capital and liquidity standards (which could require us to maintain a greater proportion of our assets in highly-liquid but lower-yielding financial instruments, negatively affecting our net interest margin[APM]), restrictions on compensation practices, special bank levies and financial transaction taxes, recovery and resolution powers to intervene in a crisis including "bail-in" of creditors, separation of certain businesses from deposit taking, stress testing and capital planning regimes, heightened reporting requirements and reforms of derivatives, other financial instruments, investment products and market infrastructures. See "*Regulatio*n" for additional information. As a result, we may be subject to an increasing number of liability or regulatory sanctions and may be required to make greater expenditures and devote additional resources to address potential liability.

In addition, we are subject to rules and regulations regarding money laundering, corruption and the financing of terrorism which have become increasingly complex and detailed and the subject of enhanced government supervision, requiring us to use improved systems and implement sophisticated monitoring mechanisms and compliance personnel. Any failure of our personnel to comply with such policies or applicable rules and regulations, may have severe consequences, including sanctions, fines and adverse reputational consequences, which would have a material adverse effect on our business, financial condition, results of operations and prospects.

Regulatory authorities have substantial discretion in how to regulate banks, and this discretion, and the means available to the regulators, have been steadily increasing during recent years. Regulation may be imposed on an ad hoc basis by governments and regulators in response to a crisis, and these may especially affect financial institutions like us.

We are subject to the supervision and/or regulation of the Bank of Spain, the ECB (which supervises us directly under the Single Supervisory Mechanism ("**SSM**") in which the Bank of Spain participates), the Single Resolution Board (the "**SRB**"), the Spanish Executive Resolution Authority (the "**FROB**", *Fondo de Reestructuración Ordenada Bancaria*), the CNMV and the Directorate General of Insurance and Pension Funds (*Dirección General de Seguros y Fondos de Pensiones*) which are the main regulators of our operations. In addition, many of our operations are dependent upon licenses issued by financial authorities.

These regulators, as part of their supervisory function, periodically review the internal processes and controls related to all areas of our business including the granting of credit and classification of risks, our corporate governance and risk management, our technological security, our allowances for loan losses and compliance with rules of conduct in the marketing of financial products to our customers and may require us to change our business, marketing, governance and risk practices and procedures, to increase such allowances, to recognize further losses or to increase the regulatory risk-weighting of assets, or may increase our capital requirements. Any such measures, as required by these regulators, whose views may differ from those of our management, could have an adverse effect on our business and financial condition, including on our common equity tier 1 ("**CET1**") ratio and on our ability to pay distributions.

In addition, our insurance business, which is carried out through our subsidiaries Ibercaja Vida and Ibercaja Mediación, is subject to solvency and supervisory regulations referred to as "**Solvency II**". Solvency II comprises Directive 2009/138/EC of the European Parliament and Council, of November 25, 2009, on the taking up and pursuit of the business of insurance and reinsurance ("**Solvency II Directive**") and several regulations supplementing the Solvency II Directive which are directly applicable in the EU Member States (mainly the Commission Delegated Regulation (EU) of 2015/35 of October 10, 2014 supplementing the Solvency II Directive and the relevant implementing regulations in the EU Member States). As of December 31, 2021, the solvency ratio of Ibercaja Vida was 265% (220% and 210% as of December 31, 2020 and 2019, respectively) above the minimum requirement of 100%.

Any required changes to our business operations resulting from the legislation and regulations applicable to our business or from the supervisory function of our regulators could result in a significant loss of revenue or reduced profitability, require significant management attention and resources, limit our ability to pursue business opportunities, adversely affect the value of our assets or require us to increase our prices or incur in additional costs (including increased compliance costs) any of which would materially adversely affect our business, financial condition, results of operations and prospects.

Increasingly onerous capital requirements constitute one of our main regulatory challenges

Solvency risk is the risk related to the failure to maintain sufficient resources to absorb losses through a full economic cycle, meet solvency regulatory and prudential requirements or maintain sufficient resources to maintain the confidence of current and prospective investors.

As a Spanish credit institution, we are subject to the capital requirements and to the minimum requirements for own funds and eligible liabilities ("**MREL**") set by the ECB and the resolution authorities. On February 4, 2022, we announced that the ECB had notified us of its decision to modify the prudential requirements established as part of the 2021 SREP which are applicable from March 1, 2022. As a result, as of the date of this Registration Document we must maintain a CET1 ratio of 8.21% and a total capital ratio of 12.65% on a consolidated basis. These capital requirements include the minimum capital requirement for Pillar 1 (4.5% CET 1 and 8% of total capital), Pillar 2 (1.21% for CET1 and 2.15% for total capital) and the capital conservation buffer (2.5%). As of December 31, 2021, we had a total capital ratio phased-in of 18.12% and a total capital ratio fully-loaded of 17.43% and a CET1 phased-in of 13.41% and a CET1 fully-loaded of 12.71%. In addition, on February 8, 2022, we announced that we had received a formal communication from the Bank of Spain regarding the MREL requirement, as determined by the SRB, upon which we have been required to reach an amount of own funds and eligible liabilities on a consolidated basis equal to 15.38% of RWAs (excluding the CET1 dedicated to comply with the combined buffer requirement) and 5.21% in terms of MREL leverage ratio by January 1, 2022. This requirement would be equal to 18.59% of the Group's consolidated RWAs as of January 1, 2024 (excluding the CET1 dedicated to comply with the combined buffer requirement) (5.21% in terms of MREL leverage ratio). As of December 31, 2021, we had a percentage of MREL in terms of RWAs of 15.89% (excluding the CET1 dedicated to comply with the combined buffer requirement) and 7.21% in terms of MREL leverage ratio (6.38% excluding the waiver to not compute central bank exposures which expired in March 2022), both of which are above the requirements for 2022. In this context, and based on our estimates, our MREL issuance needs towards 2024, as of the date of this Registration Document, amount to approximately €0.7-0.8 billion. See "*Regulation—Capital requirements*".

Additional and more demanding capital requirements may be applied in the future. The implementation of existing or new capital requirements, standards or recommendations may negatively affect our return on equity and other financial performance indicators or require us to issue additional securities that qualify as regulatory capital or eligible liabilities for purposes of the MREL requirement (this requirement to issue additional securities may, in addition, impair our ability to manage our funding and capital resources in the most efficient way), to liquidate assets, to curtail business or to take any other actions, any of which may materially adversely affect our business, financial condition, results of operations and prospects.

Failure to comply with existing or future capital requirements may also adversely affect our ability to make (i) distributions relating to CET1 capital (including dividends in respect of the Shares), (ii) payments in respect of variable remuneration or discretionary pension revenues and (iii) distributions relating to additional tier 1 ("**AT1**") capital instruments ("**Discretionary Payments**"). As of the date of this Registration Document, we are not required to calculate a Maximum Distributable Amount (as defined below). Based on the most recent SREP carried out by the ECB, if our CET1 ratio fell below 8.21% or our total capital ratio fell below

12.65% in 2022, we would be required to calculate our Maximum Distributable Amount, and we may be required to reduce our Discretionary Payments.

In addition, debt and equity investors, analysts and other market professionals may also require higher capital buffers than those required under current or proposed future regulations due to, among other things, the continued general uncertainty involving the financial services industry and the uncertain global economic conditions. Any such market perception, or any concern regarding compliance with future capital adequacy requirements, could increase our borrowing costs, limit our access to capital markets or result in a downgrade in our credit ratings, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

We are exposed to losses as a result of legal and regulatory claims relating to floor clauses in mortgage agreements with consumers

We are involved in certain actions relating to the application of "**floor clauses**" (clauses that set minimum interest rates payable by borrowers, whereby the borrower agrees to pay a minimum interest rate to the lender regardless of the applicable benchmark rate) in mortgage agreements acquired from Banco Grupo Cajatrés, S.A.U. ("**Banco Caja3**").

We have entered into negotiated settlements with certain of the borrowers under the portfolio of mortgage loans containing floor clauses that we acquired from Banco Caja3.

As of December 31, 2021, €944 million (16,518 mortgage loans), out of the approximately €1,017 million of outstanding principal amount of 19,134 outstanding mortgage loans containing floor clauses, corresponded to mortgage loans amended in negotiated settlements and €73 million (2,616 mortgage loans) corresponded to mortgage loans containing floor clauses which have not been subject to negotiated settlements and which were still claimable as of such date. In addition, in the year ended December 31, 2021, our Customer Service Care ("**CSC**") received 944 claims related to floor clauses (622 and 596 in the years ended December 31, 2020 and 2019, respectively).

The Spanish Supreme Court declared in its ruling dated April 11, 2018 the validity of the floor clauses contained in the amendment agreements signed between us and our customers in the negotiated settlements, and the lower Spanish courts are applying the Spanish Supreme Court's criteria. However, on June 26, 2018, the Court of First Instance and Investigation (*Juzgado de Primera Instancia e Instrucción*) No 3 in Teruel requested from the Court of Justice of the European Union ("**CJEU**") a preliminary ruling based on the apparent conflict between the Spanish Supreme Court's ruling upholding the validity of these amendment agreements and EU law on unfair terms in consumer contracts.

On November 5, 2020 the Spanish Supreme Court determined that an agreement between a lender and a consumer whereby the consumer accepts an amendment to the floor clause and waives his right to claim against the lender is valid provided that the consumer was duly informed about the amendment and that such waiver only covers claims relating to the floor clause (and therefore does not extend to claims other than those relating to the floor clause). Therefore, the Spanish Supreme Court ruled that the provisions which modified the original floor clause were valid but those provisions which established a general waiver of rights to claim by the customer were void. As a result, since this resolution from the Spanish Supreme Court (a) entities were obliged to reimburse customers with the amounts paid under the rate of the floor clauses from the beginning of the original agreement until the amendment and (b) the new floor clauses which were introduced by virtue of the settlement agreements were considered valid and in place since the date of the relevant settlement agreement.

As of December 31, 2021, our provisions related to this matter amounted to €10.2 million, which covered our estimate of the risk from outstanding and potential claims arising from non-amended loans and amended loans. In this regard, during 2021 we made a provision of €5,516 thousand after having performed a new analysis of the recent rulings in order to cover the claims expected in the future in relation to this contingency. We consider our provisions to be reasonable taking into consideration the amount of mortgage loans containing floor clauses which have not been claimed by customers or subject to negotiated settlements and which were still claimable as well as the rulings by the CJEU on July 9, 2020 and by the Spanish Supreme Court on

November 5, 2020 in respect of mortgage loans containing floor clauses amended in negotiated settlements. However, these estimates may not be complete, may not have factored in all customers or former customers that could potentially file claims, and may not reflect the most recent facts or legal trends adopted by the Spanish courts, or any other circumstances that could be relevant for establishing the impact of these clauses for us or the successful outcome of the claims filed in relation to these clauses. Consequently, the provisions made by us could prove to be inadequate.

The quantification of actual losses recorded in the loss database in 2021 showed that the total annual amount of losses (net of direct and insurance recoveries) for operational risk events amounted to €39,584 thousand corresponding to 15,457 events, of which 667 events for €22,182 thousand derived from losses related to floor clauses (which were related to interest repayments of €20,631 thousand and legal costs of €1,551 thousand).

On April 5, 2022 the Spanish government announced a new draft bill for the creation of the Independent Administrative Authority for Financial Customer Protection which will provide financial consumers with an alternative mechanism to judicial proceedings in order to settle out of court any disputes (such as claims related to floor clauses) against financial entities. The creation of this administrative authority will centralise in a single entity the functions performed by the current complaints services of the CNMV, the Bank of Spain and the Directorate General of Insurance and Pension Funds (which will no longer perform these functions) and its resolutions will be binding when the user claims less than €20,000 which is a significant change to the current complaints procedures of the three supervisors. Although the impact of this new mechanism is still uncertain, it could imply an increase in claims against us.

For further information on floor clause litigation and other legal proceedings in which we are involved, see "*Business—Legal proceedings*".

Risk of not recovering certain tax assets

As of December 31, 2021 we had deferred tax assets ("**DTAs**") amounting to €1,292,152 thousand (€1,335,625 thousand and €1,326,708 thousand as of December 31, 2020 and 2019, respectively), representing 2.2% of our total consolidated assets (2.3% and 2.4% as of December 31, 2020 and 2019, respectively). These assets or tax credits are derived principally from (i) negative taxable base for corporate tax due to losses in a given fiscal year; (ii) certain corporate tax deductions that cannot be applied to a given fiscal year if the corporate income tax ("**CIT**") base is negative; (iii) certain temporary adjustments recognized in a given fiscal year, that are pending to be applied; and (iv) DTAs which are monetizable or guaranteed by the State and which recovery, therefore, does not depend exclusively on future profits.

Our ability to recover these tax assets in the future is subject to different time limitations depending on the origin of the asset (e.g. no time limitation for negative taxable bases or 15 years for deductions pending application, as provided in Act 27/2014, dated November 27, on Corporate Income Tax (*Ley 27/2014, de 27 de noviembre, del Impuesto sobre Sociedades*) (the "**CIT Act**"), except for deductions for research and development and innovation which may be offset within 18 years). According to our business plan, which served as the basis for the valuation of these tax assets, the estimated period to recover these tax assets is no longer than 15 years.

Temporary differences are typically recovered following the recovery path foreseen accounting-wise, and there is no time limit to offset negative tax bases and deductions to prevent international double taxation.

Out of our €1,292 million total DTAs as of December 31, 2021 (€1,336 million and €1,327 million as of December 31, 2020 and 2019, respectively), €411 million (€433 million and €452 million as of December 31, 2020 and 2019, respectively) are DTAs for tax-loss carryforwards and unused tax credits. The eventual recovery of these tax assets is subject to or limited by the occurrence of certain factors, such as obtaining sufficient profits, the non-reduction of the corporate tax rate or the existence of discrepancies with the Spanish tax authorities in the settlement of such tax.

Therefore, in the event that (i) we do not generate sufficient profits (or at all) within the applicable time to offset non-monetizable tax credits; (ii) discrepancies are detected in previous tax returns as a consequence of audits undertaken by the Spanish tax authorities resulting in a reduction of our DTAs; or (iii) there are changes in current regulations, or their application or interpretation, we could be totally or partially restricted from recovering the amount of our DTAs, which could have a material adverse effect on our business, results of operations and/or financial condition.

The Spanish tax authorities notified us in July 2020 of the commencement of tax audit proceedings in relation to the CIT for 2011 to 2017 (both inclusive) which are still ongoing. The tax inspectors have already requested certain financial information from us and as of the date of this Registration Document, no significant discrepancies have been identified.

As of December 31, 2021, we had provisions for an amount of €4,235 thousand in connection with the tax audit proceedings which, taking into consideration the current CIT rate of 30% would represent €14,116 thousand at tax base level. However, these estimates may not be complete, may not reflect all the circumstances that could be relevant for establishing the impact of these tax audit proceedings. Consequently, the provisions made by us could prove to be inadequate.

RESPONSIBILITY STATEMENT AND COMPETENT AUTHORITY

Responsibility statement

Mr. Antonio Martínez Martínez, acting in the name and on behalf of the Company, acting in his capacity as Chief Financial Officer under a special power of attorney granted by the board of directors and the general shareholders' meeting of the Company by means of their resolutions each dated January 19, 2022 accepts responsibility for the information contained in this Registration Document. To the best of his knowledge, the information contained in this Registration Document is in accordance with the facts and contains no omissions likely to affect its import.

Competent authority

This Registration Document has been approved by the CNMV, as competent authority under the Prospectus Regulation (European Parliament and Council Regulation (EU) No 2017/1129, of June 14, 2017, on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC) on May 3, 2022.

The CNMV only approves this Registration Document as meeting the standards of completeness, comprehensibility and consistency imposed by the Prospectus Regulation. Such approval should not be considered as an endorsement of Ibercaja Banco.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Consolidated Financial Information

Our consolidated annual accounts as of and for each of the years ended December 31, 2021, 2020 and 2019 (which include audited comparative information for the prior years, the "**2021 Annual Accounts**", the "**2020 Annual Accounts**" and the "**2019 Annual Accounts**", respectively, and collectively the "**Annual Accounts**") were prepared, according to applicable Spanish law, in accordance with the International Financial Reporting Standards, as adopted by the European Union ("**IFRS-EU**"), and with Circular 4/2017 of the Bank of Spain. The 2020 Annual Accounts and the 2019 Annual Accounts have been audited by PricewaterhouseCoopers Auditores, S.L. as stated in its unqualified reports and the 2021 Annual Accounts have been audited by Ernst & Young, S.L. as stated in its unqualified report. The English translation of the Annual Accounts, together with the English translation of the audit reports, are included as an annex to this Registration Document. The Annual Accounts were originally prepared in Spanish so in case of any inconsistency between the English translations and the Spanish original versions of the Annual Accounts, the Spanish original version shall prevail.

Implementation of IFRS 16 "Leases"

Beginning on January 1, 2019, we implemented the requirements of IFRS 16 "Leases". IFRS 16 applies retrospectively and was implemented by adjusting our opening balance sheet at the date of first-time application (January 1, 2019). IFRS 16 establishes the principles for the recognition, measurement, presentation and disclosure of leases in order to ensure that both lessee and lessor provide the relevant information to present a true and fair view of lease transactions. IFRS 16 provides a single accounting model for lessees that requires them to recognize right-of-use assets and lease liabilities under existing leases (unless the lease term is 12 months or less or the value of the underlying asset is low). The impact of our first-time application of IFRS 16 as of December 31, 2019 related mainly to the recognition of right-of-use assets and lease liabilities each amounting to €62 million. The first application of IFRS 16 had no impact on our consolidated equity, although it reduced our fully-loaded CET 1 ratio by 4 basis points.

As permitted by IFRS 16, we decided not to determine whether a contract is or contains a lease under the new definition on first-time application, and therefore we apply IFRS 16 only to contracts that were identified as leases under the International Accounting Standard ("**IAS**") 17 prior to January 1, 2019.

Alternative performance measures

In addition, this Registration Document includes non-IFRS financial measures which we regard as alternative performance measures as defined in Commission Delegated Regulation (EU) 2019/979 of March 14, 2019 supplementing Regulation (EU) 2017/1129 of the European Parliament and of the Council with regard to regulatory technical standards on key financial information in the summary of a prospectus, the publication and classification of prospectuses, advertisements for securities, supplements to a prospectus, and the notification portal and in the guidelines issued by the European Securities and Markets Authority on October 5, 2015 on alternative performance measures (the "**ESMA Guidelines**" and the "**APMs**", respectively). We believe that the presentation of the APMs included herein complies with the ESMA Guidelines.

We use APMs, which are financial measures derived from, or based on, our accounting records, to evaluate period to period changes that are not required by, or presented in accordance with, IFRS-EU. These APMs are not measures of our financial performance under IFRS-EU, are not audited or reviewed by any auditors or independent expert, and should not be considered as an alternative to any balance sheet, income statement or cash flow statement item. See "*Alternative Performance Measures*".

Many of these measures are based on various sources of information derived from our internal management systems and our reporting systems, as the case may be. These management measures, as defined and calculated by us, have limitations as analytical tools and should not be considered in isolation or as a substitute for an analysis of our operating result as reported under IFRS. In addition, they may not be comparable to other similarly titled measures used by other companies. As a result, these management measures should not be considered such information in isolation, as alternatives to the information calculated in accordance with IFRS-EU, as indications of operating performance or as measures of our profitability or liquidity. Such financial information must be considered only in addition to, and not as a substitute for or superior to, financial information prepared in accordance with IFRS-EU.

Management reports

Pursuant to Spanish regulatory requirements, the management reports (*informes de gestión*) are required to accompany each of our Annual Accounts. The management report in connection with the 2021 Annual Accounts (the "**2021 Management Report**"), the 2020 Annual Accounts (the "**2020 Management Report**") and the 2019 Annual Accounts (the "**2019 Management Report**" and, together with the 2020 Management Report and the 2021 Management Report, the "**Management Reports**") are included as an annex to this Registration Document accompanying the Annual Accounts only in order to comply with such regulatory requirements. The Management Reports were originally prepared in Spanish so in case of any inconsistency between the English translations and the Spanish original versions of the Management Reports, the Spanish original versions shall prevail.

The Management Reports contain information as of various historical dates and do not contain a description of our current business, affairs or results. Accordingly, the Management Reports should be read together with the other portions of this Registration Document, and in particular the sections "*Risk Factors*," "*Operating and Financial Review for the years ended December 31, 2021, 2020 and 2019*". Furthermore, the Management Reports may include certain forward-looking statements that are subject to inherent uncertainty (see "*Forward-Looking Statements*").

Peers

Unless otherwise indicated or otherwise required by the context, all references in this Registration Document to "**peers**" correspond, collectively, to Banco de Sabadell, S.A. ("**Sabadell**"), Bankinter, S.A. ("**Bankinter**"), Caixabank, S.A. ("**Caixabank**"), and Unicaja Banco, S.A. ("**Unicaja**"), as Spanish listed primarily domestic retail banks.

In this Registration Document, we calculate market shares for loans and deposits based on the total sector figures provided by the Bank of Spain (which, in turn, aggregates the figures reported by each Spanish bank). Market shares for the products in our Financial Group are calculated by third party sources such as Inverco, ICEA and the Spanish leasing association (*Asociación Española de Leasing*).

In this Registration Document, we use publicly available information reported by our peers to set out our positioning in the market. The elaboration of this publicly available information could follow different criteria within the applicable accounting framework across peers and we have not analyzed whether this information is homogeneous and comparable with the corresponding metrics used by us or the rest of our peers. In addition, we note that for Caixabank and Unicaja we have used the aggregated financial information that has been reported by each of the merging entities after their respective merger processes. Moreover, in certain circumstances we have used publicly available information from peers from prior time periods because of the lack of more recent information.

In addition, we also compare certain of our APMs with our peers' corresponding APMs. For the calculation of our peers' APMs in all cases with the only exception of the cost of risk^{APM} we apply the same method of calculation as for our corresponding APM using for such calculation the publicly available information reported by our peers referred to in the previous paragraph (i.e. we have not used our peers' reported APMs). We have compared our cost of risk^{APM} to the cost of risk reported by our peers and we have not analyzed whether the method of calculation of such APM by our peers is homogeneous and comparable with the calculation of our cost of risk^{APM}.

Therefore, the market positioning set out in this Registration Document could potentially be misrepresented and inaccurate.

Objectives

We have included certain objectives in this Registration Document. These objectives are part of our strategic plan and are not an indication of our expected or actual results and as such we cannot guarantee that they can or will be met. These objectives are based on assumptions and expectations and are subject to known and unknown risks, uncertainties (including macroeconomic developments, the evolution of Euribor, interest rates, revenues, expenses and cost of risk) and other factors that could cause our actual results to materially differ from those expressed in, or suggested by, these objectives. The ultimate achievability of these objectives is also subject to numerous risks and uncertainties including, but not limited to, the risks and uncertainties described in this Registration Document.

Neither our independent auditors nor any other independent accountants compiled, examined or performed any procedures with respect to these objectives, nor have they expressed any opinion or any other form of assurance on these objectives or their achievability, and such parties assume no responsibility for, and disclaim any association with, these objectives.

These objectives, while presented with numerical specificity, necessarily reflect numerous assumptions made by us with respect to industry performance, general business, economic, regulatory, market and financial conditions, and other future events, as well as matters specific to our businesses, all of which are difficult or impossible to predict and many of which are beyond our control. These objectives reflect subjective judgments in many respects and, thus, are susceptible to multiple interpretations and periodic revisions based on actual experience and business, economic, regulatory, financial and other developments.

Also, the benefits and impact of our strategy and objectives could fall short of what we envisage, meaning that we are unable to achieve our strategy and objectives in the medium term as set out in "*Business—Strategy—Medium-term financial objectives*"). We may not succeed in achieving any of our financial objectives (set out in "*Business—Strategy—Medium-term financial objectives*") because of insufficient management attention, incorrect decisions or choices, inefficiencies, competition or because forecasted events and actions may not take place or may take place at a different time or to a different extent than anticipated or because certain events and actions could not be predicted or quantified at the time these objectives were established.

These objectives constitute forward-looking information and are subject to risks and uncertainties that could cause actual results to differ materially from these objectives, including, but not limited to, our performance, industry performance, general business and economic conditions, competition, adverse changes in applicable laws, regulations or rules, and the various risks and uncertainties set forth in this Registration Document that could materially adversely affect our future results. We cannot give any assurance that these financial objectives will be realized or that actual results will not vary significantly from these objectives.

Currency references

Unless otherwise indicated or otherwise required by the context, all references in this Registration Document to "**euro**," "**€**," or "**EUR**" are to the lawful currency of the participating Member States, as defined below, including Spain, in the third stage of European Economic and Monetary Union of the Treaty establishing the European Community, as amended from time to time, and all references to "**U.S. dollars**", "**dollars**", "**U.S.$**", "**USD**" or "**$**" are to the lawful currency of the United States of America.

Rounding

Certain numerical figures included in this Registration Document, including financial data presented in millions or thousands and certain percentages, may have been subject to rounding adjustments. Accordingly, amounts shown as totals in columns or rows of tables in this Registration Document may not be an arithmetic aggregation of the related numbers. In addition, certain percentages presented in the tables in this Registration Document reflect calculations based upon the underlying information prior to rounding and, accordingly, may not conform to the percentages that would be derived if the relevant calculation were based upon the rounded numbers. As used in this Registration Document, the term "billion" means one thousand million (1,000,000,000).

Market and industry data

Industry surveys and publications generally state that the information contained therein has been obtained from sources believed to be reliable, but that the accuracy and completeness of such information is not guaranteed. We believe that these industry publications, surveys and forecasts are reliable but we have not independently verified them and cannot guarantee their accuracy or completeness and certain of this information, including market studies, are frequently based on information and assumptions which may not be exact or appropriate, and their methodology is by nature forward-looking and speculative.

Where information contained in this Registration Document has been sourced from a third party, the Company confirms that such information has been accurately reproduced and, so far as it is aware and have been able to ascertain from information published by third parties, no facts have been omitted which would render the reproduced information inaccurate or misleading. Where information in this Registration Document has been sourced from third parties, the source of such information has been clearly stated adjacent to the reproduced information.

Trademarks

We own or have rights to certain trademarks, trade names or service marks which we use in connection with the operation of our business. We assert to the fullest extent under applicable law, our rights to our trademarks, trade names and service marks. Solely for convenience, the trademarks, trade names or service marks appearing in this Registration Document are listed without the applicable ®, © or ™ symbols.

Legislation

This Registration Document refers to various statutes, directives and other legislation and regulations. Unless specified to the contrary, all such references are to the laws of Spain, except for directives, where all such references shall be deemed to be made to EU directives.

The financial information included in this Registration Document is not intended to comply with the applicable accounting requirements of the U.S. Securities Act and the related rules and regulations of the SEC.

CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS

This Registration Document includes forward-looking statements that reflect our intentions, beliefs or current expectations and projections. These forward-looking statements include, but are not limited to, statements regarding our future financial position and results of operations, our strategy, plans, objectives, goals and targets, future developments in the markets in which we operate or intend to operate. In some cases, you can identify forward-looking statements by terminology such as “objective”, “aim”, “anticipate”, “believe”, “continue”, “could”, “estimate”, “expect”, “forecast”, “target”, “guidance”, “intend”, “is likely to”, “may”, “plan”, “potential”, “predict”, “projected”, “seek”, “should” or “will” or the negative of such terms or other similar expressions or terminology.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements speak only as of the date of this Registration Document and are not guarantees of future performance and are based on numerous assumptions. Our actual results of operations, financial condition and the development of events may differ materially from (and be more negative than) those made in, or suggested by, the forward-looking statements. For a more complete discussion of the factors that could affect us, please refer to “*Risk Factors*”, the description of our business lines in the section entitled “*Business*” and “*Operating and Financial Review for the years ended December 31, 2021, 2020 and 2019—Key factors affecting comparability of results of operations*”.

Unless required by law, we undertake no obligation to update or revise any forward-looking statement, whether as a result of new information, future events or developments or otherwise.

DIVIDENDS AND DIVIDEND POLICY

Dividend payments for the years ended December 31, 2021, 2020 and 2019

In the years ended December 31, 2021, 2020 and 2019, we distributed €98,140,000, €3,849,000 and €17,500,000, respectively, as dividends to our shareholders, representing €0.46, €0.02 and €0.08 per Share, respectively, and resulting in a cash dividend payout ratio^{APM} of 65.00%, 16.31% and 20.84%, respectively.

Earnings per ordinary share were €0.62, €0.03 and €0.09 for the years ended December 31, 2021, 2020 and 2019, respectively[18].

Dividend policy

As of the date of this Registration Document no dividend policy has been approved by the Company. However, it is our intention to distribute cash dividends in the near future in a prudent manner such that it does not affect the objective of maintaining an adequate capital buffer, even if there is a deterioration of the macroeconomic situation and financial conditions. In particular, as part of our "Plan Desafío 2023" Strategic Plan, we intend to increase our cash dividend pay-out ratio^{APM} to around 60% in the medium term (see "*Business – Strategy – Medium-term financial objectives*").

However, there is no guarantee that we will pay dividends in the future or regarding the level of any such dividends. The amount of future dividends we decide to pay, if any, and our future dividend policy will depend on a number of factors, including, but not limited to, our earnings, financial condition, regulatory restrictions, prospects, market conditions and such other factors as may be deemed relevant at the time. In addition, actual payment of future dividends and the amounts thereof, will depend on the amount of "distributable items" (as defined in CRR) and solvency requirements, earnings, level of profitability, cash flow generation, credit ratings, applicable restrictions on the payment of dividends under applicable laws including by bank regulators, the level of dividends paid or shares repurchased by other comparable listed companies doing business in Spain and such other factors as our Board of Directors may deem relevant from time to time. For example, the results of our stress test[19] (see "*Regulation - Pillar 2 requirements (P2R) and Pillar 2 Guidance (P2G)*") will determine our dividend policy in the future.

The amount of dividends will be proposed by our Board of Directors and determined by our shareholders at the general shareholders' meetings. Pursuant to Additional Provision 10 of the Banking Foundations Act, resolutions to distribute dividends in credit institutions controlled by a banking foundation in accordance with the provisions of Article 44.3 of the Banking Foundations Act shall be subject to the reinforced quorum established in Article 194 of the Spanish Companies Act and must be passed by a majority of at least two thirds of the capital present or represented at the shareholders' meeting.

Any dividends paid in the future will be subject to tax under Spanish law. As an exemption to the above, certain distributions could be exempt under Spanish law if certain circumstances are met.

Limitations on dividends and other distributions

Our capacity to distribute dividends may be restricted under general Spanish corporate law and other laws and regulations applicable to us (see "*Regulation—Capital requirements—Maximum Distributable Amount*"). In accordance with the Ibercaja Foundation Protocol, the Ibercaja Foundation will ensure that any distribution of dividends by us complies with the regulations on capital distributions set out in our applicable solvency regime, strengthening our own funds, in the interest of all of our shareholders.

---

[18] Calculated by dividing the net income attributable to Ibercaja Banco for the year, adjusted by the remuneration of equity instruments issued other than capital recorded in equity in the consolidated balance sheet, by the weighted average number of shares outstanding.

[19] These stress tests are conducted externally every two years (the next stress test will be conducted in 2023).

In addition, the ECB may impose restrictions on dividend distributions. For instance, in the context of the COVID-19 pandemic, the ECB issued in March 2020 several recommendations regarding profit distributions which made us rescind the resolution of the General Shareholders' Meeting approving the distribution of a dividend out of the Company's results for 2019. The distribution of the 2019 dividend was approved again and paid in October 2020, within the limitations and recommendations set by the ECB.

In this context, on December 15, 2020, the ECB issued a new recommendation addressed to all significant supervised credit institutions[20] in the Eurozone regarding profit distribution and share buy-backs for 2019 and 2020 stating that any such profit distribution and share buy-backs should be below 15% of the relevant credit institution's cumulative profit for the financial years 2019 and 2020 and not exceed 20 basis points of CET1 until September 30, 2021.

The conditions under which we may declare dividends based on Spanish law and our bylaws are described under "*Description of Share Capital—Dividend and liquidation rights—Dividend distribution*".

---

[20] The ECB maintains a list of the supervised entities, classified as significant supervised entities, which are directly supervised by the ECB and as less significant supervised entities, which are indirectly supervised by the ECB. This list is updated regularly and reflects all decisions on bank significance that entered into force before the relevant cut-off date. In the ECB list of 2021 (being October 1 the relevant cut-off date), the Company is classified as a significant supervised entity.

ALTERNATIVE PERFORMANCE MEASURES

The following discussion sets out information related to certain non-IFRS financial measures of the Group, which we regard as alternative performance measures ("**APMs**") for the purposes of Commission Delegated Regulation (EU) 2019/979 and as defined in the ESMA Guidelines.

We use APMs, which are financial measures derived from (or based on) our accounting records, to evaluate period to period changes that are not required by, or presented in accordance with, IFRS-EU. Many of these APMs are based on our internal estimates, assumptions and calculations. These APMs are not measures of our financial performance under IFRS-EU, are not audited or reviewed and should not be considered as an alternative to any balance sheet, income statement or cash flow statement item.

We have included these APMs because they are used by management to evaluate our performance and because we believe these APMs will assist securities analysts and other interested parties in having a better understanding of our financial condition and results of operations. These APMs are commonly reported by financial institutions, as they capture information that is not immediately apparent from the IFRS-EU framework. Further, they may be helpful for the in-depth analysis of the performance of the highly regulated and specialized sector in which we operate, and should allow securities analysts and other interested parties to compare our performance with that of our peers more effectively.

These APMs have limitations as analytical tools and should not be considered in isolation from, or as a substitute for analysis of, our financial condition or results of operations as reported under IFRS-EU. Other companies in our industry may calculate similarly titled measures differently than we do, such that disclosure of similarly titled measures by other companies may not be comparable with ours. These APMs should be reviewed in conjunction with our Annual Accounts and their respective accompanying notes included in this Registration Document and the related discussion thereof set forth in this Registration Document.

We consider that the APMs contained in this Registration Document comply with the ESMA Guidelines.

We segment certain APMs by market based on the location of the branch through which we manage the commercial relationship with each of our clients.

We include below an index to the APMs:

Name	Category	Number
Adjusted ROTE	APMs related to profitability	27
Allowance for credit losses over average of gross loans and advances to customers	APMs related to asset quality	37
Asset management and life savings insurance funds	APMs related to business volume	59
Available liquidity position	APMs related to liquidity	73
Average rates on customer deposits	APMs related to profitability	15
Average rates on interest-bearing liabilities	APMs related to profitability	14
Average rates on interest-earning assets	APMs related to profitability	13
Breakdown by customer's turnover of the loans to non real estate activities	APMs related to business volume	70
Breakdown by maturity and type of interest rate (fixed or floating) of gross loans and advances to customers	APMs related to business volume	67
Cash dividend payout ratio	APMs related to solvency	30

Cash recoveries of NPLs at the beginning of the period	APMs related to asset quality	53
Cost-to-income ratio	APMs related to profitability	23
Cost of risk	APMs related to asset quality	36
Customer spread	APMs related to profitability	16
External funding	APMs related to business volume	61
Foreclosed assets coverage ratio	APMs related to asset quality	44
Foreclosed assets evolution	APMs related to asset quality	54
Foreclosed land coverage ratio	APMs related to asset quality	45
Guaranteed credit lines drawn over loans to businesses	APMs related to asset quality	55
Gross loans and advances to customers	APMs related to business volume	62
Housing NPLs over NPLs	APMs related to asset quality	50
Liquid assets	APMs related to liquidity	72
Liquid assets over total assets	APMs related to liquidity	74
Loan portfolio by stages	APMs related to asset quality	38
Loans to sectors most affected by the COVID-19 pandemic over gross loans and advances to customers	APMs related to asset quality	56
Loans with outstanding moratoria over gross loans and advances to customers	APMs related to asset quality	57
LTD ratio	APMs related to liquidity	71
LTV ratio	APMs related to asset quality	51
Net fee income and exchange differences	APMs related to the income statement	4
Net fee income and exchange differences over average total assets	APMs related to profitability	20
Net fee income and exchange differences over recurring revenues	APMs related to profitability	21
Net interest income over gross income	APMs related to profitability	19
Net interest margin	APMs related to profitability	17
Net loans and advances to customers	APMs related to business volume	62
Net loans and advances to customers over total assets	APMs related to business volume	63
Net NPAs	APMs related to asset quality	48
Net NPAs over total assets	APMs related to asset quality	49
Net NPLs by sector	APMs related to asset quality	43
Net profit from financial assets and liabilities	APMs related to the income statement	5

Non-banking commissions over recurring revenues	APMs related to profitability	22
NPA coverage ratio	APMs related to asset quality	47
NPA provisions	APMs related to asset quality	46
NPA ratio	APMs related to asset quality	35
NPAs	APMs related to asset quality	31
NPL coverage ratio	APMs related to asset quality	41
NPL coverage ratio by sector	APMs related to asset quality	42
NPL provisions	APMs related to asset quality	39
NPL provisions by sector	APMs related to asset quality	40
NPL ratio	APMs related to asset quality	32
NPLs by sector	APMs related to asset quality	33
NPL ratio by sector	APMs related to asset quality	34
NPLs evolution	APMs related to asset quality	52
Operating expenses	APMs related to the income statement	7
Other gains and losses	APMs related to the income statement	12
Other operating income and expenses	APMs related to the income statement	6
Performing loans excluding reverse repurchase agreements	APMs related to business volume	64
Profit before provisions	APMs related to the income statement	9
Provisions and impairments	APMs related to the income statement	11
Recurring cost-to-income ratio	APMs related to profitability	24
Recurring operating expenses	APMs related to the income statement	8
Recurring profit before provisions	APMs related to the income statement	10
Recurring revenues	APMs related to the income statement	3
Retail business volume	APMs related to business volume	65
Retail business volume per employee	APMs related to business volume	66
Retail customer funds	APMs related to business volume	60
Retail deposits	APMs related to business volume	58
ROA	APMs related to profitability	25
ROTE	APMs related to profitability	26
RWAs density	APMs related to solvency	29
Tangible shareholders' equity	APMs related to profitability	28
Total exposure of the fixed income and equity instruments portfolio	APMs related to business volume	68

Total exposure of the fixed income and equity instruments portfolio over total assets	APMs related to business volume	69
Total interest expense by interest-bearing liabilities categories	APMs related to profitability	2
Total interest income by interest-earning assets categories	APMs related to profitability	1
Total new lending	APMs related to profitability	18

The following list includes the definition, calculation and relevance of our APMs:

APMs related to the income statement

1. **Total interest income by interest-earning assets categories[APM]:**

Definition: Accrued interest for the year broken down by interest earning assets categories.

Relevance of its use: We use this APM to measure the Company's sources of financial income.

	For the year ended December 31,		
	2021	**2020**	**2019**
	(*€ thousands*)		
Financial intermediaries(1)(2)	67,410	54,017	14,004
Loans and advances to customers(2)	342,556	398,933	435,281
ALCO portfolio(2)	34,028	56,592	69,023
Life insurance business portfolio(2)	105,269	121,937	144,550
Rest of assets(2)	660	1,319	703
Total interest income	**549,923**	**632,798**	**663,561**

Notes:—

Source: Interest income comprises interest income earned during the period on all interest-earning assets, implicit or explicit, regardless of whether such assets are valued at fair value, except for those with a negative interest rate. The classification by type of asset is based on the nature of the transaction, with the total amount corresponding to that shown in Note 28 to our Annual Accounts.

(1) In accordance with Regulation (EU) 2021/451, income derived from the application of negative rates is allocated according to its nature. The asset "financial intermediaries" includes the negative interest from the balance of the liability "financial intermediaries", the most significant being the income from the TLTRO financing.

(2) Adjusted for the effect of interest rate hedging transactions.

The following table shows the percentage that each interest-earning asset bears to total interest income:

	For the year ended December 31,		
	2021	**2020**	**2019**
	(%)		
Financial intermediaries	12.26%	8.54%	2.11%
Loans and advances to customers	62.29%	63.04%	65.60%
ALCO portfolio	6.19%	8.94%	10.40%
Life insurance business portfolio	19.14%	19.27%	21.78%
Other assets	0.12%	0.21%	0.11%
Total interest income	**100.00%**	**100.00%**	**100.00%**

2. **Total interest expense by interest-bearing liabilities categories**[APM]**:**

Definition: Accrued interest for the year broken down by interest-bearing liabilities categories.

Relevance of its use: We use this APM to measure the Company's financial costs.

	For the year ended December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Financial intermediaries[(1)(2)]	23,819	29,669	9,945
Retail deposits[(2)]	(6,574)	(2,509)	4,948
Debt securities issued and mortgage covered bonds[(2)]	32,634	52,469	65,597
Liabilities under insurance contracts[(2)]	1,704	15,227	32,078
Other liabilities[(2)]	5,514	4,269	3,747
Total interest expense	**57,097**	**99,125**	**116,315**

Notes:—

Source: Interest expense comprises interest accrued during the year on all interest-bearing liabilities, implicit or explicit, including those arising from remuneration in kind, regardless of whether they are measured at fair value, except for those with a negative interest rate. The classification by type of liability is based on the nature of the transaction, with the total amount corresponding to that shown in Note 29 to our Annual Accounts.

(1) The liability "financial intermediaries" includes the negative interest from the balance of the asset "financial intermediaries".

(2) Adjusted for the effect of interest rate hedging transactions.

3. **Recurring revenues**[APM]:

Definition: Net interest income plus net fee income and exchange differences[APM] (as defined and calculated below).

Relevance of its use: We use this APM to measure the evolution of our revenues that are directly linked to our business activities (banking business, asset management and bancassurance).

	For the year ended December 31,					
	2021		**2020**		**2019**	
			(€ thousands, except %)			
(+) Net interest income[(1)]	492,826	52.9%	533,673	58.7%	547,246	58.1%
(+) Net fee income and exchange differences[APM]	438,543	47.1%	374,987	41.3%	394,843	**41.9%**
Recurring revenues[APM]	**931,369**	**100%**	**908,660**	**100%**	**942,089**	**100%**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

The following table shows the breakdown of recurring revenues[APM] by market:

	For the year ended December 31,					
	2021		**2020**		**2019**	
			(€ thousands, except %)			
Home Markets	578,116	62.07%	537,700	59.18%	537,019	57.00%

Recurring revenues^{APM}	**931,369**	**100.00%**	**908,660**	**100.00%**	**942,089**	**100.00%**
Recurring revenues^{APM} from Financial Group (a) + (b)	**409,804**	**44.00%**	**353,247**	**38.88%**	**368,889**	**39.16%**

Notes:—

Source: This breakdown has been obtained by classifying our recurring revenues^{APM} by each type of product commercialized or managed by us.

4. **Net fee income and exchange differences^{APM}**:

Definition: Fee and commission income minus fee and commission expense plus net exchange differences.

Relevance: We use this APM to measure the margin obtained through our fees and commissions.

	For the year ended December 31,		
	2021	2020	2019
		(€ *thousands*)	
(+) Fee and commission income	457,495	390,771	412,375
(-) Fee and commission expense	19,509	16,636	18,636
(+) Net exchange differences	557	852	1,104
Net fee income and exchange differences[APM]	**438,543**	**374,987**	**394,843**

Notes:—
Source: Consolidated income statement in the Annual Accounts.

The following table shows the breakdown of net fee income and exchange differences[APM] by origin of commissions for the years ended December 31, 2021, 2020 and 2019.

	For the year ended December 31,					
	2021		2020		2019	
			(€ *thousands, except %*)			
Banking commissions	149,618	34.12%	144,769	38.61%	151,851	38.46%
Non-banking commissions(1)	288,925	65.88%	230,218	61.39%	242,992	61.54%
Net fee income and exchange differences[APM]	**438,543**	**100.00%**	**374,987**	**100.00%**	**394,843**	**100.00%**

Notes:—
(1) Non-banking commissions are calculated as follows:

	For the year ended December 31,		
	2021	2020	2019
		(€ *thousands*)	
(A)Non-bank financial product marketing fees(i)	254,860	206,590	195,389
Securities services fees(ii)	49,581	38,992	61,501
(B) Of which: asset management fees	*41,627*	*29,751*	*53,603*
Of which: sale of securities held in custody	*7,954*	9,241	7,898
Other fees(iii)	(10,258)	(8,239)	(9,248)
(C) Of which: other fees for marketing of non-banking financial products(iii)	*(7,562)*	*(6,123)*	*(6,000)*
Of which: rest of other fees	*(2,696)*	*(2,116)*	*(3,248)*
(A+B+C) Non banking commissions	**288,925**	**230,218**	**242,992**

Notes:—
(i) Source: Note 32 to the Annual Accounts.
(ii) Source: Note 32 to the Annual Accounts. Based on the origin of the fees, this item is broken down into: asset management fees (including success fees) and sale of securities held in custody.
(iii) Source: Note 33 to the Annual Accounts. Based on the origin of the fees, this item is broken down into: other fees for marketing of non-banking financial products, which mainly includes rebates on mutual fund fees and the costs associated with pension fund promotions, and the rest of other fees.

The following table shows the breakdown of non-banking commissions by product for the years ended December 31, 2021, 2020 and 2019:

	For the year ended December, 31		
	2021	**2020**	**2019**
		(€ thousands)	
Mutual funds	203,057	153,815	168,246
Pension funds	42,595	37,735	36,639
Insurance products	46,461	41,087	39,708
Other	(3,188)	(2,419)	(1,601)
Non banking commissions	**288,925**	**230,218**	**242,992**

Notes:—

Source: This breakdown has been obtained by classifying our non-banking commissions by each type of product commercialized or managed by us.

5. **Net profit from financial assets and liabilities**[APM]:

Definition: Sum of gains/(losses) on derecognition of financial assets and liabilities not valued at fair value through profit or loss, gains/(losses) on financial assets and liabilities held for trading, gains/(losses) on financial assets not held for trading mandatorily measured at fair value through profit and loss, gains/(losses) on financial assets and liabilities valued at fair value through profit or loss and gains/(losses) derived from hedge-accounting.

Relevance: We use this APM to measure the amount of our results that is related to financial activity but that cannot be considered as recurring revenues[APM].

	For the year ended December 31,		
	2021	**2020**	**2019**
		(*€ thousands*)	
(+) Gains/(losses) on derecognition of financial assets and liabilities not valued at fair value through profit or loss	46,108	128,856	8,261
(+) Gains/(losses) on financial assets and liabilities held for trading	645	1,149	1,220
(+) Gains/(losses) on financial assets not held for trading mandatorily measured at fair value through profit and loss	103	(10,476)	(3,718)
(+) Gains/(losses) on financial assets and liabilities valued at fair value through profit or loss	-	-	747
(+) Gains/(losses) derived from hedge-accounting	(194)	(364)	567
Net profit from financial assets and liabilities[APM]	**46,662**	**119,165**	**7,077**

Notes:—

Source: Consolidated income statement in the Annual Accounts.

6. **Other operating income and expenses**[APM]:

Definition: Sum of the net of other operating income and other operating expenses and the net of income from assets under insurance or reinsurance contracts and expenses from liabilities under insurance or reinsurance contracts.

Relevance: We use this APM to measure income and expenses that do not arise entirely from our financial activities but that are related to our ordinary activities.

	For the year ended December 31,		
	2021	**2020**	**2019**
	(*€ thousands*)		
(+) Other operating income	37,944	47,022	37,073
(-) Other operating expenses	78,553	78,581	72,473
(+) Income from assets under insurance or reinsurance contracts	904,463	960,230	940,528
(-) Expenses from liabilities under insurance or reinsurance contracts	904,756	960,461	940,798
Other operating income and expenses^{APM}	**(40,902)**	**(31,790)**	**(35,670)**

Notes:—
Source: Consolidated income statement in the Annual Accounts.

7. **Operating expenses^{APM}**:

Definition: Sum of staff expenses, other administration expenses and depreciation/amortization.

Relevance: We use this APM as an indicator of the amount of expenses we incur in connection with our activity.

	For the year ended December 31,		
	2021	**2020**	**2019**
	(*€ thousands*)		
(+) Staff expenses	375,183	502,568	360,944
(+) Other administration expenses	169,066	153,020	171,915
(+) Depreciation/Amortization	66,973	62,918	67,228
Operating expenses^{APM}	**611,222**	**718,506**	**600,087**

Notes:—
Source: Consolidated income statement in the Annual Accounts.

8. **Recurring operating expenses^{APM}**:

Definition: Operating expenses^{APM} (as defined and calculated above) less extraordinary expenses.

Relevance: We use this APM to measure the evolution of the amount of total expenses generated by our businesses (banking business, asset management and bancassurance), excluding extraordinary items, such as the expenses related to the 2021-2022 Redundancy Plan.

	For the year ended December 31,		
	2021	**2020**	**2019**
	(*€ thousands*)		
(+) Operating expenses^{APM}	611,222	718,506	600,087
(-) Extraordinary expenses[(1)]	12,842	151,041	-
Recurring operating expenses^{APM}	**598,380**	**567,465**	**600,087**

Notes:—
(1) Source: Note 38 to the Annual Accounts.

9. **Profit before provisions^{APM}**:

Definition: Gross income less administration expenses and depreciation/amortization.

Relevance: We use this APM to show our profitability before provisions and impairments.

	For the year ended December 31,		
	2021	**2020**	**2019**
		(*€ thousands*)	
(+) Gross income	952,260	1,001,822	926,579
(-) Administration expenses	544,249	655,588	532,859
(-) Depreciation/amortization............	66,973	62,918	67,228
Profit before provisions^{APM}	**341,038**	**283,316**	**326,492**

Notes:—
Source: Consolidated income statement in the Annual Accounts.

10. **Recurring profit before provisions^{APM}**:

Definition: Recurring revenues^{APM} less recurring operating expenses^{APM} (each as defined and calculated above).

Relevance: We use this APM to measure the recurring profitability of the business before provisions and impairments.

	For the year ended December 31,		
	2021	**2020**	**2019**
		(*€ thousands*)	
(+) Recurring revenues^{APM}........	931,369	908,660	942,089
(-) Recurring operating expenses^{APM}...........................	598,380	567,465	600,087
Recurring profit before provisions^{APM}........................	**332,989**	**341,195**	**342,002**

11. **Provisions and impairments^{APM}**:

Definition: Sum of provisions or reversal of provisions, impairment or reversal of impairment on financial assets not valued at fair value through profit or loss, impairment or reversal of impairment on investments in joint business ventures or associates, impairment or reversal of impairment on non-financial assets and, within "gains or losses on non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations", the part corresponding to impairment of other non-current assets held for sale.

Relevance: We use this APM as an indicator of the cost per allocations made in the year to cover the deterioration of the value of our assets.

	For the year ended December 31,		
	2021	2020	2019
		(€ thousands)	
(+) Provisions or (-) reversal of provisions	5,722	(14,236)	37,330
(+) Impairment or (-) reversal of impairment on financial assets not valued at fair value through profit and loss	78,008	219,646	124,637
(+) Impairment or (-) reversal of impairment on investments in joint business ventures or associates	128	—	—
(+) Impairment or (-) reversal of impairment on non-financial assets	11,927	1,559	5,612
(+) Impairment of other non-current assets for sale(1)	31,166	18,861	16,957
Provisions and impairments^APM^	**126,951**	**225,830**	**184,536**

Notes:—

Source: Consolidated income statement in the Annual Accounts.

(1) Source: Note 42 to the Annual Accounts.

12. **Other gains and losses^APM^:**

Definition: Sum of gains or losses on derecognition of non-financial assets and shareholdings and gains or losses on non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations (excluding impairment of other non-current assets for sale included in the APM "provisions and impairments^APM^" above).

Relevance: We use this APM as an indicator of the impact on our results of the derecognition/disposal of assets not related to our ordinary activities.

	For the year ended December 31,		
	2021	2020	2019
		(€ thousands)	
(+) Gains or (-) losses on derecognition of non-financial assets and shareholdings, net(1)	(5,199)	(3,047)	(6,544)
(+) Gains or (-) losses on disposal of other non-current assets for sale(2)	5,885	(969)	(6,775)
Other gains and losses^APM^	**686**	**(4,016)**	**(13,319)**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

(2) Source: Note 42 to the Annual Accounts.

APMs related to profitability

13. **Average rates on interest-earning assets^APM^:**

Definition: average rates are calculated by dividing (i) the interest income from the relevant asset by (ii) the average balance of the relevant asset.

Relevance: We use these APMs as indicators of the average yield of our assets, mainly loans to customers and our fixed-income portfolio.

APM	Calculation	For the year ended December 31, 2021	2020	2019
		(€ thousands, except %)		
Average interest rate on average financial intermediaries[APM]	Interest income from financial intermediaries	67,410	54,017	14,004

	Average loans and advances to customers[(1)]	28,861,661	29,400,209	29,919,163
	Average interest rate on average loans and advances to customers[APM]	**1.19%**	**1.36%**	**1.45%**
Average interest rate on average ALCO portfolio[APM]	Interest income from ALCO portfolio	34,028	56,592	69,023
	Average ALCO portfolio[(1)]	9,969,242	8,525,590	7,114,964
	Average interest rate on average ALCO portfolio[APM]	**0.34%**	**0.66%**	**0.97%**
Average interest rate on average life insurance business portfolio[APM]	Interest income from life insurance business portfolio	105,269	121,937	144,550
	Average life insurance business portfolio[(1)]	7,519,256	7,633,709	7,510,845
	Average interest rate on average life insurance business portfolio[APM]	**1.40%**	**1.60%**	**1.92%**
Average interest rate on average rest of assets[APM]	Interest income from rest of assets	660	1,319	703
	Average rest of assets[(1)]	3,602,615	3,685,826	4,367,183
	Average interest rate on average other rest of assets[APM]	**0.02%**	**0.04%**	**0.02%**
Average interest rate on average total assets[APM]	Interest income from total assets	549,923	632,798	663,561
	Average total assets[(1)]	57,864,629	55,479,103	52,779,955
	Average interest rate on average total assets[APM]	**0.95%**	**1.14%**	**1.26%**

Notes:—

Source: The classification by type of asset is based on the nature of the transaction, with the total amount corresponding to that shown in Note 28 to our Annual Accounts and in which the breakdown is made by accounting portfolio, this is, taking into account the criteria by which the financial assets are valued.

(1) The average balance of each balance sheet item is calculated as the arithmetic average of the average monthly balances. The average monthly balance is the average of end balances weighted at 50% (i.e. the balance at the end of the reference month multiplied by 0.5 plus the balance at the end of the immediately prior month to the reference month multiplied by 0.5).

14. **Average rates on interest-bearing liabilities^APM^**:

Definition: average rates are calculated by dividing (i) the interest expense from the relevant liability by (ii) the average balance of the relevant liability.

Relevance: We use these APMs as indicators of the average cost of our onerous liabilities, mainly customers' deposits and other liabilities.

		For the year ended December 31,

	Average interest rate on average customers deposits^APM	**0.04%**	**0.08%**	**0.13%**

Notes:—

(1) The average balance of each balance sheet item is calculated as the arithmetic average of the average monthly balances. In turn, the average monthly balance is the average of end balances weighted at 50% (i.e. the balance at the end of the reference month multiplied by 0.5 plus the balance at the end of the immediately prior month to the reference month multiplied by 0.5).

16. **Customer spread^APM**:

Definition: Difference between the average yield on loans and advances to customers and the average interest rate on retail deposits^APM.

Relevance: We use this APM as an indicator of the profitability of our retail banking business.

	For the year ended December 31, 2021	2020	2019
(+) Average interest rate on average loans and advances to customers^APM	1.19%	1.36%	1.45%

	For the year ended December 31,		
	2021	2020	2019
(-) Average interest rate on average retail deposits^APM	(0.02)%	(0.01)%	0.02%
Customer spread^APM	**1.21%**	**1.37%**	**1.43%**

17. **Net interest margin^APM**:

Definition: Difference between the average interest rate on average total assets^APM and the average interest rate on total liabilities and equity^APM.

Relevance: We use this APM as an indicator of our profit margin.

	For the year ended December 31,		
	2021	2020	2019
(+) Average interest rate on average total assets^APM	0.95%	1.14%	1.26%
(-) Average interest rate on average total liabilities and equity^APM	0.10%	0.18%	0.22%
Net interest margin^APM	**0.85%**	**0.96%**	**1.04%**

18. **Total new lending^APM:**

Definition: Principal amount of new loans during each period (the years ended December 31, 2021, 2020 and 2019, as applicable).

Relevance: We use this APM to monitor the composition of new credit origination.

	For the years ended December 31,

Notes:—

Source: This breakdown has been obtained by classifying our total new lending[APM] by the location of the branch in which the loan was granted.

19. **Net interest income over gross income[APM]**:

Definition: Net interest income divided by gross income.

Relevance: We use this APM to measure the contribution of net interest income to our gross income.

		For the year ended December 31,		
		2021	2020	2019
		(*€ thousands, except %*)		
Numerator	Net interest income [(1)]................	492,826	533,673	547,246
Denominator	Gross income[(1)]..........................	952,260	1,001,822	926,579
=	**Net interest income over gross income[APM]**	**51.75%**	**53.27%**	**59.06%**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

20. **Net fee income and exchange differences over average total assets[APM]**:

Definition: Net fee income and exchange differences[APM] (as defined and calculated above) divided by average total assets.

Relevance: We use this APM to measure the contribution of fee and commission income to our profitability.

		For the year ended December 31,		
		2021	2020	2019
		(*€ thousands, except %*)		
Numerator	Net fee income and exchange differences[APM]	438,543	374,987	394,843
Denominator	Average total assets[(1)]................	57,864,629	55,479,103	52,779,955
=	**Net fee income and exchange differences over average total assets[APM]**..................................	**0.76%**	**0.68%**	**0.75%**

Notes:—

(1) Calculated as the arithmetic average of the average monthly balances.

21. **Net fee income and exchange differences over recurring revenues^{APM}**:

Definition: Net fee income and exchange differences^{APM} divided by recurring revenues^{APM} (each as defined and calculated above).

Relevance: We use this APM to measure the contribution of our net fee income to our recurring revenues^{APM}.

		For the year ended December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Net fee income and exchange differences^{APM}..	438,543	374,987	394,843
Denominator	Recurring revenues^{APM}	931,369	908,660	942,089
=	**Net fee income and exchange differences over recurring revenues^{APM}**	**47.09%**	**41.27%**	**41.91%**

22. **Non-banking commissions over recurring revenues^{APM}:**

Definition: Non-banking commissions divided by recurring revenues^{APM} (each as defined and calculated above).

Relevance: We use this APM to measure the contribution of our non-banking commissions to our recurring revenues^{APM}.

		For the year ended December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Non-banking commissions(1)	288,925	230,218	242,992
Denominator	Recurring revenues^{APM}	931,369	908,660	942,089
=	**Non-banking commissions over recurring revenues^{APM}** ...	**31.02%**	**25.34%**	**25.79%**

Note:—

(1) See definition of "Net fee income and exchange differences^{APM}" above for an explanation of the calculation of "non-banking commissions".

23. **Cost-to-income ratio^{APM}**:

Definition: Recurring operating expenses^{APM} (as defined and calculated above) divided by gross income.

Relevance: We use this APM to measure our operational efficiency.

		For the year ended December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Recurring operating expenses^{APM}..............................	598,380	567,465	600,087
Denominator	Gross income(1).........................	952,260	1,001,822	926,579
=	**Cost-to-income ratio^{APM}**..........	**62.84%**	**56.64%**	**64.76%**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

A47716269

24. **Recurring cost-to-income ratio**[APM]:

Definition: Recurring operating expenses[APM] divided by recurring revenues[APM] (each as defined and calculated above).

Relevance: We use this APM to measure the efficiency of our recurring activity.

		For the year ended December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Recurring operating expenses[APM]..............................	598,380	567,465	600,087
Denominator	Recurring revenues[APM].............	931,369	908,660	942,089
=	**Recurring cost-to-income ratio[APM]**....................................	**64.25%**	**62.45%**	**63.70%**

25. **Return on assets ("ROA[APM]")**:

Definition: Profit attributable to the owners of the parent as a percentage of average total assets.

Relevance: We use this APM to measure the return obtained from our assets.

		For the year ended December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Profit attributable to the owners of the parent[(1)]...........................	150,985	23,602	83,989
Denominator	Average total assets[(2)]...............	57,864,629	55,479,103	52,779,955
=	**ROA[APM]**...................................	**0.26%**	**0.04%**	**0.16%**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

(2) Calculated as the arithmetic average of the average monthly balances. The average monthly balance is the average of end balances weighted at 50% (i.e. the balance at the end of the reference month multiplied by 0.5 plus the balance at the end of the immediately prior month to the reference month multiplied by 0.5).

26. **Return on tangible equity ("ROTE[APM]")**:

Definition: Profit attributable to the owners of the parent as a percentage of average tangible shareholders' equity. See tangible shareholders' equity[APM] to see the calculation of this item.

Relevance: We use this APM to measure the return obtained on our tangible shareholders' equity.

		For the year ended December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Profit attributable to the owners of the parent[(1)]...........................	150,985	23,602	83,989
Denominator	Average tangible shareholders' equity[(2)].....................................	2,651,490[(3)]	2,622,633[(4)]	2,584,102[(5)]
=	**ROTE[APM]**	**5.69%**	**0.90%**	**3.25%**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

(2) See Tangible shareholders' equity[APM]. The average is calculated as the arithmetic mean of (i) the end-of-quarter tangible equity figure for the first quarter of the corresponding period, (ii) the end-of-quarter tangible equity figure for the second quarter of the corresponding period, (iii) the end-of-quarter tangible equity figure for the third quarter of the corresponding period and (iv) the arithmetic mean of the end-of quarter tangible equity figures for the fourth quarter of the corresponding and previous periods. The end-of quarter tangible equity figures for the fourth quarter of the corresponding previous period corresponds to the figures as of January 1 of the corresponding period.

(3) Calculated as the arithmetic mean of (i) €2,627,212 thousand (as of March 31, 2021), (ii) €2,667,266 thousand (as of June 30, 2021), (iii) €2,707,434 thousand (as of September 30, 2021) and (iv) the arithmetic mean of €2,573,404 thousand (as of December 31, 2020) and €2,634,690 thousand (as of December 31, 2021).

(4) Calculated as the arithmetic mean of (i) €2,588,874 thousand (as of March 31, 2020), (ii) €2,650,858 thousand (as of June 30, 2020), (iii) €2,675,924 thousand (as of September 30, 2020) and (iv) the arithmetic mean of €2,576,344 thousand (as of December 31, 2019) and €2,573,404 thousand (as of December 31, 2020).

(5) Calculated as the arithmetic mean of (i) €2,590,919 thousand (as of March 31, 2019), (ii) €2,589,817 thousand (as of June 30, 2019), (iii) €2,598,606 thousand (as of September 30, 2019) and (iv) the arithmetic mean of €2,537,788 thousand (as of December 31, 2018) and €2,576,344 thousand (as of December 31, 2019).

27. **Adjusted ROTE[APM]**:

Definition: ROTE[APM] excluding extraordinary items. It represents our adjusted net profit (profit less extraordinary items in each period) as a percentage of average tangible shareholders' equity.

Relevance: We use this APM to measure the return obtained on our tangible shareholders' equity, excluding extraordinary items.

	For the year ended December 31,		
	2021	**2020**	**2019**
	(*€ thousands, except %*)		
Profit/(loss) before tax from continuing operations[1]..	214,773	53,470	128,637

Provisions for the repurchase of subordinated bonds..............................	-	-	*10,000*
COVID-19 Provisions	-	*90,124*	-
Sale of amortized cost fixed income portfolio	*(33,102)*	*(114,619)*	-

	For the year ended December 31,		
	2021	**2020**	**2019**
Adjusted profit/(loss) before tax from continuing operations	**204,136**	**165,016**	**210,637**
Effective tax rate	29.70%	26.76%(3)	34.71%
(A) Adjusted net profit	**143,508**	**120,855**	**137,525**
(B) Average tangible shareholders' equity(4)	**2,651,490**	**2,622,633**	**2,584,102**
Adjusted ROTEAPM (=A/B)	**5.41%**	**4.61%**	**5.32%**

Notes:—

(1) Source: Consolidated income statement in the Annual Accounts.

(2) See "*Business—Material contracts—CASER Agency Agreement*").

(3) Calculated as 2020 adjusted corporate income tax expense (adjusted for the tax effect of gross extraordinary impacts (assumed at 30%) and DTAs write-off amounting to €19,210 thousand) divided by 2020 adjusted profit/(loss) before tax from continuing operations.

(4) See ROTE APM.

28. Tangible shareholder's equity APM:

Definition: Shareholders' equity less €350,000 thousand AT1 issue accounted for as shareholders' equity in the line "Equity instruments issued other than capital" less intangible assets.

Relevance: We use this APM to calculate the denominator of ROTE APM.

	As of December 31,		
	2021	**2020**	**2019**
(+) Shareholder's equity(1)	3,253,857	3,160,630	3,139,017
(-) Equity instruments issued other than capital(1)	350,000	350,000	350,000
(-) Intangible assets(1)	269,167	237,226	212,673
Tangible shareholders' equityAPM	**2,634,690**	**2,573,404**	**2,576,344**

Notes:—

APMs related to asset quality

31. **NPAs[APM]**:

Definition: Sum of NPLs and gross value of foreclosed assets.

Relevance: We use this APM to evaluate the size of our problematic asset portfolio (NPLs and foreclosed assets) in gross terms.

	As of December 31,		
	2021	2020	2019
	(€ thousands, except %)		
(+) NPLs(1)	717,621	1,012,938	1,293,161
(+) Gross value of foreclosed assets(2)..................	542,241	619,527	624,890
NPAs[APM]	**1,259,862**	**1,632,465**	**1,918,051**

Notes:—

(1) Source: Note 3.5.4 to the Annual Accounts.

(2) Source: Note 3.5.6.2 to the Annual Accounts.

32. **NPL ratio[APM]**:

Definition: NPLs divided by gross loans and advances to customers[APM] (as defined and calculated below).

Relevance: We use this APM to monitor our credit risk quality.

		As of December 31,		
		2021	2020	2019
		(€ thousands, except %)		
Numerator	NPLs(1)	717,621	1,012,938	1,293,161
Denominator	Gross loans and advances to customers[APM]..	31,195,451	31,589,582	32,563,215

		As of December 31,		
		2021	2020	2019
=	**NPL ratio^{APM}**	**2.30%**	**3.21%**	**3.97%**

Notes:—

(1) Source: Note 3.5.4 to the Annual Accounts.

33. **NPLs by sector^{APM}:**

Definition: This APM shows the breakdown of NPLs associated to each sector comprising our loan portfolio.

Relevance: We use this APM to measure the distribution by sector of our credit risk quality.

	As of December 31,		
	2021	2020	2019
	NPLs	NPLs	NPLs
	(*€ thousands, except %*)		
Loans to businesses..................	**344,814**	**455,239**	**554,278**
Real estate development	71,262	92,613	146,036
Non-real estate activities	273,552	362,626	408,242

Public sector and other	**332**	**1,423**	**2,931**
Total(1).......................................	**717,621**	**1,012,938**	**1,293,161**

Notes:—

Source: This breakdown has been obtained by classifying our NPLs following the Bank of Spain PC9 template for breakdown of loans to customers by activity (*Distribución de los Préstamos a la Clientela por Actividad Consolidado Público*). The definition of loans to customers in this template includes all transactions of this nature regardless of the item in which they are included in the balance sheet. Loans by sector are classified according to their purpose and not according to the debtor's NACE. Loans to businesses include financing to non-financial corporations and individual entrepreneurs (the activity of individual entrepreneurs is considered to be that carried out by individuals in the exercise of their business activities). Loans to individuals are classified based on their purpose according to the criteria defined in rule 69.2e) of Bank of Spain Circular 4/2017, of November 27, to credit institutions, on public and reserved financial reporting standards and financial statement models. Loans to public sector and other includes loans to public sector and financing to financial companies (mainly reverse repurchase agreements).

(1) Source: Note 3.5.4 to the Annual Accounts.

34. **NPL ratio by sector^{APM}:**

Definition: NPLs by sector ^{APM} (as defined and calculated above) divided by gross loans and advances to customers^{APM} by sector (as defined and calculated below).

Relevance: We use this APM to measure the distribution by sector of our credit risk quality.

	As of December 31,

(ii) Source: Note 42 to the Annual Accounts.

(3) Average balance calculated as the arithmetic mean of the figure as of the end of each quarter since the previous December 31 (inclusive), weighting the first and last quarter per 0.5 and the rest per 1.

(4) Calculated as the arithmetic mean of (i) €32,480,792 thousand (as of March 31, 2021), (ii) €32,151,403 thousand (as of June 30, 2021), (iii) €31,738,943 thousand (as of September 30, 2021) and (iv) the arithmetic mean of €32,209,109 thousand (as of December 31, 2020) and €31,737,692 thousand (as of December 31, 2021).

(5) Calculated as the arithmetic mean of (i) €32,999,122 thousand (as of March 31, 2020), (ii) €33,179,306 thousand (as of June 30, 2020), (iii) €32,661,333 thousand (as of September 30, 2020) and (iv) the arithmetic mean of €33,188,105 thousand (as of December 31, 2019) and €32,209,109 thousand (as of December 31, 2020).

(6) Calculated as the arithmetic mean of (i) €33,761,111 thousand (as of March 31, 2019), (ii) €33,623,354 thousand (as of June 30, 2019), (iii) €33,482,835 thousand (as of September 30, 2019) and (iv) the arithmetic mean of €34,490,731 thousand (as of December 31, 2018) and €33,188,105 thousand (as of December 31, 2019).

37. Allowance for credit losses over average of gross loans and advances to customers[APM]

Definition: provisions and impairments associated with credit risk divided by the average of gross loans and advances to customers[APM].

Relevance: We use this APM to monitor the Group's credit quality through the cost, in terms of credit risk provisions, of each gross loans and advances to customers.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Provisions and impairments associated with credit risk(1)	77,146	215,218	114,906
Denominator	Average of gross loans and advances to customers[APM(2)]	31,502,603	32,257,756	32,960,602
	Allowance for credit losses over average of gross loans and advances to customers[APM]	**0.24%**	**0.67%**	**0.35%**

Notes:—

(1) See calculation in Cost of Risk[APM] above.

(2) Average balance calculated as the arithmetic mean of the figure as of the end of each quarter since the previous December 31 (inclusive), weighting the first and last quarter per 0.5 and the rest per 1.

38. Loan portfolio by Stages[APM]

Definition: breakdown of outstanding balance and coverage of the loan portfolio and customers by type of credit risk. A transaction is considered to be at Stage 1 (performing) when no significant increase in risk has occurred since its initial recognition. A transaction is considered to be at Stage 2 (performing on special watch) when the risk has significantly increased from the date on which the transaction was initially recognised, but without yet leading to impairment. A transaction is considered to be at Stage 3 (NPL) when it shows effective signs of impairment as a result of one or more events that have already occurred and is expected to result in a loss.

Relevance: We use this APM to monitor our credit risk quality.

	As of December 31,		
	2021	**2020**	**2019**
	(€ thousands)		
Stage 1	*28,917,988*	*28,898,790*	*29,866,845*
Stage 2	*1,559,842*	*1,677,854*	*1,403,209*
Stage 3	*717,621*	*1,012,938*	*1,293,161*

	As of December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Gross loans and advances to customers^APM ..	**31,195,451**	**31,589,582**	**32,563,215**

Stage 2	*1,448,562*	*1,545,524*	*1,338,009*
Stage 3	*334,483*	*550,081*	*773,757*
Net loans and advances to customers^APM	**30,655,026**	**30,942,404**	**31,918,945**

Notes:—

Source: This breakdown has been obtained by classifying our loan portfolio in accordance with the following categories: (i) Stage 1: a transaction is considered to be at Stage 1 (performing) when no significant increase in risk has occurred since its initial recognition. Where applicable, the allowance for losses (or provision) will reflect the expected credit losses resulting from possible defaults during the 12 months following the reporting date, (ii) Stage 2: a transaction is considered to be at Stage 2 (performing on special watch) when the risk has significantly increased from the date on which the transaction was initially recognized, but without yet leading to impairment. In this case, the amount related to the valuation adjustment for losses will reflect the expected losses due to defaults over the residual life of the financial instrument, and (iii) Stage 3: a transaction is considered to be at Stage 3 (NPL) when it shows effective signs of impairment as a result of one or more events that have already occurred and is expected to result in a loss. In this case, the amount related to the allowance for losses shall reflect the expected credit risk losses over the expected residual life of the financial instrument.

The distribution of gross loans and advances to customers^APM by Stage is as follows:

	As of December 31,		
	2021	**2020**	**2019**
		(%)	
Stage 1	*92.70%*	*91.48%*	*91.72%*
Stage 2	*5.00%*	*5.31%*	*4.31%*
Stage 3	*2.30%*	*3.21%*	*3.97%*
Gross loans and advances to customers^APM ..	**100.00%**	**100.00%**	**100.00%**

The NPL coverage ratio^APM by Stage is as follows:

	As of December 31,		
	2021	**2020**	**2019**
		(%)	
Stage 1	*0.16%*	*0.18%*	*0.20%*
Stage 2	*7.13%*	*7.89%*	*4.65%*
Stage 3	*53.39%*	*45.69%*	*40.17%*

Notes:—

Source: This breakdown has been obtained by classifying the NPL coverage ratio[APM] by the following categories: (i) Stage 1: a transaction is considered to be at Stage 1 (performing) when no significant increase in risk has occurred since its initial recognition. Where applicable, the allowance for losses (or provision) will reflect the expected credit losses resulting from possible defaults during the 12 months following the reporting date, (ii) Stage 2: a transaction is considered to be at Stage 2 (performing on special watch) when the risk has significantly increased from the date on which the transaction was initially recognised, but without yet leading to impairment. In this case, the amount related to the valuation adjustment for losses will reflect the expected losses due to defaults over the residual life of the financial instrument, and (iii) Stage 3: a transaction is considered to be at Stage 3 (NPL) when it shows effective signs of impairment as a result of one or more events that have already occurred and is expected to result in a loss. In this case, the amount related to the allowance for losses shall reflect the expected credit risk losses over the expected residual life of the financial instrument.

39. **NPL provisions[APM]:**

Definition: Sum of impairment losses on loans and advances to customers and negative accumulated changes in the fair value due to credit risk for doubtful exposures. It includes allowances for impairment losses on stages 1, 2 and 3.

Relevance: We use this APM as an indicator of the part of NPLs that is covered with loan-loss provisions.

	As of December 31,		
	2021	**2020**	**2019**
		(*€ thousands*)	
(+) Impairment losses on loans and advances(1)	539,147	644,937	642,039
(+) Accumulated negative changes in fair value due to credit risk from doubtful exposures(2)	1,278	2,241	2,231
NPL provisions[APM]	**540,425**	**647,178**	**644,270**

Notes:—

(1) Source: Note 11.4 to the Annual Accounts.

(2) Source: Note 8 to the Annual Accounts.

40. **NPL provisions by sector[APM]:**

Definition: This APM shows the breakdown of NPL provisions associated to each sector comprising our loan portfolio.

Relevance: We use this APM as an indicator of the part of NPLs that is covered with loan-loss provisions by sector.

	As of December 31,		
	2021	**2020**	**2019**
		(*€ thousands*)	
Loans to businesses	**323,976**	**370,016**	**392,566**
Real estate construction and development	51,115	54,754	74,951
Non-real estate activities	272,861	315,262	317,615
Loans to individuals	**216,149**	**276,009**	**249,345**
Housing	149,211	201,459	179,908
Consumer loans and other	66,938	74,550	69,437
Public sector and other	**300**	**1,153**	**2,359**
Total	**540,425**	**647,178**	**644,270**

Notes:—

Source: This breakdown has been obtained by classifying our NPL provisions[APM] following the Bank of Spain PC9 template for breakdown of loans to customers by activity (*Distribución de los Préstamos a la Clientela por Actividad Consolidado Público*). The definition of loans to customers in this template includes all transactions of this nature regardless of the item in which they are included in the balance sheet. Loans by sector are classified according to their purpose and not according to the debtor's NACE. Loans to businesses include financing to non-financial corporations and individual entrepreneurs (the activity of individual entrepreneurs is considered to be that carried out by individuals in the exercise of their business activities). Loans to individuals are classified based on their purpose according to the criteria defined in rule 69.2e) of Bank of Spain circular 4/2017, of November 27, to credit institutions, on public and reserved financial reporting standards and financial statement models. Loans to public sector and other includes loans to public sector and financing to financial companies (mainly reverse repurchase agreements).

41. **NPL coverage ratio[APM]:**

Definition: NPL provisions[APM] (as defined and calculated above) divided by our NPLs.

Relevance: We use this APM to monitor the quality of our credit risk because it reflects the degree to which NPLs have been covered with loan-loss provisions.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	NPL provisions[APM]	540,425	647,178	644,270
Denominator	NPLs[(1)]	717,621	1,012,938	1,293,161
=	**NPL coverage ratio[APM]....**	**75.31%**	**63.89%**	**49.82%**

Notes:—

(1) Source: Note 3.5.4 to the Annual Accounts.

42. **NPL coverage ratio by sector[APM]:**

Definition: NPL provisions by sector[APM] (as defined and calculated above) divided by our NPLs by sector [APM] (as defined and calculated above).

Relevance: We use this APM to monitor the quality of our credit risk by sector because it reflects the degree to which NPLs have been covered with loan-loss provisions.

	As of December 31,		
	2021	**2020**	**2019**
	(€ thousands, except %)		
Loans to businesses	**93.96%**	**81.28%**	**70.82%**

Total	**75.31%**	**63.89%**	**49.82%**

Notes:—

Source: See NPL provisions by sector[APM] and NPLs by sector[APM].

43. **Net NPLs by sector^{APM}**:

Definition: NPLs by sector^{APM} less NPLs provisions by sector^{APM}.

Relevance: We use this APM to monitor the quality of our credit risk by sector because it reflects the degree to which NPLs have been covered with loan-loss provisions.

	As of December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Loans to businesses	**20,838**	**85,223**	**161,712**
Real estate construction and development	20,147	37,859	71,085
Non-real estate activities	691	47,364	90,627
Loans to individuals	**156,326**	**280,267**	**486,607**
Housing	136,150	236,454	442,046
Consumer loans and other	20,176	43,813	44,561
Public sector and other	**32**	**270**	**572**
Total	**177,196**	**365,760**	**648,891**

Notes:—

Source: This breakdown has been obtained by classifying our Net NPLs by sector^{APM} following the Bank of Spain PC9 template for breakdown of loans to customers by activity (*Distribución de los Préstamos a la Clientela por Actividad Consolidado Público*). The definition of loans to customers in this template includes all transactions of this nature regardless of the item in which they are included in the balance sheet. Loans by sector are classified according to their purpose and not according to the debtor's NACE. Loans to businesses include financing to non-financial corporations and individual enterpreneurs (the activity of individual enterpreneurs is considered to be that carried out by individuals in the exercise of their business activities). Loans to individuals are classified based on their purpose according to the criteria defined in rule 69.2e) of Bank of Spain Circular 4/2017, of November 27, to credit institutions, on public and reserved financial reporting standards and financial statement models. Loans to public sector and other includes loans to public sector and financing to financial companies (mainly reverse repurchase agreements.

44. **Foreclosed assets coverage ratio^{APM}**:

Definition: Total allowances (including credit origination) for impairment losses on foreclosed assets divided by the gross value of foreclosed assets.

Relevance: We use this APM to measure the coverage ratio of foreclosed assets and as an indicator of asset quality.

		As of December 31,		
		2021	**2020**	**2019**
			(€ thousands, except %)	
Numerator	Total allowances for impairment losses on foreclosed assets (“**Foreclosed assets provisions**”)..	326,197	367,413	346,033
Denominator	Gross value of foreclosed assets..........................	542,241	619,527	624,890
=	**Foreclosed assets coverage ratio^{APM}**.................	**60.16%**	**59.31%**	**55.38%**

Notes:—

Source: Note 3.5.6.2 to the Annual Accounts.

45. **Foreclosed land coverage ratio^{APM}**:

Definition: Total allowances for impairment losses on foreclosed land divided by the gross value of foreclosed land.

Relevance: We use this APM to measure the coverage ratio of foreclosed land and as an indicator of the quality of our land assets, which we consider as assets that are generally more difficult to sell.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Total allowances for impairment losses on foreclosed land	226,627	266,206	275,233

=	**Foreclosed land coverage ratio^{APM}**	**68.43%**	**65.76%**	**59.83%**

Notes:—
Source: Note 3.5.6.2 to the Annual Accounts.

46. **NPA provisions^{APM}**:

Definition: Sum of NPL provisions^{APM} and foreclosed assets provisions.

Relevance: We use this APM as an indicator of the part of NPLs and foreclosed assets that is covered with provisions.

	As of December 31,		
	2021	**2020**	**2019**
	(€ thousands)		
(+) NPL provisions^{APM}	540,425	647,178	644,270
(+) Foreclosed assets provisions[(1)]	326,197	367,413	346,033
NPA provisions^{APM}	**866,622**	**1,014,591**	**990,303**

Notes:—
(1) Source: Note 3.5.6.2 to the Annual Accounts.

47. **NPA coverage ratio^{APM}**:

Definition: NPA provisions^{APM} divided by NPAs^{APM} (each as defined and calculated above).

Relevance: We use this APM as an indication of our asset quality in relation to coverage of problematic assets.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	NPA provisions^{APM}	866,622	1,014,591	990,303
Denominator	NPAs^{APM}	1,259,862	1,632,465	1,918,051
=	**NPA coverage ratio^{APM}**	**68.79%**	**62.15%**	**51.63%**

48. **Net NPAs^{APM}**:

Definition: NPAs^{APM} net of NPA provisions^{APM} (each as defined and calculated above).

Relevance: We use this APM as an indicator of the net value (after deducting provisions) of our problematic assets.

	As of December 31,		
	2021	2020	2019
	(€ thousands)		
(+) NPAs[APM]	1,259,862	1,632,465	1,918,051
(-) NPA provisions[APM]	866,622	1,014,591	990,303
Net NPAs[APM]	**393,240**	**617,874**	**927,748**

49. **Net NPAs over total assets[APM]**:

Definition: Net NPAs[APM] (as defined and calculated above) divided by total assets.

Relevance: We use this APM to measure the weight of problematic assets after deducting the provisions allocated to non-productive assets on our balance sheet.

		As of December 31,		
		2021	2020	2019
		(€ thousands, except %)		
Numerator	Net NPAs[APM]	393,240	617,874	927,748
Denominator	Total assets[(1)]	58,631,409	58,400,790	55,422,015
=	**Net NPAs over total assets[APM]**	**0.67%**	**1.06%**	**1.67%**

Notes:—

(1) Source: Consolidated balance sheet in the Annual Accounts.

50. **Housing NPLs over NPLs[APM]**:

Definition: Housing NPLs divided by total NPLs.

Relevance: We use this APM to measure the weight of doubtful housing, with a lower expected loss on the asset balance, over total NPLs.

		As of December 31,		
		2021	2020	2019
		(€ thousands, except %)		
Numerator	Housing NPLs[(1)]	285,361	437,913	621,954

=	**Housing NPLs over NPLs[APM]**	**39.76%**	**43.23%**	**48.10%**

Notes:—

(1) Source: See NPLs by sector[APM].

(2) Source: Note 3.5.4 to the Annual Accounts.

51. **LTV ratio[APM]**:

Definition: Amount of the mortgage loan portfolio divided by the value of the latest available appraisal of the mortgage collateral.

Relevance: We use this APM as an indicator of the quality of our mortgage loan portfolio.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Mortgage loan portfolio[1]	20,714,558	21,568,967	22,521,864
Denominator	Appraised value	41,296,966	42,176,314	43,461,721
=	**LTV ratio^{APM}**	**50.16%**	**51.14%**	**51.82%**

Notes:—

Source: Calculated by dividing the book value of each transaction as of its reference date by the amount resulting from the latest available appraisal or valuation of its collateral.

(1) Source: Note 3.5.5.1 to the Annual Accounts.

52. **NPLs evolution^{APM}**:

Definition: Variation of NPLs during a period, showing the entries and the exits depending on the reason for the exit.

Relevance: We use this APM to monitor our NPLs.

	For the years ended December 31,		
	2021	**2020**	**2019**
	(€ thousands)		
(a) (+) NPLs at the beginning of the period...........	1,012,938	1,293,161	2,274,558
(+) Gross NPLs entries...	200,830	271,592	346,982
			1,328,379
(-) Exits..	496,147	551,815	
Recoveries...	*224,106*	*288,639*	*429,325*
Write offs...	*143,804*	*181,823*	*250,602*
Foreclosures..	*73,586*	*78,203*	*79,284*
Wholesale transactions and other	*54,651*	*3,150*	*569,168*
(b) NPLs at the end of the period...........................	717,621	1,012,938	1,293,161
NPLs evolution^{APM} ((b) – (a))	**(295,317)**	**(280,223)**	**(981,397)**

Notes:—

Source: NPLs evolution^{APM} in any given period is calculated as the difference between gross NPL inflows and outflows, distinguishing between those arising from recoveries, write-offs, foreclosures and wholesale transactions and other.

53. **Cash recoveries of NPLs over NPLs at the beginning of the period^{APM}:**

Definition: cash recoveries of NPLs divided by NPLs at the beginning of the period.

Relevance: We use this APM to monitor the degree of recovery (return to performing loans) of NPLs.

		As of December 31,		
		2021	**2020**	**2019**
		(*€ thousands, except %*)		
Numerator	Cash recoveries of NPLs(1)	224,106	288,639	429,325

=	**Guaranteed Credit Lines drawn over loans to businesses**APM	**19.95%**	**18.28%**	**---**

Notes:—

(1) Source: Note 11.6.1 to the Annual Accounts.

(2) See definition of "Gross loans and advances to customers[APM].

56. Loans to sectors most affected by the COVID-19 pandemic over gross loans and advances to customers[APM]:

Definition: Loans to sectors most affected by the COVID-19 pandemic divided by gross loans and advances to customers[APM]. The sectors more affected by the COVID-19 pandemic are: transport and storage, hospitality (which refers to accommodation and food service activities), and leisure (which refers to arts, entertainment and recreation).

Relevance: We use this APM to monitor the credit risk portfolio of the loans to sectors most affected by the COVID-19 pandemic.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Loans to sectors most affected by the COVID-19 pandemic (1)	631,293	633,487	474,919
	Of which: Guaranteed Credit Lines drawn .	*197,024*	*182,917*	-
Denominator	Gross loans and advances to customers APM	31,195,451	31,589,582	32,563,315
=	**Loans to sectors most affected over gross loans and advances to customers[APM]........**	**2.02%**	**2.01%**	**1.46%**

Notes:—

(1) Source: This breakdown has been obtained by classifying our loans by template F.06.01 distribution of NFC loans and advances by NACE code of the Bank of Spain (excluding financing to individual entrepreneurs). The headings that are taken into account are: H (transport and storage), I (accommodation and food service activities) and R (arts, entertainment and recreation).

57. Loans with outstanding moratoria over gross loans and advances to customers[APM]:

Definition: Loans affected by any Legal Moratoria or Sectorial Moratoria measures divided by gross loans and advances to customers.

Relevance: We use this APM to monitor the exposure of credit risk portfolio affected by the Legal Moratoria and Sectorial Moratoria.

		As of December 31,		
		2021	**2020**	**2019**
		(€ thousands, except %)		
Numerator	Loans affected by Legal Moratoria or Sectorial Moratoria measures(1)......................	25,533	366,129	-
Denominator	Gross loans and advances to customers APM ...	31,195,451	31,589,582	32,563,315
=	**Loans with outstanding moratoria over gross loans and advances to customers[APM] .**	**0.08%**	**1.16%**	**-**

Notes:—

(1) Source: Note 11.6.1 to the Annual Accounts.

The table below shows a breakdown of the loans affected by Legal Moratoria or Sectorial Moratoria measures which have matured by stages:

	As of December 31,				
	2021		2020		2019
	(€ *thousands, except %*)				
Principal amount expired of loans and advances subject to Legal Moratoria and Sectorial Moratoria(1)	**715,150**	**100.00%**	**375,292**	**100.00%**	-
Stage 1	*501,908*	*70.18%*	*280,113*	*74.64%*	-
Stage 2	*189,780*	*26.54%*	*79,159*	*21.09%*	-
Stage 3	*23,462*	*3.28%*	*16,020*	*4.27%*	-

Notes:—

Source: This breakdown has been obtained by classifying the amount of loans and advances subject to Legal Moratoria and Sectorial Moratoria by the following categories: (i) Stage 1: a transaction is considered to be at Stage 1 (performing) when no significant increase in risk has occurred since its initial recognition. Where applicable, the allowance for losses (or provision) will reflect the expected credit losses resulting from possible defaults during the 12 months following the reporting date, (ii) Stage 2: a transaction is considered to be at Stage 2 (performing on special watch) when the risk has significantly increased from the date on which the transaction was initially recognised, but without yet leading to impairment. In this case, the amount related to the valuation adjustment for losses will reflect the expected losses due to defaults over the residual life of the financial instrument, and (iii) Stage 3: a transaction is considered to be at Stage 3 (NPL) when it shows effective signs of impairment as a result of one or more events that have already occurred and is expected to result in a loss. In this case, the amount related to the allowance for losses shall reflect the expected credit risk losses over the expected residual life of the financial instrument.

62. **Gross loans and advances to customers exluding reverse repurchase agreements[APM], gross loans and advances to customers[APM] and net loans and advances to customers[APM]**:

Definition: Sum of all the loans and advances to our customers, in accordance with rule 52.1.b of Bank of Spain Circular 4/2017. Reverse repurchase agreements refer to the amount of receivables in exchange for securities temporarily transferred through a non-optional reverse repurchase agreement or as cash collateral for securities borrowed. This item is commonly accepted in the banking industry as a "one-off activity on loans and advances to customers", since these are one-off transactions carried out from the capital markets and not linked to the activity of our customer base, for which reason we exclude it for the purpose of calculating portfolio variations and geographic distribution.

Relevance: We use this APM to measure the total amount of financing granted to our customers as this is the most relevant item in our balance sheet in terms of weight and income derived from it.

	As of December 31,		
	2021	2020	2019
	(€ thousands)		
(+) Non-trading financial assets mandatorily measured at fair value with changes through profit and loss – loans and advances to customers(1)	1,496	1,542	12,197

Notes:—

Source: This breakdown has been obtained by classifying our gross loans and advances to customers[APM] following the Bank of Spain PC9 template for breakdown of loans to customers by activity (*Distribución de los Préstamos a la Clientela por Actividad Consolidado Público*). The definition of loans to customers in this template includes all transactions of this nature regardless of the item in which they are included in the balance sheet. loans by sector are classified according to their purpose and not according to the debtor's NACE. Loans to businesses include financing to non-financial corporations and individual entrepreneurs (the activity of individual entrepreneurs is considered to be that carried out by individuals in the exercise of their business activities). Loans to individuals are classified based on their purpose according to the criteria defined in rule 69.2e) of Bank of Spain Circular 4/2017, of November 27, to credit institutions, on public and reserved financial reporting standards and financial statement models. Loans to public sector and other includes loans to public sector and financing to financial companies (mainly reverse repurchase agreements).

The following table shows the breakdown of Gross loans and advances to customers excluding reverse repurchase agreements[APM] by sector:

Notes:—

Source: This breakdown has been obtained by classifying our perfoming loans excluding reverse repurchase agreements[APM] following the Bank of Spain PC9 template for breakdown of loans to customers by activity (*Distribución de los Préstamos a la Clientela por Actividad Consolidado Público*). The definition of loans to customers in this templante includes all transactions of this nature regardless of the item in which they are included in the balance sheet. loans by sector are classified according to their purpose and not according to the debtor's NACE. Loans to businesses include financing to non-financial corporations and individual entrepreneurs (the activity of individual entrepreneurs is considered to be that carried out by individuals in the exercise of their business activities). Loans to individuals are classified based on their purpose according to the criteria defined in rule 69.2e) of Bank of Spain Circular 4/2017, of November 27, to credit institutions, on public and reserved financial reporting standards and financial statement models. Loans to public sector and other includes loans to public sector and financing to financial companies (mainly reverse repurchase agreements).

	As of December 31,		
	2021	2020	2019
		(%)	
Small-sized (annual turnover of between €2 and €10 million)	21.0	21.5	22.3
Micro (annual turnover of less than €2 million)	19.5	22.2	26.3
Self-employed and others	15.7	16.8	17.5
	100	**100**	**100**

Notes:—

Source: This breakdown has been obtained by classifying our loans to non-real estate activities[APM] by the turnover of the relevant customer to whom the loan was granted based on EU recommendation of May 6, 2003 (2003/361/EC) in connection with the definition of micro, small and medium-sized enterprises (SME). SMEs consists of enterprises that employ fewer than 250 persons and whose annual turnover does not exceed €50 million or whose annual balance sheet total does not exceed €43 million. A small enterprise is defined as an enterprise which employs less than 50 persons and whose annual turnover or annual balance sheet total does not exceed €10 million. A micro enterprise is defined as an enterprise which employs less than 10 persons and whose annual turnover or annual balance sheet total does not exceed €2 million.

APMs related to liquidity

71. **Loan-to-Deposit (LTD) ratio**:

Definition: Net loans and advances to customers[APM] (as defined and calculated above) excluding reverse repurchase agreements divided by retail deposits[APM] (as defined and calculated above).

Relevance: We use this APM to assess the extent to which the loans and advances we grant to our customers are financed with retail deposits[APM].

		As of December 31,		
		2021	2020	2019
			(*€ thousands, except %*)	
Numerator	(a) Net loans and advances to customers[APM]	30,655,026	30,942,404	31,918,945
	(b) Reverse repurchase agreements[(1)]	1,615,394	1,620,857	1,615,753
	Net loans and advances to customers[APM] excluding reverse repurchase agreements ((a) – (b))	29,039,632	29,321,547	30,303,192
Denominator	Retail deposits[APM]	37,131,170	36,165,311	32,772,452
=	**LTD ratio[APM]**	**78.21%**	**81.08%**	**92.47%**

BUSINESS

1. Overview

We are a Spanish 100% retail-focused bank based in Zaragoza. We are a "one-stop-shop" for our customers' financial needs, offering a wide range of banking and financial products and services, with a special focus on first home mortgages, asset management and life savings insurance products, SME lending and risk insurance products.

We were created in 2011 as a result of the segregation and contribution to Ibercaja Banco of the financial activity of the former savings bank Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja (the "**Ibercaja Savings Bank**", now transformed into the Ibercaja Foundation pursuant to the Banking Foundations Act, as set out below). In 2013, we absorbed Banco Caja3, an entity formed by the segregation and subsequent merger of the financial activity of three former savings banks which have since then become foundations: Fundación Inmaculada de Aragón, Fundación Caja Badajoz and Fundación Círculo de Burgos, and are, as of the date of this Registration Document, our shareholders, together with the Ibercaja Foundation.

Our main activity is retail banking focused on individuals, families and SMEs. Our retail focus is reflected in our simple balance sheet structure and low risk profile, with net loans and advances to customers over total assets^{APM} accounting for 52.28% and retail deposits^{APM} accounting for 79.76% of our external funding^{APM} as of December 31, 2021. As of December 31, 2021, we had €58.6 billion of total assets and stood as the ninth largest Spanish bank in terms of assets, with a market share of 2.4% in loans to individuals and non-financial entities (*source: Bank of Spain public report on loans to households and non-financial entities as of December 31, 2021*) and had €55.4 billion of total liabilities with a market share of 2.7% in customer deposits (*source: Bank of Spain public report on deposits to households and non-financial entities as of December 31, 2021*). As of December 31, 2021, we had a national market share of 3.6% in terms of home retail mortgage loans (*source: Bank of Spain public report on home retail mortgages as of December 31, 2021*). We also were the fourth largest domestic financial entity in asset management and life savings insurance with €32.8 billion in assets under management ("**AuM**") and technical provisions and a total market share of 5.1% as of December 31, 2021 (*source: calculated by the Company as the sum of mutual funds, pension funds and life savings insurance products using data from Inverco public reports on mutual and pension funds and ICEA public reports on life savings insurance products as of December 31, 2021; includes AuM managed by each bank and excludes third party products*). As of December 31, 2021 we had 4,880 employees.

We carry out our business exclusively in Spain and mainly in the autonomous regions of Aragón and La Rioja and the provinces of Guadalajara, Burgos and Badajoz (our Home Markets). We also have a well-established presence in Madrid and in the Mediterranean basin, which includes the autonomous region of Catalonia and the Valencian Community (our Growth Markets).

We use an omni-channel distribution strategy that combines our 914-branch network as of December 31, 2021, and digital channels such as our mobile banking application (the "**Ibercaja App**") and our online banking platform.

The table below sets forth information related to our key APMs and solvency ratios as of and for the years ended December 31, 2021, 2020 and 2019.

	As of and for the years ended December 31,		
	2021	2020	2019
Total assets	€58.6 billion	€58.4 billion	€55.4 billion
Gross loans and advances to customers^{APM}	€31.2 billion	€31.6 billion	€32.6 billion
Retail deposits^{APM}	€37.1 billion	€36.2 billion	€32.8 billion
Recurring cost-to-income ratio^{APM}	64.25%	62.45%	63.70%
Cost-to-income ratio^{APM}	62.84%	56.64%	64.76%
Profit before provisions^{APM}	€341.0 million	€283.3 million	€326.5 million
Profit before tax	€214.8 million	€53.5 million	€128.6 million

Total capital ratio (fully-loaded)	17.4%	17.3%	15.5%
Leverage ratio (fully-loaded)	5.8%	5.9%	5.5%
Maximum Distributable Amount	5.20%	5.49%	3.27%

2. History

Our history spans 145 years, and starts with the foundation of the Ibercaja Savings Bank in 1873 and the commencement of its operations in 1876 with the aim of stimulating the economies of the autonomous regions of Aragón and La Rioja by pursuing social welfare projects.

The main milestones of our history are described below:

- between 1933 and 1964, the Ibercaja Savings Bank carried out its first expansion plan with the opening of branches in Aragón, La Rioja and Guadalajara;
- in 1988, the Ibercaja Savings Bank created the Financial Group to offer products and services outside the scope of core banking;
- in 1989, the Ibercaja Savings Bank initiated an expansion plan with the opening of branches in Madrid and the Mediterranean basin, that has led to our current well-established presence in these Growth Markets;
- in 1991, the Ibercaja Savings Bank acquired Caja Rural de Catalunya;
- in July 2011, within the framework of the restructuring of the Spanish financial system, the general assembly of the Ibercaja Savings Bank approved the creation of Ibercaja Banco, to which all of the assets and liabilities related to its financial activity were contributed;
- in 2012, despite the turmoil in the Spanish banking sector, we passed the bottom-up stress test conducted by Oliver Wyman and were classified within the group of banks with no capital shortfall identified, complying with applicable capital requirements without any state aid;

- in July 2013, we acquired 100% of the share capital of Banco Caja3, whose restructuring plan (approved by the Bank of Spain and the European Commission) included its integration into a larger financial group. As part of its restructuring plan, Banco Caja3 received €407 million of public funds through the subscription by the FROB of contingent convertible bonds to be issued by Banco Caja3 (the "**Banco Caja3 CoCos**"). The acquisition of Banco Caja3 was structured as a capital increase of Ibercaja amounting to €325.5 million, which was subscribed by the shareholders of Banco Caja3 in exchange for Banco Caja3's entire share capital. Fundación Inmaculada de Aragón, Fundación Caja Badajoz and Fundación Círculo de Burgos received in consideration an aggregate of 11.96% of our share capital, while the Ibercaja Savings Bank held the remaining 88.04% (both as amended by the valuation adjustment on the assets transferred to SAREB). The deed of merger by absorption of Banco Caja3 by us was executed in October 2014 and Banco Caja3 ceased to exist by dissolution without liquidation and all of its assets and liabilities were transferred to us by means of universal succession;
- in September 2014, the Ibercaja Savings Bank was transformed into the Ibercaja Foundation. Since then, the Ibercaja Foundation has been our controlling shareholder retaining the aforementioned 88.04% shareholding and with a view to reduce its stake pursuant to the Banking Foundations Act;
- in 2015, the current management team was appointed;
- between March 2016 and March 2017, with the consent of the ECB, we completed the early redemption of all Banco Caja3 CoCos;
- in April, 2021, Ibercaja Banco launched its "Plan Desafío 2023" Strategic Plan; and
- in June 2021, Ibercaja Banco celebrated its 145 years of history.

3. Key strengths

We believe we benefit from the following competitive strengths:

3.1 Attractive geographical footprint

Based on the location of the branch managing our clients, we segment our activities into the following geographical markets:

- **Home Markets**: autonomous regions or provinces that were originally serviced by the Ibercaja Savings Bank, namely, Aragón, La Rioja and Guadalajara, together with, as result of the integration of Banco Caja3, Burgos and Badajoz;
- **Growth Markets**: autonomous regions or provinces where we expanded our business starting in 1989, namely, Madrid and the Mediterranean basin (Catalonia and Valencian Community);
- **Rest of Spain**: other autonomous regions or provinces where we are present.

See "—*Markets*" below for information related to our performing loans excluding reverse repurchase agreements^{APM}, customer deposits, asset management and life savings insurance products, retail business volume^{APM} and branches in each of our Home Markets and Growth Markets as of December 31, 2021 .

We believe we offer an attractive geographical mix, with a clear leadership in our Home Markets which accounted for 61.74% of our retail business volume^{APM} as of December 31, 2021 (where we had a market share of 26.7% in terms of deposits and loans as of December 31, 2021 (*source: Bank of Spain latest available data as of December 31, 2021*)), particularly in Aragón with a market share of 37.3% as of December 31, 2021 (*source: Bank of Spain, latest available data as of December 31, 2021*). In addition, our long-established presence in our Growth Markets is increasing. From December 31, 2019 until December 31, 2021, our retail business volume^{APM} in our Growth Markets increased by 8.09%, representing 29.23% of our retail business volume^{APM} as of December 31, 2021. Our Home Markets represented 70.11% of our retail customer funds^{APM}, 41.39% of our performing loans excluding reverse repurchase agreements^{APM}, 61.2% of our customers and 62.07% of our recurring revenues^{APM} as of December 31, 2021. Among our Home Markets, Aragón is the most important market representing 44.16% of our retail business volume^{APM}. Our Growh Markets represented

23.38% of our retail customer funds[APM], 43.44% of our performing loans excluding reverse repurchase agreements[APM], 29.8% of our customers and 30.54% of our recurring revenues[APM] as of December 31, 2021. Among our Growth Markets, Madrid is our most important market (second most important market overall) and represented 17.69% of our retail business volume[APM] as of December 31, 2021.

Our overall geographic position is very attractive in terms of exposure to the most economically dynamic regions of Spain. We are mainly based in the northeast of Spain, which is one of the wealthiest areas in the country. Aragón, which represented 44.16% of our retail business volume[APM] as of December 31, 2021, stood out as one of the wealthiest, more competitive and resilient regions of the Spanish economy in the year ended December 31, 2020, with a GDP per capita of €26,512 thousand (11.9% above the Spanish average) (*source: INE, GDP per capita latest available data as of December 31, 2020*). In addition, our exposure to Madrid and the Mediterranean basin provides us with a significant strength, as these regions represented 47.6% of the Spanish GDP as of December 31, 2020 (*source: INE GPD 2020 latest available data as of December 31, 2020*) and constituted the biggest banking markets, as they represented 54.7% and 49.6% of private sectors' total loans and deposits, respectively (*source: Bank of Spain, latest available data as of December 31, 2021*). For a further description of the macroeconomic indicators in our Home Markets and Growth Markets, see "—*Markets*" below.

In our Home Markets we are the market leader, with an especially remarkable positioning in Aragón (*source: Bank of Spain*) after the acquisition of our second competitor in the region, Banco Caja3, in 2013.

The following table shows our market share in terms of loans, deposits and total loans and deposits in each of our Home Markets as of December 31, 2021:

	As of December 31, 2021		
	Loans market share(1)	**Deposits market share(2)**	**Total loans and deposits market share(3)**
Aragón	30.7%	42.8%	37.3%
La Rioja	11.9%	17.7%	15.3%
Guadalajara	21.9%	34.1%	28.3%
Burgos	10.6%	18.2%	15.4%
Badajoz	8.7%	13.7%	11.4%
Total Home Markets	**21.8%**	**30.5%**	**26.7%**

Notes:—

Source: Bank of Spain, latest available data.

(1) Loans granted to Spanish resident private sector.

(2) Deposits by Spanish resident private sector.

(3) The market share shown in this column for each province or area of activity is calculated by taking the absolute value of our loans and deposits in each of the provinces or areas of activity over the absolute value of loans and deposits of the Spanish banking system as a whole.

In our Home Markets we had 1.1 million customers (as defined in "*–Definitions*") as of December 31, 2021.

Our Home Markets represent a source of stable retail customer funds[APM]. As of December 31, 2021, €49,194 million out of our €61,141 million retail business volume[APM] in our Home Markets corresponded to retail customer funds[APM], representing four times our stock of performing loans. Our leadership position in these markets has been a key driver of our growth in asset management and life savings insurance funds. Since December 31, 2019, our asset management and life savings insurance funds have grown at an 8.87% annual growth rate and, as of December 31, 2021, amounted to €33,031 million. See "*We are a specialist in the* *diversification of our client's savings, which has made us a market leader in Spain in the asset management and bancassurance businesses*".

Since the late 1980s and through the 1990s, we built a significant presence in our Growth Markets (Madrid and the Mediterranean basin) where, as of December 31, 2021, we had 0.5 million customers, 251 branches and €28,938 million of retail business volume^{APM}, representing 29.23% of our retail business volume^{APM}. As of December 31, 2021, we had a 1.9% market share in terms of total loans and a 1.3% market share in terms of deposits (*source: Bank of Spain, latest available data as of December 31, 2021*).

As of December 31, 2020, our market share in terms of mutual funds and individual pension funds in Aragón (the most important market among our Home Markets) was 53.11% and 38.13%, respectively (*source: INVERCO latest available data as of December 31, 2020*). In addition, our market share in terms of mutual funds and individual pension funds in our Growth Markets has increased since 2019. The following table shows the evolution of our market share in terms of mutual funds in our Home Markets and our Growth Markets for the period between December 31, 2019 and December 31, 2020.

	Mutual funds	
	2020	**2019**
Aragón	53.11%	51.03%
Rest of Home Markets	29.57%	27.43%
Madrid	2.55%	2.49%
Mediterranean basin	1.68%	1.50%
Catalonia	*1.29%*	*1.14%*
Valencian Community	*2.68%*	*2.42%*
Rest of Spain	0.90%	0.79%
Total market share in Spain	**5.52%**	**5.06%**

Source: INVERCO, latest available data

The following table shows the evolution of our market share in terms of individual pension funds in our Home Markets and our Growth Markets for the period between December 31, 2019 and December 31, 2020.

	Individual Pension funds	
	2020	**2019**
Aragón	38.13%	37.48%
Rest of Home Markets	16.39%	15.69%
Madrid	1.95%	1.91%
Mediterranean basin	1.05%	1.01%
Catalonia	*0.79%*	*0.77%*
Valencian Community	*1.68%*	*1.59%*
Total market share in Spain	**3.35%**	**3.22%**

Source: INVERCO, latest available data

Based on this data, we believe we have a well-established presence in Madrid and the Mediterranean basin and that we have proven our ability to compete in these regions. In addition, in the year ended December 31, 2021, 51.4% of all our new lending transactions have been originated in our Growth Markets (48.20% and 47.13% for the years ended December 31, 2020 and 2019, respectively)[21], which has contributed to stabilize our stock of performing loans (in our Growth Markets our retail business volume^{APM} is more biased towards lending). During this same period, retail business volume^{APM} in our Growth Markets has grown by 8.09%. This is also evidenced by the comparable product penetration and productivity metrics in both our Growth and

[21] See definition, explanation, use, calculation and breakdown of Total new lending^{APM} which are set out in "Alternative Performance Measures".

our Home Markets. For example, as of December 31, 2021, asset management and life savings insurance funds in our Growth Markets represented 9.26% of retail customer funds^{APM} in our Growth Markets (compared to 34.61% in our Home Markets) and the number of products and services per customer in our Growth Markets was 6.2 (compared to 7.5 in our Home Markets).

3.2 Simple balance sheet with low-risk profile

We are a 100% retail-focused bank with a simple balance sheet and low-risk profile. We are a specialist in residential mortgages which represented 62.15% of our gross loans and advances to customers excluding reverse repurchase agreements^{APM} as of December 31, 2021[22], and our growing focus is on loans to businesses non-related to the real estate sector (mainly to SMEs) which represented 24.73% of our gross loans and advances to customers excluding reverse repurchase agreements^{APM} as of December 31, 2021. We have a stable and balanced funding with an LTD ratio^{APM} of 78.21% as of December 31, 2021.

Since December 31, 2019 until December 31, 2021, and despite the impact of the COVID-19 pandemic, we were able to reduce our NPAs^{APM} by 34.32% (€658.2 million), with NPLs falling by 44.51% (€575.5 million) and gross value of foreclosed assets by 13.23% (€82.6 million) during this period. During the same period, the NPL ratio^{APM} fell by 167 basis points, standing at 2.30% as of December 31, 2021) with the average NPL ratio^{APM} of the sector being 4.29% (*source: Bank of Spain*). Our NPA ratio^{APM} also fell by 181 basis points standing at 3.97% as of December 31, 2021, below our peers' average of 5.2% (*source: peers' publicly available information as of December 31, 2021*)[23].

During this period, we have managed to increase our NPA coverage ratio^{APM} and our NPL coverage ratio^{APM} to 68.79% and 75.31%, respectively, as of December 31, 2021 (51.63% and 49.82%, respectively, as of December 31, 2019), which is above peers' average (57.8% and 62.6%, respectively (*source: peers' publicly available information as of December 31, 2021*))[24]. As a result, our Net NPAs^{APM} have decreased substantially (from €927.7 million as of December 31, 2019 to €393.2 million as of December 31, 2021) and we have the lowest NPAs over total assets^{APM} (0.67%) among our peers as of December 31, 2021 (peers' average being 1.2%) (*source: peers' publicly available information as of December 31, 2021*)[25]. In addition, our focus on

---

[22] See definition, explanation, use, calculation and breakdown of Gross loans and advances to customers excluding reverse repurchase agreements^{APM} which are set out in "Alternative Performance Measures".

[23] NPA ratio of our peers is calculated using reported numbers of gross NPLs, gross foreclosed assets and gross loans as of December 31, 2021 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs and gross loans) and applying the same method of calculation as described for NPA ratio^{APM} in section "*Alternative Performance Measures*". Caixabank's figures exclude BPI. Sabadell's figures exclude TSB Bank's reported numbers. Unicaja's foreclosed assets do not include Liberbank's rental portfolio. Average is calculated as the simple arithmetic mean of our peers' NPA ratios.

[24] NPA coverage ratio and NPL coverage ratio of our peers are calculated using reported numbers of gross NPLs, gross foreclosed assets, NPL provisions and foreclosed assets provisions as of December 31, 2021 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs and NPL provisions) and applying the same method of calculation as described for NPA coverage ratio^{APM} and NPL coverage ratio^{APM} in section "*Alternative Performance Measures*". Caixabank's figures exclude BPI. Sabadell's figures exclude TSB Bank's reported numbers. Unicaja's foreclosed assets do not include Liberbank's rental portfolio. Average is calculated as the simple arithmetic mean of peers' NPA coverage ratios and NPL coverage ratios, as applicable.

[25] Net NPAs over total assets of our peers is calculated using reported numbers of gross NPLs, gross foreclosed assets, NPL provisions, foreclosed assets provisions and total assets as of December 31, 2021 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs and NPL provisions) and applying the same method of calculation as described for Net NPAs over total assets^{APM} in section "*Alternative Performance Measures*". Caixabank's figures exclude BPI. Sabadell's figures exclude TSB Bank's reported numbers. Unicaja's foreclosed assets do not include Liberbank's rental portfolio.

reducing NPLs related to the real estate sector resulted in NPLs related to residential mortgage loans (which have a lower expected loss) have a higher weight on our NPLs, representing 39.76% of our NPLs as of December 31, 2021, compared to the sector average of 29.7% (*source: Bank of Spain statistics for doubtful assets, latest available data as of December 31, 2021*).

Our NPA reduction during this period and especially during the COVID-19 pandemic (34.3%) was the highest among peers (peers' average being 25.3%) (*source: peers' publicly available information as of December 31, 2021*)[26]. This reduction in NPAs[APM] was partially driven by the successful execution of three wholesale transactions: a sale of a portfolio of NPLs with an aggregate nominal amount of €534 million to MELF Investment Holding II S.à. r.l. in 2019 (the Ordesa Transaction), a sale of a portfolio of NPLs for an aggregate nominal amount of approximately €73 million to DSSV, S. à. r.l. in 2019 (the Costa Transaction) and a sale of a portfolio of NPLs with an aggregate nominal amount of €51 million to the companies LM IV B S.V. and Axactor España S.L. in 2021 (the Oroel Transaction). We have also worked in the implementation of a new NPA recovery model. See "*Operating and financial review for the years ended December 31, 2021, 2020 and 2019– Key factors affecting comparability of results of operations – Sales of loans and NPAs[APM]*".

In addition, as of the date of this Registration Document, NPL entries and early delinquency indicators are already below pre-COVID-19 levels and approximately 96.55% of the Legal Moratoria and Sectorial Moratoria granted has already expired with no meaningful impact on our asset quality.

The evolution of Stage 2 loans has been relatively stable since December 31, 2019, except for a peak in April, 2020 due to the COVID-19 pandemic crisis. As of December 31, 2021, Stage 2 and Stage 3 exposures represented 5.0% and 2.3% of our gross loans and advances to customers[APM], respectively[27], reflecting the quality of our portfolio, which has a significant weight of retail mortgage loans, which have a lower expected loss than other type of loans. Our exposure to Stage 2 loans is lower than peers (peers' average being 6.5%) (*source: peers' publicly available information*)[28] due to the profile of our credit portfolio and our reduced exposure to sectors most affected by the COVID-19 pandemic.

As of December 31, 2021, we had granted €741 million in loans with Legal Moratoria and Sectorial Moratoria (of which €693 million were related to mortgage loans, €4 million to consumer loans and the remaining €44 million were mostly related to transactions with individuals other than mortgage loans and consumer loans) and as of December 31, 2021 the outstanding balance of these loans stood at €26 million. Since the implementation of Legal Moratoria and Sectorial Moratoria measures, we have granted €741 million in loans with Legal Moratoria and Sectorial Moratoria, representing 2.4% of our gross loans and advances to customers[APM29] (significantly below to the peers' average of 4.1% (*source: peers' publicly available*

---

[26] NPA reduction of our peers is calculated using reported numbers of gross NPLs and gross foreclosed assets as of December 31, 2021 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs) and December 31, 2019 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for NPAs[APM] in section "*Alternative Performance Measures*". Caixabank's figures used for this calculation come from the consolidated annual report as of December 31, 2019 pro-forma Bankia merger and Unicaja's figures used for this calculation come from the consolidated annual report as of December 31, 2019 pro-forma Liberbank merger. Caixabank's figures exclude BPI. Sabadell figures exclude TSB Bank's reported numbers. Unicaja's foreclosed assets do not include Liberbank's rental portfolio.

[27] See definition, explanation, use, calculation and breakdown of Loan portfolio by stages[APM] which are set out in "Alternative Performance Measures".

[28] Exposure to Stage 2 loans of our peers is calculated using Stage 2 loans and gross loans figures as of December 31, 2021 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Loan portfolio by stages[APM] in section "*Alternative Performance Measures*". Average is calculated as the simple arithmetic mean of peers' exposures to Stage 2 loans.

[29] See definition, explanation, use, calculation and breakdown of Loans with outstanding moratoria over gross loans and advances to customers[APM] which are set out in "Alternative Performance Measures".

information))[30]. In addition, our exposure to sectors most affected by the COVID-19 pandemic stood at 2.02% of our gross loans and advances to customers[APM] as of December 31, 2021[31] (compared to peers' average of 5.4%[32]).

In addition, in 2021 we granted €2,137 million in Guaranteed Credit Lines. As of December 31, 2021 the drawn amount of Guaranteed Credit Lines stood at €1,668 million (of which 77.1% of the total outstanding balance was guaranteed by the Spanish government), representing 19.95% of our loans to businesses[33]. As of December 31, 2021, 93% of the Guaranteed Credit Lines granted by us had been granted centrally by the credit risk area and only 7% by our network.

As a result of our low risk profile and despite the uncertainties generated by the COVID-19 pandemic, we expect to outperform the sector and to continue to keep a NPA ratio[APM] below 4% in the medium term.

We are compliant with the Basel III liquidity requirements and we believe we have a strong liquidity and funding position. Liquid assets[APM] amounted to €15,250 million or 26.01% of total assets as of December 31, 2021. Our LTD ratio[APM] as of December 31, 2021 was 78.21% (81.08% and 92.47% as of December 31, 2020 and 2019, respectively). As of December 31, 2021, our LCR was 452.0% (468.1% and 307.1% as of December 31, 2020 and 2019, respectively), the highest among peers (peers' average being 273.2%) (*source: peers' publicly available information as of December 31, 2021*)[34] and our NSFR was 152.2% (151.5% and 131.4% as of December 31, 2020 and 2019, respectively), both above their respective minimum requirement. The LCR and NSFR are regulatory ratios established pursuant to CRR (see "*Regulation—Liquidity requirements*").

After the extraordinary provision effort made due to the COVID-19 pandemic in 2020, our cost of risk[APM] had returned to normalized levels as of December 31, 2021. As of December 31, 2021, cost of risk[APM] stood at 0.35%, decreasing by 36 basis points since December 31, 2020, when cost of risk[APM] stood at 0.71% (of which 0.27% was related to extraordinary provisions made during the COVID-19 pandemic), compared to 0.40% for the year ended December 31, 2019. As of December 31, 2021, we maintained an unused post-model adjustment provision of €52 million.

---

[30] Loans subject to Legal Moratoria and Sectorial Moratoria of our peers are calculated using the reported numbers on granted moratoria and gross loans figures as of December 31, 2021 (as derived from their respective consolidated annual report except for Caixabank figures and Unicaja granted moratoria) and applying the same method of calculation as described for Loans with outstanding moratoria over gross loans and advances to customers[APM] in section "*Alternative Performance Measures*". Caixabank's figures exclude Portugal. For Unicaja the numbers on granted moratoria are derived from its quarterly reporting as of September 30, 2021 due to lack of more recent disclosure. Average is calculated as the simple arithmetic mean of peers' loans subject to Legal Moratoria and Sectorial Moratoria.

[31] See definition, explanation, use, calculation and breakdown of Loans to sectors most affected by the COVID-19 pandemic over gross loans and advances to customers[APM] which are set out in "Alternative Performance Measures".

[32] Calculated using the latest available EBA Transparency exercise information on loans for Ibercaja and peers (June 2021). Unicaja figures are pro-forma Liberbank, using latest figures available for Liberbank (EBA EU-wide Transparency exercise as of June 2020). Average is calculated as the simple arithmetic mean of peers' exposure to sectors most affected by the COVID-19 pandemic.

[33] See definition, explanation, use, calculation and breakdown of Guaranteed Credit Lines drawn over loans to businesses[APM] which are set out in "Alternative Performance Measures".

[34] LCR ratio of our peers is calculated using consolidated reported numbers as derived from their respective consolidated annual report. Average is calculated as the simple average of our peers' LCR ratio.

During 2021, we achieved the largest NPL reduction among peers (29.15% compared to peers' average reduction of 0.9%)[35] while posting one of the lowest reported costs of risk[APM] (0.35% compared to 0.40% for peers' average) (*source: peers' public available information*)[36].

Prudent approach towards lending taken during COVID-19 pandemic and defensive composition of loan portfolio should materialise in lower cost of risk[APM] in the medium term.

Retail deposits[APM] represented 79.76% of our external funding[APM] as of December 31, 2021. Our deposit base is granular, with 84.25% of our retail deposits[APM] considered to have a stable balance[37]. Our top 20 deposit customers accounted for only 2.5% of our total deposits as of December 31, 2021. As of December 31, 2021, we had ECB funding amounting to €5,871 million (representing 10.61% of our total liabilities), which all was TLTRO III. We do not have any significant concentration in institutional funding maturities.

Finally, we believe we have a sound capital position. Our capital ratios as of December 31, 2021 were above the requirements for 2021 (our capital ratios are reported and supervised by our regulators in accordance with applicable law):

- CET1 ratio fully-loaded: we were required to maintain a CET1 ratio phased-in of 8.125% and we had a CET1 ratio fully-loaded of 12.71% (12.59% and 11.35% as of December 31, 2020 and 2019, respectively);
- Total capital ratio fully-loaded: we were required to maintain a total capital ratio phased-in of 12.65% and we had a total capital ratio fully-loaded of 17.43% (17.26% and 15.45% as of December 31, 2020 and 2019, respectively); and
- Leverage ratio fully-loaded: we were required to maintain a leverage ratio phased-in of 3% and we had a leverage ratio fully-loaded of 5.75% (5.85% and 5.48% as of December 31, 2020 and 2019, respectively).

For the description of our capital requirements applicable since March 2022 and our capital ratios as of December 31, 2021, 2020 and 2019, see "*Regulation—Capital requirements—Our capital requirements and capital ratios for 2021, 2020 and 2019*".

We believe we have a strong capital generation capacity. Since December 31, 2019 to December 31, 2021, we have generated over 136 basis points of CET1 fully-loaded ratio. This was driven by organic capital generation (retained earnings) and the reduction of RWAs fully-loaded (which have decreased by 11.31% or €2,297.5 million since December 31, 2019 to December 31, 2021). During this period, our total capital ratio fully-loaded increased by 198 basis points and we have completed our hybrid capital instruments buckets with the issuance of €500,000 thousand of a new Tier 2 instrument after acquiring in the market part of the 2015 Tier 2 instrument in January 2020. As a result of this increase in capital levels and our low risk profile, subject to any restrictions to dividend distributions imposed by the ECB, we intend to increase our cash dividend payout ratio[APM] to around 60% in the medium term.

---

[35] NPL reduction of our peers is calculated using reported numbers of gross NPLs as of December 31, 2021 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs) and December 31, 2020 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs). Caixabank's figure for December 31, 2020 is pro-forma Bankia merger and Unicaja figure for December 31, 2020 (as derived from its consolidated annual report) is pro-forma Liberbank merger. Caixabank's figures exclude BPI. Sabadell's figures exclude TSB Bank's reported numbers. Average is calculated as the simple arithmetic mean of peers' NPL reduction in %.

[36] Cost of risk of our peers as of December 31, 2021 (as derived from their respective consolidated annual report). Average is calculated as the simple average of our peers' cost of risk.

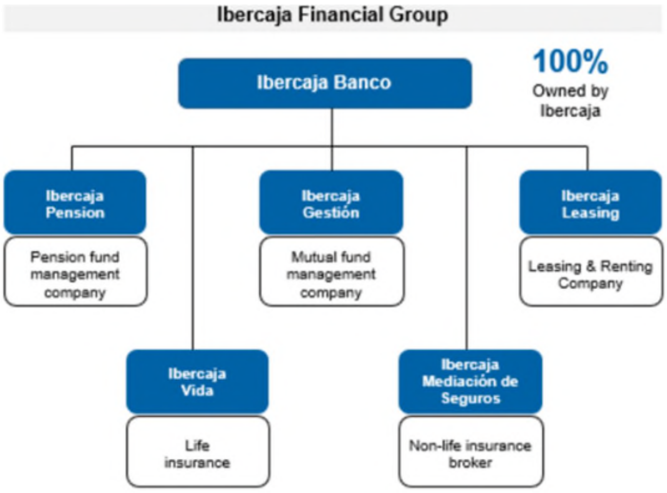
[37] Stable funds are those that are backed by the Guaranteed Deposit Fund (FGD) and correspond to deposits from linked-customers or funds that are deposited in transactional accounts.

We had a RWAs density[APM] of 30.79% as of December 31, 2021. We calculate our RWAs under standard methodology.

3.3 High-quality and diversified revenue mix

We are a specialist in the diversification of our clients' savings, which has made us one of the market leaders in Spain in the asset management and bancassurance businesses in terms of market share (*source Inverco and ICEA*).

Our Financial Group was created in late 1980s and is comprised of a group of subsidiaries (Ibercaja Gestión, Ibercaja Pensión, Ibercaja Vida, Ibercaja Mediación and Ibercaja Leasing) that are responsible for the management of our mutual funds and pension funds, our insurance business and our leasing and renting business.The following graph shows the corporate structure of the Financial Group:



The following table sets out information related to key metrics, market share and ranking of the subsidiaries composing our Financial Group as of and for the year ended December 31, 2021.

	Business	Ownership	Key metrics(1)	Market share in Spain	Ranking
Ibercaja Gestión................	Management of mutual funds	100%	€18.4 billion AuM(2)	5.8%(2)	#6(2)
Ibercaja Pensión	Management of pension funds	100%	€7.6 billion AuM(2)	6.0%(2)	#4(2)
Ibercaja Vida	Life insurance	100%	€6.8 billion technical provisions(3)	3.5%(3)	#7(3)
Ibercaja Leasing	Leasing and Renting	100%	€0.6 billion portfolio(4)	2.9%(4)	#8(4)
Ibercaja Mediación............	Non-life Risk insurance brokerage	100%	€0.3 billion in premiums annually	Alliance with CASER	

Notes:—

(1) The main differences between our Asset management and life savings insurance funds[APM] and the information provided in this table based on INVERCO and ICEA is that data from INVERCO/ICEA does not include the volume distributed to third parties (only the assets managed by us) and, in the case of pension plans, INVERCO considers the mathematical provisions as assets, while our Asset management and life savings insurance funds[APM] do not.

(2) *Source: Inverco reports on mutual funds and pension funds as of December 31, 2021 published in www.inverco.es.*

(3) *Source: ICEA report on life savings insurance products as of December 31, 2021 published in www.icea.es.*

(4) *Source: Asociación Española de Leasing public report on leasing as of December 31, 2021 published in www.ael.es.*

As a result of our differential proprietary model and the strength of our subsidiaries, as of December 31, 2021 we registered an 8.9% CAGR in asset management and life savings insurance funds[APM] since December 31, 2019. This growth exceeded the Spanish system growth (4.5% CAGR) over the same period (*source: consolidated reported information from INVERCO and ICEA considering the sum of mutual funds, pension funds and life savings insurance products as of December 31, 2021*), resulting in an increase in our market share of more than 30 basis points since December 31, 2019, clearly above our deposits market share of 2.7%, becoming the fourth largest entity in Spain in the asset management and bancassurance businesses (*source: Inverco and ICEA as of December 31, 2021*). As a result of this growth, as of December 31, 2021, asset management and life savings insurance funds[APM] represented 47.08% of our retail customer funds[APM] (the highest among peers (*source: peers' publicly available information as of December 31, 2021*))[38]. The evolution of our asset management and life savings insurance funds was very resilient during the COVID-19 pandemic so we were able to recover our 2019 levels in 2021 (our market share in asset under management and life savings insurance products as of December 31, 2021 was 5.1% compared to 4.8% as of December 31, 2019 (*source: Inverco and ICEA*)).

Since 2019, the asset gathering industry is experimenting a strong momentum. In particular, in Spain there is a strong growth potential of this type of products on the back of a high life expectancy and the low

[38] Asset management and life savings insurance funds of our peers are calculated using reported numbers of off-balance sheet funds as of December 31, 2021 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Asset management and life savings insurance funds[APM] in section "*Alternative Performance Measures*". Retail customer funds of our peers are calculated using reported numbers of customer deposits and off-balance sheet funds (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Retail customer funds[APM] in section "*Alternative Performance Measures*". Average is calculated as the simple average of our peers' asset management and life savings insurance funds and retail customer funds, as applicable.

weighting of financial wealth over total wealth per capita (*source: World Bank, Global Wealth Databook 2021, OECD*). In addition, the following drivers for further growth in asset under management and life savings insurance products are still in place: (i) we are paying 0% on new deposits and have started charging negative interest on large deposits and deposits from large companies and public entities, (ii) our customers' savings have increased due to a conservative economic approach to the COVID-19 pandemic and (iii) the underpenetration of asset under management in Spain (financial assets in Spain represented just 210% of GDP compared to an average of 264% in the EU (*source: Inverco as of September 30 2021, latest available data*).

We have also focused our growth on the sale of risk insurance products. Since December 31, 2019 to December 31, 2021, our risk insurance portfolio in terms of premiums grew by 2.91% (-0.09% and 4.09% in life and non-life risk insurance products, respectively). We directly distribute our life risk insurance products through Ibercaja Vida and we have an alliance with CASER for the distribution of non-life risk insurance products. Risk insurance premiums grew 3.0% from December 31, 2020 to December 31, 2021.

The strength of our non-banking business has helped us overcome the current low interest rate environment. For example, our recurring revenues^{APM} for the year ended December 31, 2021 grew 2.50% (or €22.7 million) compared to the same period of 2020, while the average 12-month Euribor for the year has decreased by 19 basis points during the same period, from -0.30% as of December 31, 2020 to -0.49% as of December 31, 2021. This increase in recurring revenues^{APM} is mostly based on the growth of our non-banking business.

As a result of this strategic commitment to the asset management and bancassurance businesses and by maintaining full ownership of both businesses, today we have a diversified recurring revenues base. In the year ended December 31, 2021, 42.75% of our recurring revenues^{APM} were generated from non-banking products (mutual funds, pension funds, insurance and leasing). As a result, we have one of the highest proportions of non-banking commissions over recurring revenues^{APM} (31.02%) among Spanish retail banks (peers' average being 11.57%) (*source: public information of each peer*)[39].

Our Financial Group generated €410 million of recurring revenues^{APM} in the year ended December 31, 2021, which represented 44% of our recurring revenues^{APM} for such year. For a breakdown of our recurring revenues^{APM} by products, see "*Alternative Performance Measures*". As a result, we benefit from a diversified revenue base with three main drivers: (i) banking business, (ii) asset management and life savings insurance and (iii) risk insurance.

3.4 Loyal customer base and clear roadmap for digital transformation

We have developed a strong commercial model that provides best-in-class customer service levels.

As result of this differentiated customer-centric approach, we have a loyal customer base, with an average customer tenure of more than 20 years and high cross selling ratios reaching an average number of products/services per customer of 7.0 as of December 31, 2021. In addition, our customers are very satisfied with our services. As of December 31, 2021, the Group ranked above peers in terms of customer satisfaction, being the second ranked entity in Spain with a score of 7.45 on a scale from 0 to 10 in global customer satisfaction (*source: BMKS – Benchmarking Customer Satisfaction in the Financial Sector as of December 31, 2021*).

In 2016, we initiated a digital transformation process to benefit from the opportunities of the technology and the digital economy. The objective of our digital transformation is to bring our DNA to the digital world through an omnichannel model. Our digital transformation is guided by the following principles:

---

[39] Non-banking commissions over recurring revenues of our peers is calculated using reported numbers of non-banking commissions, net interest income and net fee income and exchange differences as of December 31, 2021 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Non-banking commissions over recurring revenues^{APM} in section "*Alternative Performance Measures*". Average is calculated as the simple average of our peers' non-banking commission over recurring revenues.

- Customer focus. Technology is at the service of our customers' needs;
- Corporate focus and alignment. We share a vision embedded in our corporate strategy;
- Efficacy and agility. We consider key being agile and learning fast;
- Strategic alliances. We focus on our core skills and promote alliances for the rest.

Microsoft is our strategic partner in our digital transformation process by virtue of a collaboration agreement entered into on May 2016 and has acted as a catalyst for our digital transformation process.

Since then, we have completely transformed our digital assets (*see "Digital Transformation – Digital Assets"*). As of December 31, 2021, we had increased our number of digital customers by 14.8%, primarily due to an 39.6% increase in Ibercaja App users (compared to December 31, 2019) and our transactions through digital channels represented 74.3% of our total transactions. As of December 31, 2021, Ibercaja App ranked first among peers in Play Store (4.7 stars) and Apple Store (4.5 stars) (*source: weighted average between the scores received from the users of Android and IOS Apps*)[40]. In addition, the new technological capabilities have resulted in an increase in the efficiency and commercial productivity of our branch managers.

3.5 *Effective measures that mitigate impact of current environment on P&L*

Strength of recurring revenues[APM]

The strength of our non-banking business has helped us overcome the current low interest rate environment. Our strategic commitment to fee-based businesses (asset management and life savings insurance businesses) has allowed us to achieve a highly diversified recurring revenues[APM] base, ranking as one of the Spanish domestic banks with the highest proportion of net fee income and exchange differences over recurring revenues[APM], representing 47.09% for the year ended December 31, 2021, clearly above our peers' average of 33% (source*: peers' publicly available data as of December 31, 2021*)[41]. As of December 31, 2021, our net fee income and exchange differences over average total assets[APM] also outperformed our peers' (peers' average being 0.55%) representing 0.76% (*source: peers' publicly available data as of December 31, 2021*) [42].

Non-banking commissions have proven resiliency and sustained structural growth. In the period 2019-2021, our non-banking commissions grew by 18.90% contributing to offset the drop in net interest income. For the year ended December 31, 2021, non-banking commissions were already substantially above pre-COVID-19 levels (€288.9 million for the year ended in December 31, 2021 compared to €230.2 million for the year ended December 31, 2020 (25.50% growth)).

The evolution of our recurring revenues[APM] shows a decreasing dependency on net interest income. For the year ended December 31, 2021, net interest income represented 52.91% of our recurring revenues[APM]

---

[40] The calculation of the score is an average between the scores received from users of the Android and IOS Apps (weighting each score by 50%). We have calculated the weighted average of our peers.

[41] Net fee income and exchange differences of our peers is calculated using reported numbers of net fee and commission income as of December 31, 2021 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Net fee income and exchange differences[APM] in section "*Alternative Performance Measures*". Recurring revenues of our peers are calculated using reported numbers of net interest income and net fee and commission income as of December 31, 2021 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Recurring revenues[APM] in section "*Alternative Performance Measures*". Average is calculated as the simple average of our peers' net fee income and exchange differences.

[42] Net fee income and exchange differences over average total assets of our peers is calculated using reported net fee and commission income as of December 31, 2021 and the average between reported total assets as of December 31, 2021 and December 31, 2020 (as derived from their respective consolidated annual report) and applying the same method of calculation as described for Net fee income and exchange differences over average total assets[APM] in section "*Alternative Performance Measures*". Average is calculated as the simple average of our peers' net fee income and exchange differences over average total assets.

(58.73% and 58.09% for the years ended December 31, 2020 and 2019, respectively). Despite the 7.65% year-on-year drop in net interest income for the year ended December 31, 2021, our recurring revenues[APM] for such period have grown (2.50% year-on-year growth), as the reduction in net interest income (€40.8 million) has been offset by the increase in net fee income and exchange differences[APM] (€63.6 million).

We expect net interest income pressures to come to an end on the back of:

- European Union recovery package to support Member States hit by the COVID-19 pandemic ("**Next Generation funds**") and positive dynamics in the housing market, which are expected to positively impact business loan and mortgage volumes in Spain;
- Normalisation of ALCO portfolio contribution to total interest income[43], representing 6.19% as of December 31, 2021, compared to 8.94% and 10.40% for the years ended December 31, 2020 and 2019, respectively;
- Mortgage portfolio repricing: mortgage portfolio has already been repriced to current Euribor levels. Euribor forward curve points to an increase in coming quarters (*Source: Bloomberg as of December 31, 2021*).

Operating efficiency

Our continuous cost-cutting efforts resulted in a 5.4% reduction in recurring operating expenses[APM] from €600,087 thousand for the year ended December 31, 2019, to €567,465 for the year ended December 31, 2020. In the year 2021, recurring operating expenses[APM] grew by 5.4% year-on-year as a result of the launch of our new "Desafío 2023" Strategic Plan and the lower operating cost base registered in 2020 as a result of the COVID-19 pandemic.

In December 2020, we reached an agreement to reduce our workforce by up to 750 employees (equivalent to 15% of our headcount) and to close up to 199 branches by June 30, 2022 (departures will occur in a staggered manner until June 2022 and the bulk of costs savings will be visible during 2022).

We have improved our productivity by 19.2% since 2019, with retail business volume per employee[APM] increasing to €20,292 thousand as of December 31, 2021 (compared to €17,782 thousand and €17,024 thousand as of December 31, 2020 and 2019, respectively), broadly in line with our peers' average (€21,107 thousand)[44]. We will reduce our recurring operating expenses[APM] by €40 million from 2022 onwards as a result of the reduction in staff expenses as a consequence of the implementation of the 2021-2022 Redundancy Plan.

3.6 *Sound corporate governance and experienced management team with a proven track record*

We have a sound corporate governance already complying with the main recommendations of the Corporate Governance Code (see "*Corporate governance legal provisions and recommendations*"). In particular, the roles of Chief Executive Officer and Chairman are separated, independent directors represent 50% of our Board of Directors and our main Board Committees (Audit and Compliance Committee, Appointments Committee, Compensation Committee and Large Risks and Solvency Committee) are chaired by an independent director.

We are managed by a strong executive team, with an average tenure of over 20 years at Ibercaja Banco. Under the leadership and guidance of our highly professional management team, we have witnessed a significant strengthening of our business over the years. Since the arrival of our current management team in 2015, we have accomplished a large number of significant milestones for our business:

---

[43] See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

[44] Retail business volume per employee of our peers is calculated using numbers on employees, gross loans and customer deposits as of December 31, 2021 (as derived from their respective consolidated annual report), assets under management as of December 31, 2021 (INVERCO) and life insurance provisions as of December 31, 2021 (ICEA).

- we have completed the Banco Caja3 integration capturing cost synergies and executing a commercial turnaround;
- between March 2016 and March 2017, with the consent of the ECB, we completed the early redemption of the Banco Caja3 CoCos;
- we have strengthened our balance sheet while protecting our shareholders' value, without selling any strategic assets or doing a capital increase;
- we have shown out access to capital markets, being one of the first non-listed banks in Europe to complete our AT1 and Tier 2 capital buckets; and
- we have reduced our cost base while boosting our commercial model complemented with our digital transformation process.

Our management team continues to be fully committed to the implementation of our business plan and will continue to seek opportunities to increase our profitability going forward.

4. Strategy

In April 2021, we launched our Strategic Plan "Plan Desafío 2023" for 2021 to 2023. The main objectives of this plan are to improve the Company's recurring profitability, to reinforce Ibercaja Banco's leadership in customer experience as a distinctive value and to accelerate our transformation to ensure our future competitiveness.

We have a clear roadmap to achieve our Plan Desafío 2023's objectives, which is focused on the following areas:

- Banking for companies: developing our customer segments related with companies is one of our main strategic objectives, primarily with a focus on companies with annual turnover of over €2 million. For such purposes, we have created the Directorate of Companies.

  We are improving the optimization of our commercial model establishing an excellent service model at three levels: managers, specialized middle office and back-office and at the same time promoting the new digital banking model. In addition, we are in the process of consolidating our commercial systematics and risk-adjusted intelligence models.

  Our focus is on the partnership we have created with Mazars and Silo for the purposes of providing new advising services to our corporate customers in relation to the access to Next Generation Funds.

- Mortgage loan market: with the aim of increasing our customer acquisition capacity, we have (i) increased our investment in advertising and digital presence, (ii) reached agreements with mortgage loan platforms and real estate portals, (iii) reinforced our commercial specialization, (iv) individualized our mortgage loan origination objectives, (v) launched the "100% digital mortgage loan" and (vi) reviewed our internal processes and circuits.

- Risk insurance products: our strategy is focused on (a) individual customers, for whom we have improved our products, creating the single account and modular and pre-quoted products, and (b) corporate customers to whom we offer a new range of specific products and the Platinum program.

  We believe that our digital transformation process plays a key role in our risk insurance products strategy. In this sense, we have implemented the "digital manager model" and we are encouraging the adoption of remote sales tools by the branch network.

- Asset management and life savings insurance products: we have an affluent customer acquisition plan. We have expanded the scope of our advisory services to tax planning, inheritance and will drafting, among others. We are taking advantage of the behavioral economics of our customers by advising customers willing to save. Finally, we are boosting our ESG products and increasing our sales capabilities, remote personal relationship and digital assets.

In order to achieve our Plan Desafío 2023's objectives we have launched two strategic programs: (i) "Customers and Profitable Growth" ("*Clientes y Crecimiento Rentable*"), and (ii) "Productivity and Efficiency" ("*Productividad y Eficiencia*"). Additionally, we will implement certain cross-cutting initiatives that we expect to be key for the implementation of these programs. Our capital expenditure (CapEx) for our "Plan Desafío 2023" Strategic Plan is approximately €100 million annually.

4.1 Customers and Profitable Growth

This program is aimed at improving customer satisfaction while achieving profitable growth in our business. The entire organization has to focus on its customers and on fully satisfying their needs, even by anticipating these, with a personalized value proposition and a global service that makes a difference. By doing so, we believe we will achieve an equal and fair monetization of the value and utility offered to customers.

As part of this program, we will launch different initiatives to (a) improve and develop customer knowledge and business intelligence tools and (b) implement new collection models based on the personalization of the products and services we offer. On the commercial front, we will prioritize profitable growth in companies, risk insurance and personal banking.

4.2 Productivity and Efficiency

With this program, we want to be an organization that is able to redirect its resources and focus them on value creation. The aim is to reduce unproductive operating costs and invest them in accelerating our digital transformation. To achieve this goal, we will launch process optimization and re-engineering initiatives and implement zero-base budgeting measures.

4.3 Cross-cutting initiatives

In addition, we will implement two blocks of cross-cutting initiatives that we believe will be key to the implementation of the abovementioned programs:

- Initiatives to focus on value creation: these measures are aimed at improving our knowledge of the risks assumed by us as well as their overall management. Risk-adjusted return should be the basic criteria in decision-making. The main initiatives will be (i) internal credit risk models (IRB models), (ii) pricing and efficient capital allocation and (iii) data governance.
- Initiatives to make us a talent-attractive organization and to enable us to adapt to the changing environment. These initiatives will include (i) the transformation of our technology model, (ii) strategic people planning and (iii) the integration of our sustainability and corporate purpose into our financial activity.

These strategic programs have been conceived and structured to help us achieve our medium-term objectives (see *"Medium-term financial objectives"* below).

5. Medium-term financial objectives

In the context of our "Plan Desafío 2023" strategic plan launched in April 2021, we set certain medium-term financial objectives which were updated in December 2021 as communicated to the market through a corporate presentation published by means of a communication of other relevant information (*comunicación de otra información relevante*) on December 9, 2021. In terms of profitability, we aim to achieve in the medium term (i) a ROTE^{APM} of approximately 9.0% (5.7% as of December 31, 2021); and (ii) a recurring cost-to-income ratio^{APM} of approximately 55.0% (64.2% for the year ended December 31, 2021).

In terms of asset quality, we aim to achieve in the medium term (i) a cost of risk^{APM} of 0.30% (0.35% as of December 31, 2021); (ii) a NPA ratio^{APM} of approximately 4.0% (4.0% as of December 31, 2021); and (iii) a NPA coverage ratio^{APM} of at least 65.0% (68.8% as of December 31, 2021).

In terms of solvency, we aim to maintain in the medium term a CET1 ratio of 12.5% (12.7% as of December 31, 2021) with AT1 and Tier 2 buckets already completed, and a total capital ratio fully-loaded of

17.0% (17.4% as of December 31, 2021). We also aim to distribute a cash dividend payout ratio[APM] of approximately 60.0% in the medium term (65.00% for the year ended December 31, 2021).

These objectives take into account the Euribor forward curve as of November 29, 2021 which implies that the 12-month Euribor rate will remain (on average) at -0.48%, -0.36% and -0.08% in 2021, 2022 and 2023, respectively. These medium-term objectives are based on the assumption of a tax rate of 30%. We have also carried out a sensitivity analysis with the Euribor forward curve as of February 28, 2022 which was 80 basis points above the Euribor forward curve used for stating out medium-term objectives in our "Plan Desafío 2023" strategic plan. If this Euribor forward curve were to materialize, our ROTE medium-term objective would foreseeably be revised up to 10.5%.

5.1 Business volume growth

In 2021 performing loans excluding reverse repurchase agreements[APM] fell 0.3% which shows an improvement compared to 2020 when performing loans excluding reverse repurchase agreements[APM] fell by 2.4%. We expect 2022 to represent the turning point back to credit volume growth after the decline experienced over the past years, allowing us to target a moderate growth of the performing loan book in the medium term. In aggregate, we target to increase our stock of performing loans by 2.5% to 3.5% per year in the medium term.

We aim to stabilize the retail mortgage portfolio in the medium term benefiting from the recent strength in the residential real estate market. In addition, we aim to increase our loans to companies by 7.0% to 9.0% annually in the medium term supported by the deployment of Next Generation funds.

We aim to increase our retail customer funds[APM] by approximately 3.5% annually in the medium term, below our recent historical performance (this growth does not take into account market performance in assets under management). We believe that our Personal Banking customer segment will be the main driver for this growth. In term of products, we aim to grow by 5.0% to 6.0% annually in the medium term in asset management and life savings insurance products (particularly, mutual funds, pension funds and unit-linked products). Precautionary retail deposits gathered by our customers during the COVID-19 pandemic are expected to shift towards other investment products, primarily due to the negative interest rates environment.

5.2 Gradual recovery of our net interest income towards pre-COVID-19 levels (2019)

We expect net interest income to increase by 3.0% to 4.5% annually in the medium term driven by:

(i) the expected Euribor evolution based on forward rates as of November 29, 2021;

(ii) a customer spread[APM] of approximately 1.4% in the medium term due to an increase in Euribor rates, an ongoing change in the mix of the portfolio and the cost of new term deposits remaining at 0%;

(iii) a targeted increase in the performing loan book of 2.5% to 3.5% annually in the medium term with the stabilization of the retail mortgage portfolio and a targeted increase in the companies' portfolio of 7% to 9% annually in the medium term;

(iv) an increase in the ALCO portfolio size as a result of our growth in liquidity;

(v) broadly stable contribution from our life insurance business; and

(vi) the redemption of TLTRO III funding and the reduction of associated excess liquidity.

5.3 Increase of fee income driven by non-banking commissions

We expect an increase in net fee income and exchange differences[APM] at an approximately 5.5% CAGR in the medium term driven by the contribution of our Financial Group. Particularly, our non-banking commissions will be the main contributor through the growth of our asset gathering and risk insurance businesses. We aim to increase our non-life risk insurance premiums on an annual basis by approximately 6% in the medium term, bolstered by our commercial agreement with CASER.

We also expect a slight growth in banking commissions driven by banking business, the recovery of the economy and tariffs optimization.

5.4 Increase of operating efficiency

We have recently demonstrated our ability to reduce our operating costs: in May 2017 we reached an agreement to reduce our workforce by up to 590 employees and to close up to 140 branches by June 2018. Overall, in 2017 and 2018, our employees decreased by 314 and 279, respectively, and the number of branches decreased by 96 and 32, respectively. However, we believe there is room to deliver additional efficiency and productivity gains by reducing operating expenses^{APM} by at least €40 million (before taxes) in the medium term, mainly through further cost optimization measures. In this sense, the 2021-2022 Redundancy Plan will reduce our workforce by up to 750 employees (15% of our headcount). We target a recurring cost-to-income ratio^{APM} of approximately 55.0% in the medium term (64.2% for the year ended December 31, 2021).

5.5 Outperforming the sector in non-performing assets and cost of risk

After a strong provisioning effort and the successful implementation of our new recovery model, we have achieved best-in-class asset quality metrics.

We aim to maintain a NPL ratio^{APM} of approximately 2.5% and a NPA ratio^{APM} of approximately 4.0% in the medium term.

We target to maintain a NPA coverage ratio^{APM} of at least 65.0% in the medium term, from 68.8% as of December 31, 2021.

We intend to stabilize our cost of risk^{APM} at 0.30% in the medium term, following the prudent approach towards lending taken during the COVID-19 pandemic and based on the defensive composition of the loan book.

5.6 Best in class capital position

Our target is to maintain a CET1 ratio of 12.5% and a total capital ratio of 17.0% in the medium term.

We became one of the first regional banks in Europe to complete our hybrid capital buckets after issuing AT1 and Tier 2 instruments in April 2018 and July 2015, respectively, strengthening our capital position (*source: EBA 2019 transparency test*). In January 2020, we issued a new Tier 2 instrument after repurchasing in the market part of the 2015 Tier 2 instrument.

Our medium-term capital objectives are consistent with our MREL requirements and the issuance of €0.7 billion to €0.8 billion MREL-eligible instruments is factored in our targets.

The calculation of our RWAs is fully based on the standardized approach methodology. Our objectives do not consider a potential migration to an internal model approach (which could result in lower RWAs), and we assume RWA density to remain stable.

On the basis of these medium-term financial objectives, our overall underlying objective is to increase our ROTE^{APM} to approximately 9% in the medium term, from 5.7% for the year ended December 31, 2021. The medium-term ROTE^{APM} objective is driven by a reduction in recurring operating expenses^{APM}, stabilization of cost of risk, growth in net fee income and exchange differences^{APM} and gradual recovery of net interest income towards pre-COVID-19 levels (2019). Most of these drivers are under our control or based on recent years' track record and, as a result, we have high visibility on our ROTE^{APM} medium-term target based on an Adjusted ROTE^{APM} for the year ended December 31, 2021 and for the year ended December 31, 2020 of 5.4% and 4.6%, respectively. This ROTE^{APM} objective is consistent with a CET1 ratio target of 12.5% in the medium term.

In particular, we target our medium-term financial objectives to contribute to our objective of ROTE^{APM} as follows:

Medium-term financial objective	**Contribution to ROTE^{APM}**
Increase in net interest income	between +0.7 and 1.1%
Increase in net fee income	+1.2%
Reduction in recurring operating expenses^{APM}	+1.1%
Decrease in cost of risk^{APM}	+0.4%
Other negative impacts (including net profit from financial assets and liabilities^{APM}, other operating income and expenses^{APM}, other gains and losses^{APM} and the increase in tangible equity as a result of the 40% profit not distributed as dividend taking into consideration the medium-term objective of a 60% cash dividend pay-out ratio^{APM})	-0.5%

ROTE^{APM}, adjusted ROTE^{APM}, recurring cost-to-income ratio^{APM}, recurring revenues^{APM}, cost of risk^{APM}, NPA ratio^{APM}, NPA coverage ratio^{APM}, retail customer funds^{APM}, customer spread^{APM}, net fee income and exchange differences^{APM}, retail business volume per employee^{APM}, recurring profit before provisions^{APM}, NPL ratio^{APM} and recurring operating expenses^{APM} are APMs, the definition, explanation, use and reconciliation of which are set out in "*Alternative Performance Measures*".

The financial objectives included in this section constitute forward-looking information and are subject to risks and uncertainties that could cause actual results to differ materially from these objectives, including, but not limited to, our performance, industry performance, general and economic conditions, competition, adverse changes in applicable laws, regulations or rules, and the various risks and uncertainties set forth in this Registration Document that could materially adversely affect our future results. We cannot give any assurance that these objectives will be realized or that actual results will not vary significantly from these objectives. See also "*Presentation of Financial and Other Information—Objectives*".

6. Recent Developments and Current Trading

Since December 31, 2021 until the date of this Registration Document, there has been no significant change in the financial position or financial performance of the Group.

7. Markets

We conduct all of our business in Spain. Based on the location of the branch managing our clients, we segment our activities into the following geographical markets (i) our Home Markets (which are the autonomous regions of Aragón and La Rioja and the provinces of Guadalajara, Burgos and Badajoz) which constitute our traditional geographic markets and where we have a leading presence (*source: market share information from the Bank of Spain*), (ii) our Growth Markets (which are the autonomous region of Madrid and the Mediterranean basin (which includes the autonomous regions of Catalonia and the Valencian Community)) where we have a well-established presence taking into consideration that the retail business volume^{APM} in these markets represented 29.23% of our retail business volume^{APM} as of December 31, 2021 and that Madrid now represents the second most relevant market for us accounting for 17.69% of our retail business volume^{APM} as of December 31, 2021 and (iii) the Rest of Spain.

The following table shows the percentage that each of these markets represented over our total business volume^{APM} and recurring revenues^{APM} as of December 31, 2021, 2020 and 2019:

	As of December 31,					
	2021		2020		2019	
	Retail business volume[APM]	Recurring revenues[APM]	Retail business volume[APM]	Recurring revenues[APM]	Retail business volume[APM]	Recurring revenues[APM]

Aragón

Aragón is our main market.

Aragón is an autonomous region located in the northeast of Spain, with a population of around 1.3 million, which represented 2.8% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*). Its territory is divided into three provinces: Zaragoza, Huesca and Teruel.

The GDP per capita generated by the Aragonese economy in 2020 reached €26,512 thousand, which was 11.9% above the Spanish average GDP per capita (*source: INE, latest available data*). Aragón's GDP accounted for 3.1% of the Spanish GDP as of December 31, 2020 (*source: INE, latest available data*). The industrial sector and exports of goods contributed 19.8% and 37.9%, respectively, to Aragón's GDP in 2020, both of which were above the Spanish average (14.7% and 23.3%, respectively) (*source: INE and ICEX, latest available data*). As of December 31, 2021, the unemployment rate in Aragón was 9.0%, which was below the Spanish average of 13.3% (*source: INE, latest available data*).

With regard to the financial sector, Aragón accounted for 2.8%, 2.8% and 4.5% of the aggregate volume of Spanish loans to the private sector (€35.4 billion), deposits from the private sector (€37.9 billion) and number of branches (856), respectively, as of December 31, 2021 (*source: Bank of Spain, latest available data*).

Rest of Home Markets

In addition to Aragón, our Home Markets include the regions of La Rioja, Guadalajara, Burgos and Badajoz.

La Rioja is an autonomous region located in the northeast of Spain, with a population of around 0.3 million, which represented 0.7% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*).

The GDP per capita generated by the economy of La Rioja in 2020 reached €25,714 thousand, which was 8.5% above the Spanish average GDP per capita (*source: INE, latest available data*). La Rioja's GDP accounted for 0.7% of the Spanish GDP as of December 31, 2020 (*source: INE, latest available data*). As of December 31, 2021, the unemployment rate in La Rioja was 10.5%, which was below the Spanish average of 13.3% (*source: INE, latest available data*).

Guadalajara is a province located in the center of Spain with a population of around 0.3 million, which represented 0.6% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*).

As of December 31, 2021, the unemployment rate in Guadalajara was 10.8%, which was below the Spanish average of 13.3% (*source: INE, latest available data*).

Burgos is a province located in the north of Spain with a population of around 0.4 million, which represented 0.8% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*).

As of December 31, 2021, the unemployment rate in Burgos was 10.0%, which was below the Spanish average of 13.3% (*source: latest available date*).

Badajoz is a province located in the southeast of Spain, with a population of around 0.7 million, which represented 1.4% of the total population of Spain as of January 1, 2021 (*source: INE, latest available information*).

As of December 31, 2021, the unemployment rate in Badajoz was 19.7%, which was above the Spanish average of 13.3% (*source: INE, latest available information*).

7.2 Growth Markets

In the late 1980s, we expanded our activities to our Growth Markets.

The following table shows the number of customers and branches in each of our Growth Markets and the percentage they represented over our total number of customers and branches, as well as the retail business volume[APM] and the recurring revenues[APM] of each of our Growth Markets and their contribution to our retail business volume[APM] and recurring revenues[APM] as of and for the year ended December 31, 2021.

	As of and for the year ended December 31, 2021							
	Customers[(1)]		Branches[(2)]		Retail business volume[APM]		Recurring revenues[APM]	
	Millions	*%*	*Number*	*%*	*€ thousands*	*%*	*€ thousands*	*%*

Madrid

Madrid is our second most important market by retail business volume[APM]. Located in the center of Spain, Madrid is the third largest autonomous region in Spain in terms of population with a population of around 6.8 million (which represented 14.2% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*)).

The GDP per capita generated by the Madrid economy in 2020 reached €32,048 thousand, which was 35.3% above the Spanish average GDP per capita (*source: INE, latest available data*). Madrid's GDP accounted for 19.3% of the Spanish GDP as of December 31, 2020 (*source: INE, latest available data*). The industrial sector and exports of goods contributed 9.9% and 13.5%, respectively, to Madrid's GDP in 2020, both of which were below the Spanish average (14.7% and 23.3%, respectively) (*source: Bank of Spain and ICEX, latest available data*). As of December 31, 2021, the unemployment rate in Madrid was 10.1%, which was below the Spanish average of 13.3% (*source: INE, latest available data*).

With regard to the financial sector, Madrid accounted for 29.2%, 26.5% and 11.8% of the aggregate volume of Spanish loans to the private sector (€366.1 billion) and deposits to the private sector (€363.1 billion) and number of branches (2,242), respectively, as of December 31, 2021 (*source: Bank of Spain, latest available data*).

Mediterranean basin

The Mediterranean basin includes the autonomous regions of Catalonia and the Valencian Community.

Catalonia is an autonomous region located in the northeast of Spain, is the second largest autonomous region in Spain in terms of population with a population of around 7.8 million (which represented 16.4% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*)). Its territory is divided into four provinces: Barcelona, Tarragona, Gerona and Lérida.

The GDP per capita generated by the Catalonian economy in 2020 reached €27,812 thousand, which was 17.4% above the Spanish average GDP per capita (*source: INE, latest available data*). Catalonia's GDP accounted for 19.0% of the Spanish GDP in 2020 (*source: INE, latest available data*). The industrial sector and exports of goods contributed 17.5% and 31.1%, respectively, to Catalonia's GDP in 2020, both of which were above the Spanish average (14.7% and 23.3%, respectively) (*source: Bank of Spain and ICEX, latest available data*). As of December 31, 2021, the unemployment rate in Catalonia was 10.2%, which was below the Spanish average of 13.3% (*source: INE*).

The Valencian Community is an autonomous region located in the east of Spain, is the fourth largest autonomous region in Spain in terms of population with a population of around 5.1 million (which represented 10.7% of the total population of Spain as of January 1, 2021 (*source: INE, latest available data*)). Its territory is divided into three provinces: Alicante, Castellón and Valencia.

The GDP per capita generated by the Valencian economy in 2020 reached €20,792 thousand, which was 12.2% below the Spanish average GDP per capita (*source: INE, latest available data*). The Valencian Community's GDP accounted for 9.3% of the Spanish GDP in 2020 (*source: INE, latest available data*). The industrial sector and exports of goods contributed 17.5% and 27.3%, respectively, to the Valencian Community's GDP in 2020, both of which were above the Spanish average (14.7% and 23.3%, respectively) (*source: Bank of Spain and ICEX, latest available data*). As of December 31, 2021, the unemployment rate in the Valencian Community was 14.4%, which was above the Spanish average of 13.3% (*source: INE, latest availble data*).

With regard to the financial sector, the Mediterranean basin accounted for 25.5%, 23.1% and 21.6% of the aggregate volume of Spanish loans to the private sector (€319.4 billion), deposits from the private sector (€316.4 billion) and number of branches (4,108), respectively, as of December 31, 2021 (*source: Bank of Spain, latest available data*).

7.3 Rest of Spain

We also carry out our activities outside our Home Markets and our Growth Markets ("**Rest of Spain**"). The following table shows the number of customers and branches in the Rest of Spain and the percentage they represented over our total number of customers and branches, as well as the retail business volume^APM and the recurring revenues^APM of the Rest of Spain and their contribution to our retail business volume^APM and recurring revenues^APM as of and for the year ended December 31, 2021:

8. Operations and activities

Our customer-focused strategy is based on the segmentation of our customers on the basis of their financial needs, which allows us to provide our customers with a diversified portfolio of tailored products and solutions, including through the specialization of our employees.

Our commercial strategy is based on a differentiated retail business model defined around sound customer relationships and distribution models with potential for further development. Such retail business model relies on the following selling proposition and implementation framework:

- Specialization: Covering our clients' emotional needs through specialized models tailored to their financial needs and/or relationships expectations. We are increasing the number of specialized employees who provide tailored financial solutions to our customers. As of December 31, 2021, we had 781 specialized employees: 493 in our Personal Banking segment (of which 67 were Digital Managers), 76 in our Private Banking segment and 212 in our Non-Real Estate Companies segment. In this regard, 98.7% of our employees who are required to hold a specific certificate to provide advisory services, and 79.1% of the rest of employees of our branch network, hold the European Investment Practitioner (EIP) certificate or a higher qualification to provide investment advisory services. .

- Focus on advisory: Over the years, we have developed an industrialized advisory process. In 2012, we became the first Spanish bank certified by the Spanish Association for Standardization and Certification (AENOR) for its excellence in personal banking advisory services. In addition, Ibercaja Banco holds since 2007 the Seal for European Excellence 500+ granted by the European Foundation for Quality Management (EFQM).

- Omnichannel relationship model: Adapting to our customers' relational needs, characteristics, context and life cycle so that they can decide the most appropriate method to interact with us at each time, through an advisory model oriented to cover key and recurrent customer needs and to maximize commercial effectiveness. The underlying rationale for the creation of our omnichannel system is providing our customers a unique and recognizable experience.

  Our customers rely on face-to-face value-added interactions to cover their advisory needs while using digital channels for their day-to-day transactions, benefitting from a unique and recognizable customer experience while having a consistent and recognizable customer experience in all the channels. In the year ended December 31, 2021, 41% of our individual customers operated through both branches and digital and ATM channels (omnichannel customers or human to human digital according to internal nomenclature), while 55% operated only through digital or ATM channel and 5% operated only through branches (only branch customers).

  Omnichannel customers are the highest generators of our revenues. As of December 31, 2021, the average number of products and services of omnichannel customers was 2.3 higher than the average number of products and services of customers who operated only through branches (in relation to customers with asset management and life savings insurance products and customers with risk insurance products the average number of products and services of omnichannel customers was 1.5 and 1.8, respectively, higher than the average products and services of customers who operated only through branches).

Digitalization is a key tool to respond to our customers' needs, especially after the outbreak of the COVID-19 pandemic. In the last three years, we have renewed our main channels (Private Digital Banking, Company Digital Banking, Mobile Banking, ATMs and Public Website) and we have implemented an advanced design system to maintain an agile and uniform performance across all of them. According to FSR INMARK, we have fulfilled our main objectives in the area of digital transformation, both in terms of the use of channels and in the level of satisfaction generated.

- Personalized product offering: our product factories (Ibercaja Gestión, Ibercaja Pensión and Ibercaja Vida) have a strong reputation in the sector. In this regard, Ibercaja Pensión was named as the best pension fund management company by Expansión AllFunds in 2020, 2018, 2017 and 2016 and Ibercaja Gestión was named as the best national mutual fund management company by Expansion AllFunds in 2017.

As a result of our commercial strategy, our customers are very satisfied with our services. For individual customers, as of December 31, 2021 we ranked above peers in terms of: (i) customer general satisfaction, (ii) loyalty and (iii) recommendation, being among the two top ranked entities in Spain with a score of 7.6, 7.0 and 7.0 respectively, using the same scale from 0 to 10 in all the three ranks (*source: BMKS*).

Our customers' loyalty and trust results in long-lasting relationships, which our commercial efficiency turns into sales of our key products, being the basis of our differentiated revenue generation model.

The following table shows our customer tenure and average number of products for individual customers as of December 31, 2021:

	As of December 31, 2021	
	Customer tenure	**Average products**
	(%)	*(nº of products)*
Less than two years	5.6	3.7
Between two and 10 years	15.3	4.0
Between 10 and 20 years	26.2	5.7
More than 20 years	52.9	8.8
Total	100	7.0

The following table shows the penetration of our key products as of December 31, 2021:

	As of December 31, 2021		
	Mutual funds	**Pension funds**	**Risk insurance**
Total retail customers	12%	14%	29%
of which: Customers with at least €10,000 in retail customer funds[APM]	29%	24%	36%

Based on the type of customer, we divide our business activities in the following divisions: (i) Rest of Families, (ii) Personal Banking, (iii) Private Banking, (iv) Non-Real Estate Companies, (v) Real Estate Companies and (vi) Institutions, Public Sector and Others.

As of December 31, 2021, we had approximately 1.8 million customers, of which 73.3% were Rest of Families, 16.3% Personal Banking, 0.6% Private Banking, 5.0% Non-Real Estate Companies, 0.3% Real Estate Companies and 4.5% Institutions, Public Sector and Others customers, respectively.

8.1 Rest of Families

The Rest of Families customer segment comprises our largest customer segment and represents the main source and user of our lending and deposit-taking services, respectively. The management of the branch network in this segment focuses on capturing new customers and consolidating the relationship with and loyalty of existing ones. This is done through proposals adapted to our customers' personal needs, depending on the risk profile and disposable income of each customer.

Within our lending activity, we have historically specialized in financing housing for individuals.

Other products offered to our Rest of Families segment include ordinary banking products such as current and savings accounts, term deposits, credit and debit cards and consumer loans, as well as other products from the Financial Group such as mutual funds, pension funds and insurance products.

The Rest of Families customer segment, including both banking and asset management and life savings insurance funds, accounted for 28.21% (€27,938,483 thousand) of our retail business volume[APM] as of December 31, 2021 (30.02% (€28,335,778 thousand) and 31.72% (€28,640,895 thousand) as of December 31, 2020 and 2019, respectively).

8.2 Personal Banking

The Personal Banking customer segment includes individuals with a net worth (retail customer funds[APM] and securities) of between €100,000 and €500,000 in our Home Markets (and between €75,000 and €500,000 outside of our Home Markets).

This segment offers a management model based on a personal manager who assists customers in their financial planning, advises them on their investments, and gives them detailed information on the products and services that best meet their financial needs. Personal managers intend to offer customers the best investment strategy for their risk profile and preferences. Customers have their own digital banking service, preferential access to certain services and tailored products, making our service model a "one-stop premium shop".

As of December 31, 2021, our Personal Banking segment was managed by 426 full time managers, offering personalized solutions to 290,000 customers. In addition, 67 personal digital managers support 40,000 clients. The majority of specialized advisors assigned to this segment have a solid training, achieved through internal and external programs, recognized by well-known entities, such as the European Financial Planning Association. The Financial Group plays a key role in the product design of the Personal Banking segment, as does the Private Banking segment by training Personal Banking managers. The Personal Banking Service model has been certified by Aenor guaranteeing a best-in-class service to our customers. In fact, in 2020 we obtained the certification of service excellence management for the Personal Banking segment granted by Aenor, being the first Spanish financial institution to receive it. This certification is in addition to the certification for personal wealth management advice, also awarded by Aenor, which we hold since 2012.

The Personal Banking segment, including both banking and asset management and life savings insurance products, accounted for 44.52% (€44,083,588 thousand) of our retail business volume[APM] as of December 31, 2021 (44.11% (€41,628,359 thousand) and 43.40% (€39,190,883 thousand) as of December 31, 2020 and 2019, respectively).

8.3 Private Banking

The Private Banking customer segment is addressed to individuals with a net worth (retail customer funds[APM] and securities) in excess of €500,000 (€300,000 in Extremadura). This segment offers banking services to 11,000 customers who have more sophisticated banking needs and investment profiles, providing them with a specialized, personalized and high-quality service. Private Banking customers are advised by 76 specialized advisors and have access to all types of financial assets such as listed securities, mutual funds, variable capital investment companies (*Sociedades de Inversión de Capital Variable* or "**SICAVs**") or structured deposits. Private Banking customers, together with Personal Banking customers, are the main target of our asset management business.

The Private Banking segment, including both banking and asset management and life savings insurance funds, accounted for 8.57% (€8,485,750 thousand) of our retail business volume^{APM} as of December 31, 2021 (7.83% (€7,384,797 thousand) and 7.42% (€6,702,200 thousand) as of December 31, 2020 and 2019, respectively).

8.4 Non-Real Estate Companies

Our Non-Real Estate Companies banking services are focused on financing corporate activities including corporate loans, credit lines, financing of fixed assets and working capital, treasury management, insurance, leasing, factoring and interest rates hedging to companies outside the real estate sector.

As of December 31, 2021, our Non-Real Estate Companies customer segment offered services to almost 90,000 customers who were served by a team of 212 full-time specialized corporate account managers. The aim of these managers is to provide specialized solutions to these companies and give them comprehensive financial advice. In addition, we have 130 commercial business managers, a new position created in 2020, whose task is to manage our relationship with non-real estate companies with a turnover of less than €2 million.

Besides our branch network, we have eight business centers for non-real estate companies located in Zaragoza, Madrid, Barcelona, Valencia, Alicante and the Basque Country. These centers are responsible for the management of customers with a turnover of more than €6 or €10 million, depending on the area, and who require a higher degree of specialization.

The Non-Real Estate Companies customer segment, including banking, asset management, life savings insurance products and leasing and renting, accounted for 9.35% (€9,259,797 thousand) of our retail business volume^{APM} as of December 31, 2021 (9.28% (€8,758,179 thousand) and 8.77% (€7,917,827 thousand) as of December 31, 2020 and 2019, respectively).

8.5 Real Estate Companies

Our Real Estate Companies banking services are focused on financing corporate activities including corporate loans, credit lines, financing of fixed assets and working capital, treasury management, insurance, leasing, factoring and interest rates hedging to companies in the real estate sector.

Our Real Estate Companies customer segment served almost 6,500 customers as of December 31, 2021.

The Real Estate Companies customer segment, including banking, asset management, life savings insurance products and leasing and renting, accounted for 1.50% (€1,487,360 thousand) of our retail business volume^{APM} as of December 31, 2021 (1.46% (€1,375,268 thousand) and 1.64% (€1,479,057 thousand) as of December 31, 2020 and 2019, respectively).

8.6 Institutions, Public Sector and Others

Through the Institutions, Public Sector and Others customer segment, we cooperate with public and private entities at national and regional levels, which gives us access to this source of business and, at the same time, helps our customers in their dealings with the public authorities.

In the public sector, we cooperate with central, regional and local administrations under financing agreements, youth programs and sponsorships. In addition, we are actively engaged in the introduction and dissemination of systems for the handling of electronic payments and their administration, and we have agreements in place with different entities for the collection and management of taxes, handling of university enrolments and other administrative formalities.

We also develop a range of personalized services for private sector groups, including professional associations, members of the civil service, owners' associations and employees of large companies as well as members of condominium activities.

Our Institutions, Public Sector and Others customer segment served almost 81,000 customers as of December 31, 2021. This customer segment, including banking, asset management, life savings insurance products and leasing and renting, accounted for 7.85% (€7,769,962 thousand) of our retail business volume[APM] as of December 31, 2021 (7.30% (€6,884,367 thousand) and 7.05% (€6,366,291 thousand) as of December 31, 2020 and 2019, respectively).

9. Financial Group - Asset Management, Insurance and Leasing and Renting

The Financial Group was created in 1988 and consists of a group of subsidiaries specialized in the management of mutual funds and pension funds and our insurance and leasing-renting businesses.

The Financial Group offers a wide range of products aimed at our retail customers, complementing traditional banking products and services. Assets under management and bancassurance (which include mutual funds, pension funds and insurance products) generated 42.75% of our recurring revenues[APM] for the year ended December 31, 2021. For a breakdown of our recurring revenues[APM] by products, see "*Alternative Performance Measures*".

9.1 Mutual funds

Through Ibercaja Gestión S.G.I.I.C., S.A. ("**Ibercaja Gestión**") we manage our mutual funds. As of December 31, 2021, AuM by Ibercaja Gestión amounted to €18,367 million (€15,248 million and €13,981 million as of December 31, 2020 and 2019, respectively) (*source: Inverco*)[45], ranking sixth in its sector in Spain, with a market share of 5.78% (5.56%[46] and 5.06% as of December 31, 2020 and 2019, respectively) (*source: Inverco*).

The portfolio of Ibercaja Gestión includes a broad range of mutual funds adapted to particular market circumstances and investor risk profiles.

The following table shows the volume and distribution of Ibercaja Gestión's mutual funds, by type of fund, as of December 31, 2021, 2020 and 2019 (*source: Inverco*):

	As of December 31,					
	2021		**2020**		**2019**	
	Volume	*%*	*Volume*	*%*	*Volume*	*%*
			(€ thousands except %)			
Fixed income funds	6,610,918	36.0%	5,594,910	36.6%	4,840,920	34.6%
Equity funds	3,061,283	16.7%	2,341.420	15.4%	2,262,560	16.2%
Mixed funds	5,756,898	31.3%	5,378,220	35.3%	4,553,580	32.6%
Global funds	45,453	0.3%	47,290	0.3%	134,640	1.0%
Guaranteed funds	646,893	3.5%	834,880	5.5%	967,400	6.9%
Absolute return funds	2,245,422	12.2%	1,051,530	6.9%	1,221,920	8.7%

45 Inverco data reports the funds of Ibercaja Gestión while the mutual funds data recorded under asset management and life savings insurance funds[APM] includes, not only Ibercaja Gestión's funds but also the third party funds distributed by us among our private banking customers resulting in a mismatch between both metrics.

46 Inverco, with the publication of the April investment fund statistics, standardised the criteria for excluding the assets of funds that invest in the manager's own funds (funds of funds). This change led to a decrease in the overall assets of the system and a readjustment of quotas that raised Ibercaja Gestión's share at the end of December 2020 to 5.56%.

	As of December 31,					
	2021		2020		2019	
	Volume	*%*	*Volume*	*%*	*Volume*	*%*
			(€ thousands except %)			
Total[(1)]	**18,366,867**	**100.0%**	**15,248,250**	**100.0%**	**13,981,020**	**100.0%**

Notes:—

(1) The change in volume during a period is broken down into net subscriptions (as described in table below) plus the market effect.

The following table sets out net subscriptions, by type of fund, as of December 31, 2021, 2020 and 2019 (*source: Inverco*):

	As of December 31,		
	2021	2020	2019
		(€ thousands)	
Fixed income funds	1,008,211	461,023	(53,466)
Equity funds	199,045	(25,661)	(396,155)
Mixed funds	1,104,653	798,111	1,221,669
Global funds	(67,005)	(80,790)	(106,579)
Guaranteed funds	(176,241)	169,450	167,375
Absolute return funds	267,944	(155,581)	(97,961)
Total	**2,336,607**	**1,166,552**	**734,883**

Ibercaja Gestión offers fund portfolio management agreements to our customers, who benefit from a diversified basket of suitable mutual funds selected according to their particular risk profile. As of December 31, 2021, Ibercaja Gestión also managed 13 SICAVs (11 and 10 as of December 31, 2020 and 2019, respectively), with an equity of €72 million.

Mutual funds generated 21.80% of our recurring revenues[APM] in the year ended December 31, 2021 (16.93% and 17.86% as of December 31, 2020 and 2019, respectively).

In the 2021 edition of the Expansión-AllFunds Bank awards, Ibercaja Gestión was recognized as "Best Asset Allocation Manager" and was a finalist in the "Best National Manager" and "Best Fixed Income Manager" categories.

9.2 Pension funds

Through Ibercaja Pensión, E.G.F.P., S.A.U. ("**Ibercaja Pensión**") we manage our pension funds. As of December 31, 2021, AuM by Ibercaja Pensión amounted to €7,640 million (€7,010 million and €6,794 million as of December 31, 2020 and 2019, respectively) (*source: Inverco*)[47], ranking fourth in its sector in Spain, with a market share of 5.97% (*source: Inverco*).

[47] Inverco data refers to the position account of a fund that is defined as the totality of the consolidated rights of participants and beneficiaries. The position account results from the sum of the managed equity, mathematical provisions (for defined benefit pension plans) and funds pending transfer or rebalancing plan. Mathematical provisions are not included in our accounting, causing a mismatch between pension funds from Inverco data and pension funds data regarding asset management and life savings insurance funds[APM].

Ibercaja Pensión offers (i) fixed-income plans; (ii) mixed fixed-and-variable income plans; (iii) variable-income plans; (iv) global plans; and (v) guaranteed plans.

Ibercaja Pension manages assets under plans established by employers or by individuals. AuM in individual pension funds amounted to €3,090 million as of December 31, 2021 (€2,751 million and €2,574 million as of December 31, 2020 and 2019, respectively), ranking sixth in its sector in Spain with a market share of 3.46% (*source: Inverco*). AuM in employment plans amounted to €4,548 million as of December 31, 2021 (€4,258 million and €4,220 million as of December 31, 2020 and 2019, respectively), ranking third in its sector in Spain, with a market share of 12.04% (*source: Inverco*).

Pension funds generated 4.57% of our recurring revenues[APM] in the year ended December 31, 2021 (4.15% and 3.89% as of December 31, 2020 and 2019, respectively).

In the 2021 edition of the Expansión-AllFunds Bank awards, Ibercaja Pensión was a finalist in the category of "Best Pension Fund Manager", the sixth consecutive time it has been nominated and has won the award on four occasions. Likewise, PIP Sostenible y Solidario was a finalist for the fourth consecutive year in the "Best Solidarity Fund" category.

9.3 Insurance products

Our insurance business is carried out through two subsidiaries that operate in the life and non-life insurance segments.

Through Ibercaja Vida we manage our life savings insurance and life risk insurance products, which are brokered by Ibercaja Mediación. As of December 31, 2021, Ibercaja Vida ranked seventh in its sector in Spain in terms of volume of technical provisions (which include life savings insurance and life risk insurance technical provisions), which amounted to €6,775 million as of December 31, 2021 (€7,002 million and €7,379 million as of December 31, 2020 and 2019, respectively) (*source: ICEA*), and with a market share of 3.46% (*source: ICEA*).

The following table shows the volume of technical provisions[48] of Ibercaja Vida as of December 31, 2021, 2020 and 2019:

	As of December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Unearned premium reserve and current risks	23,260	22,475	22,856
Mathematical provisions[(1)]	4,956,650	6,031,161	6,965,422
Systematic savings plan	*2,531,442*	*3,425,307*	*4,243,124*
Temporary annuities	*2,234,835*	*2,404,384*	*2,509,009*
Others	*190,373*	*201,470*	*213,289*
Life insurance in which the investment risk is borne by the policyholders (Unit linked)	1,693,706	851,005	314,496
Unit linked mathematical provisions	*1,690,196*	*849,573*	*313,924*
Provisions for benefits pending payment	*3,510*	*1,432*	*573*
Benefits pending payment	96,109	92,728	71,710
Profit sharing and returned premiums	5,470	4,396	5,026

48 Mathematical provisions represent the value of the insurer's obligations net of the policy holder's obligations in relation to the life-risk insurance as of the dates indicated. They represent the difference between the actuarial present value of Ibercaja Vida's future obligations and those of the policyholder or, if applicable, the insured. Mathematical provisions are calculated on a policy-by-policy basis, using an individual system and applying a prospective method, taking as a basis for calculation the inventory premium accrued in the year. Mathematical provisions are calculated pursuant to the provisions of Royal Decree 2486/1998 on the organization and supervision of private insurance companies, Royal Decree 239/2007 and Order EHA/339/2007, as well as its subsequent amendments and the resolutions of the Directorate General of Insurance of July 6, 2012 and March 9, 2015.

	As of December 31,		
	2021	**2020**	**2019**
Technical provisions	**6,775,195**	**7,001,765**	**7,379,510**

Notes:—

Source: Ibercaja Vida's audited annual accounts as of December 31, 2021, 2020 and 2019.

(2) The difference between the mathematical provisions recorded in Ibercaja Vida's internal accounting records and audited annual accounts (€4,956,650 thousand, €6,031,161 thousand and €6,965,422 thousand as of December 31, 2021, 2020 and 2019, respectively) and the mathematical provisions in Note 20 to our Annual Accounts (€5,303,003 thousand, €6,551,263 thousand and €7,370,449 thousand as of December 31, 2021, 2020 and 2019, respectively) (see "*Risk Factors – Our insurance business is exposed to actuarial risk*"), corresponds to certain corrections for accounting asymmetries which are recorded in our Annual Accounts. The correction consists of symmetrically recognizing the changes in the fair value of financial assets related to the insurance business classified in the categories "Financial assets not held for trading mandatorily measured at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income" with liabilities for the same amount under the heading "Liabilities under insurance or reinsurance contracts". See Note 2.19 to our Annual Accounts for the explanation of this correction. The difference between technical provisions of Ibercaja Vida recorded in Ibercaja Vida's internal accounting records and audited annual accounts (€6,775,195 thousand, €7,001,765 thousand and €7,379,510 thousand as of December 31, 2021, 2020 and 2019, respectively) and the liabilities under insurance of reinsurance contracts included in Note 20 to our Annual Accounts (€7,121,494 thousand, €7,521,867 thousand and €7,784,537 thousand as of December 31, 2021, 2020 and 2019, respectively) corresponds to the abovementioned accounting correction to the mathematical provisions.

The following table shows Ibercaja Vida's premiums distributed per life savings insurance and risk insurance products for the years ended December 31, 2021, 2020 and 2019:

	For the years ended December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Premiums from life-risk insurance products.....................	75,549	73,606	75,209
Premiums from life savings insurance products.....................	825,974	883,695	862,247
Ibercaja Vida total premiums.	**901,523**	**957,301**	**937,456**

The premiums for insurance contracts detailed in the table above are presented in the income statement under the heading "Income from assets covered by insurance or reinsurance contracts", which amounted to €904,463 thousand, €960,230 thousand and €940,528 thousand as of December 31, 2021, 2020 and 2019, respectively. In addition, this item includes income from reinsurance which amounted to €2,940 thousand, €2,929 thousand and €3,072 thousand as of December 31, 2021, 2020 and 2019, respectively.

The fixed income portfolio of Ibercaja Vida amounted to €5,627 million as of December 31, 2021, of which 62.3% was Spanish public debt, 24.3% was private fixed income, 6.4% was related to public administrations and 7.0% was foreign sovereign debt.

Through Ibercaja Mediación we manage our general insurance brokerage business, principally non-life risk insurance products for individuals and companies but also life savings insurance products and life-risk insurance products.

Our insurance business (life savings insurance products and risk insurance) generated approximately 16.38% of our recurring revenues[APM] for the year ended December 31, 2021 (16.45% and 16.32% as of December 31, 2020 and 2019, respectively).

We offer two main types of insurance products:

9.3.1 Life savings insurance products

Ibercaja Vida offers products aimed at promoting long-term savings by our customers. It offers, among others, systematic savings policies, deferred capital policies, temporary annuities, investment savings plans, insured benefit plans, group insurance policies and unit linked policies.

Our life savings insurance products generated approximately 5.56% of our recurring revenues[APM] for the year ended December 31, 2021 (6.18% and 6.66% for the years ended December 31, 2020 and 2019).

The following table shows the number of life savings insurance policies and amount of premiums for the years ended December 31, 2021, 2020 and 2019:

	For the year ended December 31,		
	2021	**2020**	**2019**
Policies	446,418	489,335	531,554
Premiums *(€ thousands)*	825,974	883,695	862,247

The following table shows the distribution of the volume of mathematical provisions of life savings insurance products as of December 31, 2021, 2020 and 2019:

	As of December 31,					
	2021		**2020**		**2019**	
	(*€ thousands, except %*)					
Systematic savings plan	2,531,442	38.1%	3,425,307	49.8%	4,243,124	58.3%
Temporary annuities	2,234,835	33.6%	2,404,384	35.0%	2,509,009	34.5%
Unit linked policies	1,690,196	25.5%	849,573	12.3%	313,924	4.3%
Others(1)	186,621	2.8%	198,856	2.9%	210,978	2.9%
Total(2)	**6,643,094**	**100.0%**	**6,878,120**	**100.0%**	**7,277,035**	**100.0%**

Notes:—

Source: the information as of December 31, 2021, 2020 and 2019 has been obtained from Ibercaja Vida's audited annual accounts of the relevant period.

(1) The difference between "others" mathematical provisions of life savings insurance products included in this table (€186,621 thousand, €198,856 thousand and €210,978 thousand as of December 31, 2021, 2020 and 2019, respectively) and the "others" mathematical provisions recorded in Ibercaja Vida's internal accounting records and audited annual accounts (€190,373 thousand, €201,470 thousand and €213,289 thousand as of December 31, 2021, 2020 and 2019, respectively) corresponds to mathematical provisions associated to life risk insurance products.

(2) This amount is comprised of "Mathematical provisions" (€4,956,650 thousand, €6,031,161 thousand and €6,965,422 thousand as of December 31, 2021, 2020 and 2019, respectively) and "Unit-linked mathematical provisions" (€1,690,196 thousand, €849,573 thousand and €313,9244 thousand as of December 31, 2021, 2020 and 2019, respectively). It does not include mathematical provisions associated to life risk insurance products/The difference between "others" mathematical provisions of life savings insurance products included in this table (€186,621 thousand, €198,856 thousand and €210,978 thousand as of December 31, 2021, 2020 and 2019, respectively) and the "others" mathematical provisions recorded in Ibercaja Vida's internal accounting records and audited annual accounts (€190,373 thousand, €201,470 thousand and €213,289 thousand as of December 31, 2021, 2020 and 2019, respectively) corresponds to mathematical provisions associated to life risk insurance products. The difference between the mathematical provisions recorded in Ibercaja Vida's internal accounting records and audited annual accounts (€4,956,650 thousand, €6,031,161 thousand and €6,965,422 thousand as of December 31, 2021, 2020 and 2019, respectively) and the mathematical provisions in Note 20 to our Annual Accounts (€5,303,003 thousand, €6,551,263 thousand and €7,370,449 thousand as of December 31, 2021, 2020 and 2019, respectively) (see "*Risk Factors – Our insurance business is exposed to actuarial risk*") corresponds to certain corrections for accounting asymmetries which are recorded in our Annual Accounts. The correction consists of symmetrically recognizing the changes in the fair value of financial assets related to the insurance business

classified in the categories "Financial assets not held for trading mandatorily measured at fair value through profit or loss" and "Financial assets at fair value through other comprehensive income" with liabilities for the same amount under the heading "Liabilities under insurance or reinsurance contracts". See Note 2.19 to our Annual Accounts for the explanation of this correction.

9.3.2 Risk insurance products

As of December 31, 2021, we had more than 983,000 risk insurance policies and risk insurance premiums amounted to €284.1 million (€275.9 million and €276.1 million as of December 31, 2020 and 2019, respectively). Risk insurance products generated 10.82% of our recurring revenues[APM] for the year ended December 31, 2021 (10.27% and 9.66% for the years ended December 31, 2020 and 2019). We offer two types of risk insurance products:

(i) *Life-risk insurance products*. Ibercaja Vida manages insurance policies, related and unrelated to credit transactions, in which the beneficiary receives financial compensation in the event of a loss (death or disability), which are brokered by Ibercaja Mediación. The new production of life-risk insurance products[49] increased from €6,131 thousand for the year ended December 31, 2020 to €9,374 thousand for the year ended December 31, 2021 (€6,997 thousand for the year ended December 31, 2019).

The table below shows the amount of life risk insurance premiums for the periods indicated:

	For the years ended December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Life risk insurance premiums	77,776	75,770	77,848
Of which: Ibercaja Vida[(1)]	72,700	70,727	72,405

Notes:—

(1) In addition, Ibercaja Vida generates premiums for approximately €3 million in group risk insurance linked to the pension plan for Ibercaja Banco employees.

(ii) *Non-life risk insurance products*. We offer these products through Ibercaja Mediación, which acts as an insurance broker.

The table below shows the amount of our non-life risk insurance premiums for the periods indicated:

	For the years ended December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Non-life risk insurance premiums..................................	206,360	200,085	198,273
Of which: CASER agreement	183,147	*171,800*	*169,752*

In 2012, we reached a strategic agreement with CASER for us to exclusively market CASER's non-life risk insurance products through our branch network (see "*—Material contracts—CASER Agency Agreement*" below). In the period between December 31, 2020 and December 31, 2021, the premiums associated to these products grew by 6.6% and as of December 31, 2021 they amounted to €183 million, which represented 89% of our non-life risk insurance premiums as of such date. New non-life risk insurance products under the

[49] The new production of life-risk insurance products refers to the premiums (expressed in annual terms as these are insurance policies which are renewed on an annual basis) of our life-risk insurance policies which effective date is within the relevant time limits (i.e. for the years ended December 31, 2021, 2020 and 2019, the period starts on January 1, 2021, 2020 and 2019, respectively, and ends on December 31, 2021, 2020 and 2019, respectively).

CASER Agency Agreement increased from €26,002 thousand for the year ended December 31, 2020 to €37,866 thousand for the year ended December 31, 2021 (€29,391 thousand for the year ended December 31, 2019).

9.4 Leasing and Renting

Through Ibercaja Leasing y Financiación, S.A., Establecimiento Financiero de Crédito ("**Ibercaja Leasing**") we manage our leasing and renting arrangements. It provides products to enable SMEs and professionals to finance their fixed-asset investments and to use equipment under operating leases.

Leasing and renting generated 1.25% of our recurring revenues[APM] for the year ended December 31, 2021 (1.35% and 1.09% for the years ended December 31, 2020 and 2019, respectively).

As of December 31, 2021, the outstanding risk was €562 million (€561 million and €619 million as of December 31, 2020 and 2019, respectively), which ranked Ibercaja Leasing as eighth in its sector in Spain, with a market share of 2.86% (*source: Asociación Española de Leasing*).

The NPL ratio of Ibercaja Leasing was 1.93% as of December 31, 2021 (2.65% and 2.40% as of December 31, 2020 and 2019, respectively), lower than the sector average of 6.89%[50] (*source: Bank of Spain Statistical Bulletin*).

10. Distribution channels

Our omnichannel strategy is aimed at bringing services closer to customers so that they can use them at any place and time. Our aim is to integrate traditional and new channels while maintaining the ongoing and trusting relationship accomplished by personal contact. New contents and technological innovations are regularly being added so that remote banking services can be accessed through different devices such as tablets and smartphones. We are currently implementing a digital transformation process with the aim of incorporating the leading technological solutions to our business (see "*–Digital transformation*").

The following table shows the percentage of transactions carried out by each of our distribution channels in the years indicated therein:

	As of December 31,		
	2021	**2020**	**2019**
Digital channels[(1)]	74.3%	76.0%	72.0%
Branch network	10.0%	9.6%	12.8%
PoS terminals	13.0%	11.4%	11.0%
ATMs and other methods of payment	2.7%	3.0%	4.2%
Total	**100.0%**	**100.0%**	**100.0%**

Notes:—

(1) Through the Ibercaja website and the Ibercaja App.

10.1 Branch network

Our branch network is the cornerstone of our omnichannel distribution model. We have a national branch network, significantly covering our Home and Growth Markets. Branches are the basic instrument of customer relations, providing a close, personalized, quality service. Our branch network is broad, covering all our markets, and is supported by alternative channels. In recent years, we have adapted our traditional customer service to new market requirements through the incorporation of technological support and management changes in order to streamline the relationship with our customers. In December 2020, as part of the 2021-

[50] This average is not calculated by us. It is published through the Bank of Spain Statistical Bulletin and is defined as doubtful assets of credit to the private sector over credit to the private sector.

2022 Redundancy Plan, we reached an agreement to close up to 199 branches which is to be implemented through June 30, 2022. In 2021 we closed 117 branches with no material cost associated.

As of December 31, 2021, we had 914 branches in 50 Spanish provinces. 63.90% of our branches are located in our Home Markets (584), 27.46% are located in our Growth Markets (251) and 8.64% are located in the Rest of Spain (79). The geographical distribution of our branches across the various autonomous regions of Spain as of December 31, 2021, 2020 and 2019, respectively, was as follows:

	As of December 31,					
	2021		**2020**		**2019**	
	Total	**Of which rural branches (1)**	**Total**	**Of which rural branches (1)**	**Total**	**Of which rural branches (1)**
Andalusia	28	0	29	0	29	0
Aragon	333	147	375	164	376	165
Principality of Asturias	2	0	3	0	3	0
Balearic Islands	2	0	2	0	2	0
Basque Country	3	0	3	0	3	0
Canary Islands	2	0	2	0	2	0
Cantabria	1	0	1	0	1	0
Castile-La Mancha	56	18	59	16	59	15
Castile and León	70	28	78	28	78	27
Catalonia	70	14	88	24	89	24
Extremadura	87	18	94	21	100	26
Galicia	5	0	6	0	6	0
La Rioja	60	28	64	25	90	52
Madrid	135	0	160	0	179	0
Murcia	6	0	6	0	6	0
Navarre	8	2	8	2	8	1
Valencian Community	46	0	53	0	53	0
Total branches	**914**	**255**	**1,031**	**280**	**1,084**	**310**

Notes:—

(1) Branches that are present in rural areas with low population and which serve to one or more towns. In some areas, due to the low volume of activity, we are the only entity providing services. Our rural branches have a limited cost base as our opening hours are very limited. Usually, rural branches employees work in several branches during the same week.

Our network structure includes full-service branches, branches that provide personalized services, corporate centers, Branches+ (branches in markets with high growth potential in the Personal Banking, Private Banking and Companies Banking segments) and Agro branches (branches with a range of specialized products customized for rural areas). Managers specializing in corporate, personal and private banking support the network, providing additional high-value services.

As of December 31, 2021, we had 659 city branches and 255 rural branches. Rural branches are concentrated in rural areas and have a very efficient cost structure. City branches are the main focus of our branch network optimization process through branch combinations, job specialization, new relational channels and commercial features and branch closures.

We are also improving our commercial effectiveness by the specialization of our employee base and the implementation of a new management model (see "*Business – Strategy*"). As of December 31, 2021, we had 212 employees specialized in corporate banking, 426 in our Personal Banking customer segment and 76 in our Private Banking customer segment. In addition, we had 83 digital managers (67 in our Personal Banking customer segment and 16 in our Private Banking customer segment).

The branch network optimization process also involves offloading back-office and self-service transactions from branches and digitalizing the relationship model. As of the date of this Registration Document, we have 122 digital managers serving 94,388 customers. Following a differential model based on our customers' global finance, digital managers have the same sales and assessment capacity than face-to-face managers but the number of customers each digital manager can serve is multiplied by three with respect to a face-to-face manager, which results in an important improvement in terms of savings for us.

10.2 Digital Channels

We offer our customers access to online services and products through several remote channels. Customers can operate through our online banking platform ("**Ibercaja Directo**"), Ibercaja App and Ibercaja Pay. The situation created by the COVID-19 pandemic has accelerated the use of virtual services and digital assets. The digitalisation strategy that we have been implementing in the last few years has enabled us to respond to the greater demand for online services, while maintaining the quality service. See "*Business – Digital Transformation*". As a result, 74.3% of our customers transactions are carried out through digital channels.

10.3 ATMs and other methods of payment

We have an extensive network of ATMs that allows customers to carry out usual transactions such as obtaining cash and information on account balances or movements, paying bills, activating cards, recharging mobile phones and buying shows and sports events tickets.

We had 1,172 ATMs as of December 31, 2021 (1,287 and 1,316 as of December 31, 2020 and 2019, respectively), with a market share in Spain of 2.4% (2.6% and 2.6% as of December 31, 2020 and 2019, respectively) (*source: Sociedad, Sistema de Tarjetas y Medios de Pago, S.A.*). As of December 31, 2021, as part of our ATM replacement scheme, 82% of our ATMs had been replaced. The new software installed in our ATMs offers a design homogeneous with the rest of our distribution channels and allows the access to the ATM through contactless cards o mobile phones, selection of bills in cash withdrawals, payment of taxes with cards from other banks and the management of direct debits.

We had 1,562,130 activated cards (including pre-payment, debit and credit cards) as of December 31, 2021 (1,608,221 and 1,570,167 activated cards as of December 31, 2020 and 2019, respectively) with a total value of €5,547 million[51] (€4,704 million and €4,495 million in 2020 and 2019, respectively). Our market share in Spain in terms of turnover volume was 2.3% as of December 31, 2021 (2.3% and 2.2% as of December 31, 2020 and 2019, respectively) (*source: Sociedad, Sistema de Tarjetas y Medios de Pago, S.A.*). In January 1, 2018 and September 2019, we entered into strategic alliances with Visa and Mastercard, respectively, to improve our positioning in the retail and corporate card issue businesses, respectively, and to increase our business volume obtained through this channel.

10.4 Point-of-Sale terminals

We had 34,044 point-of-sale ("**PoS**") terminals at stores throughout Spain as of December 31, 2021 (31,910 and 29,640 as of December 31, 2020 and 2019, respectively). PoS terminals are particularly suitable for self-employed individuals and professionals who are required to deliver services "on the go". As of December 31, 2021, our PoS market share in Spain stood at 1.5% (1.5% and 1.5% as of December 31, 2020 and 2019, respectively) (*source: Sociedad, Sistema de Tarjetas y Medios de Pago, S.A.*). All our PoS terminals are adapted to operate with contactless technology. In September 2018, we reached an agreement with the Ingenico group for the maintenance of our existing PoS and the rental and maintenance of new PoS.

---

[51] Represents the amount of purchases carried out with the card and therefore excludes cash withdrawals at ATMs.

11. Digital transformation

In 2016, we initiated a digital transformation process to benefit from the opportunities of the technology and the digital economy. We are focused on four key areas:

- Positioning and attraction: evolve our approach to the market in order to gain notoriety and attraction, offering trust and accompaniment to our clients and transmitting our values;
- Clients: achieve greater benefits for our customers in order to enhance our relationship with users, which translates into greater loyalty, a more efficient relationship and more opportunities to sell our products;
- People: preserve the human factor as one of our greatest strengths, allowing people to drive the change by implementing new processes and tools; and
- Processes and technology: incorporate the processes and technology required to materialize the targets set, as well as to improve our ability to adapt which will allow us to achieve these objectives in a sustainable, flexible and scalable way.

Since 2016, we have made good progress in developing all of our digital assets (improving user experience and functionalities), evolving the way we attract and interact with our customers, changing the way we work and collaborate, both internally and externally, improving our data analytics capabilities and becoming, from a process and IT perspective, a more efficient and agile bank. In relation to our IT budget, 40% is spent in operation and maintenance and the rest is used for transformation, with the latter experimenting an upward trend.

We also continue to invest and enhance our cybersecurity models as an integral part of our digital transformation (approximately 5% of our IT budget is spent in cybersecurity and technology risks). We use a dedicated and specialized Security Operations Center to monitor our cybersecurity health in real time, leveraging top security technologies. Given our technology strategy with Microsoft as strategic alliance partner, Microsoft is also an integral part of our cybersecurity strategy as we are able to use its latest innovation and technology solutions.

Since 2019, we have increased our number of digital customers by 14.8%, primarily due to an 39.6% increase in Ibercaja App users since that year. As of December 31, 2021, transactions through remote channels represented 74.27% of our total transactions, compared to 72.03% as of December 31, 2019. In addition, the digitalization process has resulted in more flexible and efficient operating models that allow us to use our resources more efficiently, to achieve greater flexibility and scalability with capacity on demand, to offload installed capacity in branches and corporate services and to transform and redesign processes. As of December 31, 2021, day-to-day transactions in branches had decreased by 46.78% since 2019 (equivalent to 187.6 full time employees).

In 2020, our capital expenditure (CapEx) for the digitalization process was €59 million. With our "Plan Desafío 2023" Strategic Plan we aim to achieve better results speeding up our digital transformation process and to focus on an enhanced sales culture. We aim to increase our sales by (a) establishing an information environment for sales decision making, (b) optimizing our main channel for sales (*gestor*), (c) developing and improving all of our sales remote channels, (d) setting a distinctive positioning and (e) displaying such positioning in every interaction with our customers. We aim to achieve 790,000 Ibercaja App users[52] by 2023 (compared to 603,459 as of December 31, 2021) and digital sales representing 45% of our total sales (compared to 36.4% as of December 31, 2021). As of December 31, 2021, investments made for these purposes amounted to €75 million. Our budget for 2022 for these purposes amounts to €100 million.

---

[52] Ibercaja App users are those customers that have used the app through identified access at least once in a month.

Digital Assets

We offer our customers access to online services and products through our digital assets: Ibercaja Directo, Ibercaja App and Ibercaja Pay. As of December 31, 2021, the number of digital customers (number of customers who have used our digital assets at least once in the last month) was approximately 878,818 (842,486 and 765,585 as of December 31, 2020 and 2019, respectively). Our customers are very satisfied with our digital assets. As of December 31, 2021, Ibercaja App ranked first among peers in Play Store (4.7 stars) and Apple Store (4.5 stars) (*source: weighted average between the scores received from the users of Android and IOS Apps*)[53].

Ibercaja Directo provides options tailored to different customer segments, with specific versions for retail and business customers, young people and stores.

The Ibercaja App was launched in 2016 and was the first development of Ibercaja in association with Microsoft. The Ibercaja App's design facilitates browsing, optimizes existing transactions, allowing faster and simpler use, and includes other alternatives such as loan requests, instalment plans for purchases, card limit changes and card activation. In 2017, the Ibercaja App was upgraded to incorporate personal finance management service in collaboration with Meniga, an Icelandic Fintech company. Digital onboarding is available since November 2018. In 2020, we implemented a "beginners' mode" which facilitates the execution of all types of transactions by our customers in an easy and intuitive manner. We believe that the final result is satisfactory and the rate of growth in new users has increased significantly. The number of users of the Ibercaja App (customers that have used the Ibercaja App in the last month) has increased from approximately 432,211 users as of December 31, 2019 to approximately 603,459 users as of December 31, 2021. According to the FRS INMARK retail report, we scored 71.5% in mobile banking satisfaction in 2021.

The Ibercaja Pay application has been upgraded to complement the Ibercaja App. It allows the integration of the purchase process in physical stores and payment between individuals (P2P) through the Bizum platform. The number of users of Ibercaja Pay (customers that have used Ibercaja Pay in the last month) has increased from approximately 86,040 users as of December 31, 2019 to approximately 322,975 users as of December 31, 2021.

12. Competition

Historically, there has been significant competition in the Spanish retail banking sector. Since the start of the global financial crisis in 2007, the Spanish banking sector has undergone unprecedented consolidation and a large number of banks and savings banks have merged, resulting in a decrease in the number and increase in size of active banks. Greater capital levels, stricter regulatory provisioning requirements, and strong pressure on profitability, among other factors, have continued to underpin the domestic consolidation process among Spanish institutions with the aim of gaining critical mass and scale, maximizing efficiency and reinforcing their balance sheets. In the current low interest rate environment, Spanish banks are still facing significant pressure on profitability along with subdued loan growth, which has resulted in increased competition for credit origination and fee and commission income.

Our main competitors in our Home Markets are CaixaBank and Grupo Caja Rural, based on the number of branches as of September 30, 2021 (with 308 and 210 branches, respectively, in these markets (*source: Registry of supervised entities branches, Bank of Spain, latest available data*)). Other nationwide banking entities such as Banco Santander, BBVA and Sabadell also compete with us in both our Home Markets and our Growth Markets, as well as in the Rest of Spain, based on the number of branches. The entry of online banks and FinTechs into the Spanish banking system has further increased competition, mainly in deposit-taking and off-balance sheet products. Insurance companies and other financial services firms also compete for customer funds.

---

[53] The calculation of the score is a weighted average between the scores received from users of the Android and IOS Apps (weighting each score by 50%). We have calculated the weighted average of our peers.

In addition, other competitors include shadow banks, non-traditional providers of banking services, such as Internet based e-commerce providers, mobile telephone companies and internet search engines. See "*Risk Factors—Increased competition in the markets where we operate may adversely affect our growth prospects and operations*".

13. Property, plant and equipment

The following table shows the number of owned and leased branch offices as of December 31, 2021, 2020 and 2019.

	As of December 31,		
	2021	**2020**	**2019**
Number of branches owned	300	333	345
Number of branches leased	523	596	636
Number of branches leased-back	91	102	103
Total	**914**	**1,031**	**1,084**

As of December 31, 2021, there were no liens or encumbrances on any of our assets classified as property, plant and equipment.

14. Technology

We believe that technology is a great competitive advantage to achieve the best value proposition, customer experience and operational efficiency and, therefore, for the development of our business. We are focused on the strategic alignment of our business with our technology to generate customer-oriented solutions. In addition, technology is key to being flexible and rapidly adapting to an increasingly changing and uncertain environment.

To this end, we maintain high standards of information protection and security, being our aim to use the best available technologies and capabilities at all times.

Our in-house information technology (IT) department manages our technology infrastructure, information systems and their operation. This internal management is complemented by the support of specialized third-party suppliers who provide hardware, software and specialized technological services.

The operation and service of our technology infrastructure are based on two own data processing centers (CPDs), for which contingency systems and procedures are available to ensure high accessibility and service quality and which are regularly monitored and tested. Our primary systems are backed up to a secondary data processing center, in near-real time, which allows it to act as our primary system in case a contingency arises. In addition, security copies are kept for safekeeping and can be retrieved when needed.

Our most relevant technology and service providers are:

- Fujitsu, which provides and maintains the vast majority of the base hardware and software used on our main servers. Fujitsu is also the provider of the hardware, service and operation of our ATMs.
- Microsoft is our strategic partner in our digital transformation process by virtue of a collaboration agreement entered into on May 2016. Microsoft provides the technology for informational platforms and channels, as well as operating system software and database for our open system servers. It also provides the base software and applications for our workstations.
- Hewlett Packard Enterprise (HPE) is our main provider for technological infrastructure of servers and open systems.

- In terms of data communications, we have a dual network and provider strategy in all our branches, which ensures greater availability and service quality. It is supported by two operators, Telefónica and Vodafone.
- Telefónica is the provider of fix-line voice communications and Vodafone of mobile-line voice communications.
- Other significant providers of specialized technological services are Ingenico for the rental and maintenance of PoS terminals, IECISA for the provision and maintenance of workstations and Solitium/HP for the provision and maintenance of corporate printing services.

15. Corporate culture and Sustainability

15.1 Corporate culture

Since our inception, our culture of being a financial entity rooted to the territory where we are located, born to encourage savings and with a desire to help society, is still very present in our day-to-day operations. Our corporate culture reflects our commitment to society and the environment.

Our corporate purpose is "helping people build their life story because their story will become ours".

15.2.1 Mission

Our mission is to contribute to improving the lives of families and businesses, helping them to manage their finances by offering comprehensive and bespoke financial services, improving and offering the most innovative products and helping them achieve their financial targets.

15.2.2 Corporate values

Our corporate values include a personal touch, professionalism, commitment, excellence, soundness and the ability to adapt to our environment.

Since our incorporation, we have shown our capability to adapt to the changes affecting our industry and environment thanks to the solidity and strength of our founding principles, which are captured in our corporate values.

15.2.3 Vision

Our vision is to be an excellent and better bank every day anticipating our stakeholders' needs.

Our commitment to our clients underpins our day-to-day operations with a view to offering an excellent and quality service.

15.2.4 Ethical code

The ethical code is an important piece of our corporate culture, which reflects how our values are reflected in our daily activity. Our ethical code includes the ethical commitments that govern the behavior of all the people who are part of our institution, promoting a professional, committed, capable of adapting, solid and excellence-oriented behavior that emphasizes our relationships with our clients.

15.2 Sustainability

We are firmly committed with the United Nations Sustainable Development Goals ("**SDGs**") of the 2030 Agenda and we are a signatory of the United Nations Principles for Responsible Banking to advance in the setting up of a sustainable banking system.

The challenge that we have taken on is to ensure that our business objectives promote sustainable development, preserving natural resources and promoting a fairer and more inclusive society. In order to do this, we are progressing with the integration of ESG (environmental, social and good governance) aspects in our strategy and decision-making processes.

Our sustainability strategy is based on five pillars:

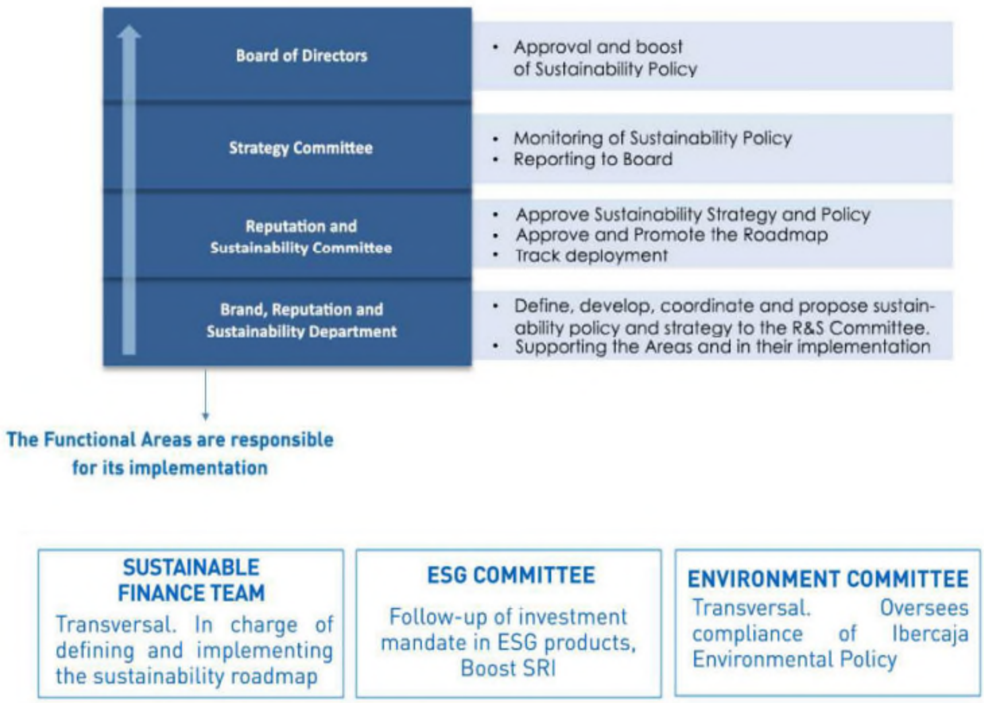
- ESG risks: identification and management of ESG risks for their gradual integration into our global risk analysis.

- Sustainable business: analyzing needs and identifying opportunities for business development to accompany clients in the transition to a sustainable economy, including climate change.
- People: comprehensive development of employees, providing them with adequate training and promoting a work, personal and family life balance.
- Transparency for all of our stakeholders, promoting communication of both financial and non-financial aspects of our business.
- Protection of the environment and its resources, mitigating climate change and favoring the development of a more inclusive and egalitarian society.

In December 2020, the Board of Directors approved our sustainability policy, as a declaration of our firm desire to contribute to the development of a more sustainable economy and financial activity, aligned with the principles, guidelines and current regulations on ESG. This sustainability policy demonstrates and formalises our commitment to sustainable development and value creation through our activity. Furthermore, it establishes our global action framework in sustainability matters, setting forth the commitments voluntarily assumed by us with our stakeholders to promote long-term sustainable, inclusive and environmentally-friendly growth.

The amount spent and invested by our brand, reputation and sustainability unit since 2019 exceeds €1.35 million.

We have implemented a governance structure that we believe will allow us to achieve our sustainability objectives:



15.2.1 Equality

We are committed to equality between men and women and we have set up the goal that 40% of our management positions will be held by women by 2023 (as of December 31, 2021, 31.3% of our senior managers were female).

15.2.2 Contribution to society

Through the Ibercaja Foundation, we promote equal opportunities. The Ibercaja Foundation uses the amounts received from our dividend distributions to develop certain projects to contribute to society. In 2021, the Ibercaja Foundation contributed over €14 million to social activities which benefitted approximately one million individuals (through its own projects and through projects carried out in collaboration with other entities).

In 2021, the Ibercaja Foundation continued with its purpose to improve the financial culture of the population by means of carrying out the eighth edition of the National Financial Education Plan, which is part of the financial education plan led by the Bank of Spain and the CNMV. On the basis that financial education is key to any individual's independence at any stage of life, the National Financial Education Plan offers resources directed at different groups and ages with the aim to provide basic financial education on a continous basis and to respond to different needs.

Furthermore, the corporate volunteer programs are one of our priorities, encouraging social action through our employees. In 2021, 250 of our employees participated in volunteer programs.

15.2.3 Environment

We have made the commitment to protect the environment and fight against climate change, taking into consideration the environmental impact of our own installations as well as that of our financial activity.

Since 2020, we are neutral in terms of CO^2 emissions (including scope 1 and 2 emissions[54]) and all the energy we use is green. In 2021, we achieved the award "Calculo-Reduzco", granted by the Climate Change Office of MITECO. The reports on our carbon footprint are available on our corporate website (www.ibercaja.com). In addition, we have been awarded with the ISO 14001 certificate in environmental management since 2007.

We are part of the UNEP-FI United Nations Environment Programme Finance Initiative, which seeks to promote private sector financing for sustainable development by fostering a financial sector that positively impacts people and the planet. In addition, Ibercaja Pensión and Ibercaja Gestión are signatories of the United Nations Principles for Responsible Investment (UNPRI) and have joined the Carbon Disclosure Project engagement platform, a non-profit organization that manages a system for companies to disclose environmental information to investors to better manage their environmental impacts.

In 2019, we acceded to the recommendations of the Task Force on Climate Related Financial Disclosures (TCFD), as a guide for the preparation of climate-related information. In addition, in 2019 we signed the Collective Commitment to Climate Action together with the main Spanish credit institutions, with the aim of measuring the carbon footprint of their balance sheets and reducing the climate impact of their financial activity. Together with the Spanish Banking Association (AEB), CECA and ICO and the other member credit institutions, we are analysing possible methodologies in order to make progress towards this objective.

In the year ended December 31, 2021 our sustainable investments[55] amounted to €2,105 million (of which €1,432 million were investment funds, €669 million were individual pension funds and €4 million were SICAVs) increasing by €1,254 million compared to December 31, 2020. Our sustainable investment funds include (i) Ibercaja Sostenible y Solidario, (ii) Ibercaja Megatrends, (iii) Ibercaja New Energy and (iv) Ibercaja Renta Fija Sostenible. Our sustainable pension funds include (i) Ibercaja Pensiones Europa Sostenible, (ii)

[54] Direct emissions (scope 1), energy indirect emissions (scope 2) and other indirect emissions (scope 3).

[55] The parameters by which sustainable investments are defined are those set forth in Article 8 of the EU Sustainability Disclosure Regulation for the Financial Services Sector (2019/2088) ("**SFDR**"). A fund as defined in Article 8 is a fund that "promotes environmental and social characteristics" provided that the investee companies follow good governance practices. In the SFDRs of each fund we are required to, and we inform that these funds fall under Article 8.

Ibercaja Pensiones Megatrends, (iii) Ibercaja Pensiones Confianza Sostenible and (iv) Ibercaja Pensiones Sostenible y Solidario. Our sustainable SICAV is Asguard, launched in 2021.

In the context of our sustainable finance strategy, we have implemented new green financing products addressed to individuals and corporates with the aim to improve the energy efficiency and accessibility of buildings, as well as products to implement Next Generation funds.

In April 2021, we signed the Net Zero Banking Alliance (NZBA) of the banking sector, promoted by the United Nations and UNEP-FI, setting out the objective to be carbon neutral by 2050. In 2021 we joined the Net Zero Asset Managers initiative, with the commitment to reach neutrality of own emissions and the emissions of their portfolios by 2050.

Our sustainability strategy has as a priority the identification, management and monitoring of climate and environmental risks, for their progressive incorporation into our global risk framework.

During 2021, we have incorporated ESG aspects into the policies and procedures manuals of credit, operational, liquidity and market risks, in order to take them into account in the management and control activity.

We are also working on the integration of climate and environmental risks in the processes of the RAF and the Capital and Liquidity Self-Assessments, considering the supervisory expectations of both the ECB and the EBA.

15.2.4 Employees

We are a family-responsible company, actively working to reconcile our employees' family, personal and work life.

In 2019, we obtained the FRC certification as a "family-responsible company", granted by the foundation Más Familia. This certification acknowledges companies that are committed with their employee's well-being and which encourage the active management of reconciliation and equality. We have a FRC Plan, which sets forth lines of action and objectives to promote an effective harmony between the personal, family and work spheres, based on the principles of efficiency, flexibility and responsibility.

16. Employees

The following table sets forth the number of employees of the Group as of December 31, 2021, 2020 and 2019, respectively. As of such dates, all of our employees were based in Spain.

	As of December 31,		
	2021	**2020**	**2019**
Employees in our banking business (Ibercaja Banco).	4,587	5,055	5,053
Employees in our Financial Group (Ibercaja Gestión, Ibercaja Pensión, Ibercaja Vida, Ibercaja Mediación and Ibercaja Leasing)..	161	153	150
Employees in other subsidiaries	132	99	101
Group employees	**4,880**	**5,307**	**5,304**

The following table sets forth the breakdown of our Group employees by gender as of December 31, 2021, 2020 and 2019.

	As of December 31,		
	2021	**2020**	**2019**
Men	2,456	2,760	2,741
Women..	2,424	2,547	2,563

	As of December 31,		
	2021	**2020**	**2019**
Group employees	**4,880**	**5,307**	**5,304**

The following table sets forth the number of our branch network employees (not including the employees of central services and subsidiaries) and the distribution of network employees by markets as of December 31, 2021, 2020 and 2019.

	As of December 31,		
	2021	**2020**	**2019**
Home Markets	2,051	2,358	2,383
Growth Markets	1,334	1,409	1,441
Rest of Spain	430	450	451
Network employees	**3,815**	**4,217**	**4,275**

In December 2020, we reached an agreement with the employees' representatives to carry out the 2021-2022 Redundancy Plan. See "*—2021-2022 Redundancy Plan*". As of December 31, 2021, we had reduced our workforce by 525 employees and we had closed 117 branches.

Provisions recognized in connection with the 2021-2022 Redundancy Plan resulted in staff expenses amounting to €151,041 thousand which were recorded in our income statement for the year ended December 31, 2020. In 2021, we recorded an additional expense of €12,842 thousand.

Compensation policy

Our current compensation policy is aligned with the standards set by the Financial Stability Board ("**FSB**") and the regulations of the EU, according to the requirements set by the Bank of Spain. The general compensation policy also complies with the conditions set by the agreement with our workers union, our strategy and the internal employment agreements we have with labor union representatives. This policy is based on the responsibility held by the employee and the professional evolution of each person, and attempts to avoid discrimination of any kind.

Our compensation practices have the goal of talent attraction and retention, and, in general, adequate compensation for the work of each employee, both from the point of view of the results achieved and the behavior of the employee and methods used in attaining those results.

17. Material Contracts

17.1 Ibercaja Foundation Services Agreement

On December 22, 2011, Ibercaja Banco entered into a services agreement with the Ibercaja Foundation (the "**Initial Ibercaja Foundation Services Agreement**"). According to its terms, the Initial Ibercaja Foundation Services Agreement should terminate if the Ibercaja Foundation ceased to have control (as defined under article 42 of the Spanish Commercial Code (*Código de Comercio*)) over Ibercaja Banco. On December 20, 2019 Ibercaja Banco and the Ibercaja Foundation entered into a new services agreement in order to replace the Initial Ibercaja Foundation Services Agreement in its entirety and which entered into force on January 1, 2020 (the "**Ibercaja Foundation Services Agreement**"). The services to be provided and their financial conditions are annually renewed and updated, if applicable, through amendments to the Ibercaja Foundation Services Agreement. The last amendment to its financial conditions was made on October 29, 2021. The services to be provided by Ibercaja Banco under the Ibercaja Foundation Services Agreement comprise, among others, marketing assistance, tax and accounting advising, management of all information related to data protection regulation and IT services. In turn, the Ibercaja Foundation provides certain services which are detailed in separate agreements, such as, the transfer of the usage of certain facilities to store information, renting other amenities and artistic heritage, organizing corporate volunteering and in general performing activities to promote Ibercaja Banco's reputation. In addition, the agreement also determines the general framework for collaboration in matters of social responsibility, establishes information channels between the Foundation and Ibercaja Banco, and enacts the rules and criteria applicable in the tax consolidation process. In the event that the Ibercaja Foundation reduces its stake in Ibercaja Banco's share capital under 20%, the Ibercaja Foundation Services Agreement will be automatically terminated. For further detail on the services provided under the Ibercaja Foundation Services Agreement see "*Related Party Transactions—Related party transactions with our shareholders*".

17.2 CASER Agency Agreement

On December 21, 2012, Ibercaja Mediación entered into an agency agreement with CASER for the distribution of non-life risk insurance products on an exclusive basis (as amended on June 12, 2014, December 14, 2017 and January 23, 2020, the "**CASER Agency Agreement**").

The purpose of the CASER Agency Agreement is the collaboration between Ibercaja Mediación and CASER to promote, distribute and sell, on an exclusive basis, CASER's non-life risk insurance products in the Spanish territory through our branch network.

The term of the CASER Agency Agreement is 25 years commencing on January 23, 2020 (the "**Effective Date**"). It can be terminated (i) only after 10 years from the Effective Date have elapsed, by Ibercaja Mediación with 30 days' prior notice or (ii) at any time, upon the occurrence of certain events (including certain change of control events affecting either party and breach of obligations of either party), in each case with the corresponding indemnity obligations set out therein. The formula for calculating such indemnities varies depending on when the triggering event arises. Upon the termination of the CASER Agency Agreement (including by the end of the term of the agreement), we have a call option to acquire all the CASER non-life risk insurance products commercialized through our brokerage, which would be exercised by Ibercaja Mediación, other entities within the Group or the insurance company designated by Ibercaja Mediación in the 36 months following the termination of the agreement through a written notice to CASER. The risk insurance products would necessarily be acquired by an insurance company which is authorized to hold the portfolio. If the call option is exercised and CASER's negligence prevents the transfer of the portfolio of non-life risk insurance products, CASER must indemnify Ibercaja Mediación with 25% of the premiums issued by Ibercaja Mediación in the fiscal year prior to CASER's negligent conduct.

In the year ended December 31, 2021, the non-life risk insurance premiums written in the context of the CASER Agency Agreement amounted to €183 million, which represented 89% of our non-life risk insurance premiums.

Pursuant to the last amendment of the CASER Agency Agreement we are entitled to receive as consideration for such novation (i) a fixed commission of €70 million as complementary consideration for carrying out insurance mediation activities, (ii) commissions on sales of insurance products which, as customary in the industry, are charged monthly on the net premium collected in accordance with the comissions established in the contract signed by the parties, and (iii) two additional payments up to €50 million (€25 million due by the end of 2024 and €25 million due by the end of 2029) for participating in the business results if the objectives of the strategic plan set out in the CASER Agency Agreement are fulfilled. The additional payments referred to in (iii) above are conditional on achieving a certain level of results generated by the accumulated premium portfolio over the 10-year term of such plan (i.e. from 2020 to 2029). Although the entire €70 million fixed commission has been already received by Ibercaja Mediación for the signing of the novation agreement modifying the CASER Agency Agreement, only €15 million of this amount were recognized in the 2020 Annual Accounts in light of the particular accounting policies which are applicable to this specific case. The remaining amount of the fixed commission already paid (i.e. €55 million) is being accrued during a period of 10 years following the Effective Date in the consolidated profit and loss account in accordance with the provisions of the aforementioned accounting standard. For additional information, see Note 10.1 of each of the 2020 Annual Accounts and the 2021 Annual Accounts.

17.3 Depositary Assignment Agreements with Cecabank

On December 17, 2012, Ibercaja Gestión and Ibercaja Pensión entered into two assignment agreements with Cecabank, S.A. ("**Cecabank**"), by virtue of which Ibercaja Banco assigned to Cecabank its activity as depositary and related contractual position in respect of mutual and pension funds managed by Ibercaja

Gestión and Ibercaja Pensión, respectively (the "**2012 Depositary Assignment Agreements**"). In addition, on October 25, 2016, we entered into a third assignment agreement with Cecabank, by virtue of which Ibercaja Banco assigned to Cecabank its activity as depositary and related contractual position in respect of certain SICAVs managed by Ibercaja Gestión (the "**2016 Depositary Assignment Agreement**" and, together with the 2012 Depositary Assignment Agreements, the "**Depositary Assignment Agreements**").

On December 27, 2017, Ibercaja Gestión and Ibercaja Pensión entered into two extension agreements in relation to the Depositary Assignment Agreements (the "**Extension Agreements with Cecabank**"), by virtue of which Cecabank will continue as the exclusive depositary for 80% of the AuM related to the mutual funds, SICAVs and pension funds of Ibercaja Gestión and Ibercaja Pensión, until December 31, 2027. Additionally, Cecabank will continue as the exclusive depositary of the remaining 20% until December 31, 2022. During 2022, we will evaluate the option to internalize the management of this 20% of the business or the option to outsource its management again.

In order to sign the Extension Agreements with Cecabank, on December 22, 2017, Ibercaja Banco entered into an agreement with Cecabank under which Ibercaja Banco was mandated as mediator between Cecabank, on one side, and Ibercaja Gestión and Ibercaja Pensión, on the other side (the "**Mediation Agreement with Cecabank**").

The amounts received under the Depositary Assignment Agreements do not have a material impact on our results.

17.4 Aktua Services Agreement

On March 10, 2016, Ibercaja Banco, Residencial Murillo and Cerro Murillo entered into a services provision agreement with Global Acamar, S.L. ("**Global Acamar**") and Aktua Soluciones Inmobiliarias, S.L., two companies of the Aktua group (as amended on November 6, 2018, the "**Aktua Services Agreement**").

By virtue of the Aktua Services Agreement, Global Acamar is the exclusive real estate services provider (including services such as administration, management, promotion, leasing and assignment to third parties) of the on-balance real estate assets (including on-balance sheet real estate, foreclosed futures and third-party assets financed by Ibercaja Banco) of Ibercaja Banco, Residencial Murillo and Cerro Murillo and any other affiliates of the Ibercaja Group owning in-balance real estate assets, from time to time. The real estate assets of our subsidiaries Cerro Goya, S.L. and Inmobinsa Inversiones Inmobiliarias, S.A., as well as any receivables arising from financing transactions (either or not secured by mortgages) are excluded from the Aktua Services Agreement.

The initial term of the Aktua Services Agreement is until February 1, 2026. Following such date, the Aktua Services Agreement will be automatically renewed annually provided that the service levels agreed under the Aktua Services Agreement are complied with. Either of the parties may terminate the Aktua Services Agreement with 180 days' prior notice before the relevant termination date.

Ibercaja Banco, Residencial Murillo and Cerro Murillo may terminate the Aktua Services Agreement (i) upon the occurrence of certain events, including a change of control event affecting Global Acamar and a serious and relevant breach of the obligations of Global Acamar and (ii) from December 30, 2020, without any reason and upon payment of a termination fee to Global Acamar. Global Acamar may terminate the Aktua Services Agreement upon the occurrence of certain events, including a breach of payment obligations that exceed and amount of €1,000,000 or a breach of exclusivity obligations by Ibercaja Banco, Residencial Murillo and Cerro Murillo.

Separately, under the amendment of the Aktua Services Agreement dated November 6, 2018, Ibercaja Banco, Residencial Murillo and Cerro Murillo granted in favour of Aktua Soluciones Financieras Holding, S.L. the right to acquire, individually, those assets that are about to be acquired as a result of the debt and loan recovery management activity of the Ibercaja Group and whose credits are classified as being in an "irregular situation", meaning that they have not been paid for at least 90 days.

The amounts paid under the Aktua Services Agreement do not have a material impact on our results.

18. Legal proceedings

We have been and are involved in disputes and litigation related to our business. The legal proceedings outstanding in which we are involved as of the date of this Registration Document are summarized below. An outcome adverse to the Group in any of these proceedings, or proceedings involving other financial institutions, but which affect us, could have an adverse effect on the Group's business, financial condition, results of operations and prospects.

18.1 Claims relating to floor clauses in mortgage loan agreements with consumers

We have not marketed any mortgage loan agreements containing "floor clauses" (clauses that set minimum interest rates payable by borrowers, whereby the borrower agrees to pay a minimum interest rate to the lender regardless of the applicable benchmark rate). However, as a result of acquiring Banco Caja3 in July 2013, our portfolio includes certain mortgage agreements containing floor clauses, which represented approximately 8% of our total mortgage loan agreements by outstanding amount at the time of acquisition (approximately 3.55%[56] as of December 31, 2021).

18.1.1 General overview

In Spain, borrowers have challenged the legal validity of "floor clauses" in mortgage loan agreements in recent years on various grounds.

The Spanish Supreme Court (since its first decision on the validity of certain floor clauses on May 9, 2013) established the criteria to determine which floor clauses were unfair from a legal standpoint due to the lack of transparency and held that if a floor clause was declared null and void by a valid court order, for lack of transparency or any other reason, the difference between the interest paid under such floor clause and the interest that would have otherwise been payable without such clause must be reimbursed by the relevant financial institution to the borrower for the period beginning on the date of publication of the Spanish Supreme Court judgment dated May 9, 2013.

However, on December 21, 2016, the CJEU declared that the limitation on retroactive application imposed by the Spanish Supreme Court criteria is incompatible with Directive 93/13 and upheld full retroactive reimbursement in relation to floor clauses.

On January 20, 2017, the Spanish government approved Royal Decree-Law 1/2017, which encourages out-of-court settlements between financial institutions and those borrowers affected by floor clauses, with the aim of avoiding overloading the Spanish courts with these claims. Financial institutions and consumers are not obliged to reach an agreement and, therefore, affected consumers still have the right to sue financial institutions, including us. Pursuant to Royal Decree-Law 1/2017, we created a new service on February 10, 2017 as part of our Customer Service Care (CSC) to handle the resolution of these claims.

On December 12, 2019, the Spanish Supreme Court issued a ruling declaring that the completion or termination of a mortgage agreement containing floor clauses does not prevent a consumer from challenging the validity of the floor clause and claiming the reimbursement of the amounts paid under such floor clauses.

On November 5, 2020 the Spanish Supreme Court determined that an agreement between a lender and a consumer whereby the consumer accepts an amendment to the floor clause and waives his right to claim against the lender is valid provided that the consumer was duly informed about the amendment and that such waiver only covers claims relating to the floor clause (and therefore does not extend to claims other than those relating to the floor clause). Therefore, the Spanish Supreme Court ruled that the provisions which modified the original floor clause were valid but those provisions which established a general waiver of rights to claim by the customer were void. As a result, since this resolution from the Spanish Supreme Court (a) entities were obliged to reimburse customers with the amounts paid under the rate of the floor clauses from the beginning

[56] It represents €1,017 million of outstanding principal amount of mortgage loans containing floor clauses less €652 million of outstanding amount in respect of mortgage loans from which we have deleted the floor clause divided by the total loan agreements by outstanding amount as of December 31, 2021 (€18,385 million).

of the original agreement until the amendment and (b) the new floor clauses which were introduced by virtue of the settlement agreements were considered valid and in place since the date of the relevant settlement agreement.

18.1.2 Situation of Ibercaja

As of December 31, 2021, out of the approximately €1,017 million of the outstanding principal amount of our 19,134 outstanding mortgage loans containing floor clauses:

- €944 million corresponded to 16,518 mortgage loans amended in negotiated settlements (out of which we have reduced the floor clause of 9,824 mortgage loans amounting to €580 million and deleted the floor clause from 6,698 mortgage loans amounting to €365 million), and
- €73 million corresponded to 2,616 mortgage loans containing floor clauses which have not been subject to negotiated settlements and which were still claimable as of such date.

With respect to the status of the abovementioned outstanding principal amount of our outstanding mortgage loans containing floor clauses, as of December 31, 2021:

- €220 million corresponded to 3,493 mortgage loans with respect of which claims had been submitted to our customer service department and were rejected by us taking into consideration the applicable regulations and court criteria in force at the relevant time and which have not been challenged before Spanish courts,
- €121 million corresponded to 3,050 mortgage loans in respect of which claims had been accepted by our customer service and are pending settlement with our customers,
- €290 million corresponded to 4,429 mortgage loans in respect of which claims have been challenged before Spanish courts and are subject to the Spanish courts decision, and
- €313 million corresponded to 5,546 mortgage loans in respect of which no claim or lawsuit has been filed.

Only 8% of the rejection decisions delivered by us in the past year have been challenged and are subject to the Spanish courts which are expected to rule based on the Spanish Supreme Court's criteria at the relevant time.

With respect to the status of the outstanding claims before the Spanish courts (irrespective of whether the related mortgage loan is outstanding or not), up to December 31, 2021, Spanish courts had issued:

- 661 non-final decisions which have been appealed before the courts of appeal, out of which 371 claims are related to mortgage loans subject to negotiated settlements, and
- 1,466 non-final decisions from the courts of appeal which have been appealed before the Spanish Supreme Court, out of which 1,085 judicial non-final decisions were not favourable to us and appealed by us. We expect that these 1,085 appeals, as well as the 371 lawsuits related to mortgage loans subject to negotiated settlements that are outstanding, will be partially favourable to us given the Spanish Supreme Court criteria.

Since we were first involved in claims related to the application of floor clauses in 2016 until December 31, 2021, we have made disbursements amounting to €84.9 million in relation to this matter. As of December 31, 2021, our provisions related to this matter amounted to €10.2 million, which cover our estimate of the risk from outstanding and potential claims arising from non-amended and amended loans. In this regard, during 2021 we made a provision of €5,526 thousand after having performed a new analysis of the recent rulings in order to cover the claims expected in the future in relation to this contingency.We believe our provisions are sufficient to cover this risk on floor clause litigation.

The quantification of actual losses recorded in the loss database in 2021 shows that the total annual amount of losses (net of direct and insurance recoveries) for operational risk events amounted to €39,584 thousand corresponding to 15,457 events, of which 667 events for €22,182 thousand derived from losses related to floor clauses (which were related to interest repayments of €20,631 thousand and legal costs of €1,551 thousand).

18.2 Claims arising from the alleged violation of article 1.2 of the abolished Act 57/68

We are subject to claims for alleged violations of Article 1.2 of the abolished Act 57/1968, on the receipt of sums prior to the construction and sale of properties (*Ley 57/1968, de 27 de julio, sobre percibo de cantidades anticipadas en la construcción y venta de viviendas*). That article required credit institutions that opened bank accounts for housing developers to deposit sums on account paid by purchasers of housing under development to confirm that those amounts were secured by a bank guarantee or a surety insurance. The intent of the article was to ensure that property buyers would be refunded in the event that the development failed.

As of December 31, 2021, we had 221 legal proceedings ongoing related to these types of claims from purchasers with no bank guarantee, seeking a total of €13,694 thousand from us, of which we have already paid €8,331 thousand.

As of December 31, 2021, we had provisions amounting to €5 million in relation to these claims, which we believe are sufficient to cover the legal risk. We expect that any new claims filed from January 2021 will be expired due to the change in the prescription period from 15 years to five years.

18.3 Claims relating to the invalidity of clauses related to expenses contained in mortgage agreements with consumers

We are currently subject to claims arising from the initial declaration by the Spanish courts that clauses contained in certain mortgage agreements entered into with consumers related to opening fees (*comisión de apertura*), taxes and expenses are invalid due to unfair terms.

In its ruling dated January 23, 2019, the Spanish Supreme Court declared the clauses relating to opening fees valid as it considered that these fees are part of the price paid for a service provided by the relevant bank. Therefore, such fees are considered a key element of the agreement which is not subject to the transparency test. In relation to taxes and expenses, the Spanish Supreme Court declared that stamp duty (*actos jurídicos documentados*) must be borne by the borrower, registration fees must be borne by the bank and the notary's fees and management fees (*honorarios de la gestoría*) must be divided between the bank and the borrower.

On July 16, 2020, the CJEU issued a new ruling on this matter establishing that, in principle, a contractual clause which is declared unfair is null and void and thus has never existed, and national courts shall apply the provisions of national law which regulate the allocation of expenses. The CJEU states that if these provisions result in the borrower being liable for all or part of these expenses, neither Article 6(1) nor Article 7(1) of Directive 93/13 precludes the consumer from not being reimbursed for the costs that such customer had to bear.

Contrary to the Spanish Supreme Court's criteria, in relation to opening fees, in its ruling of July 16, 2020, the CJEU stated that opening fees are not a key element of a mortgage loan agreement and therefore should be subject to the transparency requirements. In our view, this ruling should not change the Spanish Supreme Court's criteria in relation to opening fees given that such fees are the price paid for a service provided by the bank and they are negotiated in a transparent manner being the customer at all times aware of the economic consequences of such fees. Notwithstanding the above, the Spanish Supreme Court has not expressed its opinion after the CJEU ruling with regards to the opening fee issue.

The Spanish Supreme Court issued a new ruling on July 24, 2020 stating that the CJEU had confirmed the Spanish Supreme Court's position (set out in its ruling dated January 23, 2019) through its decision of July 16, 2020. Furthermore, on October 26, 2020, the Spanish Supreme Court issued a ruling imposing agency fees on the lender.

For mortgage agreements entered into after June 16, 2019, Spanish Act 5/2019, of March 15, on regulation of real estate loans (*Ley 5/2019, de 15 de marzo, reguladora de los contratos de crédito inmobiliario*) (the "**Real Estate Loans Law**"), which entered into force on June 16, 2019, has set out the distribution of the expenses between borrower and lender.

Notwithstanding the above, before the Real Estate Loans Law was passed, there was no legal provision regulating management costs. The Spanish Supreme Court ruling of October 26, 2020, followed the CJEU's ruling of July 16, 2020 stating that "in the absence of a national rule which applies in case there is a lack of an agreement negotiated among the parties imposing on the borrower the payment of all or part of those expenses, the borrower could not be denied the return of the amounts paid under the clause that has been declared unfair". The Spanish Supreme Court ruling of January 27, 2021, confirmed this position and also applied this conclusion to the appraisal costs (but only when the Real Estate Loans Law is not applicable, because if it applied, it would allocate appraisal costs to the borrower).

As of December 31, 2021, we had received a total of 13,067 claims in connection with these clauses, of which 2,038 are still outstanding as of the date of this Registration Document. The average cost of one of these claims, based on historical proceedings, is of approximately €869.

As of December 31, 2021, we had provisions amounting to €2,466 thousand in relation to these claims, which we believe are sufficient to cover this risk.

18.4 Claim relating to IRPH

18.4.1 General overview

A preliminary ruling was filed on February 16, 2018 before the CJEU that challenges the validity, due to alleged lack of transparency, of mortgage agreements subject to the mortgage benchmark rate in Spain (*Indice de Referencia de Préstamos Hipotecarios,* "**IRPH**").

The subject of the debate was the transparency test set forth in article 4.2 of Directive 93/13 applicable when the borrower is a consumer. Since the IRPH is related to the price of the contract and it falls within the definition of the essential subject matter of the contract, it must be drafted in plain, intelligible language, so that the consumer is in a position to evaluate, on the basis of clear, intelligible criteria, what the economic consequences derived from such contract are.

This preliminary ruling was filed by a Court of First Instance and Investigation several months after the Spanish Supreme Court, on December 14, 2017, established the legality of these contracts.

We consider that compliance with the transparency test under Directive 93/13 should not be questioned because (i) the Spanish Supreme Court declared the validity of these contracts on December 14, 2017; (ii) the IRPH is an official benchmark rate published and managed by the Bank of Spain; (iii) there is jurisprudence (*jurisprudencia*) of the CJEU that confirms the transparency of contracts referenced to other official benchmark rates, and (iv) there is an APR indicator (annual percentage rate or "*TAE*" in Spain) that must be mandatorily communicated to consumers, and that allows for the comprehension of the economic burden and the comparison of different mortgage offers, whatever the benchmark rate index applied is.

On September 10, 2019, the advocate general of the CJEU issued its opinion in relation to this matter, according to which (i) Directive 93/13 is applicable to the use of IRPH and (ii) the national judge should be the competent authority to monitor the transparency of the disputed clause and verify, taking into account the set of circumstances that surrounded the signing of the contract at the time it was executed: (a) whether the contract set out the method for calculating the interest rate transparently, so that the consumer was in a position to evaluate, based on precise, intelligible criteria, the economic consequences that the contract would have for him and (b) whether the contract meets all the information requirements provided by the national regulations.

The advocate general's opinion did not consider the IRPH or the clause which incorporates it in the relevant mortgage loan agreements to be, per se, abusive or void.

On March 3, 2020, the CJEU resolved the aforementioned preliminary ruling and ruled that national courts must verify the transparency of IRPH interest rate clauses in mortgage loan agreements, stating that IRPH interest rate clauses are deemed to be transparent if they are couched in a manner that is understandable to a reasonably observant and circumspect consumer and have been reported in accordance with national law. The CJEU also stated that in the event that the national court concludes that the clause is void because of lack of transparency, it is possible for the national court to replace the original index with a legal index in the absence of an agreement to the contrary by the parties to the contract, provided that the mortgage loan contract could not survive if the unfair term was removed and that the annulment of the contract in its entirety would leave the consumer exposed to particularly harmful consequences.

After this ruling, various Spanish regional courts have maintained different criteria. Several courts considered interest rate clauses including IRPH to be transparent and, therefore, not abusive, and others, conversely, considered them to be non-transparent, declaring such clauses as abusive, replacing the IRPH with the Euribor or with the credit institution's IRPH.

In November 2020, the Spanish Supreme Court issued five rulings related to the IRPH. In four of such cases, the Spanish Supreme Court ruled in favour of the credit institutions concluding that, although the IRPH clause is not transparent because the customer was not informed of the past performance of the index, such clause is to be deemed non-abusive for the following reasons: (i) IRPH clauses may not be easily rigged in favour of the lender (in fact, IRPH is controlled by the public administration, whereas Euribor is calculated by a private entity), (ii) a significant imbalance to the consumer's detriment cannot be derived from the mere evolution of the index during the duration of the loan, even if unfavourable to the consumer, and (iii) the use of an official index does not contravene the good faith principle.

Thus, following the last rulings by the Spanish Supreme Court, as of the date of this Registration Document, we believe that the risk of the application of the IRPH being declared abusive is lower than in the past and is limited to potential decisions by certain Spanish courts at a lower level. However, these rulings have been controversial and certain courts at a lower level have instead decided not to follow the Spanish Supreme Court case law, declaring the IRPH clause void and replacing it with Euribor and ordering the restitution of the amounts paid in excess after such replacement. In addition, other Spanish regional courts have presented questions to the CJEU for a preliminary ruling on whether the latest rulings issued by the Supreme Court regarding IRPH contravene European law. On November 17, 2021 the CJEU resolved one of these preliminary rulings in line with the rulings of the Spanish Supreme Court of November 2020. In its decision, the CJEU upheld the validity of mortgages indexed to IRPH and clarified that credit entities are not obliged to include a complete definition of the index into the contract or to deliver a brochure that reflects the previous evolution of that index as these aspects are made public officially. On January 28, 2022, the Spanish Supreme Court delivered its first rulings after the CJEU decision of November 2021 confirming the criteria established in its rulings of November 2020. In addition, the Spanish Supreme Court declared in its decision of February 15, 2022 that consumers should not pay the costs if they had withdrawn their appeals after the CJEU decision of November 2021.

18.4.2 Situation of Ibercaja

As of December 31, 2021, we had 1,580 mortgage loan agreements with individuals indexed to the IRPH for an original principal amount of €86.3 million (which represented less than 0.1% of the gross loan portfolio as of the same date), of which €19.8 million was outstanding (which represented 0.1% of our gross loans and advances to customers for housing (€18,385.4 million)).

As of December 31, 2021, we only had 47 claims from borrowers requesting the nullity of mortgage loan agreements indexed to the IRPH. As of the date of this Registration Document, all of the rulings regarding this matter have been favorable to us. Therefore, we believe that our exposure to mortgage agreements indexed to IRPH with individuals is low We have not made any provisions relating to this matter.

18.5 The Bandenia case

In July 2015 the Court of Investigation of the Spanish National Court agreed to open an investigation in relation to the activity carried out by Caixabank, Ibercaja and ING Bank (the "**Spanish Entities**") in connection with Bandenia Banca Privada PLC and Bandenia Banca Privada Sucursal en España (collectively, "**Bandenia**") in order to determine if the Spanish Entities had assisted Bandenia in the implementation of fraudulent and money laundering transactions through the accounts that Bandenia had opened with the Spanish Entities. The volume of transactions that are being investigated which may have been conducted through accounts opened with us amounts to between €1.9 and €3 million out of a total of, approximately, €20 million.

After having carried out an internal investigation and having commissioned an external third party to carry out a forensic report, we believe that we complied with our due diligence obligations and, based on the information on customers and operations that it was reasonable to obtain during that period of time (from May 2012 to June 2013), we did not detect any indications that the activity conducted by Bandenia through us could be related to money laundering.

We believe we have complied with our obligations as a regulated entity and as of the dates and for the periods to which the facts refer, we adopted due diligence measures in compliance with anti-money laundering and terrorist financing regulations. Based on the foregoing, as of the date of this Registration Document, no provision has been made in relation to this matter.

18.6 Sanctioning proceedings relating to "TAE"

In December 2020, the Bank of Spain initiated disciplinary proceedings against us in connection with certain miscalculations in the applicable Annual Percentage Rate charge ("*TAE*") ("**APR**") to certain mortgage transactions executed between 2015 and the end of 2017.

On December 18, 2021, the Bank of Spain agreed to terminate the disciplinary proceedings after we had acknowledged our responsibility and paid a fine of €1,080,000 in 2020, after having applied the bonus for prompt payment to the initial proposed fine of €1,800,000.

Separately, in September 2020, the Bank of Spain initiated disciplinary proceedings regarding compliance with the reporting obligations to the Bank of Spain regarding statistical information in connection with the APR for the period between November 2020 and January 2021. The Bank of Spain considered that while the APR reported to customers was correct, the calculation of the APR reported to the Bank of Spain did not comply with the former Circular 8/1990 of the Bank of Spain which is no longer in place. In this regard, in February 2022, we were notified of the proposed resolution regarding such disciplinary proceedings which consisted on a fine amounting to €5,000,000 due to the inaccurate submission of the information to be reported to the Bank of Spain. We intend to appeal this resolution as we absolutely disagree with the proposal. In case our appeal is rejected, we would be allowed to apply certain reductions to the amount of the fine until the issuance of the final resolution (20% for acknowledgment of liability and 20% for payment prior to the issuance of the final resolution) and as a result, the proposed fine could be reduced to €3,000,000. As of December 31, 2021 we had not made any provisions relating to this matter.

18.7 Provisioning policy

We estimate our legal risk provisions on the basis of hypotheses, assumptions and estimates we consider to be reasonable. However, these estimates may not be complete, may not have factored in all customers or former customers that could potentially file claims, and may not reflect the most recent facts or legal trends adopted by the Spanish courts, or any other circumstances that could be relevant for establishing the impact of these clauses for us or the successful outcome of the claims filed in relation to these clauses. Consequently, the provisions made by us could prove to be inadequate.

19. Insurance

We maintain the types and amounts of insurance that are customary for businesses in the sectors in which we operate. We believe that our insurance policies are sufficient to protect us against potential damage and liabilities incurred in the ordinary course of business although we can provide no assurance that our insurance coverage will adequately protect us from all the risks that may arise or in amounts sufficient to prevent material loss.

OPERATING AND FINANCIAL REVIEW FOR THE YEARS ENDED DECEMBER 31, 2021, 2020 AND 2019

The following discussion should be read together with our Annual Accounts, which have been prepared under IFRS-EU. Our Annual Accounts (including the independent auditors' reports thereon) are included elsewhere in this Registration Document.

You should also read the following discussion together with the sections entitled "Forward-Looking Statements", "Risk Factors", "Presentation of Financial and Other Information", "Business", "Selected Financial Information" and "Selected Statistical and Other Information on Assets and Liabilities".

The discussion below includes forward-looking statements that involve risks and uncertainties. Our actual results may differ materially from those discussed in or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed below and elsewhere in this document, including under "Risk Factors".

Overview

See "*Business—Overview*" for an overview of our business.

Key factors affecting comparability of results of operations

IFRS 16 "Leases"

The impact of the application of IFRS 16 on our fully-loaded CET1 ratio was 4 basis points as of December 31, 2019. We have also recognized right-of-use assets amounting to €62 million and lease liabilities of an equal amount in 2019. This recognition is mainly due to the requirement to recognize right-of-use assets and the lease liability arising from all the leases in effect on the date of first-time application.

Sales of loans and NPAs^{APM}

In June 2019, we sold to MELF Investment Holding II S.à. r.l. a portfolio of NPLs with an aggregate nominal amount of €534 million (the "**Ordesa Transaction**"). In December 2019, we sold a portfolio of NPLs for an aggregate nominal amount of approximately €73 million to DSSV, S. à. r.l. (the "**Costa Transaction**)".

In 2019, the Ordesa Transaction and the Costa Transaction generated losses of €27 million and €15 million, respectively, recorded under "Gains/(losses) on derecognition of financial assets and liabilities not measured at fair value through profit or loss, net" in our consolidated income statement for the year ended December 31, 2019.

On December 23, 2021, we entered into an agreement for the sale of a portfolio of NPLs with an aggregate nominal amount of €51,260 thousand to the companies LM IV B S.V. and Axactor España S.L. (the "**Oroel Transaction**"). The negative impact of the transaction was €9,623 thousand which was recorded under "Gains/(losses) derecognition of financial assets and liabilities not valued at fair value through profit or loss, net" in our consolidated income statement for the year ended December 31, 2021 (Note 34 to the 2021 Annual Accounts).

These transactions have accelerated the rate of reduction of our NPAs^{APM}, strengthened our financial solidity and allowed us to free up funds assigned to non-productive assets.

Sale of portfolio at amortized cost

In 2020, we carried out an extraordinary sale of a portfolio of domestic public debt securities for a nominal amount of €1,381,770 thousand, of which €300,000 thousand was sold in the form of a forward sale (the "**Public Debt Sale Transaction**"). The Public Debt Sale Transaction was carried out to obtain liquidity in response to the extraordinary circumstances of the COVID-19 pandemic and resulted in a gain amounting to €114,619 thousand which was recognized under "Gains or losses on derecognition of financial assets and liabilities not measured at fair value through profit or loss, net - Financial assets at amortized cost" in our consolidated income statement for the year ended December 31, 2020. As of December 31, 2021, the item "Gains or losses on derecognition of financial assets and liabilities not measured at fair value through profit or loss, net - Financial assets at amortized cost" included €33,102 thousand corresponding to the result of the execution of the forward sale of part of the Public Debt Sale Transaction.

The 2021-2022 Redundancy Plan

In December 2020, we reached an agreement to reduce our workforce by up to 750 employees (equivalent to 15% of our workforce as of December 31, 2020) and to close up to 199 branches, which is to be implemented through June 30, 2022 (the "**2021-2022 Redundancy Plan**"). As of December 31, 2021, 525 employee departures had occurred with the remaining departures to take place on a gradual basis until the end of the first half of 2022. In addition, we closed 117 branches in 2021. The 2021-2022 Redundancy Plan has resulted in staff expenses amounting to €151,041 thousand during the year ended December 31, 2020. In 2021, we recorded an additional expense of €12,842 thousand in connection with the 2021-2022 Redundancy Plan due to changes in the exit date of some employees. Pursuant to the agreement reached with the employees' representatives in the context of the 2021-2022 Redundancy Plan, we shall not carry out a new redundancy plan until December 31, 2023 unless previously agreed with the employees' representatives. .

Impact of COVID-19 on credit risk coverage

In 2020, we made a non-recurring provision of €90,124 thousand, €52,000 thousand of which was registered as a post-model adjustment to cover the increase in credit risk of customers who were not in default at the end of 2020, but who, due to the persistent deterioration of the current macroeconomic situation, were expected to transfer to Stage 2 in 2021. Such amount was determined using macroeconomic projections, mainly those published by the Bank of Spain, and taking into account the characteristics of our portfolio. The provision was recognized under "Impairment or (-) reversal of impairment on financial assets not measured at fair value through profit or loss - Financial assets at amortized cost" in the consolidated income statement for the year ended December 31, 2020. As of December 31, 2021, we maintained, for reasons of prudence and in view of the validity and extension of the government support measures, the post-model adjustment in the amount of €52,000 thousand.

Increased effective tax rate

Our effective CIT tax rate increased from the statutory 30% to 34.7% in 2019 and 55.9% in 2020. In 2021, our effective CIT tax rate returned to be close to the statutory CIT tax rate (29.7%).

Part of the increase in the 2019 and 2020 effective CIT tax rate responds to the compulsory recapture of the accounting stock provisions that were considered tax deductible in the past. According to the CIT Act, for fiscal years starting on or after January 1, 2016, equity impairment losses that were deducted from the taxable base in fiscal years previous to 2013 (when equity impairments were still tax deductible), must be annually recaptured on a straight line basis over a five-year period, with these recaptures being fully taxable.

This compulsory recapture applied whether or not the relevant entity generated profit and was not tied to the provisional taxable base. Therefore, the lower the accounting income was, the higher the impact of this adjustment. In particular, the impact resulting from this compulsory claw-back has been approximately €6,111 thousand in 2019 and €5,494 thousand in 2020.

The increase in the 2020 effective tax rate mainly responds to the reduction of tax credits associated with negative tax bases generated by a subsidiary of the Group prior to its entry into the tax group in the amount of €19,210 thousand.

Novation of CASER Agency Agreement

In 2012, we reached a strategic agreement with CASER for us to exclusively market CASER's non-life risk insurance products through our branch network (see "*Business—Material contracts—CASER Agency Agreement*"). Pursuant to the last amendment of the CASER Agency Agreement we are entitled to receive as consideration for such novation (i) a fixed commission of €70 million as complementary consideration for carrying out insurance mediation activities, (ii) commissions on sales of insurance products which, as customary in the industry, are charged monthly on the net premium collected in accordance with the commissions established in the contract signed by the parties, and (iii) two additional payments of up to €50 million (€25 million due by the end of 2024 and €25 million due by the end of 2029) for participating in the business results if the objectives of the strategic plan set out in the CASER Agency Agreement are fulfilled.

The additional payments referred to in paragraph (iii) above are conditional on achieving a certain level of results generated by the accumulated premium portfolio over the 10-year term of such plan (i.e. from 2020 to 2029). Although the entire €70 million fixed commission has been already received by Ibercaja Mediación for the signing of the novation agreement modifying the CASER Agency Agreement, only €15 million of this amount were recognized in the 2020 Annual Accounts in light of the particular accounting policies which are applicable to this specific case. The remaining amount of the fixed commission already paid (i.e. €55 million) is being accrued during a period of 10 years following the Effective Date in the consolidated profit and loss account in accordance with the provisions of the aforementioned accounting standard. For additional information, see Note 10.1 of the 2020 Annual Accounts.

Key factors and trends affecting results of operations

Our financial condition and results of operations are affected by a number of factors. We believe that the factors listed below are of particular importance to us.

Economic and market conditions – COVID- 19

We operate in and derive all of our revenues from Spain and as a result, our performance depends on the health of the Spanish economy, which itself is affected by the macro-economic conditions in the European Union and, more broadly, the global economic environment. The spread of the COVID-19 pandemic in 2020 has caused the global economy to suffer a severe contraction. In particular, the contraction of the GDP in the Eurozone amounted to 6.5% during 2020 (*source: Eurostat*), affecting differently among European countries. Southern European countries such as Spain were more affected, as their economy is more dependent on the tertiary sector.

The Spanish GDP in particular decreased by 10.8% during 2020 (*source: Eurostat*) due to different factors such as an initial more severe lockdown, the high contribution to the GDP of tourism-related sectors and the high rate of structural unemployment which made our economy more vulnerable to the effects of the crisis.

As a result, domestic demand decreased, household consumption fell and investment shrunk by 12.4% (*source: INE*), with the construction sector being especially affected and only public expenditure acted as a counterweight. On the employment market, following a significant destruction of jobs in March and April 2020, unemployment reached 16.1% in the fourth quarter of 2020 (*source: INE*). In addition, inflation has been conditioned by the drop in the price of oil, a weak demand, the strength of the euro and the changes in consumption patterns caused by mobility restrictions. In 2021, inflation has increased driven by several factors, mainly: i) the rise in energy and commodity prices from the significantly lower levels recorded in 2020 as a consequence of the economic meltdown produced by the COVID-19 outbreak; and ii) the impact of global supply chain disruptions as a result of shortages and transportation congestions affecting the manufacturing sectors.

The Spanish government, through various royal decrees, established the Legal Moratoria for individuals and professionals allowing them to temporarily suspend their payment commitments as debtors, under certain circumstances. It also implemented the Guaranteed Credit Lines, partially guaranteed by the government, through the ICO, with the aim of guaranteeing companies' liquidity and thus maintaining productive activity. On their part, the credit institutions belonging to CECA agreed to grant the Sectorial Moratoria, to which Ibercaja adhered in order to extend the scope of the Legal Moratoria. At the same time, the ECB adopted measures to provide liquidity to the system, promote credit and enable European governments to pursue an expansionary fiscal policy. The EU approved the Recovery Plan for Europe which, through transfers and loans, will support the most affected economies over the coming years.

In relation to the measures described above, the loans and advances to customers in respect of which we had granted a Legal Moratoria or Sectorial Moratoria amounted to €740,683 thousand as of December 31, 2021, and the Guaranteed Credit Lines granted by us amounted to €2,137,350 thousand as of the same date. As of December 31, 2021 the outstanding balance of the loans and advances to customers subject to Legal

Moratoria and Sectorial Moratoria amounted to €25,533 thousand and the outstanding balance of the total amount granted by us under Guaranteed Credit Lines amounted to €1,667,880 thousand.

The COVID-19 pandemic, together with the exceptional measures implemented to mitigate its effects, have impacted our results due to, among other factors, (i) longer periods of lower interest rates as a consequence of the economic contraction and the efforts by the ECB to reactivate the global and local economy by means of repurchase programs (see "*Risk factors - Changes in interest rates, continued low interest rates or persistent inflation may negatively affect our business*"), and (ii) a continued decrease in the global economic activity which increases our credit risk and our cost of risk^APM as a consequence of the contraction of GDP in 2020, increased unemployment, the reduction of our customers' income and the increase of the probability of default in our credit portfolio. The most relevant impact of the COVID-19 pandemic on the Group's results in 2020 was the extraordinary credit risk provision of €90,124 thousand (of which €52,000 thousand corresponded to the post-model adjustment).

In relation to the quality of our credit portfolio, the main impact of the COVID-19 pandemic on our results as of December 31, 2021 was the increase of transactions classified as Stage 2 (over 11.2% volume increase since December 31, 2019), which meant that the impairment risk of those transactions had significantly increased from the date on which they were initially recognized. As of December 31, 2021, 5.00% of gross loans and advances to customers^APM was classified as Stage 2 (5.31% and 4.31% as of December 31, 2020 and 2019, respectively)[57].

Funding

We have traditionally been characterized by a conservative liquidity and financing policy, based on a vocation to finance our lending activity with retail resources and to manage liquidity and our sources of financing in a diversified, prudent and balanced manner, anticipating the need for funds in order to meet our obligations on time and not conditioning investment activity to the situation of the wholesale financing markets.

Retail deposits^APM, our main source of liquidity and funding, accounted for 79.76% of our external funding^APM as of December 31, 2021 (78.36% and 76.77% as of December 31, 2020 and 2019, respectively). Over the periods under review, our LTD ratio^APM decreased to 78.21% as of December 31, 2021 (81.08% and 92.47% as of December 31, 2020 and 2019, respectively).

Wholesale funding complements the funding obtained from individuals and companies. It is focused on the medium and long term and includes balances held with the ECB, covered bonds, securitizations, subordinated liabilities and other issuances. Financing from wholesale lending markets amounted to €9,419,733 thousand, representing 20.24% of our external funding^APM as of December 31, 2021 (€9,985,634 thousand and €9,915,818 thousand representing 21.64% and 23.23% of our external funding^APM as of December 31, 2020 and 2019, respectively).

After the impact of the COVID-19 pandemic, the tension in the markets initially caused by the crisis was eased as a result of measures taken by central banks. The ECB made extraordinary liquidity facilities available to banks. In addition, the retail deposit base increased, together with the decline in consumption and the increase in savings.

As a result of the downward trend in market interest rates, the cost of financing, both retail and wholesale, has been reduced, improving our net interest income. Interest expense on retail deposits has decreased from €4,948 thousand for the year ended December 31, 2019 to an income of €6,574 for the year ended December 31, 2021. On the other hand, interest expense on debt securities issued and mortgage covered bonds decreased from €65,597 thousand in the year ended December 31, 2019 to €32,634 thousand in the year ended December 31, 2021.

---

57 See definition, explanation, use, calculation and breakdown of Loan portfolio by stages^APM which are set out in "Alternative Performance Measures".

We have been awarded funding provided by the ECB through the TLTRO III program which has positively impacted our funding. The balance drawn down as of December 31, 2021 amounted to €5,959,000 thousand (€5,400,000 thousand as of December 31, 2020 and €1,650,000 thousand as of December 31, 2019). On April 30, 2020, the Governing Council of the ECB established that for entities that met a certain volume of eligible loans between March 1, 2020 and March 31, 2021, the interest rate applicable to the TLTRO III program can be -1% for the period from June 2020 to June 2021. Additionally, in December 2020, the ECB extended the conditions associated with the TLTRO III program establishing that, if a certain volume of eligible loans was met between October 1, 2020 and December 31, 2021, the -1% interest rate applicable to the TLTRO III program can also be applied for the period between June 2021 and June 2022. Considering the behavior of our eligible loan portfolio up to December 31, 2021 and the projections estimated in our business plan, we believe that the interest rate applicable to us in connection with the TLTRO III program will be -1% until June 2022. Thus, as of December 31, 2021, the interest accrued on the financing taken from TLTRO III amounts to €68,352 thousand.

Lending activity

The market conditions caused by the COVID-19 pandemic have increased our new lending activity, boosted by the granting of Guaranteed Credit Lines. Total new lending[APM] amounted to €5,421,416 thousand for the year ended December 31, 2021 (€6,423,587 thousand and €5,435,982 thousand for the years ended December 31, 2020 and 2019, respectively), with a clear prominence of financing to companies (€2,415,361 thousand, €3,762,196 thousand and €2,849,565 thousand for the years ended December 31, 2021, 2020 and 2019, respectively). Granting of new loans for residential mortgages reached €1,431,202 thousand for the year ended December 31, 2021 (€1,439,998 thousand and €1,146,985 thousand for the years ended December 31, 2020 and 2019, respectively).

In 2021, the demand for new credit to companies decreased as a result of lower investments in fixed capital and a reduction in liquidity needs to finance working capital[58]. At the same time, there was an increase in the perceived risks related to the economic situation and the solvency of some borrowers in the sectors most affected by the crisis. In addition, home purchase loan originations are gradually recovering after the sharp drop in transactions that occurred during the peak months of the COVID-19 pandemic. The attraction of this type of financing to individuals has triggered fierce competition between credit institutions and a fall in the average interest rate.

Asset under management and bancassurance products

Market conditions also affect volume and demand for the asset management and bancassurance products we offer through our Financial Group. During the periods under review, we have carried out a proactive strategy of transferring customer deposits to asset management and life savings insurance funds, mainly mutual funds. In addition, we have devoted resources to selling risk insurance products. The increase in the asset management and bancassurance activity has translated into an increase in the commissions associated with these products.

Non-banking commissions[59] contributed €288,925 thousand for the year ended December 31, 2021 (€230,218 thousand and €242,992 thousand for the years ended December 31, 2020 and 2019, respectively). Non-banking commissions over recurring revenues**[APM]** amounted to 31.02% for the year ended December 31, 2021 (25.34% and 25.79% for the years ended December 31, 2020 and 2019, respectively).

Changes in interest rates

Our earnings are significantly dependent on our net interest income, which is determined primarily by the volume of our interest-earning assets and interest-bearing liabilities and our net interest margin[APM], which

---

[58] See definition, explanation, use, calculation and breakdown of Total new lending[APM] which are set out in "Alternative Performance Measures".

[59] See definition, explanation, use, calculation and breakdown of Net fee income and exchange differences[APM] which are set out in "Alternative Performance Measures".

is the difference between interest earned from interest-earning assets, such as loans and investment securities, and interest paid on interest-bearing liabilities, such as deposits and borrowings. Net interest margin[APM] is an important indicator of our profit margin. Net interest income and net interest margins[APM] are affected by a number of factors, including, in particular, changes in interest rates.

Interest-earning assets consist principally of mortgage loans to individuals, loans and other lines of credit to SMEs, consumer loans, corporate loans and real estate loans, as well as the ALCO portfolio and the fixed-income portfolio of Ibercaja Vida.

Interest rates are highly sensitive to many factors beyond our control, including monetary policies and domestic and international economic and political conditions. We are currently being adversely affected by the sustained extremely low level of interest rates (even negative in some cases), which puts downward pressure on our assets yields and net interest income. A significant part of our loan portfolio bears interest at a floating rate (67%, 74% and 79% as of December 31, 2021, 2020 and 2019, respectively)[60], of which the largest portion (in particular, mortgages) are primarily set with reference to 12-month Euribor rates. The average 12-month Euribor has decreased in the year ended December 31, 2021 and in each of the years under review (-0.49%, -0.30% and -0.22% for the years ended December 31, 2021, 2020 and 2019, respectively), which has negatively impacted our net interest income.

Interest-bearing liabilities consist principally of customer deposits and credit institutions, debt and capital instruments issued by us, and borrowings from credit institutions. During the periods under review, we significantly increased the weight of savings accounts and significantly reduced the cost of the remaining term deposits. This commercial strategy has allowed us to significantly reduce our deposit cost to historically low levels. The current low cost of our customer deposits limits our ability to offset additional decreases in the credit yield, as we do not expect to charge for our retail deposits[APM] as a general rule.

Furthermore, changes in market interest rates may lead to temporary repricing gaps between our interest-earning assets and our interest-bearing liabilities, which can affect our net interest income. Generally, our interest-bearing liabilities adjust more rapidly than our interest-earning assets such as mortgage loans, which usually have their interest rates reset only once or twice a year. As a result, increases in interest rates can temporarily reduce our net interest income and net interest margin[APM] until we can pass them on to borrowers.

We seek to use derivatives as a hedging instrument to limit the impact of changes in interest rates on our interest margins particularly given that our asset portfolio tends to adjust more slowly to interest changes than our liability portfolio. However, our hedging arrangements may not be successful, and we may be exposed to risk in such transactions (including counterparty risk).

Net interest income is the largest component of our gross income. Net interest income over gross income[APM] accounted for 51.75%, 53.27% and 59.06% for the years ended December 31, 2021, 2020 and 2019, respectively. Our net interest margin[APM] (0.85%, 0.96% and 1.04% for the years ended December 31, 2021, 2020 and 2019, respectively) has decreased slightly, mainly due to historically low levels of interest rates, the reduction in the contribution of ALCO portfolio as well as modest economic growth and persistently high unemployment rates. We have historically generated most of our interest income from loans and receivables. For the year ended December 31, 2021, income from loans and advances to customers[APM] accounted for 62.29% of our total interest income[61] (63.04% and 65.60% for the years ended December 31, 2020 and 2019, respectively).

Finally, due to the effects of the COVID-19 pandemic, longer periods of lower interest rates are expected as a consequence of the economic contraction and the efforts by the ECB to reactivate the global and local

[60] See definition, explanation, use, calculation and breakdown of Breakdown by maturity and type of interest rate (fixed or floating) of gross loans and advances to customers[APM] which are set out in "Alternative Performance Measures".

[61] See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

economy by means of repurchase programs affecting the Group as described in "*Risk factors - Changes in interest rates, continued low interest rates or persistent inflation may negatively affect our business*".

Asset quality

Credit risk is the most significant risk on our balance sheet. We are exposed to the creditworthiness of our customers and counterparties, so we may experience losses in the event of total or partial default in their payment obligations as a result of declines in the credit quality and recoverability of assets.

As a credit institution, we are exposed to credit risk given the weight of loans and advances to customers[APM] on our assets. As of December 31, 2021, our net loans and advances to customers[APM] amounted to €30,655,026 thousand (€30,942,404 thousand and €31,918,945 thousand as of December 31, 2020 and 2019, respectively), representing 52.3% of our assets (53.0% and 57.6% as of December 31, 2020 and 2019, respectively).

During the periods under review, we have managed NPAs in order to improve the risk profile and strengthen the quality of our balance sheet. Thus, a new model for the recovery of irregular investment was implemented and best-in-class IT tools were developed to identify the tasks that make debt recovery more efficient. In addition, in the wholesale area, three portfolios of doubtful loans were sold (the Ordesa Transaction, the Costa Transaction and the Oroel Transaction) for a total amount of €658 million. In addition, we have taken a prudent approach towards the granting of Guaranteed Credit Lines during the COVID-19 pandemic which has lowered the impact of the crisis on our asset quality. The improvement of internal processes, combined with wholesale sales, allowed our NPA ratio[APM] to fall by 181 basis points between 2019 and December 31, 2021.

As of December 31, 2021, our NPLs amounted to €717,621 thousand (€1,012,938 thousand and €1,293,161 thousand as of December 31, 2020 and 2019, respectively). Since December 31, 2019 we have achieved the largest reduction among peers in terms of NPLs (peers' average of 9.3% reduction) (*source: peers' publicly available information as December 31,* 2021)[62]. Our overall NPL ratio[APM] decreased in each of the periods under review and stood at 2.30% as of December 31, 2021 (down from 3.21% as of December 31, 2020 and 3.97% as of December 31, 2019).

In addition, foreclosed real estate assets amounted to €542,241 thousand as of December 31, 2021 (€619,527 thousand and €624,890 thousand as of December 31, 2020 and 2019, respectively). The overall exposure to NPAs[APM] was reduced to €1,259,862 thousand as of December 31, 2021 (€1,632,465 thousand and €1,918,051 thousand as of December 31, 2020 and 2019, respectively). Our NPA ratio[APM], which includes NPLs and foreclosed assets, has also decreased in each of the periods under review and stood at 3.97% as of December 31, 2021 (down from 5.07% and 5.78% as of December 31, 2020 and 2019, respectively). In parallel with the decrease in foreclosed assets, NPA coverage ratio[APM] rose during the period under review, standing at 68.79% as of December 31, 2021 (62.15% as of December 31, 2020 and 51.63% as of December 31, 2019).

During the periods under review, we significantly reduced our exposure in relation to the real estate development sector. In this regard, our NPL ratio by sector [APM] (real estate development) stood at 6.82% as of December 31, 2021 (8.96% as of December 31, 2020 and 12.13% as of December 31, 2019).

Our cost of risk[APM], calculated as the percentage of credit and real estate impairments relative to average exposure, was 0.35% for the year ended December 31, 2021 (0.71% for the year ended December 31, 2020 and 0.40% for the year ended December 31, 2019). The increase in 2020 was mainly due to the extraordinary

[62] NPL reduction of our peers is calculated using reported numbers of gross NPLs as of December 31, 2021 (as derived from their consolidated annual report except for Caixabank and Sabadell gross NPLs) and December 31, 2019 (as derived from their respective consolidated annual report except for Caixabank and Sabadell gross NPLs). Caixabank's figure for December 31, 2019 in pro-forma Bankia merger and Unicaja's figure for December 31, 2019 (as derived from its consolidated annual report) in pro-forma Liberbank merger. Caixabank's figures exclude BPI. Sabadell's figures exclude TSB Bank's reported numbers. Average is calculated as the simple arithmetic mean of our peers' NPL reduction in %.

provisions recorded in the context of the COVID-19 pandemic. Excluding this extraordinary provision, our cost of risk[APM] would have been of 0.43% as of December 31, 2020.

ALCO portfolio

As of December 31, 2021 our ALCO portfolio[63] amounted to €10,462,235 thousand having increased by 35.4% since 2019. During 2021 our ALCO portfolio increased by €2,022,909 thousand due to certain public debt acquisitions carried out to recompose the portfolio after the sales of public debt completed during 2020 and also as a result of the increase in our liquidity due to higher retail deposits from our customers who took precautionary measures in response to the COVID-19 pandemic.

Our ALCO portfolio has a low risk profile, mainly comprised of Spanish sovereign debt, which represented 62.91% of our ALCO portfolio as of December 31, 2021[64], and bonds issued by the Spanish company for the management of assets arising from the restructuring of the banking system (Sociedad de Gestión de Activos Procedentes de la Reestructuración Bancaria, S.A.) ("**SAREB**") and subscribed by Banco Caja3 in exchange for the transfer of certain of Banco Caja3's non-performing real estate assets to SAREB, which are backed by an irrevocable guarantee of the Spanish government, which represented 15.57% of our ALCO portfolio as of December 31, 2021. As of December 31, 2021, the average duration of our ALCO portfolio was 5.3 years and the average interest rate on average ALCO portfolio[65] stood at 0.34% (0.42%[66] excluding bonds issued by SAREB). 97% of our ALCO portfolio is accounted for at amortized cost. In terms of maturities, less than 10% of our ALCO portfolio will mature over the next 3 years (€259 million in 2022, €16 million in 2023 and €681 million in 2024). The ALCO portfolio contribution to our total interest income represented 6.19% as of December 31, 2021, compared to 8.94% and 10.40% for the years ended December 31, 2020 and 2019[67], respectively, and below our peers's average of 10.5% (*source: peers' publicly available information*)[68].

Investments and divestments

We invest in business projects that are complementary to our main activities, that promote the economic development in the areas in which we are present and that are guided by socially and environmentally responsible criteria. We have equity investments in several sectors, including tourism, real estate, media, logistics and services. Our equity investments are intended to support the domestic productive sectors (preferably SMEs) through projects that help to create wealth and employment across our areas of influence, support entrepreneurs and diversify our sources of income.

In accordance with our strategic plans, "Plan + 2020" and "Plan Desafío 2023", we have continued our active policy of divesting from non-core business holdings, as well as other investments that have reached a sufficient degree of development and autonomy. As such, in 2022 (up to the date of this Registration Document) we have completed two full divestments and one partial divestment, with a divestment value of

66 Assuming SAREB bonds' interest rate is 0%.

67 See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

68 The ALCO portfolio contribution to the total interest income of our peers is calculated using reported numbers of revenue from fixed income portfolio and interest income as of December 31, 2021 (as derived from their respective consolidated annual report). Average is calculated as the simple average of peers' ALCO portfolio contribution to the total interest income.

€19.8 million. The most significant divestments in 2022 was Solavanti, S.L. (full divestment). In 2021, we completed seven full divestments and five partial divestments, with a divestment value of €18.6 million. The most significant divestments in 2021 were (i) Estudio Técnico de Inversiones, S.A. (full divestment) (ii) Energías Alternativas de Teruel, S.A. (full divestment) (iii) Ahorro Corporación Infraestructuras F.C.R (partial divestment), (iv) C y E Badajoz Servicios Sociosanitarios, S.A. (full divestment) and (v) Rioja Nueva Economía, S.A. (partial divestment). In 2020, we completed eight full divestments and six partial divestments with a divestment value of more than €59 million. The most significant divestments in 2020 were (i) CASER[69] (partial divestment) (which represents €53 million out of the total €59 million in divestments recorded in 2020) and (ii) Ahorro Corporación Infraestructuras F.C.R (partial divestment). In 2019, we completed five full divestments and nine partial divestments with a divestment value of €12.9 million. The most significant divestments in 2019 were (i) Concessia, Cartera y Gestión de Infraestructuras, S.A. (partial divestment), (ii) Rioja Nueva Economía, S.A. (partial divestment), (iii) EBN Vaccaria F.C.R. (partial divestment) and (v) Ahorro Corporación. S.A. (full divestment).

In addition, since December 31, 2019 up to the date of this Registration Document, we have completed investments for a total amount of €1.9 million. The most significant investments were (i) Viacajas, S.A., (ii) Foresta Private Individual I, S.A. and (ii) Foresta Private Equity II, S.C.R.

Explanation of key income statement items

Net interest income

Net interest income includes interest income less interest expense and expenses on share capital repayable on demand.

In general, net interest income items are accounted on an accruals basis, applying the effective interest method defined in IFRS 9 – Annex A taking into account the effective yield of the asset or liability or an applicable floating rate. Interest income and expense include the amortization of any discount or premium or other differences between the initial carrying amount of an interest-bearing instrument and its amount at maturity calculated on an effective interest rate basis. Under IFRS-EU, loan origination and other related fees, net of associated direct costs, are recognized in interest income, and accrued, over the expected average life of the loan.

Fee and commission income and fee and commission expense

Fee and commission income includes fees and commissions received by us for a variety of activities, including mainly fees relating to collection and payment services, fees relating to marketing of non-bank financial products (mutual funds, pension funds and risk insurance products), commissions and fees relating to the buying and selling of securities by our customers, foreign currency exchange fees, contingent risk and commitment fees and other fees.

Fee and commission expense mainly include commissions assigned to other banks and correspondent banks and commission expense on securities transactions.

Income and expense relating to commissions and similar fees, which are not included in the calculation of the effective interest rate of transactions and/or do not form part of the acquisition cost of financial assets

[69] On January 24, 2020, we entered into a purchase and sale agreement with Helvetia Schweizerische Versicherungsgesellschaft AG for a portion of our stake in Caja de Seguros Reunidos, Compañía de Seguros y Reaseguros, S.A. ("**CASER**"), representing 4.45% of CASER's share capital and voting rights. On June 25, 2020, we obtained the relevant regulatory authorizations to formalize the aforementioned sale, which was completed for a final price of €53 million. The recording of this transaction resulted in a reclassification from "Accumulated other comprehensive income" to "Other reserves" in the amount of €32 million (the "**CASER Sale Transaction**"). After the execution of the CASER Sale Transaction, we maintain a 9.5% shareholding in CASER. The positive impact of the CASER Sale Transaction on our CET1 fully-loaded ratio as of June 30, 2020 was 24 basis points. Additionally, on the same date, Ibercaja entered into a novation of the CASER Agency Agreement.

or liabilities, except for those carried at fair value through the income statement, are recognized in the income statement using different methods depending on their nature. The most significant methods used are explained below:

(i) Amounts associated with the acquisition of financial assets and liabilities carried at fair value through the income statement are recognized in the consolidated income statement at the payment date.

(ii) Amounts arising from long-term transactions or services are recognized in the consolidated income statement over the term of the transactions or services.

(iii) Amounts relating to one-off events are recorded in the consolidated income statement when the relevant event takes place.

Gains/(losses) on derecognition of financial assets and liabilities not measured at fair value through profit and loss

Gains/(losses) on derecognition of financial assets and liabilities not measured at fair value through profit and loss mainly comprise "Financial assets at fair value through other comprehensive income", "financial assets at amortized cost" and "financial liabilities at amortized cost".

Other operating income and other operating expenses

Other operating income mainly comprises "income from investment property", "income from other operating leases", "sales and income from provision of services" and "other items". Other operating expenses mainly comprises "operating expenses on investment properties", "contribution to National Resolution Fund", "contribution to Deposit Guarantee Fund" and "other items".

Income from assets covered by insurance and reinsurance contracts and liability expenses covered by insurance or reinsurance contracts

Income from assets covered by insurance and reinsurance contracts, includes the amounts of insurance premiums collected and insurance or reinsurance income earned by subsidiaries.

Liability expenses covered by insurance or reinsurance contracts, includes the amounts of benefits paid and other expenses directly associated with insurance contracts, premiums paid to third parties for reinsurance and net provisions made to cover the risks of insurance contracts accrued by subsidiaries.

These income statement items should be analyzed together and their net impact on the income statement is not material.

Administration expenses

Administration expenses includes staff expenses and other administration expenses.

Staff expenses

Staff expenses mainly include wages and salaries, social security contributions, contributions to pension funds and insurance policies and severance payments, including staff expenses derived from the 2021-2022 Redundancy Plan. Wages and salaries, social security contributions and other salary-related costs are recognized over the period in which the employees provide the services to which the payments relate. Expenses related to individuals not on our payroll, such as external consultants, are included in other administration expenses.

Other administration expenses

Other administration expenses include, among other items, buildings, installations and office equipment, charges and taxes, communications and equipment maintenance, licenses, works and computer software.

Impairment or reversal of impairment on financial assets not measured at fair value through profit or loss

The carrying value of financial assets is generally adjusted against the consolidated income statement when there is objective evidence that there are impairment losses. This is the case where:

- for debt instruments, when there is an event which has a negative impact on the relevant future cash flows to be received; and
- for equity instruments, when there is an event that evidences it is impossible to recover their carrying value.

Impairment or reversal of impairment on non-financial assets

Impairment or reversal of impairment on non-financial assets includes impairments or reversals on: (i) tangible assets including tangible assets for own use, investment property and inventory; (ii) intangible assets including goodwill and other intangible assets; and (iii) other assets.

Gains/(Losses) on derecognized of non-financial assets

Gains/(Losses) on derecognized of non-financial assets and shareholdings comprise the result obtained through the disposal of: (i) tangible assets including foreclosed assets that are classified as inventory; and (ii) investments in joint ventures and associates.

Gains/(losses) from non-current assets and disposal group of items classified as held for sale not qualifying as discontinued operations

Gains/(losses) from non-current assets and disposal group of items classified as held for sale not qualifying as discontinued operations comprises the result of the disposal of non-current assets, including tangible assets classified as non-current assets held for sale and equity instruments.

Profit/(loss) before tax from continuing operations

Profit/(loss) before tax from continuing operations is defined as the gross income less administrative expenses, amortization and depreciation expenses, provisions or reversal of provisions, impairment losses on financial assets not measured at fair value through profit and loss, impairment losses on investments in joint ventures or associates, impairment losses on non-financial assets, gains/(losses) on derecognized of non-financial assets (net), negative goodwill recognized in profit or loss and gains/(losses) on profit or loss from non-current assets and disposals groups of items classified as held for sale not qualifying as discontinued operations.

Expense or income from taxes on income from continuing operations

Tax expense or income from taxes on income from continuing operations is recognized in the consolidated income statement. Income tax for the year is calculated as tax payable on taxable income for the year, as adjusted for variations during the year in asset and liability balances arising from temporary differences, tax deductions and allowances, and any tax loss.

We consider that there is a temporary difference when there is a difference between the carrying amount and the taxable amount of an asset or liability. The amount attributed to an asset or liability for tax purposes is treated as the tax base. A taxable temporary difference is a difference that will generate a future obligation for us to make a payment to the relevant authority. A deductible temporary difference is a difference that will generate a refund right or a reduction in a payment to be made to the relevant authority in the future.

Tax credits for deductions and allowances and tax credits for tax-loss carry forwards are amounts that, though generated on the completion of an activity or obtainment of a result, are not applied for tax purposes in the relevant tax return until the conditions stipulated in tax legislation are fulfilled, and provided we consider that application in future years is probable.

Profit/(Loss) from continuing operations

Profit/(Loss) from continuing operations is defined as the profit/(loss) before tax from continuing operations less income tax.

Profit/(Loss) from discontinued operations

Profit from discontinued operations is defined as income and expense, regardless of their nature, including those relating to impairment adjustments that arise during the year from a component of our operations that has been classified as discontinued. Even if those results are generated before that classification, these are presented net of the tax effect in the consolidated income statement as a single amount under this heading, both if the component remains in the consolidated balance sheet and if eliminated. This heading also includes the results from the sale or other disposal of those operations.

Profit/(Loss)

Profit is defined as the consolidated profit/(loss) from continuing operations less profit from discontinued operations.

Profit/(Loss) attributable to owners of the parent

Profit attributable to owners of the parent is defined as the profit less profit/(loss) attributable to non-controlling interest.

Explanation of key balance sheet items

Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income mainly include debt instruments which are managed using a mixed business model whose objective combines collection of contractual cash flows and sales, and whose contractual terms give rise to cash flows on specified dates (payments of principal and interest on the outstanding principal amount).

Financial assets at amortized cost

Financial assets at amortized cost include financial assets that are held to collect their contractual cash flows and whose contractual terms give rise to cash flows on specified dates (payments of principal and interest on the outstanding principal amount).

Tangible assets

Tangible assets consist of property, plant and equipment for own use, investment property and property, plant and equipment assigned under operating lease. This category also includes right-of-use assets recognized under IFRS 16.

In general, tangible assets are presented on the balance sheet at cost, this being the fair value of any consideration paid plus all cash payments made or committed net of accumulated depreciation and any value adjustment resulting from comparing the carrying value of each item with its recoverable amount.

Depreciation is calculated using the straight-line method on the basis of the acquisition cost of the assets less their residual value. The land on which buildings and other structures stand has an indefinite life and, therefore, is not depreciated. The annual expense for depreciation is charged to the consolidated statement of profit or loss.

Tax assets

Tax assets consist of current and deferred tax assets. Current tax assets are amounts that are regarded as being recoverable from the corresponding tax authority within twelve months as from the year end. Deferred tax assets are amounts that we expect to recover from the corresponding tax authority in future years.

Deferred tax assets are reviewed at each balance sheet date to verify that they remain in force, and the appropriate adjustments are made on the basis of the results of the review.

Other assets

Inventories

This category is the main component of the caption “other assets” and records non-financial assets that we:

- hold for sale in the ordinary course of business;
- are currently producing, building or developing for this purpose; or
- plan to consume in the production process or in the provision of services.

Inventories are valued at the lower of their cost, including all acquisition and conversion costs and other direct and indirect costs incurred in bringing the inventories to their present condition and location, and their net realizable value. The net realizable value of inventories is their estimated selling price in the ordinary course of business, less the estimated cost of completing production and selling expenses.

The cost of inventories which are not ordinarily interchangeable is determined on an individual basis and the cost of other inventories is determined by applying the average weighted cost method. Decreases in and, if applicable, subsequent recoveries of the net realizable value of inventories, below their carrying amount, are recognized in the consolidated statement of profit or loss in the financial year they are incurred, under "Impairment or reversal of impairment of non-financial assets (net) - Other".

The carrying value of inventories which are written off the consolidated balance sheet is recorded as an expense in the consolidated statement of profit or loss under "Other operating expenses" in the year the income from their sale is recognized.

Financial liabilities at amortized cost

Financial liabilities included in this category are initially measured at fair value, adjusted by the transaction costs directly attributable to their issue. Subsequently, they are valued at their amortized cost, calculated through the application of the effective interest rate method. This category also includes lease liabilities recognized under IFRS 16.

The interest accruing on these securities, calculated using such method, is registered under the "interest expense" heading in the consolidated income statement.

Results of operations

Consolidated Income Statement

The following table sets out our consolidated income statement for the years ended December 31 2021, 2020 and 2019:

	For the year ended December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
Interest income	549,923	632,798	663,561
(Interest expenses)	(57,097)	(99,125)	(116,315)

Comparison of consolidated income statement movements for the years ended December 31, 2021 and 2020

Interest income

Interest income decreased by 13.1%, from €632,798 thousand for the year ended December 31, 2020 to €549,923 thousand for the year ended December 31, 2021. This decrease was primarily due to the reduction in income from loans and advances to customers, a lower contribution from the ALCO portfolio and reduced income from our life savings insurance business portfolio.

The following table sets out the principal components of our interest income for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(*€ thousands, except %*)		
Non-trading financial assets mandatorily measured at fair value through profit or loss...	85	181	(53.0)%
Financial assets measured at fair value through other comprehensive income	95,251	111,533	(14.6)%
Financial assets at amortized cost..	423,097	493,287	(14.2)%
Interest rate hedging derivatives	(37,378)	(11,026)	239.0%
Other assets..	516	1,008	(48.8)%
Interest income from liabilities[(1)]	68,352	37,815	80.8%

	For the year ended December 31,		
	2021	2020	Change
	(€ *thousands, except %*)		
Total interest income	**549,923**	**632,798**	**(13.1)%**

Notes:—

(1) Includes interest income from the application of negative interest rates on the TLTRO liquidity tenders of €59,074 thousand as of December 31, 2021 (€33,173 thousand as of December 31, 2020).

The following table sets out the contribution to interest income from the categories of interest-earning assets detailed below for the years indicated[70]:

	For the year ended December 31,		
	2021	2020	Change
	(€ *thousands, except %*)		
Financial intermediaries(1)(2)	67,410	54,017	24.8%
Loans and advances to customers(2)	342,556	398,933	(14.1)%
ALCO portfolio(2)	34,028	56,592	(39.9)%
Life insurance business portfolio(2)	105,269	121,937	(13.7)%
Other assets(2)	660	1,319	(50.0)%
Total interest income	**549,923**	**632,798**	**(13.1)%**

Notes:—

(1) In accordance with Regulation (EU) 2021/451, income derived from the application of negative rates are allocated according to their nature. The asset "financial intermediaries" includes the negative interest from the balance of the liability "financial intermediaries", the most significant being the income from the TLTRO financing.

(2) Adjusted for the effect of interest rate hedging transactions.

Interest income from financial intermediaries increased by 24.8%, from €54,017 thousand for the year ended December 31, 2020 to €67,410 thousand for the year ended December 31, 2021. This increase was primarily due to the favorable conditions of the financing granted by the ECB in the TLTRO III auctions. The higher contribution is due to a higher funds balance (€5,959,000 thousand as of December 2021 compared to €5,400,000 thousand as of December 2020) and the application of a -1% interest rate from June 24, 2020.

Interest income from loans and advances to customers decreased by 14.1%, from €398,933 thousand for the year ended December 31, 2020 to €342,556 thousand for the year ended December 31, 2021. This decrease was primarily due to a lower average interest rate on average loans and advances to customers[APM] (1.19% compared to 1.36% for the year ended December 31, 2020) due to the repricing of the mortgage loan portfolio following the decline in the 12-month Euribor, the lower market interest rates for corporate financing and the high volume of Guaranteed Credit Lines formalized with a reduced return to which the cost of the guarantee is imputed. Income from loans and advances to customers accounted for 63.04% of our total interest income for the year ended December 31, 2020, compared to 62.29% for the year ended December, 2021.

Interest income from ALCO portfolio decreased by 39.9%, from €56,592 thousand for the year ended December 31, 2020 to €34,028 thousand for the year ended December 31, 2021. The decrease was primarily due to a lower average interest rate on average ALCO portfolio[APM] (0.34% compared to 0.66% for the year

[70] See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

ended December 31, 2020) due to the rotation of securities and sales made in 2020. Income from ALCO portfolio accounted for 8.94% of our total interest income[71] for the year ended December 31, 2020, compared to 6.19% for the year ended December 31, 2021.

Interest income from our life insurance business portfolio decreased by 13.7%, from €121,937 thousand for the year ended December 31, 2020 to €105,269 thousand for the year ended December 31, 2021. This decrease was primarily due to the reduction in interest income generated by the fixed income portfolio, mainly due to lower market interest rates (Euribor) and to the decrease in the balance resulting from maturities, which was partly offset by the increase in unit-linked products.

Interest expense

Interest expense decreased by 42.4%, from €99,125 thousand for the year ended December 31, 2020 to €57,097 thousand for the year ended December 31, 2021. This decrease was primarily due to lower cost of retail and wholesale funding.

The following table sets out the principal components of our interest expense for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Financial liabilities at amortized cost	(81,055)	(119,568)	(32.2)%
Interest rate hedging derivatives	50,108	59,367	(15.6)%
Liabilities under insurance contracts	(1,704)	(15,227)	(88.8)%
Other liabilities	(1,572)	(9,285)	(83.1)%
Interest expense from assets	(22,874)	(14,412)	58.7%
Total interest expense	**(57,097)**	**(99,125)**	**(42.4)%**

The following table sets out the contribution to interest expense from the categories of our interest-bearing liabilities detailed below for the years indicated[72]:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Financial intermediaries[(1)(2)]	(23,819)	(29,669)	(19.7)%
Retail deposits[(2)]	6,574	2,509	162.0%
Debt securities issued and mortgage covered bonds[(2)]	(32,634)	(52,469)	(37.8)%
Liabilities under insurance contracts[(2)]	(1,704)	(15,227)	(88.8)%
Other liabilities[(2)]	(5,514)	(4,269)	29.2%
Total interest expense	**(57,097)**	**(99,125)**	**(42.4)%**

Notes:—

[71] See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

[72] See definition, explanation, use, calculation and breakdown of Total interest expense by interest-bearing liabilities categories[APM] which are set out in "Alternative Performance Measures".

(1) The liability “financial intermediaries” includes the negative interest from the balance of the asset “financial intermediaries”.

(2) Adjusted for the effect of interest rate hedging transactions.

Interest expense from issued debt securities and mortgage covered bonds decreased by 37.8%, from €52,469 thousand for the year ended December 31, 2020 to €32,634 thousand for the year ended December 31, 2021. The decrease was primarily due to the maturity of non-renewed mortgage covered bonds and due to the fact that in the first half of 2020 part of the subordinated wholesale debt issued in 2015 remained on the balance sheet. This was redeemed in full in July 2020 and replaced by another lower-cost issue.

Negative interest expense on retail deposits[APM] increased by 162.0%, from an income of €2,509 thousand for the year ended December 31, 2020 to an income of €6,574 thousand for the year ended December 31, 2021. The increase was primarily due to a lower balance and rate of term deposits and as a consequence of our policy of collecting deposits from certain groups of customers (due to the charge for the balance on deposit from certain customers there is income instead of a cost and the average rate is more negative (reflecting additional income)). The average interest rate on average retail deposits[APM] changed to -0.02% for the year ended December 31, 2021 compared to -0.01% for the year ended December 31, 2020.

Dividend income

Dividend income increased by 83.2%, from €5,208 thousand for the year ended December 31, 2020 to €9,542 thousand for the year ended December 31, 2021. This increase was primarily due to the dividend income from CASER (€3,453 thousand for the year ended December 31, 2021 compared to no dividend for the year ended December 31, 2020) and the fact that many companies suspended dividend distributions in 2020 for prudential reasons in the context of the COVID-19 crisis.

Share of profit/(loss) of entities accounted for using the equity method

We had a profit related to entities accounted for using the equity method of €5,589 thousand for the year ended December 31, 2021, compared to a profit of €579 thousand for the year ended December 31, 2020. The increase was due to the result of Rioja de Nueva Economía, following the sale of its subsidiary Energía de Alternativas Eólicas Riojanas (recorded under “Other equity accounted entities”).

The following table sets out the principal components of our share of profit/(loss) of equity-accounted entities for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Aramón Montañas de Aragón, S.A.	(4,230)	1,398	(402.6)%
Concessia Cartera y Gestión de Infraestructuras, S.A.	(44)	(84)	(47.6)%
Henneo Media, S.A. (formerly Grupo Heraldo)	(112)	(2,716)	(95.9)%
Other equity accounted entities	9,975	1,981	403.5%
Share of profit/(loss) of equity accounted entities)	**5,589**	**579**	**865.3%**

Fee and commission income

Fee and commission income increased by 17.1%, from €390,771 thousand for the year ended December 31, 2020 to €457,495 thousand for the year ended December 31, 2021. This increase was mainly due to a higher contribution from non-bank financial product marketing fees, asset management fees and collection and payment services fees.

The following table sets out the principal components of our fee and commission income for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Contingent risk fees	8,643	8,581	0.7%
Contingent commitment fees	2,723	3,421	(20.4)%
Foreign currency exchange fees	107	90	18.9%
Collection and payment services fees	123,161	113,084	8.9%
Securities service fees	49,581	38,992	27.2%
of which: asset management	*41,627*	*29,751*	39.9%
of which: sale of securities held in custody	*7,954*	*9,241*	(13.9)%
Non-bank financial product marketing fees	254,860	206,590	23.4%
Other fees	18,420	20,013	(8.0)%
Total fee and commission income	**457,495**	**390,771**	**17.1%**

Non-bank financial product marketing fees and securities service fees related to our asset management activities[73] increased by 25.4%, from €236,341 thousand for the year ended December 31, 2020 to €296,487 thousand for the year ended December 31, 2021. This increase was primarily due to higher volume of assets under management, mainly mutual funds, and higher success fees, reflecting the strong performance of the markets throughout 2021.

Collection and payment services fees increased by 8.9%, from €113,084 thousand for the year ended December 31, 2020 to €123,161 thousand for the year ended December 31, 2021. This increase was primarily due to higher commercial activity compared to 2020 and the increase in fees charged for some services.

Securities service fees related to the sale of securities held in custody decreased by 13.9%, from €9,241 thousand for the year ended December 31, 2020 to €7,954 thousand for the year ended December 31, 2021. This decrease was primarily due to the exceptionally high volume of transactions in 2020, mainly in the months of March and April as a result of the COVID-19 pandemic.

Contingent risk fees and contingent commitment fees decreased by 5.3% from €12,002 thousand for the year ended December 31, 2020 to €11,366 thousand for the year ended December 31, 2021. This decrease was primarily due to lower income from loan commitments and financial guarantees granted.

Fee and commission expense

Fee and commission expense increased by 17.3%, from €16,636 thousand for the year ended December 31, 2020 to €19,509 thousand for the year ended December 31, 2021. This increase was primarily due to the increase of fees and commissions assigned to other entities and other fees which mainly include rebates on mutual fund commissions and the costs associated with the pension funds' permanence promotions.

[73] This item includes the income generated by management fees charged to subscribers of mutual and pension funds, as well as fees for intermediation of private insurance contracts between insurers and customers of the network and marketing fees for other investment funds unrelated to the Group.

The following table sets out the principal components of our fee and commission expense for the years indicated:

	For the year ended December 31,		
	2021	2020	Change
	(€ thousands, except %)		
Fees and commissions assigned to other entities	(6,809)	(5,792)	17.6%
Fees for securities transactions	(2,442)	(2,605)	(6.3)%
Other fees	(10,258)	(8,239)	24.5%
Total fee and commission expense	**(19,509)**	**(16,636)**	**17.3%**

Net gains/(losses) on financial assets and liabilities

Net gains on financial assets and liabilities decreased by 60.8%, from €119,165 thousand for the year ended December 31, 2020 to €46,662 thousand for the year ended December 31, 2021. This decrease was primarily due to lower results from financial assets at amortized cost.

The following table sets out the principal components of our gains/(losses) on financial assets and liabilities for the years indicated:

	For the year ended December 31,		
	2021	2020	Change
	(€ thousands, except %)		
Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit and loss	46,108	128,856	(64.2)%
Financial assets measured at fair value through other comprehensive income	*7,508*	*12,856*	(41.6)%
Financial assets at amortized cost	*40,779*	*125,366*	(67.5)%
Financial liabilities at amortized cost	*(2,179)*	*(9,366)*	(76.7)%
Net gains/(losses) on financial assets and liabilities held for trading	645	1,149	(43.9)%
Net gains/(losses) on non-trading financial assets mandatorily measured at fair value through profit or loss	103	(10,476)	(101.0)%
Net gains/(loss) from hedge accounting	(194)	(364)	(46.7)%
Net profit from financial assets and liabilities[APM]	**46,662**	**119,165**	**(60.8)%**

Net gains on the disposal of financial asset and liability accounts not measured at fair value through profit and loss decreased by 64.2%, from €128,856 thousand during the year ended December 31, 2020 to €46,108 thousand for the year ended December 31, 2021. This decrease was primarily due to lower results from the sale of assets. As of December 31, 2020, the item "Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit or loss – Financial assets at amortized cost" included, among others, the impact of the Public Debt Sale Transaction as explained in Note 11.2 to the 2020 Annual Accounts. As indicated therein, part of the Public Debt Sale Transaction was carried out by means of a forward sale, generating a result of €33,102 thousand in 2021. Additionally, as of December 31, 2021, this item included both the impact of the sale of a portfolio of domestic government debt securities carried out in 2021 (as explained in Note 11.2 to the 2021 Annual Accounts), which resulted in a positive result of €18,686 thousand, and the impact of the sale of a portfolio of doubtful loans formalized at the end of 2021 (as explained in Note 11.5 to the 2021 Annual Accounts), which resulted in a negative impact of €9,623 thousand.

As of December 31, 2020, "Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit or loss – Financial liabilities at amortized cost" mainly reflected the impact of the subordinated obligations repurchase transaction, under which we paid an average premium of 2.14% to the holders of the issue who participated in the buy-back offer. The final impact of this subordinated obligations repurchase transaction was a negative result of €9,363 thousand.

Other operating income

Other operating income decreased by 19.3%, from €47,022 thousand for the year ended December 31, 2020 to €37,944 thousand for the year ended December 31, 2021. As of December 31, 2020, "Other items" mainly included the initial recognition of €15 million in revenue, as part of the €70 million fixed commission already received by Ibercaja Mediación for the signing of the novation agreement modifying the CASER Agency Agreement. The rest of the initial fixed commission which has not been recognized (i.e. €55 million) is being accrued in our consolidated income statement during a period of 10 years following the Effective Date as non-banking commissions.

The following table sets out the principal components of our other operating income for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Income from investment property	3,905	4,141	(5.7)%
Income from other operating leases	16,475	15,350	7.3%
Sales and income from provision of services	4,187	4,416	(5.2)%
Other items	13,377	23,115	(42.1)%
Other operating income	**37,944**	**47,022**	**(19.3)%**

Other operating expenses

Other operating expenses remained stable, from €78,581 thousand for the year ended December 31, 2020 to €78,553 thousand for the year ended December 31, 2021. The higher expense incurred as a result of the contribution made to the National Resolution Fund is offset by the lower cost associated to the contribution to the Deposit Guarantee Fund.

The following table sets out the principal components of our other operating expenses for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Operating expenses on investment properties	(1,079)	(1,591)	(32.2)%
Contribution to the National Resolution Fund	(13,794)	(11,094)	24.3%
Contribution to the Deposit Guarantee Fund	(51,819)	(53,269)	(2.7)%
Other items	(11,861)	(12,627)	(6.1)%

	For the year ended December 31,		
	2021	2020	Change
	(€ thousands, except %)		
Other operating expense	**(78,553)**	**(78,581)**	**0.0%**

Administration expenses

Administration expenses include staff expenses and other administration expenses.

Staff expenses

Staff expenses decreased by 25.3%, from €502,568 thousand for the year ended December 31, 2020 to €375,183 thousand for the year ended December 31, 2021. Excluding the extraordinary staff expenses under the 2021-2022 Redundancy Plan (€151,041 thousand in 2020 and €12,842 thousand in 2021, as described in Note 38 of the 2021 Annual Accounts), staff expenses increased by 3.1% in 2021. This increase was primarily due to the fulfillment of certain variable remuneration objectives in 2021 and lower expenses in 2020 as a consequence of sick leaves taken during the COVID-19 pandemic. The cost savings from the 2021-2022 Redundancy Plan will materialize in the coming quarters as employee terminations are being staggered until June 2022. As of December 31, 2021, we had reduced our workforce by 525 employees and we had closed 117 branches out of the 750 exits and 199 closures, respectively, agreed under the 2021-2022 Redundancy Plan.

In December 2020, as part of the 2021-2022 Redundancy Plan, we reached an agreement with the employees' representatives to reduce our workforce by up to 750 employees. We primarily chose these employees on the basis of age or the closure of the relevant work center. The employee departures have taken place on a gradual basis during 2021 and will continue during the first half of 2022. In accordance with point 165 of "IAS 19 - Employee benefits" and the conditions established in "IAS 37 - Provisions for the recognition of restructuring costs", the 2021-2022 Redundancy Plan has led to staff expenses amounting to €151,041 thousand in 2020 (see Note 21 of the 2020 Annual Accounts which includes the outstanding liabilities associated with the 2021-2022 Redundancy Plan). In 2021, we have recorded an additional expense of €12,842 thousand due to changes in the exit date of some employees, with the rest of the expense corresponding to a contingency linked to labor costs arising from restructuring processes carried out in previous years due to changes in social security legislation during 2021.

The following table sets out the principal components of our staff expenses for the years indicated:

	For the year ended December 31,		
	2021	2020	Change
	(€ thousands, except %)		
Wages and salaries	(270,847)	(263,920)	2.6%
Social security contributions	(68,638)	(68,660)	0.0%
Contributions to pension funds and insurance policies	(17,667)	(17,698)	(0.2)%
Severance payments	(16,333)	(151,072)	(89.2)%
Other staff costs	(1,698)	(1,218)	39.4%
Staff expenses	**(375,183)**	**(502,568)**	**(25.3)%**

For the year ended December 31, 2021, we have recorded an expense of €1,544 thousand in "wages and salaries" corresponding to the accrual of the Incentive Plan (Note 2.13.5 to our 2021 Annual Accounts).

Other administration expenses

Other administration expenses increased by 10.5%, from €153,020 thousand for the year ended December 31, 2020 to €169,066 thousand for the year ended December 31, 2021. This increase was primarily due to the slowdown of activity in 2020 as a result of the COVID-19 pandemic and the launch of our "Desafío 2023" Strategic Plan, which has increased the cost of external services and technical reports associated with the implementation of the various initiatives contemplated therein.

The following table sets out the principal components of our other administration expenses for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Buildings, installations and office equipment	(27,668)	(26,484)	4.5%
Equipment maintenance, licenses, works and computer software	(21,879)	(22,239)	(1.6)%
Communications	(12,154)	(10,864)	11.9%
Advertising and publicity	(5,771)	(5,003)	15.4%
Charges and taxes	(18,170)	(20,221)	(10.1)%
Other management and administration expenses	(83,424)	(68,209)	22.3%
Other administration expenses	**(169,066)**	**(153,020)**	**10.5%**

Other management and administration costs increased by 22.3% in 2021, mainly due to higher expenses related to legal counsel and external services.

Provisions or reversals of provisions

Provisions or reversals of provisions changed from reversals of provisions of €14,236 thousand for the year ended December 31, 2020 to provisions of €5,722 thousand for the year ended December 31, 2021. As of December 31, 2020, the reversal of provisions was mainly related to the reversal of the provision recorded in 2019 related to the repurchase of subordinated bonds and the expiration of a contingency related to labor costs. As of December 31, 2021, the provision was mainly related to a provision for contingencies related to floor clauses and mortgage loan expenses.

The table below shows a description of the categories of provisions on our balance sheet and the changes during the years ended December 31, 2021 and 2020:

	Pensions and other post-employment defined benefit obligations	**Other long-term employee remuneration**	**Lawsuits and guarantees given**	**Commitments and guarantees given**	**Other provisions**	**Total**
			(€ thousands)

Impairment or reversal of impairment on financial assets not measured at fair value through profit or loss

Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss decreased by 64.5%, from €219,646 thousand for the year ended December 31, 2020 to €78,008 thousand for the year ended December 31, 2021. This decrease was primarily due to an extraordinary non-recurrent credit risk provision of €90,124 thousand recorded in 2020 to cover the potential impact of the economic effects associated with the COVID-19 pandemic. Stripping out this extraordinary provision, impairment or reversal of impairment of financial assets not measured at fair value through profit or loss decreased by 39.8% due to lower NPLs entries.

Impairment or reversal of impairment on non-financial assets

Impairment or reversal of impairment on non-financial assets increased by 665.0%, from €1,559 thousand for the year ended December 31, 2020 to €11,927 thousand for the year ended December 31, 2021. The increase was primarily due to higher impairments linked to foreclosed assets.

The following table sets out the principal components of our impairment or reversal of impairment in non-financial assets for the years indicated:

	For the year ended December 31,		
	2021	2020	Change
	(€ thousands, except %)		
Tangible assets...	(4,414)	(1,471)	200.1%
Property, plant and equipment...	*(1,765)*	*(386)*	357.3%
Investment property...	*(2,649)*	*(1,085)*	144.1%
Others	(7,513)	(88)	—
Impairment or reversal of impairment losses in the value of non-financial assets...	**(11,927)**	**(1,559)**	**665.0%**

The increase in impairment recorded in “Others” corresponded mainly to the effects of the recalibration of the foreclosed assets internal model in 2021.

Gains or losses on derecognition of non-financial assets, net

Gains or losses on derecognition of non-financial assets, net increased by 70.6% from losses of €3,047 thousand for the year ended December 30, 2020 to losses of €5,199 thousand for the year ended December 31, 2021. The results of other non-current non-classified assets held for sale in 2021 mainly included the sale of land of a real estate subsidiary of the Group, which generated a loss of €4.4 million, without the remaining transactions being material.

The following table sets out the components of our gains or losses on derecognition of non-financial assets for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Gains/(losses) on disposal of assets not classified as non-current for sale	(5,594)	(3,066)	82.5%
Gains/(losses) from sales of investments	395	19	—
Gains or losses on derecognition of non-financial assets, net	**(5,199)**	**(3,047)**	**70.6%**

Gains or losses from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations

Losses from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations increased by 27.5% from losses of €19,830 thousand for the year ended December 31, 2020 to losses of €25,281 thousand for the year ended December 31, 2021. The increase in impairment of other non-current assets for sale corresponded mainly to the effects of the recalibration of the foreclosed assets internal model in 2021. The higher profit from disposal of other non-current assets for sale was due to an increase in sales volume caused by the economic recovery in 2021.

The following table sets out the principal components of our gains or losses from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Gains/(losses) for impairment of other non-current assets for sale	(31,166)	(18,861)	65.2%
Profit/loss from disposal of other non-current assets for sale	5,885	(969)	(707.3)%
Gains/(losses) from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations	**(25,281)**	**(19,830)**	**27.5%**

Expense or income from taxes on income from continuing operations

Expense from taxes on income from continuing operations increased by 113.6% from €29,868 thousand for the year ended December 31, 2020 to €63,788 thousand for the year ended December 31, 2021. This increase was primarily due to a higher consolidated profit before tax (€53,470 thousand for the year ended December 31, 2020 to €214,773 thousand for the year ended December 31, 2021).

The following table sets out the reconciliation of the accounting and tax results for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Consolidated profit before tax	**214,773**	**53,470**	**301.7%**
Corporate income tax at the 30% tax rate	64,432	16,041	301.7%
Positive permanent differences	6,165	(1,958)	(414.9)%
Other adjustments on consolidation	(1,677)	(174)	863.8%
Tax deductions and tax credits	(2,143)	(1,163)	84.3%
Write-off of deferred tax assets	—	19,210	—
Corporate income tax expense for the year	**66,777**	**31,956**	**109.0%**
Adjustments to prior-year tax expense	(2,989)	(2,088)	43.2%
Total corporate income tax expense	**63,788**	**29,868**	**113.6%**

Comparison of consolidated income statement movements for the years ended December 31, 2020 and 2019

Interest income

Interest income decreased by 4.6%, from €663,561 thousand for the year ended December 31, 2019 to €632,798 thousand for the year ended December 31, 2020. This decrease was primarily due to the decrease in income from loans and advances to customers, a small contribution from the fixed-income portfolio and the reduction of the income of the life savings insurance business portfolio of the Group.

The following table sets out the principal components of our interest income for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Financial assets held for trading	—	—	—
Non-trading financial assets mandatorily measured at fair value through profit or loss	181	420	(56.9)%
Financial assets at fair value through profit and loss	—	—	—
Financial assets measured at fair value through other comprehensive income	111,533	131,258	(15.0)%
Financial assets at amortized cost	493,287	536,531	(8.1)%
Interest rate hedging derivatives	(11,026)	(19,709)	(44.1)%
Other assets	1,008	751	34.2%
Interest income from liabilities[1]	37,815	14,310	164.3%
Total interest income	**632,798**	**663,561**	**(4.6)%**

Notes:—

(1) Includes interest income from the application of negative interest rates on the TLTRO liquidity tenders of €33,173 thousand as of December 31, 2020 (€13,306 thousand as of December 31, 2019).

The following table sets out the contribution to interest income from the categories of interest-earning assets detailed below for the years indicated[74]:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Financial intermediaries(1)(2)	54,017	14,004	285.7%
Loans and advances to customers(2)	398,933	435,281	(8.4)%
ALCO portfolio(2)	56,592	69,023	(18.0)%
Life insurance business portfolio(2)	121,937	144,550	(15.6)%
Other assets(2)	1,319	703	87.6%
Total interest income	**632,798**	**663,561**	**(4.6)%**

Notes:—

(1) In accordance with the Regulation (EU) 2021/451, income derived from the application of negative rates are allocated according to their nature. The asset "financial intermediaries" includes the negative interest from the balance of the liability "financial intermediaries", the most significant being the income from the TLTRO financing.

(2) Adjusted for the effect of interest rate hedging transactions.

Interest income from financial intermediaries increased by 285.7%, from €14,004 thousand for the year ended December 31, 2019 to €54,017 thousand for the year ended December 31, 2020. This increase was primarily due to the favorable conditions of the financing granted by the ECB in the TLTRO III auction in June 2020.

Interest income from loans and advances to customers decreased by 8.4%, from €435,281 thousand for the year ended December 31, 2019 to €398,933 thousand for the year ended December 31, 2020. This decrease was primarily due to the decrease in the volume of loans and advances to customers and a lower average interest rate. The average interest rate on average loans and advances to customers[APM] was 1.36%, reflecting a nine basis points decrease compared to 2019, as a result of the repricing of the mortgage loan portfolio after the drop in the 12-month Euribor (eight basis points on average compared to 2019) and the granting of Guaranteed Credit Lines at reduced interest rates. Income from loans and advances to customers accounted for 63.04% of our total interest income[75] for the year ended December 31, 2020, compared to 65.60% for the year ended December 31, 2019.

Interest income from ALCO portfolio decreased by 18.0%, from €69,023 thousand for the year ended December 31, 2019 to €56,592 thousand for the year ended December 31, 2020. The decrease was due to the reduction of the average interest rate on average ALCO portfolio[76] (0.66% compared to 0.97% in 2019), due to the portfolio rotation which was partially offset by the higher average balance. Interest income from ALCO portfolio accounted for 8.94% of our total interest income for the year ended December 31, 2020 compared to 10.40% for the year ended December 31, 2019.

Interest income from our life insurance business portfolio decreased by 15.6%, from €144,550 thousand for the year ended December 31, 2019 to €121,937 thousand for the year ended December 31, 2020. This

[74] See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

[75] See definition, explanation, use, calculation and breakdown of Total interest income by interest-earning assets categories[APM] which are set out in "Alternative Performance Measures".

[76] See definition, explanation, use, calculation and breakdown of Average rates on interest-earning assets[APM] which are set out in "Alternative Performance Measures".

decrease was primarily due to the reduction in interest income generated by the fixed income portfolio, mainly due to lower market interest rates (Euribor) and by the decrease in the balance resulting from maturities, which was not partly offset by the increase in unit-linked products.

Interest expense

Interest expense decreased by 14.8%, from €116,315 thousand for the year ended December 31, 2019 to €99,125 thousand for the year ended December 31, 2020. This decrease was primarily due to lower cost of retail and wholesale funding.

The following table sets out the principal components of our interest expense for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Financial liabilities at amortized cost	(119,568)	(146,915)	(18.6)%
Interest rate hedging derivatives	59,367	78,142	(24.0)%
Liabilities under insurance contracts	(15,227)	(32,078)	(52.5)%
Other liabilities	(9,285)	(3,747)	147.8%
Interest expense from assets	(14,412)	(11,717)	23.0%
Total interest expense	**(99,125)**	**(116,315)**	**(14.8)%**

The following table sets out the contribution to interest expense from the categories of our interest-bearing liabilities detailed below for the years indicated[77]:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Financial intermediaries(1)(2)	(29,669)	(9,945)	198.3%
Retail deposits(2)	2,509	(4,948)	-
Debt securities issued and mortgage covered bonds(2)	(52,469)	(65,597)	(20.0)%
Liabilities under insurance contracts(2)	(15,227)	(32,078)	(52.5)%
Other liabilities(2)	(4,269)	(3,747)	13.9%
Total interest expense	**(99,125)**	**(116,315)**	**(14.8)%**

Notes:—

(1) The liability "financial intermediaries" includes the negative interest from the balance of the asset "financial intermediaries".

(2) Adjusted for the effect of interest rate hedging transactions.

Interest expense from issued debt securities and mortgage covered bonds decreased by 20.0%, from €65,597 thousand for the year ended December 31, 2019 to €52,469 thousand for the year ended December 31, 2020, mainly due to the repurchase and redemption of €500,000 thousand Tier 2 capital instruments issued in 2015 and the subsequent issuance of €500,000 thousand of new Tier 2 capital instruments at a lower rate

[77] See definition, explanation, use, calculation and breakdown of Total interest expense by interest-bearing liabilities categories[APM] which are set out in "Alternative Performance Measures".

(2.75% compared to 5% interest rate of the redeemed Tier 2 capital instruments), as well as the maturity of non-renewed covered bonds.

Interest expense on retail deposits[APM] decreased by 150.7%, from an expense of €4,948 thousand for the year ended December 31, 2019 to an income of €2,509 thousand for the year ended December 31, 2020. The decrease was primarily due to lower balance and rate of term deposits and the collection, under certain circumstances, of credit balances of companies (SMEs and corporates) on demand accounts.

Dividend income

Dividend income decreased by 58.8%, from €12,652 thousand for the year ended December 31, 2019 to €5,208 thousand for the year ended December 31, 2020. This decrease was primarily due to the absence of dividends from CASER following the partial sale of our stake by virtue of the CASER Sale Transaction).

Share of profit/(loss) of entities accounted for using the equity method

We had a profit related to entities accounted for using the equity method of €579 thousand for the year ended December 31, 2020, compared to a profit of €431 thousand for the year ended December 31, 2019. The increase was due to higher profits from Aramón Montañas de Aragón, S.A, together with higher profits from other equity-accounted entities, which was partially offset by losses from Henneo Media, S.A.

The following table sets out the principal components of our share of profit/(loss) of equity-accounted entities for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Aramón Montañas de Aragón, S.A.	1,398	418	234.4%
Concessia Cartera y Gestión de Infraestructuras, S.A.	(84)	712	—
Henneo Media, S.A. (formerly Grupo Heraldo)	(2,716)	(582)	366.7%
Other equity accounted entities	1,981	(117)	—
Share of profit/(loss) of equity accounted entities)	**579**	**431**	**34.3%**

Fee and commission income

Fee and commission income decreased by 5.2%, from €412,375 thousand for the year ended December 31, 2019 to €390,771 thousand for the year ended December 31, 2020. The decline is mainly due to reduced activity and market evolution resulting from the economic effects of the COVID-19 pandemic.

The following table sets out the principal components of our fee and commission income for the years indicated:

	For the year ended December 31,		
	2020	2019	Change
	(€ thousands, except %)		
Contingent risk fees	8,581	10,102	(15.1)%
Contingent commitment fees	3,421	3,653	(6.4)%
Foreign currency exchange fees	90	267	(66.3)%
Collection and payment services fees	113,084	117,601	(3.8)%
Securities service fees	38,992	61,501	(36.6)%
of which: asset management	*29,751*	*53,603*	*(44.5)%*
of which: sale of securities held in custody	*9,241*	*7,898*	*17.0%*
Non-bank financial product marketing fees	206,590	195,389	5.7%
Other fees	20,013	23,862	(16.1)%
Total fee and commission income	**390,771**	**412,375**	**(5.2)%**

Non-bank financial product marketing fees and securities service fees related to our asset management activities[78] decreased by 5.1%, from €248,992 thousand for the year ended December 31, 2019 to €236,341 thousand for the year ended December 31, 2020. This decrease was primarily due to the reduction of success fees under portfolio management and private banking arrangements as a result of the market evolution resulting from the COVID-19 pandemic.

Collection and payment services fees decreased by 3.8%, from €117,601 thousand for the year ended December 31, 2019 to 113,084 thousand for the year ended December 31, 2020. This decrease was primarily due to a fall in retail activity, reduced ATM transactions and foreign currency card payments as a result of the COVID-19 pandemic.

Securities service fees related to the sale of securities held in custody increased by 17.0%, from €7,898 thousand for the year ended December 31, 2019 to €9,241 thousand for the year ended December 31, 2020. This increase was primarily due to a higher number of transactions, especially in March 2020.

Contingent risk fees decreased by 15.1%, from €10,102 thousand for the year ended December 31, 2019 to €8,581 thousand for the year ended December 31, 2020. This decrease was primarily due to the reduced levels of business activity during a significant part of 2020 as a result of the COVID-19 pandemic that affected commissions related to financial guarantees granted.

Fee and commission expense

Fee and commission expense decreased by 10.7%, from €18,636 thousand for the year ended December 31, 2019 to €16,636 thousand for the year ended December 31, 2020. This decrease was primarily due to the reduction of fees and commissions assigned to other entities and other fees, which mainly include rebates on mutual fund commissions and the costs associated with the pension funds' permanence promotions.

The following table sets out the principal components of our fee and commission expense for the years indicated:

[78] This item includes the income generated by management fees charged to subscribers of mutual and pension funds, as well as fees for intermediation of private insurance contracts between insurers and customers of the network and marketing fees for other investment funds unrelated to the Group.

	For the year ended December 31,		
	2020	2019	Change
	(*€ thousands, except %*)		
Fees and commissions assigned to other entities	(5,792)	(7,597)	(23.8)%
Fees for securities transactions	(2,605)	(1,791)	45.4%
Other fees	(8,239)	(9,248)	(10.9)%
Total fee and commission expense	**(16,636)**	**(18,636)**	**(10.7)%**

Net gains/(losses) on financial assets and liabilities

Net gains on financial assets and liabilities increased by 1,583.8%, from €7,077 thousand for the year ended December 31, 2019 to €119,165 thousand for the year ended December 31, 2020. This increase was primarily due to gains from the sale of bonds in the portfolio at amortized cost. Net gains on financial assets and liabilities for the year ended December 31, 2019 recorded the negative impact of €42 million of the Ordesa Transaction and the Costa Transaction.

The following table sets out the principal components of our gains/(losses) on financial assets and liabilities for the years indicated:

	For the year ended December 31,		
	2020	2019	Change
	(*€ thousands, except %*)		
Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit and loss	128,856	8,261	1,459.8%
Financial assets measured at fair value through other comprehensive income	*12,856*	*30,669*	*(58.1)%*
Financial assets at amortized cost	*125,366*	*(23,757)*	—
Financial liabilities at amortized cost	*(9,366)*	*477*	—
Other	—	*872*	—
Net gains/(losses) on financial assets and liabilities held for trading	1,149	1,220	(5.8)%
Net gains/(losses) on non-trading financial assets mandatorily measured at fair value through profit or loss	(10,476)	(3,718)	181.8%
Net gains/(losses) on financial assets and liabilities designated at fair value	—	747	—
Net gains/(loss) from hedge accounting	(364)	567	—
Net gains/(losses) on financial assets and liabilities	**119,165**	**7,077**	1,583.8%

Net gains on the disposal of financial asset and liability accounts not measured at fair value through profit and loss increased by 1,459.8%, from €8,261 thousand during the year ended December 31, 2019 to €128,856 thousand for the year ended December 31, 2020. This increase was primarily due to the gains, obtained on the sale of Spanish government debt securities of the portfolio at amortized cost by means of the Public Debt Sale Transaction to obtain liquidity in response to the extraordinary circumstances of the COVID-19 pandemic, which amounted to €114,619 thousand, explained in Note 11.2 of the 2020 Annual Accounts.

Other operating income

Other operating income increased by 26.8%, from €37,073 thousand for the year ended December 31, 2019 to €47,022 thousand for the year ended December 31, 2020. This increase was primarily due to the initial recognition of €15,000 thousand (included under "other items" in the table below) for the signing of the novation agreement modifying CASER's non-life insurance distribution contract which was offset by the decrease in income from investment property by 23.0% and the decrease in sales and income from provision services by 17.4%, both as a result of the slowdown in activity caused by the COVID-19 pandemic. Although the entire €70 million fixed commission has been already received by Ibercaja Mediación for the signing of the novation agreement modifying the CASER Agency Agreement, this amount was not recognized in full upon the signing of the novation agreement in January 2020. The application of IFRS 15 to this specific case is technically complex, with different interpretations being admitted, so that, following the interpretation of the CNMV, only €15 million was recognised in the consolidated profit and loss account as of December 31, 2020. The remaining amount of the initial fixed fee, i.e. €55 million, is being accrued in the consolidated profit and loss account during the 10 years following the Effective Date in accordance with the provisions of IFRS 15.

The following table sets out the principal components of our other operating income for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Income from investment property	4,141	5,376	(23.0)%
Income from other operating leases	15,350	14,276	7.5%
Sales and income from provision of services	4,416	5,344	(17.4)%
Other items	23,115	12,077	91.4%
Other operating income	**47,022**	**37,073**	**26.8%**

Other operating expenses

Other operating expenses increased by 8.4%, from €72,473 thousand for the year ended December 31, 2019 to €78,581 thousand for the year ended December 31, 2020. This increase was primarily due to the higher expense incurred as a result of the contributions made to the Deposit Guarantee Fund, arising from the increase in savings balances (see Note 1.8.2 of the 2020 Annual Accounts).

The following table sets out the principal components of our other operating expenses for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Operating expenses on investment properties	(1,591)	(1,977)	(19.5)%
Contribution to the National Resolution Fund	(11,094)	(10,350)	7.2%
Contribution to the Deposit Guarantee Fund	(53,269)	(48,520)	9.8%
Other items	(12,627)	(11,626)	8.6%
Other operating expense	**(78,581)**	**(72,473)**	**8.4%**

Administration expenses

Administration expenses include staff expenses and other administration expenses.

Staff expenses

Staff expenses increased by 39.2%, from €360,944 thousand for the year ended December 31, 2019 to €502,568 thousand for the year ended December 31, 2020. Excluding the extraordinary staff expenses of €151,041 thousand in 2020 under the 2021-2022 Redundancy Plan (Note 38 of the 2020 Annual Accounts), staff expenses fell by 2.6% primarily due to lower wages and salaries, social security contributions and training costs.

In December 2020, as part of the 2021-2022 Redundancy Plan, we reached an agreement with the employees' representatives to reduce our workforce by up to 750 employees. We primarily chose these employees on the basis of age or the closure of the relevant work center. The employee departures have taken place on a gradual basis during 2021 and will continue during the first half of 2022. In accordance with point 165 of "IAS 19 - Employee benefits" and the conditions established in "IAS 37 - Provisions for the recognition of restructuring costs", the 2021-2022 Redundancy Plan has led to staff expenses amounting to €151,041 thousand in 2020 (see Note 21 of the 2020 Annual Accounts which includes the outstanding liabilities associated with the 2021-2022 Redundancy Plan).

The following table sets out the principal components of our staff expenses for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Wages and salaries	(263,920)	(270,066)	(2.3)%
Social security contributions	(68,660)	(71,018)	(3.3)%
Contributions to pension funds and insurance policies	(17,698)	(17,255)	2.6%
Severance payments	(151,072)	—	
Other staff costs	(1,218)	(2,605)	(53.2)%
Staff costs	**(502,568)**	**(360,944)**	**39.2%**

Other administration expenses

Other administration expenses decreased by 11.0%, from €171,915 thousand for the year ended December 31, 2019 to €153,020 thousand for the year ended December 31, 2020. This decrease was primarily due to lower expenditure on other management and administration expenses, buildings, installations and office equipment, advertising and publicity and communications as a result of the cost restraint, the COVID-19 pandemic and the closure of 55 offices during 2020.

The following table sets out the principal components of our other administration expenses for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(€ thousands, except %)		
Buildings, installations and office equipment	(26,484)	(30,744)	(13.9)%
Equipment maintenance, licenses, works and computer software	(22,239)	(21,776)	2.1%
Communications	(10,864)	(12,096)	(10.2)%

	For the year ended December 31,		
	2020	2019	Change
	(*€ thousands, except %*)

Charges and taxes	(20,221)	(19,766)	2.3%
Other management and administration expenses	(68,209)	(81,040)	(15.8)%
Other administration expenses	**(153,020)**	**(171,915)**	**(11.0)%**

Provisions or reversals of provisions

Provisions or reversals of provisions changed from provisions of €37,330 thousand for the year ended December 31, 2019 to reversal of provisions of €14,236 thousand for the year ended December 31, 2020. Provisions recorded in 2019 were mainly related to provisions made to anticipate the impact from an accelerated NPA reduction and to the repurchase of subordinated bonds. As of December 31, 2020, a net reversal of €14,236 thousand was recorded, essentially due to an allowance for contingencies related to floor clauses, the reversal of the provision recorded in 2019 related to the repurchase of subordinated bonds and the expiration of a contingency linked to labor costs.

The table below shows a description of the categories of provisions on our balance sheet and the changes during the years ended December 31, 2020 and 2019:

	Pensions and other post-employment defined benefit obligations	Other long-term employee remuneration	Lawsuits and guarantees given	Commitments and guarantees given	Other provisions	Total

Impairment or reversal of impairment on financial assets not measured at fair value through profit or loss

Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss increased by 76.2%, from €124,637 thousand for the year ended December 31, 2019 to €219,646 thousand for the year ended December 31, 2020. This increase was primarily due to a €90,124 thousand credit risk provision to cover the potential impact of the economic effects associated with the COVID-19 pandemic. This non-recurring provision has been determined on the basis of the new macroeconomic scenario arising from the COVID-19 pandemic, the credit risk monitoring measures that have been implemented, the expert analysis of individually-significant borrowers, and the particular impact this crisis may have on certain economic sectors such as transport and storage and hospitality and leisure (see Note 11.6.3 to our 2020 Annual Accounts).

The following table shows the breakdown by stage and by purpose of the €90,124 thousand credit risk provision recorded in connection with the potential impact of the economic effects of the COVID-19 pandemic:

	As of December 31, 2020			
	Stage 1	**Stage 2**	**Stage 3**	**Total**
	(€ thousands)			
Mortgage to individuals	1,092	29,665	12,624	**43,381**
Self-employed and SMEs	234	31,962	2,706	**34,902**
Large corporations	70	8,021	805	**8,896**
Other segments	88	1,840	1,017	**2,945**
Total	**1,484**	**71,488**	**17,152**	**90,124**

Impairment or reversal of impairment on non-financial assets

Impairment or reversal of impairment on non-financial assets decreased by 72.2%, from €5,612 thousand for the year ended December 31, 2019 to €1,559 thousand for the year ended December 31, 2020. The decrease, reflected in the "Others" line of the table below, was primarily due to lower impairment related to foreclosed assets accounted for inventories in the balance sheet.

The following table sets out the principal components of our impairment or reversal of impairment in non-financial assets for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(*€ thousands, except %*)		
Tangible assets	(1,471)	(569)	158.5%
Property, plant and equipment	*(386)*	*(115)*	*235.7%*
Investment property	*(1,085)*	*(454)*	*139.0%*
Intangible assets	—	—	
Goodwill	—	—	
Other intangible assets	—	—	
Others	(88)	(5,043)	(98.3)%
Impairment or reversal of impairment losses in the value of non-financial assets	**(1,559)**	**(5,612)**	**(72.2)%**

Gains or losses on derecognition of non-financial assets, net

The following table sets out the components of our gains or losses on derecognition of non-financial assets for the years indicated:

	For the year ended December 31,		
	2020	**2019**	**Change**
	(*€ thousands, except %*)		
Gains/(losses) on disposal of assets not classified as non-current for sale	(3,066)	(6,576)	(53.4)%
Gains/(losses) from sales of investments	19	32	(40.6)%

Gains or losses from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations

The following table sets out the principal components of our gains or losses from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations for the years indicated:

	For the year ended December 31,		
	2020	2019	Change
	(€ thousands, except %)		
Gains/(losses) for impairment of other non-current assets for sale	(18,861)	(16,957)	11.2%
Profit/loss from disposal of other non-current assets for sale	(969)	(6,775)	(85.7)%
Gains/(losses) from non-current assets and disposal groups of items classified as held for sale not qualifying as discontinued operations	**(19,830)**	**(23,732)**	**(16.4)%**

Expense or income from taxes on income from continuing operations

Expense from taxes on income from continuing operations decreased from €44,648 thousand for the year ended December 31, 2019 to €29,868 thousand for the year ended December 31, 2020. This decrease was primarily due to a decrease in the tax expense income from continuing operations primarily due to a lower consolidated profit before tax (€128,637 thousand in 2019 compared to €53,470 thousand in 2020) (see Note 25.3 to our 2020 Annual Accounts) which was partially offset by a write-off of deferred tax assets (tax losses of a subsidiary generated prior to its entry in the tax group) amounting to €19,210 thousand.

Our effective CIT rate increased from 34.7% for the year ended December 31, 2019 to 55.9% for the year ended December 31, 2020. See "*Operating and financial review for the years ended December 31, 2021, 2020 and 2019—Key factors affecting comparability of results of operations—Increased effective tax rate*".

The following table sets out the reconciliation of the accounting and tax results for the years indicated:

	For the year ended December 31,		
	2020	2019	Change
	(€ thousands, except %)		
Consolidated profit before tax	**53,470**	**128,637**	**(58.4)%**

Comparison of consolidated balance sheet movements as of December 31, 2021 and December 31, 2020

Cash and cash balances at central banks and other demand deposits

Cash and cash balances at central banks and other demand deposits decreased by €1,183,985 thousand from €7,572,609 thousand as of December 31, 2020 to €6,388,624 thousand as of December 31, 2021. This decrease was primarily due to the increase in debt securities (which are recorded in financial assets at amortized cost).

Non-trading financial assets mandatorily measured at fair value with changes through profit and loss

Non-trading financial assets mandatorily measured at fair value with changes through profit and loss increased by €814,716 thousand from €853,721 thousand as of December 31, 2020 to €1,668,437 thousand as of December 31, 2021. The change was due to the increase in equity instruments as a result of Ibercaja Vida's greater investment in shares in mutual funds that are managed jointly with liabilities for insurance contracts (unit-linked) recorded at fair value.

We classify financial assets to this portfolio when their contractual terms do not give rise to cash flows consisting solely of principal and interest payments (SPPI test). The portfolio also includes equity assets (investment fund units) that are managed jointly with insurance liabilities (unit-linked products) measured at fair value, which comprise almost the entire balance.

Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income decreased by 8.0%, from €7,023,328 thousand as of December 31, 2020, to €6,464,034 thousand as of December 31, 2021. This decrease was primarily due to the decrease in debt securities linked to the insurance activity carried out by Ibercaja Vida.

Financial assets at amortized cost

Financial assets at amortized cost increased by 3.2%, from €39,726,825 thousand as of December 31, 2020 to €40,989,400 thousand as of December 31, 2021. This increase was primarily due to purchases of debt securities from Ibercaja Banco, mainly consisting of Spanish public debt.

The following table sets out the principal components of our financial assets at amortized cost as of the dates indicated:

	As of December 31,		
	2021	**2020**	**Change**
	(€ thousands, except %)		
Debt securities	9,974,513	8,474,312	17.7%
Loans and advances to credit institutions	361,357	311,651	15.9%
Loans and advances to customers	30,653,530	30,940,862	(0.9)%
Financial assets at amortized cost	**40,989,400**	**39,726,825**	**3.2%**

Loans and advances to customers decreased by 0.9%, from €30,940,862 thousand as of December 31, 2020 to €30,653,530 thousand as of December 31, 2021. This decrease was primarily due to a decline in performing loans to individuals (housing) by 2.8%, as well as a contraction of NPLs by 29.2%.

Debt securities increased by 17.7%, from €8,474,312 thousand as of December 31, 2020 to €9,974,513 thousand as of December 31, 2021. The increase was due to the acquisitions carried out during the year, mainly of Spanish public debt, to restore it after the sale of securities in 2020 and to make the excess liquidity on the balance sheet profitable.

Loans and advances to credit institutions increased by 15.9%, from €311,651 thousand as of December 31, 2020 to €361,357 thousand as of December 31, 2021. The decrease in reverse repurchase agreements is compensated with the advance of security granted in cash.

Tax assets

Our tax assets decreased by 3.1%, from €1,345,136 thousand as of December 31, 2020 to €1,304,032 thousand as of December 31, 2021. This decrease was mainly due to the deferred tax assets offset in the Corporate Income Tax due for fiscal year 2021. Deferred tax assets decreased by 3.3% from €1,335,625 thousand as of December 31, 2020 to €1,292,152 thousand as of December 31, 2021.

A portion of our DTAs arising from temporary differences are enforceable against public authorities in the above circumstances (monetisable assets), meaning that recoverability is not dependent on the existence of future taxable profits, which justified the recognition of the relevant amounts. As of December 31, 2021, these DTAs amounted to €634 million (€629 million as of December 31, 2020)

In addition, as of December 31, 2021 we had DTAs for tax-loss carryforwards and for unused tax credits amounting to €411,003 thousand (€433,099 thousand as of December 31, 2020). The vast majority of these tax assets result from prior-year losses, which were extraordinary and non-recurring, primarily due to the write-down of real estate assets in 2012 and renegotiated assets in 2013, as disclosed in the financial statements for those years. These tax credits were recorded for accounting purposes on the premise that future tax benefits would allow tax-loss carryforwards to be offset in a reasonably short period of time. According to applicable regulations, there is no time limit for offsetting these DTAs.

Financial liabilities at amortized cost

Financial liabilities at amortized cost increased by 1.4%, from €46,627,380 thousand as of December 31, 2020 to €47,285,113 thousand as of December 31, 2021. This increase was mainly due to the increase in retail deposits and deposits by central banks which offset the fall of deposits by credit institutions.

The following table sets out the principal components of our financial liabilities measured at amortized cost as of December 31, 2021 and 2020:

	As of December 31,		
	2021	**2020**	**Change (%)**
	(*€ thousands*)		
Deposits by central banks	5,871,128	5,371,202	9.3%
Deposits by credit institutions	745,174	1,207,820	(38.3)%
Customer deposits	38,268,280	37,881,253	1.0%
of which: retail deposits[APM]	*37,131,170*	*36,165,311*	2.7%
Debt securities issued	1,316,321	1,340,670	(1.8)%
Other financial liabilities[(1)]	1,084,210	826,435	31.2%
Financial liabilities at amortized cost	**47,285,113**	**46,627,380**	**1.4%**

Notes:—

(1) Other financial liabilities include the items set out in Standard 53.1g of Bank of Spain Circular 4/2017.

Deposits by central banks increased by €499,926 thousand from €5,371,202 thousand as of December, 2020 to €5,871,128 thousand as of December, 2021. This increase was due to the granting of €559,000 thousand in the TLTRO III auction of March, 2021.

Deposits by credit institutions decreased by 38.3% from €1,207,820 thousand as of December 31, 2020 to €745,174 thousand as of December 31, 2021. The decrease was due to the reduction in term deposits and repurchase agreements.

Customer deposits increased by 1.0% from €37,881,253 thousand as of December 31, 2020 to €38,268,280 thousand as of December, 2021. The increase was primarily due to a rise in demand deposits which offset the decline in term deposits, repurchase agreements and the maturity of singular mortgage covered bonds.

Debt securities issued decreased by 1.8% from €1,340,670 as of December 31, 2020 to €1,316,321 thousand as of December 31, 2021. This decrease was due to the combined effect of the maturity of securitization liabilities and the issuance of senior preferred debt, eligible for compliance with MREL requirements, amounting to €50 million.

Tax liabilities

Tax liabilities decreased by 4.2%, from €167,326 thousand as of December 31, 2020 to €160,221 thousand as of December 31, 2021. This decrease was primarily caused by the deferred tax liabilities included in the estimated Corporate Income Tax due for the fiscal year 2021. Deferred tax liabilities decreased by 4.6%, from €167,161 thousand as of December 31, 2020 to €159,449 thousand as of December 31, 2021.

Shareholders' equity

Shareholders' equity increased by 2.9%, from €3,160,630 thousand as of December 31, 2020 to €3,253,857 thousand as of December 31, 2021. This increase was primarily due to profit for the period after deducting dividend payments (interim dividend and dividend charged to the result for 2020) and the coupon paid on our AT1 capital instruments. According to IFRS 12, both the AT1 capital instruments coupon (€24.5 million annually for the current AT1 capital instruments issuance) and the tax effect (fiscal savings of €7.3 million) are deducted from shareholders' equity.

Accumulated other comprehensive income

Accumulated other comprehensive income decreased by 71.4%, from €57,790 thousand as of December 31, 2020 to €16,544 thousand as of December 31, 2021. This decrease was mainly due to a reduction in unrealized capital gains related to debt instruments and impairment losses recognized in shareholders' equity for cash flow hedges.

Comparison of consolidated balance sheet movements as of December 31, 2020 and December 31, 2019

Cash and cash balances at central banks and other demand deposits

Cash and cash balances at central banks and other demand deposits increased by €3,643,407 thousand from €3,929,202 thousand as of December 31, 2019 to €7,572,609 thousand as of December 31, 2020. This increase was due to the funding obtained from the ECB through TLTRO III auctions and higher liquidity resulting from the growth in retail deposits[APM].

Non-trading financial assets mandatorily measured at fair value with changes through profit and loss

Non-trading financial assets mandatorily measured at fair value with changes through profit and loss increased by €477,836 thousand from €375,885 thousand as of December 31, 2019 to €853,721 thousand as of December 31, 2020. The change was due to the increase in equity instruments as a result of Ibercaja Vida's greater investment in shares in mutual funds that are managed jointly with liabilities for insurance contracts (Unit Linked) accounted for at fair value.

We classify financial assets to this portfolio when their contractual terms do not give rise to cash flows consisting solely of principal and interest payments (SPPI test). The portfolio also includes equity assets (investment fund units) that are managed jointly with insurance liabilities (unit-linked products) measured at fair value, which comprise almost the entire balance.

Financial assets at fair value through other comprehensive income

Financial assets at fair value through other comprehensive income decreased by 13.1%, from €8,086,430 thousand as of December 31, 2019, to €7,023,328 thousand as of December 31, 2020. This decrease was mainly due to the reduction in debt securities, mainly Spanish sovereign debt, as a result of sales and amortizations carried out in the period as part of the ordinary management of our balance sheet.

Financial assets at amortized cost

Financial assets at amortized cost decreased by 0.1%, from €39,768,768 thousand as of December 31, 2019 to €39,726,825 thousand as of December 31, 2020. This decrease was mainly due to the decrease in loans and advances to credit institutions and to customers, which was partially offset by an increase in debt securities.

The following table sets out the principal components of our financial assets at amortized cost as of the dates indicated:

	As of December 31,		
	2020	2019	Change
	(€ thousands, except %)		
Debt securities	8,474,312	7,218,228	17.4%
Loans and advances to credit institutions	311,651	643,792	(51.6)%
Loans and advances to customers	30,940,862	31,906,748	(3.0)%
Financial assets at amortized cost	**39,726,825**	**39,768,768**	**(0.1)%**

Loans and advances to customers decreased by 3.0%, from €31,906,748 thousand as of December 31, 2019 to €30,940,862 thousand as of December 31, 2020. This decrease was primarily due to a decline in loans to individuals (housing) by 2.6%, as well as a contraction of NPLs by 21.7%.

Debt securities increased by 17.4%, from €7,218,228 thousand as of December 31, 2019 to €8,474,312 thousand as of December 31, 2020. The increase is due to a higher amount of purchases compared to sales in 2020 compared to 2019. In 2020, in response to the extraordinary circumstances derived from the COVID-19 pandemic, we carried out a sale of Spanish government-issued bonds classified at amortized cost for a nominal amount of €1,382 million (the Public Debt Sale Transaction).

Loans and advances to credit institutions decreased by 51.6%, from €643,792 thousand as of December 31, 2019 to €311,651 thousand as of December 31, 2020. This decrease was primarily due to a decrease in cash guarantees.

Tax assets

Our tax assets increased by 0.4%, from €1,339,805 thousand as of December 31, 2019 to €1,345,136 thousand as of December 31, 2020. This increase was mainly due to an increase in deferred tax assets by 0.7%, from €1,326,708 thousand as of December 31, 2019 to €1,335,625 thousand as of December 31, 2020.

A portion of our DTAs arising from temporary differences are enforceable against public authorities in the above circumstances (monetizable assets), meaning that recoverability is not dependent on the existence of future taxable profits, which justified the recognition of the relevant amounts. As of December 31, 2020, these DTAs amounted to €629 million (€643 million as of December 31, 2019)

In addition, as of December 31, 2020 we had DTAs for tax-loss carryforwards and for unused tax credits amounting to €433,099 thousand (€451,997 thousand as of December 31, 2019). The vast majority of these tax assets result from prior-year losses, which were extraordinary and non-recurring, primarily due to the write-down of real estate assets in 2012 and renegotiated assets in 2013, as disclosed in the financial statements for those years. These tax credits were recorded for accounting purposes on the premise that future tax benefits would allow tax-loss carryforwards to be offset in a reasonably short period of time. According to applicable regulations, there is no time limit for offsetting these DTAs.

Financial liabilities at amortized cost

Financial liabilities at amortized cost increased by 7.3%, from €43,448,320 thousand as of December 31, 2019 to €46,627,380 thousand as of December 31, 2020. This increase was mainly due to the increase in deposits by central banks and customer deposits which was partially offset by the decrease in deposits by credit institutions.

The following table sets out the principal components of our financial liabilities measured at amortized cost as of December 31, 2020 and 2019:

	As of December 31,		
	2020	2019	Change (%)
	(€ thousands)		
Deposits by central banks	5,371,202	1,628,990	229.7
Deposits by credit institutions	1,207,820	4,304,232	(71.9)
Customer deposits	37,881,253	34,924,627	8.5
of which: retail deposits[APM]	36,165,311	32,772,452	*10.4*
Debt securities issued	1,340,670	1,480,421	(9.4)
Other financial liabilities[(1)]	826,435	1,110,050	(25.5)
Financial liabilities at amortized cost	**46,627,380**	**43,448,320**	**7.3**

Notes:—

(1) Other financial liabilities include the items set out in Standard 53.1g of Bank of Spain Circular 4/2017.

Deposits by central banks increased €3,742, 212 thousand from €1,628,990 thousand as of December, 2019 to €5,371,202 thousand as of December, 2020. This increase was due to the maturity of the financing under TLTRO II (€1,650,000 thousand) and the granting of €5,400,000 thousand in the TLTRO III auction of June, 2020.

Deposits by credit institutions decreased by 71.9% from €4,304,232 thousand as of December 31, 2019 to €1,207,820 thousand as of December 31, 2020. The decrease was due to the redemption of short term transactions in the monetary market during 2020.

Customer deposits increased by 8.5% from €34,924,627 thousand as of December 31, 2019 to €37,881,253 thousand as of December, 2020. The increase was due to an increase in demand deposits which offset the decline in term deposits and the maturity of singular mortgage covered bonds.

Debt securities issued decreased by 9.4% from €1,480,421 as of December 31, 2019 to €1,340,670 thousand as of December 31, 2020. This decrease was mainly due to the maturity of mortgage covered bonds (€87,312 thousand in principal amount) and other securities linked to transferred financial assets (€51,133 thousand of nominal amount). During 2020, we issued subordinated debt instruments for a nominal amount of €500,000 thousand to refinance an issue for the same amount made in 2015 (we repurchased an amount of €359,600 thousand during the first half of 2020 and the remaining principal amount was repurchased in July, 2020).

Tax liabilities

Tax liabilities decreased by 6.1%, from €178,164 thousand as of December 31, 2019 to €167,326 thousand as of December 31, 2020. This decrease was primarily due to a decrease in deferred tax liabilities by 5.4%, from €176,613 thousand as of December 31, 2019 to €167,161 thousand as of December 31, 2020.

Shareholders' equity

Shareholders' equity increased by 0.7%, from €3,139,017 thousand as of December 31, 2019 to €3,160,630 thousand as of December 31, 2020. This increase was mainly due to profit for the period after deducting dividend payments, charged to profit for 2019, and the coupon paid on our AT1 capital instruments, as well as the reclassification of €32,000 thousand from accumulated other comprehensive income to other reserves as a result of the CASER Sale Transaction.

Accumulated other comprehensive income

Accumulated other comprehensive income decreased by 43.4%, from €102,080 thousand as of December 31, 2019 to €57,790 thousand as of December 31, 2020. This decrease was mainly due to a reduction in unrealized capital gains related to equity instruments (See "*Shareholder's equity"* above for a description of the reclassification as a result of the CASER Sale Transaction) and debt securities.

Liquidity and capital resources

Liquidity

Liquidity is a critical component of our business. Liquidity risk is the possibility of incurring losses due to not having access to sufficient liquid funds to meet our payment obligations.

We are exposed to daily demands on our available cash resources to meet contractual obligations related to financial instruments, such as maturing deposits, drawdowns of credit facilities and settlements on derivatives.

Our liquidity risk management strategy is established by the Board of Directors, following a report from the Large Risk and Solvency Committee documented in the manual of policies and procedures for the management of liquidity risk (the "**Liquidity Manual**"). The basic principles governing our liquidity risk management strategy are as follows: actively managing through a regular control system based on internal limits and indicators documented in the Liquidity Manual; establishing measures and actions to respond to scenarios of crisis (contingency plans); harnessing the various alternatives offered by the market to diversify investments in relation to their duration and ensure a suitable mix of highly-liquid instruments; and maintaining a significant asset buffer at the ECB to cover possible tensions.

Liquidity risk is measured by taking into account the estimated cash flows from assets and liabilities, as well as any additional collateral or instruments that may be needed so as to ensure alternative sources of liquidity. Short, medium and long-term outlooks are prepared in order to gauge financing needs and to ensure compliance. These forecasts take into account the latest macroeconomic trends because of their impact on the performance of the assets and liabilities shown on the balance sheet, as well as contingent liabilities and derivative products. Liquidity risk is also controlled by establishing exposure limits, and keeping our exposure within ranges that are compatible with the approved policies.

See Note 3.8 of our 2021 Annual Accounts for more details regarding our liquidity risk management strategy.

As of December 31, 2021, our liquid assets amounted to €15,250 million (€14,959 million as of December 31, 2020), and our capacity to issue covered bonds, measured in accordance with Law 2/1981, of March 25, on mortgage market, as amended ("**Law 2/1981**") and 44/2002, of November 22, on financial system reform measures ("**Law 44/2002**") amounted to €8,776 million (€8,380 million as of December 31, 2020). Thus, total availability stood at €24.027 million, an increase of €687 million compared to December 31, 2020.

The total amount of the ECB guarantees facility was €6,938 million as of December 31, 2021, of which €5,959 million have been drawn down.

As of December 31, 2021, our LCR (excluding Ibercaja Vida), which measures the reserve of high-quality liquid assets to enable survival of a 30-day stress period, was 452.0%, well above the 100% regulatory threshold. As of December 31, 2021, our NSFR (excluding Ibercaja Vida), which expresses the portion of capital and liabilities expected to be reliable over the time horizon of one year and is aimed at ensuring a balanced structure on the balance sheet, restricting excessive dependence on short-time wholesale financing, was 152.2%.

Maturities of issues on wholesale markets are distributed over a staggered repayment timetable that goes up to 2027. Our policy of diversification in time of wholesale issue maturities enables us to cover maturities in the coming years, while maintaining a comfortable liquidity position.

During 2021, wholesale maturities were paid for a nominal amount of €605 million: mortgage covered bonds (€525 million) and securitization bonds owned by third parties (€80 million). We have also repurchased own issues for €14 thousand through securitization bonds.

Below is a breakdown of the contractual maturities of our assets and liabilities (liquidity gap) as of December 31, 2021:

	Demand(1)	Up to 1 month	Between one and three months	Between three months and one year	Between one and five years	After 5 years	Total
				(€ thousands)			
Assets							
Deposits in credit institutions	35,825	3,343	42,935	-	-	123,716	205,820
Loans to other financial institutions	-	6	1,482	310	1,552	34,934	38,255
Temporary acquisitions of securities and securities lending	-	1,615,394	-	-	-	-	1,615,394
Loans (including matured, non-performing, written-off and foreclosed)	-	745,825	1,111,982	2,472,290	8,453,918	17,959,748	30,743,764
Securities portfolio settlement	-	211,000	232,741	223,151	3,690,115	5,094,077	9,451,084
Hedging derivatives	-	49	4,381	33,821	16,586	1,291	56,128
Trading derivatives	-	-	-	-	-	-	-
Net interest income	-	48,120	61,074	313,670	-	-	422,864
Total	**35,825**	**2,623,735**	**1,454,596**	**3,049,243**	**12,162,141**	**23,213,766**	**42,533,307**
Liabilities							
Wholesale issues	-	3,343	6,664	48,996	2,447,215	279,792	2,786,010
Deposits by credit institutions	17,256	10,928	2,000	-	290	2,371	32,845
Deposits by other financial institutions and bodies	381,698	303	435	8,655	39,695	-	430,726
Deposits by large non-financial companies	169,579	1	-	2,200	-	-	171,779
Financing from the rest of the customers	33,968,149	321,502	484,036	1,518,114	403,988	2.694	36,698,483
Funds from brokered loans	-	2,928	2,881	19,954	59,508	26,246	111,517
Financing with secured securities	-	511,906	89,066	-	5,959,000	-	6,559,972
Other net outflows	-	35,670	61,094	278,008	43,364	51,284	469,421
Hedging derivatives	-	6,249	4,746	(7,807)	16,680	4,121	23,989
Formalized loans pending settlement	-	487,454	-	-	-	-	487,454
Commitments available for third parties	3,220,412	-	-	-	-	-	3,220,412
Financial guarantees issued	9,015	3,041	278	1,468	1,782	1,122	16,707
Total	37,766,108	1,383,325	651,200	1,869,589	8,971,462	367,631	51,009,315
Total Gap	**(37,730,283)**	**1,240,411**	**803,396**	**1,173,654**	**3,190,679**	**22,846,135**	

Note:—

(1) The maturity of on-demand deposits is not contractually determined. These deposits have been included in the first column (*Demand*) although most of them are generally stable.

Funding

Retail deposits[APM] are our main source of external financing. Wholesale financing supplements funding obtained from individuals and businesses. It is focused on the medium to long-term and includes reverse repurchase agreements and balances we hold at the ECB, mortgage covered bonds, securitizations, subordinated debt and other issues. Maturities of issues on wholesale markets are distributed over a staggered schedule of repayments that goes up to 2027.

Set out below is a breakdown of our wholesale financing by maturity as of December 31, 2021:

	Demand	Up to 1 month	1 to 3 months	Between 3 months and 1 year	1 to 5 years	Over 5 years	Total
				(€ thousands)			
Senior debt	-	-	-	-	50,000	-	50,000
Government-backed debt	-	-	-	-	-	-	-
Subordinated and preferential	-	-	-	-	850,000	-	850,000
Bonds and mortgage- and sector-covered bonds	-	-	-	19.444	1,416,026	165,000	1,600,470
Securitizations	-	3,343	6,664	29.551	131,190	114,792	285,540
Promissory notes and certificates of deposit	-	-	-	-	-	-	-
Wholesale issues	**-**	**3,343**	**6,664**	**48,996**	**2,447,215**	**279,792**	**2,786,010**
Financing with long-term secured securities	**-**	**-**	**-**	**-**	**5,959,000**	**-**	**5,959,000**
Maturities in the period		**3,343**	**6,664**	**48,996**	**8,406,215**	**279,792**	**8,745,010**
Accumulated maturities	**-**	**3,343**	**10,007**	**59,002**	**8,465,217**	**8,745,010**	**-**

Notes: Wholesale issues appear as net of treasury shares. However, multi-senior covered bonds appear for their gross amount issued while the treasury shares are recognized as liquid assets in accordance with the preparation criteria of the LQ statements of the Bank of Spain.

For more information on our funding see "*Selected statistical and other information on assets and liabilities—Financial liabilities at amortized cost*".

Regulatory capital

We are subject to the legislation and regulations governing banking institutions in Spain, as set out in "*Regulation*" of this Registration Document and are regulated in accordance with the capital adequacy and liquidity requirements of the ECB.

We apply a transitional calendar from phased-in to fully-loaded capital ratios due to certain factors (i) increase of provisions because of the initial application of IFRS 9 (static approach), which is implemented until December 31, 2022; (ii) increase in provisions related to Stage 1 and Stage 2 loans which applied since January 1, 2020 (dynamic approach in response to the effects of the COVID-19 pandemic) which is implemented until December 31, 2024; and (iii) DTAs generated prior to January 1, 2014 from entities subject to restructuring plans such as Banco Caja3, which is implemented until December 31, 2023.

We participated in the 2021 stress test exercise conducted by the ECB, in cooperation with the EBA and the SRB. The adverse stress scenario set by the ECB/SRB covered a time horizon of three years (2021-2023). The stress test was carried out applying the static balance sheet assumption as of December 31, 2020, so it did not take into account future business strategies and management actions. According to the results of this exercise, in the most adverse scenario (i) our CET1 fully-loaded ratio would be reduced between 300 and 599 basis points, placing the CET1 ratio fully-loaded in a range between 8% and 11% and (ii) the leverage ratio fully-loaded would stand between 4% and 5%.

As of December 31, 2021, our total eligible shareholders' equity amounted to €3,270,441 thousand and CET1 capital amounted to €2,420,441 thousand. This represents a surplus of €1,608,104 thousand over the current CET1 equity requirements of €812,337 thousand as of December 31, 2021, in accordance with CRD IV and CRR. In addition, total CET1 ratios of 13.41% and 12.71% phased-in and fully-loaded, respectively, both above the 8.125% minimum CET1 ratio required by the SREP for 2021. As of December 31, 2021, 2020 and 2019 and throughout 2021, 2020 and 2019, our CET1 ratio and total capital ratio complied with the requirements of CRD IV and CRR and those required by the SREP for each period.

The following table sets out the reconciliation of our total computable own funds with the total equity in our consolidated balance sheet as of December 31, 2021, 2020 and 2019.

	As of December 31,		
	2021	2020	2019
		(€ thousands)	
Share capital	214,428	214,428	214,428

We rigorously attend to the management of the capital self-assessment process and solvency risk in order to maintain a prudent risk profile and balance adequately preserving solvency, profitability and liquidity targets. For a description of the risk management processes, see "*Risk Management*".

The policies, methods and procedures relating to overall risk management are approved by the Board of Directors, following a report from the Large Risks and Solvency Committee. The Audit and Compliance Committee and the Large Risks and Solvency Committee are responsible for overseeing adequate compliance with those policies, methods and procedures, ensuring that they are adequate, are effectively implemented and reviewed on a regular basis.

For further information on our regulatory requirements, see "*Regulation*".

Selected statistical and other information on assets and liabilities

Total assets

Our total assets increased by 0.39%, to €58,631,409 thousand as of December 31, 2021 from €58,400,790 thousand as of December 31, 2020. The increase in 2021 was mainly attributable to the growth of our securities portfolio.

Our total assets increased by 5.4%, to €58,400,790 thousand as of December 31, 2020 from €55,422,015 thousand as of December 31, 2019. The increase in 2020 was mainly attributable to an increase in the cash balance at central banks.

Total liabilities

Our total liabilities increased by 0.3%, to €55,361,008 thousand as of December 31, 2021 from €55,182,370 thousand as of December 31, 2020. The increase in 2021 was mainly attributable to the increase in central banks deposits and customer deposits.

Our total liabilities increased by 5.8%, to €55,182,370 thousand as of December 31, 2020 from €52,180,918 thousand as of December 31, 2019. The increase in 2020 was mainly attributable to the increase in central banks deposits and customer deposits.

Average balances and rates

The average balance of each balance sheet item is calculated as the arithmetic average of the average monthly balances. The average monthly balance is the average of end balances weighted at 50% (i.e. the balance at the end of the reference month multiplied by 0.5 plus the balance at the end of the immediately prior month to the reference month multiplied by 0.5).

The average rates on our interest-earning assets and the average rates on our interest-bearing liabilities set out below are APMs, the definition, explanation, use and calculation of which are set out in "*Alternative Performance Measures*".

The following table sets out the average balances of our interest-earning assets, the related interest income and average rates for the years indicated:

	For the year ended December 31,								
	2021			**2020**			**2019**		
	Average balance	**Interest income**	**Average rate**	**Average balance**	**Interest income**	**Average rate**	**Average balance**	**Interest income**	**Average rate**
Interest-earning assets:	*(€ thousand, except %)*								
Financial intermediaries[1]	7,911,855	67,410	0.85%	6,233,769	54,017	0.87%	3,867,800	14,004	0.36%
Loans and advances to customers	28,861,661	342,556	1.19%	29,400,209	398,933	1.36%	29,919,163	435,281	1.45%
ALCO portfolio	9,969,242	34,028	0.34%	8,525,590	56,592	0.66%	7,114,964	69,023	0.97%
Life insurance business portfolio	7,519,256	105,269	1.40%	7,633,709	121,937	1.60%	7,510,845	144,550	1.92%
Other assets	3,602,615	660	—	3,685,826	1,319	—	4,367,183	703	—
Average total assets	**57,864,629**	**549,923**	**0.95%**	**55,479,103**	**632,798**	**1.14%**	**52,779,955**	**663,561**	**1.26%**

Note:—

(1) In accordance with Regulation (EU) 2021/451, income derived from the application of negative rates are allocated according to their nature. The asset "financial intermediaries" includes the negative interest from the balance of the liability "financial intermediaries", the most significant being the income from the TLTRO financing. Likewise, the liability "financial intermediaries" includes the negative interest from the balance of the asset "financial intermediaries".

The average interest rate on average total assets[APM] decreased to 0.95% for the year ended December 31, 2021 from 1.14% for the year ended December 31, 2020 mainly due to the repricing of the mortgage portfolio, due to the fall in the interest rates curve, and the rotation of our ALCO portfolio after sales made in 2020.

The average interest rate on average total assets[APM] decreased to 1.14% for the year ended December 31, 2020 from 1.26% for the year ended December 31, 2019 mainly due to the repricing of our mortgage portfolio, due to the fall in the interest rates curve, and the Public Debt Sale Transaction.

The following table sets out the average balances of our interest-bearing liabilities, the related interest expense and average rates for the years indicated:

	For the year ended December 31,								
	2021			2020			2019		
	Average balance	Interest expense	Average rate	Average balance	Interest expense	Average rate	Average balance	Interest expense	Average rate
Interest-bearing liabilities:	(€ thousand, except %)								
Financial intermediaries(1)	6,791,799	23,819	0.35%	5,084,961	29,669	0.58%	4,210,527	9,945	0.24%
Retail deposits	35,924,092	(6,754)	(0.02)%	34,332,758	(2,509)	(0.01)%	31,687,895	4,948	0.02%
Debt securities issued and mortgage covered bonds	2,587,531	32,634	1.26%	3,253,583	52,469	1.61%	3,877,276	65,597	1.69%
Liabilities under insurance contracts	7,291,380	1,704	0.02%	7,631,841	15,227	0.20%	7,765,474	32,078	0.41%
Other liabilities	5,269,827	5,514	—	5,175,960	4,269	—	5,238,783	3,747	—
Average total liabilities and equity	**57,864,629**	**57,097**	**0.10%**	**55,479,103**	**99,125**	**0.18%**	**52,779,955**	**116,315**	**0.22%**

Notes:—

(1) In accordance with Regulation (EU) 2021/451, income derived from the application of negative rates is allocated according to their nature. The asset "financial intermediaries" includes the negative interest from the balance of the liability "financial intermediaries", the most significant being the income from the TLTRO financing. Likewise, the liability "financial intermediaries" includes the negative interest from the balance of the asset "financial intermediaries".

The average rate on average total liabilities and equity decreased to 0.10% for the year ended December 31, 2021 from 0.18% for the year ended December 31, 2020 due to the downward trend of interest rates on our customer deposits in line with market rates and the scheduled maturity of certain wholesale issues which were not renewed or replaced.

The average rate on average total liabilities and equity decreased to 0.18% for the year ended December 31, 2020 from 0.22% for the year ended December 31, 2019 due to the downward trend of interest rates on our customer deposits in line with market rates and the scheduled maturity of certain wholesale issues which were not renewed or replaced.

The following table sets out our net interest margin and customer spread for the years indicated.

	For the year ended December 31,		
	2021	2020	2019
Net interest margin[APM]	0.85%	0.96%	1.04%
Customer spread[APM]	1.21%	1.37%	1.43%

Our net interest margin decreased to 0.85% for the year ended December 31, 2021 compared to 0.96% for the year ended December 31, 2020 mainly due to the reduction of our asset profitability as a result of the repricing of our loan portfolio, due to the fall in the interest rates curve, and the lower contribution of our debt portfolio.

Our net interest margin decreased to 0.96% for the year ended December 31, 2020 compared to 1.04% for the year ended December 31, 2019 mainly due to the reduction of our asset profitability as a result of the repricing of our loan portfolio, due to the fall in the interest rates curve, and the lower contribution of our debt portfolio.

Our customer spread decreased to 1.21% for the year ended December 31, 2021 compared to 1.37% for the year ended December 31, 2020 mainly due to the repricing of our mortgage loan portfolio following the decline in the 12-month Euribor, the lower market interest rates for corporate financing and the granting of Guaranteed Credit Lines at reduced interest rates.

Our customer spread decreased to 1.37% for the year ended December 31, 2020 compared to 1.43% for the year ended December 31, 2019 mainly due to the decrease in income from loans and advances to customers as a result of the repricing of the mortgage loan portfolio after the drop in the 12-month Euribor rate (eight basis points on average compared to 2019) and the granting of Guaranteed Credit Lines at reduced interest rates.

Changes in net interest income – volume and rate analysis

The following two tables allocate, by type of interest-earning assets and interest-bearing liabilities, changes in our net interest income attributable to (i) changes in their respective average volume (balance), and (ii) changes in their respective average interest rate, for the year ended December 31, 2021 compared to the year ended December 31, 2020 and for the year ended December 31, 2020 compared to the year ended December 31, 2019. Our net interest income has been significantly affected by the evolution of our customer spread[APM].

Changes to interest income due to changes in volume have been calculated by multiplying the changes in volume during the current year by the average interest rate for the preceding year. Changes to interest income due to changes in rates have been calculated by multiplying the change in the current year average rate by the average volume of the current year. The changes caused by variances in both volume and rate have been allocated to changes in rates. The changes are calculated on the basis of the average balance sheets set forth in the preceding tables.

	2021/2020			2020/2019

NPLs evolution[APM] ((b) – (a))	**(295,317)**	**(280,223)**	**(981,397)**

Notes:—

(1) NPL exits caused by foreclosed assets are shown in "New foreclosed assets" in the "foreclosed assets evolution[APM]" table below.

(2) See "*Operating and Financial Review for the years ended December 31, 2021, 2020 and 2019—Factors affecting comparability of results of operations—Sales of loans and NPAs[APM]*".

NPLs decreased from €2,274,558 thousand as of December 31, 2018 to €717,621 thousand as of December 31, 2021. Gross NPL entries fell 23.8% in 2019, 21.7% in 2020 and 26.7% in 2021. Cash recoveries of NPLs over stock of NPLs at the beginning of the period improved from 18.88% as of December 31, 2019 to 22.12% as of December 31, 2021. In 2019, NPLs evolution included the extraordinary sale of two portfolios of NPLs (Ordesa Transaction and Costa Transaction). In 2021, NPLs evolution included the extraordinary sale of one portfolio of NPLs (Oroel Transaction).

Allowance for credit losses over average of gross loans and advances to customers[APM]

Total	**542,241**	**(326,197)**	**216,044**	**60.16%**	**619,527**	**(367,413)**	**252,114**	**59.31%**	**624,890**	**(346,033)**	**278,857**	**55.38%**

The gross book value of our foreclosed assets portfolio decreased from €766,967 thousand as of December 31, 2018 to €542,241 thousand as of December 31, 2021. In 2020, sales of foreclosed assets were affected by the slowdown in the economy and the housing market due to the COVID-19 pandemic. In 2021, there was a recovery in sales of foreclosed assets, which rose by 52% compared to 2020, following the reactivation of the real estate market. At the same time, inflows of foreclosed assets fell by 10% year-on-year.

Foreclosed assets coverage ratio[APM] increased from 55.38% as of December 31, 2019 to 60.16% as of December 31, 2021, with foreclosed land coverage[APM] reaching 68.43% (59.83% as of December 31, 2019).

As of December 31, 2021, the net book value of our portfolio of foreclosed assets (€216,044 thousand) fell to 0.4% of our total assets (compared to 0.4% and 0.5% as of December 31, 2020 and 2019, respectively).

Foreclosed assets evolution[APM]

The following table sets out our foreclosed assets evolution[APM] for the years indicated:

	For the year ended December 31,		
	2021	**2020**	**2019**
		(€ thousands)	
(a) (+) Foreclosed assets at the beginning of the period	619,527	624,890	766,967

Provisions for credit risk

The information related to the movement of our provisions for credit risk in respect of our portfolio of financial assets at amortized cost from December 31, 2018 to December 31, 2021 is set in the following table:

	Total
	(*€ thousand*)
Balance as of December 31, 2018	**1,116,980**
Changes through profit and loss	134,205
Provisions utilized[2]	(591,357)
Other movements[1]	(17,440)
Balance as of December 31, 2019	**642,388**
Changes through profit and loss	224,177
Provisions utilized	(198,823)
Other movements[1]	(22,642)
Balance as of December 31, 2020	**645,100**
Changes through profit and loss	88,270
Provisions utilized	(172,134)
Other movements[1]	(22,047)
Balance as of December 31, 2021	**539,189**

Notes:—

(1) "Other movements" corresponds to the transfer of the non-performing loan allowances associated with credit transactions which were cancelled by the awarding or granting in payment (*dación en pago*) of assets for the full or partial satisfaction of the debt.

(2) The balance of provisions utilized in 2019 includes the provisions derecognised from the balance sheet as a result of the Ordesa Transaction and the Costa Transaction.

Provisions for credit risk decreased from €1,116,980 thousand as of December 31, 2018 to €539,189 thousand as of December 31, 2021, primarily due to the derecognition of provisions from our consolidated balance sheet relating to the sales of NPLs portfolios during 2019 (Ordesa and Costa Transaction) and because in the year 2021 the changes through profit and loss were lower due to the lower NPL entries during the year.

New lending[APM]

The table below sets out the principal amount of new lending[APM] during the years indicated and the distribution by sector:

	For the year ended December 31,		
	2021	2020	2019
		(*€ thousands*)

Of which Retail deposits (=(A))	*37,131,170*	*79.76%*	*36,165,311*	*78.36%*	*32,772,452*	*76.77%*
Of which Financing from wholesale lending markets (=(B) – (A))	*9,419,733*	*20.24%*	*9,985,634*	*21.64%*	*9,915,818*	*23.23%*

Deposits by central banks increased from €1,628,990 thousand as of December 31, 2019 to €5,371,202 thousand as of December 31, 2020. This increase was due to the granting of €5,400,000 thousand in the TLTRO III auction of June, 2020 which was partially offset by the maturity of the financing under TLTRO II (€1,650,000 thousand). Deposits by central banks increased from €5,371,202 thousand as of December 31, 2020 to €5,871,128 thousand as of December, 31 2021. This increase was due to the granting of €559,000 thousand in the TLTRO III auction of March, 2021. Thus, the weight of deposits by central banks in our external funding increased from 3.82% as of December 31, 2019 to 12.61% as of December 31, 2021.

Deposits by credit institutions decreased from €4,304,232 thousand as of December 31, 2019 to €1,207,820 thousand as of December 31, 2020. This decrease was due to the redemption of short term transactions in the monetary market during 2020. Deposits by credit institutions decreased from €1,207,820 thousand as of December 31, 2020 to €745,174 thousand as of December 31, 2021. This decrease was due to the decrease in term deposits and repurchase agreements. Thus, the weight of deposits by credit institutions in our external funding decreased from 10.08% as of December 31, 2019 to 1.60% as of December 31, 2021.

Customer deposits increased from €34,924,627 thousand as of December 31, 2019 to €37,881,253 thousand as of December 31, 2020. Customer deposits increased from €37,881,253 thousand as of December 31, 2020 to €38,268,280 thousand as of December 31, 2021.The increase in both periods was primarily due to an increase in demand deposits which offset the decline in term deposits and the maturity of singular mortgage covered bonds. Thus, the weight of customer deposits in our external funding increased from 81.81% as of December 31, 2019 to 82.21% as of December 31, 2021.

Debt securities issued decreased from €1,480,421 thousand as of December 31, 2019 to €1,340,670 thousand as of December 31, 2020. This reduction was due to the maturity of mortgage covered bonds (€87,312 thousand in principal amount) and other securities linked to transferred financial assets (€51,133 thousand of nominal amount). Debt securities issued decreased from €1,340,670 thousand as of December 31, 2020 to €1,316,321 thousand as of December 31, 2021. This reduction was due to the combined effect of the maturity of securitization liabilities and the issuance of senior preferred debt, eligible for compliance with MREL requirements, for €50 million. Thus, the weight of debt securities in our external funding decreased from 3.47% as of December 31, 2019 to 2.83% as of December 31, 2021.

*Breakdown retail deposits^APM^*

The following table sets out the breakdown of our retail deposits^APM^, by type of account:

	As of December 31,					
	2021		**2020**		**2019**	
			(€ thousands, except %)			
Demand deposits (current accounts)	34,673,081	93.4%	33,014,125	91.3%	28,509,031	87.0%
Term deposits (excluding mortgage covered bonds)	2,458,089	6.6%	3,151,186	8.7%	4,263,421	13.0%
Retail deposits^APM^	**37,131,170**	**100.0%**	**36,165,311**	**100.0%**	**32,772,452**	**100.0%**

Retail deposits^APM^ increased from €32,772,452 thousand as of December 31, 2019 to €37,131,170 thousand as of December 31, 2021. The increase during the period under review, in particular in 2020, is in line with an increasing saving tendency as a result of the COVID-19 pandemic. Demand deposits have increased as a percentage of retail deposits over the years under review (93.4%, 91.3% and 87.0% as of December 31, 2021, 2020 and 2019, respectively). This trend is due to changes in interest rates, which affected yields on term deposits, leading customers to move towards demand deposits and off-balance-sheet products, including, in particular, mutual funds.

*Average rates on customer deposits^APM^*

The following table sets out the average balances of, and the average interest rates on, our customer deposits, by type of account and customer, as of the dates indicated. The average rates on our deposits set out below are APMs, the definition, explanation, use and calculation of which are set out in "*Alternative Performance Measures*".

The average balance of each balance sheet item is calculated as the arithmetic average of the average monthly balances. The average monthly balance is the average of end balances weighted at 50% (i.e. the balance at the end of the reference month multiplied by 0.5 plus the balance at the end of the immediately prior month to the reference month multiplied by 0.5).

	For the year ended December 31,					
	2021		**2020**		**2019**	
	Average balance	**Average rate**	**Average balance**	**Average rate**	**Average balance**	**Average rate**
			(€ thousands, except %)			
Public administrations	**1,360,875**	**0.00%**	**1,369,786**	**0.02%**	**1,142,464**	**0.03%**
Demand deposits	1,281,693	0.00%	1,274,750	0.01%	1,030,182	0.01%
Term deposits	79,058	0.04%	94,883	0.18%	112,180	0.19%

Demand deposits	31,750,548	(0.02)%	29,372,801	(0.01)%	25,774,499	0.01%

	For the year ended December 31,					
	2021		2020		2019	
	Average balance	Average rate	Average balance	Average rate	Average balance	Average rate
	(€ thousands, except %)					
Term deposits	3,841,884	0.53%	5,039,745	0.65%	6,734,965	0.60%
Assets sold under repurchase agreements	36,173	—	124,976	—	64,451	—
Valuation adjustments(1)	126,714	—	174,798	—	235,983	—
Other non-resident customers	**128,978**	**0.01%**	**131,139**	**0.02%**	**136,268**	**0.07%**
Demand deposits	116,697	0.01%	114,860	0.01%	115,762	0.06%
Term deposits	12,268	0.01%	16,249	0.11%	20,472	0.18%
Valuation adjustments(1)	13	—	30	—	34	—
Average customer deposits	**37,245,172**	**0.04%**	**36,213,245**	**0.08%**	**34,088,630**	**0.13%**

Notes:—

(1) Includes accrued interest, micro hedging transactions and transaction costs.

The following table sets out information on the maturity profile of customer deposits held by us as of the dates indicated based on their contractual maturity:

	As of December 31,					
	2021		2020		2019	
	(€ thousands, except %)					
One month or less	34,609,841	90.4%	33,086,915	87.3%	28,761,466	82.4%
Over one month to three months or less	802	0.0%	5,971	0.0%	91,667	0.3%
Over three months to one year or less	213,731	0.6%	327,973	0.9%	1,079,763	3.1%
Over one year to two years or less	169,607	0.4%	390,544	1.0%	630,540	1.8%
Over two years to five years or less	1,124,519	2.9%	1,615,301	4.3%	1,970,272	5.6%
Over five years	2,149,780	5.6%	2,454,549	6.5%	2,390,919	6.8%
Customer deposits	**38,268,280**	**100.0%**	**37,881,253**	**100.0%**	**34,924,627**	**100.0%**

Customer deposits with maturities of one month or less represent the largest portion of the customer deposits held by us, representing 90.4%, 87.3% and 82.4% as of December 31, 2021, 2020 and 2019, respectively. The increases in 2021 and 2020 were primarily due to lower levels of interest rates, which discourage savings through term deposits, and the lower volume of mortgage bonds (which are recorded as deposits) due to scheduled maturities during these years.

Customer deposits of more than one month and up to five years represented 3.9%, 6.2% and 10.8% as of December 31, 2021, 2020 and 2019. The decline in 2021 and 2020 was due to the trend towards shorter term and on demand deposits, as explained above.

Deposits not guaranteed by the FGD

As of December 31, 2021 we had €6,424,986 thousand eligible deposits not guaranteed by the FGD (€6,105,673 thousand and €5,558,856 thousand as of December 31, 2020 and 2019, respectively). See "*Regulation - Deposit guarantee scheme*" for a definition of eligible deposits for the purposes of the FGD.

The table below sets out the breakdown of our deposits not guaranteed by the FGD by maturity as of December 31, 2021, 2020 and 2019[79]:

	As of December 31,					
	2021		**2020**		**2019**	
	(€ thousands, except %)					
Three months or less	5,953,118	92.7%	5,530,026	90.6%	5,008,389	90.1%
Over three months to six months or less	140,025	2.2%	183,271	3.0%	203,282	3.7%
Over six months to twelve months or less	211,892	3.3%	263,590	4.3%	273,174	4.9%
Over twelve months	119,951	1.9%	128,786	2.1%	74,011	1.3%
Deposits not guaranteed by the FGD	**6,424,986**	**100.0%**	**6,105,673**	**100.0%**	**5,558,856**	**100.0%**

Off-balance sheet customer funds marketed by the Group

We market certain off-balance sheet products in the normal course of our business in order to meet the business needs of our customers. These instruments, which include mutual funds (i.e. investment funds and mutual funds), pension funds and insurance products, are not reflected in our consolidated balance sheet. The table below sets out details of the off-balance sheet customer funds managed and marketed by us as at the dates indicated:

	As of December 31,		
	2021	**2020**	**2019**
	(€ thousands)		
Mutual funds	19,600,522	16,234,844	14,708,533
Pension funds	6,562,703	5,907,074	5,668,503
Discretionary portfolio management	4,922,073	4,602,628	5,044,760
Insurance products	91,988	101,968	113,853
Total off-balance sheet customer funds	**31,177,286**	**26,846,514**	**25,535,649**
Of which: managed by the Group	**31,053,343**	**25,814,364**	**24,744,802**
Non-banking commissions(1)	**288,925**	**230,218**	**242,992**

Note:—

(1) See net fee income and exchange differences[APM] definition.

The increase in 2021 in mutual funds and pension funds was primarily related to net subscriptions as well as the good performance of financial markets in 2021, while the increase in 2020 was related to net subscriptions. The decrease in the discretionary portfolio management in 2020 was primarily due to the change in our commercial strategy following the entry into force of MiFID II, encouraging the transfer of assets from the discretionary managed portfolio to mutual funds, particularly mixed funds and the increase in 2021 was

79 The source of the data is the statement FGD.1.A (485001) - Deposit Guarantee Compartment of the Bank of Spain, which is an accounting statement of mandatory quarterly reporting to the Bank of Spain. The regulations governing FGD reporting are Bank of Spain Circular 2/2021, of January 28, which establishes the information that credit institutions and branches assigned to the FGD must submit and have available to the Bank of Spain on their guaranteed deposits, for the purpose of calculating their contributions to the FGD.

primarily due to net subscriptions as well as the good performance of financial markets in 2021. The decreases in insurance products both in 2021 and in 2020 were primarily due to a decrease in sales of third-party life savings insurance products.

Non-banking commissions contributed 31.02% of our recurring revenues[APM] for the year ended December 31, 2021 (25.34% of our recurring revenues[APM] and 25.79% of our recurring revenues[APM] for the years ended December 31, 2020 and 2019, respectively).

REGULATION

Set forth below is a summary of the current European and Spanish regulatory environments relating to credit institutions and banking services. This is intended to provide a general outline of the most relevant applicable regulations and is not intended as a comprehensive discussion of such regulations. The regulatory environment discussion below could have a material impact on our business and results of operations in the future.

As a credit institution, we are subject to sector-specific banking regulations, general corporate law and a variety of other EU-regulations, which could have a direct and material effect on our business. In this section we describe the legislative framework and certain recent legislative key developments where we have significant interests. Some of the legislative changes and the adoption of regulatory measures by sectorial regulators, which are described in this section, are in the process of being approved and therefore have not yet come into effect.

EU Banking Union

Since September 2012, significant progress has been made toward the establishment of a European banking union. The EU banking union aims to develop a body of harmonized banking rules (the single rulebook) and an institutional framework with stronger systems for both banking supervision and resolution that is managed at the European level. Its two existing pillars are the SSM and the SRM. A third pillar, in the form of a single pan-European deposit guarantee scheme, should be in place sometime in the future but is subject to ongoing debate.

Single Supervisory Mechanism (SSM)

ECB

Pursuant to Article 127(6) of the Treaty on the Functioning of the EU and Council Regulation (EC) No 1024/2013 of October 15, 2013 conferring specific tasks on the ECB concerning policies relating to the prudential supervision of credit institutions (the "**SSM Regulation**"), the ECB is responsible for specific tasks concerning the prudential supervision of credit institutions established in participating Member States. Since November 2014, it carries out these supervisory tasks within the SSM framework, composed of the ECB and the relevant national authorities (in the case of Spain, the Bank of Spain). The ECB, in cooperation with the relevant national supervisors, is responsible for the effective and consistent functioning of the SSM, with a view to carrying out effective banking supervision, contributing to the safety and soundness of the banking system and the stability of the financial system.

Its main aims are to:

- ensure the safety and soundness of the credit institutions established in participating Member States (i.e. Member States which are part of the Eurozone or which have established a close cooperation in accordance with Article 7 of the SSM Regulation);
- increase financial integration and stability; and
- ensure consistent supervision.

Among others, it has the authority to:

- conduct supervisory reviews, on-site inspections and investigations;
- grant or withdraw banking licenses;
- assess banks' acquisitions and disposals of qualifying holdings;
- ensure compliance with EU prudential rules and the national legislation transposing those rules when they derive from Directives or options granted to Member States in EU Regulations; and
- set higher capital requirements ("buffers") in order to counter any financial risks.

In accordance with the SSM Regulation, the ECB has assumed the direct supervision of the "significant" banks of the participating countries (113 as of October 1, 2021, including us). Ongoing supervision of the significant banks is carried out by the Joint Supervisory Teams ("**JSTs**"). Each significant bank has a dedicated JST, comprising staff of the ECB and the relevant national supervisors (in our case, the Bank of Spain).

The criteria for determining whether a bank is considered "significant" (and therefore whether it falls under the ECB's direct supervision) are set out in the SSM Regulation and the Regulation (EU) No 468/2014 of the ECB of April 16, 2014 establishing the framework for cooperation within the SSM between the ECB and national competent authorities and with national designated authorities (the "**SSM Framework Regulation**"). To qualify as significant, a bank must fulfil at least one of the following criteria:

- size: the total value of its assets exceeds €30 billion;
- economic importance: for the specific country or the EU economy as a whole;
- cross-border activities: the total value of its assets exceeds €5 billion and the ratio of its cross-border assets/liabilities in more than one other participating Member State to its total assets/liabilities is above 20%; and
- direct public financial assistance: it has requested or received funding from the European Stability Mechanism or the European Financial Stability Facility.

The ECB can decide at any time to classify a bank as significant to ensure that high supervisory standards are applied consistently.

The ECB indirectly supervises banks that are not considered significant (also known as "less significant" institutions), which continue to be supervised by their national supervisors, in close cooperation with the ECB. See "*—Bank of Spain*" below for an explanation of the tasks to be performed by the Bank of Spain.

Bank of Spain

The ECB must set up homogenous criteria for all the supervised institutions under the SSM and has assumed decision-making power. National authorities, such as the Bank of Spain, provide their knowledge on their financial systems and the entities located in their jurisdictions. Therefore, the role of the Bank of Spain continues to be relevant for credit institutions located in Spain. In particular, the Bank of Spain's tasks include the following:

- it collaborates with the ECB in the supervision of significant entities through its participation in the JSTs of the relevant Spanish banks and it has a leading role in the on-site inspections;
- it supervises the less significant Spanish banks directly. The ECB's indirect supervision of these entities is focused on the homogenization of supervisory criteria and reception of information;
- it has several supervisory competences over banking entities, for example money laundering and terrorist financing, customer protection and certain aspects of the monitoring of the financial markets that are out of the scope of the SSM and remain under the purview of the Bank of Spain;
- it participates in certain administrative processes controlled by the ECB, such as the granting or withdrawal of licenses and the application of fit and proper tests to members of the board and senior management of Spanish banks, and supports the ECB in cross-border tasks such as the definition of policies, methodologies or crisis management;
- it continues to supervise other institutions such as appraisal companies or specialist credit institutions, e-money issuing entities, mutual guarantee and re-guarantee companies; and
- as the preventive resolution authority in Spain (together with the SRB in relation to significant entities, see "*—Single Resolution Mechanism (SRM)*" below), it develops and approves a resolution plan for credit institutions that are not part of a group subject to supervision on a consolidated basis, prior report from the FROB and the competent supervisor and after consultation with the competent supervisor and the relevant resolution authorities of the jurisdictions in which significant branches are established.

The Bank of Spain is also the macro-prudential authority competent for the determination of capital buffers. By means of Royal Decree 102/2019, of March 1, the Spanish Macro-prudential Authority Council of Financial Stability (*Autoridad Macroprudencial Consejo de Estabilidad Financiera*) ("**AMCESFI**") was created. Its main tasks are the identification, prevention and mitigation of the circumstances and actions that could result in a financial system systemic risk and to issue opinions, alerts and recommendations in this regard. The AMCESFI may recommend to the Bank of Spain the use of the macro-prudential tools assigned to it by the relevant laws and regulations (including, among others, the establishment of certain capital buffers) in order to prevent or mitigate the systemic risk. The Bank of Spain shall communicate the AMCESFI the measures implemented to comply with its recommendations or justify the lack of action.

Finally, the Bank of Spain participates in the governing bodies of the SSM contributing to the adoption of decisions affecting all credit institutions located in the Eurozone.

Single Resolution Mechanism (SRM)

The other main pillar of the EU banking union is the SRM, the main purpose of which is to ensure a prompt and coherent resolution of failing or likely to fail banks in Europe at minimum cost for the taxpayers and the real economy. Regulation (EU) No 806/2014 of the European Parliament and the Council of the European Union (the "**SRM Regulation I**"), as amended by Regulation (EU) 2019/877 of the European Parliament and of the Council of 20 May 2019 ("**SRM Regulation II**" and together with SRM Regulation I, the "**SRM Regulation**"), which became effective on January 1, 2015, establishes uniform rules and a uniform procedure for the resolution of credit institutions and certain investment firms in the framework of the SRM and a Single Resolution Fund (the "**Single Resolution Fund**"). The SRM itself is made up of the SRB and the national resolution authorities which in the case of Spain are the Bank of Spain, as the preventive resolution authority, and the FROB, as the executive resolution authority. In our case, the Relevant Resolution Authority would be the SRB as we are considered a significant bank.

Single Resolution Fund

The Single Resolution Fund is financed by ex-ante individual contributions from banking entities included in the SRM to be made on a yearly basis. The individual contribution of each bank will be based on a flat contribution (that is *pro rata* based on the amount of liabilities excluding own funds and covered deposits, in comparison to the total liabilities, excluding own funds and covered deposits, of all participating banks) and a risk-based contribution. In addition, where the funds of the Single Resolution Fund are not sufficient to cover the losses, costs or other expenses incurred by the use of the Single Resolution Fund in resolution actions, extraordinary ex-post contributions from the participating banks may be raised, with a maximum of three times the annual amount of the individual contribution. The funding obligation entered into force on January 1, 2016, and after eight years from that date, the available financial means of the Single Resolution Fund must in principle be at least 1% of the amount of covered deposits of all participating banks. The Single Resolution Fund is intended to reach a total amount of €55 billion by 2024 and to be used as a separate backstop only after an 8% bail-in of a bank's liabilities has been applied to cover capital shortfalls (in line with Directive 2014/59/EU, of May 15, establishing a framework for the recovery and resolution of credit institutions and investment firms ("**BRRD I**"), as amended by Directive (EU) 2019/879 of the European Parliament and of the Council of 20 May 2019 ("**BRRD II**" and together with BRRD I, the "**BRRD**")).

Act 11/2015, of June 18, on the recovery and resolution of credit institutions and investment firms ("**Act 11/2015**") regulates the National Resolution Fund, which receives funds from the private finance sector and is created to prevent, to the greatest extent possible, taxpayers from assuming the burden of the restructuring or resolution of credit institutions in distress. On January 1, 2016, the fund compartment for credit institutions, was merged with the rest of the national funds of the other Member States and integrated with the SRM into the Single Resolution Fund and since then, Spanish credit institutions (including us) have had to pay their contributions to the Single Resolution Fund. Notwithstanding its single management, pursuant to the terms of the intergovernmental Agreement for the Transfer and Mutualization of Contributions to a Single Resolution Fund signed by 26 EU Member States on May 21, 2014, the Single Resolution Fund is, on a transitional basis, made up of national compartments so that funds for the restructuring of an institution in a given Member State may be funded only out of the corresponding compartment for such Member State. The funds in the compartments shall be progressively mutualized over an eight-year period, at the end of which the compartments will have ceased to exist so that funds from any Member State may be used to restructure or resolve institutions in any other Member State.

In 2021, we contributed €13,794 thousand to the Single Resolution Fund (€11,094 thousand in 2020 and €10,350 thousand in 2019).

BRRD and Act 11/2015

The common European rules on recovery and resolution of credit institutions are set forth in the BRRD and in the SRM Regulation. Both instruments aim to equip resolution authorities with common tools and powers to tackle bank crises at the earliest possible moment and avoid costs to taxpayers. The set of measures provided for in the BRRD and the SRM Regulation include preparatory and preventive measures, the attribution of powers to the supervising authorities enabling them to act pre-emptively and that are triggered whenever a financial institution does not comply or it is likely that it will not comply with the regulatory requirements to which it is subject, as well as resolution instruments and powers to be used when an institution does not comply with its regulatory requirements or is likely to fail.

In accordance with Article 20 of Act 11/2015 and Article 18(4) of the SRM Regulation an institution will be considered as failing or likely to fail in any of the following circumstances: (i) it is, or is likely in the near future to be, in significant breach of its solvency or any other requirements necessary for maintaining its authorization; (ii) its assets are, or are likely in the near future to be, less than its liabilities; (iii) it is, or is likely in the near future to be, unable to pay its debts as they fall due; or (iv) it requires extraordinary public financial support (except in limited circumstances). According to Article 8.2 of Act 11/2015, and in line with the contents of the European Banking Authority’s guidelines on the interpretation of the different circumstances when an institution shall be considered as failing or likely to fail under Article 32(6) of Directive 2014/59/UE (EBA/GL/2015/07), the determination that an institution is no longer viable depends on, among others, the existence of a rapid deterioration in the financial position or liquidity of the entity or a rapid increase in leverage, defaults or concentration of exposures may be considered to assess the possibility of failure to comply with the requirements. The determination that an institution is no longer viable may also depend on a number of factors which may be outside of that institution’s control.

As provided in the BRRD, Act 11/2015 and the SRM Regulation, there are four resolution tools and powers which may be used alone or in combination where the FROB, the SRB or, as the case may be and according to the SRM Regulation and Act 11/2015, the ECB, the Bank of Spain or the CNMV or any other entity with the authority to exercise any such tools and powers from time to time (each, a “**Relevant Resolution Authority**”) as appropriate, considers that (a) an institution is failing or likely to fail, (b) there is no reasonable prospect that any alternative private sector measures would prevent the failure of such institution within a reasonable timeframe, and (c) a resolution action is in the public interest.

The four resolution tools are: (i) sale of business—which enables resolution authorities to direct the sale of the institution or the whole or part of its business on commercial terms; (ii) bridge institution—which enables resolution authorities to transfer all or part of the business of the institution to a “bridge institution” (an entity created for this purpose that is wholly or partially in public control); (iii) asset separation—which enables resolution authorities to transfer impaired or problem assets to one or more publicly-owned asset management vehicles to allow them to be managed with a view to maximizing their value through eventual sale or orderly wind-down (this can be used together with another resolution tool only); and (iv) bail-in—by which the Relevant Resolution Authority may exercise the Spanish Bail-in Power (as defined below). This includes the ability of the Relevant Resolution Authority to write down and/or to convert into equity or other securities or obligations (which equity, securities and obligations could also be subject to any future application of the Spanish Bail-in Power) certain unsecured debt claims irrespective of whether they qualify as capital instruments or not.

According to Article 27.3 of the SRM Regulation and Article 42 of Act 11/2015 (which transposes Article 44 of the BRRD), resolution authorities shall not exercise the Spanish Bail-in Power in relation to certain liabilities: (a) covered deposits; (b) secured liabilities (up to the amount of the guarantee) including covered bonds and liabilities in the form of financial instruments used for hedging purposes which form an integral part of the cover pool and which according to national law are secured in a way similar to covered bonds; (c) any liability that arises by virtue of the holding by the relevant institution or entity of client assets or client money including client assets or client money held on behalf of UCITS, Venture Capital funds or closed-end type UCITS provided that such a client is protected under the applicable insolvency law; (d) any liability that arises by virtue of a fiduciary relationship between the relevant institution or entity as fiduciary and another person as beneficiary provided that such a beneficiary is protected under the applicable insolvency law; (e) liabilities to institutions, excluding entities that are part of the same group, with an original maturity of less than seven days; (f) liabilities with a remaining maturity of less than seven days, owed to systems or operators of systems designated according to Act 41/1999, of November 12, on payment and securities settlement systems, or their participants and arising from the participation in such a system or to central counterparties ("**CCPs**") authorized in the European Union pursuant to Article 14 of Regulation (EU) nº 648/2012 and third-country CCPs recognised by the European Securities and Markets Authority ("**ESMA**") pursuant to article 25 of that Regulation; and (g) a liability to any one of the following: (i) an employee, in relation to accrued salary, pension benefits or other fixed accrued remuneration, except for the variable component of remuneration that is not regulated by a collective bargaining agreement ; (ii) a commercial or trade creditor arising from the provision to the relevant institution or entity of goods or services that are critical to the daily functioning of its operations, including IT services, utilities and the rental, servicing and upkeep of premises; (iii) tax and social security authorities; or (iv) deposit guarantee schemes arising from contributions due in accordance with Royal Decree-law 16/2011 of October 14, by which the FGD was created and its implementing regulation; and (h) liabilities issued to entities that are a part of the same resolution group without themselves being resolution entities, regardless of their maturities, except where those liabilities rank below ordinary unsecured liabilities under the relevant national law of the Kingdom of Spain governing normal insolvency proceedings.

The "**Spanish Bail-in Power**" means any write-down, conversion, transfer, modification, or suspension power existing from time to time under, and exercised in compliance with, any laws, regulations, rules or requirements in effect in Spain, relating to the transposition of the BRRD, as amended from time to time, including, but not limited to (i) Act 11/2015, as amended from time to time, (ii) Royal Decree 1012/2015, of November 6, implementing Act 11/2015 ("**Royal Decree 1012/2015**"), as amended from time to time, (iii) the SRM Regulation, as amended from time to time, and (iv) any other instruments, rules or standards made in connection with either (i), (ii) or (iii), pursuant to which any obligation of an institution can be reduced, cancelled, modified, or converted into shares, other securities, or other obligations of such institution or any other person (or suspended for a temporary period).

In accordance with Article 21.10 of the SRM Regulation and Article 48 of Act 11/2015 (and subject to any exclusions that may be applied by the Relevant Resolution Authority under Article 27.5 of the SRM Regulation and Article 43 of Act 11/2015 in addition to the aforementioned mandatory exclusions set forth in Article 27.3 of the SRM Regulation and Article 42 of Act 11/2015), in the case of any application of the Bail-in Power, the sequence of any resulting write-down or conversion by the Relevant Resolution Authority shall be in the following order: (i) CET1 instruments (such as common shares); (ii) AT1 instruments; (iii) Tier 2 instruments; (iv) other subordinated claims that do not qualify as AT1 capital or Tier 2 capital; and (v) bailinable liabilities in accordance with the hierarchy of claims in normal insolvency proceedings (with "non-preferred" senior claims subject to the Spanish Bail-in Power after any subordinated claims against the credit institution but before the other senior claims against the credit institution).

In addition to the Spanish Bail-in Power, the BRRD, SRM Regulation and Act 11/2015 provide for resolution authorities to have the further power to permanently write-down or convert capital instruments and certain internal eligible liabilities into equity, at the point of non-viability of an institution or a group.

According to Article 21 of the SRM Regulation and Article 38 of Act 11/2015, the Relevant Resolution Authority may exercise the power to write down or convert relevant capital instruments and certain internal eligible liabilities: (i) independently of resolution action, including the bail-in tool; or (ii) in combination with a resolution action, where the conditions for resolution specified in Article 18.1 of the SRM Regulation and Article 19 of the Act 11/2015 are met. Therefore, the Relevant Resolution Authority has the power to write down and convert into equity capital instruments and certain internal eligible liabilities, not only when conditions for resolution (as defined in Article 18.1 of the SRM Regulation and Article 19 of Act 11/2015) are met, but also in all the circumstances defined in Article 21.8, in conjunction with Article 21.1, of the SRM Regulation and Article 38.2 of Act 11/2015. These circumstances include the point of non-viability of an entity (as defined in Article 38.3 of Act 11/2015 and Article 21.3, in conjunction to article 18.1 of the SRM Regulation). The point of non-viability of an institution is the point at which the Relevant Resolution Authority determines that the institution meets the conditions for resolution (either (i) the institution infringes or there are objective elements to support a determination that the group, in the near future, will infringe its consolidated solvency requirements or any other requirements which are necessary to maintain the banking license; (ii) the liabilities of the institution are or there are objective elements to support a determination that the liabilities of the institution will, in the near future, be greater than its assets; (iii) the institution is or there are objective elements to support a determination that the institution will, in the near future, be unable to pay its liabilities as they fall due; or (iv) extraordinary public financial support is required by the institution) or will no longer be viable unless the relevant capital instruments and certain internal eligible liabilities are written down or converted into equity or extraordinary public support is to be provided and without such support the Relevant Resolution Authority determines that the institution would no longer be viable. The point of non-viability of a group is the point at which the group infringes or there are objective elements to support a determination that the group, in the near future, will infringe its consolidated solvency requirements in a way that would justify action by the Relevant Resolution Authority.

Credit institutions must prepare and maintain a recovery plan (as described in Article 6 of Act 11/2015) providing measures to be taken by the institution to restore its financial position following a significant deterioration of its financial situation. The plan and its updates must be approved by the board of directors of the entity, and reviewed by the competent supervisory authority that then will share it with the Relevant Resolution Authority. The recovery plan must be updated at least annually and also after any significant change in the organizational or legal structure of the institution or its financial position. The recovery plan should include a set of indicators, both quantitative and qualitative, that will be considered as a reference to undertake the actions envisaged therein. In no case should access to public financial support be assumed. The plan shall include a range of recovery measures to, among others, and as required in each case, (a) reduce the risk profile of the institution, including liquidity risk; (b) enable timely recapitalization measures; (c) review the institution's strategy and structure; (d) make changes to the funding strategy so as to improve the resilience of the core business lines and critical functions; and (e) make changes to the governance structure of the institution.

When an entity meets the conditions for early intervention as defined in Article 8.1 of Act 11/2015, the competent supervisor will declare the situation of early intervention and may set all or some of the early intervention measures. For these purposes, Article 9.1 of Act 11/2015 compels institutions to immediately inform the competent supervisor as soon as they are aware of meeting any of the conditions defined in Article 8.1. Early intervention measures are described in Article 9 of Act 11/2015 and include, but are not limited to, the following (i) to require the management body of the entity to apply one or more of the measures set out in its recovery plan; (ii) to require the management body of the entity to examine the situation, determine the necessary measures to overcome the problems identified and draw up an action plan to address these issues, with a specific timetable for implementation; (iii) to require the management body of the institution to convene, or if the management body fails to comply with this requirement, convene directly the general shareholders' meeting; (iv) to require the removal or replacement of one or more members of the management body, senior management or similar, if it is determined they do not meet their obligations in accordance with the requirements applicable; (v) to appoint a competent supervisor delegate in the entity entitled to attend, with voice but no vote; (vi) to require the management body to draft a plan for negotiating debt restructuring with part or all of its creditors; and (vii) to require changes in the business strategy of the institution or the consolidated group or subgroup. The institution may even be intervened, or its board of directors replaced by decision of the competent supervisor in case that the aforementioned measures were not sufficient.

In a resolution process, the absorption of losses by shareholders, holders of capital instruments and creditors of the institution is intended to avoid the cost to taxpayers. The Relevant Resolution Authority will apply the power to write-down and convert capital instruments and eligible liabilities to absorb losses and to cover the relevant recapitalization amount determined under the provisions of the law, writing down or reducing the number of shares, equity instruments or liabilities admissible in the sequence determined by Article 21.10 of the SRM Regulation and Article 48 of Act 11/2015.

The Spanish deposit guarantee scheme

The current Spanish deposit guarantee scheme (*Fondo de Garantía de Depósitos de Entidades de Crédito*, the "**FGD**") was created (as a result of the consolidation of the former deposit guarantee schemes of banks, savings banks and credit cooperatives) by Royal Decree-law 16/2011, of October 14, as amended. Pursuant to Article 8 of such Royal Decree-law 16/2011, the FGD guarantees both (i) cash deposits, by means of the deposit guarantee division and (ii) securities deposits, by means of the securities guarantee division; in both cases up to €100,000 per customer and credit institution, which is the minimum insured amount for all EU member banks. For the purpose of the FGD's guarantee, eligible deposits will be those credit balances held in accounts, including funds arising from transitory situations due to traffic operations and excluding those deposits mentioned in Article 4.4 of Royal Decree 2606/1996, which the institution is obliged to return under the applicable legal and contractual conditions, regardless of the currency in which they are denominated and provided that they are constituted in Spain or in another Member State of the European Union, including term deposits and savings deposits. The portion of these deposits that does not exceed €100,000 per customer and credit institution will be considered guaranteed deposits.

The FGD is funded by (a) annual contributions from member credit institutions; (b) extraordinary contributions from the institutions up to a maximum amount of 0.5% of the deposits to which the guarantee extends (unless the Bank of Spain authorizes a higher amount); (c) financing obtained in capital markets or by other mechanisms; and, additionally, (d) guaranteed payment commitments from the institutions. The Ministry of Economic Affairs and Digital Transformation (*Ministerio de Asuntos Económicos y Transformación Digital*), following a proposal from the Bank of Spain, is authorized to reduce the member banks' contributions when the FGD's equity is considered sufficient to meet its needs. Moreover, contributions will be suspended when the FGD's equity reaches 1% of the calculation base of the contributions of the member institutions as a whole.

On April 16, 2014, Directive 2014/49/EU of the European Parliament and of the Council on deposit guarantee schemes ("**Deposit Guarantee Schemes Directive**") was adopted, aimed at eliminating certain differences between the laws of the Member States as regards the rules on deposit guarantee schemes to which those credit institutions are subject. The Deposit Guarantee Schemes Directive was transposed to Spanish national law through Act 11/2015 and Royal Decree 1012/2015 by amending, respectively, Royal Decree-law 16/2011 and Royal Decree 2606/1996. As the Deposit Guarantee Schemes Directive states that the scope of protection of deposit guarantee schemes shall be limited to the coverage of deposits or to funding early intervention or resolution measures, the FGD has been divided into (i) the deposit guarantee division, which funds shall be used to cover the responsibilities set out in the Deposit Guarantee Schemes Directive, and (ii) the securities guarantee division, which shall cater for the rest of responsibilities of the FGD.

Royal Decree 1012/2015 introduced a change in the methodology of calculation of the contributions to the new deposit guarantee division. The calculation base for the contributions was no longer determined by the total amount of deposits that may need to be covered by the deposit guarantee schemes, but rather by the volume of deposits that would become effectively covered by the deposit guarantee schemes. Likewise, this regulation sets out a cooperation regime between the deposit guarantee schemes of the Member States, in particular, in relation to the refund of deposits in branches established by banks in other Member States.

Due to the fact that the integration of deposit guarantee schemes into a single scheme for countries participating in the EU banking union is perceived as a "third pillar" of such EU banking union (the other two being the SSM and the SRM, both already in force), on January 26, 2021, the European Commission launched a targeted public consultation on technical aspects on a new review of the BRRD, the SRM Regulation and Directive 2014/49/EU of the European Parliament and of the Council of April 16, 2014 on deposit guarantee schemes. The consultation was open until April 20, 2021 and was split into two main sections: a section covering the general objectives of the review focus, and a section seeking technical feedback on stakeholders' experience with the current framework and the need for changes in the future framework, notably on (i) resolution, liquidation and other available measures to handle banking crises, (ii) level of harmonization of creditor hierarchy in the EU and impact on no creditor worse off principle, and (iii) depositor insurance. No agreement on potential changes was reached during the public consultation, and therefore further work will be needed and legislative proposals on this topic are only expected during 2022.

Pursuant to Article 6 of Royal Decree-law 16/2011, annual contributions are calculated based on the amount of deposits guaranteed by each bank and its risk profile. Circular 5/2016, of May 27, of the Bank of Spain on the calculation method for the contributions to be made by the participating entities to the deposit guarantee fund, as amended, sets out the applicable method to adjust the annual contribution calculated based on the amount of deposits guaranteed by each bank, in proportion to their risk profile.

As for the securities deposit, Royal Decree 948/2001, of August 3, regulated investor guarantee schemes (*sistemas de indemnización de los inversores*) related to both investment firms and to credit institutions. These schemes are set up through the Investment Guarantee Fund (*Fondo de Garantía de Inversiones*) for securities broker and broker-dealer firms and the FGD already in place for credit institutions.

As of December 31, 2021, we were a member of the FGD and thus were obliged to make annual contributions and extraordinary contributions to it. In 2021, our total contribution to the FGD amounted to €51,820 thousand (€53,774 thousand in 2020 and €49,247 thousand in 2019).

Capital requirements

As a result of the financial crisis, banking regulators have enhanced and reinforced the regulatory framework of financial institutions globally. The Basel III framework, a banking supervision package of reforms to the regulatory capital framework for internationally active banks is designed, in part, to ensure that capital instruments issued by such banks fully absorb losses before taxpayers are exposed to loss.

Basel III is an evolving set of international standards agreed upon by supervisors and central banks. The goal of the Basel III framework is to reduce the risk of spillover from the financial sector to the real economy. To achieve this, Basel III proposes reforms meant to strengthen global capital, liquidity and leverage requirements. It also aims to facilitate supervision and increase transparency. There are three pillars that make up Basel III. Pillar I represent the minimum capital and liquidity requirements; Pillar II allows national supervisors to impose further measures requiring additional capital or liquidity; and Pillar III represents enhanced risk disclosure, transparency and market discipline.

In Europe, the Basel III standards have been implemented through Directive 2013/36/EU, of the European Parliament and of the Council, of June 26, 2013, on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms ("**CRD IV**"), as amended by Directive (EU) 2019/878 of the European Parliament and of the Council of 20 May 2019 (the "**CRD V Directive**" and together with the CRD IV Directive, the "**CRD Directive**") and Regulation (EU) No. 575/2013, of June 26, of the European Parliament and of the Council on prudential requirements for credit institutions and investment firms (the "**CRR I**") as amended by Regulation (EU) 2019/876 of the European Parliament and of the Council of 20 May 2019 (the "**CRR II**" and together with the CRR I, the "**CRR**"), which is complemented by several binding regulatory technical standards ("**RTS**"). The CRR and RTS are directly applicable in all Member States without the need for national implementation measures (the "**CRD Implementing Measures**"). The CRR together with the CRD Directive and any CRD Implementing Measures are referred to as the "**Capital Requirements Regulations**". The implementation of the CRD IV Directive in Spain took place through Royal Decree-law 14/2013, of November 29, on urgent measures to adapt Spanish law to EU regulations on the subject of supervision and solvency of financial entities (the "**Royal Decree-law 14/2013**"), Act 10/2014, of June 26, on organization, supervision and solvency of credit institutions (the "**Act 10/2014**"), Royal Decree 84/2015, of February 13, implementing Act 10/2014 (the "**Royal Decree 84/2015**"), and Bank of Spain Circulars 2/2014, of January 31, and 2/2016, of February 2, to credit institutions, on supervision and solvency, which complete the adaptation of Spanish law to CRR and the CRD IV (the "**Bank of Spain Circular 2/2016**").

On June 27, 2019 a comprehensive package of reforms amending CRR I, the CRD IV Directive, the BRRD I and the SRM Regulation I entered into force: (i) CRD V; (ii) BRRD II; (iii) CRR II; and (iv) SRM

Regulation II (the "**EU Banking Reforms**"). The EU Banking Reforms cover multiple areas, including, among others, the "Pillar 2 framework", the leverage ratio, mandatory restrictions on distributions, permission for reducing own funds and eligible liabilities, macroprudential tools, a new category of "non-preferred" senior debt that should only be bailed-in after junior ranking instruments but before other senior liabilities, changes to the definitions of Tier 2 and Additional Tier 1 instruments, the MREL framework and the integration of the TLAC standard into EU legislation. With regard to the European Commission's proposal regarding the recognition of the "non-preferred" senior debt, it was implemented in the EU through the Directive (EU) 2017/2399 amending the BRRD as regards the ranking of unsecured debt instruments in insolvency hierarchy, which was published in the Official Journal of the EU on December 27, 2017. In Spain, the new class of "non-preferred" senior debt and its insolvency ranking were introduced earlier through the Royal Decree-law 11/2017.

Most of the provisions of the EU Banking Reforms have started to apply. The CRD V and BRRD II have been partially implemented into Spanish law through Royal Decree-law 7/2021 amending, among others, Law 10/2014 and Law 11/2015, respectively. Despite the fact that Royal Decree-law 7/2021 is generally enforceable since April 29, 2021, the Spanish Parliament decided to process it as a Law and so Royal Decree-law 7/2021 provisions may be subject to changes. Furthermore, Royal Decree 970/2021, which amended Royal Decree 84/2015, and Circulars 5/2021 and 3/2022 of the Bank of Spain, which amended the Bank of Spain Circular 2/2016, completed the implementation into Spanish law of the CRD V Directive and Royal Decree 1041/2021, which amended Royal Decree 1012/2015, completed the implementation of BRRD II into Spanish law. Given the recent implementation of the CRD V Directive and the BRRD II, there is uncertainty as to how the EU Banking Reforms will be applied by the relevant authorities.

Additionally, on October 27, 2021, the European Commission published legislative proposals amending CRR and the CRD Directive, as well as a separate legislative proposal amending CRR and BRRD in the area of resolution of credit institutions and investment firms. In particular, these legislative proposals are the following: (i) Directive of the European Parliament and of the Council amending CRD Directive as regards supervisory powers, sanctions, third-country branches, and environmental, social and governance risks, and amending BRRD; (ii) Regulation of the European Parliament and of the Council and its annex amending CRR as regards requirements for credit risk, credit valuation adjustment risk, operational risk, market risk and the output floor; and (iii) Regulation of the European Parliament and of the Council amending CRR and BRRD as regards the prudential treatment of global systemically important institution groups with a multiple point of entry resolution strategy and a methodology for the indirect subscription of instruments eligible for meeting the minimum requirement for own funds and eligible liabilities. These legislative proposals will need to follow the ordinary legislative procedure to become binding EU law. The average length of the ordinary legislative procedure is of around 18 months. However, the timing for the final implementation of these legislative proposals is unclear as of the date of this Registration Document. The final package of new legislation may not include all elements currently set out in the legislative proposals and new or amended elements may be introduced through the course of the legislative process. Furthermore, with respect to (i) above, the Directive will need to be implemented in each of the Member States, and the way it will be implemented may vary depending on the relevant Member State.

Own funds (minimum Pillar 1 capital requirements)

Basel III, as implemented through the Capital Requirements Regulations, seeks to consistently define capital and set minimum capital requirements for credit institutions. The value of a bank's capital is expressed as a percentage of its RWAs. Safe assets such as cash are disregarded while loans to other institutions receive a higher weight. This means that banks must carry more capital for riskier assets. The capital requirement ratios are meant to correlate the amount of risk with a corresponding level of capital. Banks can choose to increase capital or reduce RWAs when attempting to meet the capital ratio requirements.

In compliance with the applicable solvency requirements, we must at all times satisfy the following own funds requirements (minimum Pillar 1 requirements):

- a CET1 ratio of 4.5%;

- a Tier 1 capital ratio of 6%; and
- a total capital ratio of 8%.

CET1 capital ratio (4.5%)

The CET1 ratio is the CET1 capital of the institution expressed as a percentage of the total risk exposure amount. CET1 capital is comprised of the sum of the following elements: (a) capital instruments, provided that the conditions laid down in Article 28 of the CRR or, where applicable, Article 29 are met; (b) share premium accounts related to the instruments referred to in point (a); (c) retained earnings; (d) accumulated other comprehensive income; (e) other reserves; and (f) funds for general banking risk. The items referred to in points (c) to (f) shall be recognized as CET1 only where they are available to the institution for unrestricted and immediate use to cover risks or losses as soon as these occur.

Tier 1 capital ratio (6%)

The Tier 1 capital ratio is the Tier 1 capital of the institution expressed as a percentage of the total risk exposure amount. The Tier 1 capital of an institution consists of the sum of the CET1 capital (4.5%) and AT1 capital (1.5%). AT1 capital is comprised of the sum of the following elements: (a) capital instruments, where the conditions laid down in Article 52(1) of the CRR are met; and (b) the share premium accounts related to the instruments referred to in point (a). Instruments included under point (a) shall not qualify as CET1 or Tier 2 items.

Total capital ratio (8%)

The total capital ratio is the own funds of the institution expressed as a percentage of the total risk exposure amount. The total capital of an institution consists of the sum of the Tier 1 capital (6%) and Tier 2 capital (2%). Tier 2 capital consists of (a) capital instruments and subordinated loans where the conditions laid down in Article 63 of the CRR are met; (b) the share premium accounts related to instruments referred to in point (a); (c) for institutions calculating risk-weighted exposure amounts in accordance with Chapter 2 of Title II of Part Three, general credit risk adjustments, gross of tax effects, of up to 1.25% of risk-weighted exposure amounts calculated in accordance with Chapter 2 of Title II of Part Three of the CRR; and (d) for institutions calculating risk-weighted exposure amounts under Chapter 3 of Title II of Part Three, positive amounts, gross of tax effects, resulting from the calculation laid down in Articles 158 and 159 up to 0.6% of risk-weighted exposure amounts calculated under Chapter 3 of Title II of Part Three of the CRR. Items included under point (a) shall not qualify as CET1 or AT1 items.

Pillar 2 requirements (P2R) and Pillar 2 Guidance (P2G)

The Capital Requirements Regulations also contemplate that in addition to the minimum Pillar 1 capital requirements, supervisory authorities may impose, as a result of the SREP conducted by them, further Pillar 2 requirements to cover other risks, including those not considered to be fully captured by the minimum Pillar 1 capital requirement under CRR or to address macro-prudential considerations.

Pursuant to the Capital Requirements Regulations, the relevant supervision authorities, in coordination with the EBA, will periodically subject the banks they supervise to stress tests. The ultimate aim of capital stress tests is to conduct a comprehensive assessment of the risks and solvency of the banks to determine potential capital requirements in the event these scenarios arise. The results of such tests will be taken into account in the SREP and will, in turn, have an impact on the decision to establish prudential requirements for each financial year.

In accordance with Article 104b of the CRD Directive, as implemented in Spain by Articles 69 and 69 bis of Law 10/2014 and Articles 94 and 95 of Royal Decree 84/2015, "Pillar 2" capital will consist of two components: (i) "Pillar 2" requirements ("**P2R**"), which are binding and which breach can have direct legal consequences for banks, and (ii) "Pillar 2" Guidance ("**P2G**") which is a non-legally binding expectation identified on an idiosyncratic and risk-sensitive way to address the institutions' ability to maintain applicable own funds requirements in stress conditions based on the outcomes of the adverse scenario of the relevant supervisory stress tests. According to Article 43.3.c) of Law 10/2014, banks shall meet at all times the P2G with CET1 capital on top of the level of binding capital (minimum and additional) requirements ("Pillar 1" capital requirements, P2R and the "combined buffer requirements"). If a bank does not meet its P2G, this will not result in automatic action of the supervisor and will not be used to determine the Maximum Distributable Amount (as defined below), but Article 69.1.e) of Law 10/2014, provides that when an institution repeatedly fails to meet P2G, it will trigger, where appropriate, the imposition of additional own funds requirements. The Capital Requirements Regulations do not require disclosure of the P2G. However, the Market Abuse Regulation (MAR) ESMA Guidelines on delay in the disclosure of inside information and interaction with prudential supervision, as amended on January 5, 2022, provide that P2R is expected to be considered as inside information whereas P2G may (or may not) be inside information (for example it is likely to be inside information if (a) the difference between the P2G and the institution's level of capital is not minor and is likely to involve a major reaction by the institution, such as a capital increase; and (b) the institution's P2G is not in line with market expectations, so a price impact can be expected). To the extent that they constitute inside information, P2G will need to be disclosed pursuant to the Market Abuse Regulation obligations applicable to us. As of the date of this Registration Document, given its size and its comparison with the average requirement for EU banks and with our levels of own funds, P2G is not considered significant for our overall capital position.

The EBA Guidelines hinge on four main components: (i) business model analysis; (ii) assessment of internal governance; (iii) assessment of risks to capital and adequacy of capital; and (iv) assessment of risks to liquidity and adequacy of liquidity. The assessment is summarized in a common scoring and leads to a consistent approach in setting supervisory requirements to hold additional capital and liquidity resources, as needed.. Pursuant to Article 94.6 of Royal Decree 84/2015 (implementing Article 104(a) of CRD Directive) at least 56% of P2R needs to be met with CET1 capital and at least 75% of P2R with Tier 1 capital. On March 12, 2020 in response to the COVID-19 pandemic the ECB announced measures expected to provide capital relief to banks in support of the economy. These measures included the permission to operate temporarily below the level of capital defined by P2G but, on February 10, 2022 the ECB announced that it will not extend capital and leverage relief so institutions are once again expected to operate above P2G from January 1, 2023 and will need to re-include central bank exposures in the leverage ratio from April 1, 2022.

In addition to the recent statements on using flexibility within accounting and prudential rules, such as those made by the Basel Committee on Banking Supervision (the "**BCBS**"), the EBA and the ECB, among others, the European Commission proposed a few targeted "quick fix" amendments to the EU's banking prudential rules in order to maximize the ability of banks to lend and absorb losses related to the COVID 19 pandemic. On June 28, 2020, Regulation 2020/873 of the European Parliament and of the Council of June 24 amending CRR as regards certain adjustments in response to the COVID-19 pandemic (the "**CRR Quick Fix**"), entered into force setting out exceptional temporary measures to alleviate the immediate impact of COVID-19-related developments, by adapting the timeline of the transitional arrangements for mitigating the impact on own funds of the application of international accounting standards on banks' capital, by postponing the date of application of the leverage ratio buffer for G-SII, by setting an optional temporary prudential filter to mitigate the negative impact of the volatility in central government debt markets during the COVID-19 pandemic on institutions, by advancing the date of application of several agreed measures that incentivize banks to finance employees, SMEs and infrastructure projects, the EBA regulatory technical standards on software and by aligning the minimum coverage requirements for NPLs that benefit from public guarantees with those that benefit from guarantees granted by official export credit agencies. In addition, in the context of the COVID-19 pandemic the ECB established the exclusion of certain exposures from the calculation of the leverage ratio until March 31, 2022. On February 10, 2022, the ECB announced that it will not extend capital and leverage relief so institutions will need to re-include central bank exposures in the leverage ratio from April 1, 2022. As of December 31, 2021, our leverage ratio (phased-in) excluding the impact of the temporary exemption from computing exposures to central banks, would have been 5.32% which represents a decrease of 69 basis points compared to the leverage ratio (phased-in) considering this temporary exemption which is no longer applicable (6.01% as of December 31, 2021). According to the ECB decisions of September 16, 2020 and June 18, 2021, the exposures that may be excluded comprise coins and banknotes constituting legal currency in the jurisdiction of the central bank and assets representing claims on the central bank, including reserves held at the central bank, insofar as these exposures are relevant for the transmission, and therefore, implementation of monetary policy. Such exposures include deposits held in the deposit facility and balances held on reserve accounts with the Eurosystem, including funds held in order to meet minimum reserve requirements. Exposures representing claims on the central bank that are not related to the implementation of monetary policy should not be excluded from the total exposure measure.

Combined buffer requirement

"Combined buffer requirement" means the total CET1 capital required to meet the requirement for the capital conservation buffer extended by the following, as applicable: an institution-specific countercyclical capital buffer; a G-SII buffer; an O-SII buffer; and a systemic risk buffer. The CET1 capital used to meet these buffers cannot be used to meet any other regulatory requirements or expectations (Pillar 1, P2R capital requirements or P2G).

The only buffer which is legally required for all institutions is the capital conservation buffer, the other four buffers will be determined by the competent authorities periodically.

- *Capital conservation buffer*. The purpose of this buffer is to ensure that banks build up capital buffers outside periods of stress which can be drawn down as losses are incurred. This buffer is an additional 2.5% of RWAs.
- *Countercyclical buffer*. The purpose of this buffer is to counteract the effects of the economic cycle on the lending activity of banks. It should reduce the volatility of credit. It should also reduce the probability of credit bubbles or crunches. The buffer forces banks to keep capital during economic booms to keep credit from becoming too cheap. The capital is then to be used or "released" when economic activity contracts. The percentage of the buffer can raise up to 2.5% of RWAs although the calculations of the buffer are based on the positions of the financial entity in different jurisdictions. In relation to Spain, the Bank of Spain publishes on a quarterly basis the value of the countercyclical buffer for the positions of credit institutions in Spain. On March 30, 2022, the Bank of Spain agreed to maintain the countercyclical buffer at 0% for the second quarter of 2022.
- *G-SII buffer*. The FSB and the Bank of Spain identify annually which banks are considered G-SIIs. These banks are required to keep a buffer of not less than 1% of RWAs. G-SIIs are divided in categories, depending on the category assigned by the competent authority, institutions are required to maintain a certain buffer. As of the date of this Registration Document, we have not been classified as G-SII by the FSB nor by the Bank of Spain, so we are not required to maintain this buffer.
- *O-SII buffer*. The Bank of Spain identifies annually which banks are considered O-SIIs and the buffer corresponding to each of them. These banks are required to keep a buffer of up to 3% of RWAs. As of the date of this Registration Document, we have not been classified as O-SII, thus, we are not required to maintain this buffer.
- *Systemic risk buffer*. This buffer may be used to prevent and mitigate long-term non-cyclical systemic or macro-prudential risks not covered by CRR. So far, the Bank of Spain has not required this buffer.

Stacking order

According to Article 48 of Law 10/2014, Article 73 of RD 84/2015 and Rule 24 of the Bank of Spain Circular 2/2016, those entities failing to meet the "combined buffer requirement" will be subject to restrictions on: (i) distributions relating to CET1 capital; (ii) payments in respect of variable remuneration or discretionary pension revenues; and (iii) distributions relating to additional tier 1 capital instruments ("**Discretionary Payments**"), until the maximum distributable amount calculated according to the Capital Requirements Regulations (i.e., the firm's "distributable profits", calculated in accordance with the Capital Requirements Regulations, multiplied by a factor dependent on the extent of the shortfall in CET1 capital) (the "**Maximum Distributable Amount**") has been calculated and communicated to the Bank of Spain. Thereafter, any such distributions or payments will be subject to such Maximum Distributable Amount for entities (a) not meeting the "combined buffer requirement" or (b) in relation to which the Bank of Spain has adopted any of the measures set forth in Article 68.2 of Law 10/2014 aimed at strengthening own funds or limiting or prohibiting the distribution of dividends.

As set out in the "Opinion of the European Banking Authority on the interaction of Pillar 1, Pillar 2 and combined buffer requirements and restrictions on distributions" published on December 16, 2015, competent authorities should ensure that the CET1 capital to be taken into account in determining the CET1 capital available to meet the "combined buffer requirement" for the purposes of the Maximum Distributable Amount calculation is limited to the amount not used to meet the Pillar 1 and P2R capital requirements. Accordingly, the "combined buffer requirement" is in addition to the minimum capital requirement and to the additional capital requirement, and therefore, it would be, after the P2G, the first layer of capital to be eroded pursuant to the applicable stacking order. Whereas recital 14 of the CRDV Directive further clarifies that P2R should be positioned in the relevant stacking order of own funds requirements above the "Pillar 1" capital requirements and below the "combined buffer requirement" or the leverage ratio buffer requirement, as applicable, it also clarifies that P2R should be set in relation to the specific situation of an institution excluding macroprudential or systemic risks, but including the risks incurred by individual institutions due to their activities (including those reflecting the impact of certain economic and market developments on the risk profile of an individual institution). The CRD Directive also allows the P2R to be partially covered with Additional Tier 1 instruments and Tier 2 instruments, as explained above.

Our minimum capital requirements

Solo Waiver

Solvency requirements are applied to us on a consolidated basis, as the application of prudential requirements on an individual basis has been waived from us in accordance with Article 7 of the CRR.

Since March 31, 2016, we have been waived from the application of prudential requirements on an individual basis in accordance with article 7 of CRR (the "**Solo Waiver**"). Such waiver was requested by Ibercaja Banco to the competent supervisor in accordance with the applicable regulations, and based on the following reasons: (a) that there was no current or foreseen material, practical or legal impediment to the prompt transfer of own funds or repayment of liabilities to the parent company (i.e. Ibercaja Banco) and (b) the procedures to measure, evaluate and control the risks for the supervision of the Group were referred to Ibercaja Banco as the parent company.

The Solo Waiver granted by the competent supervisor exempted us from compliance, on an individual basis, with the equity requirements and limits for great risks. Consequently, for the same reasons described above, we are exempted from the application of prudential requirements on an individual basis in accordance with Article 7 of CRR. As a result, we do not have to comply with, nor calculate nor publish, any capital requirements or ratios on an individual basis for so long as this derogation is in place, having the obligation to calculate and comply with capital requirements only at Group level, except for the LCR and NSFR which we have to calculate at individual and consolidated level.

As of the date of this Registration Document, such waiver is still in force and therefore the prudential requirements under the Capital Requirements Regulations are only complied with by us on a consolidated basis (i.e. at Group level). As far as we are aware, the regulator is not planning to review the Solo Waiver in the short term.

ECB 2022 SREP communication

On February 4, 2022 we announced that the ECB had notified us of its decision to modify the prudential requirements established as part of the 2021 SREP which are applicable from March 1, 2022. As a result, as of the date of this Registration Document we must maintain a CET1 ratio of 8.21% and a total capital ratio of 12.65% on a consolidated basis. These capital requirements include the minimum capital requirement for Pillar 1 (4.5% CET 1 and 8% of total capital), Pillar 2 (1.21% for CET1 and 2.15% for total capital) and the capital conservation buffer (2.5%).

The details of these capital requirements for 2022 and our capital ratios as of December 31, 2021 are described below:

	CET1	Total capital
Pillar 1	4.50%	8.00%
Pillar 2	1.21%	2.15%
Capital conservation buffer	2.50%	2.50%
Other buffers	0.00%	0.00%
Total requirements	**8.21%**	**12.65%**
Capital ratios as of December 31, 2021	**13.41%**	**18.12%**
Excess over requirements	5.20 pp	5.47 pp

The supervisory dialogue on the SREP is annual and usually starts in September and concludes by the end of January of the following year.

Our capital requirements and capital ratios for 2021, 2020 and 2019

The following table shows our total capital requirements for the years ended December 31, 2021, 2020 and 2019, based on the SREP communications:

	2021		2020		2019	
	CET1	Total capital	CET1	Total capital	CET1	Total capital
Pillar 1	4.50%	8.00%	4.50%	8.00%	4.50%	8.00%
Pillar 2	1.21%	2.15%	1.125%	2.00%	2.00%	2.00%
Capital conservation buffer	2.50%	2.50%	2.50%	2.50%	2.50%	2.50%
Other buffers	0.00%	0.00%	0.00%	0.00%	0.00%	0.00%
Total requirements	**8.21%**	**12.65%**	**8.125%**	**12.50%**	**9.00%**	**12.50%**

The following table shows our capital ratios for the years ended December 31, 2021, 2020 and 2019, as included in our Annual Accounts and our Pillar III disclosures:

	As of December, 31					
	2021		2020		2019	
	Phased-in	Fully-loaded	Phased-in	Fully-loaded	Phased-in	Fully-loaded
CET1 ratio	13.41%	12.71%	13.62%	12.59%	12.27%	11.35%
Tier 1 ratio	15.35%	14.65%	15.53%	14.51%	13.99%	13.07%
Total capital ratio	18.12%	17.43%	18.27%	17.26%	16.36%	15.45%

Minimum requirement for own funds and eligible liabilities (MREL)

In addition to the capital requirements under the Capital Requirements Regulations, BRRD introduces requirements for banks to maintain at all times a sufficient aggregate amount of own funds and "eligible liabilities", that is, liabilities that may be bailed in using the bail-in tool. Eligible liabilities may be senior or subordinated, provided, among other requirements, that they have a remaining maturity of at least one year and, if governed by a non-EU law, they must be able to be written down or converted under that law (including through contractual provisions), to ensure that banks have sufficient liabilities to absorb losses in case of failure, so shareholders and creditors should back much of the recapitalization burden instead of taxpayers.

This requirement should be proportionate and adapted for each category of bank on the basis of their risk or the composition of their sources of funding. The BRRD requires the MREL to be set as a percentage of own funds and total liabilities (after full recognition of counterparty netting rights), however, the MREL is not a fixed figure imposed by legislation but is to be set on a case-by-case basis by resolution authorities. To ensure consistency, there are some common criteria laid down for resolution authorities to apply, which must be further specified by the adoption of regulatory technical standards.

On May 23, 2016, the European Commission adopted a Delegated Regulation containing the MREL technical standards (Commission Delegated Regulation (EU) 2016/1450 of May 23, supplementing BRRD with regard to regulatory technical standards specifying the criteria relating to the methodology for setting the minimum requirement for own funds and eligible liabilities; the "**MREL Technical Standards**"), which specifies the criteria that resolution authorities will need to consider when setting the MREL. The level of capital and eligible liabilities required under MREL will be set by the resolution authority for each bank (and/or group) based on certain criteria including systemic importance.

The BRRD provisions on MREL have been transposed into Spanish law by means of Act 11/2015 and Royal Decree 1012/2015 as amended by Royal Decree-law 7/2021 and Royal Decree 1041/2021, respectively, which establish provisions to ensure that banks have sufficient loss-absorbing capacity and are ready for the implementation of bail-in tools (such as debt for equity swaps), and provides for national resolution authorities to set the MREL for each institution, based on the size, risk and business model. The MREL requirement came into force on January 1, 2016. However, the MREL Technical Standards and Royal Decree 1012/2015 recognized an appropriate transitional period to be set by resolution authorities. Such transitional period must comply with the maximum deadlines established by Royal Decree 1012/2015, this is, January 1, 2024 for the full requirement and January 1, 2022 for the intermediate requirement.

Likewise, on November 9, 2015 the FSB published TLAC Principles and Term Sheet, proposing G-SIIs to maintain significant minimum amounts of liabilities that are subordinated (by law, contract or structurally) to certain prior ranking liabilities, such as guaranteed insured deposits, and which form a new standard for G-SIIs. The TLAC Principles and Term Sheet contain a set of principles on loss absorbing and recapitalization capacity of G-SIIs in resolution and a term sheet for the implementation of these principles in the form of an internationally agreed standard. As of July 2, 2019, the FSB published its review of the technical implementation of the TLAC Principles and Term Sheet concluding that, although further efforts are needed to fully and effectively implement the TLAC standard and to determine the appropriate group-internal distribution of TLAC resources across home and host jurisdictions, there was no need to modify the TLAC standard as of such date. The TLAC Principles and Term Sheet establish a minimum TLAC requirement to be determined individually for each G-SII at the greater of (a) 16% of RWAs as of January 1, 2019 and 18%. as of January 1, 2022, and (b) 6% of the Basel III Tier 1 leverage exposures as of January 1, 2019, and 6.75% as of January 1, 2022. Under the FSB TLAC standard, capital buffers stack on top of TLAC.

Although we have not been classified as a G-SII by the FSB nor the Bank of Spain, one of the main objectives of the EU Banking Reforms is to implement the TLAC standard and to integrate the TLAC requirement into the general MREL rules ("**TLAC/MREL Requirements**") thereby avoiding duplication from the application of two parallel requirements. Although TLAC and MREL pursue the same regulatory objective, there are, nevertheless, some differences in the way they are constructed. The EU Banking Reforms integrate the TLAC standard into the existing MREL rules to ensure that both requirements are met with largely similar instruments, with the exception of the subordination requirement, which will be partially institution-specific and determined by the resolution authority.

Although the specific MREL requirements may vary depending on the specific characteristics of the relevant entity and the resolution process, BRRD II and CRR II introduce a relevant change for complying with MREL which as the date of this Registration Document includes two different ratios: (i) a risk ratio (percentage of total RWAs of the resolution entity) and (ii) a non-risk ratio (percentage of the resolution entity's total exposure).

According to the EU Banking Reforms, MREL application is also subject to a different regime depending on the nature of the entity based on its resource volume and systemic profile. Thus, the MREL requirements are different for G-SIIs, "top tier" entities (entities which are not G-SIIs with consolidated total assets above €100 billion), other entities which the resolution authority has assessed as reasonably likely to pose a systemic risk in the event of its failure ("**other systemic entities"**) and the rest of the resolution institutions. In particular, G-SIIs, "top tier" banks and other systemic entities are subject from January 2022 to MREL Pillar 1 requirements (to be met with subordinated instruments only): in principle, 18% RWAs and 6.75% of leverage exposure in the case of G-SIIs and 13.5% of RWAs and 5% of leverage exposure in the case of "top tier" entities and other systemic entities. The leverage exposure requirement includes the "combined buffer requirement" under the Capital Requirements Regulations.

Likewise, the EU Banking Reforms include an additional subordination requirement of eligible instruments for G-SIIs, "top tier" banks and other systemic entities involving a minimum MREL "Pillar 1" subordination requirement and an institution specific MREL "Pillar 2" subordination requirement. This "Pillar 1" subordination requirement shall be satisfied with own funds and other eligible MREL instruments (which MREL instruments may not for these purposes be senior debt instruments and only MREL instruments constituting subordinated debt and "non-preferred" senior debt under the insolvency hierarchy introduced in Spain by Royal Decree-law 11/2017 will be eligible for compliance with the subordination requirement). This requirement is targeted at 8% but can be adjusted upwards or downwards by resolution authorities on a case-by-case basis. Resolution authorities may also impose "Pillar 2" subordination requirements to institutions not constituting G-SIIs, "top tier" entities or other systemic entities.

On February 8, 2022, we announced that we had received the formal communication from the Bank of Spain regarding the MREL requirement, as determined by the SRB. As of the date of this Registration Document, regulation establishes January 1, 2024 as a deadline to comply with the MREL requirements set out below, with an interim requirement that must be met by January 1, 2022, these requirements being expressed as a percentage of both RWAs and leverage ratio. We have been required to reach, by January 1, 2022 an amount of own funds and eligible liabilities on a consolidated basis equal to 15.38% of RWAs (excluding the CET1 dedicated to comply with the combined buffer requirement) and 5.21% in terms of MREL leverage ratio. This requirement would be equal to 18.59% of our consolidated RWAs as of January 1, 2024 (excluding the CET1 dedicated to comply with the combined buffer requirement) (5.21% in terms of MREL leverage ratio). As of December 31, 2021, Ibercaja Banco has a percentage of MREL in terms of RWAs of 15.89% (excluding the CET1 dedicated to comply with the combined buffer requirement) and 7.21% in terms of MREL leverage ratio (6.38% excluding the waiver to not compute central bank exposures which expired in March 2022). Therefore, by the end of 2021 we already complied with such interim requirements. In addition, in December 2021, we issued €50 million senior preferred notes as part of our issuance plan to comply with our MREL requirements. In this context, and based on our estimates, our MREL issuance needs towards 2024, as of the date of this Registration Document, would amount to approximately €0.7- €0.8 billion.

In accordance with Articles 72a et seq of the CRR, the eligible liabilities, including subordinated debt instruments and subordinated loans that may not be deemed as additional AT1 or Tier 2 capital, shall be included in the MREL if they satisfy the conditions established under Article 72b(2) of the CRR. These conditions include, inter alia, that (i) the liability is directly issued or raised, as applicable, by an institution and is fully paid up; (ii) the liability is not owned by either (a) the institution or an entity included within the same resolution group, or (b) an undertaking in which the institution has a direct or indirect participation in the form of ownership, direct or by way of control, of 20% or more of the voting rights or capital of that undertaking; (iii) the acquisition of ownership of the liabilities is not funded directly or indirectly by the resolution entity; (iv) the claim on the principal amount of the liabilities under the provisions governing the instruments is wholly subordinated to claims arising from the excluded liabilities referred to in Article 72a(2) of the CRR, a subordination requirement that will be considered as being met in any of the situations listed under Article 72b(2)(d)(i) to (iii); (v) the liabilities are not secured or subject to a guarantee or any other arrangement that enhances the seniority of the claim by either (a) the institution or its subsidiaries; (b) the parent undertaking of the institution or its subsidiaries; or (c) any undertaking that has close links with the entities referred to in points (a) and (b); (vi) the liabilities are not subject to set-off or netting arrangements that would undermine their capacity to absorb losses in resolution; (vii) the provisions governing the liabilities do not include any incentive for their principal amount to be called, redeemed or repurchased prior to their maturity or repaid early by the institution, as applicable, except in the cases referred to in Article 72c(3) of the

CRR; (viii) the liabilities are not redeemable by the holders of the instruments prior to their maturity, except in the cases referred to in Article 72c(2) of the CRR; (ix) subject to Article 72c(3) and (4) of the CRR, where the liabilities include one or more early repayment options, including call options, the options are exercisable at the sole discretion of the issuer, except in the cases referred to in Article 72c(2) of the CRR; (x) the liabilities may only be called, redeemed, repaid or repurchased early where the conditions set out in Articles 77 and 78a are met; (xi) the provisions governing the liabilities do not indicate explicitly or implicitly that the liabilities would be called, redeemed, repaid or repurchased early, as applicable by the resolution entity other than in the case of the insolvency or liquidation of the institution and the institution does not otherwise provide such an indication; (xii) the provisions governing the liabilities do not give the holder the right to accelerate the future scheduled payment of interest or principal, other than in the case of the insolvency or liquidation of the resolution entity; (xiii) the level of interest or dividend payments, as applicable, due on the liabilities is not amended on the basis of the credit standing of the resolution entity or its parent undertaking; and (xiv) for instruments issued after June 28, 2021 the relevant contractual documentation and, where applicable, the prospectus related to the issuance explicitly refer to the possible exercise of the write-down and conversion powers in accordance with Article 48 of Directive 2014/59/EU.

Article 86 of Royal Decree 1012/2015 as amended by Royal Decree 1041/2021 establishes the consequences of a failure by an institution to meet the MREL requirement, including, among others: prohibition of certain distributions, requirement of additional capital, sanctions and other administrative measures.

Maximum Distributable Amount

As previously explained, under Article 141 (Restrictions on distribution) of the Capital Requirements Regulations, Member States must require that institutions that fail to meet the combined buffer requirement will be subject to restricted Discretionary Payments (which are defined broadly by the Capital Requirements Regulations as payments relating to CET1 capital (dividends), variable remuneration and payments on AT1 instruments). The restrictions will be scaled according to the extent of the breach of the combined buffer requirement or, where applicable, the corresponding SREP requirements and calculated as a percentage of the profits of the institution since the last distribution of profits or "Discretionary Payments". Such calculation will result in a Maximum Distributable Amount in each relevant period. As an example, the scaling is such that in the bottom quartile of the combined buffer requirement (taking into account the applicable stacking order), no "Discretionary Payments" will be permitted to be paid.

Furthermore, Article 10a of the SRM Regulation, as well as Article 16.a) of BRRD, as implemented in Spain by Article 16 bis of Law 11/2015, clarifies the stacking order between the "combined buffer requirement" and the MREL requirement. Pursuant to Law 11/2015, a resolution authority (including the SRB) has the power to prohibit an entity from making Discretionary Payments above the Maximum Distributable Amount (calculated in accordance with paragraph (4) of such Article 16.a) of the BRRD II and Articles 10a.4 of the SRM Regulation) where it meets the "combined buffer requirement" but fails to meet that "combined buffer requirement" when considered in addition to the MREL requirements (the "**MREL-Maximum Distributable Amount**" or, as defined in the SRM Regulation, the "M-MDA"). Article 10a of the SRM Regulation and Article 16.a) of the BRRD (specifically, Article 10a.3 of the SRM Regulation and paragraph 3 of Article 16 bis of Law 11/2015) includes a potential nine-month grace period whereby the resolution authority (including the SRB) will assess on a monthly basis whether to exercise its powers under the MREL-Maximum Distributable Amount before such resolution authority is compelled to exercise its power (subject to certain limited exceptions).

Article 141b of CRD IV Directive, included by the CRD V Directive, as implemented in Spain by Article 48 ter of Law 10/2014 and Article 73 bis of Royal Decree 84/2015, will restrict discretionary payments by G-SIIs in the form of dividends, variable remuneration and payments to holders of Additional Tier 1 Instruments in case of a failure to meet at the same time the leverage ratio buffer and the "combined buffer requirement".

In Spain, pursuant to Article 48.2 of Act 10/2014, credit institutions which do not fulfill the combined buffer requirement, shall calculate the Maximum Distributable Amount, in accordance with Article 73 of Royal Decree 84/2015 and Rule 24 of Bank of Spain Circular 2/2016.

Until the Maximum Distributable Amount has been calculated and such Maximum Distributable Amount has been immediately reported to the competent supervisor, none of the following actions can be performed by the credit institutions: (i) make a distribution in connection with CET1 capital; (ii) create an obligation to pay variable remuneration or discretionary pension benefits or pay variable remuneration if the obligation to pay was created at a time when the institution failed to meet the combined buffer requirements; and (iii) make payments on AT1 instruments. The restrictions shall only apply to payments that result in a reduction of CET1 capital or in a reduction of the profits, provided that the suspension or cancellation of the payment does not constitute an event of default of the payment obligations or other circumstances that lead to the opening of an insolvency proceeding.

When considering a distribution in connection with CET1 capital, the following are caught: (i) payment of cash dividends; (ii) the distribution of fully or partly paid shares or other equity instruments referred to in Article 26, paragraph 1, point a) of CRR refers; (iii) the redemption or purchase by an entity of its own shares or other own capital instruments referred to in Article 26, paragraph 1, point a) of the CRR; (iv) reimbursement of amounts paid in connection with capital instruments referred to in Article 26, paragraph 1, point a) of the CRR; (v) the distribution of the elements referred to in Article 26, paragraph 1, points b) to e) of the CRR; and (vi) any other which the competent supervisor considers equivalent to those described in items (i) to (iv).

As of the date of this Registration Document, we are not required to calculate a Maximum Distributable Amount. Based on the most recent SREP carried out by the ECB in 2021, if our CET1 phased-in ratio fell below 8.21% or our total capital phased-in ratio falls below 12.65% in 2022, we would be required to calculate our Maximum Distributable Amount, and as a consequence it may be necessary for us to reduce Discretionary Payments.

Deferred Tax Assets (DTAs)

CRR provides that DTAs that rely on the future profitability of a financial institution must be deducted from its regulatory capital (specifically CET1 capital) for prudential reasons, as there is generally no guarantee that DTAs will retain their value in the event of the institution facing difficulties. In particular, the general rule could be summarized as follows:

(i) 100% of DTAs arising from tax losses must be deducted from CET1 capital.

(ii) in respect of DTAs arising from temporary differences, only amounts in excess of 10% of CET1 capital must be deducted.

CRR and Circular 2/2014 of the Bank of Spain (which takes into account, in relation to significant institutions -as it is our case-, Regulation (EU) 2016/445 of the ECB of March 14, 2016 on the exercise of options and discretions available in EU law (ECB/2016/4)) set forth the applicable transitional period for the phase-in of the deductions referred to DTAs. The transitional regime provides for a period in which only a percentage (which increases yearly) of the applicable DTAs will have to be deducted. In relation to DTAs existing prior to January 1, 2014, the phase-in period extends to December 31, 2023 (in any other case, the transitional period expired on December 31, 2018).

There is an exemption to the general rule according to which no DTAs arising from temporary differences would need to be deducted from CET1 capital, provided that the following conditions are met:

(i) DTAs are automatically and mandatorily replaced without delay with a tax credit in the event that the institution reports a loss when the annual financial statements of the institution are formally approved or in the event of liquidation or insolvency of the institution;

(ii) the institution is able under the applicable national tax law to offset a tax credit referred to in point (i) against any tax liability of the institution or any other undertaking included in the same consolidation as the institution for tax purposes under that law or any other undertaking subject to supervision on a consolidated basis; and

(iii) where the amount of tax credits referred to in point (ii) exceeds the tax liabilities referred to in that point, any such excess is replaced without delay with a direct claim on the central government of the Member State where the institution is incorporated.

This deduction has a significant impact on Spanish banks due to the particularly restrictive nature of certain aspects of Spanish tax law. For example, in some EU countries when a bank reports a loss, the tax authorities refund a portion of taxes paid in previous years, but in Spain the bank must earn profits in subsequent years in order for this set-off to take place. Additionally, Spanish tax law does not recognize as tax-deductible certain amounts recorded as expenses in the accounts of a bank, unlike the tax legislation of other EU countries.

The Spanish regulator implemented certain amendments to the CIT Act through Royal Decree-Law 14/2013 and Law 48/2015, of October 29, which also provided for a transitional regime for DTAs generated before January 1, 2016, whereby certain DTAs can be treated as a direct claim against the tax authorities if a Spanish taxpayer is liquidated, becomes insolvent or incurs accounting losses, or can be exchanged for public debt instruments should it be unable to reverse the relevant differences within 18 years. This measure allows a Spanish bank not to deduct such DTAs from its regulatory capital.

By virtue of the CIT Act, these tax assets are guaranteed by the Spanish state and they can be converted by us into a current asset against the Spanish Tax Administration if the relevant company holding such tax assets is liquidated or judicially declared insolvent.

As mentioned, any convertibility of such DTAs into a current asset enables it not to deduct an amount equal to its tax assets from its capital under the Basel III framework, and, instead, add them to its RWAs, with a risk weighting of 100%.

However, in accordance with the aforementioned 2015 amendment of the CIT Act, in order for this conversion into current tax assets to be enforceable, CIT taxpayers (including us) will need to pay the Special Tax Charge (1.5% of the total amount of convertible assets existing on the last day of each tax period) over the DTAs recognized between 2008 and 2015 exceeding the aggregated tax liability of the taxpayer for these periods (2008-2015).

For tax periods starting on or after January 1, 2016, the amount of qualifying tax assets that will be convertible into current tax asset (i.e., guaranteed by the Spanish state) will be equal to the tax liability of the year (*cuota líquida positiva*) in which such qualifying tax assets were generated.

In April 2015, the European Commission initiated a preliminary State Aid investigation in relation to the Spanish deferred tax assets regime. Such investigation is now resolved to the extent that the new reading of the law (that requires payment of the Special Tax Charge in order for the conversion of the tax assets into a current asset to be enforceable) has been agreed by the European Commission, the Bank of Spain and the then Spanish Ministries of Treasury and Economy.

As of December 31, 2021, we had DTAs amounting to €1,292,152 thousand, representing 2.2% of our total consolidated assets. Out of our €1,292,152 thousand total DTAs as of December 31, 2021, approximately €634,179 thousand derived from temporary differences that are guaranteed by the Spanish state and which can be converted by us into a current asset against the Spanish tax authorities in the event of liquidation or judicial insolvency or if we record accounting losses in our audited annual accounts.

Liquidity requirements

Minimum reserve ratio

The legal framework for the minimum reserve ratio is set out in Regulation (EU) 2021/378 of the European Central Bank of January 22, 2021 on the application of minimum reserve requirements. For deposits with agreed maturity redeemable at notice over two years, repos and debt securities issued with maturity over two years there is no required reserve ratio. The reserve ratio for all other liabilities included in the reserve base is 1%.

As of December 31, 2021, we complied with the minimum reserve ratio set out by the ECB, with minimum reserves amounting to €359,127 thousand representing 1% of €35,922,690 thousand eligible liabilities (€362,377 and €319,247 thousand as of December 31, 2020 and 2019, respectively, representing 1% of €36,247,670 and €31,934,652 thousand eligible liabilities, respectively)[80].

Liquidity coverage ratio

The LCR is a quantitative liquidity standard developed by the BCBS to ensure that those banking organizations to which this standard is to apply have sufficient high-quality liquid assets to cover expected net cash outflows over a 30-day liquidity stress period.

As of December 31, 2021, our LCR (excluding Ibercaja Vida) was 452.0% (468.1% and 307.1% as of December 31, 2020 and 2019, respectively) above the minimum requirement of 100%.

Net Stable Funding Ratio

The BCBS's NSFR has a time horizon of one year and has been developed to provide a sustainable maturity structure of assets and liabilities such that banks maintain a stable funding profile in relation to their on- and off-balance sheet activities that reduces the likelihood that disruptions to a bank's regular sources of funding will erode its liquidity position in a way that could increase the risk of its failure.

As of December 31, 2021, our NSFR (excluding Ibercaja Vida) was 152.2% (151.5% and 131.4% as of December 31, 2020 and 2019, respectively) above the minimum requirement of 100%.

Capital management

Large exposures

CRR regulates large exposures in the context of capital management. Exposures to a person or group exceeding 1% of a group's or bank's regulatory capital represent a large exposure and need to be reported. Exposure to a single person or group shall not exceed 25% of a bank's or group's eligible capital. Article 392 of CRR limits the capital that can be taken into account to calculate the large exposures limit to Tier 1 capital (i.e., Tier 2 capital is not included).

As of December 31, 2021, we complied with the limit to large exposures, in accordance with CRR.

Other relevant regulations

Payment services and Payment Accounts

In 2009, European legislation on payment services was adopted, mainly set out in Directive 2007/64/EC of the European Parliament and of the Council of November 13, 2007 on payment services in the internal market ("**PSD**"). PSD was implemented in Spain through Law 16/2009 and was aimed at opening up payment services to competition from newly licensed payment institutions and increasing consumer protection by introduction of information requirements and uniform operational rules for payment service providers. The PSD laid the foundation for the creation of a single market in payments and constitutes the legal framework for a single euro payments area.

Directive (EU) 2015/2366 of the European Parliament and of the Council of November 25, 2015 on payment services in the internal market ("**PSD2**") was formally adopted on November 25, 2015. PSD2 imposed additional requirements on us with respect to payment services in the EEA and supports the emergence of new players in the payment services area and the development of innovative mobile and internet payments in Europe by opening the EU payment market to companies offering consumer or business-oriented payment services based on the access to the information from the payment account – so called "payment

[80] Pursuant to Article 6 of Regulation (EU) 2021/378 of the ECB, credit entities are allowed to apply a global deduction of €100,000 when calculating their minimum reserves.

initiation services providers" and "account information services providers". We are obliged to allow access to the accounts of our customers to these payment service providers offering payment initiation services or account information services.

Banks are obliged to allow access to the accounts of their customers for the so-called third-party payment service providers offering payment initiation services or account information services. Regulation (EU) 2015/751 of the European Parliament and of the Council of April 29, 2015 on interchange fees for card-based payment transactions, accompanying PSD2, introduces, among other things, maximum levels of interchange fees for transactions based on consumer debit and credit cards.

PSD2 has been implemented in Spain through Royal Decree-law 19/2018, of November 23, on payment services and other urgent financial measures and its developing regulation Royal Decree 736/2019, of December 20, on the legal regime of payment services and payment institutions.

MiFID, MiFID II, MiFIR

On April 21, 2004, MiFID (Directive 2004/39/EC of the European Parliament and of the Council of 21 April 2004 on markets in financial instruments) was adopted. MiFID regulated the provision of investment services and investment activities, provided a harmonized regime and aimed to increase competition and reinforce investor protection. It streamlined supervision on the basis of home country control and enhanced the transparency of markets. Furthermore, MiFID has harmonized conduct of business rules, including best execution, conflicts of interest, client order handling rules, rules on inducements and introduced a suitability test and an appropriateness test. Pursuant to MiFID, when advising a client or performing portfolio management activities a bank must: (i) in the interest of the client, obtain information about the latter's financial position, knowledge, experience, objectives and risk tolerance, insofar as this is reasonably relevant to the advice or the portfolio management, and (ii) ensure that its advice or manner of managing the portfolio, insofar as reasonably possible, is based on the information referred to under (i) (suitability test). When providing investment services other than advice or portfolio management, the bank must perform an appropriateness test relating to the client's knowledge and experience in the investment field relevant to the specific investment service. However, when transmitting and executing client orders at their initiative, and the orders relate to specific (non-complex) financial instruments such as (i) shares admitted to trading on a Regulated Market, and (ii) instruments normally traded on the money market (this is the execution-only regime), the appropriateness test does not have to be performed.

On May 15, 2014, MiFID II and MiFIR (Regulation (EU) No 600/2014 of the European Parliament and of the Council of May 15, 2014 on markets in financial instruments) were adopted by the European Parliament and the Council. MiFID II and MiFIR introduce new rules that among other things:

- regulate high frequency trading by requiring among other things (i) firms engaged in high frequency trading to be authorized to perform their activities, and (ii) trading venues to set limits on the order to trade ratio and set minimum tick sizes in shares and similar financial instruments;
- enhance the levels of client protection by (i) prohibiting investment firms from receiving payments (inducements) from third parties when providing independent advice and portfolio management, (ii) limiting the list of (non-complex) financial instruments in respect of which the execution-only regime without appropriateness test is available: execution only services can, for example, no longer be performed in respect of structured undertakings for collective investment in transferable securities ("**UCITS**") and (iii) extending the information requirements in relation to the best execution obligations;
- extend the organizational requirements and conduct rules by introducing product governance arrangements such as a product approval process and by prohibiting title transfer collateral arrangements in relation to retail clients' dealings in financial instruments;
- extend the application of certain organizational requirements and conduct rules to selling of and advising on structured deposits;

- extend and amend the current market structures by introducing (i) a new trading platform, the organized trading facility ("**OTF**"), (ii) a trading obligation for derivatives subject to the EMIR clearing obligation, and transactions in these derivatives will be required to take place on a Regulated Market, a multilateral trading facility ("**MTF**") or an OTF, if the derivative is sufficiently liquid and (iii) a trading obligation for shares that have been admitted for trading on a Regulated Market, an MTF or OTF unless exceptions apply, for instance where the transaction does not involve a retail counterparty and the transaction does not contribute to the price formation process;
- increase market transparency by extending the pre- and post-trade transparency regime to non-equities;
- enhance the availability and quality of trading data; and
- extend the scope of the reporting obligation to financial instruments traded on an MTF or OTF and financial instruments having an instrument traded on a Regulated Market as an underlying asset, and require additional information to be included in the transaction reports.

The exact scope and substance of most of MiFID II's rules are clarified in delegated acts, i.e. secondary legislation.

Furthermore, MiFID II has been amended by Directive (EU) 2016/1034 of the European Parliament and of the Council of June 23, 2016 amending MiFID II and MiFIR by Regulation (EU) 2016/1033 of the European Parliament and of the Council of June 23, 2016 amending MiFIR, Regulation (EU) No 596/2014 of the European Parliament and of the Council of April 16, 2014 on market abuse (market abuse regulation) and repealing Directive 2003/6/EC of the European Parliament and of the Council and Commission Directives 2003/124/EC, 2003/125/EC and 2004/72/EC and the rules and regulations promulgated pursuant thereto (the "**Market Abuse Regulation**") and Regulation (EU) No 909/2014 on improving securities settlement in the EU and on central securities depositories.

As of the date of this Registration Document, MiFID II has been fully implemented into Spanish law through Royal Decree-law 21/2017, Royal Decree-law 14/2018 and Royal Decree 1464/2018. In 2018, we implemented the new transparency requirements under MiFID II. In 2018, we devoted a significant amount of human, commercial and financial resources to adapt our business practices and to ensure an adequate communication to our customers of the commissions and fees charged to them in compliance with these new transparency requirements and best market practices.

MiFID II was further amended by Directive (EU) 2021/338 of the European Parliament and of the Council of February 16, 2021 amending Directive 2014/65/EU as regards information requirements, product governance and position limits, and Directives 2013/36/EU and (EU) 2019/878 as regards their application to investment firms, in the context of the COVID-19 pandemic. This amendment aimed to reduce complexity and simplify certain requirements. Member States are required to pass implementing measures by November 28, 2021 for them to be effective from February 28, 2022.

EMIR

EMIR aims to reduce counterparty risks related to OTC derivative trading and increases the transparency within the OTC derivatives market by requiring OTC derivatives which are declared subject to a clearing obligation to be cleared through central counterparties ("**CCPs**"), and by requiring counterparties to implement certain risk mitigation requirements with respect to non-centrally cleared OTC derivative transactions. EMIR also requires all derivative transactions (OTC or traded on a Regulated Market) to be reported to registered trade repositories.

Since its approval, EMIR has experienced a number of technical amendments and one larger review known as EMIR-refit, passed by Regulation (EU) 2019/834.

EMIR applies directly to any entity (financial or non-financial) established in the EU that has entered into a derivative transaction, and applies indirectly to non-EU counterparties trading with EU counterparties.

EMIR introduced a number of regulatory requirements for counterparties to OTC derivatives contracts, including: (i) a mandatory clearing obligation for certain classes of OTC derivatives contracts (the "**Clearing Obligation**"); (ii) a collateral exchange obligation for OTC derivatives contracts not subject to clearing (the "**Collateral Obligation**"); (iii) daily valuation and other risk mitigation requirements for OTC derivatives contracts not subject to clearing; and (iv) certain reporting and record keeping requirements.

Under EMIR, (a) financial counterparties ("**FCs**") and (b) non-financial counterparties whose positions in OTC derivatives (excluding hedging positions) exceed a specified clearing threshold ("**NFC+s**"), must clear through a CCP certain OTC derivatives contracts that are entered into on or after the effective date for the Clearing Obligation for each relevant counterparty pair and class of derivatives (the "Clearing Start Date"). Unless an exemption applies, FCs and NFC+s must clear any such OTC derivative contracts entered into between each other and with certain third country equivalent entities (i.e. those that would have been subject to the Clearing Obligation if they were established in the EU).

Data protection

The GDPR was adopted on April 27, 2016. The GDPR entered into force on May 25, 2018 and immediately applies across the EU as of such date. The GDPR imposes more stringent data protection obligations than under the previous data protection regime, resulting in higher compliance burdens. The GDPR requires us to be able to demonstrate its compliance with data protection principles. In addition, the GDPR increases sanctions for data protection compliance violations of up to a maximum of €20,000,000 or 4% of our global annual net turnover, whichever is higher.

In Spain, the GDPR is supplemented by Organic Act 3/2018 on Personal Data Protection and Royal Decree 1720/2007, of December 21.

Financial Conglomerates' Directive

We have had the status of "financial conglomerate" since May 2014, in accordance with Directive 2002/87/EC of the European Parliament and of the Council of December 16, 2002 on the supplementary supervision of credit institutions, insurance undertakings and investment firms in a financial conglomerate (the "**Financial Conglomerates' Directive**"), as implemented in Spain by Spanish Act 5/2005 on the supervision of financial conglomerates and Royal Decree 1332/2005, of November 11, which develops Spanish Act 5/2005. As of December 31, 2021, the average weight of each of the balance sheet and solvency requirements of our insurance entities is 13.66% (exceeding the 10% minimum average weight required in order to be considered significant under the Financial Conglomerates' Directive).

According to the Financial Conglomerates' Directive, a group shall be considered as a financial conglomerate when simultaneously meets the following conditions: (i) a regulated entity is at the head of the group or, if this is not the case, the group's activities are carried out mainly in the financial sector and at least one of the subsidiaries in the group is a regulated entity; (ii) at least one of the entities in the group is within the insurance sector and at least one is within the banking or investment services sector; and (iii) the consolidated and/or aggregated activities of the entities in the group within the insurance sector and the consolidated and/or aggregated activities of the entities within the banking and investment services sector are both significant.

As a financial conglomerate, we are subject to additional supervision by the JSTs (with the support of the Directorate General of Insurance and Pension Funds), with regards to (i) the Group's capital adequacy; (ii) the implementation of a global risk management at a Group level; (iii) risk concentration control and (iv) the review and monitoring of intra-Group transactions.

As a financial conglomerate we are not required to deduct our holdings in own funds instruments of our insurance significant investments for the calculation of our own funds on a consolidated basis to the extent that the conditions set out in Article 49 of CRR are met.

Banking Foundations Act Overview

Following the Spanish government request for financial assistance to the EU and the International Monetary Fund for the recapitalization of certain Spanish financial institutions in 2012, it was agreed that Spanish authorities would take measures to: (i) strengthen the governance structure of the former savings banks and of the commercial banks controlled by them, (ii) clarify the role of former savings banks in their capacity as shareholders of credit institutions under the form of banks or regular foundations with a view to eventually reducing their stakes to non-controlling levels, and (iii) provide a roadmap for the eventual listing of banks which have benefited from State Aid as part of the restructuring process.

On December 29, 2013, this request to reform the Spanish financial sector was fulfilled with the adoption of Act 26/2013, of December 27, on savings banks and banking foundations (the "**Banking Foundations Act**"), whereby the Spanish government amended the savings banks regime and most of the Spanish savings banks (which historically comprised almost half of the Spanish financial sector) were transformed into banks through different integration processes. The Banking Foundations Act therefore applies to the Ibercaja Foundation, as a banking foundation holding a controlling shareholding in the Company, although it does not apply to the Company directly.

The main changes introduced by the Banking Foundations Act were:

(i) *Savings banks were converted into banking foundations*: savings banks were automatically compelled to transform into foundations if their total assets exceeded €10 billion or the deposits market share in their core regions exceeded 35%. Upon conversion, each savings bank transferred its financial operations to a (newly created) bank in exchange for the shares of the latter. If the resulting foundation held at least 10% of the capital or voting rights of a bank or had the capacity to appoint board members in the bank, the foundation was classified as a banking foundation.

(ii) *Protocol for the management of the shareholding*: if a banking foundation (or several banking foundations acting in concert) holds a shareholding higher than 30% or a controlling shareholding in a bank, its governing body (*Patronato*) is obliged to put in place a protocol for the management of the shareholding in the bank that needs to be approved by the Bank of Spain, which evaluates if the influence of the foundation guarantees a sound and careful management of the bank, in accordance with general banking regulations.

Such protocol has to include:

- Basic strategic criteria to be taken into account in the management of the shareholding in the bank;
- The relationship between the governing body of the banking foundation and the management boards of the bank, indicating, *inter alia*, the criteria for the appointment of the directors of the bank; and
- General criteria for the implementation of transactions between the foundation and the bank and the mechanisms put in place to prevent conflicts of interests.

The Bank of Spain reviews the content of such protocol annually. The Ibercaja Foundation Protocol is available at the websites of the Ibercaja Foundation (www.fundacionibercaja.es) and of Ibercaja Banco (www.ibercaja.com) and is described in "*Related Party Transactions—Transactions with our shareholders—Ibercaja Foundation Protocol*".

For information on the corporate governance provisions and related party transactions under the Ibercaja Foundation Protocol see "*Board of Directors and Management*" and "*Related party transactions*".

(iii) *Financial plan*: if a banking foundation (or several banking foundations acting in concert) holds a shareholding higher than 30% or a controlling shareholding (within the meaning of article 42 of the Spanish Code of Commerce) in a bank, it is required to file each year with the Bank of Spain for its approval a financial plan detailing how the foundation will provide support to the bank in the event it has capital needs and the basic strategic criteria for investments in financial entities. The Bank of Spain will evaluate the foundation's possible influence on the sound and careful management of the bank, in accordance with general banking regulations.

The financial plan shall include, at least, the following points:

- Reasonable estimates of the capital requirements of the relevant bank in different macroeconomic scenarios;
- Strategy to be followed by the foundation to raise that capital in each scenario; and
- Basic strategic criteria for the investment in banks, including the term of the investments, the risk assumed and the diversification.

As for banking foundations having a shareholding higher than 50% or a controlling shareholding (within the meaning of article 42 of the Spanish Code of Commerce) in a bank, they must prepare a financial plan which shall also include:

- a plan for the diversification of investments and risk management, which shall include commitments in relation to the investment in assets issued by the same counterparty (different from those highly liquid and solvent assets) so they not go above the percentage over the total capital, in accordance with the terms defined by the Bank of Spain;
- the establishment of a reserve fund (or alternatively, a divestment plan to reduce the shareholding in the bank), as described in (v)) below; and
- any other measures that, in the view of the Bank of Spain, are required to guarantee the sound and careful management of the bank, and its capacity to comply with the Applicable Banking Regulations.

Financial plans are not made public by banking foundations.

(iv) *Establishment of a reserve fund*: if a banking foundation (or several banking foundations acting in concert) has a controlling shareholding in a bank it is forced to establish a reserve fund for eventual recapitalization needs of the Company. By virtue of Royal Decree 877/2015, of October 2, 2015 ("**Royal Decree 877/2015**") the foundations had initially a period of up to five years to build this reserve fund from the moment the Bank of Spain published Circular 6/2015, of November 17, developing Royal Decree 877/2015 ("**Circular 6/2015**") (which was published on November 20, 2015 and entered into force on November 21, 2015) or after acquiring a controlling shareholding in a bank. However, Royal Decree 536/2017 of May 26, 2017 ("**Royal Decree 536/2017**") extended that period to up to eight years. Under Royal Decree 536/2017, this deadline may be extended for one additional year at the request of the banking foundation, subject to the Bank of Spain's approval. Moreover, as a result of the COVID-19 pandemic and the adoption of limitations to dividend distributions to banking foundations (which generally are their main source of income), Royal Decree-law 19/2020 of May 26, established a one-year suspension of the eight-year period to build this reserve fund. According to Article 4.4 of Royal Decree 877/2015, the reserve fund is determined as a percentage of the RWAs of the bank controlled by one or several banking foundations. This percentage depends on the bank's total capital ratios subject to adjustments in relation to the stake owned by the banking foundation. In any case, the amount of the reserve fund shall not be less than 0.6% of the bank's RWAs, subject to the Bank of Spain's right to set a lower amount, in view of the individual circumstances of the banking foundation.

Notwithstanding the above, pursuant to Article 44.3 of the Banking Foundations Act, banking foundations are not required to build the reserve fund if they put in place a divestment plan including a detailed roadmap to be followed to decrease its controlling shareholding in the relevant bank within a period of up to five years from November 21, 2015 (i.e., the date on which Circular 6/2015 entered into force). Pursuant to Article 47 of the Banking Foundations Act, a breach of the obligation to create the reserve fund may be deemed as a very serious infringement and will be subject to the infringement procedure set out in Act 10/2014.

(v) *Corporate governance incompatibilities*: Pursuant to Article 10 of the Banking Foundations Act, it is incompatible to be a member of the governing body of banking foundations and credit institutions at the same time. In addition, pursuant to Article 40.3 of the Banking Foundations Act, directors of credit entities of which a banking foundation is a shareholder are not eligible as members of the governing body of the relevant banking foundation. Accordingly, the members of the governing bodies of the Ibercaja Foundation and Ibercaja Banco cannot be the same.

(vi) *Banking Foundations shareholding increase*: Pursuant to Additional Provision 8 of the Banking Foundations Act, the banking foundations referred to in Article 44.3 that participate in processes to increase the share capital of the credit institution in which they hold a controlling shareholding may not exercise the voting rights corresponding to that part of the capital acquired that allows them to maintain a shareholding of more than 50% or control over the credit entity.

The Bank of Spain may waive this provision in the event that the credit entity is undergoing any of the early intervention, restructuring or resolution processes provided for in Act 9/2012, of November 14, on the restructuring and resolution of credit entities.

(vii) *Limitations on dividend distributions*: Pursuant to Additional Provision 10 of the Banking Foundations Act, resolutions to distribute dividends in credit institutions controlled by a banking foundation in accordance with the provisions of Article 44.3 of the Banking Foundations Act shall be subject to the reinforced quorum established in Article 194 of the Spanish Companies Act and must be passed by a majority of at least two thirds of the capital present or represented at the meeting. The bylaws of credit institutions may increase this majority.

The Bank of Spain published Circular 7/2016, of November 29, developing accounting particularities applicable to banking foundations. Among others, this Circular specifies the accounting regime that banking foundations must apply in their individual and consolidated annual accounts, it establishes the requirement to identify in the internal accounting procedures the composition and implementation of the reserve fund described above and it provides additional information that should be included in the notes to the financial statements.

Covered bonds

Covered bonds have traditionally been an important source of funding for Spanish credit institutions. These instruments have structural features that aim to provide a special protection to investors, as they benefit from a statutory privilege over a certain pool of assets of the issuer vis-à-vis other creditors. Depending on the nature of the cover pool, there are three different types of covered bonds in Spain: mortgage covered bonds (*cédulas hipotecarias* and *bonos hipotecarios*), which are secured through mortgage loans, public covered bonds (*cédulas territoriales* and *bonos territoriales*), which are secured through loans granted to public authorities and internationalization covered bonds (*cédulas de internacionalización* and *bonos de internacionalización*), which are secured through loans linked to export contracts and the internationalization of companies.

Royal Decree-law 24/2021 which, among others, transposes Directive (EU) 2019/2162 on covered bonds into Spanish law was published on November 3, 2021 in the Spanish Official Gazette, as amended by Royal Decree-law 29/2021, of 21 December ("**RDL 24/2021**"). However, the new covered bonds regime will not come into force until July 8, 2022 and the Spanish Parliament decided to process RDL 24/2021 as a Law and so its provisions may be subject to changes. RDL 24/2021, in addition to transposing the Directive, also seeks to simplify and harmonize the Spanish legal regime on covered bonds.

RDL 24/2021 repeals Law 2/1981, of March 25, on the regulation of the mortgage market, article 13 of Law 14/2013, of September 27, on support for entrepreneurs and their internationalization, Article 13 of Law 44/2002, of November 22, on financial system reform measures and fourth additional provision of Law 5/2015, of April 27, 2015, on the promotion of business financing which constituted, among others, the former regime of covered bonds. Covered bonds issued prior to July 8, 2022 pursuant to the former regulatory regime shall continue to be governed by said regulations until that date. Thereafter, the legal regime for such covered bonds shall be the one provided for in RDL 24/2021 and its implementing measures. In addition, until such date issuers of said outstanding covered bonds shall carry out the necessary actions to comply with the obligations provided for in RDL 24/2021.

New covered bonds regulation introduced by means of RDL 24/2021 provide for significant changes in relation to the issue and maintenance of these type of instruments, including, among others, the liquidity buffer, extendable maturity structures, periodic information to holders of covered bonds, supervision of covered bonds (cover pool monitor and public supervision) and insolvency or resolution of the issuer of the covered bonds.

Mortgage legislation

Mortgages and mortgage loans in Spain are subject to extensive and scattered regulation. The most important piece of legislation is the Real Estate Loans Law further developed by Royal Decree 309/2019, of April 26 which entered into force on June 16, 2019 and implemented into Spanish law Directive 2014/17/EU of the European Parliament and of the Council of February 4, 2014 on credit agreements for consumers relating to residential immovable property.

A deep reform of mortgage legislation has been produced in Spain resulting in changes to such legislation, which, among others, are described below.

Royal Decree 6/2012, of March 9, on urgent measures to protect mortgage debtors without financial resources, introduced measures to enable the restructuring of mortgage debt and easing of collateral foreclosure aimed at protecting especially vulnerable debtors.

In addition, Royal Decree 27/2012, of November 15, on urgent measures to enhance the protection of mortgage debtors, provided for a two-year moratorium, from the date of its adoption, on evictions applicable to debtor groups especially susceptible to social exclusion, which may remain at their homes for such period.

Law 1/2013, of May 14, on measures to protect mortgagees, debt restructuring and social rents introduced important modifications to mortgage law and civil procedure law. Royal Decree-Law 5/2017, of 17 March which amends the Royal Decree-Law 6/2012 of 9 March, concerning urgent measures for the protection of mortgage debtors without resources, and Law 1/2013. This Royal Decree-Law addresses the mortgage restructuring of those individuals who suffer from major difficulties to make payments and attempts to facilitate and provide more flexibility in foreclosure procedures, such as expanding the suspension period of eviction or making it possible to execute more flexible mortgage policies after having expanded the number of possible beneficiaries and facilitating preferential leases.

Royal Decree 11/2014, following the judgment of the CJEU of July 17, 2014 regarding Spanish foreclosure processes, allows debtors to appeal against a court's resolution which rejects his or her opposition to the execution of a mortgage.

Royal Decree-Law 1/2015, of 27 February, on the "second chance" mechanism allows an individual who has been declared bankrupt to be discharged of outstanding obligations as long as he or she fulfils certain requirements: (i) the bankruptcy proceedings must have concluded, (ii) the debtor must have acted in good faith, the Royal Decree being restrictive as to when a debtor is considered to have acted in good faith, and (iii) the bankruptcy judge has to approve the terms of the discharge (and may revoke his or her approval under certain circumstances upon request of any creditor in the following five years). Discharge from mortgage obligations would only apply to the outstanding debts after the foreclosure, as long as such debts are considered ordinary or subordinate according to the Spanish Insolvency Law. Co-debtors and guarantors, if any, would remain liable.

Law 25/2015, of July 28, on the "second chance" mechanism reducing the financial burden and other measures of a social nature, entered into force on July 30, 2015 introducing a fee protection account for insolvency managers, limits on the remuneration of insolvency managers and the introduction of greater flexibility to a number of elements of the second chance mechanism.

COVID-19 mitigation measures

On March 18, 2020, Royal Decree-law 8/2020 of March 17, on extraordinary urgent measures to address the economic and social impact of the COVID-19 pandemic was published and then amended by Royal Decree-law 11/2020 of March 31, which introduced certain improvements and extended the measures contemplated therein. These Royal Decrees were aimed at ensuring the protection of mortgage debtors in a situation of economic vulnerability, establishing, among others, a Legal Moratoria on the payment of (i) mortgage loans on principal residence, (ii) loans secured by real estate used for economic activity, (iii) loans secured by housing that was intended for rental and in which the debtor had ceased to receive rent due to the COVID-19 pandemic, and (iv) loan and credit contracts without mortgage collateral, including consumer loans. The deadline to apply for these moratoria expired on March 30, 2021.

In addition to the Legal Moratoria, we adhered to the Sectorial Moratoria measures approved by the Board of the Spanish Confederation of Savings Banks (CECA). The deadline for beneficiaries to apply for this Sectorial Moratoria expired on March 30, 2021.

Subject to satisfying certain requirements, lenders could benefit from granting moratoriums under the Sectorial Moratoria in terms of the treatment of these payment moratoriums for accounting and prudential regulatory purposes.

The main features of the Sectorial Moratoria were:

- They may apply to all kinds of loans, credit and finance leases.
- Notwithstanding the interest due under the original loans, lenders and borrowers could agree for deferred payments to be made by (i) changing the frequency of repayment, without changing the term of the loan, or (ii) extending the term of the loan by the same number of months as the moratorium lasts.
- Payment deferral agreements could not be used to lay down new terms that were not contained in the original loan, such as the purchase of new products or the taking of further security. Excepted from this is the rollover, with the same original terms and premium, of any loan repayment or payment protection insurance taken out.
- Where lenders grant Legal Moratoria and Sectorial Moratoria at the same time or successively, Sectorial Moratoria arrangements with debtors will explicitly stated that the Legal Moratoria was in use and the Sectorial Moratoria would not take effect until it ends.
- Filing with the land registry of the Sectorial Moratoria between debtors and their lenders became fully effective, as necessary, with respect to registered interim creditors even where they did not consent to the arrangement.

Under the initial rules set out by Royal Decree-law 8/2020 (as modified by Royal Decree-law 11/2020), customers who applied for a Legal Moratoria or a Sectorial Moratoria in their mortgage payments ceased to be required to make those payments for three months or twelve months, respectively. Subsequently, the total duration of moratoria (both Legal Moratoria and Sectorial Moratoria) was set to nine months by Royal Decree-law 3/2021 of February 2, 2021 on measures to reduce the gender gap and other social security and economic measures. Where debtors did not apply for the moratorium under the original framework under Royal Decree-law 8/2020 (as modified by Royal Decree-law 11/2020) or, having done so, had not yet made use of the full nine months, they could apply for it under this new framework for the period that remained until those nine months were reached. If a Sectorial Moratoria of longer than nine months was granted before February 4, 2021 (when these further measures came into force), the terms and duration of the originally granted moratoria would remain the same, even if these exceeded nine months.

During the moratorium (whether it is a Legal Moratorium or Sectorial Moratorium), lenders could not demand mortgage payments or any repayments of principal or interest and mortgage provisions for demanding early repayment did not apply. Also, under the Legal Moratorium, no interest or late payment interest accrued in unpaid amounts.

Pursuant to Royal Decree-law 8/2020, the Spanish government also approved the granting of public guarantees under Guaranteed Credit Lines, a €100 billion scheme for credit lines granted by institutions to companies and the self-employed to meet their liquidity needs. The Guaranteed Credit Lines are guaranteed by the Instituto de Crédito Oficial (ICO) with the objective to provide sufficient liquidity to maintain employment and mitigate the economic effects of the COVID-19 pandemic[81].

Similarly, on July 3, 2020 Royal Decree-law 25/2020 was published, approving the implementation of a second scheme Guaranteed Credit Lines for €40 billion.

Subsequently, Royal Decree-law 34/2020 of November 17, was enacted extending the application period for these Guaranteed Credit Lines until June 30, 2021 and extending the maturity and grace periods of these transactions for all debtors who so requested before May 15, 2021. After Royal Decree-law 5/2021, of March 12, the deadline to apply for the Guaranteed Credit Lines was extended until December 31, 2021 and debtors were allowed to request the extension of the maturity and grace periods of these transactions until May 15, 2021. In particular, the maturity of these transactions can be extended by a maximum of three years, provided that the total maturity of the guaranteed transaction does not exceed eight years from the date of its execution, and the grace period for the repayment of the principal amount can be increased by a maximum of twelve additional months, if the total grace period, taking into account the initial grace period, does not exceed twenty-four months.

The Royal Decree-law 6/2022 of November 23 extended the application period for Guaranteed Credit Lines until December 31, 2022.

In this context, the Group applied both the Legal Moratoria and Sectorial Moratoria, as well as granted its customers Guaranteed Credit Lines, in order to reach a larger number of those affected by the COVID-19 pandemic. In addition, on June 8, 2021, the Group also acceded to the Code of Good Practices showing its commitment to implement diverse measures to provide our customers with more flexible terms for their Guaranteed Credit Lines. Among other measures, the Code of Good Practices provides clients who have been granted Guaranteed Credit Lines the possibility to request from the Group, among others, (i) the extension of their maturity (subject to certain eligibility requirements) or grace periods (which we were not obliged to accept), (ii) the conversion of certain Guaranteed Credit Lines into guaranteed profit-linked loans (*préstamos participativos*) and (iii) a partial write-off (*quita parcial*) of their principal amount. As of December 31, 2021, we had only granted the extension of the maturity or grace periods in relation to an amount of €6.8 million in Guaranteed Credit Lines. With respect to the other measures contemplated in the Code of Good Practices, there had been no demand from our customers as of December 31, 2021. Pursuant to the Code of Good Practices customers could apply for the extension of their Guaranteed Credit Lines for an additional period of (a) two years, in case they had previously benefited from an extension under Royal Decree-law 34/2020 or (b) five years, in case they had not previously benefited from an extension under Royal Decree-law 34/2020, provided in both cases that the total maturity of the guaranteed transaction does not exceed ten years from the date of its execution. The deadlines for applying for these measures have been extended to June 1, 2022 with respect to (i) and (ii) and June 1, 2023 with respect to (iii).

NPL coverage requirements

On March 15, 2018, the ECB published its supervisory expectations on prudent levels of provision for NPLs in the form of a subsequent addendum (the "**Addendum**") to the ECB's guidance on NPLs for credit

[81] Following the criteria established by the resolution of the Secretary of State for Economy and Business support dated March 25, 2020 by virtue of which the order of the Council of Ministers dated March 24, 2020 regarding the granting of Guaranteed Credit Lines the maximum percentage of coverage of the guarantee is: (i) in the case of self-employed and SMEs, the guarantee shall cover 80% of the principal of the new financing and renewals of Guaranteed Credit Lines; (ii) for the rest of companies, the guarantee shall cover 70% of the principal of the new financing and 60% of the renewals of Guaranteed Credit Lines. The guarantee shall not cover items other than the principal of the transaction such as interest payments, commissions or other expenses incurred in the transaction.

institutions of March 20, 2017, which clarified the ECB’s supervisory expectations with regard to the identification, measurement, management and write-off of NPLs. The Addendum sets out what the ECB considers to be prudential provisioning of non-performing exposures (“**NPEs**”), in order to avoid an excessive build-up of non-covered aged NPLs on banks’ balance sheets in the future, which would require specific supervisory measures.

In this respect, the ECB assesses any differences between banks’ practices and the prudential provisioning expectations at least annually and links the supervisory expectations in the Addendum to new NPLs classified as such from April 1, 2018 onwards. In addition, banks are asked to inform the ECB of any differences between their practices and the prudential provisioning expectations, as part of the SREP supervisory dialogue, as from early 2021. This could ultimately result in the ECB requiring banks to apply specific adjustments to their net worth calculations when the accounting treatment applied by the bank is not considered prudent from a supervisory perspective which, in turn, could have an impact on the banks' capital position.

In August 2019, the ECB further revised its supervisory expectations for prudential provisioning of new NPEs taking into account the adoption of the new Regulation (EU) 2019/630, which outlines the Pillar 1 treatment for NPEs, complements existing prudential rules and requires a deduction from own funds when NPEs are not sufficiently covered by provisions or other adjustments.

Notwithstanding the foregoing, on March 20, 2020 among the package of measures adopted in response to the COVID-19 pandemic, the ECB announced further measures introducing supervisory flexibility regarding the treatment of NPLs to allow banks to fully benefit from guarantees and moratoriums put in place by public authorities to tackle the COVID-19 distress. As a result, the EBA also issued statements regarding the prudential framework in relation to the classification of loans in default, classification of exposures under the definition of forbearance or as defaulted under distressed restructuring, and their accounting treatment. In particular, the EBA clarified that generalized payment delays due to legislative initiatives and addressed to all borrowers do not lead to any automatic classification in default, forborne or unlikeliness to pay (individual assessments of the likeliness to pay should be prioritized) and clarified the requirements for public and private moratoria, which if fulfilled, are expected to help avoid the classification of exposures under the definition of forbearance or as defaulted under distressed restructuring. However, when the abovementioned flexibility expires or is limited, we could be required to classify certain of our exposures under Guaranteed Credit Lines and the Legal Moratoria and the Sectorial Moratoria under forbearance or as defaulted under distressed restructuring, and in consequence, we may need to provide additional provisions which could negatively impact our results from operations which is not expected as of the date of this Registration Document given the evolution of our exposures in the last few months.

Regulation of the disclosure of fees and interest rates

Interest rates on most kinds of loans and deposits are not subject to a maximum limit. Banks must publish their preferential rates, rates applied on overdrafts, maximum fees and commissions charged in connection with banking transactions. The foregoing regulations are enforced by the Bank of Spain.

Mutual fund regulation

Mutual funds in Spain are regulated by the CNMV. All mutual funds (Spanish or foreign) to be marketed in Spain, and mutual fund management companies (Spanish or acting through branches in Spain or on the basis of the freedom to provide services) are required to be registered with the CNMV. Spanish mutual funds may be subject to investment limits with respect to single sectors or companies and overall portfolio diversification minimums. In addition, periodic reports including a review of the fund’s performance and certain material events affecting the fund are required to be distributed/notified to the fund’s investors and filed with the CNMV.

Solvency II

Our insurance business, which is carried out through our subsidiaries Ibercaja Vida and Ibercaja Mediación, is significant to our overall business. The insurance sector is subject to extensive supervision and regulation by Spanish and European regulators. Since January 1, 2016, we (through Ibercaja Vida) are subject to Solvency II, which is made up of the Solvency II Directive and several regulations supplementing the Solvency II Directive which are directly applicable in the Member States (mainly the Commission Delegated Regulation (EU) of 2015/35 of October 10, 2014 supplementing the Solvency II Directive and the relevant implementing regulations in the Member States.

The Solvency II Directive lays down rules concerning (i) the taking-up and pursuit, within the community, of the self-employed activities of direct insurance and reinsurance, (ii) the supervision of insurance and reinsurance groups and (iii) the reorganization and winding-up of direct insurance undertakings. Likewise, the Solvency II Directive applies to direct life and non-life insurance undertakings which are established in the territory of a Member State or which wish to become established there.

The Solvency II Directive has been implemented in Spain by Law 20/2015, of July 14 on the regulation, supervision and solvency of insurance and reinsurance undertakings (*Ley 20/2015, de 14 de julio, de ordenación, supervision y solvencia de entidades aseguradoras y reaseguradoras*) and by Royal Decree 1060/2015, of November 20, on the regulation, supervision and solvency of insurance and reinsurance undertakings (*Real Decreto 1060/2015, de 20 de noviembre, de ordenación, supervision y solvencia de entidades aseguradoras y reaseguradoras*).

Solvency II replaced previous insurance directives and introduced economic risk-based capital requirements across all Member States promoting comparability, transparency and competitiveness in the insurance sector. Specifically, Solvency II significantly changed all the previously applicable regulations, particularly with respect to valuation of the balance sheet, calculation of technical provisions and measurement of admissible capital resources and required solvency, corporate governance, and the reporting of relevant data on solvency levels and the risk management system to the supervisory authorities and the market.

As of December 31, 2021, the solvency ratio of Ibercaja Vida was 265% (220% and 210% as of December 31, 2020 and 2019, respectively) above the minimum requirement of 100%. Total own funds of Ibercaja Vida amounted to €356 million as of December 31, 2021. In terms of solvency of Ibercaja Banco, Ibercaja Vida represented 1.97% of our RWAs (€18,052 million) as of December 31, 2021.

Insurance distribution

Directive 2016/97, of January 20, on insurance distribution (the "**Insurance Distribution Directive**") regulates brokers and other intermediaries selling insurance products. Our subsidiaries Ibercaja Vida and Ibercaja Mediación are subject to the Insurance Distribution Directive. The scope of the Insurance Distribution Directive includes all sellers of insurance products, focusing especially on market integration, fair competition between distributors of insurance products and policyholder protection. Commission Delegated Regulations 2017/2358 and 2017/2359, of September 21, supplemented the Insurance Distribution Directive with regard to (i) product oversight and governance requirements for insurance undertakings and insurance distributors and (ii) information requirements and conduct of business rules applicable to the distribution of insurance-based investment products, respectively. Finally, Directive 2018/411, of March 14, amended the Insurance Distribution Directive and postponed the date of application of Member States' transposition measures until October 1, 2018. On February 4, 2020, the Spanish government approved Royal Decree-law 3/2020 on urgent measures, implementing various EU directives in Spain relating to public procurement in certain sectors, private insurance, pension funds and plans, tax and tax disputes which transposes, among other, the Insurance Distribution Directive.

Anti-money laundering

On June 25, 2015, Directive 2015/849, of May 20, on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, amending Regulation No 648/2012, of July 4, and repealing (with effect from June 26, 2015) Directive 2005/60/EC, of October 26, and Commission Directive 2006/70/EC, of August 1, entered into force, enhancing the existing EU measures to combat money laundering and the financing of terrorism. Likewise, the Commission may adopt delegated acts in order to identify high-risk third countries, taking into account strategic deficiencies. The power to adopt delegated acts is conferred on the Commission for an indeterminate period of time from June 25, 2015.

Important changes in the EU requirements regarding anti-money laundering and the countering of the financing of terrorism (EU AML/CFT requirements) relate to additional requirements for identification and verification of the ultimate beneficial owner ("**UBO**"), introduction of a central UBO register, extension of the definition of politically exposed persons ("**PEPs**") to domestic PEPs and supervision of correct application of the directive outside the EU. This Directive was transposed into Spanish law by Title II of Royal Decree-law 11/2018, of August 31.

This directive was further amended by Directive (EU) 2018/843 of the European Parliament and of the Council of May 30, 2018 amending Directive (EU) 2015/849 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, and amending Directives 2009/138/EC and 2013/36/EU. This amendment reinforced rules of customer due diligence, UBO identification and PEP screening. It also expanded its scope to new types of entities, such as virtual currency service providers. This amendment was implemented into Spanish law by means of Royal Decree-law 7/2021, of April 27, transposing EU directives on competition, anti-money laundering, credit institutions, telecommunication, tax measures, prevention and repair of environmental damage, posting of workers in the framework of the provision of services, and consumer protection.

Information exchange and reporting

There are various international and EU initiatives on automatic exchange of information such as the OECD Common Reporting Standard and the EU Directive on Administrative Cooperation in the field of Taxation (Council Directive 2011/16/EU, as amended by Council Directive 2014/107/EU). These initiatives call on jurisdictions to obtain information from financial institutions such as us. The information so obtained will be automatically exchanged with other jurisdictions.

In Spain, these initiatives, have been implemented by the General Tax Law 58/2003, of December 17, (Twenty-Second Additional Provision in force since October 12, 2015) and Royal Decree 1021/2015, of November 13, which have a considerable impact on our customer on-boarding and administrative processes. Pursuant to these laws, we are required to report to the Spanish Tax Authorities information relating to customers (which do not fall under applicable exceptions), that are tax residents in any of the jurisdictions that have implemented or will implement in the future such initiatives, including their accounts. Failure to comply with such obligations could trigger penalties.

Spanish Auditing Act

Act 22/2015 on Accounts Audit (the "**Spanish Auditing Act**") was published in the Spanish Official Gazette on July 21, 2015 and entered into force on June 17, 2016. Royal Decree 2/2021, of January 12, implementing Act 22/2015 entered into force on January 31, 2021. Since banks and listed companies are considered "public-interest entities", Ibercaja Banco is also subject to Regulation No 537/2014, of April 16, on specific requirements regarding statutory audit of public-interest entities. These specific requirements or limitations include, but are not limited to, the following: (i) the obligation to publish an annual transparency report by the auditors of public-interest entities, which should include, among others, information relating to public interest entities that have been audited; (ii) a list of prohibited non-audit services that cannot be provided to those entities its parent and its subsidiaries; (iii) certain rules by which fees perceived by auditors other than those permitted for audit services in relation to a particular public interest entity can be limited; and, (iv) the obligation of external rotation or maximum contract period.

RISK MANAGEMENT

As a financial institution, we are exposed to several kinds of risks stemming from our business, which arise from our day-to-day operations. The accurate and efficient management and monitoring of risk are key to maximizing shareholder value, ensuring a suitable level of resilience and financial strength.

We believe we have a prudent attitude towards risk management. As a retail bank, our risk policy aims to maintain a moderate risk profile through prudent management, diversification by areas, types of assets, portfolios and customers while seeking sustainable and profitable growth.

We have a robust organizational structure that ensures effective risk management and control. Our governance bodies are articulated as follows:

- Our Board of Directors is responsible for establishing and supervising the risk information and control systems, approving the risk appetite framework ("**RAF**") as well as the policies, manuals and procedures for risk management.
- Our Large Risks and Solvency Committee is responsible for proposing the limits by type of risk and business, reporting the RAF consistently with other policies and strategic frameworks, assessing our risk management, reviewing the risk management framework and internal risk control systems, periodically reviewing RAF compliance and proposing measures to mitigate the impact of any identified risks.
- Our Strategy Committee has, as its core mission, to report to the Board of Directors on our strategic policy, ensuring that there is an accurate organization for its implementation. Additionally, our Strategy Committee briefs the Board of Directors on the economic outlook in order to define stress scenarios.
- Our Audit and Compliance Committee is responsible for, among others, independently monitoring the design and effectiveness of internal control, internal audit and risk management systems and regularly reviewing them so that the main risks are identified, managed and adequately disclosed. The audit management responsibilities include awareness of the annual operational plan for the internal audit function that is submitted to the Audit and Compliance Committee, being regularly briefed on the results of internal audit reports and driving implementation of proposed recommendations for improvement to mitigate observed weaknesses

In addition, we have set up the Global Risk Control Committee, an executive committee which is responsible for defining and monitoring our risk strategies and policies, establishing objectives and strategies for changes in the structure and composition of the equity in the balance sheet, analyzing the sensitivity of our results and our equity value in different scenarios, assessing compliance with the established tolerance levels and carrying out our medium-term capital planning.

Our organizational structure provides a risk defense scheme structured in three main lines ((a) management, control, (b) risk management and (c) compliance function and internal audit function), aligned with market trends and proportional to the complexity of our business. Under this scheme, (i) we ensure the homogeneity of our policies and risk control across the Group; (ii) our Risk Control Division is independent of the business lines it controls; and (iii) there is a clear separation between the internal control functions (risk management function, compliance function and the internal audit function), in accordance with the EBA Guidelines on internal governance under Directive 2013/36/EU of the European Parliament and of the Council of June 26, 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms.

Our Deputy Head-Chief of Control Officer is in charge of the second line of defense and oversees the global risk control and regulatory compliance policy. The Global Risk Control Committee supervises our (i) financial risks (including credit, market, structural interest rate, liquidity, leverage and unencumbered assets risks) and (ii) non-financial risks (including operational and legal risks). The compliance function supervises compliance with regulations to mitigate fines and sanctions risks as well as reputational risk (i) ensuring the correct application of the procedures established in transparency and customer protection regulations; (ii) overseeing compliance with market abuse regulations and anti-money laundering regulations; and (iii) coordinating the implementation of and monitoring criminal risk prevention model.

The Deputy Head-Chief of Control Officer is independent from the first line of defense. The Deputy Head-Chief of Control Officer (i) is appointed and ceased by our Board of Directors, (ii) attends as permanent guest to the meetings of the Large Risks and Solvency Committee and (iii) reports directly to the Global Risk Control Committee in relation to its risk management responsibilities and to the Audit and Compliance Committee in relation to its role as supervisor of the compliance responsibilities, all of which allows us to ensure its independence.

Our risk management policy is based on our RAF. Our RAF has the objective of establishing a group of principles, procedures, controls and systems that define, report and monitor our risk appetite. This is understood to be the level of risk profile that we are willing to assume and maintain in terms of type and amount, as well as its tolerance level. It must be oriented towards attaining the objectives of the strategic plan in accordance with the lines of action established therein.

The management of the various risks has the objective of attaining a risk profile that falls within our desired appetite level, which has been defined on the basis of established limits.

Following the entry into force of the SSM in November 2014, European financial institutions are required to adapt their respective management and control risk policies and procedures. The SREP is how the SSM performs ongoing evaluations of financial institutions.

The internal processes for evaluating the adequacy of capital and liquidity under Pillar II, known as the internal capital adequacy assessment process ("**ICAAP)** and the internal liquidity adequacy assessment process ("**ILAAP**"), in addition to the stress exercises organized by the EBA and the ECB, are key factors in the SREP.

Furthermore, we have a recovery plan (the "**Recovery Plan**"), drawn up in line with BRRD and the guidelines and recommendations of the EBA, that establishes the foundations for the restoration of our financial strength and viability in the event of severe stress.

These management frameworks (RAF, ICAAP, ILAAP and the Recovery Plan) are consistent with one another, form part of the risk management processes we have in place and are revised and approved by our Board of Directors on an annual basis.

Risk Appetite Framework

The RAF describes the risk appetite statement (*declaración de apetito al riesgo*), the risk limits and the roles and responsibilities of the different governing and management bodies that oversee and monitor its implementation. This statement is approved by the Board of Directors and ensures the adequacy of the risk management systems to our risk profile and our strategy.

The RAF describes the general risk level and profile associated with our strategy. Our RAF is guided by the following strategic principles:

- maintenance of a medium-low risk profile;
- compliance with regulatory requirements at all times, as well as with internal capital and liquidity objectives set out in the ICAAP and ILAAP;
- maintenance of adequate levels of risk-adjusted return to ensure compliance with profit generation objectives;
- good risk governance with the effective involvement of the senior management and the Board of Directors; and
- avoid the materialization of operational, compliance, legal or reputational risks through active and constant risk management.

In addition, it establishes tolerance thresholds that take into account our current risk profile. The RAF includes, for each type of risk, representative metrics and key figures, as well as the way in which our risk profile interacts with the tolerance limits established by the relevant governing or management body.

The key elements of the RAF are the following:

- risk limits: the maximum risk levels that we consider acceptable and therefore, do not want to surpass, in line with our strategy and business model. The RAF currently sets some of the following limits: (i) a maximum NPL ratio of 7%, (ii) a maximum NPA ratio of 8%, (iii) a minimum NPA coverage ratio of 50%, (iv) a maximum ratio of loans classified as Stage 2 of 10%, and (v) a maximum ratio of refinanced loans of 15%.
- risk appetite statement: levels and types of risk that we are willing to take to achieve our strategic and business goals; and
- the duties and responsibilities of the various governing and management bodies that supervise its implementation and monitoring.

The RAF monitors certain indicators to measure risk related to the following material risks:

- business risk (including profitability, revenues and efficiency);
- credit risk (including NPLs, NPAs, cost of risk and concentration);
- operational risk (including reputational and legal risks, operational losses and digital infrastructure);
- interest rate risk (including the impact on economic value and financial margin);
- market risk (including the sensitivity to losses in the available for sale and the trading portfolios);
- liquidity risk (including financing structure, short-term and long-term liquidity);
- solvency risk (including CET1, Tier 1, total capital and leverage ratios);
- concentration risk;
- equity adequacy risk; and
- litigation risk.

While the RAF is reviewed at least annually, control and evaluations are carried out on an ongoing basis and the control and assessment of its indicators is monitored on at least a quarterly basis. In particular, the Deputy Head-Chief of Control Officer carries out evaluations on a monthly basis.

Recovery Plan

We prepare the Recovery Plan in compliance with Act 11/2015. The main objective of the Recovery Plan is to identify the main measures we can use in a crisis or whenever it is deemed appropriate, as well as the design of an adequate governance framework, which would allow us to take fast and effective action in a situation of crisis. Another main goal of the Recovery Plan is the identification of the economic indicators that provide us with early warnings of a possible future deterioration of the economic environment. As part of this process, the Recovery Plan also identifies our core business lines, legal entities and critical economic functions, which are essential to preserve our future viability, while limiting any adverse impact on society and the economy as a whole. The Recovery Plan is updated at least annually or following the occurrence of a material event.

The principles followed by the Recovery Plan intend to offer a faithful image of our business model and to achieve a high degree of alignment and coherence between the Recovery Plan and other supervisory-aimed documents, such as the ICAAP, the ILAAP, our business plan and the RAF. The involvement of a wide range of departments within the Group in the design of the Recovery Plan has resulted in increased awareness towards the strategic implications associated with the recovery and resolution framework. This internal reflection exercise has implied, among other things, a strict quantification analysis both under normal and diverse stress scenarios designed to test the adequacy of the identified recovery options.

Internal Capital Adequacy Assessment Process

The ICAAP comprises a comprehensive review of the processes of internal assessment of capital adequacy and is required under the SREP conducted by the SSM. The main goal of the ICAAP is to develop strategies and processes that allow us to identify and quantify the capital necessary to cover the risks to which we are exposed.

For the purposes of preparing the ICAAP, we have focused on our business strategy, risk appetite and capital planning (consistent with our internal assessment of capital needs), through the identification and quantification of all risks to which we are exposed. In accordance with regulatory requirements, we have prepared a policy on material risks, which has been approved by the Board of Directors and is integrated into our business. Firstly, we have identified and defined the risks to which we are exposed, through expert criteria, best practices and the regulatory framework. Subsequently, a list has been prepared with the types and sub-types of risks identified. Such risks have one or various drivers embedded, which are highly correlated with such risk and are used to explain their respective behavior. For each of these risks, we set a materiality threshold, the breach of which would activate the classification of the risk as material. After verifying the probability of occurrence of the risks and their potential impact, if either the likelihood or the magnitude is high or very high, the risk is considered as material, whereas if the likelihood of occurrence or quantification is low or zero, the risk is not considered as material.

The ICAAP is a continuous process which includes a series of tasks which allows for its integration in our continuous risk management.

Internal Liquidity Adequacy Assessment Process

Additionally, under the ILAAP we are required to identify and measure the liquidity risks that we are or may be exposed to. This regulatory requirement implies the application of mitigation techniques that may help to reduce liquidity requirements. The assessment includes stress testing techniques and defines the functions of the Board of Directors and senior management. As a bank, we must also consider in these assessments any other internal risks that we may face that may result in liquidity difficulties. This process also requires advanced planning to identify the adequate level of liquidity potentially needed. Under the ILAAP, we are also required to set up an assessment to evaluate our liquidity management function which focuses primarily on liquidity buffers, RAF metrics and monitoring tools.

Types of risks

As stated in Note 3.2 to our Annual Accounts, the material risks identified by us in the course of our business are as follows:

- Credit risk. Includes the following sub-categories:
  - concentration risk;
  - real estate risk; and
  - sovereign risk.
- Operational risk. Includes the following sub-categories:
  - reputational risk;
  - legal risk; and
  - technological risk.
- Market risk.
- Interest rate risk.

- Liquidity and financing risk.
- Business and profitability risk.
- Insurance business risk.

For a description of the main policies and strategies for the risk management of our most significant risks, including a description of the main risks to which we are subject, the extent of such risks and the tools we use to measure, monitor and manage such risks, see Note 3 to our Annual Accounts.

We include below certain information related to our interest rate and credit risks.

Interest rate risk

Changes in market interest rates affect the spread between interest rates charged on interest-earning assets and interest rates paid on interest-bearing liabilities and subsequently affect our results. For instance, a 200 basis points increase in the interest rate would have increased our net interest income for the year ended December 31, 2021 by €79.0 million, whereas a 200 basis points decrease would have decreased our net interest income for the year ended December 31, 2021 by €70.6 million, assuming the maintenance of the size and structure of our balance sheet and assuming that the movements in interest rates occur instantly and equally on all points of the yield curve, with a -1% interest rate floor. Meanwhile, a 200 basis points increase in interest rates would have decreased the economic value of our assets for the year ended December 31, 2021 by €245.7 million and a 200 basis points decrease in interest rates would have increased the economic value of our assets for the year ended December 31, 2021 by €83 million, assuming the maintenance of the size and structure of our balance sheet and assuming that the movements in interest rates occur instantly and equally on all points of the yield curve, with a -1% interest rate floor.

In addition to the abovementioned sensitivity analysis, we monitor the following alternative sensitivities: (i) a progressive increase of 12.5 basis points quarterly to a total of 50 basis points and a (ii) progressive downgrade of 12.5 basis points quarterly up to a total of 50 basis points. As of December 31, 2021, an increase of 50 basis points, would have had an impact on our net interest margin^{APM} of 11% in the year 2. As of December 31, 2021, a decrease of 50 basis points, would have had an impact on our net interest margin^{APM} of -13% in the year 2. Impacts are tracked once the entire balance sheet is fully repriced.

Credit risk

Total credit exposure and new lending

We have a diversified low-risk credit portfolio, mainly composed of residential mortgage loans and with a growing focus on SMEs.

The following table sets forth our credit exposure as of December 31, 2021:

	Gross loans and advances to customers^{APM}	**NPLs by sector^{APM}**	**NPL provisions by sector^{APM}**	**Net NPLs by sector^{APM}**	**NPL ratio by sector^{APM}**	**NPL coverage ratio by sector^{APM}**	**Refinanced and restructured loans**
	(€ thousands, except %)						
Loans to businesses	**8,360,507**	**344,814**	**323,976**	**20,838**	**4.12%**	**93.96%**	**217,453**
Real estate construction and development	1,044,664	71,262	51,115	20,147	6.82%	71.73%	57,103
Non-real estate activities	7,315,843	273,552	272,861	691	3.74%	99.75%	160,350
Loans to individuals	**20,191,233**	**372,475**	**216,149**	**156,326**	**1.84%**	**58.03%**	**321,089**

Gross loans and advances to customers excluding reverse repurchase agreements^APM..............	**29,580,057**						

As of December 31, 2021, 68.3% of our gross loans and advances to customers^APM is secured by mortgage collateral, 5.9% is secured by other type of collateral and 25.8% is unsecured[82].

Residential mortgage loans portfolio[83]

Our total credit exposure to residential loans amounted to €18,385 million[84] as of December 31, 2021, of which 98.7%[85] was secured by mortgage collateral. Residential mortgage loans represented 61.3% of our credit exposure gross loans and advances to customers excluding reverse repurchase agreements^APM as of December 31, 2021. As of December 31, 2021, NPLs associated with residential mortgages represented 39.8% of our NPLs[86], compared to the average sector of 29.7% (*source: Bank of Spain as of December 31, 2021, latest available data*) and our RWAs related to residential mortgage loans was 39%, well above our peers' average (17.9%) (*source: EBA Transparency Exercise for the Company's and peers' information*)[87]. Our residential mortgage portfolio is granular, with an individual average outstanding size of €69,000, an average seasoning 9.7 years and focused on first-home financing (second-home financing only represented 3.5% of our residential mortgage portfolio as of December 31, 2021)[88]. The historical rate of amortization of the portfolio, including contractual maturities and early repayments and cancellations, has been around 9%. As a result of the increase in the liquidity of our clients in 2021, this rate has increased to around 10%. As of December 31, 2021, the LTV ratio of our residential mortgage portfolio was 49.1%[89].

---

82 See Note 3.5.5.1 to our 2021 Annual Accounts.

83 The information about our residential mortgage loans portfolio in this section is mostly obtained from the Company's internal accounting records and we use it for analytical purposes in order to monitor the risk profile of our residential mortgage loans portfolio, which is one of our key portfolios.

84 See definition, explanation, use, calculation and breakdown of Gross loans and advances to customers^APM which are set out in "Alternative Performance Measures".

85 Calculated as total property collateral for homes (€17,993,549 thousand) over total loans for homes (€18,236,178 thousand). See Note 3.5.5.1 to our 2021 Annual Accounts.

86 See definition, explanation, use, calculation and breakdown of Housing NPLs over NPLs^APM which are set out in "Alternative Performance Measures".

87 RWAs related to residential mortgage loans of our peers is calculated using the latest available EBA Transparency exercise information on loans and risk weighting for Ibercaja and peers (June 2021). Average is calculated as the simple arithmetic mean of our peers' RWAs related to residential mortgage loans.

88 This information has been obtained by classifying our residential mortgage by average outstanding size, average seasoning and first or second-home financing.

89 The LTV ratio is calculated by dividing the book value of the residential mortgage loan portfolio by the amount resulting from the latest available appraisal or valuation of its collateral.

Loans to companies portfolio (excluding real estate companies)[97]

Our total credit exposure to companies (excluding real estate companies) amounted to €7,316 million as of December 31, 2021[98]. Our loans to companies portfolio is granular, with no significant concentrations and a balanced mix between short-term and long-term products. Our main exposure by size are small-sized companies and by geographic area, our Home Markets (primarily Aragón) and Growth Markets. The significant increase in lending through Guaranteed Credit Lines negatively affected working capital financial needs of companies in 2020 which is already recovering thanks to the growth in companies sales.

The following table sets forth the geographic distribution of our loans to companies portfolio as of December 31, 2021[99]:

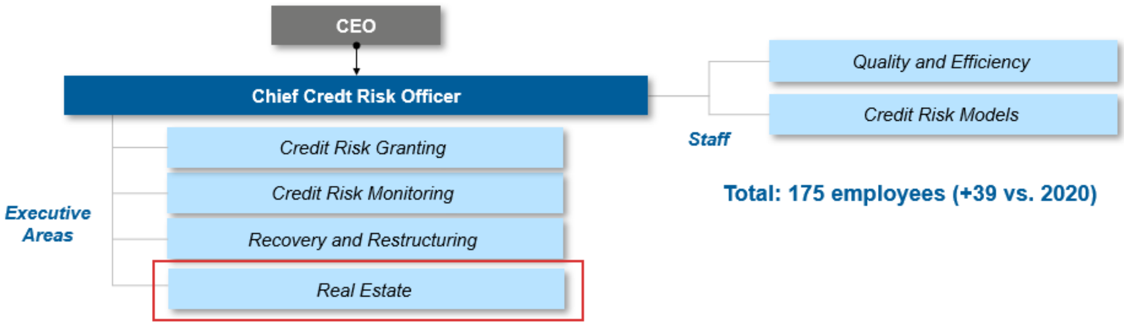
Credit risk management

We maintain a simple credit risk department structure:



In the last few years, we have implemented a new recovery model that includes changes in governance, organizational structure, procedures, tools and bonuses for retail network employees linked to their performance. This recovery model has allowed us to reduce our NPLs and foreclosed assets between December 31, 2019 and December 31, 2021. The increased specialization and systematization of our recovery procedures, as well as the implementation of best-in-class IT tools throughout our branch network to optimize recovery solutions have increased our efficiency in reducing the volume of NPAs[APM]. In addition, we are strongly committed to become an Internal Ratings Base (IRB) bank during our "Desafío 2023" Strategic Plan, with the aim of further optimizing our credit risk management.

We have developed a prudent underwriting criteria based on a centralized expert analysis and supported by scoring and rating models.

BOARD OF DIRECTORS AND MANAGEMENT

Board of Directors

The composition, responsibilities and functioning of our board of directors (the "**Board of Directors**") is regulated by the Spanish Companies Act, Act 10/2014, Royal Decree 84/2015, our bylaws and the regulations that govern our Board of Directors (the "**Board Regulations**"). Our current bylaws were registered on November 11, 2021 with the Commercial Registry of Zaragoza under volume 4477, sheet 187, page Z-52186, inscription 1982. Our current Board Regulations were approved on October 24, 2019. On January 14, 2022 we approved a new version of our Board Regulations which is pending registration with the Commercial Registry as of the date of this Registration Document and would enter into effect upon a potential admission to trading of the Company's ordinary shares on the Barcelona, Bilbao, Madrid and Valencia stock exchanges (the "**Spanish Stock Exchanges**") for trading through the Automated Quotation System or "*Mercado Continuo*" (the "**Admission**").

The Spanish Companies Act provides that the board of directors is responsible for the management, administration and representation of a company in respect of its business matters, subject to the provisions of the bylaws and except for those matters expressly reserved to the general shareholders' meetings.

Pursuant to Article 249 bis of the Spanish Companies Act, our bylaws and our Board Regulations, the following matters must be approved by the Board of Directors and, subject to certain exceptions, may not be delegated to any Board of Directors committee or to any of our attorneys or representatives:

- The supervision of the operation of committees and the actions of delegated bodies and any appointed executives, and, when applicable, request an external evaluation of the Board of Directors and its committees.
- The definition of our general policies and strategies.
- The authorization or waiver of the obligations resulting from the duty of loyalty in accordance with Article 230 of the Spanish Companies Act.
- The organization and operation of the Board of Directors itself.
- The drafting of the annual accounts and the management report, both at individual and consolidated level, and their submission to the general shareholders' meeting.
- The drafting of any type of report required by law from the managing body provided that the transaction to which the report relates cannot be delegated.
- The appointment and removal of the chief executive officers of the Company, as well as the stipulation of the contractual terms of their appointment.
- The appointment and removal of officers directly reporting to the Board of Directors or to any of its members, as well as the stipulation of the basic terms of their contracts, including the compensation.
- The decisions concerning the directors' compensation, within the statutory framework, and as the case may be, the remuneration policy approved by the general shareholders' meeting.
- The control, evaluation and supervision of our senior management, establishing the applicable criteria and limits in accordance with the development of our business.
- The approval and review of the directors' and other relevant employees' evaluation policy, as well as its amendments, following a report from the Appointments Committee.
- The calling of general shareholders' meetings, preparation of the agenda and proposed resolutions and publication of the relevant announcements.
- The policy concerning treasury shares.
- Any powers delegated by the general shareholders' meeting to the Board of Directors, save where expressly authorized by shareholders to delegate those powers further.

- The approval of the RAF, the Risk Appetite Statement (RAS) and any other manual or policy required by applicable regulations, following the relevant report from the Large Risks and Solvency Committee.
- The approval of policies, manuals and procedures related to risk management, following the report from the applicable committees.
- The active participation in the risk management, ensuring that enough resources are allocated for these purposes.
- The approval of the opening and close of offices, branches or agencies.
- The approval and review of the outsourcing policy.
- The approval, subject to a report from the Audit and Compliance Committee, of the related party transactions (*operaciones vinculadas*).
- The approval of the Recovery Plan, following the report from the Strategy Committee.
- The approval of the adequacy plan, following a report from the Large Risks and Solvency Committee.
- The approval of the annual banking report, as foreseen in the existing bank regulations.
- The approval of the main stress scenarios which provide the basis for the capital planning.
- The supervision of the integration in the management of all the aspects of the capital planning in accordance with the scenarios used in the Strategic Plan and the RAF.
- The approval of the documental procedures of the internal stress tests.

In addition, upon a potential Admission, pursuant to Article 529 ter of the Spanish Companies Act, our bylaws and our Board Regulations, the following matters must be approved by the Board of Directors and, subject to certain exceptions, may not be delegated to any Board of Directors committee or to any of our attorneys or representatives:

- The approval of the strategic and business plan, the management goals and annual budgets, the investment and financing policies and the dividend policy.
- The determination of the risk control and management policies, including tax risks, and oversight of the internal information and control systems.
- The approval and review of the framework of the corporate governance, which will include the Board Regulations and other rules and processes regarding the organization and functioning of the Board of Directors.
- The approval of financial information which, due to being listed, the Company must periodically publish.
- The definition of the structure of the Group following the relevant report by the Strategy Committee.
- The approval of investments or transactions of all kinds which due to their high value or specific characteristics are of particular tax risk or strategic nature, save where these are approved by shareholders.
- The approval of the creation or acquisition of interests in special purpose vehicles or entities domiciled in non-cooperative jurisdictions and any other similar transactions or operations which due to their complexity could make the Company and its Group less transparent.
- The approval of the revisions of the code of ethics.
- The approval of the Pillar III disclosures, following a report from the Audit and Compliance Committee, in relation to the information not covered by the audited annual accounts.

- The approval of the inside and other relevant information disclosure policy.
- The definition of our tax strategy.
- The approval of the Recovery Plan, following the report from the Large Risks and Solvency Committee.
- The approval of the capital autoevaluation report and the liquidity autoevaluation report, following a report from the Large Risks and Solvency Committee.

Composition and governance of the Board of Directors

Our bylaws provide for a Board of Directors consisting of between five and 15 members. As of the date of this Registration Document, the Board of Directors is composed of 11 members, of which four are proprietary directors, six are independent directors and one is an executive director.

Pursuant to the Spanish Companies Act, a director is categorized as "independent" if he or she has been appointed based on his or her personal and professional conditions and is able to perform his or her duties without being impaired by his or her relationships with us, our significant shareholders or our executive committee. The Spanish Companies Act sets out a series of objective criteria which may prevent a director from being categorized as "independent". To the extent applicable, at the time that our independent directors were appointed as independent directors, at least three years (for employees) or five years (for executive directors) had elapsed since the end of their relationship with Ibercaja Banco or Group companies in order for them to qualify as "independent" directors as set out under article 529 duodecies of the Spanish Companies Act. The other requirements set out under such article were also met at the time that our independent directors were appointed.

According to the Spanish Companies Act, our bylaws and our Board Regulations, our directors are elected by the general shareholders' meeting to serve for a term of four years and may be re-elected to serve for an unlimited number of terms of the same duration (save that no independent director can serve for more than 12 years in a row and still be considered independent). If a director does not serve a full term, the Board of Directors may fill the vacancy by appointing a replacement director to serve until the next general shareholders' meeting subject to subsequent approval at a general shareholders' meeting (*nombramiento por cooptación*). Any natural person may serve on the Board of Directors, except for persons specifically prohibited from doing so by applicable law. A director may be removed from office by the shareholders at a general shareholders' meeting, even if such removal is not included on the agenda for that general shareholders' meeting.

According to our Board Regulations, our directors must tender their resignation to the Board of Directors, which may accept such resignation, in its discretion, under the following circumstances: (i) when such director's participation on the Board of Directors is contrary to applicable law or our bylaws for reasons of ineligibility or incompatibility; (ii) where the director breaches his or her duties resulting in a serious infringement of Spanish law or our bylaws or causes a serious damage to the Company; and, upon a potential Admission (i) when such director's participation on the Board of Directors jeopardizes or prejudices the interest, credit or reputation of the Company; or (ii) when the reasons for which he or she was appointed no longer apply, this occurring (a) in the case of a proprietary director, when the shareholder it represents sells its shareholding in whole or reduces it to a level that requires a reduction in the number of its nominated directors, or (b) in the case of an independent director, when any of the legally defined situations occurs in which it loses its independent status.

The chairperson of the Board of Directors is elected among the members of the Board of Directors. One or more vice-chairperson, who act as chairperson in the event of the chairperson's absence, impossibility or vacancy, may be elected among the members of the Board of Directors. Pursuant to our bylaws, the chairperson of the Board of Directors cannot be an executive director and therefore, cannot hold simultaneously the position of chief executive officer. The secretary and, where applicable, the vice-secretary of the Board of Directors, do not need to be directors. According to Spanish law and the Board Regulations, the Board of Directors appoints our executive officers and supervises our operations. Moreover, the Board of Directors is entrusted with calling general shareholders' meetings and implementing shareholders' resolutions.

The chairperson of the Board of Directors may call a meeting of the Board of Directors whenever he or she considers it necessary or appropriate. The chairperson of the Board of Directors is also required to call a meeting of the Board of Directors at the request of one-third of the members of the Board of Directors. If the chairperson does not call such meeting within one month from such request, those directors would be entitled to call the meeting directly. According to our Board Regulations, our Board of Directors shall meet at least once a month.

Our bylaws and Board Regulations provide that the majority (half plus one) of the members of the Board of Directors (attending in person or represented by proxy by another director) constitutes a quorum. Except as otherwise provided by law, in the bylaws and in the Board Regulations, resolutions of the Board of Directors are approved by an absolute majority of the directors attending or represented at a Board of Directors meeting.

All the members of our Board of Directors must comply with the reputation and experience requirements set forth in Article 24 of Act 10/2014 and Articles 29, 30 and 31 of Royal Decree 84/2015, including the regime of incompatibilities and limitations provided for in Article 26 of Act 10/2014 and the integrity and professional requirements set out in Articles 30 and 31 of Royal Decree 84/2015. In this sense the procedure for the assessment of suitability and diversity of directors and suitability of persons with key roles (*procedimiento de evaluación de idoneidad y diversidad de consejeros y de la idoneidad de personas con funciones claves en la Entidad*) approved in June 2018, develops the obligations under current regulations on the assessment of the adequacy of directors and holders of key functions. This procedure fulfills the above-mentioned obligation by establishing the scope and content of the process of internal evaluation of suitability of the members of our Board of Directors, general managers or similar and other employees who are responsible for internal control functions or discharge key positions for the daily activities of the entity. Similar positions to the general managers would be (i) those persons who develop senior management roles under the direct dependence of the management body, executive committees or chief executive officer; (ii) those persons who meet the previous dependency requirements set out in the previous point, and limit their senior management roles to a specific area of activity, provided that they are integrated into an organizational structure of management that assumes the highest level of daily management of the Company; and (iii) those persons who had entered into a senior management contract subject to Royal Decree 1382/1985, of August 1. It also develops the additional documents (questionnaires, statements and reports models) necessary to verify the gathering of the information required by current regulations. The Appointments Committee is responsible for the assessment of the candidates and members of our Board of Directors, general managers or similar and other key employees as well as the supervision of the correct implementation of the procedure referred to above. The Appointments Committee is also responsible for submitting to the general shareholders meeting the proposals for the appointment, reelection or dismissal of independent directors. The members of our Board of Directors are subject to a fit and proper assessment process by the ECB, in accordance with the guide to fit and proper assessment issued by the ECB in December 2021. All of our directors have passed the ECB's fit and proper assessment, which also examines the "category" status of the director (including independent), so all of our directors and their category have the ECB's positive assessment decision.

Directors

The following table sets out the names of the members of our Board of Directors, their positions within the Board of Directors, their category as directors and, where relevant, the shareholder they represent, as of the date of this Registration Document.

Name	Date of first appointment	Date of re-election	Expiry date of appointment	Age	Title	Category[1]

Mr. Luis Enrique Arrufat Guerra	August 30, 2017	August 30, 2017[(4)]	August 30, 2022	66	Director	Proprietary[(2)]
Ms. María Pilar Segura Bas	August 30, 2017	August 30, 2017[(4)]	August 30, 2022	65	Director	Independent

Notes:—

(1) In the context of the suitability review of each director, the Appointments Committee has assessed and confirmed the relevant category of all the members of our Board of Directors.

(2) Representing the Ibercaja Foundation.

(3) Representing Fundación Inmaculada de Aragón. Pursuant to the agreement entered into between Fundación Inmaculada de Aragón and Fundación Caja Badajoz on August 29, 2019, both shareholders agreed to jointly propose one member of the Board of Directors of Ibercaja Banco, which would be proposed by Fundación Caja Badajoz for the first two years following the agreement and by Fundación Inmaculada de Aragón for the subsequent period of four years.

(4) The re-election appointment was prior to the amendment of our bylaws pursuant to which the term of our directors' appointment was reduced from five years to four years.

The secretary of our Board of Directors (non-director) is Mr. Jesús Barreiro Sanz.

All members of the Board of Directors designate our registered address as their professional address for the purposes of this Registration Document.

The biographies for each of the members of our Board of Directors and the secretary of our Board of Directors (non-director), including a brief description of their business experience and education, are set out below:

Mr. Francisco Serrano Gill de Albornoz

Mr. Francisco Serrano Gill de Albornoz was appointed chairman of the Board of Directors on March 30, 2022, replacing Mr. José Luis Aguirre Loaso. Mr. Francisco Serrano Gill de Albornoz joined the Company in January 2000 as Head of the Legal Department. In May 2007, he was appointed Deputy Manager and General Counsel in January 2012. In June 2013, he was appointed Managing Director of Banco Caja3. In October 2014 he rejoined the Company as Deputy General Manager and General Secretary – Director of Control.

He is a member of the Employee Pension Plan Oversight Committee. Since November 2015 he was chairman of Ibercaja Gestión until his appointment as chairman of the Board of Directors.

He was a director on the Aragón Government's Legal Advisory Committee between May 2002 and March 2010 and secretary of the board of EBN Banco de Negocios, S.A.

Mr. Francisco Serrano Gill de Albornoz holds a bachelor's degree in Law from the University of Zaragoza (1989) and is a Spanish State Attorney on leave of absence (he joined the government's legal services in 1993 and served in Guipúzcoa, Teruel and Zaragoza). On December 31, 1999 he received leave of absence from the government legal services (*Abogacía del Estado*).

Mr. Jesús Máximo Bueno Arrese

Mr. Jesús Máximo Bueno Arrese first joined Ibercaja Banco on October 1, 1976 and was appointed first vice chairman on February 24, 2017. Previously, he served as member of the governing body of the Ibercaja Foundation, chairman of the board of Ibercaja Vida and board member of Ibercaja Mediación. He also served on the board of directors of Banco Caja3 until its absorption by the Company.

Mr. Jesús Máximo Bueno Arrese holds a diploma on Business Administration from IESE Business School (*Universidad de Navarra*), and a master's degree in applied social sciences. In addition, he is a Chartered Accountant registered at the ROAC (Official Registry of Accounting Auditors) and a lecturer at Escuela Superior de Comercio de Zaragoza.

Mr. Víctor Manuel Iglesias Ruiz

Mr. Víctor Manuel Iglesias Ruiz was appointed member of the Board of Directors and Chief Executive Officer of the Company on January 28, 2015. Since 1988, he has worked in various strategic divisions of the Company previously serving as General Deputy Director, Director of Capital Markets and Loans and Investment, Director of the Branches Network and member of the Steering Committee. In 2010 he was appointed Business Area Director until his appointment as Chief Executive Officer. He has also been a member of the board of Henneo Media (formerly Grupo Heraldo), a member of the business strategy committee of CASER and chairman of the board of Ibercaja Mediación.

Mr. Víctor Manuel Iglesias Ruiz holds a bachelor's degree in Business Administration from the University of Zaragoza.

Ms. Gabriela González-Bueno Lillo

Ms. Gabriela González-Bueno Lillo was appointed independent director of the Company on July 24, 2013. She has expertise in several sectors such as insurance, finance and auditing and is an actuary, an inspector in the insurance and savings inspectorate body, and she is a government financial inspector on leave of absence. In addition, she is registered on the I.A.E. Auditor Register as an audit actuary. Prior to her appointment, she was a board member of the Comisión Liquidadora de Entidades Aseguradoras (CLEA) by appointment by the Spanish Economic and Finance Ministry and General Manager and board member of CASER. She also was a board member, chair of the audit and compliance committee and of the appointments and compensation committee of Banco Caja3, until its absorption by the Company.

Ms. Gabriela González-Bueno Lillo holds a bachelor's degree in Business Administration from the Universidad Complutense de Madrid.

Mr. Jesús Solchaga Loitegui

Mr. Jesús Solchaga Loitegui was appointed independent director of the Company on July 24, 2013. He served as a Spanish State Attorney between 1967 and 2010 (currently on leave of absence) and has been a registered member of the Madrid Civil and Commercial Court of Arbitration Association (CIMA) since its creation. He has held several positions in both the public and the private sector, such as General Director, board member, and chairman of the Control Committee of the Ibercaja Savings Bank, member of the territorial board of Aragón, member of the Aragón government advisory committee and member of the Aragón competition tribunal. Additionally, within the Group, he has been member of the board of Residencial Murillo, Cerro Murillo and Ibercaja Mediación.

Mr. Jesús Solchaga Loitegui holds a bachelor's degree in Law from the University of Zaragoza.

Mr. José Miguel Echarri Porta

Mr. José Miguel Echarri Porta was appointed proprietary director of the Company on October 28, 2021, representing Fundación Inmaculada de Aragón. Mr. José Miguel Echarri Porta is vice chairman of Fundación Inmaculada de Aragón. He has developed his career in the private sector for 20 years, particularly in the education, industrial, banking and construction sectors. He is specialized in forecasting, an activity que has been practising since 1993. He is one of the founders of the Spanish Strategic Forecast Institute (*Instituto de*

Prospectiva Estratégica), a company specialized in forecast and strategies for social, economic, political and technological matters, in which he has held the position of director until his retirement. He has participated as a speaker at forecast conferences and is the author of several publications, including "*España 2020: Reflexiones prospectivas*".

Mr. José Miguel Echarri Porta holds a bachelor's degree in Business Studies and Law from the University of Deusto.

Mr. Vicente Evelio Cóndor López

Mr. Vicente Cóndor López was appointed independent director of the Company on January 27, 2014. He was a board member and chairman of the Supervisory Committee of the Ibercaja Savings Bank and a board member of SODIAR and Avalia and the Aragon Public Companies Association (*Corporación de Empresas Públicas de Aragón*).

Mr. Vicente Cóndor López holds a bachelor's degree and a PhD in Business Administration from the University of Valencia and is a chartered accountant registered at the ROAC and a professor of Financial Economics and Accounting at the University of Zaragoza.

Mr. Félix Santiago Longás Lafuente

Mr. Félix Santiago Longás Lafuente was appointed independent director of the Company on August 30, 2016. He has held senior management positions in companies with a turnover of €175 million and over a thousand employees (such as Agora Group/La Zaragozana Group). He was deputy chairman of the Aragón regional business confederation (CREA) and chairman of its economy committee, chairman of the Aragón Association for Business Advancement (APD) and member of the Economic and Social Council of Aragón.

Mr. Félix Santiago Longás Lafuente holds a bachelor's degree in Psychology from the Universidad Nacional de Educación a Distancia (UNED).

Mr. Jesús Tejel Giménez

Mr. Jesús Tejel Giménez was appointed independent director of the Company on August 30, 2016. He was a member of the Association of Economists in Aragón, member of the governing body of the ETNOR – Business Ethics Foundation – and of the Fundación de Estudios Bursátiles y Financiero (FEBF). He was previously a partner at Deloitte, S.L., where he was in charge of Aragón and La Rioja, the Valencian Community and Murcia until 2013.

Mr. Jesús Tejel Giménez holds a bachelor's degree in Business Administration from the University of Zaragoza and a diploma in General Management from the IESE Business School. He is a Chartered Accountant registered at the ROAC and a lecturer in business management on university courses at the EDEM Business School.

Mr. Luis Enrique Arrufat Guerra

Mr. Luis Enrique Arrufat Guerra first joined Ibercaja Banco on January 1, 1980 and was appointed proprietary director of the Company on August 30, 2017. He held various roles at the Ibercaja Savings Bank until its financial activity was transferred to the Company. He served as Capital Markets Operator, Head of Cash, General Deputy Director, Head of Resources, Deputy General Manager and Director of Marketing. In January 2010, he was appointed Deputy General Manager, and in October 2011 (when the Ibercaja Savings Bank's financial activity was transferred to the Company) he was appointed Head of Finance, a position he held until February 2015, when he was appointed Deputy Chief Executive Officer until June 30, 2015. Within the Group, he has also held positions at several entities, including director of Ibercaja Vida, Ibercaja Gestión, Ibercaja Pensión, Ibercaja Servicios Inmobiliarios, S.A., Cerro Murillo and Ibercaja Patrimonios, S.G.C., S.A.U. In addition, he has been chairman of EURO 6000, S.A. and Viacajas, S.A. and member of the boards of EBN Banco de Negocios, S.A, Ahorro Corporación, S.A. and CIMD, S.A.

Mr. Luis Enrique Arrufat Guerra holds a bachelor's degree and PhD in Mathematics from the University of Zaragoza and completed an advanced course in international finance in 1987, the executive development programme (*Programa de Desarrollo Directivo, PDD*) at the IESE Business School in 1997 and the Senior Management Programme at the IE Business School in 2005.

Ms. María Pilar Segura Bas

Ms. María Pilar Segura Bas was appointed other external director of the Company on August 30, 2017. Since 1980 she has held various positions at the Ibercaja Savings Bank until its financial activity was transferred to the Company, such as Head of the Budgetary and Cost Accounting Department, Head of the Information Systems and Management Control Department and Information Systems and Management Control Manager. Later she was appointed Deputy General Manager of the Company (Control Management), an office she held until March 1, 2017. She has also held various management positions at various companies within the Group, including member and chairman of the board of Tipo Linea, S.A., board member of Ibercaja Gestión and chairman of the board of Servicios a Distancia IBD, S.L.

Ms. María Pilar Segura Bas holds a bachelor's degree in Business Administration from the University of Deusto (Bilbao).

Mr. Jesús Barreiro Sanz

Mr. Jesús Barreiro Sanz has been the secretary of our Board of Directors since September 22, 2011. Until August 29, 2019, he was also proprietary director of the Company, representing the Ibercaja Foundation. He previously was Deputy General Manager/General Secretary of the Company and chairman of the board of Ibercaja Pensión, as well as a member of the advisory committee of the CNMV. He is a member of the board of Henneo Media (formerly Grupo Heraldo) and the secretary of the Ibercaja Foundation.

Mr. Jesús Barreiro Sanz holds a bachelor's degree in Law from the University of Zaragoza and a bachelor's degree in Political Science from the Universidad Complutense de Madrid.

The following table sets out all entities in which the members of the Board of Directors, as well the secretary (non-director) of our Board of Directors, have been appointed as members of administrative, management or supervisory bodies, or in which they have held partnership positions at any time during the five-year period preceding the date of this Registration Document, indicating whether or not each person is still a member of any such bodies or holds any shares in any such entities.

Notes:—

(1) Directors who do not hold partnership positions in any entity as of the date of this Registration Document did not held partnership positions in any entity at any time during the five year period preceding the date of this Registration Document.

Board Committees

In compliance with our bylaws and our Board Regulations, our Board of Directors has established: a delegated committee (the "**Delegated Committee**"), an audit and compliance committee (the "**Audit and Compliance Committee**"), an appointments committee (the "**Appointments Committee**"), a compensation committee (the "**Compensation Committee**"), a large risks and solvency committee (the "**Large Risks and Solvency Committee**") and a strategy committee (the "**Strategy Committee**").

Delegated Committee

The composition, responsibilities and rules of the Delegated Committee are governed by our bylaws and our Board Regulations.

The members of the Delegated Committee are appointed by our Board of Directors among its members. Our Board Regulations require the Delegated Committee to have between five and nine members, one of whom must be the Chief Executive Officer.

Our Board of Directors shall ensure that the size and composition of the Delegated Committee are efficient and reflect the composition of the Board of Directors. Upon a potential Admission, our Board of Directors shall also ensure that the Delegated Committee has at least two members that are non-executive directors, one of them at least being an independent director.

The chairperson of our Board of Directors shall be the chairperson of the Delegated Committee. In case of absence, (and, upon a potential Admission, impossibility or vacancy) of the chairperson, the first or the second vice chairperson may act as chairperson. The secretary of our Board of Directors shall act as secretary of the Delegated Committee.

As of the date of the Registration Document, the members of the Delegated Committee are:

Name	**Position/Title**	**Category**
Mr. Francisco Serrano Gill de Albornoz.........................	Chairman	Proprietary
Mr. Jesús Máximo Bueno Arrese................................	Member	Proprietary
Mr. Víctor Manuel Iglesias Ruiz	Chief Executive Officer	Executive
Mr. Vicente Evelio Cóndor López..............................	Member	Independent
Mr. Jesús Tejel Giménez	Member	Independent
Mr. Jesús Barreiro Sanz	Secretary	Non-Director

The Board of Directors has delegated all of its powers in favor of the Delegated Committee, except for those which cannot be delegated pursuant to the provisions of the Spanish law, our bylaws or the Board Regulations.

The Delegated Committee is responsible for, among others:

- acknowledging and approving the granting, amendment and cancellation of risky transactions which, according to the Loan and Discount Risk Management and Procedure Manual approved by our Board of Directors are of its competence. Additionally, the Delegated Committee approves the proposed acquisitions of assets for repayment of debt pursuant to the asset management policies and manuals;
- acknowledging and approving matters related to employees (e.g. disciplinary records, granting of leaves, etc.) except for those which are competence of the Chief Executive Officer or our Board of Directors for being employees which are under the direct supervision of the Chief Executive Officer;
- acknowledging and approving of matters related to our assets, investments and divestments in Group companies, in accordance with internal policies and manuals, unless they are subject to the approval by the general shareholders' meeting; and
- granting, when applicable, the necessary powers to execute the resolutions passed by the Delegated Committee.

The Delegated Committee shall be validly held with the attendance of, whether present or duly represented, at least half plus one of its members, and the resolutions shall be passed by the majority of votes cast.

The resolutions passed by the Delegated Committee are binding without further confirmation from our Board of Directors. However, subject to the decision of the chairperson or the Chief Executive Officer, or when the importance of the resolution so requires, the validity of the resolution passed by the Delegated Committee shall depend on confirmation from our Board of Directors. This confirmation shall be required as well in those cases when our Board of Directors refers to the Delegated Committee for the study of certain matters, holding the right to have the last decision on such matters.

Audit and Compliance Committee

The composition, responsibilities and rules of the Audit and Compliance Committee are governed by the Spanish Companies Act, the Spanish Auditing Act, our bylaws and our Board Regulations.

The members of the Audit and Compliance Committee are appointed by our Board of Directors among its members. Our Board Regulations require the Audit and Compliance Committee to have between three and five members, all of whom must be non-executive directors and a majority of which must be independent directors. The members of the Audit and Compliance Committee must be appointed taking into account their knowledge or experience in accountancy, auditing (and, upon a potential Admission, risk management) standards.

The chairperson of the Audit and Compliance Committee is appointed by our Board of Directors among its independent members for a maximum term of four years and may only be re-elected as chairperson at least one year after his or her removal, although such person may continue being, or being re-elected, as member of the Audit and Compliance Committee. The secretary of our Board of Directors shall act as secretary of the Audit and Compliance Committee.

As of the date of this Registration Document, the members of the Audit and Compliance Committee are:

Name	Position/Title	Category
Mr. Jesús Tejel Giménez	Chairman	Independent
Mr. Félix Santiago Longás Lafuente...........................	Member	Independent
Mr. Jesús Máximo Bueno Arrese................................	Member	Proprietary
Mr. José Miguel Echarri Porta.....................................	Member	Proprietary
Mr. Vicente Evelio Cóndor López..............................	Member	Independent
Mr. Jesús Barreiro Sanz	Secretary	Non-Director

The Audit and Compliance Committee is responsible for:

- reporting to the general shareholders' meeting on any matters within the Audit and Compliance Committee's authority;
- supervising the efficiency and independence of our internal controls, internal audit and risk control and management functions, and discussing with our external auditors any significant weaknesses in the internal control systems identified during the audit process;
- monitoring the compliance with our Internal Code of Conduct, our Board Regulations and with any of our corporate governance regulations;
- overseeing the process of drafting and filing of our regulated financial information, supervising our accounts and its compliance with the accounting principles and report the proposals in relation to the adjustment of the accounting criteria;
- making proposals to the Board of Directors for submission to the general shareholders' meeting, regarding the appointment, re-election and substitution of the external auditors, the relevant terms and scope of work and preserving the independence of the auditors in the exercise of the audit works;
- liaising with our external auditors in order to receive information about any matters that might jeopardize such auditors' independence, any weaknesses in the internal controls and any other matters related to the audit process and to any other legal communications regarding the auditing and technical standards applied to auditing;
- supervising the fulfilment of the agreement with the external auditors;
- ensuring that the external auditors comply with the existing regulations in terms of provision of services different from the audit, the concentration limits of the external auditors business and in general all the regulations related to the independence of the external auditors;

- investigating the circumstances of the external auditors resignation, if applicable;
- notifying the CNMV by means of a communication of other relevant information (*comunicación de otra información relevante*) (unless it is considered inside information) the appointment of new external auditors and the existence of disagreements with the former external auditors, if applicable;
- prior to the completion of the auditors' report on the annual accounts, issuing an annual report containing the Audit and Compliance Committee's opinion on the independence of the appointed external auditors and describing any other services rendered by the external auditors or their related entities to us or our related entities;
- reporting on the related party transactions (*operaciones vinculadas*); and
- reporting in advance to the Board of Directors on any matters envisaged in the legislation, bylaws and the Board Regulations, and in particular, on the interim financial information to be disclosed periodically, on the incorporation or acquisition of equity interests in special purpose vehicles or companies incorporated in non-cooperative jurisdictions and on related party transactions.

In addition, upon a potential Admission, the Audit and Compliance Committee would be also responsible for:

- ensuring that the external auditor holds an annual meeting with the full Board of Directors to brief it on the work done and on the situation of our accounts and risks;
- overseeing the process of drafting and filing of our regulated financial and non-financial information;
- ensuring that employees and other parties related to the Company such as directors, shareholders, suppliers, contractors and subcontractors have methods to report, confidentially, potentially important irregularities, particularly of a financial and accounting nature, within the Company; and
- ensuring that our Board of Directors seeks to submit accounts to our shareholders without limits or qualifications in the audit report and that, in exceptional cases where there are qualifications, the chair of the Audit and Compliance Committee and the external auditors clearly explain to our shareholders the nature and scope of those limits or qualifications.

The Audit and Compliance Committee shall meet at least quarterly and every time its chairperson or the Audit and Compliance Committee itself considers it appropriate.

Appointments Committee

The composition, responsibilities and rules of the Appointments Committee are governed by the Spanish Companies Act, our bylaws and our Board Regulations.

The members of the Appointments Committee are appointed by our Board of Directors among its members. Our Board Regulations require the Appointments Committee to have between three and five members, all of whom must be non-executive directors, and two of which must be independent directors.

The chairperson of the Appointments Committee is appointed by our Board of Directors among its independent members. The secretary of our Board of Directors shall act as secretary of the Appointments Committee.

As of the date of this Registration Document, the members of the Appointments Committee are:

Name	Position/Title	Category
Mr. Jesús Solchaga Loitegui..	Chairman	Independent
Mr. Félix Santiago Longás Lafuente...........................	Member	Independent
Ms. María Pilar Segura Bas	Member	Independent
Ms. Gabriela González-Bueno Lillo	Member	Independent
Mr. Jesús Barreiro Sanz	Secretary	Non-Director

The Appointments Committee is responsible for, among others:

- evaluating the competence, knowledge and experience required to the members of the Board of Directors. To this effect, it shall define the functions and aptitudes required from the candidates and evaluate the time and resources required for directors to carry out their tasks;
- setting diversity representation in the Board of Directors (and, upon a potential Admission, taking into account matters such as age, gender, disability, background or professional experience), and setting the procedures to accomplish such objectives;
- issuing to the Board of Directors the proposals for the appointment, re-election or removal of independent directors and other members of the Board of Directors;
- reporting on the members that should form each committee;
- reporting on the appointment or removal of the senior management and on the basic terms of senior management agreements;
- examining and organizing, in the most appropriate way, the replacement of the chairperson of the Board of Directors and of executive directors and, if applicable, making proposals to the Board of Directors in order for such replacements to take place in an orderly and well-planned manner.

The Appointments Committee shall meet every time its chairperson or the committee itself considers appropriate. In any case, the Appointments Committee shall meet at least quarterly and whenever the Board of Directors or its chairperson requests the preparation of a report or the adoption of a proposal.

Compensation Committee

The composition, responsibilities and rules of the Compensation Committee are governed by the Spanish Companies Act, our bylaws and our Board Regulations.

The members of the Compensation Committee are appointed by our Board of Directors among its members. Our Board Regulations require the Compensation Committee to have between three and five members, all of whom must be non-executive directors, and two of which must be independent directors.

The chairperson of the Compensation Committee is appointed by our Board of Directors among its independent members. The secretary of our Board of Directors shall act as secretary of the Compensation Committee.

As of the date of this Registration Document, the members of the Compensation Committee are:

Name	Position/Title	Category
Mr. Jesús Solchaga Loitegui	Chairman	Independent
Mr. Félix Santiago Longás Lafuente............................	Member	Independent
Ms. María Pilar Segura Bas	Member	Independent
Ms. Gabriela González-Bueno Lillo	Member	Independent
Mr. Jesús Barreiro Sanz	Secretary	Non-Director

According to the Board Regulations, the Compensation Committee is entrusted with general powers to propose and report to the Board of Directors about any matters regarding compensation of the members of the Board of Directors. The Compensation Committee is responsible for, among others:

- making proposals to the Board of Directors on the compensation policies for directors and senior management, on the individual compensation to executive directors and the terms and conditions in their management agreements, and on the basic terms and conditions of the agreements;
- presenting to the Board of Directors, subject to its approval, the Directors' compensation policy that shall be made publicly available or provided to the regulatory authorities as well as the individual compensation and contractual conditions of executive directors;

- overseeing compliance with the compensation policies and the transparency in the compensation of the directors; and
- reviewing periodically the compensation policies of the directors and the senior management, ensuring that they are proportionate among the directors and senior management.

The Compensation Committee shall meet every time its chairperson or the committee itself considers appropriate. In any case, the Appointments Committee shall meet at least quarterly and whenever the Board of Directors or its chairperson requests the preparation of a report or the adoption of a proposal.

Large Risks and Solvency Committee

The composition, responsibilities and rules of the Large Risks and Solvency Committee are governed by Act 10/2014, our bylaws and our Board Regulations.

The members of the Large Risks and Solvency Committee are appointed by our Board of Directors among its members. Our Board Regulations require the Large Risks and Solvency Committee to have between three and five members, all of whom must be non-executive directors and one third of which must be independent directors, including its chairperson.

The chairperson of the Large Risks and Solvency Committee is appointed by our Board of Directors among its independent members. The secretary of our Board of Directors shall act as secretary of the Large Risks and Solvency Committee.

As of the date of this Registration Document, the members of the Large Risks and Solvency Committee are:

Name	Position/Title	Category
Mr. Vicente Evelio Cóndor López..............................	Chairman	Independent
Mr. Jesús Máximo Bueno Arrese................................	Member	Proprietary
Mr. Jesús Tejel Giménez	Member	Independent
Ms. María Pilar Segura Bas	Member	Independent
Mr. Jesús Solchaga Loitegui.......................................	Member	Independent
Mr. Jesús Barreiro Sanz	Secretary	Non-Director

The Large Risks and Solvency Committee is responsible for, among others:

- suggesting to the Board of Directors the limits by type of risk and business to be established, including credit risk, concentration risk, market risk, liquidity risk, interest rate risk and currency risk;
- reporting to the Board of Directors the economic outlook assumptions used to determine the stress scenarios hypotheses that are used on capital planning;
- reporting, prior to its approval by the Board of Directors, our RAF and risk appetite statement, ensuring that both of them are consistent with our other policies and strategic frameworks;
- analyzing and evaluating our risk management (including tax risk) policies in terms of risk profile (expected loss) and profitability, and analyzing our exposures by business, customer and sector segments;
- analyzing and reviewing our risk oversight systems;
- proposing to the Board of Directors, when deemed appropriate, the measures to mitigate the impact of the risks that have been identified; and
- analyzing and assessing the level of equity and its forecasts over time, given different scenarios, and proposing measures it deems appropriate in order to strengthen our solvency, reporting on the capital adequacy policy.

In addition, upon a potential Admission the Large Risks and Solvency Committee would be also responsible for, among others:

- reporting the Recovery Plan;
- informing about the capital and liquidity self-evaluation reports and their amendments; and
- ensuring that the remuneration policy, and specifically the short and medium-term variable remuneration objectives, are consistent with our RAF.

The Large Risks and Solvency Committee shall meet every time its chairperson or the committee itself considers it appropriate. In any case, the Large Risks and Solvency Committee shall meet at least quarterly and whenever the board of directors or its chairperson requests the preparation of a report or the adoption of a proposal.

Strategy Committee

The composition, responsibilities and rules of the Strategy Committee are regulated by our Board Regulations.

The members of the Strategy Committee are appointed by our Board of Directors among its members. Our Board Regulations require the Strategy Committee to have between three and five members.

The chairperson of the Strategy Committee is appointed by our Board of Directors among its members. The secretary of our Board of Directors shall act as secretary of the Strategy Committee.

As of the date of this Registration Document, the members of the Strategy Committee are:

Name	Position/Title	Category
Mr. Francisco Serrano Gill de Albornoz	Chairman	Proprietary
Mr. José Miguel Echarri Porta	Member	Proprietary
Mr. Félix Santiago Longás Lafuente	Member	Independent
Mr. Luis Enrique Arrufat Guerra	Member	Proprietary
Mr. Jesús Solchaga Loitegui	Member	Independent
Mr. Jesús Barreiro Sanz	Secretary	Non-Director

According to the Board Regulations, the Strategy Committee focuses on reporting to the Board of Directors about our strategic policy, ensuring that there is a specific organization for its implementation. In particular, the Strategy Committee is responsible for, among others:

- informing about our strategic plan, monitoring it and reporting to the Board of Directors;
- reporting our annual budget;
- reporting the strategic direction of our specific and overall goals related to the strategic plan and its annual budget;
- reporting to the Board of Directors on issues of strategic importance, including those that may affect the shareholder structure or those that may open new national or international financial markets;
- informing about the outsourcing policy of services and activities; and
- informing about the policy to approve new products while developing new markets, products or services, and significant changes in those already existing.

In addition, upon a potential Admission, the Strategy Committee would be also responsible for, among others, ensuring compliance with internal codes of conduct, the code of ethics and CSR policy.

The Strategy Committee shall meet every time its chairperson or the committee itself considers it appropriate. In any case, the Strategy Committee shall meet at least quarterly.

Conflicts of Interest

As of the date of this Registration Document, none of the members of our Board of Directors nor of our senior management has reported a conflict of interest situation with the Company nor with any company of the Group. Similarly, no conflicts of interest due to any personal action or that of others that are alike, similar or complementary to that of the corporate purpose of the Company have been reported.

The mechanisms to detect, determine and resolve potential conflicts of interest between us and our directors or senior managers are regulated in the Spanish Companies Act, our Board Regulations, our suitability and diversity assessment policy and the Ibercaja Foundation Protocol.

Pursuant to the Spanish Companies Act and the Board Regulations, directors have, among others, the obligation to perform their office with the loyalty of a true representative, acting in good faith and in the Company's best interests, not to exercise their powers for different purposes others than those for which they have been empowered, to perform their duties under the principle of personal responsibility with freedom of judgment or criteria and independence from instructions and relationships from third parties and not to participate in the deliberations and votes of agreements or resolutions in which they or a person related to them have a conflict of interest.

The Spanish Companies Act and the Board Regulations establish the duty of the director not to carry out personal transactions with the Company or other Group companies, save for ordinary transactions to be made under standard conditions or those of little relevance and develop activities, either personally or for another person, which imply an effective competition. Likewise, the Spanish Companies Act and the Board Regulations establish that the directors cannot take advantage, for their own benefit, of any of our business opportunities, make use of our assets for private purposes, take advantage of their positions in the Company to obtain economic advantages, and to obtain advantages or remuneration from third parties other than the Company and the Group associated with the performance of their duties. These obligations also apply to the directors' related parties, as defined in the Board Regulations. Directors must inform the Board of Directors of any conflict that they or their related parties could have with the interests of the Company or any Group company, as well as of all of their positions and activities in other companies and, in general, of every situation that could be of relevance for their role as director of the Company.

As of the date of this Registration Document, the Ibercaja Foundation is our majority shareholder and holds 88.04% of our share capital. According to our bylaws and our General Shareholders' Meeting Regulations, as long as any banking foundations shareholder holds a number of Shares that exceeds 40% of our share capital after a potential Admission and it does not establish a reserve fund on the terms established by the Banking Foundations Act, it cannot, individually, together with the companies belonging to its group or with persons acting in coordination with it, cast votes representing more than 40% of the voting share capital determined pursuant to the rules established in our bylaws and our General Shareholders' Meeting Regulations.

Under the terms of the Ibercaja Foundation Protocol, the Ibercaja Foundation has the ability to propose a number of members of the Board of Directors that shall be proportional to its stake in the Company. The governing body of the Ibercaja Foundation is the body through which the political rights of the Ibercaja Foundation in the Company are exercised.

In any case, pursuant to the Banking Foundations Act, directors proposed by the Ibercaja Foundation shall comply with the principles of honorability, knowledge, experience and good governance required pursuant to banking regulations and the suitability and diversity policy in force. In June 2018, we approved a new policy for the evaluation of the suitability of the members of the Board of Directors and key employees which supplements our bylaws and internal regulations and incorporates the applicable regulatory standards, in particular, to the members of the Board of Directors. Consequently, the verification of the suitability of the members proposed by the governing body of the Ibercaja Foundation shall be performed within this framework.

Internal Code of Conduct

On February 10, 2017, our Board of Directors approved the internal securities markets code of conduct (*Reglamento Interno de Conducta en los Mercados de Valores*) (the "**Internal Code of Conduct**") which was reviewed and updated on May 27, 2021 and on January 14, 2022. The Internal Code of Conduct regulates, among other things, our directors' and managers' conduct with regard to the treatment, use and disclosure of inside information. The Internal Code of Conduct applies to, among other persons, all members of the Board of Directors, the management team and employees who have access to inside information.

The Internal Code of Conduct, among other things:

- establishes the restrictions on, and conditions for, the purchase or sale of our securities or other financial instruments by persons subject to the Internal Code of Conduct, and by those who possess inside information;
- provides that persons subject to the Internal Code of Conduct shall not engage in market manipulation with respect to our securities or other financial instruments; and
- provides that persons subject to the Internal Code of Conduct report potential conflicts of interest to the regulatory compliance department.

Although Royal Decree 217/2008 of February 15, regarding the legal regime applicable to investment firms and other entities that provide investment services (*Real Decreto 217/2008 de 15 de febrero, sobre el régimen jurídico de las empresas de servicios de inversión y de las demás entidades que prestan servicios de inversión y por el que se modifica parcialmente el Reglamento de la Ley 35/2003, de 4 de noviembre, de Instituciones de Inversión Colectiva, aprobado por el Real Decreto 1309/2005, de 4 de noviembre*) has been repealed and therefore, we are not legally required to have an internal securities markets code of conduct, we have kept our Internal Code of Conduct in force as a good practice in order to prevent market abuse practices, according to the Market Abuse Regulation.

Corporate governance legal provisions and recommendations

The Spanish Companies Act sets out certain legal provisions related to corporate governance mandatorily applicable to Spanish listed companies on the Spanish Stock Exchanges (such as the Company upon a potential Admission). Although as of the date of this Registration Document such legal provisions are not applicable to us, we believe that we comply with the requirements of the Spanish Companies Act.

Additionally, the Spanish Corporate Governance Code for Listed Companies (*Código de Buen Gobierno de las Sociedades Cotizadas*) approved by the CNMV in February 2015, as amended in June 2020 (the "**Corporate Governance Code**") sets out certain recommendations on corporate governance to be considered on a "comply or explain" basis by the companies listed on the Spanish Stock Exchanges that would be applicable to the Company upon a potential Admission. Although as of the date of this Registration Document the Corporate Governance Code is not applicable to us, we believe that we comply with substantially all the recommendations of the Corporate Governance Code. In particular, as of the date of this Registration Document, we comply with recommendations: 1, 2, 5, 8, 9, 10, 12, 13, 14, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 28, 29, 30, 31, 32, 33, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61 and 63.

As of the date of this Registration Document our corporate governance practices depart from the recommendations described below:

- Recommendation 3: During the General Shareholders Meetings, the President of our Board of Directors does not verbally inform the shareholders of the most relevant aspects regarding corporate governance including any changes since the previous meeting or the reasons for not complying with the recommendations of the Corporate Governance Code, since they are not applicable to the Company as of the date of this Registration Document. However, upon a potential Admission, we expect to comply with this recommendation;

- Recommendation 4: As of the date of this Registration Document, our Board of Directors has not approved a policy of communication and contact with shareholders, institutional investors and proxy advisors that complies in full with market abuse regulations. However, our Board of Directors will consider the approval of such policy after a potential Admission and will inform about compliance of this recommendation in our first annual corporate governance report as a listed company upon a potential Admission;
- Recommendation 6: As of the date of this Registration Document, we prepare the relevant reports referred to in this recommendation (report on auditor independence, reports of the operation of the Audit and Compliance Committee, the Appointments Committee and the Compensation Committee and report on related party transactions) but we do not publish them. However, upon a potential Admission we would make these reports available to the public to comply with this recommendation;
- Recommendation 7: Taking into consideration the composition of our shareholding with only four shareholders (see "*Principal Shareholders*"), we have not put in place the mechanisms contemplated in this recommendation for the development of our General Shareholders Meeting. However, upon a potential Admission, our General Shareholders' Meeting Regulations would contemplate these mechanisms to comply with this recommendation;
- Recommendation 15: As of the date of this Registration Document, female directors represent 18.2% of the members of the Board of Directors (with 40% being the target minimum number of female directors recommended by the Corporate Governance Code by the end of 2022). However, our Board of Directors will consider the necessary amendments to the Board of Directors' composition in the future;
- Recommendation 27: Although the number of absences of the members of our Board of Directors is very small, we do not disclose this information in our annual corporate governance report. However, upon a potential Admission, we would disclose this information in our first annual corporate governance report as a listed company to comply with this recommendation;
- Recommendation 62: In accordance with our Remuneration Policy (as defined below), 60% of the Short-term Variable Component (as defined below) of our Chief Executive Officer is deferred for a period of five years and is delivered proportionally during such period. The Chief Executive Officer will receive 50% of the non-deferred Short-term Variable Component (i.e. 20% of the Short-term Variable Component) and 55% of the deferred Short-term Variable Component (i.e. 33% of the Short-term Variable Component) in instruments linked to the Company's performance and value ("**Phantom Shares**"). The Phantom Shares will be subject to a retention period of one year since the moment they are awarded after which they will be settled.

  In addition, pursuant to our Incentive Plan (as defined below), 55% of the Incentive (as defined below) that would correspond to our Chief Executive Officer would be paid in Phantom Shares as well, subject to a deferral period of up to five years and subject to an additional retention period of one year.

  To the extent that, according to our Remuneration Policy, 20% of the Short-term Variable Component of our Chief Executive Officer's compensation is paid in Phantom Shares subject to a one-year retention period after which the Phantom Shares will be settled at their net book value (see " – *Compensation of the Chief Executive Officer*" and "*Management Incentive Plans*"), we are not compliant with this recommendation which states that executive directors should not be able to transfer the ownership of any financial instruments received under remuneration schemes at least until a period of three years from the delivery of the instruments has elapsed. However, this remuneration scheme is compliant with the EBA guidelines on sound remuneration policies; and
- Recommendation 64: To the extent that our Chief Executive Officer is entitled to receive a compensation for termination of his mercantile contract equal to an amount twice his annual fixed remuneration in certain termination events and, upon termination of his appointment, our Chief Executive Officer is entitled to an additional compensation for the non-compete obligation which

will be equivalent to an amount twice his annual fixed remuneration. See "—*Compensation of the Chief Executive Officer*", we are not compliant with this recommendation which provides that termination payments (which for these purposes include any amounts paid under post-contractual non-compete agreements) should not exceed an amount equivalent to two years of the relevant director's total annual remuneration.

This remuneration scheme is compliant with the EBA guidelines on sound remuneration policies.

Upon a potential Admission, our corporate governance practices would depart from the recommendations described below:

- Recommendation 1: Our bylaws and the regulations governing our general shareholders' meeting (the "**General Shareholders' Meeting Regulations**") would limit the number of votes that can be cast by shareholders that are considered "banking foundations" and do not establish the corresponding reserve fund under the Banking Foundation Act to 40% of our share capital (see "*Description of share capital – General shareholders' meeting and voting rights – Attendance and voting rights*");
- Recommendation 10: Our General Shareholders' Meeting Regulations would establish different rules with regards to presumptions or deductions about the direction of votes for (a) proposals to the agenda of the General Shareholders' Meeting made or assumed by the Board of Directors and (b) proposals to the agenda of the General Shareholders' Meeting not made or assumed by the Board of Directors (see "*Description of Share Capital – Holding a general shareholders' meeting and adopting resolutions*"). To the extent that those proposals made by any shareholder by way of supplement of the agenda would not have the same treatment as for those submitted by the Board of Directors, we would not comply with this recommendation which provides, among others, that the Company should apply the same voting rules to the items or alternative proposals made by a shareholder than to those submitted by the Board of Directors, with particular regard to presumptions or deductions about the direction of vote.

In addition, the following recommendations do not apply to us as of the date of this Registration Document and would not be applicable to us upon a potential Admission:

- Recommendation 11: Not applicable as we do not envisage the payment of attendance fees for attending shareholders' meetings; and
- Recommendation 34: Not applicable as we do not have a coordinating director (*consejero coordinador*) given that our chairperson is a non-executive director.

Control of financial information system and risk control and management policy

The Board of Directors and our senior managers are aware of the importance of ensuring that the financial information disclosed to the market is reliable and, therefore, they are fully involved in the development of the internal control of financial information (*Sistema de Control de la Información Financiera* or "**SCIIF**").

The Board of Directors takes responsibility for establishing and overseeing risk control and information systems, as formally stated in the Board Regulations, the SCIIF falling within this responsibility.

Our senior management is also responsible for drawing up and implementing the SCIIF through the management analysis and corporate information department.

Finally, the Audit and Compliance Committee, under the Board Regulations, has been delegated the following core responsibilities in connection with information systems, internal control and financial information:

- On internal control and information systems, checking the appropriateness and integrity of internal control systems, ensuring the efficiency of risk management and internal control systems, including tax risks, periodically checking these, so that main risks are identified and any significant weaknesses in internal control systems identified in the audit are managed and duly reported to and discussed with the statutory auditor.

- On financial information, knowing and supervising the process of preparing and presenting our statutory financial and, where applicable, that of our Group, as well as its completeness, checking that regulatory requirements are met, that the scope of consolidation is properly delineated and that accounting standards are duly applied; checking our accounts, overseeing compliance with legal requirements and proper application of generally accepted accounting practice, as well as reporting suggested changes to accounting standards and principles made by management; checking the periodic financial information that the board must provide to the markets and market regulators, and in particular, the information not covered by the statutory audit contained in the Pillar III disclosures; knowing and overseeing the preparation of statutory financial information that we must make public periodically and ensuring that interim statements are drawn up with the same accounting standards as the annual statements and, to that end, considering the appropriateness of a limited review by the external auditor.

We have an organizational structure that ensures effective risk control and management. See "*Risk Management*".

Senior management

Aside from our Board of Directors, we are managed on a day to day basis by the senior management team.

The following table sets out the names of the members of the senior management team and their respective ages and positions as of the date of this Registration Document. The members of our senior management team have extensive knowledge and experience in the financial industry.

Name	Age	Position/Title	Joined the Group in
Mr. Víctor Manuel Iglesias Ruiz	55	Chief Executive Officer	1989
Mr. Rodrigo Galán Gallardo..............	65	Deputy Chief Executive Officer and Deputy Head-Chief of Human Resources Officer	1995
Mr. Jesús Sierra Ramírez....................	52	General Secretary	1993
Mr. José Ignacio Oto Ribate	55	General Deputy Head-Chief Branch Network Officer	1990
Mr. Antonio Martínez Martínez..........	43	General Deputy Head-Chief Financial Officer	2001
Ms. María Raquel Martínez Cabañero	47	General Deputy Head-Chief Credit Risk Officer	1997
Mr. José Palma Serrano	51	Chief Resources, Operations and Technology Officer	1994

Mr. Ignacio Torre Solá.......................	41	Chief Marketing Officer and Digital Strategy	2007
Mr. Luis Miguel Carrasco Miguel	49	Deputy General Manager and Head of Financial Group	2013
Ms. María Teresa Fernández Fortún...	53	General Deputy Head-Business Banking Officer	1991
Mr. Ángel Serrano Villavieja.............	46	General Deputy Head-Chief Audit Officer	2008

All members of our senior management team designate our registered address as their professional address for the purposes of this Registration Document.

Biographical information for each of the senior managers, including a brief description of each person's business experience and education, is presented below:

Mr. Víctor Manuel Iglesias Ruiz

See "—*Directors*" above.

Mr. Jesús Sierra Ramírez

Mr. Jesús Sierra Ramírez joined the Company in February 1993. He has been appointed to several positions in the Legal Department, being in charge of the Legal Department of Ibercaja´s Northern Territorial Division from February 2000 to February 2003, and of Ibercaja´s Retail Business from February 2003 to July 2013. Since July 2013 he is the Director of the Legal Department of the Company and in April 2022 he was appointed General Secretary. He is a practicing lawyer since 2003 and also a member of the board of directors and secretary of several companies such as Ibercaja Leasing, Ibercaja Gestión and Aramón Montañas de Aragón, S.A.

Mr. Jesús María Sierra Ramírez holds a bachelor's degree in Law from the University of Zaragoza (1992).

Mr. Luis Miguel Carrasco Miguel

Mr. Luis Miguel Carrasco Miguel was Managing Director of Banco Caja3 until its absorption by the Company. He held various senior management positions before joining the Company and he was appointed by the Board of Directors to take charge of our real estate management. He currently holds the position of Deputy General Manager and Head of the Financial Group. Before, from October 2013 until January 2021, he held the position of Director of the Real Estate Department.

Mr. Luis Miguel Carrasco Miguel holds a bachelor's degree in Economics from the University of Zaragoza (1995).

Mr. José Ignacio Oto Ribate

Mr. José Ignacio Oto Ribate joined the Company in June 1990 and has, since then, been appointed to several positions in our central services. In November 2011, he was appointed Director of Marketing and Multichannel Banking, and in February 2015, he was appointed as Deputy Manager and Director of Marketing and Omni-channel Banking. In March 2017, he was appointed Deputy General Manager and Director of the Branch Network Department.

Mr. José Ignacio Oto Ribate holds a bachelor's degree in Law from the University of Zaragoza (1990) and a master's degree in Digital Marketing from ESIC (2016).

Mr. Antonio Martínez Martínez

Mr. Antonio Martínez Martínez joined the Capital Markets Department of the Company in March 2001. He has been appointed to various positions in the Company's central services for capital markets. In May 2007, he was appointed Head of the Technical, Strategy and Quality Office and he was promoted to Manager in October 2011. In July 2013, he was given special leave to join Banco Caja3 and returned as Director of Corporate Strategy in October 2014. In February 2015, he was appointed Deputy Manager and Director of the Finance Division, a position that he currently holds. In March 2017, he was appointed Deputy General Manager. In January 2021, the competencies of the Financial Division were expanded to include the former Corporate Information Department (now the Management Analysis and Corporate Information Department).

Mr. Antonio Martínez holds a bachelor's degree in Business Management and Administration (1999) and in Law (2002) from the University of Zaragoza.

Ms. María Raquel Martínez Cabañero

Ms. María Raquel Martínez Cabañero joined the Company in August 1997. She has held various positions in the Company such as Head of Macroeconomic and Sectorial Analysis. In May 2007, she was appointed Director of Capital Markets; in February 2015, Deputy Manager and Director of the Credit Risk Department; and in March 2017, Deputy General Manager and Director of the Credit Risk Department.

Ms. María Raquel Martínez Cabañero holds a bachelor's degree in Business Administration from the University of Zaragoza (1996).

Mr. José Palma Serrano

Mr. José Palma Serrano joined the Company in February 1994 in the Securities and Trades Unit within the Capital Markets department. In July 2004, he was appointed Technical, Strategy and Quality Secretary; in May 2007, Director of Investment Loans; and, in October 2011, Deputy General Manager of the Credit Risk Department. In February 2015, he was appointed Chief Resources, Operations and Technology Officer.

Mr. José Palma Serrano holds a bachelor's degree in Economics from the University of Zaragoza (1992).

Ms. María Teresa Fernández Fortún

Ms. María Teresa Fernández Fortún joined the Company in January 1991 as an intern and later as an employee at the Company's branches in Huesca. She has held various positions in the Huesca regional office Risks Department, such as Risks Analyst, Reverse Factoring Officer in the SMEs/Businesses Unit, Head of Sales for the SMEs Branch Network, Business Marketing Officer and Business Management Officer. In September 2009, she was appointed Director of Social and Cultural Projects, and in October 2011 she applied for special leave at the Company to continue providing her services at the Ibercaja Foundation as Director of Social Projects. In June 2015, she was appointed Director of the Human Resources, with the category of Deputy Manager until January 2021, when she was appointed General Deputy Head-Business Banking Officer.

Ms. María Teresa Fernández Fortún holds a bachelor's degree in Law from the University of Zaragoza (1990), a master's degree in European Communities and European Union from the Real Instituto de Estudios Europeos (1993), a bachelor's degree in Economics from the University of Zaragoza (1999) and a master's degree in Digital Marketing from ESIC (2016). She also completed a course in Economic and Financial Management at CEPYME Aragonesa (1998) and an Advanced Management Program at IE Business School (2014).

Mr. Ignacio Torre Solá

Mr. Ignacio Torre Solá joined the Company in September 2007 as an employee in the Technical, Strategy and Quality Office. In December 2011 he was appointed Innovation and Excellence Officer and in April 2015, Head of the Technical Office. In March 2017 he was appointed Director of Marketing and Digital Strategy.

Mr. Ignacio Torre Solá holds a bachelor's degree in Industrial Engineering from the University of Zaragoza (2004). He also completed a Senior Management Program in Digital Business at ESIC (2014).

Mr. Rodrigo Galán Gallardo

Mr. Rodrigo Galán Gallardo joined the Group in December 1995 as Managing Director of Ibercaja Vida and he held various senior management positions before joining the Company in March 2015 as Deputy Manager and Head of Finance. From May 2008, he combined these duties with those of Managing Director of Ibercaja Pensión and later he was also appointed as a member of the board of Ibercaja Mediación. In January 2021, he was appointed Deputy Chief Executive Officer and in April 2022 he was appointed Deputy Head-Chief of Human Resources Officer.

Mr. Rodrigo Galán Gallardo holds a bachelor's degree in Economics from the Complutense University of Madrid (1980).

Ms. Ana Jesús Sangrós Orden

Ms. Ana Jesús Sangrós began her professional career at Arthur Andersen. She joined the Company in February 1994 at the Madrid regional office in the Risks Unit and she has held various positions and offices at the Company. She was appointed Financial Audit Officer in 2001, Risk Control Officer in 2003, Head of Risk Control in 2005 and Head of Model Validation in 2008. In March 2016, she was appointed Director of Management Monitoring in the Control Department and, in March 2017, she was appointed Director of the

Management Analysis and Corporate Information Department. In April 2022, she was appointed Deputy Head-Chief of Control Officer.

Ms. Ana Jesús Sangrós holds a bachelor's degree in Business Administration from the University of Zaragoza (1990). She completed the executive development programme (*Programa de Desarrollo Directivo, PDD*) at the IESE Business School (2016) and is a chartered accountant registered at the ROAC.

Mr. Ángel Serrano Villavieja

Mr. Ángel Serrano Villavieja joined the Company in July 2008 as Head of Risk Control. He was appointed Director of Audit and Control in October 2011 and Deputy Manager in February 2015.

Mr. Ángel Serrano Villavieja holds a bachelor's degree in Business Administration from the University of Zaragoza (1997).

Notes:—

(1) Members of the senior management who do not hold partnership positions in any entity as of the date of this Registration Document did not held partnership positions in any entity at any time during the five year period preceding the date of this Registration Document.

Compensation of directors

Article 34 of our bylaws and the Board Regulations provide a remuneration system for all members of our Board of Directors and another remuneration system for our Chief Executive Officer.

Compensation by reason of the office as a member of the Board of Directors

According to our bylaws and the Board Regulations, members of our Board of Directors shall be remunerated. The compensation of the members of our Board of Directors shall consist of (i) attendance allowances for the attendance at Board of Directors' meetings and Board of Directors committees' meetings (notwithstanding reimbursement of related expenses), (ii) an annual remuneration to be determined by the Board of Directors for those members who have special duties and (iii) the insurance policies that may be applicable from time to time.

The maximum annual compensation amount that all the members of our Board of Directors, in aggregate, shall receive as remuneration shall be determined by our shareholders at the general shareholders' meeting.

Unless decided to the contrary by the general shareholders' meeting, our Board of Directors shall determine the exact amount to be paid within the limit approved by the general shareholders' meeting, the distribution thereof among the members, the frequency of the compensation collections and other objective circumstances which may be deemed relevant.

The remuneration policy of the members of the Board of Directors shall always be reasonably proportional to our economic situation and market standards. The remuneration system shall be aimed to enhance long-term profitability and sustainability and shall include the necessary precautions to avoid assumptions of excessive risk.

The remuneration policy for the members of the Board of Directors shall be set within the compensation system provided for in our bylaws, as described above, and shall be approved by the general shareholders' meeting at least every three years as a separate item in the agenda.

In accordance with the above, our general shareholders' meeting, upon the proposal of our Board of Directors previously informed by the Compensation Committee and by our Risk Control Division, approved on April 15, 2021 and reviewed and updated on January 14, 2022, the remuneration policy for the members of our Board of Directors for a three-year period, in accordance with the applicable corporate and banking regulations (the "**Remuneration Policy**").

None of the members of our Board of Directors has entered into service contracts with us or any of our subsidiaries providing for benefits upon termination of its service, other than the Chief Executive Officer, as described in "*—Compensation of the Chief Executive Officer*" below.

On April 15, 2021, our general shareholders' meeting set at €2 million the maximum annual compensation amount payable to the members of the Board of Directors in aggregate, including all remuneration concepts to be received in aggregate by all the members of our Board of Directors (including our Chief Executive Officer).

The general parameters of the compensation of the members of our Board of Directors are the following:

- All members of the Board of Directors, in their capacity as such (regardless of their position), receive attendance fees for attending the meetings of the Board of Directors and Board of Directors' committees of which they are members (€700 gross per meeting).
- Each of the chairman of the Audit and Compliance Committee and the chairman to the Large Risks and Solvency Committee receives a gross fixed annual amount of €45,600 by reason of their chairmanship.
- The chairman of the Appointments Committee and the Compensation Committee receives a gross fixed annual amount of €30,400 by reason of both chairmanships, as they are concentrated in the same person.

Each of the Chairman of the Delegated Committee and of the Strategy Committee (who is the chairman of the Board of Directors) waived to receive compensation for the chairmanship of these committees.

- The chairman of the Board of Directors receives a fixed annual remuneration of approximately €360,000.
- The vice-chairman of the Board of Directors receives no annual fixed remuneration other than the attendance fees referred to above.
- The only compensation in kind received by the members of our Board of Directors are the life, health and accident insurance premiums arranged by Ibercaja Banco in their favor.
- The members of our Board of Directors are not beneficiaries of pension plans by reason of their position.
- The Chief Executive Officer is the only member of the Board of Directors who is entitled to receive a variable remuneration including the participation in the Incentive Plan (as defined below). See "*Compensation of the Chief Executive Officer*".

For 2022, the estimated cost of our Board of Directors' compensation in aggregate would be similar to the cost incurred in 2021 assuming the same level of achievement of the objectives (see "*Compensation of the Chief Executive Officer*" and "*Compensation of non-executive directors*"). It will be subject to the maximum annual compensation amount payable to the members of the Board of Directors in aggregate, including all remuneration concepts to be received in aggregate by all the members of our Board of Directors' (including our Chief Executive Officer), which is currently €2 million as approved by our General Shareholders' Meeting. In particular, the estimated cost of the fixed remuneration of our non-executive chairman in 2022 is expected to amount to €361,000, the attendance fees per meeting of the Board of Directors and the Board of Directors' committees to all members of the Board of Directors is expected to amount to €700 per meeting and the aggregate fixed remuneration per chairmanships of all Board of Directors' committees is expected to amount to €121,600. However, the estimated cost of our Board of Directors' compensation in 2022 will be subject to potential variations in the variable remuneration of the Chief Executive Officer as it is linked to the achievement of certain objectives, any substantial increase in the number of meetings of the Board of Directors or the Board of Directors' committees or any potential change in the structure of directors' remuneration which would have to be approved by the General Shareholders' Meeting.

Compensation of the Chief Executive Officer

According to our bylaws and the Remuneration Policy, the remuneration of the Chief Executive Officer consists of:

a) a fixed component, suitable for its duties and responsibilities, up to a maximum of €400,000 per annum (as updated pursuant to the consumer price index - CPI);

b) allowances for the attendance at governing bodies' meetings;

c) a variable remuneration, which will depend on an indicator of its performance or the Company's performance (based on annual and pluriannual indicators) as approved by the Board of Directors at any moment.

Our Board of Directors, previously informed by the Compensation Committee, will set and annually review, the proportion of the variable component of its remuneration to the fixed component (which is 40% for 2021 and it is not expected to change for 2022), as well as the weighting of the applicable global objectives and specific objectives (the "**Short-term Variable Component**").

For 2021, the Short-term Variable Component of our Chief Executive Officer's remuneration has been determined pursuant to the valuation of the following global objectives:

(i) CET1 ratio objective;

(ii) Profitability objectives: including objectives in terms of (a) financial products margin, (b) recurring revenues and (c) operating expenses;

(iii) doubtful assets management objectives;

(iv) customer-related objectives: including objectives in terms of (a) customer acquisition levels in the different customer segments, (b) customer linking and (c) customer experience; and

(v) "Desafío 2023" Strategic Plan key milestones.

According to our Remuneration Policy, 60% of the Short-term Variable Component of the remuneration is deferred for a period of five years and is delivered proportionally during such period.

According to applicable laws, the Chief Executive Officer may receive part of the variable remuneration by means of instruments linked to the stock price of the Company's shares. According to our Remuneration Policy, the Chief Executive Officer will be awarded annually 50% of the non-deferred Short-term Variable Component and 55% of the deferred Short-term Variable Component (which together would represent 53% of the Short-term Variable Component) in Phantom Shares, which are subject to a retention period of one year since the moment they are awarded.

The number of Phantom Shares to be awarded annually will be determined by dividing the amount under the Short-term Variable Component payable in Phantom Shares by each Phantom Share net book value[105] at the time of award (coinciding with the payment of the non deferred cash Short-term Variable Component).

After the one year retention period, the Phantom Shares will be settled (i.e., converted and delivered in cash to the Chief Executive Officer) at their net book value[106] at the time of settlement.

The Short-term Variable Component is subject to the clawback and malus provisions described in the Remuneration Policy.

In addition, our Chief Executive Officer participates in the Incentive Plan (as defined below). No amounts will be accrued in favour of the Chief Executive Officer under the Incentive Plan until December 31, 2023 (see " – *Management Incentive Plans*").

The variable remuneration under the Short-term Variable Component and any amounts received annually under the Incentive Plan (as defined below) shall not exceed 200% of our Chief Executive Officer's gross annual fixed component, as approved by our Board of Directors on April 15, 2021. In addition, the total amount received by the Chief Executive Officer under the Incentive shall not exceed 150% of its gross annual fixed component;

d) insurance policies and social welfare systems;

e) contributions to pension plans; and

f) compensation in case of termination of his relationship with us (other than breach of contract by the Chief Executive Officer).

---

[105] The net book value of the Phantom Shares is calculated as the Company's own funds divided by the total number of shares in the Company's share capital according to the last audited annual accounts of the Company.

[106] The net book value of the Phantom Shares is calculated as the Company's own funds divided by the total number of shares in the Company's share capital according to the last audited annual accounts of the Company.

Our Chief Executive Officer is entitled to receive a compensation for termination of his mercantile contract equal to an amount twice his annual fixed remuneration if the termination is due to any of the following cases: (i) his unilateral decision to terminate his appointment if such decision is based on a serious or negligent breach of the Company's obligations or if there his functions or powers are substantially diminished, (ii) at the free will of the Company for any cause (except if termination is due to a serious or negligent breach of the Chief Executive Officer' duties), or (iii) at his option if there is a change of control of the Company and he is not ratified in his office within a month following the date of such change of control. The part of the compensation exceeding the minimum amounts provided by applicable law will be subject to *malus* provisions and the same deferral conditions as the Short-term Variable Component. Upon termination of his contract in case of death, retirement, situation comparable to retirement or severe disability or total and permanent disability for his own or any occupation, the Chief Executive Officer or his successors will be entitled to the benefits derived from our employees' pension plan and collective insurance policy.

The termination of the Chief Executive Officer's mercantile contract will lead to the resumption of his employment contract with us if the termination is due to any of the following cases: (i) his unilateral decision to terminate his appointment, in which case he will not be entitled to the compensation referred to above, (ii) at the free will of the Company for any cause (except if the Chief Executive Officer opts to receive the compensation referred to above or if termination is due to a serious or negligent breach of the Chief Executive Officer' duties), or (iii) a change of control of the Company after which he is not ratified in his office within a month following such change of control, in case he does not terminate his appointment within six months following the date of such change of control in exchange for the compensation referred to above.

In addition, upon termination of his appointment our Chief Executive Officer is entitled to a compensation for the non-compete obligation which will be equivalent to twice his fixed annual remuneration. The Chief Executive Officer will not be entitled to this compensation in case his employment contract is resumed upon termination of his mercantile contract.

Notwithstanding the above, any compensation for the termination of his contract shall be based on his performance over time and poor results or improper conduct will not be rewarded. In addition, if the contract is terminated as a result of serious willful misconduct or gross negligence in the performance of his duties, our Chief Executive Officer shall not be entitled to any compensation.

The compensation of our Chief Executive Officer for the year ended December 31, 2021 is shown in the following table:

	Position	Fixed remuneration	Variable remuneration	Attendance fees	Remuneration for membership on board committees	Other items	Contributions to pension plans	Total
				(*€ thousands*)				
Mr. Víctor Manuel Iglesias Ruiz..........	Chief Executive Officer	394	87	33.6	-	7.6	52.2	574.4

Source: Company's internal accounting records.
Notes:—

As of December 31, 2021 we had accrued an estimated total amount of €437,854 to provide for pension benefits in favor of our Chief Executive Officer.

For 2022, the estimated cost of our Chief Executive Officer's compensation would be similar to the cost incurred in 2021, assuming the same level of achievement of the objectives which determine the variable remuneration. In particular, the estimated fixed remuneration of our Chief Executive Officer in 2022 is expected to amount to €416,576 as a result of the applicable update pursuant to the consumer price index (CPI). The Short-term Variable Component will not exceed 40% of such amount, this is, €166,630. However, the estimated cost of our Chief Executive Officer's compensation in 2022 will be subject to possible variations in the variable component of his remuneration as it is linked to the achievement of certain objectives, any substantial increase in the number of meetings of the Board of Directors or the Board of Directors' committees or a change in the structure of the directors' remuneration which would have to be approved by the General Shareholders' Meeting.

Compensation of non-executive directors

Our independent directors and proprietary directors are not entitled to receive any fixed remuneration other than attendance fees for attending the Board of Directors and Board of Directors' committees meetings and remuneration for the chairmanship of the Board of Directors' committees. The compensation of our non-executive directors for the year ended December 31, 2021 is shown in the following table:

Members of the Board of Directors	**Position in 2021**	**Fixed remuneration**	**Variable remuneration**	**Attendance fees**	**Remuneration for membership on board committees**	**Other items[(1)]**	**Total**

Source: Company's internal accounting records.

Notes:—

(1) Other items include insurance premiums including life, health and accidents insurance.

Compensation of senior management

The compensation of our senior management (11 senior managers, excluding the Chief Executive Officer, whose compensation is included in the table above) in 2021 amounted to approximately €2 million.

The compensation of our senior management is composed of a fixed component and a variable component which is subject to the fulfilment of the same global objectives set out by our Board of Directors as applicable to the variable component of our Chief Executive Officer's remuneration which are referred to above. The members of our senior management are not entitled to any compensation in kind.

The detail of the compensation of our senior management (excluding the Chief Executive Officer) for 2021 is shown in the following table:

	Fixed remuneration	Variable remuneration	Contributions to pension plans	Total
		(*€ thousands*)		
Senior management (excluding the CEO)	1,643	361	170.6	2,152.6

Source: Company's internal accounting records.

As of December 31, 2021 we had accrued an estimated total amount of €1,956,855 to provide for pension benefits in favor of our senior management (excluding the Chief Executive Officer).

For 2022, the estimated compensation of our senior management would be similar to the cost incurred in 2021, assuming the same level of achievement of the objectives which determine the variable remuneration. In particular, the estimated cost of our senior management's fixed remuneration in 2022 is expected to amount to €1,664 thousand as a result of the applicable update pursuant to the collective agreement (0.75% increase for 2022 except in the case of the General Secretary and the Deputy Head-Chief of Control Officer whose fixed remuneration would be updated pursuant to the consumer price index (CPI)). The variable remuneration of our senior management's compensation for 2022 is not expected to exceed €589,308. However, the estimated cost of our senior management in 2022 will be subject to possible variations in the variable component of their remuneration, as it is linked to the achievement of certain objectives.

None of the members of our senior management has entered into service contracts with us or any of our subsidiaries providing for benefits upon termination of its employment, other than Mr. Luis Miguel Carrasco Miguel and Mr. Francisco Serrano Gill de Albornoz, as described below.

On October 24, 2013, we entered into an employment agreement with Mr. Luis Miguel Carrasco Miguel, as amended on January 14, 2022, under which, among others, upon termination of the employment agreement by Ibercaja Banco for any reason (except due to a voluntary termination by Mr. Luis Miguel Carrasco Miguel or if the termination is declared fair by a final judicial decision), he is entitled to receive an amount equal to twice his annual fixed remuneration as compensation. In the event of voluntary termination of the employment relationship by Mr. Luis Miguel Carrasco Miguel and provided that (i) he is 60 years of age or more and (ii) he has held an employment relationship with or a management role in Ibercaja Banco during at least 25 years or 15 years, respectively, he would be entitled to receive a compensation equivalent to twice, one and a half, one or half his annual fixed remuneration in case the termination takes place at 60, 61, 62 or 63 years of age, respectively. In case the voluntary termination takes place at 64 years of age or more, he would not be entitled to receive any compensation. Furthermore, he is entitled, upon retirement, disability or death (in which case, if he is in active service at such time, his spouse will be entitled half of that amount and subject to a 20% increase for each minor), to a lifelong retirement annuity equal to 80% of the remuneration received in the last twelve months of service.

In addition, upon termination of his employment relationship under certain termination events he is entitled to a compensation for his non-compete obligation which will be equivalent to twice his annual fixed remuneration.

Notwithstanding the above, any compensation shall be based on his performance over time and poor results or improper conduct will not be rewarded.

On February 25, 2015, we entered into an employment agreement with Mr. Francisco Serrano Gill de Albornoz, as amended on January 14, 2022, which was suspended upon his appointment as non-executive chairman of Ibercaja Banco on March 30, 2022, without any compensation rights in his favour. At that time, a new mercantile contract was entered into between us and Mr. Francisco Serrano Gill de Albornoz to regulate his role as non-executive chairman of Ibercaja which does not include any compensation rights in case of termination. Nevertheless, in the event that his appointment as director is terminated for any reason, the employment agreement with Mr. Francisco Serrano Gill de Albornoz would be resumed and thus the compensation rights described below would apply upon termination of the employment agreement.

In particular, among other things, upon termination of the employment agreement by Ibercaja Banco for any reason (except due to a voluntary termination by Mr. Francisco Serrano Gill de Albornoz in the event of a change of control or if the termination is declared fair by a final judicial decision), he would be entitled to receive an amount equal to twice his annual fixed remuneration as compensation. If there is a change of control of the Company and he is not ratified in his office within a month following the date of such change of control, Mr. Francisco Serrano Gill de Albornoz would be entitled to terminate his contract and receive the abovementioned compensation. In the event of voluntary termination of the employment relationship by Mr. Francisco Serrano Gill de Albornoz and provided that (i) he is 60 years of age or more and (ii) he has held an employment relationship with or a management role in Ibercaja Banco during at least 25 years or 15 years, respectively, he would be entitled to receive a compensation equivalent to twice, one and a half, one or half his annual fixed remuneration in case the termination takes place at 60, 61, 62 or 63 years of age, respectively. In case the voluntary termination takes place at 64 years of age or more, he would not be entitled to receive any compensation. Furthermore, he is entitled, upon retirement, disability or death to a lifelong retirement annuity equal to 85% of the remuneration received in the last twelve months of service. However, in the event of death (i) such amount would be increased by 20% for each minor and (ii) if he is not in active service at the time, his spouse will be entitled only to a half of such amount.

In addition, upon termination of his employment relationship under certain termination events he would be entitled to a compensation for his non-compete obligation which will be equivalent to two years of annual fixed remuneration.

Notwithstanding the above, any compensation shall be based on his performance over time and poor results or improper conduct will not be rewarded.

D&O insurance policy

We maintain an insurance policy that protects the members of the Board of Directors and our senior managers from liabilities incurred as a result of actions taken in their capacity as directors or senior managers, up to an aggregate maximum amount of €50 million. The annual net premium of our D&O insurance policy amounts to €1,100 thousand (gross premium amounts to €1,190 thousand) for the period between May 12, 2021 and May 12, 2022 and it covers both the Board of Directors and our senior management team.

Management incentive plans

On April 15, 2021, our General Shareholders' Meeting approved a long-term management incentive plan in the context of our "Plan Desafío 2023" Strategic Plan (the "**Incentive Plan**"). The Incentive Plan establishes a variable remuneration system by which its participants will have the possibility to receive an amount in cash and an amount in Phantom Shares (the "**Incentive**"), as long as they meet certain objectives which will be approved by our Board of Directors pursuant to the rules set out below.

The purpose of the Incentive Plan is to retain, motivate and compensate its participants promoting the mutual value creation for the Company and its employees and, at the same time, compensating the creation of sustainable value for our stakeholders in the long term, by means of defining the variable remuneration in a multiannual context.

Participants

The participants in the Incentive Plan are 29 key members of our management team whose areas of professional activity may significantly influence our risk profile (including our Chief Executive Officer), as decided by our General Shareholders' meeting, who have accepted the invitation to participate in the Incentive Plan proposed by the Company (the "**Participants**" and the "**Formal Invitation**", respectively). The Formal Invitation contained (i) the general and particular terms of the Incentive Plan and (ii) the maximum monetary amount of the Incentive in case the Incentive Plan objectives are fully met.

The Company will be entitled to cancel the participation of any Participant in the Incentive Plan without such Participant being entitled to receive any compensation in case of breach of any of the general terms of the Incentive Plan.

Performance Period

The accomplishment of the multiannual performance objectives (the "**Multiannual Objectives**") which are set out below will be assessed in the period commencing on January 1, 2021 (the "**Starting Date**") and ending on December 31, 2023 (the "**Final Date**" and the "**Performance Period**", respectively).

Incentive Requirements

In order to be eligible to receive the Incentive the Participants had to be under continued employment or mercantile relationship with the Company since the Starting Date until December 31, 2021, unless express authorization of our Board of Directors. The Incentive will be vest subject to the following conditions being met:

- continued employment or mercantile relationship of the Participant in the Company as of the Final Date or applicability of any circumstances which, pursuant to the general terms of the Incentive Plan, allow such Participant to maintain the right to receive the Incentive in whole or in part;
- fulfilment of minimum thresholds for the Multiannual Objectives as established in the general terms of the Incentive Plan; and
- the non-occurrence, in the Company's opinion, of any circumstance which may give rise to the application of malus clauses, as set out in the Company's general remuneration policy, during the period prior to any of the disbursements.

In addition, the amounts disbursed will be subject to the potential recovery by the Company (clawback) in the situations and during the periods provided in the general remuneration policy.

Incentive Calculation

The maximum monetary amount of the Incentive of each Participant will be calculated as a percentage of the fixed annual remuneration of such Participant. The General Shareholders' Meeting has expressly approved that the Incentive of each Participant and any other amounts received as variable remuneration can exceed 100% of such Participant's fixed annual remuneration, but shall in no circumstance exceed 200% of such fixed annual remuneration.

The maximum amount to be paid to our Chief Executive Officer pursuant to the Incentive Plan, under the assumption of full satisfaction of the Pluriannual Objectives (as defined below), would be 150% of his fixed annual remuneration, this is €600,000. The maximum amount to be paid to each member of our senior management team pursuant to the Incentive Plan, under the assumption of full satisfaction of the Pluriannual Objectives, would be 150% of their respective fixed remuneration.

The maximum amount to be paid pursuant to the Incentive Plan, under the assumption of full satisfaction of the Pluriannual Objectives, would be €4.6 million. We have booked a provision of €1.5 million in the results of 2021 in connection with the Incentive Plan.

As of the end of 2021 each Participant was entitled to receive a target Incentive (the "**Target Incentive**"). However, no amounts will be accrued in favour of the Participants under the Incentive Plan until the Final Date. On the Final Date, the Company will assess the achievement of the Multiannual Objectives and will determine the amount of Target Incentive to be granted to each Participant, subject to "*Incentive Termination*" below.

The Target Incentive payment will be subject to a deferral period of up to five years and will be linked to the fulfilment of the Multiannual Objectives (the "**Deferred Incentive**").

The Deferred Incentive would be granted proportionally during the first quarter of 2024, 2025, 2026 and 2027. Each Deferred Incentive payment would be made 45% in cash and 55% in Phantom Shares (which are subject to a one-year retention period after which they would be settled at their net book value (see " – *Compensation of the Chief Executive Officer*" for an explanation of the calculation of the number and settlement of the Phantom Shares)). Therefore, the Deferred Incentive would be settled following this schedule:

- 2024: first deferred amount in cash;
- 2025: second deferred amount in cash and first deferred amount in Phantom Shares;
- 2026: third deferred amount in cash and second deferred amount in Phantom Shares;
- 2027: fourth deferred amount in cash and third deferred amount in Phantom Shares;
- 2028: fourth deferred amount in Phantom Shares.

After the Final Date and until the delivery of the Deferred Incentive, the Company could determine if any adjustments shall be made to the amounts to be delivered in application of the clawback and malus provisions described in the Remuneration Policy.

Multiannual Objectives

The Deferred Incentive is subject to the Multiannual Objectives linked to our "Desafío 2023" Strategic Plan. The Multiannual Objectives fulfilment will be calculated in accordance with the following formula:

MOAR= (TSRAR * 45%) + (ROTE AR * 20%) + (CET1 AR * 20%) + (SOAR * 15%)

where:

"MOAR" refers to the Multiannual Objectives Achievement Rate;

"TSRAR" refers to the Total Shareholder Return Objective Achievement Rate;

"ROTE AR" refers to the ROTE^{APM} Objective Achievement Rate;

"CET1 AR" refers to the CET 1 Capital Objective Achievement Rate;

"SOAR" refers to the Sustainable Objective Achievement Rate.

The objectives values and the achievement rates for each objective are described as follows:

The Total Shareholder Return Achievement Rate is calculated as the variation in the equity of the Company (i.e. profit net of dividends minus AT1 cost) plus dividends of the Company in the Performance Period in accordance with the following scale:

Multiannual Objective	**Achievement Rate**	**Ratio**
Total Shareholder Return is equal or above €325 million	≥100% = 100 points 70% = 30 points <70% = 0 points	45%

The ROTE Achievement Rate for year 2023 is calculated in accordance with the following scale:

A47716269

Multiannual Objective	Achievement Rate	Ratio
ROTE is equal or above 7%	≥100% = 100 points 70% = 30 points <70% = 0 points	20%

The CET1 Capital Objective Achievement Rate for year 2023 is calculated in accordance with the following scale:

Multiannual Objective	Achievement Rate	Ratio
CET1 ratio is equal or above 12.5%	Yes/No	20%

The Sustainable Objective Achievement Rate for year 2023 is calculated in accordance with the following scale:

	Multiannual Objective	Achievement Rate	Ratio
Female Directors	40%	Yes/No	5%
CO2 emissions	0%	Yes/No	5%
Strategic Key Milestones[107]	% achievement	% achievement	5%

In order to determine the achievement rate of each Multiannual Objective, the amounts between each tranche will be calculated by linear interpolation.

Incentive Termination

Any Participant whose employment or mercantile relationship with the Company is terminated between January 1, 2022 and the Final Date, shall lose the entitlement to receive the Incentive except if termination is due to any of the following events: (a) unilateral termination by the Company, (b) death, (c) permanent disability (either absolute, total or severe), (d) retirement (either ordinary or early retirement), (e) voluntary termination by the Participant in accordance with article 50 of the Spanish Statute of Workers, (f) dismissal linked to a collective dismissal in accordance with article 50 of the Spanish Statute of Workers, (g) individual objective dismissal or in accordance with article 52.3 of the Spanish Statute of Workers, (h) voluntary

[107] In the context of our “Desafío 2023” Strategic Plan we have established 40 key strategic milestones in connection with (i) strategic planning of people, (ii) purpose and sustainability, (iii) technological model evolution, (iv) operational model evolution, (v) 0-based budget, (vi) customer knowledge and business intelligence, (vii) products and services billing model, (viii) business banking, (ix) risk insurance, (x) personal banking, (xi) pricing and efficient allocation of capital, (xii) IRB models, and (xiii) data governance and quality.

termination by the Participant for reasons of substantial modification of the employment conditions, recurring delay in the payment or non-payment of the agreed salary or any other severe breach of contractual obligations by the Company pursuant to article 10.3 of the Royal Decree 1382/1985 of August 1, governing senior executives employment relationships, or (f) termination by the Company declared unfair in court or by the relevant administrative body. Any Participant whose employment or mercantile relationship with the Company is terminated between January 1, 2022 and the Final Date due to any of the abovementioned events will be entitled to receive the Incentive pro-rated to the period within the Performance Period during which such Participant has remained in the Company.

In the event that the relationship between the Participant and the Company is suspended for any reason for a continued period above six months before the Final Date, the Participant will lose any right to the Incentive. Notwithstanding the above, the relationship will not be considered as suspended in the event of maternity or paternity leave, risk pregnancy, risk during nursing of babies under nine months, adoption or fostering of children under six years, in the cases recognized by the relevant health or administrative body and gender violence cases. The suspension will not affect the right of the Participant to receive the Incentive as long as it continues another employment or mercantile relationship with us. In any case, the Board of Directors shall have the discretion to decide about each particular situation in a reasoned matter.

Equity interests

None of our members of our Board of Directors or senior managers have equity interests in the Company.

Family relationships

There are no family relationships between the members of our Board of Directors or of our management team or supervisory bodies.

No convictions and other negative statements

To the best of our knowledge, none of our directors or senior managers have, in the five years preceding the date of this Registration Document: (i) been convicted in relation to fraudulent offences; (ii) acted as directors or senior managers of entities affected by bankruptcy or receivership; (iii) been publicly incriminated and/or sanctioned by statutory or regulatory authorities (including designated professional bodies); or (iv) been disqualified by a court from acting as a member of the administrative, management or supervisory bodies of an issuer of securities, or from acting in the management or conduct of the affairs of any issuer.

RELATED PARTY TRANSACTIONS

We enter into transactions with certain related parties or our affiliates from time to time in the ordinary course of our business. We believe that all transactions are conducted on an arm's-length basis and that the terms of these agreements are comparable to those currently contracted with unrelated third parties. Certain related party transactions entered into during the period covered by the Annual Accounts and up to the date of this Registration Document are set out below.

We also enter into intragroup related party transactions with certain of our subsidiaries in the ordinary course of business.

For additional information on our related party transactions, see Notes 5 and 43 of each of our Annual Accounts.

Upon a potential Admission, as provided for in our Board Regulations, any transactions that we enter into with members of the Board of Directors or shareholders who hold, individually or together with others, a significant holding, or with persons related thereto, would need to be approved by the Board of Directors, following a report from the Audit and Compliance Committee, except in the case of transactions for an amount equal to or higher than 10% of our total assets (*activo*) as shown in our latest approved annual balance sheet which would require the approval of the general shareholders meeting. For the purpose of calculating this threshold, any transactions concluded with the same member of the Board of Directors in the last 12 months would be aggregated to determine their total value. All transactions entered into by us and our related parties have been favourably informed by our Audit and Compliance Committee and, in the case of transactions with the Ibercaja Foundation, they have been approved by the governing body (*Patronato*) as foreseen in the Ibercaja Foundation Protocol.

The tables below set out the detail of the accounts registered in our consolidated balance sheets and income statements as of and for the years ended December 31, 2021, 2020 and 2019 arising from transactions with related parties. The breakdown of related party transactions since December 31, 2021 until the date of this Registration Document does not differ from that already disclosed in the below periods:

	As of and for the year ended December 31, 2021

Related party transactions with the members of our Board of Directors and senior management

During 2021, 2020 and 2019 and the period between January 1, 2022 and the date of this Registration Document, we have not entered into any transactions with members of the Board of Directors or our senior management other than in the ordinary course of business and on an arm’s length basis, or in accordance with the terms generally available to our employees, and none of those transactions could be considered as significant, except as described below. In addition, to our knowledge, during such periods we have not entered into any transactions with any person or entity related in any way to members of the Board of Directors or our senior management other than on an arm’s length basis.

Transactions with members of our Board of Directors and senior management exceeding €200 thousand have to be authorized by the ECB in accordance with article 26.5 of Act 10/2014, article 35 of Royal Decree 84/2015 and article 35.5 of Bank of Spain Circular 2/2016. The ECB is in charge of verifying that such transactions are granted on an arm’s length basis.

On June 6, 2019, the ECB authorized the granting of a mortgage loan amounting to €320 thousand to a member of our senior management.

All loans and advances to the members of our Board of Directors and their second degree relatives and related entities that are outstanding as of the date of this Registration Document were made on an arm’s length basis. All loans and advances to the members of our senior management, their second degree relatives and related entities that are outstanding as of the date of this Registration Document were made on terms generally made available to our employees in the context of the applicable collective agreement, except when the transactions did not meet the requirements foreseen under the collective agreement, when they were made on an arm's-length basis. As of December 31, 2021, 2020 and 2019, the outstanding balance of these loans and advances amounted to €9,160 thousand, €8,936 thousand and €8,767 thousand, respectively. The outstanding amount of these loans and advances as of December 31, 2021 represented transactions in favor of 102 people (including members of the Board of Directors and senior management, their second degree relatives and related entities) which were all made on an arm's-length basis.

During the year ended December 31, 2020, loans and advances were made to two members of the Board of Directors and senior management, their second degree relatives and related entities for a total amount of €39 thousand.

During the year ended December 31, 2021, we executed 13 transactions with members of the Board of Directors and the senior management, their second degree relatives and related entities for an estimated total amount of €855.2 thousand.

Related party transactions with our shareholders

No significant transactions were entered into with our shareholders during 2021, 2020 and 2019 and the period between January 1, 2022 and the date of this Registration Document except for those described below, which were entered into in the ordinary course of business and on an arm's length basis[108]:

- Payments by the Ibercaja Foundation to the Company in the amounts of €142,194, €142,867 and €247,794 for the years ended December 31, 2021, 2020 and 2019, respectively, for the provision of certain advisory services (legal, tax, accounting, technological, marketing, communication and other) under the Initial Ibercaja Foundation Services Agreement and the Ibercaja Foundation Services Agreement.
- Payments by the Ibercaja Foundation to the Company in the amounts of €99,294, €149,559 and €134,630 for the years ended December 31, 2021, 2020 and 2019, respectively, for the rental by the Ibercaja Foundation of a property owned by the Company under the Initial Ibercaja Foundation Services Agreement and the Ibercaja Foundation Services Agreement.
- Payments by the Company to the Ibercaja Foundation in the amounts of €989,326, €1,011,124 and €843,108 for the years ended December 31, 2021, 2020 and 2019, respectively, for the provision of certain services (use and management of installations, artistic assets, etc.) under the Initial Ibercaja Foundation Services Agreement and the Ibercaja Foundation Services Agreement.
- Payments by the Company to the Ibercaja Foundation in the amount of €17,503, €17,503 and €17,329 for the years ended December 31, 2021, 2020 and 2019, respectively, for the rental by the Company of property owned by the Ibercaja Foundation under the Initial Ibercaja Foundation Services Agreement and the Ibercaja Foundation Services Agreement.

Ibercaja Foundation Protocol

Given that the stake of the Ibercaja Foundation in our share capital exceeds 30%, the governing body of the Ibercaja Foundation was required to prepare a management protocol of the financial stake in Ibercaja Banco (*Protocolo de gestión de la participación financiera de la Fundación Bancaria Ibercaja en Ibercaja Banco*) (the "**Ibercaja Foundation Protocol**") in accordance with the Banking Foundations Act and the bylaws of the Ibercaja Foundation. The governing body of the Ibercaja Foundation prepared the Ibercaja Foundation Protocol on December 4, 2014, which was as amended on April 25, 2019 and approved by the Bank of Spain. Below are described the main principles, targets, and other key aspects of the Ibercaja Foundation Protocol which is published on www.fundacionibercaja.es.

Principles:

- to carry out the proper management of the Ibercaja Foundation's stake in Ibercaja Banco, oriented to the healthy and prudent management of Ibercaja Banco, focusing on sustainably maximizing the

[108] See Note 5.4 to our Annual Accounts.

value of the business and obtaining economic returns that enable the Ibercaja Foundation to fulfil its charitable and social aims;

- to ensure that Ibercaja Banco's corporate governance processes comply with national and international regulations, principles and standards in force from time to time; and
- to continue and to preserve, within the legal framework of Ibercaja Banco, the heritage received from the Ibercaja Savings Bank, keeping a traditional retail banking approach.

The Ibercaja Foundation Protocol is aimed at establishing:

- the basic strategic criteria that apply to the Ibercaja Foundation's management of its stake in Ibercaja Banco;
- relationships between the board of the Ibercaja Foundation and the governing bodies of Ibercaja Banco;
- the general criteria for carrying out transactions between the Ibercaja Foundation and Ibercaja Banco and the foreseen means of preventing possible conflicts of interest;
- information exchanges that allow the Ibercaja Foundation and Ibercaja Banco to prepare their respective financial statements and fulfil their regular supervisory and reporting obligations to the relevant regulatory bodies; and
- principles for possible cooperation between the Ibercaja Foundation and Ibercaja Banco so that Ibercaja Banco can develop corporate social responsibility policies with the Ibercaja Foundation and, at the same time, for the Ibercaja Foundation to be able to disseminate its social work programs through the Ibercaja Banco branch network and, where applicable, through other material resources.

The significant stake that the Ibercaja Foundation has in the share capital of Ibercaja Banco is considered to be positive for the good and conservative management of Ibercaja Banco. In this sense, the Ibercaja Foundation will aim to maintain the traditional profile of Ibercaja Banco, characterized by a prudent approach to risk management and a focus on retail banking. Likewise, the Ibercaja Foundation will exercise its voting rights to preserve the governance, management and risk control principles, which ensure the maintenance of the strongest levels of solvency and liquidity of Ibercaja Banco, as well as the compliance with its internal policies and the regulations, both national and international, that may be applicable.

The governing body of the Ibercaja Foundation has the right to propose a number of members of our Board of Directors in proportion to the stake that, from time to time, the Ibercaja Foundation holds in our share capital (i.e., the Ibercaja Foundation is entitled to proportional representation). All members proposed by the Ibercaja Foundation shall have the integrity, knowledge and expertise required pursuant to Act 10/2014 and Ibercaja Banco has implemented a policy for evaluating the suitability of the members of the Board of Directors.

According to Article 3.3 of the Ibercaja Foundation Protocol, holding offices in the governing body of the Ibercaja Foundation and in our Board of Directors at the same time is incompatible, save as provided in the second transitional disposition of the Banking Foundations Act (see "*Regulation*"). The members of the governing body of the Ibercaja Foundation that were members of our Board of Directors when the Banking Foundations Act came into force may perform both offices within the limits and for the time established in such second transitional disposition of that law. As of the date of this Registration Document, no members of the governing body of the Ibercaja Foundation are members of our Board of Directors.

In transactions or services with Ibercaja Banco and its controlled entities, the Ibercaja Foundation shall act according to the following criteria:

- Transactions and services provided shall be transparent and on market terms, checking the Ibercaja Foundation's governing body that these conditions are met in each case and being recorded specifically in the governing body's resolutions passed to that effect.

- The principle of preferential treatment shall apply, to all transactions and, as a result, all such transactions shall be carried out on the most favorable terms that are offered for that same transaction or service to third parties in the market from time to time.
- Transactions shall be carried out with maximum due care and with all resources available to each of the entities.
- Full confidentiality shall be maintained, and no information to which the entities have access as a result of providing any of the above described services shall be divulgated.

In general, the arrangement of transactions between the Ibercaja Foundation or persons related to it with Ibercaja Banco or members of its Group, shall require the prior authorization of the Ibercaja Foundation's governing body and our governing bodies pursuant to the Spanish Companies Act and our bylaws.

PRINCIPAL SHAREHOLDERS

As of the date of this Registration Document, our share capital is €214,427,597, consisting of 214,427,597 ordinary shares of €1.00 nominal value each. Our share capital is composed by a single class and series of shares, with the same rights. All of our Shares rank *pari passu* in all respects with each other, including for voting purposes and for all distributions of our profits and proceeds from liquidation. Further details relating to the Shares are set out in "*Description of Share Capital*".

The following table sets forth certain information with respect to the ownership of the Shares.

	Shares owned	
	Number	**%**
The Ibercaja Foundation	188,774,620	88.04(1)
Fundación Inmaculada de Aragón	10,144,381	4.73

Fundación Círculo de Burgos	7,135,202	3.33
Total	**214,427,597**	**100.00**

Notes:—

(1) According to our bylaws and our General Shareholders' Meeting Regulations, as long as any banking foundations shareholder holds a number of Shares that exceeds 40% of our share capital after a potential Admission and it does not establish a reserve fund on the terms established by the Banking Foundations Act, it cannot, individually, together with the companies belonging to its group or with persons acting in coordination with it, cast votes representing more than 40% of the voting share capital determined pursuant to the rules established in our bylaws and our General Shareholders' Meeting Regulations.

Below we set out a brief description of our existing shareholders as of the date of this Registration Document:

The Ibercaja Foundation

Fundación Bancaria Ibercaja is a private non-profit making organization arising from the transformation of the savings bank, Caja de Ahorros y Monte de Piedad of Zaragoza, Aragón and Rioja, a philanthropic-charity entity founded by *Real y Excelentísima Sociedad Económica Aragonesa de Amigos del País*, which was approved by the Royal Order of January 28, 1873 and commenced its activities on May 28, 1876. In 2014, in compliance with the Banking Foundations Act, the Ibercaja Savings Bank's general assembly approved its transformation to a banking foundation. In September 2014, in compliance with such resolution, the Ibercaja Savings Banks was transformed into Fundación Bancaria Ibercaja and the Ibercaja Foundation's members of its governing body (*patronato*) were appointed. The Ibercaja Foundation was registered in the Banking Foundations Registry on October 13, 2014 under the number 1,689.

As part of the restructuring of the Spanish financial system, the Ibercaja Savings Bank's general assembly, at its extraordinary meeting held on July 26, 2011, approved the creation of Ibercaja Banco, to which all the assets and liabilities related to its financial activity were contributed. Following such spin-off, the Ibercaja Foundation maintains its charity and cultural projects and Monte de Piedad maintains its historical-artistic heritage.

The registered office of the Ibercaja Foundation is at Calle Joaquín Costa 13, 50001 Zaragoza, Spain, and its phone number is +34 976 97 19 01. Its LEI code is 95980020140005926392.

Fundación Inmaculada de Aragón

Fundación Inmaculada de Aragón is a private non-profit organization arising from the merger by absorption of Fundación Caja de Ahorros de la Inmaculada de Aragón- Acción Social Católica (FCAI-ASC) into Fundación Caja de Ahorros de la Inmaculada de Aragón (FCAI) which took place in November 2019.

The general assembly of Caja Inmmaculada approved the transformation of the entity on December 13, 2013 into a foundation of special character per Royal Decree 11/2010 of of July 9, (*Real Decreto Ley 11/2010 de 9 de julio de Órganos de Gobierno y otros aspectos del Régimen Jurídico de las cajas de ahorros*). The foundation was removed from the Banking Foundations Registry on February 24, 2014 and subsequently transformed into an ordinary foundation.

Fundación Inmaculada de Aragón focuses its activities on Aragón, subject to this Autonomous Community's Foundations Protectorate supervision. These activities include creating, promoting and maintaining social projects with emphasis on individuals under risk of exclusion and social, cultural and economic development of the Autonomous Community.

The registered office of the Fundación Inmaculada de Aragón is at Calle San Braulio 5-7, 50003 Zaragoza, Spain, and its phone number is + 976290301.

Fundación Caja Badajoz

Fundación Caja Badajoz, is a non-profit making organization, arising from the transformation of Monte de Piedad and Caja General de Ahorros de Badajoz in 2013. This last entity was founded by Real Sociedad Económica Extermeña de Amigos del País de Badajoz in 1889.

Fundación Caja Badajoz, in the general assembly held on December 12, 2013 approved the transformation of the entity into a foundation of special character. Subsequently, on March 18, 2014 the Governing Body of Extremadura authorized the transformation into a foundation with the consequential loss of authorisation to act as a financial entity and guaranteeing the continuation of Caja Badajoz as a special foundation with social and charity purposes. It was removed from the Banking Foundations Registry on May 12, 2014 and subsequently transformed into an ordinary foundation.

Following such transformation, the foundation focuses on the contribution to cultural and social wellbeing of the individuals of Extremadura seeking the promotion of the disabled, teaching and social institutions that promote socioeconomic and environmental development of Extremadura.

The registered office of the Caja Badajoz Foundation is at Calle Pablo Sorozábal s/n, 06006 Badajoz, Spain, and its phone number is + 92417618. Its LEI code is 959800DFZ31Q8TF7M062.

Fundación Círculo de Burgos

Fundación Círculo Católico de Burgos is a private, non-profit, social, catholic organisation, arising from the transformation of Caja de Ahorros and Monte de Piedad del Círculo Católico de Obreros de Burgos.

Fundación Círculo Católico de Burgos's general assembly approved on December 19, 2013 the transformation of Fundación Circulo de Burgos into a foundation of special character per Royal Decree 11/2010 of July 9, (*Real Decreto Ley 11/2010 de 9 de julio de Órganos de Gobierno y otros aspectos del Régimen Jurídico de las cajas de ahorros*). This event entailed the forfeiture of the organisation's condition of financial entity and subsequent withdrawal of the Banking Foundations Registry on February 17, 2014.

Subsequently, Fundación Círculo Católico de Burgos's governing body (*patronato*) approved the transformation of the entity to a banking foundation on March 5, 2014 in accordance with Law 26/2013 of December 28, (*Ley 26/2013 de cajas de ahorros y fundaciones bancarias*), and on May 2, 2014 the Governing Body of Castilla y León approved the registry of the foundation in the Banking Foundations Registry. The governing body (*patronato*) of Fundación Círculo Católico de Burgos approved the transformation of the entity into an Ordinary foundation on October 2, 2019

Fundación Círculo Católico de Burgos focuses on economic and social development activities through the direct and indirect promotion of social and charitable projects in the fields of: investigation, health, education, social inclusion, environmental protection, employment, religion, culture and values for the residents within its scope of operation as well as any other activities with social and economic impact.

The registered office of Fundación Círculo de Burgos is at Plaza España nº3, 09005 Burgos, Spain, and its phone number is + 947466568. Its LEI code is 959800HZTF3NMD02LY25.

Change of control

The Company is currently controlled by the Ibercaja Foundation. We are not aware of any arrangements the operation of which may at a subsequent date result in a change of control of the Company.

DESCRIPTION OF SHARE CAPITAL

The following summary provides information regarding our share capital and certain applicable provisions in connection therewith set out in our bylaws, our General Shareholders' Meeting Regulations and Spanish law, including, in particular, the Spanish Companies Act and the Securities Market Act. Our General Shareholders' Meeting Regulations, which were approved by our general shareholders' meeting on January 14, 2022, are pending registration with the Commercial Registry as of the date of this Registration Document and will enter into effect upon a potential Admission.

This summary does not purport to be complete nor to describe all of the applicable provisions and regulations in connection with the matters described herein and is qualified in its entirety by reference to our bylaws and to the Spanish Companies Act (or any other applicable regulations from time to time). It is recommended that you refer to our bylaws and the Spanish Companies Act (or any other regulation referred to herein) for further details. A copy of our deed of incorporation and bylaws are available at our registered office (Plaza de Basilio Paraíso, 2, 50008 Zaragoza, Spain). Furthermore, a copy of our bylaws is also available on our website (www.ibercaja.com).

General

We are a company incorporated under the laws of Spain on September 22, 2011 as a public limited liability company (*sociedad anónima*) pursuant to a notarized public deed of incorporation granted before the public notary of Zaragoza Mr. Francisco de Asís Pizarro Moreno under number 3,169 of his records and registered with the Commercial Registry of Zaragoza under volume 3,865, page Z-52186, book 0 and sheet 1, and as a credit institution with the Special Registry at the Bank of Spain (*Registro Administrativo de Bancos y Banqueros del Banco de España*) under number 2,085, and holder of Spanish tax identification number A-99319030, with registered office at Plaza de Basilio Paraíso, 2, 50008 Zaragoza, Spain. Our corporate purpose consists of all types of general banking activities, transactions, actions, contracts and services provided they are permitted by law, including the rendering of investment and other auxiliary services.

As of the date of this Registration Document, our share capital consists of €214,427,597 divided into a single series of 214,427,597 ordinary shares denominated in euro, with a nominal value of €1.00 per Share and each with an ISIN code ES0144251008, allocated by the Spanish National Agency for the Codification of Securities (*Agencia Nacional de Codificación de Valores Mobiliarios*), an entity dependent upon the CNMV. Our entire share capital is fully subscribed and paid-up.

Our Shares are represented by book entries, and Iberclear together with its participating entities, is the entity responsible for maintaining the corresponding accounting records, with its registered office at Plaza de la Lealtad 1, 28014 Madrid, Spain.

The Company was originally incorporated on September 22, 2011 with an initial share capital of €2,134,500,000, divided in 2,134,500,000 shares (*acciones*), numbered from 1 to 2,134,500,000, both inclusive, with a nominal value of €1.00 each, all of the same class and series, fully subscribed and paid-up.

The summary table below outlines the main changes in our share capital from the date of our incorporation until the date of this Registration Document:

Date	Corporate action	Nominal value	Number of issued/redeemed shares	Total nominal amount	Number of resulting shares	Resulting share capital
September 22, 2011................	Incorporation	€1.00	2,134,500,000	€2,134,500,000	2,134,500,000	€2,134,500,000
December 12, 2012................	Capital increase	€1.00	144,000,000	€144,000,000	2,278,500,000	€2,278,500,000
July 25, 2013....	Capital increase	€1.00	325,499,998	€325,499,998	2,603,999,998	€2,603,999,998

Date	Corporate action	Nominal value	Number of issued/redeemed shares	Total nominal amount	Number of resulting shares	Resulting share capital
November 27, 2013................	Capital increase	€1.00	7,730,000	€7,730,000	2,611,729,998	€2,611,729,998
October 29, 2015................	Capital decrease	€1.00	467,454,000	€467,454,000	2,144,275,998	€2,144,275,998
April 9, 2019....	Capital decrease(1)	€0.10	N/A	(€1,929,848,398.20)	2,144,275,998	€214,427,599.80
April 9, 2019....	Capital decrease	€0.10	(28)	(€2.80)	2,144,275,970	€214,427,597
April 9, 2019....	Reverse split	€1.00	(1,929,848,373)	N/A	214,427,597	€214,427,597

Note:—

(1) Decrease by €0.90 in the nominal amount of each share.

Non-residents in the Kingdom of Spain (including companies incorporated in other jurisdictions) are entitled to hold shares in a Spanish company and vote in its general shareholders' meeting, subject to the restrictions described under "*—Restrictions on Foreign Investment*" below.

Dividend and liquidation rights

Dividend distribution

Holders of our Shares are entitled to receive dividends proportionally to their paid-up share capital. However, there is no right to receive a minimum dividend.

Unless our general shareholders' meeting decides otherwise, dividends become payable from the next day on which the distribution agreement is adopted by our general shareholders' meeting. Additionally, our general shareholders' meeting or our Board of Directors may also approve the distribution of interim dividends (*dividendos a cuenta*) provided that: (i) we have sufficient liquidity to pay the interim dividends according to a financial statement prepared by our Board of Directors and (ii) the amount to be distributed does not exceed the earnings obtained since the end of the previous financial year, after deducting the sum of the accumulated losses from previous years, the amounts to be allocated to mandatory reserves or any other reserves provided for in our bylaws and the estimated tax due on the earnings.

According to the Spanish Companies Act, we may only pay dividends to our shareholders (once the mandatory reserve requirements and any requirements set out in our bylaws have been met, if applicable) from our annual profits or distributable reserves (such as issuance premium), provided in both cases that (i) the value of our net equity (*patrimonio neto*) does not, and as a result of the payment of dividends will not, amount to less than the share capital; and (ii) the distributable reserves are equal or higher than the research and development expenses recorded as an asset in our statement of financial position.

Prior to any dividend distribution from our annual profits, the Spanish Companies Act requires companies to allocate at least 10% of their annual profits to a non-distributable mandatory reserve (*reserva legal*) until such reserve amounts to, at least, 20% of the share capital. According to the Spanish Companies Act, mandatory reserves are only available for distribution to shareholders upon liquidation. As of December 31, 2021, our mandatory reserves amounted to €72,886 thousand which is equivalent to 34.0% of our share capital.

Our capacity to distribute dividends may be restricted under applicable banking regulations. See "*Regulation—Capital requirements—Maximum Distributable Amount*".

Our ability to distribute dividends in the near future, if any, and the amounts thereof will depend upon a number of factors, including, but not limited to, our earnings, financial condition, cash requirements (including capital expenditure and investment plans), restrictions on dividend payments under applicable laws (see

"*Regulation*"), market conditions and such other factors as may be deemed relevant at the time. In addition, our ability to pay dividends in the future will depend on the continued satisfaction of our capital requirements.

In 2020, the ECB issued recommendations on the dividend distribution policies of credit institutions, recommending credit institutions to establish dividend policies using conservative and prudent assumptions in order to satisfy, following any such dividend distribution, the applicable capital requirements and the outcomes of the SREP. In 2021, the ECB in view of the macroeconomic prospects for the Eurozone, decided not to extend these recommendations further than September 30, 2021.

In accordance with Article 947 of the Spanish Commercial Code (*Real Decreto de 22 de agosto de 1885, Código de Comercio*), a shareholder's right to any given dividend expires if unclaimed during five years after the date it becomes payable.

We are not aware of any restriction on the collection of dividends by non-resident shareholders. All holders will receive dividends through Iberclear and its member entities, without prejudice to potential withholdings on account of the non-residents income tax that may apply. Any dividends paid in the future will be subject to taxation under Spanish law.

See "*Dividends and Dividends Policy*" for details of our dividend distributions in the last three years.

Shareholder liquidation rights

Upon liquidation of a company, shareholders are entitled to any remaining assets in proportion to their respective shareholdings, once the company's debts, taxes and any expenses related to the liquidation have been paid.

As a credit institution, we are also subject to specific regulations on the recovery and resolution of credit institutions under the SRM Regulation and Act 11/2015. See "*Regulation—Single Resolution Mechanism (SRM)*".

General shareholders' meetings and voting rights

Calling a general shareholders' meeting

Pursuant to our bylaws, our General Shareholders' Meeting Regulations and the Spanish Companies Act, ordinary general shareholders' meetings are to be held annually during the first six months of each fiscal year on a date fixed by our Board of Directors. Upon a potential Admission, extraordinary general shareholders' meetings could be called by our Board of Directors whenever it would deem appropriate or at the request of shareholders representing at least 3% of our share capital. Upon a potential Admission, notices of all general shareholders' meetings shall be published (i) in the Commercial Registry's Official Gazette (*Boletín Oficial del Registro Mercantil*) or in one of the main newspapers in Spain; (ii) on our website; and (iii) on the CNMV's website (www.cnmv.es). Upon a potential Admission, our General Shareholders' Meeting Regulations would provide that, upon the call of our general shareholders' meeting, we would make available on our corporate website an electronic shareholders' forum (*foro electrónico de accionistas*) in order to facilitate the communication between us and our shareholders prior to the general shareholders' meeting and would grant access to it to individual shareholders and voluntary associations.

In addition, upon a potential Admission, if we offered shareholders the ability to vote on the matters considered at the meeting by electronic means accessible to all such shareholders, an extraordinary general shareholders' meetings could be called by our Board of Directors on 15 days' notice (as opposed to the ordinary one-month period). The decision to shorten the notice period before an extraordinary general shareholders' meeting would need to be adopted by our ordinary general shareholders' meeting by a majority of at least two thirds of our voting share capital. Such decision would remain in force, at most until the following ordinary general shareholders' meeting.

Authority of the general shareholders' meeting

Action is taken at our shareholders' meetings on the following matters: (i) approval of the management carried out by our Board of Directors during the previous fiscal year; (ii) approval of our annual accounts of the previous year; (iii) allocation of the previous fiscal year results; (iv) the appointment and removal of our directors, liquidators and, if applicable, auditors, and exercise of the Company's action to enforce liability against any of them; (v) amendment of our bylaws; (vi) capital increase and decrease; (vii) disapplication or limitation of the pre-emptive rights of subscription; (viii) acquisition, disposal or contribution to another company of essential assets (pursuant the Spanish Companies Act, the essential character of the asset is presumed when the amount of the transaction exceeds twenty five percent of the value of assets stated in the last approved statement of financial position); (ix) transformation, merger, spin off or global transfer of assets and liabilities and transfer of our registered office abroad; (x) winding up of the Company; (xi) approval of the final liquidation statement of financial position; (xii) the transfer of essential activities previously undertaken by the Company itself to our subsidiaries, even if the Company maintains full ownership of such entities; (xiii) transactions the effect of which is equivalent to the Company's liquidation; (xiv) the remuneration policy for the members of our Board of Directors; and (xv) any other matters specified by law or our bylaws. All the foregoing matters can be dealt with at ordinary or extraordinary general shareholders' meetings, provided that they are included in the agenda, with the exception of the approval of our annual accounts, the allocation of our results and the approval of the management carried out by our Board of Directors, which may only be decided at an ordinary general shareholders' meeting.

Attendance and voting rights

According to our bylaws, to attend the general shareholders' meeting and vote remotely the shareholders' resolutions, a shareholder must hold at least 1,000 Shares, although there is a possibility to group our Shares of a number of shareholders to reach such requirement and, in such case, a representative of such group of Shares must be appointed.

Shareholders holding the minimum number of Shares stated above that are duly registered in the book entry records (*anotaciones en cuenta*) managed by Iberclear and its participating entities at least five days in advance of the date of the general shareholders' meeting shall be entitled to attend and vote at such meeting.

According to our bylaws and our General Shareholders' Meeting Regulations, the attendees of the general shareholders' meeting are entitled to one vote per Share that they hold or represent. However, according to our bylaws and our General Shareholders' Meeting Regulations, after a potential Admission, shareholders that are considered banking foundations under the Banking Foundations Act that do not establish a reserve fund on the terms set out in that Act could not, individually, together with the companies belonging to their group or with persons acting in coordination with any of the former, cast votes representing more than 40% of the voting share capital determined as stated in the following paragraph, even if they owned more than 40% of our share capital. This restriction would only be effective in respect of banking foundations that, individually, together with the companies belonging to their group or with persons acting in coordination with any of the former, would hold a number of Shares that exceeds 40% of our share capital and do not establish a reserve fund on the terms set out in the Banking Foundations Act.

For the purposes of this restriction, the percentage of 40% of the voting share capital would be calculated on the basis of the resulting share capital after deducting the Shares held by the banking foundation shareholder (and by the companies belonging to its group and persons acting in coordination with any of the former) that are in excess of 40% of our share capital.

This limitation would not affect the votes attached to the Shares in respect of which a banking foundation shareholder is the proxy holder in accordance with our bylaws, unless the shareholder granting the proxy is also a banking foundation, or a company belonging to its group or a person acting in coordination with any of the former.

The Shares which would be deprived of the right to vote by application of this limitation would be deducted when determining the shareholders present at general shareholders' meetings for the purposes of calculating the necessary majorities to adopt resolutions.

Provided that the Board of Directors so resolves at the time of the notice, shareholders eligible to attend the General Shareholders' Meeting, or their designated proxy holder (as explained hereafter), may do so via any electronic means that allow them to be connected in real time with the site or sites where the meeting is being held. Remote attendance by shareholders or their proxy holders will be considered for all purposes to be the same as attending the General Shareholders' Meeting in person. In addition, the Board of Directors may convene a General Shareholders' Meeting enabling shareholders to attend exclusively by electronic means, without physical assistance of the shareholders or of their representatives provided that the Bylaws allow it. The General Shareholders' Meeting to be held exclusively by electronic means shall be deemed to be held at the registered office, regardless of where the Chairperson of the meeting is located.

In the case of electronic voting, the Company must send confirmation to the relevant shareholder in respect of the votes that have been cast by electronic means by sending receipt of confirmation of his votes. In addition, both the shareholder and the ultimate beneficial owner may request confirmation that their votes have been correctly accounted within one month of the meeting (unless they already have this information).

Proxies

Pursuant to the Spanish Companies Act and our bylaws, our shareholders may vote by proxy. Proxies must be given for each general shareholders' meeting in writing or by electronic means acceptable under our bylaws. Proxies may be given to any person, whether or not a shareholder. Proxies may be revoked by the shareholder by giving us notice prior to the meeting or personally attending the meeting. Proxies will be revoked by the shareholder by transferring its Shares, if the company is aware of such transfer.

Proxy holders are required to disclose any conflict of interest to the shareholder prior to their appointment. In the event that a conflict of interest arises after the proxy holder's appointment, it must immediately be disclosed to the shareholder. In both cases, the proxy holder must refrain from exercising the shareholder's voting rights after disclosure of the conflict of interest unless the shareholder has provided new specific voting instructions for each matter in respect of which the proxy holder is to vote on its behalf. A conflict of interest may (among other things) be deemed to arise when the proxy holder: (i) is one of our controlling shareholders or an entity controlled by such shareholder; (ii) is a member of our administrative, management or supervisory body, or that of one of the controlling shareholders or of another entity controlled by such shareholders; (iii) is our employee or auditor, or that of a controlling shareholder or another entity controlled by any of such shareholders; or (iv) is a natural person related to those mentioned in (i) to (iii) above (*persona física vinculada*), as this concept is defined under the Spanish Companies Act (such as the spouse or similar, at that time or within the two preceding years, as well as ascendants, descendants, siblings, and their respective spouses) and under the Spanish Ministry of Economy and Finance Order EHA/3050/2004, of September 15 (*Orden EHA/3050/2004 de 15 de septiembre sobre la información de las operaciones vinculadas que deben suministrar las sociedades emisoras de valores admitidos a negociación en mercados secundarios oficiales*).

A proxy holder may act on behalf of more than one shareholder without limitation as to the maximum number of represented shareholders. Where a proxy holder holds proxies from several shareholders with diverging voting instructions, it shall be entitled to cast votes differently as appropriate for each shareholder.

Pursuant to the Spanish Companies Act, entities rendering investment services, acting in their capacity as professional financial intermediaries, can also be appointed as proxy holders. Financial intermediaries shall also be entitled to cast different votes for each shareholder in observance of diverging voting instructions from their clients.

Entities appearing as holders of ordinary shares in the book-entry records but acting on behalf of different ultimate beneficial owners shall always be entitled to exercise voting rights in a divergent manner in order to comply with conflicting voting instructions received from their clients. These entities may also delegate voting rights to each of the ultimate beneficial owners or their nominees, without limits on the number of delegations.

Holding a general shareholders' meeting and adopting resolutions

The Spanish Companies Act varies according to whether the ordinary or extraordinary general shareholders' meeting is held on the first call or on the second call (meeting notices may include, and usually do, a second call for the meeting to be held at least 24 hours after the first date included in the meeting notice that would be held in accordance with the first call):

- *Quorum***:** on the first call the presence in person or by proxy of shareholders representing at least 25% of its voting capital will constitute a quorum. If on the first call a quorum is not present, the meeting can be reconvened by a second call, which requires no quorum.
- *General rule for the adoption of resolutions***:** resolutions are passed by a majority of the votes corresponding to the share capital present or represented at such meeting, except for the exceptions covered in the following paragraph.
- *Adoption of resolutions for reserved matters*: a resolution in a general shareholders' meeting to modify our bylaws (including, without limitation, increases and decreases of share capital), issue bonds (when this authority is reserved to the general shareholder's meeting), disapply or limit pre-emptive rights over new shares, transform, merge, spin off, globally assign assets and liabilities and the transfer of our registered address abroad, requires the presence in person or by proxy of shareholders representing at least 50% of our voting capital on first call, and the presence in person or by proxy of shareholders representing at least 25% of our voting capital on second call. On second call, and in the event that less than 50% of our voting capital is represented in person or by proxy, such resolutions may only be passed upon the vote of shareholders representing two thirds of our capital present or represented at such meeting. Pursuant to Article 201 of the Spanish Companies Act, the adoption of any agreement referred to in Article 194 of the Spanish Companies Act (which are those summarized above in this paragraph) will require an absolute majority of the votes issued by the attending shareholders (both personally and by proxy) if the attending shareholders represent more than 50% of the total share capital. Pursuant to Additional Provision 10 of the Banking Foundations Act, resolutions to distribute dividends in credit institutions controlled by a banking foundation in accordance with the provisions of Article 44.3 of the Banking Foundations Act shall be subject to the reinforced quorum established in Article 194 of the Spanish Companies Act and must be passed by a majority of at least two thirds of the capital present or represented at the shareholders' meeting.
- *Rules on presumptions or deductions about the direction of votes*: for the items included in the agenda which have been proposed or assumed by the Board of Directors, the votes corresponding to all the shares attending the meeting, present or represented, shall be considered as votes in favor of the proposal except the votes corresponding to (i) the shares whose holders or representatives state that they are voting against, in blank or abstain, by means of written communication or expression of their vote or abstention to the Secretary or, as the case may be, to the notary or assisting personnel, for recording in the minutes, or by means of the vote against, in blank or abstention through remote means of communication, in accordance with the provisions of the General Shareholders Meeting Regulations; and (ii) the shares whose holders or representatives have left the meeting prior to the vote on the proposed resolution and have recorded such abandonment before the Secretary or, as the case may be, the notary or assisting personnel.

  For items which are not included in the agenda or items included in the agenda which have not been proposed or assumed by the Board of Directors, the votes corresponding to all the shares attending the meeting, whether present or represented, shall be considered votes against the proposal except the votes corresponding to (i) the shares whose holders or representatives state that they vote in favour, in blank or abstain, by means of written communication or expression of their vote or abstention to the Secretary or, as the case may be, to the notary or assisting personnel for recording in the minutes, or, as the case may be, by voting in favour, in blank or abstaining through remote means of communication, in accordance with the provisions of the General Shareholders Meeting Regulations; and (ii) the shares whose holders or representatives have left the meeting prior to the vote on the proposed resolution and have recorded such abandonment before the Secretary or, as the case may be, the notary or assisting personnel.

The Spanish Companies Act allows shareholders to voluntarily group their shares so that the share capital in aggregate is equal to or greater than the result of dividing the total share capital by the number of directors on the board. Such grouped shareholders have the right to appoint a corresponding proportion of the members of the board of directors (disregarding any fractions) provided that there is a vacancy. Shareholders who exercise this grouping right may not vote on the appointment of the remaining other directors.

Legal effects of resolutions passed by the general shareholders' meeting and opposition to the resolutions of the general shareholders' meeting

A resolution passed by our general shareholders' meeting is binding on all shareholders.

Resolutions which are either (i) contrary to Spanish law, our bylaws or our General Shareholders' Meeting Regulations or Board Regulations or (ii) detrimental to our corporate interests in benefit of one or more shareholders or third parties, may be contested. Damage to company's interest is also caused when the resolution, without causing damage to corporate assets, is imposed in an abusive manner by the majority. An agreement is understood to have been imposed in an abusive manner when rather than responding reasonably to a corporate need, the majority adopts the resolution in their own interests and to the unjustifiable detriment of the other shareholders.

For listed companies (such as the Company upon a potential Admission), the Spanish Companies Act requires a contestant or contestant group to hold a minimum total of 0.1% of the company's share capital in order to contest a resolution. The Spanish Companies Act acknowledges a legal right of action in favor of (i) individual shareholders who held shares prior to the adoption of such resolutions, (ii) our directors and (iii) interested third parties. If the resolution is contrary to public policy, any shareholder (whether or not he or she was a shareholder at the time when the resolution was adopted), director or third party is entitled to contest the resolution. In certain circumstances (such as a significant amendment of our corporate purpose, certain cases of conversion of our corporate form or the change of our registered office overseas), the Spanish Companies Act entitles dissenting or absent shareholders to withdraw from the company. If this right were to be exercised, we would be obliged to repurchase the relevant shareholding(s) from the withdrawing shareholder in accordance with the procedures established under the Spanish Companies Act.

Loyalty Shares

The Spanish Companies Law provides that shareholders of listed companies (such as the Company upon a potential Admission) may have double voting rights associated to their shares ("**Loyalty Shares**"), provided that they are envisaged and regulated in the bylaws of the relevant listed company. As of the date of this Registration Document, our bylaws do not contain such regime for Loyalty Shares.

The following conditions would need to be met to implement Loyalty Shares:

- General shareholders' meeting approval: a general shareholders' meeting resolution passed by a qualified majority, of at least 60% of the votes cast (if the quorum at the meeting is at or above 50%) or 75% of the votes cast (if the quorum at the meeting is between 25% and 49.99%) in order to include the concept of Loyalty Shares (opt-in) in its bylaws.
- Shareholder's decision: that the shareholder concerned holds the shares uninterruptedly for a minimum of two years (the bylaws may require a longer holding period).
- Shareholder's prerogative: the double vote will be limited to those shares that the shareholder expressly indicates and the minimum holding period will only start at the moment the shareholder requests their registration in the special share register for shares with double voting rights. The shareholder may waive the double voting right at any time. The aforementioned special register will be available to all shareholders.

Listed companies that adopt the Loyalty Shares regime must include updated information on their website on the number of shares with double voting rights existing from time to time, as well as those registered shares whose loyalty period provided for in the bylaws is pending completion. Double voting rights will generally terminate when the Loyalty Shares are transferred, except in the case of intra-group transfers or, under certain conditions, transfers between family members or transfers through structural modifications (*modificaciones estructurales*).

Loyalty Shares must be taken into account for the purposes of, among others: (i) calculating the quorum of the general shareholders' meeting and the relevant majorities for the approval of resolutions; (ii) complying with the obligation to notify significant holdings; and (iii) determining the existence of a controlling interest that triggers the obligation to launch a takeover bid.

The provision in the bylaws regarding Loyalty Shares must be renewed after five years from the date of its original approval by the general shareholders meeting, subject to the same quorum and qualified majority requirements set out above, provided that holders of Loyalty Shares will be allowed to cast two votes per Loyalty Share held. Moreover, after 10 years from the inclusion of the Loyalty Shares regime in the bylaws, such bylaws may be amended to eliminate such Loyalty Shares (subject to the quorum and qualified majority requirements for any amendment of the bylaws) and holders of Loyalty Shares will only be able to cast one vote per Loyalty Share held for such purposes.

Pre-emptive rights and increases of share capital

Pursuant to the Spanish Companies Act, shareholders have pre-emptive rights to subscribe for newly issued shares or newly issued bonds that are convertible into shares in consideration for cash contributions. Such pre-emptive rights may be excluded under special circumstances by a resolution passed by the general shareholders' meeting or the board of directors (if the general shareholders' meeting of a listed company (such as the Company upon a potential Admission) delegates the decision to increase the company's share capital or issue convertible bonds waiving pre-emptive rights to the board of directors), in accordance with the provisions of the Spanish Companies Act. In such cases, the resolution authorizing the exclusion of pre-emptive rights will only be valid if, among other requirements: (i) a report is issued by an independent auditor appointed by the Commercial Registry stating, among other elements, the market value of the Shares, the theoretical value of the pre-emptive rights and the net book value of the Shares (which in the case of listed companies is only required when the amount of the non-pre-emptive share capital increase exceeds 20% of the company's share capital or, if below such threshold, the issue price of new shares is lower than 90% of their fair market value); and (ii) the nominal value and issue premium of the newly issued shares is equal to or higher than their fair value (*valor razonable*), provided that where the issuance of the new shares is approved by the general shareholders meeting the shares may be issued at an issue price below the fair value, in which case the Board of Directors must justify the reasons why it is in the best corporate interest of the Company to issue such shares at a discount to their fair value and the independent expert report will be imperative and will include information on the dilution of existing shareholders.

Furthermore, pre-emptive rights will not be exercisable by shareholders in case of a share capital increase that is required for the purposes of issuing convertible bonds into shares, completing a merger, acquiring all or part of another company's assets, by means of capitalization of credit rights or against non-cash contributions. Pre-emptive rights are transferable, may be traded on the the Spanish Automated Quotation System (*Sistema de Interconexión Bursátil or SIBE*) or *Mercado Continuo*, of the Spanish Stock Exchanges and may be of value to existing shareholders since new shares may be offered for subscription at prices lower than prevailing market prices.

On January 14, 2022 our Board of Directors was authorized by our general shareholders' meeting to issue convertible debt instruments or warrants in a maximum amount of €400 million for a period of five years. It was also authorized to increase our share capital by an amount of up to 20% of our share capital as of the date of such authorization (our share capital as of such date was €214,427,597), in order to issue new shares for the conversion of the convertible debt instruments and warrants, and to exclude shareholders' pre-emptive rights. The general shareholders' meeting has not authorized the Board of Directors to issue new shares on a pre-emptive or non-pre-emptive basis. As of the date of this Registration Document, we have not issued securities convertible or exchangeable into Shares or with warrants over the Shares.

Shareholder claims

Pursuant to the Spanish Companies Act, directors are liable towards us, the shareholders and the creditors for any actions or omissions that are illegal or contravene the bylaws and for failure to perform their legal and fiduciary duties diligently.

The liability of the directors is joint and several, except to the extent any director can demonstrate that he or she did not participate in the decision-making process related to the relevant act or omission, was unaware of its existence or if being aware of it, he or she used his or her best efforts to mitigate any damages to the Company or if he or she expressly disagreed with the decision-making relating to such act or omission.

Under Spanish law, shareholders must bring any actions against our directors as well as any other actions against us or challenging corporate resolutions before the competent courts in the province where our registered office is located (currently Zaragoza, Spain).

Information to shareholders

Under Spanish law and pursuant to the General Shareholders' Meeting Regulations, our shareholders are entitled to receive certain company information, including information regarding any amendment to our bylaws, any increase or reduction in our share capital, the approval of our annual accounts, any issuance of debt securities, a merger or spin off, the winding up or liquidation, or any other major corporate events or actions.

Furthermore, our shareholders may request any reports or explanations that they consider necessary in respect of the matters included in the agenda of a general shareholders' meeting, either in writing beforehand until the fifth day prior to the date scheduled for our general shareholders' meeting in which case, the Board of Directors is obliged to provide these reports and explanations until the day before the general shareholders' meeting, or orally at the meeting, in which case and if the right of our shareholder could not be satisfied at the moment, the Board of Directors is obliged to provide these reports and explanations within the seven days following the conclusion of our general shareholders' meeting, except in the case where, in the chairperson's opinion, public exposure of the information requested may be detrimental to our interests. However, this exception shall not apply should the request be backed by shareholders which together hold 25% or more of the share capital.

Representation and transfer of Shares

Our Shares are represented by book entry records and are indivisible.

Iberclear (the managing entity for the Spanish clearance and settlement system of the Spanish Stock Exchanges) manages the central registry, which reflects the number of shares held by each of its participating entities from time to time as well as the number of shares held by beneficial owners. Each participating entity, in turn, keeps a record of the owners of such shares. Since our Shares are represented by book entry records, we will keep an electronic shareholder registry for which Iberclear shall report to us all transactions entered into by our shareholders in respect of the Shares. The shareholders or persons holding limited in rem rights or encumbrances on the Shares may obtain legitimation certificates as provided for under the laws governing shares represented by book entries. Further, we have the right to request from Iberclear the details of our shareholders, including without limitation their names, addresses and contact details. We also have the right to request from the intermediary entity the details of the ultimate beneficial owner of its shareholders (that is, the person on whose behalf the intermediary institution acts as a shareholder by virtue of the accounting record).

Our Shares are freely transferable in accordance with the Spanish Companies Act, the Securities Market Act and any implementing regulations.

In the event of co ownership of one or several Shares, co holders must appoint a single representative to exercise their rights jointly on their behalf. However, they shall all be jointly and severally (*solidariamente*) liable towards us for any obligations in their capacity as shareholders.

Restrictions on Foreign Investment

Foreign direct investments ("**FDI**") were generally liberalised under law 19/2003, of July 4, on the establishment of a regulatory regime relating to capital and foreign economic transactions (*Ley 19/2003, de 4 de julio, sobre régimen jurídico de los movimientos de capitales y de las transacciones económicas con el* *exterior y sobre determinadas medidas de prevención del blanqueo de capitales*, "**Law 19/2003**"). Royal Decree-law 8/2020, of March 17, and Royal Decree-law 11/2020, of March 31, enacted article 7 bis of Law 19/2003 imposing certain restrictions on FDI.

Article 7 bis of Law 19/2003 sets forth a screening mechanism for certain investments made by non-EU and non-EFTA residents, based on public order, public health and public security reasons (the "**Screening Mechanism**"). The Screening Mechanism aligns part of the Spanish foreign investment legal framework with Regulation (EU) 2019/452, of March 19, 2019 establishing a framework for the screening of foreign direct investments into the European Union. Certain provisions of Regulation (EU) 2019/452 ─ such as the list of sectors affecting public order and public security or the definition of state-owned enterprises and other similar investors, are mirrored in the regulations establishing the Screening Mechanism.

In accordance with the Screening Mechanism, FDIs are:

- investments that result in a foreign investor reaching a stake of at least 10% of the share capital of a Spanish company; and
- any corporate transaction, business action or legal transaction which enables the possibility of exercising control (i.e. decisive influence, according to merger control criteria) over a Spanish company.

The Screening Mechanism provides that the following persons are deemed to be a "foreign investor" under applicable regulation:

- non-EU and non-EFTA residents; and
- EU or EFTA residents beneficially owned by non-EU and non-EFTA residents. This occurs when non-EU and non-EFTA residents ultimately own or control, directly or indirectly, more than 25% of the share capital or voting rights of the investor, or otherwise exercise control (i.e. have decisive influence, according to merger control criteria), directly or indirectly, over the investor.

In order to determine the FDIs which are subject to the Screening Mechanism, Law 19/2003 establishes two sets of requirements:

- the sector in which the target carries out its business:
    - Critical infrastructure, whether physical or virtual, including energy, transport, water, health, communications, media, data processing or storage, aerospace, defence, electoral or financial infrastructure, and sensitive facilities, as well as land and real estate crucial for the use of such infrastructure.
    - Critical technologies and dual-use products: telecommunications, artificial intelligence, robotics, semiconductors, cyber security, aerospace, defence, energy storage, quantum and nuclear technologies, as well as nanotechnologies and biotechnologies.
    - Supply of critical inputs, in particular electricity and gas activities, raw materials and food security.
    - Sectors with access to sensitive information, including personal data, or the ability to control such information.
    - Media.
    - Other sectors designated by the Spanish government from time to time that may affect public security, order or health (currently none).
- the personal circumstances of the foreign investor, regardless of the business of the target;
    - Investors directly or indirectly controlled by the government, including state bodies or armed forces, of a non-EU/EFTA country.

- Investors that have already made an investment affecting national security, public order or public health in another EU Member State, including an investment in any of the above-mentioned sectors.
- Investors who are at serious risk of engaging in criminal or illegal activities affecting public security, public order or public health in Spain.

In addition, on a temporary basis until December 31, 2022, acquisitions by EU/EFTA residents (other than Spain) in listed companies in Spain (such as the Company upon a potential Admission) are subject to the Screening Mechanism to the extent that they meet both of the following criteria:

- EU or EFTA resident acquires a stake of 10% or more in the Spanish company or, as a result of the transaction, acquires control of that company (i.e. possibility of exercising a decisive influence over a company);
- the sector of the investment affects "public order, public security and public health" (as described above).

The Screening Mechanism procedure requires the following:

- Under the ordinary procedure, prior authorization from the Spanish Council of Ministers (*Consejo de Ministros*) is required to close FDI subject to it. The legal term to issue a decision is six months.
- On a transitional basis, until the Screening Mechanism is further developed, a fast-track 30-day procedure, whose resolution is to be issued by a lower-tier authority (the General Directorate for International Trade and Investments *Dirección General de Comercio Internacional e Inversiones*), applies to investments (i) agreed but not closed prior to March 18, 2020; and (ii) those below €5 million. Investments below €1 million are not subject to the Screening Mechanism.
- Under both the ordinary and fast-track procedures, the investment will be deemed unauthorized if the relevant authority does not respond to the authorization request within the corresponding legal term.

In compliance with Royal Decree 664/1999 and developing regulations, foreign investors not resident in a non-cooperative jurisdiction are only required to file a standardized notice with the Spanish Registry of Foreign Investments (*Registro de Inversiones Exteriores*) kept by the General Bureau of International Commerce and Investments (*Dirección General de Comercio Internacional e Inversiones*) within the Ministry of Industry, Commerce and Tourism (*Ministerio de Industria, Comercio y Turismo*) following the investment in or divestment of a Spanish company. Such filing is to be made solely for statistical, economic and administrative purposes. For Shares belong to a Spanish company listed on an official secondary market, the duty to file the notice regarding the foreign investment or divestment falls with the relevant entity with whom the Shares (in book entry form) have been deposited or which has acted as an intermediary in connection with such investment or divestment.

Finally, if the foreign investor is a resident of a non-cooperative jurisdiction, as defined under Royal Decree 1080/1991 of July 5, 1991 (*Real Decreto 1080/1991, de 5 de julio, por el que se determinan los países o territorios a que se refieren los artículos 2.º, apartado 3, número 4, de la Ley 17/1991, de 27 de mayo, de Medidas Fiscales Urgentes, y 62 de la Ley 31/1990, de 27 de diciembre, de Presupuestos Generales del Estado para 1991)*, notice must be provided to the Registry of Foreign Investments both before and after execution of the investment. However, prior notice from residents in non-cooperative jurisdictions is excluded in the following cases:

- investments in securities, whether or not listed in an official secondary market;
- participations in investment funds that are registered with the CNMV; and
- investments in connection with shareholdings that do not exceed 50% of the share capital of a Spanish company.

Exchange control regulations

Pursuant to Royal Decree 1816/1991, of December 20 (*Real Decreto 1816/1991, de 20 de diciembre, de transacciones económicas con el exterior*), as amended by Royal Decree 1360/2011, of October 7 (*Real Decreto 1360/2011, de 7 de octubre, que modifica el Real Decreto 1816/1991, de 20 de diciembre, sobre transacciones económicas con el exterior*) and EC Directive 88/361/EEC, any charges, payments or transfers between non-residents and residents of the Kingdom of Spain must be effected through an official payment services supplier registered with the Bank of Spain and or the CNMV (*entidades registradas*) through bank accounts opened abroad with a foreign bank or a foreign branch of a registered entity in cash or by check payable to the bearer, in cash or by check payable to bearer. All charges, payments or transfers which exceed €6,010 (or its equivalent in another currency) must be notified through the payment services supplier to the relevant Spanish exchange control authorities if made in cash or by check payable to the bearer.

Reporting requirements

Transactions affecting voting rights

Pursuant to Royal Decree 1362/2007 of October 19, 2007 (*Real Decreto 1362/2007, de 19 de octubre, que desarrolla la Ley del Mercado de Valores en relación con los requisitos de transparencia relativos a la información sobre los emisores cuyos valores estén admitidos a negociación en un mercado secundario official o en otro mercado regulado de la Unión Europea*) ("**Royal Decree 1362/2007**"), any individual or legal entity who, by whatever means, purchases or transfers shares granting voting rights in a company listed in a secondary official market or other regulated market in the EU for which Spain is the country of origin (if the registered office of the listed company is located in Spain), must notify the relevant issuer and the CNMV, if, as a result of such transaction, the proportion of voting rights held by that individual or legal entity reaches, exceeds or falls below 3%, 5%, 10%, 15%, 20%, 25%, 30%, 35%, 40%, 45%, 50%, 60%, 70%, 75%, 80% and 90% of the company's total voting rights.

The notice shall be served by means of the standard form approved by the CNMV from time to time for such purpose, within four trading days from the date on which the transaction is acknowledged (Royal Decree 1362/2007 deems a transaction to be acknowledged within two trading days from the date on which it is entered into). Where the individual or legal entity effecting the transaction is a non-resident of the Kingdom of Spain, notice must also be served to the Spanish Registry of Foreign Investments within the General Bureau of International Commerce and Investments (a department of the Ministry of Economy and Competitiveness), as explained above in section "*Restrictions on Foreign Investment*".

The foregoing disclosure requirements also apply to those transactions (other than sales and purchases of shares) by which the proportion of voting rights of an individual or legal entity reaches, exceeds or falls below the aforementioned thresholds that trigger the obligation to report as a consequence of a change in the total number of voting rights of a company on the basis of the information disclosed in the CNMV. In such case, the transaction is deemed to be acknowledged within two trading days from the date of the communication of inside information (*comunicación de información privilegiada*) or the communication of other relevant information (*comunicación de otra información relevante*), as applicable.

Regardless of the actual ownership of the Shares, any individual or legal entity with a right to acquire, transfer or exercise voting rights granted by the Shares or who owns, acquires or transfers, whether directly or indirectly, other securities or financial instruments which grant a right to acquire shares with voting rights, shall also notify us and the CNMV if the aggregate voting rights held by that individual or legal entity reaches, exceeds or falls below the aforementioned thresholds.

The obligation to report will be applicable also if the thresholds mentioned above are crossed as a result of holding financial instruments which:

(a) On maturity, give the holder under a formal agreement either the unconditional right to acquire or discretion to decide to acquire voting shares already issued; or

(b) Otherwise, are referenced to voting shares already issued and have a similar economic effect to that of the financial instruments referred to in (a) above, whether or not they confer a right to a physical settlement.

This means that, for instance, any derivative which grants its holder a long position over the voting shares of a Spanish listed company (such as the Shares upon a potential Admission) (options, futures, swaps, forwards and other derivative agreements) is also disclosable (irrespective of whether it is cash or physically settled).

It should be noted that voting rights related to financial instruments are calculated differently depending on how instruments are settled:

- Where financial instruments provide for physical settlement, the number of related voting rights is calculated by reference to the full notional number of underlying shares.
- Where financial instruments provide for cash settlement only, the number of voting rights is calculated by multiplying the notional number of underlying shares by the delta of the instrument (which indicates how much a financial instrument's theoretical value would vary in the event of variation in price of the underlying shares).

In case the person, legal entity or group effecting the transaction is a resident in a non-cooperative jurisdiction (as defined by applicable Spanish regulations) or in a country or territory levying no taxes or with which Spain has no effective exchange of tax information, the threshold that triggers the obligation to disclose the acquisition or transfer of shares in a Spanish company is reduced to 1% (and successive multiples thereof).

Moreover, pursuant to Article 30.6 of Royal Decree 1362/2007, in the context of a takeover bid, the following transactions should be notified to the CNMV: (i) any acquisition reaching or exceeding 1% of the voting rights of the Company, and (ii) any increase or decrease in the percentage of voting rights held by holders of 3% or more of the voting rights in the Company. The CNMV will immediately make public this information.

Our bylaws and internal regulations do not provide for any significant shareholdings disclosure requirements more stringent than those established under Royal Decree 1362/2007 (as mentioned in this sub section) and the Market Abuse Regulation.

In addition, certain provisions of Spanish law require clearance by the competent authority prior to the acquisition of a qualifying holding (*participación significativa*) of a Spanish bank by any individual or legal person. The SSM Regulation confers this authority exclusively to the ECB.

Pursuant to Article 17 of Act 10/2014, any individual or legal person (either individually or in concert with other persons) which decides (i) to acquire, directly or indirectly, a qualifying holding in a Spanish bank or (ii) to further increase, directly or indirectly, a holding in a Spanish bank (such as the Company), as a result of which the proportion of voting rights or share capital held by such individual or legal person would exceed 20%, 30% or 50% of the total voting rights or share capital or the Spanish bank would become under the control of such individual or legal person (in the terms of Article 42 of the Spanish Commercial Code), shall notify the ECB (through the Bank of Spain) in advance of such transaction.

A qualifying holding for these purposes is defined as a direct or indirect holding in a Spanish bank representing 10% or more of the share capital or the voting rights, or enabling to exercise a significant influence over the management of that bank (such as, in any case, the capacity to appoint or dismiss a board member).

The Bank of Spain shall assess the proposed transactions of qualifying holdings and will submit a proposed decision to the ECB so that the latter may decide whether or not to oppose the transaction.

Pursuant to Article 25 of Royal Decree 84/2015, the final decision on the possible opposition to the transaction shall be taken within 60 business days after the Bank of Spain acknowledges the receipt of the relevant application submitted by the potential acquirer. The opposition to the transaction may be based on finding the acquirer unsuitable on the basis of its commercial or professional reputation or its solvency or the transparency of its corporate structure, among other reasons. If no such formal decision is issued within such 60 business day period, it will be understood that there is no opposition to the transaction.

If the acquisition is carried out and (i) if the required prior notice is not given to the Bank of Spain, or (ii) if the acquisition is carried out before the 60 business days period referred to above, or (iii) if the ECB opposes the transaction, then there shall be the following consequences: (i) the voting rights corresponding to the acquired shares may not be exercised or, if exercised, will be deemed null, (ii) the ECB may seize control of the bank or replace its board of directors, and (iii) a fine may be imposed on the acquirer.

Furthermore, any natural or legal person (either individually or in concert with other persons) who has acquired, directly or indirectly, a holding in a Spanish bank so that the proportion of the voting rights or of the share capital held reaches or exceeds 5%, must immediately notify in writing the Bank of Spain and the relevant Spanish bank, indicating the size of the acquired holding.

In addition, pursuant to Article 21 of Act 10/2014, any natural or legal person who has taken a decision to dispose, directly or indirectly, of a qualifying holding in a Spanish bank must first notify the Bank of Spain, indicating the size of his/her intended reduced holding. Such a person shall likewise notify the Bank of Spain if he/she has taken a decision to reduce his/her qualifying holding so that the proportion of the voting rights or of the share capital held would fall below 20%, 30% or 50% or so that the bank would cease to be under his/her control. Failure to comply with these requirements may lead to sanctions being imposed on the defaulting party.

Spanish banks are required, on becoming aware of any acquisitions or disposals of holdings in their capital that cause holdings to exceed, or fall below, the thresholds referred to above, to inform the Bank of Spain of such acquisitions or disposals.

The Bank of Spain also requires each Spanish bank to provide it quarterly with a list of all its shareholders which are financial institutions or which are not financial institutions but have shares registered in its own name holding at least 0.25% of the bank's share capital by reference to the last day of each calendar quarter.

If the ECB determines at any time that the influence of a person who owns a qualifying holding of a bank may adversely affect that bank's management or financial situation, it may: (i) suspend the voting rights of such person's shares; (ii) seize control of the bank or replace its board of directors; or (iii) in exceptional circumstances revoke the bank's license. A fine may be also be levied on the person owning the relevant qualifying shareholding.

Disclosure requirements applicable to directors and senior managers

In accordance with the Market Abuse Regulation, persons discharging managerial responsibilities (including, but not limited to, members of the board of directors and senior management), as well as persons closely associated with them, must report both to the Company and the CNMV every transaction conducted on their own account relating to the Shares, or debt instruments of the Company, or to derivatives or other financial instruments linked thereto, no later than three business days after the date of the transaction. This reporting obligation shall apply to any subsequent transaction once a total amount of €20,000 has been reached within a calendar year.

The transactions that must be notified according to the foregoing also include (i) the pledging (other than pledges, or similar security interests, of financial instruments in connection with the depositing of the financial instruments in a custody account, unless and until such time that such pledge or other security interest is designated to secure a specific credit facility) or lending of financial instruments by or on behalf of a person discharging managerial responsibilities or a person closely associated with such a person; (ii) transactions undertaken by persons professionally arranging or executing transactions or by another person on behalf of a person discharging managerial responsibilities or a person closely associated with such a person; and (iii) transactions made under a life insurance policy where (a) the policyholder is a person discharging managerial responsibilities or a person closely associated with such a person; (b) the investment risk is borne by the policyholder; and (c) the policyholder has the power or discretion to make investment decisions regarding specific instruments in that life insurance policy or to execute transactions regarding specific instruments for that life insurance policy.

We maintain a list of all persons discharging managerial responsibilities and persons closely associated with them. Persons discharging managerial responsibilities shall notify the persons closely associated with them of the reporting obligation described above in writing and shall keep a copy of this notification. In addition, a person discharging managerial responsibilities within the Company shall not conduct any transactions on its own account or for the account of a third party, directly or indirectly, relating to the Shares or debt instruments of the Company or to derivatives or other financial instruments linked to them, during a closed period of 30 calendar days before the announcement of an interim financial report or a year-end report which the Company is obliged to make public, unless so permitted by the Company (i) on a case-by-case basis due to the existence of exceptional circumstances, such as severe financial difficulty, which require the immediate sale of the Shares; or (ii) due to the characteristics of the trading involved for transactions made under, or related to, an employee share or saving scheme, qualification or entitlement of shares, or transactions where the beneficial interest in the relevant security does not change.

Disclosure of shareholder agreements

The Spanish Companies Act and the Securities Market Act require the parties to disclose shareholder agreements that affect the exercise of voting rights at a general shareholders' meeting of a listed company (such as the Company upon a potential Admission) or contain restrictions or conditions in connection with the transfer of shares or exchangeable or convertible bonds. The execution, amendment or extension of such shareholders agreements shall be immediately disclosed by the relevant parties to us and to the CNMV and a copy of the relevant provisions of the agreement which affect the exercise of the voting rights and/or restrict or place conditions upon the transfer of shares shall be filed with the relevant Commercial Registry. The shareholder agreements will be disclosed as communications of inside information (*comunicación de información privilegiada*) or communications of other relevant information (*comunicación de otra información relevante*), as applicable, on the CNMV's website. If these requirements are not fulfilled, any provisions contained in such shareholder agreements which affect the exercise of voting rights and/or restrict or place conditions upon the transfer of shares, will not be effective.

Upon request by the interested parties, the CNMV may waive such requirement to report and publish the agreement when publishing the shareholders' agreement could cause harm to the affected company.

As of the date of this Registration Document, there are no such shareholders' agreements affecting the Company.

Disclosure of net short positions

In accordance with EU Regulation No 236/2012 of the European Parliament and of the Council, of March 14, 2012, on short selling and credit default swaps (as further supplemented by several delegated regulations), as amended by Commission Delegated Regulation (EU) 2022/27, any person or legal entity holding net short positions on shares admitted to trading in the Spanish Stock Exchanges (such as the Company upon a potential Admission) must report them to the CNMV if they reach or fall below 0.1% of the relevant issuer's share capital and each 0.1% above that.

Positions reaching or falling below 0.5% (and each 0.1% above that) shall be publicly disclosed by the CNMV.

The notification or disclosure mentioned above shall be made no later than 3:30 p.m. (CET) on the following trading day.

The disclosure is mandatory even if the same position has been already notified to the CNMV in compliance with transparency obligations previously in force in that jurisdiction.

The information to be disclosed is set out in Table 1 of Annex I of Delegated Regulation 826/2012, according to the format approved as Annex II of this Delegated Regulation. The information will be published, where appropriate, on a web page operated or supervised by the CNMV.

Moreover, pursuant to Regulation 236/2012, when the CNMV considers that (i) there are adverse events or developments that constitute a serious threat to financial stability or to market confidence (serious financial, monetary or budgetary problems, which may lead to financial instability, unusual volatility causing significant downward spirals in any financial instrument, etc.); and (ii) the measure is necessary and will not be disproportionately detrimental to the efficiency of financial markets in view of the advantages sought, it may, following consultation with the ESMA, take any one or more of the following measures:

- impose additional notification obligations by either (a) reducing the thresholds for the notification of net short positions in relation to one or several specific financial instruments; and/or (b) requesting the parties involved in the lending of a specific financial instrument to notify any change in the applicable premiums; and
- restrict short selling activities by either prohibiting or imposing conditions on short selling.

In addition, according to Regulation 236/2012, where the price of a financial instrument has fallen significantly during a single day in relation to the closing price on the previous trading day (10% or more in the case of a liquid share), the CNMV may prohibit or restrict short selling of financial instruments for a period not exceeding the end of the trading day following the trading day on which the fall in price occurs.

Finally, Regulation 236/2012 also vests powers to ESMA in order to take similar measures to those described above in exceptional circumstances, when the purpose of these measures is to deal with a threat affecting several Member States and the competent authorities of these Member States have not taken adequate measures to address it.

Share repurchases

Pursuant to the Spanish Companies Act, we may only repurchase our own shares derivatively within certain limits and in compliance with the following requirements:

- the repurchase must be previously authorized by the general shareholders’ meeting in a resolution establishing the maximum number of Shares to be acquired, the means by which they will be acquired, the minimum and maximum acquisition price (if any) and the duration of the authorization, which may not exceed five years from the date of the resolution; and
- the repurchase, including the Shares already acquired and currently held by us or any person or company on our behalf, does not reduce our net equity below the aggregate amount of our share capital and non-distributable reserves.

For these purposes, net equity means the amount resulting from the application of the criteria used to draw up our financial statements, minus the amount of profits directly allocated to such net equity, plus the amount of uncalled subscribed share capital and the total amounts of nominal value and issue premium for the subscribed share capital registered as a liability in our accounting.

In addition:

- the aggregate nominal value of the Shares directly or indirectly repurchased by us, together with the aggregate nominal value of the treasury shares already held by us and our subsidiaries, shall not exceed 10% of our total share capital; and
- the repurchased Shares shall always be fully paid-up. The repurchase shall be deemed null and void if: (i) the Shares are partially paid-up (except in case of free repurchase); or (ii) the Shares entail ancillary obligations.

Treasury shares lack voting and economic rights. Economic rights bound to treasury shares (which are dividend distributions and liquidation rights) shall, except for the right to bonus shares, be distributed among our shareholders in proportion to their respective shareholdings.

Furthermore, pursuant to the Spanish Companies Act, the audited financial statements of a company must include a reference to any treasury shares.

The Market Abuse Regulation establishes rules in order to ensure the integrity of European Community financial markets and to enhance investor confidence. The Market Abuse Regulation provides an exemption from the market manipulation rules regarding share buy-back programs by companies listed on a stock exchange in an EU Member State. Regulation 2016/1052 implements the Market Abuse Regulation with regard to the regulatory technical standards for the conditions applicable to buy-back programs and stabilization measures. According to the provisions included in the Regulation 2016/1052, in order to benefit from the exemption, an issuer implementing a buy-back program must comply with the following requirements:

(a) Prior to the start of trading in a buy-back program, the issuer must ensure the adequate disclosure of the following information:

- The purpose of the program. According to Article 5.2 of the Market Abuse Regulation, the buy-back program must have as its sole purpose (a) to reduce the capital of the issuer; (b) to meet obligations arising from debt financial instruments convertible into equity instruments; or (c) to meet obligations arising from share option programs, or other allocations of shares, to employees or to members of the administrative, management or supervisory bodies of the issuer or of an associate company;
- The maximum pecuniary amount allocated to the program;
- The maximum number of shares to be acquired; and
- The period for which authorization for the program has been granted.

(b) The issuer must ensure that the transactions relating to the buy-back program meet the conditions included in Article 3 of the Regulation 2016/1052. Specifically, that the purchase price is not higher than the higher purchase price of the last independent trade and the highest current independent purchase bid on the trading venue where the purchase is carried out. Furthermore, issuers must not purchase on any trading day more than 25% of the average daily volume of shares on the corresponding trading venue.

(c) Issuers shall not, for the duration of the buy-back program, engage on (a) selling of own shares; (b) trading during the closed periods referred to in Article 19.11 of the Market Abuse Regulation; and (c) trading where the issuer has decided to delay the public disclosure of inside information in accordance with the Market Abuse Regulation.

Moreover, pursuant to Article 77 of CRR, prior authorization from the ECB is needed in order to reduce, redeem or repurchase own shares. Rules and conditions to obtain such authorization are regulated by Article 77 of CRR and further developed by Commission Delegated Regulation (EU) 241/2014.

Furthermore, according to Royal Decree 1362/2007, if an acquisition or series of acquisitions of the Company's ordinary shares reaches or exceeds or causes our and our affiliates' holdings to reach or exceed 1% of the voting shares, the Company must notify its final holding of treasury shares to the CNMV. If such threshold is reached as a result of a series of acquisitions, such reporting obligation will only arise after the closing of the acquisition which, taken together with all acquisitions made since the last of any such notifications, causes our and our affiliates' holdings to exceed 1% of the voting shares. Sales and other transfers of the treasury shares will not be deducted in the calculation of such threshold. This requirement would also apply if the shares were acquired by one of our majority owned subsidiaries.

On November 27, 2019, the CNMV approved Circular 2/2019 on liquidity contracts entered into by issuers with financial institutions for the management of treasury shares. This regulation entered into force on March 10, 2020 and repealed and replaced the CNMV's Circular 1/2017, introducing new limitations on the daily volume that financial intermediaries can trade under the liquidity agreement and new rules which must be complied with by financial intermediaries in their operations in auction periods.

As of the date of this Registration Document, neither we nor our subsidiaries hold any shares of the Company. On January 14, 2022, our general shareholders' meeting of the Company authorized the acquisition of treasury stock for a period of five years from such date, up to a maximum of 10% of the share capital of the

Company as of such date. The minimum and maximum acquisition price will be the nominal value and the stock market price or the latest stock market price available at the time the transaction is executed or agreed to be executed, increased by up to 10%.

ADDITIONAL INFORMATION

Documents on display

Copies of the following documents will be available for inspection in physical form for the term of this Registration Document during business hours on weekdays at the Company's offices at Plaza de Basilio Paraíso, 2, 50008 Zaragoza, Spain:

(i) deed of incorporation of the Company;

(ii) bylaws of the Company;

(iii) The Ibercaja Foundation Protocol; and

(iv) this Registration Document (which, following its approval by the CNMV, will also be available on the CNMV's website at www.cnmv.es and on the Company's website at www.ibercaja.com).

The document referred to in (iii) above will also be available for inspection in physical form at the CNMV's premises in Madrid (Calle Edison, 4, 28006 Madrid), Barcelona (Calle de Bolívia, 56, 08018 Barcelona) and Bilbao (Calle Heros 3, 48009 Bilbao).

Information on the Company

The Company's legal name is Ibercaja Banco, S.A., and it operates under the commercial name "Ibercaja Banco".

Ibercaja Banco was incorporated in Spain on September 22, 2011 as a public limited company (*sociedad anónima*) for an unlimited period of time, and is registered with the Commercial Registry of Zaragoza under volume 3,865, book 0, sheet 1, page Z-52186 and as a credit institution with the Special Registry at the Bank of Spain (*Registro Administrativo de Bancos y Banqueros del Banco de España*) under number 2,085. Ibercaja Banco holds Spanish tax identification number (NIF) A-99319030, its LEI code is 549300OLBL49CW8CT155 and its website is www.ibercaja.com.

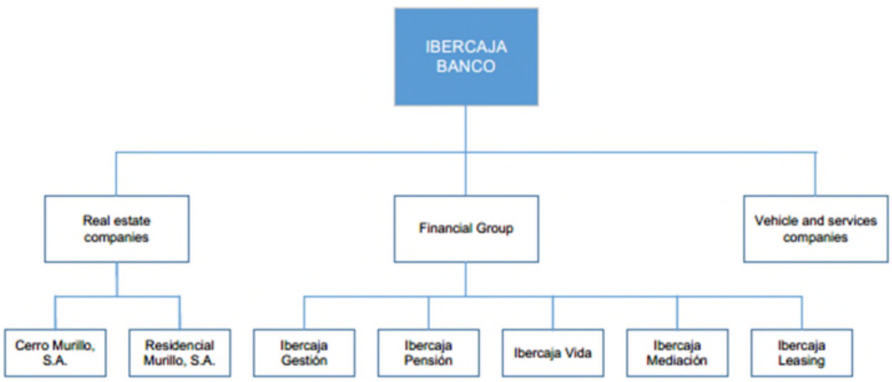
The principal legislation under which the Company operates is the Spanish Companies Act and the regulations thereunder, as well as special applicable banking regulations. The registered office of the Company is at Plaza de Basilio Paraíso, 2, 50008 Zaragoza, Spain, and its phone number is +34 976 76 79 83.

The financial year end of the Company is December 31.

The Company is domiciled in Zaragoza, Spain, and resident in Spain for tax purposes.

Ibercaja Banco forms part of the consolidated group of which the Ibercaja Foundation is the parent company.

The following chart shows the structure of the Ibercaja Group as of the date of this Registration Document:



As of December 31, 2021, the Group had 14 fully consolidated subsidiaries (entities over which we have control, due to direct or indirect ownership of more than 50% of the relevant entity's voting rights or, if the percentage of ownership is lower than 50%, because we are party to agreements with other shareholders of the relevant entity that give us the majority of voting power), two jointly-controlled entities (entities which, without being dependent, are under contractual agreements of joint control, whereby decisions on the relevant activities are taken unanimously by the entities that share the control and are entitled to their net assets) and 14 associates (entities over which we exercise significant influence but which are neither subsidiaries nor jointly-controlled entities). All of our subsidiaries, jointly-controlled entities and associates are incorporated in Spain.

The following table shows the fully consolidated subsidiaries as of December 31, 2021, showing our direct, indirect and total effective ownership percentages. As of December 31, 2021, we held the same direct, indirect and total percentage as regards the voting rights of each of our fully consolidated subsidiaries as we did as of December 31, 2020:

Group fully consolidated subsidiaries	**% Interest**		
	Direct	**Indirect**	**Total**
Badajoz Siglo XXI, S.L.	100.00%	—	100.00%
CAI Inmuebles, S.A. (en liquidación)[(1)]	100.00%	—	100.00%
Cerro Goya, S.L.	98.70%	1.30%	100.00%
Cerro Murillo	99.77%	0.23%	100.00%
Ibercaja Gestión de Inmuebles, S.L.	100.00%	—	100.00%
Ibercaja Gestión	99.80%	0.20%	100.00%
Ibercaja Leasing	99.80%	0.20%	100.00%
Ibercaja Mediación	100.00%	—	100.00%
Ibercaja Pensión	100.00%	—	100.00%
Ibercaja Vida	100.00%	—	100.00%
Ibercaja Cajaragón, S.A.U.	100.00%	—	100.00%
Inmobinsa Inversiones Inmobiliarias, S.A.	—	100.00%	100.00%
Residencial Murillo	100.00%	—	100.00%
Ibercaja Connect, S.L.	95.00%	5.00%	100.00%

AUDIT REPORT ON CONSOLIDATED FINANCIAL STATEMENTS ISSUED BY AN INDEPENDENT AUDITOR

Translation of a report and financial statements originally issued in Spanish. In the event of discrepancy, the Spanish-language version prevails

To the shareholders of IBERCAJA BANCO, S.A.:

Audit report on the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Ibercaja Banco, S.A. (the parent) and its subsidiaries (the Group), which comprise the consolidated balance sheet at December 31, 2021, the consolidated income statement, the consolidated statement of other comprehensive income, the consolidated statement of changes in equity, the consolidated cash flow statement, and the notes thereto, for the year then ended.

In our opinion, the accompanying consolidated financial statements give a true and fair view, in all material respects, of consolidated equity and the consolidated financial position of the Group at December 31, 2021 and of its financial performance and its consolidated cash flows, for the year then ended in accordance with International Financial Reporting Standards, as adopted by the European Union (IFRS-EU), and other provisions in the regulatory framework applicable in Spain.

Basis for opinion

We conducted our audit in accordance with prevailing audit regulations in Spain. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report.

We are independent of the Group in accordance with the ethical requirements, including those related to independence, that are relevant to our audit of the consolidated financial statements in Spain as required by prevailing audit regulations. In this regard, we have not provided non-audit services nor have any situations or circumstances arisen that might have compromised our mandatory independence in a manner prohibited by the aforementioned requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Domicilio Social: C/ Raimundo Fernández Villaverde, 65. 28003 Madrid - Inscrita en el Registro Mercantil de Madrid, tomo 9.364 general, 8.130 de la sección 3ª del Libro de Sociedades, folio 68, hoja nº 87.690-1, inscripción 1ª. Madrid 9 de Marzo de 1.989. A member firm of Ernst & Young Global Limited.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our audit opinion thereon, and we do not provide a separate opinion on these matters.

Estimate of impairment losses due to credit risk of the loans and advances portfolio at amortized cost

Description

The estimate of impairment loss allowances for credit risk is one of the most significant and complex areas in the process of preparing the Group's financial information requiring, in some respects, a high degree of judgment and estimation. Notes 2.3, 11.5 and 11.6 to the accompanying consolidated financial statements describe the relevant principles and criteria applied by the Group for estimating the aforementioned impairment losses, which is computed individually or collectively, and the related amounts.

The methodology used for the individual estimates primarily entails identifying and classifying impaired exposures or those in which there has been a significant increase in risk since their approval, examining forecasts of the debtors' future cash flows or, where appropriate, the estimates of the realizable value of the related guarantees.

Collective estimates are carried out mainly through internal models, based on historical experience of customer behavior, which take into account aspects such as:

- segmentation of transactions into homogeneous groups according to credit risk (type of borrower, purpose of the transaction, type of guarantee, etc.);
- identification and classification of impaired exposures or exposures where there has been a significant increase in risk since their approval;
- risk parameters such as exposure, probability of default and severity rate, as well as the construction of scenarios and forecasts on future macroeconomic variables such as GDP, unemployment rate or house price;
- the value of the real estate property-based collateral, for which the Group has developed an internal methodology that estimates the recoverable amount from the appraised values, considering the sale costs and estimated discounts based on the Group's experience in the sale of assets of similar characteristics.

The Group periodically recalibrates these models to improve their predictive capacity, modifying the scenarios and algorithms used, and, in addition, performs retrospective tests ("backtesting") and monitoring on the main parameters used in these models.

The COVID-19 pandemic has been negatively affecting the Spanish economy since 2020. To mitigate the impacts of COVID-19, the Spanish Government has launched initiatives to help the sectors and customers most affected through various measures such as granting government-backed credit lines, payments moratoriums without penalty or the flexibility of financing and liquidity lines. All these factors increase the uncertainty surrounding the variables considered by the Group when quantifying impairment losses, such as future trends in its clients' businesses, the realizable value of collateral associated with approved transactions, the macroeconomic variables considered, etc. Accordingly, as of December 31, 2021, the Group has considered the adverse effects of COVID-19 on impairment and credit risk provisions, supplementing impairment losses resulting from internal models with certain temporary additional adjustments deemed necessary to reflect the particular characteristics of borrowers or portfolios that may not be identified by the models.

As a result, we determined the estimate of impairment loss allowances for credit risk on the portfolio of loans and advances at amortized cost to be a key audit matter.

Our response

Our audit approach in this area included analyzing and evaluating the internal control system related to the processes of estimating impairment loss allowances for credit risk, as well as performing substantive procedures for the estimated losses both individually and collectively.

Regarding the internal control system, our tests focused on:

- Evaluating the adequacy of the Group's various policies and procedures, as well as the internal models for credit risk and valuation of real estate assets (collateral) to determine if they are in line with applicable regulatory requirements.
- Reviewing the procedures established by the Group for its credit approval process to assess the debtor's ability to pay, based on the analysis of future cash flows and related financial information.
- Verifying the criteria for classifying exposures ("staging") according to their credit risk, taking into account the age of the arrears, the terms and conditions of the transaction, including refinancing or restructuring, and the controls or monitoring alert established by the Group.
- Verifying relevant controls established by the Group for the management and valuation of the collateral related credit transactions.
- Assessing whether the process of periodically reviewing borrower files to monitor their classification and identify impairment, where applicable, is carried out in accordance with the monitoring and alert system defined by the Group.
- Evaluating the consideration given to the issues observed in the Reports issued by the Internal Validation Department in relation to the recalibration and contrast tests of the internal models.
- Verifying the reliability and consistency of the data sources used and evaluating the integrity, the data used, and the related control and management processes.

Additionally, we carried out substantive procedures consisting mainly of:

- Carrying out detailed tests on a sample of files whose process of estimating impairment losses is carried out individually to evaluate the correct classification, as well as estimating and recording, where appropriate, the corresponding impairment losses. This sample has included borrowers from the economic sectors most affected by COVID-19 and/ or that have obtained government aid as a result of the pandemic.

- Carrying out selective checks on internal models, with the involvement of our financial risk specialists, in relation to: i) the reasonableness of the methodology for estimating risk parameters and the criteria for segmenting customers or operations; (ii) the correct classification of credit transactions based on whether there has been a significant increase in credit risk or a default event; (iii) the completeness and reliability of the information used for the estimation of impairment; (iv) historical loss rates due to impairment of credit risk; v) the reasonableness of the assumptions and assumptions made about the future evolution of the macroeconomic variables in the different scenarios used.
- Carrying out, for a sample of transactions, checks on the related underlying data to validate the key information used in collectively estimating impairment losses.
- Recalculating collectively estimated impairment losses.
- Assessing the need for additional adjustments to the expected losses identified by the internal models, as well as a review of the reasonableness of the assumptions and information used by the Group to estimate such adjustments.

Assessment of goodwill recoverability

Description

In note 2.16.1 to the accompanying consolidated financial statements, the Group describes the relevant principles and criteria applied by management to verify whether there is impairment of the goodwill recorded by the Group as at December 31, 2021 amounting to €145 million (see Note 16.1).

This goodwill is associated with a single cash generating unit (CGU) that encompasses the Group's entire business. To estimate the recoverable amount of the CGU, the Group uses business projections that are based on assumptions about the future developments in the economic situation and other key business assumptions (credit trends, delinquency, sources of financing, interest rates or capital requirements), as well as the discount rate and long-term growth rate used to discount expected cash flows. The assessment of the CGU and some of these assumptions are carried out by management's experts.

Given that the assessment impairment of goodwill is a process that requires a high degree of judgment and estimation, especially in the current context of Covid-19, we determined this to be a key audit matter.

Our response

Our audit procedures, which have been carried out with the collaboration of our valuation experts, included primarily:

- Reviewing the criterion used for defining the Group's CGU to which the goodwill is associated.
- Evaluating methodology used for estimating impairment of goodwill.
- Reviewing the annual valuation report prepared by an external expert, which serves as a basis for Management to carry out its assessment of the impairment of goodwill and evaluate the assumptions used to determine the discount rate and growth in perpetuity.
- Evaluating assumptions used by the Management to construct financial projections (growth rates, interest rate curves, cost of risk, capital requirements, etc.).

- Reviewing the sensitivity analysis carried out by the Management to evaluate the impact of changes in the main variables on the result of the impairment test.

Finally, we assessed whether the attached consolidated financial statements contain the breakdowns required by the regulatory financial reporting framework applicable to the Group.

Valuation of liabilities for life insurance contracts

Description	The Group's life insurance busines entails marketing life insurance and unit linked products. The Group's balance sheet at December 31, 2021 shows an amount of 5,326 million euros under "Liabilities covered by insurance contracts – Mathematical Provision" (see Note 20), which represents the difference between the actuarial present value of the Company's future obligations and those of the policyholder or, where appropriate, the policyholder, with respect to the life insurance contracted on that date. In note 2.19 to the accompanying consolidated financial statements, the Group describes the relevant principles and criteria applied by the Group to record liabilities associated with insurance contracts. The determination of the mathematical provision is an estimate that requires the use of actuarial methods and calculations, based on the use of a high number of individual calculations, as well as the use of a series of key data, depending on the type of product marketed, i.e., the technical interest rate, the mortality tables, the sex and age of the policyholder, the duration of the contract and the guaranteed capital. Likewise, compliance with the precepts developed by article 33 of the Regulation on Private Insurance must be taken into account for savings insurance, where it has been defined. As a result, we determined the valuation of the mathematical provision to be a key audit matter.
Our response	Our main audit procedures, which involved the collaboration of our actuarial specialists, included: ► Obtaining an understanding of the process of calculating and recording the mathematical provision in accordance with the nature of the products marketed by the Company, as well as with the regulatory requirements and common practices of the insurance sector. ► Evaluating the design and operational effectiveness of the relevant controls that mitigate the risks of material misstatement identified in determining the mathematical provision. ► Reviewing the reconciliation of the base data of actuarial calculations with accounting data. ► Evaluating the adequacy of the calculations of mathematical provision to assess whether they are in line with the current mortality and survival tables required of insurance and reinsurance entities, in accordance with the resolution of December 17, 2020. ► Evaluating the application of the provisions of section 2 of Additional Provision 5 of Royal Decree 1060/2015 regarding the adaptation of the temporary structure of rates.

- Evaluating, on a sample basis, the reasonableness of the data used when calculating the mathematical provision, i.e., the technical interest rate, mortality tables, sex and age of the policyholder, the duration of the contract and the guaranteed capital.
- Recalculating the mathematical provision for a sample of products marketed by the Company. Verifying the application of interest rates in accordance with the specifications of Article 33 of the private insurance law (ROSSP). For those product portfolios subject to immunization by flows and, verifying compliance with the terms and conditions of articles 2 and 3 of Order EHA/339/2007 for a sample of portfolios as of September of the audited year.
- Verifying the assumptions of expenses detailed in the technical notes and their adequacy, by comparing them with the actual expenses incurred.

Finally, we assessed whether the attached consolidated financial statements contain the breakdowns required by the regulatory financial reporting framework applicable to the Group.

Assessment of the Group´s ability to recover deferred tax assets

Description

In accordance with the Group's accounting policies, as explained in note 2.14 to the attached consolidated financial statements, deferred tax assets are only recognized if it is considered likely that sufficient tax gains will be obtained in the future to make them effective. As indicated in note 25 to the accompanying consolidated financial statements, at December 31, 2021, the Group maintains deferred tax assets amounting to 1,292 million euros, of which the recovery of 634 million euros is guaranteed through the monetization mechanisms established in Royal Decree Law 14/2013 and Article 130 of the Corporate Tax Law.

Management evaluates the Group's ability to recover deferred tax assets based on estimates of future tax gains, made on the basis of the Group's financial projections and business plans, and considering the applicable tax regulations. Given that the assessment of the Group's ability to recover deferred tax assets is a complex process that requires a high degree of judgment and estimation, we determined this process to be key audit matter.

Our response

We carried out audit procedures, with the involvement of our valuation and tax specialists, to evaluate the assumptions considered by management to estimate the recovery of deferred tax assets, focusing our analysis on the economic and financial assumptions used by the Group to estimate future tax benefits. In addition, we carried out a sensitivity analysis of the results and evaluated whether the attached consolidated financial statements contain the breakdowns required by the regulatory financial reporting framework applicable to the Group.

Automated financial information systems

Description

The continuity of the Group's business processes is highly dependent on its technological infrastructure. The rights of access to the different systems are granted to their employees for the purpose of allowing the development and fulfillment of their responsibilities. These access rights are relevant, as they are designed to ensure that changes to applications are properly authorized, implemented, and monitored, and are key controls to mitigate the potential risk of fraud or error as a result of application changes.

In this context, it is necessary to assess aspects of the effectiveness of the general internal control framework of information systems. As a results, we determined the assessment of the risks associated with the information systems and the control environment implemented to be a key audit matter.

Our response	In the context of our audit and with, with the collaboration of our information systems specialists, we evaluated the general controls of the information systems relevant to the preparation of financial information. In this regard, our work consisted primarily testing the general access controls to the systems, changes in the management and development of applications, and security, as well as the application controls established in the key processes for financial reporting, with the collaboration of our computer specialists.

Other issues

On March 3, 2021, other auditors issued their Audit report on the consolidated annual accounts for the year 2020 in which the expressed a favorable opinion.

Other information: consolidated management report

Other information refers exclusively to the 2021 consolidated management report, the preparation of which is the responsibility of the parent company's directors and is not an integral part of the consolidated financial statements.

Our audit opinion on the consolidated financial statements does not cover the consolidated management report. Our responsibility for the consolidated management report, in conformity with prevailing audit regulations in Spain, entails:

a. Checking only that the consolidated non-financial statement was provided as stipulated by applicable regulations and, if not, disclose this fact.

b. Assessing and reporting on the consistency of the remaining information included in the consolidated management report with the consolidated financial statements, based on the knowledge of the Group obtained during the audit, in addition to evaluating and reporting on whether the content and presentation of this part of the consolidated management report are in conformity with applicable regulations. If, based on the work we have performed, we conclude that there are material misstatements, we are required to disclose this fact.

Based on the work performed, as described above, we have verified that the information referred to in paragraph a) above is provided as stipulated by applicable regulations and that the remaining information contained in the consolidated management report is consistent with that provided in the 2021 consolidated financial statements and its content and presentation are in conformity with applicable regulations.

Responsibilities of the parent company´s directors and the audit and compliance committee for the consolidated financial statements

The directors of the parent company are responsible for the preparation of the accompanying consolidated financial statements so that they give a true and fair view of the equity, financial position and results of the Group, in accordance with IFRS-EU, and other provisions in the regulatory framework applicable to the Group in Spain, and for such internal control as they determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the parent company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The audit and compliance committee is responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with prevailing audit regulations in Spain will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with prevailing audit regulations in Spain, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the audit and compliance committee of the parent company regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the audit and compliance committee of the parent company with a statement that we have complied with relevant ethical requirements, including those related to independence, and to communicate with them all matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the audit and compliance committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters.

We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

European single electronic format

We have examined the digital files of the European single electronic format (ESEF) of Ibercaja Banco, S.A. and its subsidiaries for the 2021 financial year that comprise an XHTML file which includes the consolidated annual accounts for the financial year and XBRL files with tagging performed by the entity, which will form part of the annual financial report.

The directors of Ibercaja Banco, S.A. are responsible for presenting the annual financial report for the 2020 financial year in accordance with the formatting and markup requirements established in the Delegated Regulation (EU) 2019/815 of 17 December 2018 of the European Commission (hereinafter the ESEF Regulation).

Our responsibility is to examine the digital files prepared by the Parent company´s directors, in accordance with legislation governing the audit practice in Spain. This legislation requires that we plan and execute our audit procedures in order to verify whether the content of the consolidated annual accounts included in the aforementioned digital files completely agrees with that of the consolidated annual accounts that we have audited, and whether the format and markup of theses accounts and of the aforementioned files has been effected, in all material respects, in accordance with the requirements established in the ESEF Regulation.

In our opinion, the digital files examined completely agree with the audited consolidated annual accounts, and these are presented and have been marked up, in all material respects, in accordance with the requirements established in the ESEF Regulation.

Additional report to the audit and compliance committee

The opinion expressed in this audit report is consistent with the additional report we issued to the audit committee on March 8, 2022.

Term of engagement

The ordinary general shareholders' meeting held on December 19, 2019 appointed us as auditors for three years, commencing on January 1, 2021.

Ibercaja Banco, S.A. and subsidiaries

Notes to the consolidated annual accounts for the financial year ended 31 December 2021

Contents

Ibercaja Banco, S.A. and subsidiaries

Notes to the consolidated annual accounts for
the financial year ended 31 December 2021

1. Introduction, basis of presentation and other information

1.1 Introduction

Ibercaja Banco, S.A. (hereinafter, Ibercaja Banco, the Bank or the Company), is a credit institution, 88.04% owned by Fundación Bancaria Ibercaja (hereinafter, the Foundation), subject to the rules and regulations issued by the Spanish and European Union economic and monetary authorities.

Ibercaja Banco's registered office is located at Plaza de Basilio Paraíso 2 and it is filed at the Zaragoza Companies Registry in volume 3865, book 0, sheet 1, page Z-52186, entry 1. It is also registered in the Bank of Spain Special Register under number 2085. Its corporate webpage (electronic headquarters) is www.ibercaja.com, on which its bylaws and other public information can be viewed. During the 2021 financial year the Entity has not changed its corporate name.

Its corporate purpose extends to all manner of general banking activities, transactions, business, contracts and services permitted under prevailing law and regulations, including the provision of investment and auxiliary services.

In addition to the operations carried out directly, the Bank is the parent of a group of dependent entities that engage in various activities and which, together with it, make up the Ibercaja Banco Group (hereinafter, the "Group" or the Ibercaja Banco Group).

Likewise, the Foundation also prepares consolidated financial statements of the Group of which it is the parent (Ibercaja Group). Its registered office is at Joaquín Costa, nº 13, Zaragoza. At the date of preparation of these consolidated financial statements, the Foundation had not prepared either individual or consolidated financial statements.

Note 45 contains the Bank's balance sheets, income statements, statements of recognised income and expense, statements of total changes in equity and statements of cash flows for the years ended 31 December 2021 and 2020, in accordance with the same accounting policies and measurement bases applied in the Group's consolidated financial statements.

The Ibercaja Banco Group's consolidated financial statements for 2020 were approved by the Bank's shareholders at the Annual General Meeting held online on 15 April 2021. The resolutions adopted by this governing body were adopted by written vote and without a meeting, in accordance with article 40.2 of Royal Decree-Law 8/2020 of 17 March on extraordinary urgent measures to deal with the economic and social impact of Covid-19.

Both the consolidated financial statements and the financial statements of the Parent Company and its subsidiaries for the year ended 31 December 2021 are pending approval, if applicable, by their respective General Shareholders' Meetings. However, the Bank's directors believe that they will be approved without any modifications.

1.2 Basis of presentation of the consolidated financial statements

These consolidated financial statements were prepared in accordance with the accounting policies, accounting standards and measurement bases applicable under the International Financial Reporting Standards as adopted by the European Union (EU-IFRSs) and considering Bank of Spain Circular 4/2017 of 27 November ("Circular 4/2017"), and subsequent modifications; accordingly, they fairly present the Group's equity and financial condition at 31 December 2021, and the consolidated results of its operations and consolidated cash flows during the year then ended.

The consolidated financial statements of the Group for 2021 have been prepared by the directors of the Company, at a meeting of its Board of Directors held on 25 February 2022, applying the consolidation criteria and the accounting principles and policies and measurement bases described in Note 2, so as to present fairly the consolidated equity and consolidated financial condition of the Group as at 31 December 2021 and the consolidated results of its operations and its consolidated cash flows for the year then ended.

These financial statements, unless stated otherwise, are prepared in thousands of euros from the accounting records kept by the Company and by other entities included in the Group. However, given that the accounting policies and valuation standards used by some of the Group companies may differ from those used in preparing the Group's financial statements for 2021, adjustments and reclassifications have been made as necessary in the consolidation process to make said accounting policies and valuation standards consistent with the EU-IFRS used by the Company.

1.3 Estimates made

The consolidated financial statements corresponding to 2021 contained opinions and estimates have been made on certain occasions to quantify the value of certain assets, liabilities, revenues, expenses and obligations recorded therein. These estimates basically relate to:

- impairment losses on certain financial assets and the estimate of the guarantees associated with them (Notes 10 and 11), in particular as regards the changes arising from changes in portfolios as a result of specific business models, the consideration of the "significant increase in credit risk (SICR)" and "default", and the introduction of forward-looking information,

- the assumptions used in the actuarial calculation of post-employment remuneration liabilities and commitments and other long-term obligations to employees (Notes 2.13, 38.2 and 38.3), and those used to calculate liabilities arising under insurance contracts (Note 20),

- the measurement of goodwill and other intangible assets (Note 16).

- useful life of tangible and intangible assets (Notes 2.15 and 2.16),

- the valuation of real estate assets (Notes 2.18, 17 and 18),

- the probability of occurrence of those events deemed to be contingent liabilities and, where appropriate, the provisions required to cover such events (Notes 2.20 and 21),

- the fair value of certain financial assets (Note 26),

- the income tax expense and the recoverability of deferred tax assets (Notes 2.14, 25.3 and 25.4),

- the valuation of investments in joint ventures and associates (Note 13),

- the determination of returns from investments in joint ventures and associates (Note 13) and

- the discount rate used in the valuation of the lease liability (Note 2.10).

The appearance of the Coronavirus Covid-19 in China and its global expansion to a large number of countries has caused the viral outbreak to be classified as a global pandemic by the World Health Organisation since 11 March 2020. The pandemic has adversely affected and continues to adversely affect the global economy and global activity, leading to an unprecedented economic recession; however, signs of economic recovery are beginning to emerge during 2021, despite ongoing uncertainties.

Considering the complexity of the markets due to their globalisation, the effects of government measures to curb the spread of the virus and the progress of the vaccination campaigns as a medical treatment against the virus, the consequences for the Group's operations still subject to a significant degree of uncertainty and will depend largely on the course and extent of the pandemic in the coming months, as well as on the ability of all economic actors affected to react and adapt.

In view of this situation, the Group has focused its attention on guaranteeing continuity in the operational security of the business as a priority and monitoring the impacts on the Group's business and risks (such as impacts on results, capital or liquidity).

In addition, the Group adopted a series of measures to support its main stakeholders from the beginning of the pandemic. In this respect, the Group's long-term strategic purpose and priorities remain unchanged. In order to mitigate the impact associated with Covid-19, various European and international bodies, mainly in 2020, issued a number of pronouncements aimed at allowing greater flexibility in the implementation of the accounting and prudential frameworks.

The main impacts of the Covid-19 pandemic on the Group's consolidated financial statements have been considered in the estimates mentioned above and their effects are detailed in the accompanying selected explanatory notes including an explanation of the events or changes that are, if any, material to the explanation of the changes in the consolidated financial condition from 31 December 2020 to 31 December 2021.

The estimates described above have been made on the basis of the best available information as at 31 December 2021 on the events analysed, taking into account the above-mentioned uncertainty resulting from the coronavirus health crisis. For this reason, future events may require them to be modified in the coming years, which would occur in accordance with prevailing regulations, prospectively recognising the effects of the change in estimate in the consolidated financial statements for the years in question.

1.4 Comparative information relating to 2020

Under the regulations in force, the information contained in these consolidated financial statements for 2020 is presented exclusively for the purpose of comparison with the information for 2021, in order to aid understanding.

1.5 Agency agreements

Neither at year-end 2021 and 2020 nor at any time during the two years did the Group have any "agency agreements" in force within the meaning of article 21 of Royal Decree 84/2015, of 13 February.

1.6 Investments in credit institutions

Pursuant to article 28 of Royal Decree 84/2015, neither at 31 December 2021 and 2020 nor at any time during the two years did the Group own direct or indirect equity interests in the capital of Spanish or foreign credit institutions exceeding 5% of the share capital or voting rights of such entities.

1.7 Capital management and requirements

1.7.1 Regulatory framework

In December 2010, the Basel Committee on Banking Supervision approved a new regulatory framework (Basel III), which increased the capital requirements with the best quality instruments, seeking consistency and a uniform application by entity and country. The new agreement improves the transparency and comparability of capital ratios and includes new prudential tools, in the area of liquidity and leverage.

The European Union transfers these agreements to its legal system (Basel III) through the Directive 2013/36/EU (CRD-IV) of the European Parliament and of the Council of 26 June 2013, relating to access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms and Regulation (EU) No. 575/2013 (CRR) of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms, applicable since 1 January 2014.

In order to adapt the Spanish legal system to international regulatory requirements, Law 10/2014, of 26 June, was approved on the regulation, supervision and solvency of credit institutions, together with Royal Decree 84/2015, of 13 February, enacting the aforementioned law, continuing the transposition commenced by Royal Decree-Law 14/2013, of 29 November, and Bank of Spain Circulars 2/2014 and 3/2014, stipulating the regulatory options for the applicable requirements during the transition period.

In 2015, new regulations were published that complement the (EU) Regulation No. 575/2013 (CRR) on aspects relating to shareholders' equity, liquidity, the risks of Pillar I and capital requirements.

Also, in February 2016, Bank of Spain Circular 2/2016, of 2 February, was published for credit institutions, on supervision and solvency, which completes the adaptation of the Spanish legal system to Directive 2013/36/EU and to Regulation (EU) no. 575/2013.

In June 2019, the European governing bodies enacted the new capital regulatory framework, which modifies the previous one (CRR/CRD IV). The reform package included the adoption of Directive (EU) 2019/878 of the European Parliament and of the Council of 20 May 2019 amending Directive 2013/36/EU as regards exempt entities, financial holding companies, mixed financial holding companies, remuneration, supervisory measures and powers, and capital preservation measures (hereinafter CRD V), and Regulation (EU) 2019/876 of the European Parliament and of the Council of 20 May 2019 amending Regulation (EU) 575/2013 as regards the leverage ratio, NSFR, eligible capital and liability requirements, counterparty credit risk, market risk, exposures to central counterparties, exposures to collective investment undertakings, large exposures, and reporting and disclosure requirements, and Regulation (EU) 648/2012 ('CRR II').

However, the economic disruptions caused by the Covid-19 pandemic and the exceptional containment measures taken by the authorities have significantly affected the main economic players.

In June 2020, Regulation (EU) 2020/873 of the European Parliament and of the Council entered into force, amending both the CRR and CRR II as regards certain adaptations made in response to the pandemic.

The most relevant new feature is the extension for two years of the transitional provisions on the application of IFRS 9, limiting the negative effect that a possible increase in provisions for expected credit losses may have on institutions' capital. It also lays down, on a temporary basis, a prudential filter on exposures to sovereign bonds, aimed at mitigating the consequences of financial market turmoil on the solvency of institutions.

In addition, the amendments also include bringing forward the introduction of some measures to reduce capital requirements for banks in relation to certain loans secured by pensions or salaries, and loans to SMEs and infrastructure.

In December 2020, Commission Delegated Regulation (EU) 2020/2176 was published amending the existing deduction for intangible assets associated with in-house software development. This amendment, introduced in order to further support the transition to a more digitised banking sector, allows software assets that have been prudently valued and whose value is not significantly affected by the resolution, insolvency or liquidation of an institution not to be deducted directly from the capital of financial institutions.

At the same time, it should be recalled that, the TLAC Term Sheet was implemented, established internationally by the FSB (Financial Stability Board) within the European capital framework, called MREL (Minimum Requirement for own funds and Eligible Liabilities) in such a way that systemic banks have to comply with the MREL requirements in Pillar 1. Within this package of changes, amendments to the Single Resolution Mechanism Regulation and the Bank Recovery and Resolution Directive (SRMR and BRRD, respectively) were also included and replaced with SRMR II and BRRD II, where MREL requirements are established by Pillar 2 for all banks in resolution, whether systemic or not, and the resolution authority sets requirements on a case-by-case basis.

The minimum requirements for own funds established by the prevailing regulations (Pillar I) are calculated based on the Group's exposure to credit, exchange rate, market and operational risks and risks of financial assets and liabilities held for trading. Also, the Group is subject to compliance with risk concentration limits.

1.7.2 Quantitative information

The Ibercaja Banco Group determines its capital and leverage ratios in accordance with the provisions of Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 relating to the taking up and pursuit of the business of credit institutions and their prudential supervision (CRD IV), and Regulation (EU) No 575/2013 on prudential requirements for credit institutions and investment firms (CRR) as updated by Regulation (EU) 2019/876 of the European Parliament and of the Council (CRR II) and Regulation (EU) 2020/873 of the European Parliament and of the Council (CRRII Quick Fix).

At 31 December 2021, the Ibercaja Banco Group was complying with the minimum solvency ratios (Basel Pilar I) demanded by current regulations, as detailed in the following table:

	2021	**2020**
Capital ratios		
Eligible common equity tier 1 (thousands of euros) (a)	2,420,441	2,484,668
Additional eligible equity tier 1 (thousands of euros) (b)	350,000	350,000
Eligible equity tier 2 (thousands of euros) (c)	500,000	500,000
Risks (thousands of euros) (d)	18,051,935	18,248,449
Common equity tier 1 ratio (CET 1) (A)=(a)/(d)	13.41%	13.62%
Additional tier 1 capital ratio (AT 1) (B)=(b)/(d)	1.94%	1.92%
Tier 1 capital ratio (Tier 1) (A)+(B)	15.35%	15.53%
Tier 2 capital ratio (Tier 2) (C)=(c)/(d)	2.77%	2.74%
Total capital ratio (A)+(B)+(C)	**18.12%**	**18.27%**

	2021	**2020**
Market leverage		
Tier 1 capital (thousands of euros) (a)	2,770,441	2,834,668
Exposure (thousands of euros) (b)	46,071,860	45,295,546
Leverage ratio (a)/(b)	**6.01%**	**6.26%**

Pursuant to the requirements established in the CRR, credit institutions must comply at all times with a CET 1 ratio of 4.5%, Tier I of 6% and a total capital ratio of 8%. However, under the new regulatory framework, the regulators may request the entities to maintain additional levels of capital.

Accordingly, the European Central Bank (ECB) has notified its decision with respect to the prudent minimum capital requirements, once the results of the Supervisory Review and Evaluation Process (SREP) are known.

This decision means that Ibercaja Banco must maintain, from 1 March 2022, a phased-in common equity tier 1 (CET1) ratio of 8.21% and a total capital ratio of 12.65%. This total capital requirement includes the minimum demanded for Pillar 1 (4.5% CET 1 and 8% of total capital), the Pillar 2 requirement (1.21% for CET1 and 2.15% for total capital) and the capital conservation buffer (2.5%).

At 31 December 2021, Ibercaja Banco's consolidated ratios, CET1 of 13.41% and total capital of 18.12%, stood at 5.20% and 5.47%, respectively, above the regulatory requirements established for 2022.

The reconciliation of accounting and eligible shareholders' equity is as follows:

	Thousands of euros	
	2021	**2020**

Deferred tax assets dependent on future earnings	*(265,415)*	*(263,693)*
Additional tier 1 capital (AT1)	**350,000**	**350,000**
Additional Tier 1 capital instruments	350,000	350,000
Deductions of additional tier 1 capital instruments (AT 1)	-	-
Tier 2 capital (T2)	**500,000**	**500,000**
Subordinated financing, subordinated loans and others	500,000	500,000

With regard to the minimum requirement for own funds and eligible liabilities (MREL), the current rules set the deadline for compliance with the requirements set out below as 1 January 2024, with an intermediate requirement to be met by 1 January 2022, and expressing these requirements as a percentage of both risk-weighted assets and the leverage ratio.

The binding interim requirement of 1 January 2022 has been set at 15.38% RWAs, excluding the capital dedicated to cover the Combined Buffer Requirement (2.5% RWAs). The requirement in terms of MREL leverage ratio is 5.21%.

Given the structure of own funds and eligible liabilities of the resolution group, as at 31 December 2021, the MREL ratio in terms of RWAs is 15.89%, excluding the capital dedicated to cover the Combined Buffer Requirement (2.5% RWAs) and 7.21% in terms of leverage ratio, 6.38% excluding the waiver to not compute central bank exposures which expires in March 2022, complying with the aforementioned MREL requirements.

As of 1 January 2024, Ibercaja Banco must have a percentage of own funds and eligible liabilities of 18.59%, not including the capital dedicated to cover the Combined Buffer Requirement (2.5% RWAs). The requirement in terms of leverage ratio will be 5.21%.

These requirements are in line with Ibercaja's financing plan.

Both this information and further details on regulatory capital and risk-weighted assets can be found in the Prudential Relevance Report (Pillar III Disclosures) published on the Company's website.

1.7.3 Capital management

The objective of Basel's Pilar II is to ensure an adequate relationship between the Group's risk profile and the own funds that it effectively holds. Accordingly, the Group performs a recurring capital self-assessment process in which:

- it applies processes for the identification, measurement and aggregation of risks;
- it determines the capital needed to cover them; in addition to the minimum own funds, it maintains a level in keeping with the risks inherent in its activity, in the economic climate in which it operates, in the management and control of such risks, in its governance and internal audit systems and in its strategic business plan;
- it plans capital at medium term; and
- It establishes the own funds objectives.

The Group sets a capital objective enabling it to permanently maintain sufficient means regarding prudential minimum requirements and capital guidelines, ensuring an adequate relationship between its risk profile and its own funds.

The Group's total capital needs were estimated through the aggregation of capital requirements associated with each risk.

In order to adequately plan the Group's future capital requirements, it forecast capital sources and consumption on the basis of business performance and expected results over a three-year period.

Likewise, the Group estimates projected capital levels in line with stress scenarios.

1.7.4 Information of Prudential Relevance

In order to comply with market disclosure requirements, the Board of Directors approved the information of prudential relevance disclosure policy (Basel Pillar III); consequently, the Ibercaja Group will make such information public on its web page prior to the publication and approval of the 2020 consolidated financial statements (Note 1.1).

1.7.5 Credit ratings granted

The credit ratings granted to Ibercaja Banco, S.A. are as follows:

	Date		Short-term		Long-term		Outlook	
Company	**2021**	**2020**	**2021**	**2020**	**2021**	**2020**	**2021**	**2020**
Standard&Poors	June 2021	Abril 2020	B	B	BB+	BB+	Stable	Negative
Moody's	October 2021	Abril 2020	NP	NP	Ba1	Ba3	Stable	Stable
Fitch Ratings	September 2021	September 2020	B	B	BB+	BB+	Positive	Negative

During 2021, the rating agencies have revised upwards their outlook for Ibercaja as a result of the improvement in the health situation caused by Covid-19 and the improvement in the Bank's fundamentals.

On 27 January 2022, S&P Global Ratings affirmed the credit rating of "BB+" of Ibercaja Banco, S.A., maintaining the outlook unchanged at "Stable".

1.7.6 Stock market launch

On 31 March 2020, RDL 11/2020 was published, adopting urgent additional measures in the social and economic field to deal with Covid-19. In the current context of the health, social and economic crisis, the banking foundations' welfare projects take on even greater importance. Therefore, and with the aim of guaranteeing these welfare projects, Law 26/2013 of 27 December on savings banks and banking foundations was amended to extend by two years the divestment period foreseen for banking foundations with majority shareholdings in credit institutions.

In this context, the Bank maintains its plan to go public within the new deadline laid down by current regulations, before the end of 2022, and is taking the appropriate and necessary actions to achieve this objective.

1.8 Single Resolution Fund and Deposit Insurance Fund

1.8.1 Single Resolution Fund

Law 11/2015, of 18 June, together with its regulatory enactment through Royal Decree 1012/2015, led to the transposition into Spanish law of Directive 2014/59/EU, establishing the new framework for the resolution of credit institutions and investment services companies, and regulated the creation of the National Resolution Fund.

As part of the enactment of such regulation, on 1 January 2016, the Single Resolution Fund entered into force, which was established as a financing instrument for the Single Resolution Board, which is the European authority that will take resolution decisions to effectively implement the resolution measures adopted. The Single Resolution Fund will be maintained with the contributions made by investment services companies and credit institutions availing themselves of such Fund.

Under Regulation (EU) 2015/63, the calculation of the contribution of each entity will take into account the proportion that it represents with respect to the total aggregate of total liabilities of all banks included, net of own funds and the guaranteed amount of the deposits, adjusted with the Company's risk profile.

In 2021, the expense incurred as a result of the contribution to this body was 13,794 thousand euros (11,094 thousand euros in 2020; Note 37).

1.8.2 Deposit Guarantee Fund

The Company is a member of the Deposit Guarantee Fund of Credit Institutions.

Royal Decree-Law 2606/1996, of 20 December, amended by Royal Decree 1012/2015, of 6 November, stipulates that the Management Committee of the Deposit Guarantee Fund will calculate the annual contributions of the companies included in the Deposit Guarantee Fund for Credit Institutions.

The Management Committee of the Deposit Insurance Fund for credit institutions, pursuant to Article 6 of Royal Decree-Law 16/2011 and Article 3 of Royal Decree 2606/1996, set the contribution to be made for all institutions adhering to the deposit insurance sub-fund at 1.8 per thousand of the amount of insured deposits as at 30 June each year. Each institution's contribution is calculated on the basis of the amount of insured deposits and their risk profile, taking into account indicators such as capital adequacy, asset quality and liquidity, introduced by Bank of Spain Circular 5/2016 of 27 May, as amended by Circular 1/2018 of 31 January. Likewise, the contribution to the securities guarantee compartment was set at 2/1000 of 5% of the guaranteed amount of the securities and other financial instruments at 31 December each year.

The expense for ordinary contributions referred to in the preceding paragraph accrue in full at year end, accordingly, at that time, the balance sheet included the liability for the contribution paid in the first quarter of the subsequent year (44,786 thousand euros and 46,229 thousand euros at 31 December 2021 and 2020, respectively; Note 22).

On 30 July 2012, the Management Committee of the Deposit Guarantee Fund agreed to cover an extraordinary shortfall between Fund members, to be paid by each entity through ten equal annual instalments. The amount of the shortfall corresponding to the Bank is 81,460 thousand euros (ten annual instalments of 8,146 thousand euros each).

In 2021, the expense incurred as a result of all contributions made to this body was 52,094 thousand euros (53,774 thousand euros in 2020). This amount was recognised under "Other operating expenses" (51,819 thousand euros and 53,269 thousand euros in 2021 and 2020, respectively; Note 37) and "Interest costs" (275 thousand euros and 505 thousand euros in 2021 and 2020, respectively; Note 29).

1.9 Minimum reserve ratio

At 31 December 2021, and throughout 2021, the Company complied with the minimums required by the minimum reserve ratio. In compliance with the legal obligations stipulated by the European Central Bank, the daily average of the minimum reserves to be held at 31 December 2021 amounted to 359,127 thousand euros (362,377 thousand euros at 31 December 2020).

1.10 Events after the reporting period

Between the closing date and the date of preparation of the consolidated financial statements and the corresponding explanatory notes, no events have occurred that significantly affect them, other than those mentioned in the various explanatory notes included in this document.

1.11 Changes in accounting estimates and criteria

In 2021, amendments were made to the accounting regulations applicable to the Group with respect to those applied in the previous period. The changes considered to be most important are listed below.

The mandatory standards, amendments and interpretations for the years commencing on 1 January 2021 were as follows:

Standards and Interpretations	Title
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16	Reform of interest rate benchmarks – phase 2
Amendments to IFRS 4	Deferral of IFRS 9
Amendments to IFRS 16	Covid-19-related rent concessions

Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16: Reform of interest rate benchmarks – phase 2

In the context of the global reform of interbank offered rates (IBORs), the IASB initiated a project to revise the main IFRS standards concerned in two phases.

The first phase focused on the accounting impacts prior to the replacement of interest rate indices and materialised with the publication in September 2019 of certain amendments to IAS 39, IFRS 9 and IFRS 7, which were endorsed at European level on 17 January 2020 and became effective on 1 January 2020. These amendments provided exceptions so that institutions would not discontinue their hedging relationships in an environment of uncertainty about the long-term viability of some benchmark interest rates.

On 27 August 2020, the IASB issued the second phase of the above-mentioned benchmark reform, which involves amendments to IAS39, IFRS 9, IFRS 7, IFRS 4 and IFRS 16, to ensure that the financial statements best reflect the economic effects of this reform. These amendments focus on the accounting for financial instruments once a new risk-free reference rate ("RFR") has been introduced and focus on cases where an entity replaces the previous benchmark interest rate with an alternative reference rate and on the effects of the change on the financial statements. Specifically:

- Changes in contractual cash flows: an entity need not derecognise or adjust the carrying amount of financial instruments due to changes required by the adopted reform, but should update the effective interest rate to reflect the change to the alternative reference rate;

- Hedge accounting: an entity need not discontinue hedge accounting simply because of changes required by the reform if the hedge meets other hedge accounting criteria; and

- Disclosures: the institution shall disclose information on the new risks arising from the reform and how it manages the transition to alternative reference rates.

A significant portion of the Group's financial assets and liabilities are tied to the Euribor index, and the existing hedging relationships are based on this index, with no positions tied to other indices.

The Euribor index has not been replaced, but only its calculation methodology has been changed to date. Therefore, the impacts of the overall reform itself are small and the disclosures of information envisaged in both the first and second phases do not apply to it.

Amendment to IFRS 4 Insurance contracts: deferral of IFRS 9

Currently, with IFRS 4 Insurance Contracts, the date of application of IFRS 9 Financial Instruments for entities applying that standard is 1 January 2021. The IASB has decided to delay the effective date for these entities to periods beginning on or after 1 January 2023 in order to align it with the effective date of IFRS 17. This standard has had no impact on the Group.

Amendment to IFRS 16 – Leases: Covid-19-related rent concessions

The IASB has extended the deadline to take advantage of the exemption that allows lessees not to account for concessions in leases as a lease modification if they are a direct consequence of Covid-19. This exemption has had no impact on the Group as the Bank has not received any concessions on its rents as a result of Covid-19.

Application of the exemption will remain optional and applies to rent concessions made up until 30 June 2022.

Standards and interpretations that are not effective as at 31 December 2021

At the date of preparation of these consolidated financial statements, new International Financial Reporting Standards and Interpretations had been published which were not mandatory as at 31 December 2021. Although, in some cases, the International Accounting Standards Board ("IASB") allows the application of the amendments prior to their effective date, the Group has not applied them early.

Standards and Interpretations	**Title**
Amendment to IAS 16 (*)	Property, plant and equipment – Revenue earned prior to intended use
Amendment to IAS 37 (*)	Onerous contracts – Cost of fulfilling a contract
Amendment to NIIF 3 (*)	Reference to the Conceptual Framework
Annual improvements to IFRS (*)	Cycle 2018-2020
IFRS 17 (**)	Insurance contracts
Amendment to IAS 1 (**)	Classification of liabilities as current or non-current and breakdown of accounting policies
Amendment to IAS 8 (**)	Definition of Accounting Estimates
Amendment to IAS 12 (**)	Taxes
Amendment to IFRS 10 and IAS 28	Sales or contributions of assets between an investor and its associate/joint venture (***)

(*) Applicable for financial years beginning on or after 1 January 2022.
(**) Applicable for financial years beginning on or after 1 January 2023.
(***) Applicable for annual periods beginning on or after 1 January 2016, however, the IASB decided to postpone the effective date.

Amendments to IAS 16 Property, Plant and Equipment: Revenue earned prior to intended use

These amendments, issued by the IASB in May 2020, prohibit the deduction from the acquisition cost of assets of the amount of sales made from the asset while it is being brought to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, these amounts shall be recorded in the income statement.

These amendments are effective for periods beginning on or after 1 January 2022 and are to be applied retrospectively only to assets brought to the location and condition necessary for them to be capable of operating in the manner intended by management as of the beginning of the earliest period presented in the financial statements in which they are first applied. The Group does not expect any material impact from these changes.

Amendments to IAS 37 - Costs of Fulfilling a Contract

These amendments, issued by the IASB in May 2020, detail the costs that entities have to include when assessing whether a contract is onerous or loss-making. The amendments propose a "direct cost approach". Costs directly related to a contract for the delivery of goods or services include both incremental costs as well as an allocation of costs directly related to the contract. General and administrative costs are not directly attributable to a contract and are therefore excluded from the calculation unless they are explicitly passed on to the counterparty in accordance with the contract.

These amendments are effective for periods beginning on or after 1 January 2022. The Group does not expect any material impact from these changes.

Amendments to IFRS 3 Business Combinations: Reference to the conceptual framework

These amendments, issued by the IASB in May 2020, are intended to replace the reference to the 1989 Framework with a reference to the 2018 Framework, without significantly changing its requirements.

The IASB also added an exception to the requirements of IFRS 3 to avoid 'day 2' gains or losses that may arise from liabilities or contingent liabilities (within the scope of IAS 37 or IFRIC 21) if they are incurred separately. At the same time the IASB has decided to clarify the existing IFRS 3 guidance for the recognition of contingent assets which will not be affected by the references to the Conceptual Framework.

These amendments are effective for periods beginning on or after 1 January 2022 and are applied prospectively. The Group does not expect any impact from these changes.

Minor amendments to several IFRS and the annual cycle of minor improvements to various IFRS 2018- 2020 (IFRS 1 - First-time application of IFRS, IFRS 9 - Financial Instruments, IAS 41 - Agriculture and amendments to illustrative examples in IFRS 16 - Leases).

The IASB issued minor amendments and improvements to several IFRS to clarify the wording or correct minor consequences, oversights or conflicts between the requirements of the Standards. The affected standards are: IFRS 3 Business Combinations, IAS 16 Property, Plant and Equipment, IAS 37 Provisions, IFRS 9 Financial Instruments, IFRS 16 Leases, IFRS 1 First-time Adoption of IFRS and IAS 41 Agriculture.

The amendments will come into force on 1 January 2022. They are not expected to have a significant impact on the Group's consolidated financial statements.

IFRS 17 Insurance contracts

IFRS 17 sets out the principles that an entity shall apply in accounting for insurance contracts. This new standard replaces IFRS 4, introducing profound changes in the way insurance contracts are accounted for, with the aim of achieving greater consistency and increasing comparability between entities.

In contrast to IFRS 4, the new standard establishes minimum requirements for grouping insurance contracts for recognition and measurement purposes, determining units of account by considering three levels: portfolios (contracts subject to similar risks and managed together), cohorts and onerousness.

As regards the measurement model, the new standard provides for several methods, with the General Model (Building Block Approach) being the default method to be applied for the valuation of insurance contracts, unless the conditions for applying one of the other two methods are met: the Variable Fee Approach and the Premium Allocation Approach.

With the implementation of IFRS 17, the valuation of insurance contracts will be based on a model using updated assumptions at each closing. The General Model requires entities to value insurance contracts at the total of:

– compliance flows, comprising the estimate of future cash flows discounted to reflect the time value of money, the financial risk associated with future cash flows and a risk adjustment for non-financial risk;

– and the contractual service margin, representing the expected unearned benefit of insurance contracts, which is recognised in the entity's income statement as the service is provided in the future, rather than at the time of estimation.

Amounts recognised in the income statement shall be broken down into income from insurance activity, expenses from the provision of insurance service and insurance finance income or expenses. The income from the insurance business and the expenses of providing the insurance service shall exclude any investment component. Revenue from insurance activity shall be recognised over the period in which the entity provides insurance cover.

This standard will apply to financial years beginning on or after 1 January 2023 (with a minimum of one year's comparative information), pending its adoption by the European Commission.

The Group has an IFRS 17 implementation project in place with the objective of identifying the impacts and changes necessary to adapt to the new criteria. This standard will have an impact on information systems, accounting and IT tools for information generation. The implementation of the standard and the assessment of the impact on the Group's financial statements is still ongoing and preliminary figures are not yet available.

To date, the Group specified the structure of the financial statements to comply with the measurement, presentation and disclosure requirements of IFRS 17. In addition, the Group is in the process of specifying the chart of accounts to link the output information from the measurement engines with the accounting events and thus be able to subsequently set relevant parameters in the insurance company's accounting tool.

Amendments to IAS 1 and IFRS Practice Paper 2 - Disclosures about Accounting Policies and amendments to IAS 1 on Classification of Non-current or Current Liabilities

In these amendments, the IASB has included guidance and examples for applying judgement in identifying which accounting policies are material. The amendments replace the criterion of disclosing significant accounting policies with material accounting policies. It also provides guidance on how the concept of materiality should be applied in deciding which accounting policies are material.

Regarding classification as non-current or current liabilities, these amendments clarify that liabilities are classified as current or non-current, depending on the rights that exist at the end of the reporting period. The classification is not affected by the entity's expectations or events after the end of the period. The amendment also clarifies what is meant in IAS 1 when it refers to the "settlement" of a liability.

These amendments are effective for periods beginning on or after 1 January 2023. The Group is currently analysing the impact of these changes.

Amendments to IAS 8 – Definition of Accounting Estimates

In these amendments, the IASB has introduced a new definition of "accounting estimate", which clarifies the difference between changes in accounting estimates, changes in accounting policies and corrections of errors.

These amendments are effective for periods beginning on or after 1 January 2023. The Group does not expect any material impact from these changes.

Amendments to IAS 12 "Income Taxes"

The IASB issued an amendment to IAS 12 to clarify how deferred taxes arising on transactions such as leases or decommissioning obligations should be accounted for.

The amendments clarify that entities are required to recognise deferred taxes on leases and decommissioning provisions. The purpose of the amendments is to reduce diversity in the reporting of deferred tax information on such transactions. The amendments will come into force on 1 January 2023. Earlier application is permitted and it is not expected to have a significant impact on the consolidated financial statements of the Ibercaja Group.

IFRS 10 and IAS 28 (Amendment) *"Sale or allocation of assets between an investor and its associates or joint ventures"*

These amendments clarify the accounting treatment of sales and contributions of assets between an investor and its associates and joint ventures, which will depend on whether the non-monetary assets sold or contributed to an associate or joint venture constitute a "business". The investor will recognise the full gain or loss when the non-monetary assets constitute a "business". If the assets do not comply with the definition of "business", the investor recognises the gain or loss in line with the interests of other investors. The amendments will only be applied when the investor sells or contributes assets to its associates or joint ventures.

Originally, these modifications to IFRS 10 and IAS 28 were applied prospectively and were effective for the annual financial years that began on 1 January 2016. However, at the end of 2015, the IASB took the decision to postpone their date of validity (without setting a new specific date), as it is planning a more extensive review that may result in the simplification of accounting for these transactions and other accounting aspects for associates and joint ventures.

The Group is analysing the impact that these standards, amendments and interpretations may have on the consolidated financial statements and at the date of preparation of these consolidated financial statements it is considered that their entry into force will not have a material impact.

2. Accounting policies and measurement bases

The most significant accounting policies and principles and measurement bases applied in the preparation of these consolidated financial statements are described below. There are no accounting principles or measurement bases that, having a material effect on the 2021 financial year, have not been applied in its preparation.

2.1 Business combinations and consolidation

2.1.1 Subsidiaries

"Subsidiaries" are those companies over which the Entity has the ability to exercise control, which is generally, although not exclusively, expressed by the direct or indirect ownership of over 50% of the voting rights of the investees or, if this percentage is less or nil, by the existence of other circumstances or agreements that grant control. In line with the prevailing standards, control is deemed to be the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Appendices I and II provide significant information on these companies.

The financial statements of the subsidiaries are consolidated using the equity method, as defined by the prevailing standards: Consequently, all balances arising from transactions performed between companies consolidated using this method and which were significant were eliminated on consolidation. Also, the ownership interest of third parties in:

- the Group's equity was recognised under "Non-controlling interests" in the consolidated balance sheet,

- consolidated profit for the year was posted under “Profit/(loss) attributable to non-controlling interests” in the consolidated income statement.

The results of subsidiaries acquired during the year are consolidated only taking into consideration those relating to the period between the date of acquisition and the close of that year. Alongside this, the results of subsidiaries disposed of during the year are consolidated only taking into consideration those relating to the period between the start of that year and the disposal date.

2.1.2 Joint ventures

“Jointly controlled entities” are deemed to be those companies, although not subsidiaries, with which contractual agreements of joint control exist, whereby decisions on significant activities are taken unanimously by the entities that share control, with entitlement to their net assets.

These entities are accounted for using the “equity method”.

Appendices I and II provide significant information on these companies.

2.1.3 Associates

An “associate” is an enterprise over which the Bank has significant influence, but with which it does not form a decision-making unit nor is it subject to joint control therewith. In general, although not exclusively, this capacity is presumed when a direct or indirect ownership interest is held equal to or exceeding 20% of the voting rights of the investee.

In the consolidated financial statements, associates are accounted for using the “equity method”, as defined by the prevailing standards:

If, as a consequence of the losses incurred, an associate reported negative equity, it would be recognised in the consolidated balance sheet as zero, since the Group is not obliged to provide it with financial support, and a provision for liability would be recognised under “Provisions” on the liability side of the balance sheet.

Appendices I and II provide significant information on these entities.

2.1.4 Structured entities

A structured entity is an entity designed in a manner that its voting and/or similar rights are not a decisive factor when determining control thereover.

When the Group forms or holds ownership interests in entities to transfer risks or to provide access to investments, it analyses whether it has control thereover and, therefore, whether the entities formed should be consolidated, mainly taking into account the following factors:

- Analysis of the Group’s influence over the entity’s activities that are important with a view to determining said entity’s profit.

- Implicit or explicit commitments to provide financial support to the entity.

- Significant exposure of the Group to the variable returns of the entity’s assets.

These entities include the so-called “asset securitisation funds” consolidated by the Group when contractual financial aid agreements exist (commonly used on the securitisations market). In virtually all securitisations performed by the Group, the transferred risks cannot be derecognised from the asset side of the balance sheet and the securitisation fund issues are recognised as liabilities on the Group’s balance sheet.

The Group does not hold any significant interests in the companies and investment and pension funds managed by the Group itself that would constitute a potential indication of control or meet the criteria for consolidation as defined in IFRS 10 Consolidated Financial Statements. Therefore, these investment vehicles marketed to customers are not consolidated.

Note 27.5 provides details of the Group’s structured entities and Appendix III provides details of the percentages held by the Group in the companies and mutual and pension funds managed by the Group.

As at 31 December 2021 and 2020 there were no unconsolidated structured entities.

2.1.5 Business combinations

A business combination is the union of two or more entities or independent economic units within a single entity or group of entities in which the acquirer obtains control over the other entities.

At the acquisition date, the acquirer will include the assets, liabilities and contingent liabilities of the acquired company in its financial statements, including the intangible assets not recognised by the latter, initially booking all of them at their fair value.

Any excess of the cost of the ownership interests in the entities over their corresponding carrying amounts acquired, adjusted on the date of the first business combination, are allocated as follows:

- Where they can be allocated to specific assets of the companies acquired, they are recognised by increasing the value of the assets (or reducing the value of the liabilities) whose fair values were higher (lower) than the carrying amounts at which they had been recognised in the acquired entities' balance sheets and whose accounting treatment is similar to that of the Group's equivalent assets (liabilities).

- If they are attributable to specific intangible assets, they are explicitly recognised in the consolidated balance sheet provided that their fair value at the date of acquisition can be measured reliably.

- The remaining non-attributable differences are recognised as goodwill, which is allocated to one or more specific cash-generating units.

Negative differences, once their amount has been established, are recognised in the consolidated income statement.

Acquisitions of non-controlling interests, subsequent to the takeover of the entity, are recognised as an addition to the business combination.

In those cases in which the cost of the business combination or the fair values assigned to the identifiable assets, liabilities or contingent liabilities of the acquired entity cannot be definitively determined, the initial recognition of the business combination will be deemed to be provisional. In any case, the process must be completed within a maximum of one year from the acquisition date, effective on that date.

2.2 Financial instruments

2.2.1 Initial recognition of financial instruments

Financial instruments are initially recognised in the consolidated balance sheet when the Group becomes a party to the contract originating them, in accordance with the provisions thereof. Specifically, debt instruments, such as credits and monetary deposits, are recognised from the date on which the legal right to receive or a legal obligation to pay cash, respectively, arises. Financial derivatives are generally recognised on their trading date.

Regular way purchases and sales of financial assets are recognised on the date on which the benefits, risks, rights and duties attaching to all owners are for the purchaser which, depending on the type of financial asset bought or sold, may be the trading date or the settlement or delivery date. In particular, transactions carried out in the spot currency market are recognised on the settlement date, transactions carried out with equity instruments traded on Spanish secondary securities markets are recognised on the trade date and transactions carried out with debt instruments traded on secondary Spanish securities markets are recognised on the settlement date.

2.2.2 Derecognition of financial instruments

A financial asset is derecognised from the consolidated balance sheet when any of the following circumstances occur:

- the contractual rights over the cash flows they generate have expired, or

- the financial asset is transferred, together with substantially all its risks and benefits, or

- the risks and rewards associated with the transferred financial asset are not substantially transferred or retained - this being the case of sales of financial assets with an acquired call or written put option that are not deeply in or out of the money, or securitisations in which the transferor assumes subordinated financing or other credit enhancements for part of the transferred asset and other similar cases - if the transferor does not retain control of the transferred financial asset, it is derecognised and any rights or obligations retained or created as a result of the transfer are recognised.

A financial liability is derecognised from the balance sheet when the related obligation is extinguished or when it is re-purchased by the Group.

2.2.3 Fair value and amortised cost of the financial instruments

The fair value of a financial instrument on a given date is taken to be the amount for which it could be bought or sold on that date by two knowledgeable interested parties in an arm's length transaction. The most objective and common reference for the fair value of a financial instrument is the price that would be paid for it on an organised, transparent and deep market ("quoted price" or "market price").

If there is no market price for a given financial instrument, its fair value is estimated on the basis of the price established in recent transactions involving similar instruments and, in the absence of this information, of valuation techniques commonly used by the international financial community, taking into consideration the specific features of the instrument to be measured and, particularly, the various types of risk associated with it.

Specifically, the fair value of the financial derivatives traded in organised, transparent and deep markets, included in the trading portfolios, is similar to their daily quoted price and if, for exceptional reasons, the quoted price at a given date cannot be determined, these financial derivatives are measured using methods similar to those used to measure OTC derivatives.

The fair value of OTC derivatives or derivatives traded in scantly deep or transparent organised markets is taken to be the sum of the future cash flows arising from the instrument, discounted to present value at the date of measurement ("present value" or "theoretical close") using valuation techniques recognised by the financial markets: "net present value" (NPV), option pricing models, etc.

All investments in equity instruments and contracts relating to such instruments are measured at fair value.

Amortised cost is the amount at which a financial asset or liability is measured at initial recognition, as corrected by principal repayments and by the cumulative amortisation of any difference between that initial amount and the maturity amount of the financial instrument, using the effective interest rate method. In the case of financial assets, amortised cost also includes any impairment loss allowances.

The effective interest rate is the discount rate that matches the gross carrying amount of a financial asset or the carrying amount of a financial liability to estimated cash flows over the expected life of the instrument, based on the contractual terms and disregarding expected credit losses. For fixed-rate financial instruments, the effective interest rate is the contractual interest rate set upon acquisition, adjusted by any fees and transaction costs that in accordance with current legislation form part of the effective yield or cost of the instrument and must therefore be considered in the calculation of the effective interest rate. For financial instruments at variable interest rates, the effective interest rate is estimated in a similar way to the transactions at a fixed interest rate, with the contractual interest rate of the transaction being recalculated on each review date, taking into account the changes to future cash flows from the transaction.

2.2.4 Classification and measurement of financial assets and liabilities

<u>Business model and contractual cash flow characteristics of financial assets</u>

Financial assets are classified into different categories depending on the business model under which they are managed and the contractual characteristics of their cash flows.

"Business model" means the way in which the Group manages its financial assets to generate cash flows, having regard to how groups of financial assets are managed together to achieve a specific objective. So a business model does not depend on the Group's intentions for an individual instrument but is determined for a wider set of instruments.

Specifically, the business models used by the Group consist of holding financial assets to collect their related contractual cash flows, selling such assets, or a combination of both approaches (mixed model):

- Holding financial assets to collect their related contractual cash flows: the Group's objective is to hold financial assets to collect their related contractual cash flows. In accordance with the requirements of the standard, debt instruments managed under this model are rarely or never sold, i.e., sales are merely accessory and subject to restrictions. However, the Group takes the view that sales of financial assets close to maturity and sales prompted by increased credit risk or the need to manage concentration risk are consistent with this business model.

- Sale of financial assets: the Group's objective is to realise gains and losses on financial assets.

- Mixed model: the Group's objective combines collection of contractual cash flows and realisation of financial assets. For financial instruments managed under the mixed model, sales are essential and not accessory; therefore, sales are unrestricted.

Based on the characteristics of its contractual cash flows, a financial asset is initially classified into one of the following categories:

- Financial assets whose contractual terms give rise, on specified dates, to cash flows consisting only of payments of principal and interest on principal outstanding.

- Other financial assets:

For the purposes of this classification, the principal of a financial asset is its fair value at the time of initial recognition. That amount may change over the life of the financial asset: for example, after repayments of principal. Interest is defined as the sum of the consideration for the time value of money, for financing and structural costs, and for the credit risk associated with the principal amount outstanding during a specified period, plus a profit margin.

Although, given the nature of the Group's business, almost none of its debt instruments give rise to cash flows other than payments of principal and interest, the Group monitors compliance with the contractual conditions of its financial assets (solely payments of principal and interest, SPPI test) and classifies such assets accordingly.

The main function of this test is to discriminate which products contained in the "holding of financial assets to receive their contractual cash flows" and "mixed model" business models can be measured at amortised cost and at fair value through other comprehensive income, or, conversely, must be measured at fair value through profit or loss.

The following are the judgements that guide the analysis to determine that the contractual cash flows of a financial instrument are only payments of principal and interest on the amount of principal outstanding:

- Principal: variables such as leverage or transaction currency are taken into account.

- Interest: account is taken of variables such as the time value of money, credit risk, other basic risks and costs such as liquidity risk or administrative costs associated with holding the financial asset and the profit margin.

- Contract terms that change the timing or amount of contractual cash flows.

- De minimis or non-genuine features: instruments that do not pass the SPPI test provided that the impact identified is considered to be insignificant or that the event affecting compliance with the SPPI test is extremely exceptional, highly abnormal and very unlikely to occur.

- Non-recourse assets: instruments with contractual cash flows that are described as principal and interest but that are not solely payments of principal and interest on the outstanding amount of principal.

- Contractually related instruments: situations in which an institution prioritizes payments to holders of multiple contractually related instruments that create credit concentration risk.

<u>Classification and portfolios of financial instruments for presentation and measurement purposes</u>

Financial instruments are mainly classified in the Group's consolidated balance sheet in accordance with the categories listed below:

- **Financial assets at amortised cost:** this category includes financial assets that are managed under a business model that holds assets to collect their contractual cash flows and whose contractual terms give rise to cash flows on specified dates, which are solely principal and interest payments on the outstanding principal amount.

  This portfolio includes financing to third parties from typical credit and lending activities, debt securities satisfying the two conditions set out above, and debts incurred by purchasers of goods and by users of services. Finance leases in which the Group acts as lessor are also included.

  Financial assets included in this category are initially measured at fair value, adjusted by transaction costs directly attributable to the acquisition of the financial asset. Following their acquisition, the assets classified under this category are measured at amortised cost, using the effective interest rate method.

Income and expenses from financial instruments at amortised cost are recognised on the following basis:

– Accrued interest is recognised under "Interest income" in the consolidated income statement, using the effective interest rate of the transaction on the gross carrying amount of the transaction (except in the case of non-performing assets, where the rate is applied to the net carrying amount).

– Other changes in value are recognised as income or expense when the financial instrument is derecognised; when it is reclassified; when there are exchange differences (see Note 2.5.3) and when there are impairment losses or gains due to subsequent recovery.

- **Financial assets at fair value through other comprehensive income:** this category mainly includes debt instruments acquired to manage the Group's balance sheet, which are managed using a mixed business model whose objective combines collection of contractual cash flows and sales, and whose contractual terms give rise to cash flows on specified dates, which are solely payments of principal and interest on the outstanding principal amount.

  In addition, the Group has opted to include in this portfolio the investments it holds in equity instruments that should not be classified to the portfolio of "Financial assets held for trading" and that, but for the use of this option, would be classified as financial assets mandatorily measured at fair value through profit or loss. This optional treatment is applied instrument by instrument.

  Instruments included in this category are initially measured at fair value, adjusted by transaction costs directly attributable to the acquisition of the financial asset. After acquisition, financial assets included in this category are measured at fair value through other comprehensive income.

  Income and expenses of financial assets at fair value through other comprehensive income are recognised on the following basis:

  – Accrued interest or, where applicable, accrued dividends are recognised in the consolidated income statement.

  – Exchange differences are recognised in the income statement in the case of monetary financial assets and in other comprehensive income, net of tax effects, in the case of non-monetary financial assets.

  – For debt instruments, impairment losses or gains on subsequent recovery are recognised in the consolidated income statement.

  – Other changes in value are recognised, net of tax effects, in other comprehensive income.

  When a debt instrument at fair value through other comprehensive income is derecognised, the cumulative gain or loss in other comprehensive income is reclassified to profit or loss for the period. However, when an equity instrument at fair value through other comprehensive income is derecognised, the amount of the gain or loss recognised in other comprehensive income is reclassified not to profit or loss but to an item of reserves.

- **Financial assets and liabilities at fair value through profit or loss:** this category includes the following financial instruments:

  – Financial assets and liabilities held for trading: financial assets or liabilities acquired to be sold in the short term or that are part of a portfolio of identified financial instruments managed jointly and for which there is evidence of a recent pattern of short-term profit-taking, together with derivative instruments that do not comply with the definition of a financial guarantee contract and have not been designated as hedging instruments, including those segregated derivatives of hybrid financial instruments pursuant to the regulations in force.

  The held-for-trading portfolio also covers short positions arising from sales of assets acquired temporarily under a non-optional reverse repurchase agreement or borrowed securities.

  – Financial assets not held for trading mandatorily measured at fair value through profit or loss: financial assets whose contractual terms do not pass the SPPI test, i.e., they do not give rise to cash flows consisting solely of principal and interest payments on the outstanding principal amount, as defined in the previous section.

  – Financial assets and liabilities designated at fair value through profit or loss: to avoid differences between the measurement bases of the related assets and liabilities, the Group classifies to this portfolio any debt instruments that are managed jointly with insurance contract liabilities ("Unit-linked"), measured at fair value.

A financial asset is classified to the portfolio of financial assets held for trading or the portfolio of non-trading financial assets mandatorily measured at fair value through profit or loss if the Group's business model for its management or the characteristics of its contractual cash flows do not warrant classification to any of the financial asset portfolios described above.

Financial instruments classified at fair value through profit or loss are initially measured at fair value, and directly attributable transaction costs are recognised immediately in the income statement.

Income and expenses of financial instruments at fair value through profit or loss are recognised on the following basis:

– Changes in fair value are recognised directly in the consolidated income statement, distinguishing, for non-derivative instruments, between the portion attributable to the instrument's accrued income, which is recognised as interest or dividends depending on its nature, and the remainder, which is recorded as gains/losses on financial transactions with a balancing entry under the headings "Gains/losses on financial assets and liabilities held for trading (net)", "Gains/losses on non-trading financial assets mandatorily measured at fair value through profit or loss (net)" and "Gains/losses on financial assets and liabilities designated at fair value through profit or loss (net)" of the consolidated income statement.

– Accrued interest on debt instruments is calculated using the effective interest method.

In relation to derivative instruments, the Group manages both those classified as "Financial assets and liabilities held for trading" and those classified as hedging derivatives on the basis of their net exposure to their credit risk; accordingly, it estimated their fair value by taking into account such net exposure, as indicated in paragraph 48 of IFRS 13.

- **Financial liabilities at amortised cost:** this category of financial instruments includes those financial liabilities that do not belong to any of the above categories and reflect the typical funding activities of financial institutions.

Financial liabilities included in this category are initially measured at fair value, adjusted by the transaction costs directly attributable to their issue. Subsequently, they are valued at their amortised cost, calculated through the application of the effective interest rate method.

The interest accruing on these securities, calculated using such method, is registered under the "Interest cost" heading in the consolidated income statement.

Despite the foregoing, the financial instruments that must be considered to be non-current assets and disposal groups on sale under prevailing regulations are recognised in the consolidated financial statements in accordance with the criteria set forth in Note 2.18.

There have been no reclassifications in the financial asset portfolios in 2021 or 2020.

2.3 Impairment of financial assets

A financial asset or other form of exposure to credit risk is considered to be impaired when there is objective evidence that events have occurred that:

- in the case of debt instruments (loans and advances and debt securities), have an adverse impact on future cash flows as estimated at the time of entering into the transaction.

- in the case of other exposures involving credit risk other than debt instruments, an adverse impact on the future cash flows that would be due in the case of the drawdown of the loan commitment and the cash flows that are expected to be collected if the loan commitment is drawn, or in the case of financial security granted, on the payments that the entity expects to make.

Impairment losses on debt instruments arising in the period are recognised as an expense under "Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss" in the consolidated income statement, and is recorded against an allowance account that reduces the carrying amount of the asset.

Allowances for impairment losses on exposures involving credit risk other than debt instruments are recorded on the liability side of the balance sheet as a provision. Impairment losses arising in the period for these exposures are recognised as an expense in the consolidated income statement.

Subsequent reversals of previously recognised impairment losses are immediately recognised as income in the consolidated income statement for the period.

The calculation of the impairment of financial assets is based on the type of instrument and on other circumstances that may affect them, once the guarantees received have been taken into account. For debt instruments at amortised cost, the Group recognises both allowance accounts, when provisions for bad debts are recognised to cover estimated losses, and direct write-offs against the asset, when it is considered that the likelihood of recovery is remote.

Interest accrual is recognised in the consolidated income statement by applying the effective interest rate to the gross carrying amount of the transaction, in the case of transactions classified as normal risk (stage 1) and normal risk under special watch (stage 2); while such recognition is carried out by applying the effective interest rate at amortised cost, i.e. adjusted for any impairment correction, in the case of transactions classified as non-performing risk (stage 3).

Following are the criteria applied by the Group to determine potential impairment losses in each of the different financial instrument categories, together with the method used to calculate the allowances recognised for such impairment.

Debt instruments and other exposures involving credit risk

Within the framework of EU-IFRS, International Financial Reporting Standard 9, "Financial Instruments", which sets the criteria for measurement and impairment of financial assets, it is considered important to link credit risk monitoring policies to the accounting recognition of provisions under IFRS.

Credit risk management constitutes a priority for the Group, in order to provide sustainable balanced growth and to guarantee the soundness of the Bank's financial and equity position at all times and to optimise the return/risk ratio. These principles are followed in the "Loan and discount risk management policy and procedure manual".

To determine impairment losses, the Group performs an individual monitoring of at least the significant debtors and a collective monitoring of the groups of financial assets with similar credit risk characteristics that are indicative of the debtor's ability to pay all amounts due. When a specific instrument cannot be included in any group of assets with similar risk characteristics, it is exclusively analysed individually to estimate the impairment loss.

The credit risk characteristics considered for grouping instruments are, among others: type of instrument, debtor's sector of activity, geographical area of activity, type of security, age of past-due amounts and any other factor relevant to the estimation of future cash flows.

The Group has policies, methods and procedures in place to estimate expected losses as a result of credit risk exposures, relating both to insolvency attributable to counterparties and to country risk. These policies, methods and procedures are applied to the arrangement, study and formalisation of debt instruments and off-balance sheet exposure, and to the identification of their possible impairment and, where appropriate, to the calculation of the amounts required to hedge the estimated losses.

The Group has established criteria to identify borrowers and bond issuers displaying significant increases in risk or objective evidence of impairment and classify them on the basis of their credit risk.

The following sections describe the classification principles and methodology used by the Group.

Classification category definitions

Credit exposures are classified according to credit risk as follows:

- Performing (stage 1): a transaction is considered to be at this stage when no significant increase in risk has occurred since its initial recognition. Where appropriate, the impairment loss allowance will reflect the expected credit losses arising from possible default during the 12 months following the reporting date.

- Performing on special watch (stage 2): when the risk has significantly increased from the date on which the transaction was initially recognised, but without leading to impairment, the transaction will be classified to stage 2. Where appropriate, the amount of the impairment loss allowance will reflect the expected losses arising from default during the residual life of the financial instrument.

- Non-performing (stage 3): a transaction will be catalogued as stage 3 when it shows effective signs of impairment as a result of one or more events that have already occurred and will lead to a loss. Where appropriate, the amount of the impairment loss allowance will reflect the expected losses due to credit risk during the expected residual life of the financial instrument.

  – Due to borrower default: transactions with some part of the principal, interest or contractually agreed expenses is past-due, generally speaking, more than 90 days, unless they should be classified as written-off. Guarantees provided shall also be included in this category when the guarantor has defaulted under the guaranteed transaction. Furthermore, the amounts of all transactions of a single holder are included when the transactions with overdue sums, generally speaking, and as mentioned above, are past-due more than 90 days, account for more than 20% of the amounts receivable.

  – For reasons other than borrower default: transactions in which, not classifiable as written-off or non-performing due to default, there are reasonable doubts about their full repayment under the contractual terms; in addition to off-balance-sheet exposures not classified as non-performing due to default, concerning which payment by the Group is likely and recovery is doubtful.

  In order to determine the existence of reasonable doubt as to the full repayment of these transactions, the entity performs an analysis of indicators on transactions that are not overdue by more than 90 days, which may or may not automatically classify the transaction as stage 3.

  The indicators analysed for those borrowers whose provisioning is determined on an individual basis, which do not automatically classify the operation as stage 3, are as follows:

  - Negative equity or equity that has significantly decreased in the last financial year.
  - Negative EBITDA for two years or a significant decrease in EBITDA for one year.
  - Very significant decrease in revenue and in operating income.
  - Significant decrease in cash flow generated in the last three years or in the last year.
  - Accumulation of defaults with other credit institutions.
  - Borrower has defaults equal to or greater than 91 days in less than 20% of exposure, and there are doubts about its total repayment.

  The indicators analysed that lead to the automatic classification of the transaction as stage 3 are the following:

  - Transaction that ceases to have amounts overdue for 91 or more days but is not classified in Stage 1 as there are other transactions classified in Stage 3.
  - Refinancing with a Stage 3 rating as it meets the conditions for reclassification to non-performing.
  - The borrower is in uncured insolvency proceedings.
  - The transactions of holders that are declared or are known to be in insolvency proceedings without a winding-up petition.
  - Transaction claimed judicially or in the process of enforcement of the security interest.

- Write-off: transactions for which, after individual analysis, it is considered that there is no reasonable expectation of full or partial recovery due to a significant or irrecoverable deterioration in the creditworthiness of the transaction or the holder. The entity considers in any case that there is no reasonable expectation of recovery for the following cases:

  – The risks of customers who are declared to be insolvent and for whom it is known that the liquidation phase has been or will be declared, except for those which have effective collateral covering at least 10% of the gross carrying amount of the transaction.

  – Non-performing risks due to borrower default that have been classified as such for more than four years or, before reaching this age when the amount not covered by effective guarantees has been maintained with a credit risk coverage of 100% for more than two years, unless those balances have effective collateral covering at least 10% of the gross carrying amount of the transaction.

In the above circumstances, the Group derecognises any amount recognised along with the provision from the balance sheet, without prejudice to any actions that may be taken to seek collection until the contractual rights to receive sums are extinguished definitively by expiry of the statute-of-limitations period, remission or any other cause.

<u>Transactions purchased or originated with credit impairment</u>

As at 31 December 2021, there were no transactions purchased or originated with credit impairment. In recent years, the Bank has not acquired assets at a significant discount in accordance with the materiality threshold established by Group management.

<u>Transaction classification criteria</u>

The Group applies a range of criteria to classify borrowers, bond issuers and transactions among the different categories, depending on the related credit risk. These include:

- Automatic criteria,
- Specific refinancing criteria, and
- Indicator-based criteria.

Automatic factors and specific refinancing classification criteria constitute the classification and cure criteria against the entirety of the portfolio.

Furthermore, to facilitate advance identification of significantly increased risk or indications of impairment of transactions, the Group has constructed a series of indicators, distinguishing between significant and non-significant borrowers, which encompass all default events and signals depending on the composition of the relevant portfolio. This methodology is based on the Group's experience in Credit Risk, in the composition of its portfolio and loss events identified by the Group; in addition, it proactively seeks to identify potential impairment in advance. Specifically, non-significant borrowers who, having surpassed the automatic classification algorithm, fail to meet any of the conditions to be transferred to either the non-performing or special watch categories, are assessed using indicators; the objective of these indicators is to identify weaknesses that may involve the assumption of greater losses than other similar transactions classified as performing. These indicators are based on the best current estimate of the likelihood of being classified non-performing associated with each transaction.

To assess the significant increase in credit risk, the quantitative measurement indicators used in the ordinary management of credit risk will be taken into account, such as the increased risk of a breach in any of the key indicators for which a threshold has been previously defined which depends on the management practices of each portfolio; for example, non-payments of between 30 and 90 days will be considered, together with increases in the reporting Probability of Default (PD) with respect to the PD at the origination date, based on established thresholds. Other qualitative variables are also considered such as signs of whether an unimpaired transaction is considered to be refinanced, or the consideration of operations included in a special debt sustainability agreement.

In addition, as a result of the outbreak of Covid-19, the Group determined new indicators to determine the increase in credit risk based both on the identification of companies and individuals for which it has estimated a low or medium-low capacity to overcome the crisis or resume payments, and on belonging to sectors highly impacted by the pandemic (hotels, restaurants, management of entertainment venues, etc.) for which early warnings are being activated and which have weak financial ratios in their financial statements or significant financing and reduced liability balances.

The definition of default is based on non-payment of more than 90 days, except in the cases mentioned above, although, in accordance with the EBA (4.3.1.89 to - 4.3.1.90), indicators of subjective default (unlikeliness to pay events) have been established as described above.

Operations classified as doubtful are reclassified to performing when, as result of the partial or full collection of outstanding amounts in the case of doubtful exposures due to default, or because the cure period has been completed in the case of doubtful exposures for reasons other than default, the reasons that gave rise to the classification of the operation as doubtful no longer apply, unless reasons subsist for maintaining it in this category.

As a result of these procedures, the Group classifies its borrowers in the categories of performing under special watch or doubtful due to debtor default, or maintains them under performing.

Individual classification

The Group has established an exposure threshold for considering borrowers as significant, based on EAD (exposure at default) levels.

On the basis of credit risk management and monitoring criteria, the Group has identified the following as individually significant borrowers:

- Borrowers/issuers with EAD (exposure at default) in excess of 3 million euros.

- Borrowers classified as doubtful for reasons other than default due to non-automatic factors (manually identified default).

- Borrowers without appreciable risk classified as doubtful for accounting purposes, irrespective of EAD.

For significant borrowers assessed through individual analyses, a trigger system has been established to identify significant increases in risks or signs of deterioration. The triggers system covers signs of impairment or of weaknesses through the definition of:

- Triggers with different pre-alert thresholds permitting the identification of increased risk and signs of impairment.

- Specific triggers that indicate a significant increase in risk.

- Specific triggers that indicate signs of impairment.

A team of expert risk analysts analyses borrowers with activated triggers to conclude on the existence of a significant increase of risk or objective evidence for deterioration and, in the event that there is evidence of deterioration, whether the event or events causing the loss have any impact on estimated future cash flows from the financial asset or group of financial assets.

The indicator system for significant borrowers is automated and takes into account the specific characteristics of the differentiated behaviour segments in the loan portfolio. The issues to be identified by the indicator system are as follows:

- Significant financial difficulty faced by the issuer or obligor.

- Breach of contract terms, default or delay in interest payments.

- For financial difficulties, the borrower is granted concessions or benefits that would not otherwise be taken into account.

- Probability of borrower insolvency: cases where there is a high probability that the borrower will be declared insolvent or will have to be restructured.

The Group carries out an annual review of the reasonableness of the thresholds and coverage used in the individual analyses, unless the borrower's financial situation changes substantially, making a review of that situation necessary.

According to the specified levels, a volume of borrowers that allows a reasonable coverage of the total credit exposure is above the significance threshold, which requires them to be subjected to an individual expert analysis.

Collective classification

Both for borrowers that exceed the aforementioned materiality threshold and those that do not exceed the materiality threshold, and additionally have not been classified as doubtful or under special watch by the automatic classification algorithm, the Group has constructed a synthetic indicator to identify exposures that display significantly increased risk or weaknesses which could entail losses that are higher than those in other similar transactions classified as performing. In this respect the Group has laid down thresholds that, once exceeded, entail an automatic classification as performing exposure under special watch due to the significant increase in risk or weaknesses.

The methods used to determine whether the credit risk of an instrument has increased significantly since initial recognition must take into account the characteristics of the instrument (or group of instruments) and past default patterns in comparable financial instruments. In order to define the significant increase in risk (SICR) at the Group, qualitative variables and quantitative measurement indicators used in ordinary credit risk management are taken into account. The latter include increases in the probability of default (PD) with respect to the PD at the time of the origin of the operation, based on a series of thresholds.

For debtors assessed in line with a group approximation, thresholds were defined based on the comparison of PD during the expected lifetime of the operation. If insufficient past information of a granular nature is available, thresholds were defined based on the comparison of a current 12 months PD PIT versus a PD PIT involving 12 months of origination for such period. These thresholds were determined in such a way that the NPL rates observed, for a sufficiently long period, are statistically different.

Refinancing and restructuring

Once a transaction has been identified as refinancing, refinanced or restructured, it may only be classified as non-performing or under special watch.

The following refinancing or restructuring operations are classified as doubtful:

- Operations reclassified from doubtful exposures or which are refinanced to avoid their classification as doubtful due to default.
- Operations with a grace period exceeding 24 months.
- Operations with reductions higher than the impairment that would be applicable if they were classified under exposures subject to special watch.
- Transactions based on an unsuitable payment plan - because the plan has been repeatedly breached, because it has been modified to avoid default, or because it is based on expectations that are not properly supported by macroeconomic forecasts.

For a refinancing or restructuring classified as non-performing to be upgraded to “under special watch”, all the criteria that generally determine the classification of transactions outside the category of non-performing risk must be satisfied, and, furthermore:

- It has been concluded, following an exhaustive review of the borrower’s assets and financial position, that it is unlikely the borrower will encounter financial difficulties.
- One year has elapsed from the date of refinancing or restructuring.
- Accrued principal repayments and interest payments must be met, reducing the renegotiated capital. The transaction cannot have overdue amounts.
- The principal and interest due at the time of the refinancing or which were written off as a result thereof must be paid. The presence of contractual terms that delay repayment, such as grace periods, entails that the transaction remains under special watch.
- The borrower must not have any other operations involving amounts overdue by more than 90 days on the date of the potential reclassification.

Refinancing or restructuring operations that do not meet the above conditions for classification as doubtful will be classified as exposures under special watch. They must remain under special watch for a trial period, until the following requirements are met:

- It has been concluded, following an exhaustive review of the borrower’s assets and financial position, that it is unlikely the borrower will encounter financial difficulties.
- A minimum of two years elapse from the formalisation of the operation or from reclassification from doubtful exposures.
- The borrower has paid principal and interest accruing since the date of the refinancing or since the date of reclassification from non-performing exposure.

- The principal and interest due at the time of the refinancing or which were written off as a result there of must be paid. The presence of contractual terms that delay repayment, such as grace periods, will imply that the operation remains under special watch.

- The borrower must not have any other operations involving amounts overdue by more than 30 days at the end of the trial period.

During the trial period described, a new refinancing or restructuring of the refinanced or restructured operations, or the existence of amounts overdue by more than 30 days, will entail the reclassification of these operations to doubtful exposures for reasons other than default, provided that they were classified as doubtful before the trial period.

Credit risk management policies and procedures applied by the Group guarantee detailed monitoring of borrowers, indicating that provisions need to be recorded when there is evidence of impairment in a borrower’s solvency. The Group records any bad-debt provisions that may be necessary in transactions in which the borrower’s situation thus requires, before restructuring or refinancing operations are formally approved.

For refinanced operations, the algorithm provides for their initial classification on the basis of their characteristics, mainly the existence of financial difficulties for the borrower and certain contractual terms, such as lengthy grace periods; subsequently, the algorithm changes the initial classification on the basis of the cure periods established.

The Group’s refinancing, restructuring, renewal and renegotiation policies are described in Note 3.5.5.2 to these financial statements.

<u>Determination of provisions</u>

Once the accounting classification of the borrower and of the related transactions has been determined, credit risk allowances are calculated. These allowances can be calculated by individual analysis or collective analysis.

The criteria for selecting portfolios for creating internal models for collective impairment testing follow the principles of materiality and complexity, and provide results that are in line with the real situation of the transactions in the current economic environment.

The Group applies the following policies for calculating credit risk loss provisions.

The amount of impairment loss provisions is calculated on the basis of whether or not there has been a significant increase in credit risk since the initial recognition of the transaction and whether or not an event of default has occurred. Thus, the allowance for impairment losses on transactions is equal to:

- The expected credit losses over twelve months, when the risk of an event of default in the transaction has not increased significantly since initial recognition (Stage 1).

- The expected credit losses over the lifetime of the transaction, if the risk of an event of default in the transaction has increased significantly since initial recognition (Stage 2).

- The expected credit losses over the lifetime of the transaction, if an event of default has occurred (Stage 3).

The Group uses forward-looking information in the calculation of the expected loss, for which it uses scenario projection models. The considerations made by the Group in relation to the effects of the Covid-19 health crisis are explained in Note 11.6.3.

The application of a range of scenarios to reflect the effect of non-linearity of losses entails estimation of the allowances required in different scenarios, including those that are unlikely but plausible. Specifically, three macroeconomic scenarios have been considered, a central scenario, an adverse scenario and a favourable scenario, which have been defined at Group level, with probabilities of occurrence of 60%, 30% and 10% respectively, taking into account the current uncertainty about how the pandemic will evolve and the time a large part of the economy will normalise. Timescales of three years are considered to cast these projections and the most relevant variables considered are the performance of GDP, the unemployment rate and housing prices, among others.

– Base case scenario:

The recovery continues to consolidate and the convergence with the Eurozone started in the second half of 2021 continues. The buoyant employment trend leads us to consider that structural damage has been limited and will allow, together with the investments derived from the European funds, a positive inertia and an intense improvement of the lagging sectors in 2022 and 2023, which would lead to above trend growth in the long term.

– Adverse scenario:

In the adverse scenario, the recovery of international tourism remains incomplete and causes more severe damage to the affected sectors. The increase in energy prices is persistent and is detrimental to households' spending power. Furthermore, there is a low take-up of Next Generation European Union funds.

– Favourable scenario:

In a favourable scenario, the rapid lifting of pandemic-related restrictions allows for a faster recovery of international tourism. Inflation moderates in the second half of the year thanks to the stabilisation of commodity prices and the easing of supply constraints.

The Group estimated the pre-payment rates for a range of different products and segments based on observed historical data. These pre-payment rates are applied to determine the expected loss on the exposures classified in Stage 1 and Stage 2. Also, the repayment table agreed for each transaction is applied.

Further, operations identified as not having appreciable risk (essentially operations with central banks, public administrations and companies, and financial institutions, all belonging to the European Union or certain countries regarded as non-risk, as well as advances to social security pensioners) are given a percentage of 0% (based on an analysis of past such operations and backtesting analysis), except for operations classed as doubtful, in which an individual impairment estimate is carried out. In this estimate, the amount of the provisions required for the credit risk allocable to the debtor and for the relevant country risk are calculated. When it is necessary to provide for both the debtor's credit risk and the country risk, more demanding provisioning criteria are applied.

The Group's exposure metric for provisioning purposes considers currently drawn down balances and the estimate of the amounts that are expected to be disbursed in the event that off-balance-sheet exposures become doubtful, through the application of a Credit Conversion Factor or CCF.

For transactions classified as non-performing, an estimate is made of expected losses, defined as the difference between the current exposure amount and the estimated future cash flows, as described below.

Subsequently, those cash flows are discounted at the current effective interest rate of the financial asset (if the contractual rate is fixed) or at the contractual interest rate effective on the date of discounting (if the contractual rate is variable).

The various Group methodologies are described in the following paragraphs.

Individualised provision estimates

In order to estimate the credit risk provisions due to the insolvency of a financial instrument, the Group makes an individualised estimate of the expected credit losses of those financial instruments that are considered to be material and with sufficient information to make such calculation.

On this point, it should be noted that the Entity estimates collectively the positions classified in Stage 1 of individually significant borrowers (except for borrowers with an exposure of more than 50 million euros), since on the basis of its historical experience and the hedge monitoring analyses performed, the individualised estimate of the hedges of these borrowers would be considerably lower than that calculated by the collective estimate.

The Group has developed a method for estimating these allowances: calculating the difference between the carrying amount of the asset and the present value of the future cash flows expected to be collected (excluding future credit losses not incurred), discounted at the current effective interest rate of the financial asset. Furthermore, the calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from enforcement of the security, less costs of obtaining and selling the collateral, whether or not enforcement is probable, with application of a haircut to the collateral.

The following methods for calculating the recoverable amount of assets tested individually have been established:

a) Generation of cash flows by the activity itself (going concern): this will be applied for borrowers with respect to which it is estimated that future cash flows can be generated in the course of business, which will allow the repayment of part or all of the debt concerned. In addition, these flows could be supplemented by potential sales of equity assets that are not essential for the generation of said cash flows.

b) Enforcement of guarantees (gone concern): this will be applied for borrowers that are not capable of generating cash flows in the course of their business, the only means of recovering the investment being the foreclosure and liquidation of their assets.

c) Mixed approach: individual analysis of the borrower in which the two previous approaches are combined, enforcing secondary (non-essential) collateral.

The Group uses macroeconomic scenarios in its method for calculating provisions for individually material borrowers via an add-on calculated on the basis of the Group's internal models.

Collective provision estimates

The Group estimates expected credit losses as a group in cases where they are not estimated individually.

The criteria for selecting portfolios for creating internal models involve the principles of significance and complexity, and provide results that are in line with the real situation of the operations in the current economic environment.

The Group has conducted a prior study of the operations used in the collective calculation of provisions. As a result of this study, the Group has chosen the following portfolios to be used in the development of internal methodologies:

- Home purchases,
- Credit cards and
- Companies (SMEs).

The following portfolios are excluded from the utilisation of internal models:

- Consumption,
- Self-employed,
- Large corporations and
- Property developers.

For the excluded portfolios, apart from the borrowers that are subject to individual analysis, the Group makes a group calculation of coverage based on the models prepared at sector level by the Bank of Spain on the basis of experience and the information it has on the Spanish banking sector, as well as forecasts of future conditions. In any case, these models are periodically checked retrospectively to ensure the reasonableness of the provision.

When calculating a collective impairment loss, the Group, in accordance with IFRS 9 and taking into account Bank of Spain Circular 4/2017, mainly takes into consideration the following aspects:

- The impairment estimate process takes into account all credit exposures except performing loans with no appreciable risk for which impairment estimation methods are used based on statistical data and models that aggregate the average behaviour across Spanish banking institutions. The Group recognises an impairment loss equal to the best available estimate under internal models, bearing in mind all available relevant information on conditions at the end of the period to which the calculation relates. The Group has identified the following transactions without appreciable risk for the estimation of credit risk allowances:
  - Transactions with central banks.
  - Transactions with the government bodies of European Union countries, including those arising from reverse repurchase loans of debt securities.

- Transactions with central governments of countries classified in group 1 for country-risk purposes.

- Transactions in the name of deposit insurance funds and resolution funds, provided that they are comparable in credit quality to those of the European Union.

- Transactions with credit institutions and credit financial institutions of European Union countries and, in general, of countries classified in Group 1 for country-risk purposes.

- Transactions with Spanish mutual guarantee companies and with government bodies or government-controlled companies from other countries classified in Group 1 for country-risk purposes whose main activity is credit insurance or guarantee.

- Transactions with non-financial corporations that qualify as public-sector.

- Advances on pension benefits and pay packets corresponding to the following month, provided that the paying entity is a government body and the payments are made to the bank on standing orders, and

- Advances other than loans.

- In order to make a group assessment of impairment, financial assets are grouped according to the similarity in characteristics relating to credit risk (such as type of product, purpose of financing, trade identifier, guarantees, etc.) in order to estimate differentiated risk parameters for each homogeneous group. This segmentation is different according to the estimated risk parameter and allows for a more precise calculation of expected losses by taking into account the different elasticities of the risk parameters to the cycle and maturity. The segmentation takes into account historical loss experience observed for a uniform group of assets (segment), once the present economic situation has been analysed, which is representative of the unreported losses incurred that will take place in that segment. This segmentation distinguishes risk, and is aligned with management and is being used in the Group's internal models, having been applied on various occasions by the internal control units and the supervisor. Finally, it is subjected to backtesting and the regular update and review of estimates to include all available information.

The Group has developed internal models for the collective calculation of impairment losses in which the aggregate amount of a credit risk loss is determined on the basis of the following parameters:

- Probability of impairment (PI): probability of an asset becoming impaired (corresponding to a borrower or uniform borrower group) within a specific time horizon (appropriate to the period for the identification/emergence of impairment).

- Probability of recovery: probability of asset being recovered expressed as a percentage, in the event of the impairment event occurring (determined using the PI parameter).

- Discounting of guarantees: percentage loss in the value of guarantees.

- Exposure at the time of Default: Group's exposure when the borrower impairment materialises (on the basis of which the above-mentioned probability of impairment is determined).

<u>Classification and Provision for credit risk due to country risk</u>

Country risk is considered to be the risk arising in counterparties resident in a specific country due to circumstances other than ordinary commercial risk (sovereign risk, transfer risk or risks arising from international financial activity). The Group classifies transactions with third parties into groups according to the economic performance of the respective countries, their political situation, regulatory and institutional framework, and payment ability and history.

Debt instruments or off-balance-sheet exposures with final obligors resident in countries with persistent difficulties in servicing their debt are considered non-performing assets due to the materialisation of country risk: the possibility of recovery is considered doubtful. The same applies to off-balance-sheet exposures for which the likelihood of recovery is considered remote, unless they are to be classified as write-offs.

Allowances are estimated in two stages: first, we estimate the allowance for insolvency risk and then the additional allowance for country risk.

Provision levels for this risk are not significant in relation to the impairment provisions recognised by the Group.

Guarantees

In-rem and personal guarantees are regarded as efficient when the Group has demonstrated their validity in mitigating credit risk. The analysis of guarantee efficiency takes into account the time required to enforce the guarantees and the Group's capacity and experience in this respect.

Under no circumstances are guarantees whose efficiency depends substantially on the credit quality of the debtor or corporate group to which the debtor belongs regarded as admissible as efficient guarantees.

The Group's collateral valuation criteria are in line with current regulations. Specifically, the Group applies policies for selecting and engaging valuation companies which aim to ensure their independence and the quality of the valuations. All the valuation companies and agencies used are entered in the Special Valuation Companies Register of the Bank of Spain and the valuations are conducted in accordance with the provisions of Order ECO/805/2003 on rules for valuing real estate and certain rights for certain financial purposes.

Real-estate guarantees in loan operations and properties are appraised at the time they are granted or acquired, the latter by purchase, adjudication or dation in payment, and when an asset suffers a significant decline in value. In addition, minimal updating criteria are applied that guarantee an annual frequency in the case of impaired assets (special vigilance, doubtful and repossessed assets or assets received in settlement of debts), or on a three-yearly basis for very large debts performing normally without any symptoms of latent risk. Statistical methods are used to update the appraisals, when the regulations so permit, especially for the above assets when exposure and risk is low.

2.4 Accounting hedges

The Group employs derivative financial instruments as part of its strategy to reduce exposure to interest rate and foreign exchange risks, where the transactions in question fulfil applicable legal requirements.

The Group designates a transaction as a hedge from inception. In the documentation relating to hedge operations, the hedged and hedging instruments are identified adequately along with the nature of the risk to be covered and the criteria or methods followed by the Group to appraise their efficiency over the term of the operation.

The Group only considers hedging operations to be those which are highly efficient throughout their term. A hedge is regarded as being highly efficient if the fluctuations arising in the fair value or in the cash flows attributed to the hedged risk over the duration of the hedge are almost entirely offset by the fluctuations in the fair value or the cash flows, as applicable, of the hedging instruments.

To assess whether a hedge is effective, the Group analyses whether, from inception to the finalisation of the term defined for the operation, it may be expected prospectively that any changes in the fair value or the cash flows of the hedged item that are attributable to the hedged risk are almost entirely offset by changes in the fair value or the cash flows, as applicable, of the hedging instruments and that, retrospectively, the gains or losses on the hedge operation are within a range of 80% to 125% of the gains or losses on the hedged item.

Hedging operations performed by the Group are classified into the following categories:

- Fair value hedges: they hedge the exposure to changes in fair value of financial assets and liabilities or unrecognised firm commitments, or an identified portion of such assets, liabilities or firm commitments, that is attributable to a particular risk, provided that it affects the consolidated statement of profit or loss.

- Cash flow hedges: hedge exposure to variability in cash flows that is attributable to a particular risk associated with a recognised financial asset or liability or with a highly probable forecast transaction and could affect the consolidated statement of profit or loss.

In fair value hedges, the differences in the fair value of both hedging instruments or hedged items, involving hedged type of risk are recognised directly in the consolidated statement of profit or loss.

In cash flow hedges, changes to the fair value arising in the portion of the effective hedge of the hedging instruments are recognised temporarily in "Accumulated other comprehensive income – Items that may be reclassified to profit or loss – Hedging derivatives. Cash flow hedge (effective portion) reserve until the time when the hedged transactions occur. At this moment, the amounts previously recognised in equity are taken to the statement of profit and loss in a symmetrical manner to the hedged cash flows. Gains or losses on the hedging instrument corresponding to the ineffective portion of cash flow hedging operations are recognised directly in the statement of profit or loss. Financial instruments hedged in this type of hedging transaction are recognised in the manner explained in Note 2.2, without any changes for their consideration as hedged items.

As well as the above hedging operations, the Group carries out fair value hedges of foreign exchange risk for a certain amount of financial assets (or financial liabilities) which form part of the instruments in its portfolio, but not specific instruments, which in accounting terms are usually called macro-hedges.

In fair value macro-hedges, changes to the fair value of hedged items attributable to interest rate risk are recognised directly in the statement of profit and loss, but the balancing entry is recognised in “Assets – Fair value changes of the hedged items in portfolio hedge of interest rate risk” or “Liabilities – Fair value changes of the hedged items in portfolio hedge of interest rate risk” depending on the substance of the hedged item, rather than in the items under which the hedged items are recognised.

The accounting technique known as a macro-hedge requires the periodic assessment of its efficiency and therefore efficiency is verified on a quarterly basis by checking that the net position of assets and liabilities that mature or are repriced in the corresponding time band is higher than or equal to the amount hedged (sum of the hedging instruments in that band). Therefore, inefficiencies arise when the amount hedged is higher than the net asset and liabilities in the same time band, with the fair value of the inefficient portion immediately recognised in the consolidated statement of profit or loss.

The Group discontinues hedge accounting when the hedging instrument expires or is sold, when the hedge no longer qualifies for hedge accounting or, lastly, when the designation as a hedge is revoked.

Where fair value hedge accounting is interrupted as stated in the preceding paragraph, the value adjustments made for hedge accounting purposes are recognised in the statement of profit or loss until the maturity date of the hedged items, applying the effective interest rate as recalculated on the interruption date of the hedge.

In turn, in the event of an interruption of a cash flow hedge, the cumulative gain or loss recognised in equity remain in equity until the forecast transaction occurs, at which point it is recognised in the statement of profit and loss. However, if it is expected that the transaction will not be carried out, the cumulative gain or loss is recognised immediately in the consolidated statement of profit or loss.

2.5 Foreign currency transactions

2.5.1 Functional currency

The Ibercaja Group’s presentation and functional currency is the euro. All balances and transactions denominated in currencies other than the euro are therefore foreign currency balances and transactions.

The equivalent value of the main asset and liabilities balances on the consolidated balance sheet recorded in foreign currency breaks down as follows based on the nature of the items making them up and the most significant currencies in which they are denominated:

	Equivalent value in thousand euro			
	2021		**2020**	
	Assets	**Liabilities/ Equity**	**Assets**	**Liabilities/ Equity**
Breakdown by type of portfolio -				
Financial assets/liabilities at fair value through equity	104,863	-	10,443	-
Financial assets/liabilities at amortised cost	75,105	41,988	58,252	45,321
Other	-	(3,086)	-	480
	179,968	**38,902**	**68,695**	**45,801**
Breakdown by type of currency -				
US dollar	171,237	38,902	53,076	41,692
Pound sterling	4,357	2,974	6,600	2,949
Swiss franc	872	796	1,353	1,331
Japanese yen	943	15	909	16
Canadian dollar	23	8	10	7
Norwegian krone	45	20	2,798	19
Other	2,491	(3,813)	3,949	(213)
	179,968	**38,902**	**68,695**	**45,801**

2.5.2 Conversion criteria for foreign currency balances

Transactions in foreign currencies are initially recognised at the equivalent value in euro based on the exchange rates prevailing at the date of the transactions. Monetary balances denominated in foreign currency are subsequently converted to the functional currency at the exchange rate prevailing on the date of issue of the financial information.

Furthermore:

- Non-monetary items valued at historical cost are translated into the functional currency at the exchange rate prevailing on the date of acquisition.

- Non-monetary items stated at fair value are translated into the functional currency at the exchange rate prevailing on the date on which the fair value is determined.

2.5.3 Recognition of exchange rate differences

Exchange differences that arise when translating balances in foreign currency to the entities' functional currency are recorded in general at net value under Differences on exchange (net) on the consolidated statement of profit or loss, with the exception of exchange differences on financial instruments recognised at fair value through profit or loss, which are recorded on the consolidated statement of profit or loss under "Gain/(loss) on financial assets and liabilities held for trading, net" and "Gain/(loss) on financial assets and liabilities at fair value through profit or loss, net", without differentiating them from other fair value fluctuations.

Exchange differences arising on foreign currency equity instruments whose fair value is adjusted against equity are recognised in consolidated equity under "Other accumulated comprehensive income - Items that will not be reclassified to profit or loss - Changes in the fair value of equity instruments measured at fair value through other comprehensive income" in the consolidated balance sheet until they are realised. When an equity instrument at fair value through other comprehensive income is derecognised, the amount of exchange differences arising on these financial instruments is not reclassified to profit or loss, but to an item of reserves alongside the gains or losses recorded in accumulated other comprehensive income from changes in fair value.

2.6 Recognition of income and expenses

The paragraphs below summarise the most significant accounting criteria applied by the Group in recognising income and expense:

2.6.1 Interest income, interest expenses, dividends and similar items

As a general rule, interest income, interest expense and similar items are recognised on a time proportion basis using the effective interest method. Dividends received from other companies are recognised as income when the right to receive them is declared by the consolidated entities. Dividends for which the right to receive payment has been declared prior to initial recognition shall not form part of the carrying amount of the equity instrument and shall not be recognised as income. If the distribution relates to income generated by the issuer prior to the date of initial recognition, the dividends are not recognised as income but as a reduction of the carrying amount of the instrument.

2.6.2 Fees, commissions and similar items

Commission and fee income and expenses which are not included in the calculation of the effective interest rate on transactions and/or which do not form part of the acquisition cost of financial assets or liabilities other than those classified at fair value through profit or loss are recognised on the consolidated statement of profit or loss using accounting policies that vary according to the nature of the item concerned. The most significant fee and commission items are as follows:

- Those linked to acquisitions of financial assets and liabilities carried at fair value through profit or loss, which are reflected in the statement of profit or loss when payment is made.

- Those arising on transactions or services with a lengthy duration, which are recorded in the consolidated statement of profit or loss over the term of the transaction or service.

- Those relating to a one-off event, which are recorded when the originating event takes place.

2.6.3 *Non-financial income and expense*

They are recognised for accounting purposes when the goods are delivered or the non-financial service is rendered. To determine the amount and timing of recognition, a five-step model is followed: identify the contract with the customer, identify the separate obligations of the contract, determine the transaction price, allocate the transaction to each identified obligation, and finally recognise revenue as and when obligations are satisfied.

2.6.4 *Deferred receipts and payments*

Deferred receipts and payment are recognised for accounting purposes at the amount resulting from discounting the expected cash flows to net present value at market rates.

2.6.5 *Contributions to the Single Resolution Fund and Deposit Insurance Fund*

In accordance with IFRIC 21 Levies, recognition of the obligation, which entails recording the amount accrued to date, takes place upon receipt of the payment notification (second quarter for the contribution to the Single Resolution Fund and fourth quarter for the contribution to the Deposit Insurance Fund).

2.7 Offsetting of financial instruments

Asset and liability balances are offset, i.e. reported in the consolidated balance sheet at their net amount, when, and only when, they arise from transactions in which a contractual or legal right of set-off exists and the Company intends to settle them on a net basis, or to realise the asset and settle the liability simultaneously.

2.8 Transfers of financial assets

The accounting treatment of transfers of financial assets depends on the extent to which the risks and rewards associated with the transferred assets are transferred to third parties:

- If the Group transfers substantially all the risks and rewards of transferred assets to third parties, the transferred financial asset is derecognised and any right or obligation retained or created in the transfer is recognised simultaneously.

- If the risks and rewards associated with the financial asset transferred are substantially retained, as in the case of financial asset securitisations in which subordinated financing or another kind of credit improvement is maintained which substantially absorbs the loan losses expected for the securitised assets, the financial asset transferred is not written off the consolidated balance sheet and continues to be measured using the criteria used prior the transfer. Conversely, the following items are recognised and not offset:

  – An associated financial liability in an amount equal to the price received, which is subsequently measured at amortised cost.

  – The income from the financial asset which is transferred but not written off, and the expenses derived from the new financial liability.

Therefore, financial assets are only derecognised from the consolidated balance sheet when the cash flows they generate have been extinguished, when the risks and rewards involved have been substantially transferred to third parties, and when the transferor does not retain control of the transferred financial asset.

Note 27.5 summarises the most significant circumstances of the main asset transfers in effect in the Group at year-end.

2.9 Financial guarantees and provisions made thereon

Financial guarantees are agreements in which the Group undertakes to pay specified sums for the account of a third party in the event that payment is not made by the third party, irrespective of the form of the obligation: collateral, financial guarantee, irrevocable documentary credit issued or guaranteed by the entity, etc.

At the time of initial recognition, the Group accounts for the financial guarantees provided under liabilities in the consolidated balance sheet at fair value, which is generally equal to the present value of the commissions and returns to be received on such contracts over the term of the same with, as the balancing entry under assets on the consolidated balance sheet, the amount of likened commissions and returns collected at inception and accounts receivable at the present value of the commissions and returns pending collection. These amounts are amortised on a straight-line basis over the term of the contracts in the consolidated statement of profit or loss.

Financial guarantees, whatever the holder or instrumentation, are analysed periodically to determine the credit risk to which they are exposed and, where appropriate, to estimate the need to create a provision for them, which is determined by applying criteria similar to those used to quantify impairment losses on debt instruments, as explained in Note 2.3 above.

Provisions set aside for these operations are recognised under “Provisions – Commitments and guarantees given” on the liability side of the consolidated balance sheet. Additions to and reversals from these provisions are recognised in the consolidated statement of profit or loss under “Provisions or reversal of provisions”.

When a provision is required for financial guarantees, the associated commissions pending accrual, carried in the consolidated balance sheet under “Other liabilities”, are reclassified to the relevant provision.

Income from guarantee instruments is recorded under “Fee and commission income” in the consolidated income statement and is calculated by applying the rate established in the underlying contract to the nominal amount of the guarantee (Note 32).

2.10 Accounting of operating leases

The Group should identify at the beginning of the lease whether a contract is a lease or contains a lease component and this conclusion will only be reassessed in the event of a change in the terms and conditions of the contract. According to the criteria of the Standard, a contract is a lease if it gives the customer the right to exercise control over the use of the asset identified in the contract for a period of time in exchange for a consideration.

The Standard provides two exemptions from the recognition of lease assets and liabilities, which may be applied in the case of short-term contracts and those whose underlying asset is of low value, which the Group has decided to use.

<u>Leases in which the bank acts as lessee</u>

The lease term corresponds to the non-cancellable period of a lease, plus the periods covered by the option to extend the lease if it is reasonably certain that the lessee will exercise the option and the periods covered by the option to terminate the lease if it is reasonably certain that the lessee will not exercise the option.

The lease liabilities, which are initially recognised under “Financial liabilities at amortised cost - other financial liabilities” in the balance sheet, include the net present value of the following lease payments:

- fixed payments (including essentially fixed payments), less any lease incentive receivable,
- variable lease payments that depend on an index or rate,
- amounts expected to be paid by the lessee as residual value guarantees,
- the exercise price of a call option if the lessee is reasonably certain that it will exercise that option, and
- lease termination penalty payments, if the term of the lease reflects the lessee’s exercise of that option.

Subsequent to their initial recognition, they are measured at amortised cost using the effective interest rate method.

Lease payments are discounted using the interest rate implicit in the lease. The discount rate used was determined by the institution’s Capital Strategy and Balance Sheet Unit, which calculated a financing curve that approximates the cost of funding the Group through senior debt.

When the implicit interest rate cannot be readily calculated, use is made of the incremental interest rate, which is defined as the interest rate that a lessee would have to pay for borrowing, for a term similar to the duration of the lease and with similar security, funds necessary to obtain an asset of similar value to the asset by right of use in a similar economic environment.

Each lease payment is allocated between liabilities and finance expense. The interest expense is charged to income over the term of the lease in such a way as to produce a constant periodic interest rate on the remaining balance of the liability for each year. Interest expense on lease liabilities are recognised in the consolidated statement of profit or loss under “Interest expense - Other liabilities”.

Right-of-use assets are initially measured at cost, which includes the following:

- the amount of the initial valuation of the lease liability,
- any lease payment made on or before the start date less any lease incentive received,
- any initial direct cost and
- restoration costs.

Such assets are measured subsequent to initial recognition at cost corrected by:

- Accumulated depreciation and impairment, and
- any revaluation of the corresponding lease liability.

Depreciation is calculated over the useful life of the asset or the shorter of the two lease terms on a straight-line basis. The annual provisions for depreciation are charged to the statement of profit or loss under "Depreciation - Tangible assets" and are calculated on the basis of the following average years of the different underlying asset classes comprising the rights of use, as follows:

	Years of estimated useful life
Branch offices	1 to 20
Sale & lease-back	8 to 28
Other	2 to 8

The criteria for impairment of these assets are similar to those used for tangible assets (see Note 2.15).

<u>Leases in which the bank acts as lessor</u>

Finance leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of the leased item of an underlying asset.

Whenever consolidated entities act as the lessor of an asset in a finance lease transaction, the sum of the present values of the amounts that will be received from the lessee plus the guaranteed residual value, are recorded as financing provided to third parties and are therefore recognised under "Financial assets at amortised cost" in the consolidated balance sheet, in accordance with the nature of the lessee.

Note 11.4 sets out information on these leases.

Operating lease

A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership of the leased item of an underlying asset.

When the consolidated entities act as lessors in operating leases, the acquisition cost of the leased assets is presented under "Tangible assets" as "Investment property" or as "Other assets leased out under operating lease", depending on the substance of the leased assets. These assets are depreciated in accordance with the policies adopted for similar property, plant and equipment for own use and the income from lease contracts is recognised in the consolidated statement of profit or loss on a straight-line basis under "Other operating income".

The impacts of these leases are presented in Note 15.2 in the consolidated income statement.

2.11 Assets managed

Third party assets managed by the consolidated companies are not included in the consolidated balance sheet. Fees generated by this activity are recorded under "Fee income" in the consolidated statement of profit or loss. Note 27.4 provides information on the third-party assets managed at year end.

2.12 Investment funds and pension funds managed by the Group

Mutual funds and pension funds managed by consolidated companies are not recognised in the Group's consolidated balance sheet since the related assets are owned by third parties. Fees and commissions earned on the services rendered to these funds by Group companies (asset management services, portfolio deposits, etc.) are recognised under "Fee income" in the consolidated statement of profit or loss.

Note 27.4 provides information on the investment funds and pension funds managed by the Group at the year end.

2.13 Staff expenses

2.13.1 Post-employment benefits

Post-employment remuneration is remuneration paid to employees after the end of their period of employment. All post-employment obligations are classified as defined contribution plans or defined benefit plans, based on the conditions of these obligations.

The Bank's post-employment commitments with its employees are treated as "Defined contribution plans" when the Bank makes predetermined contributions to a separate entity, on the basis of the agreements reached with each specific group of employees, without any legal or effective obligation to make additional contributions were the separate entity unable to pay benefits to the employees for the services rendered in the current year and in prior years. Post-employment commitments that do not fulfil the above-mentioned conditions are treated as "Defined benefit plans".

<u>Defined contribution plans</u>

The Group's pension commitments to active employees are arranged through a defined contribution system for retirement and a defined benefit system for death and disability during active employment, the latter being covered by annual insurance policies.

Defined contribution plans are recognised under "Personnel expenses" in the consolidated statement of profit or loss. The contributions made by the defined contribution plan promoters amounted to 15,413 thousand euros in 2021 and 15,339 thousand euros in 2020 (Note 38).

<u>Defined benefit plans</u>

With respect to defined benefit plans, the Group recognises the present value of post-employment obligations less the fair value of the plan assets, under "Provisions - Pensions and other post-employment defined benefit obligations" and "Provisions - Other long-term employee remuneration" on the liabilities side of the balance sheet. The liabilities for defined benefits are calculated annually by independent actuaries using the projected unit credit method.

"Plan assets" are the assets linked to a certain defined benefit obligation that will be directly used to settle these obligations and that meet the following conditions:

- They are not owned by the Bank, but rather by a legally separate, non-related third party.
- They are available to be used only to pay or fund employee benefits and are not available to Bank's own creditors, even in the event of bankruptcy.
- They cannot be returned to the Bank unless the assets remaining in the scheme are sufficient to meet all obligations of the scheme and of the Bank relating to employee benefits, or unless assets are to be returned to the Bank to reimburse it for employee benefits previously paid.
- They may not be non-transferable financial instruments issued by the Bank.

The Group records its reimbursement right under assets on the balance sheet under "Other assets".

The present value of the defined benefit obligations with staff is determined by discounting the future cash flows estimated at discount rates for corporate bonds with high credit ratings that are consistent with the currency and estimated terms that the liabilities for post-employment benefits will be settled.

The expected return on plan assets for defined benefit plans and reimbursement rights are determined using the same discount rate as for calculating the present value of the obligations.

Post-employment benefits are recognised as follows:

- In the statement of profit or loss: the cost of services provided by employees, both during the year and in prior years (where not recognised in prior years), net interest on the provision (assets), and the gain or loss arising on settlement.

- In the statement of changes in equity: new measurements of the provision (asset) as a result of actuarial gains or losses, of yields on plan assets that have not been included in net interest on the provision (assets), and changes in the present value of the assets due to changes in the present value of flows available to the entity, which are not included in net interest on the provision (assets). The amounts not recorded in net interest under equity will not be reclassified to the statement of profit or loss in a subsequent period.

"Actuarial gains and losses" arise from differences between the previous actuarial assumptions and what has actually occurred and the effects of changes in actuarial assumptions.

<u>Pension supplements for serving or retired personnel</u>

Post-employment commitments acquired by the Group with serving and retired personnel derive from the various Collective Agreements and are related to supplements to Social Security pensions in cases retirement, widowhood, orphanhood, permanent disability or major disability.

Post-employment commitments acquired by the Group with retired personnel included in the "Ibercaja Employee Pension Plan" derive from the Collective Agreement and are related to supplements to Social Security pensions in cases retirement, widowhood, orphanhood, permanent disability or major disability.

In addition, the Group has retirement supplements commitments with former retired employees and management personnel which are externalised through insurance policies with Caser, Compañía de Seguros y Reaseguros, S.A. and Ibercaja Vida, S.A.

2.13.2 Other long term employee remuneration

Commitments with staff taking early retirement, widowhood commitments and disability commitments prior to retirement that depend on length of service and other similar items will be processed for accounting purposes, as applicable, as established in defined benefit post-employment plans, except that actuarial gains and losses are recognised immediately in the statement of profit or loss.

The Group has no commitments towards early retirees to pay salary complements and other welfare charges from the time of early retirement to the date of actual retirement.

2.13.3 Severance payments

Severance payments are recognised as a personnel expense when the Group undertakes to terminate the employment relationship before the normal retirement date, or to pay severance indemnities as a result of an offer made to encourage voluntary termination of employment by employees.

2.13.4 Other employee benefits

The Group has committed to providing employees with certain goods and services at partially or totally subsidised prices, in accordance with the collective bargaining agreement and the Corporate or Company Agreements. The most relevant employee benefits are credit facilities.

Employees of Ibercaja Banco, S.A. with indefinite contracts are generally entitled to request loans or credit facilities, subject to a maximum limit based on their annual salary, once their trial period has ended.

- Home loans: the maximum amount to be granted is that determined by the value of the dwelling plus the expenses inherent to the acquisition thereof, which must be duly supported and may not exceed five annuities, which are considered as comprising the items referred to in Article 39 of the Collective Agreement, plus the family support. If this second limit is applicable, the resulting amount may not be less than 200,000 euros under a Resolution of the Board of Directors. The maximum term is 35 years and the applicable interest rate is equal to 60% of the one-year Euribor rate in April and October, subject to a minimum of 0.50% and a maximum of 5.25%.

- Personal loan/credit: the maximum capital to be financed is 25% of the employee's annual remuneration with respect to the corresponding items from those provided for in Article 39 of the Collective Agreement, plus the family support. However, any employee may obtain up to 30,000 euros. The maximum term is 10 years and the applicable interest rate is the one-year Euribor rate in October, with a minimum of 0%.

- Welfare support: to meet fully justified essential needs. The amount will not exceed six gross monthly payments, including all fixed items that make up the monthly salary, and will be repaid in monthly instalments consisting of 10% of the gross salary.

2.13.5 Multiannual incentive plan

On 15 April 2021, the General Shareholders' Meeting of Ibercaja Banco approved the terms and conditions of the long-term incentive plan (the "Plan") for the Bank's key executives, linked to the Strategic Challenge Plan for 2023. This Plan is aimed at a group of 29 members of staff (the "Beneficiaries") whose professional activities have a significant impact on the Bank's risk profile.

The Plan is linked to the permanence of the Beneficiaries and the achievement of objectives in the 2021-2023 period. The assessment of the degree of achievement of the multi-annual objectives shall be measured from the start date to the end date.

The maximum amount of the incentive shall be fixed as a percentage of the annual fixed remuneration for each Beneficiary. The deferred incentive shall be paid in the first quarter of 2024, 2025, 2026, 2027 and 2028, respectively. Each deferred incentive payment will be made 45% in cash and the remaining 55% in instruments linked to the Bank's value and subject to a one-year holding period.

The degree of achievement of the multi-annual objectives will be determined on the basis of:

I. Achievement of the Bank's shareholder return target for the 2021-2023 period.
II. Achievement of the tangible equity performance target for 2023.
III. Meeting the Fully Loaded Common Equity Tier I ratio target set for 2023
IV. Fulfilment of sustainability objectives for 2023.

The total estimated value of these commitments if the targets set in 2023 are met amounts to 4,632 thousand euros. At 31 December 2021 the Group has recognised a provision of 1,544 thousand euros under "Provisions - Other long-term employee benefits" in the accompanying consolidated balance sheet (Notes 21 and 38) for the accrued amount as it considers that the targets set in the plan will be met on the basis of the information available at year-end.

2.14 Income tax

The corporate income tax expense is recognised in the income statement, except when it results from a transaction whose outcome is recognised directly in equity, in which case the corporation tax is recognised with a balancing entry in equity.

The corporate income tax expense is calculated as the tax payable on the taxable profit for the year, adjusted for the changes arising during the financial year in the assets and liabilities recognised as a result of timing differences, tax credits and relief and possible tax loss carryforwards (Note 25).

As mentioned in Note 25, Ibercaja Banco forms part of a Tax Group, the parent of which is Fundación Bancaria Ibercaja, in accordance with Chapter VII of Title VII of the Corporate Income Tax Law.

A timing difference is a difference between the carrying amount and the taxable amount of an asset or liability. A taxable amount is one which will generate a future obligation to make a payment to the tax authorities and a deductible amount is one that will generate the right to a refund or a reduction in a payment to the tax authorities in the future.

Timing differences, tax-loss carryforwards yet to be offset and tax deductions not yet applied are recorded as deferred tax assets and/or liabilities. The amounts are recognised at the tax rates that are expected to apply when the asset is realised or the liability is settled.

Deferred tax assets are only recognised when it is probable that sufficient future taxable profit will be obtained against which the deferred tax asset can be utilised. Deferred tax liabilities are recognised for practically all taxable temporary differences.

Tax credits and relief, and credits for tax loss carryforwards are amounts that, after performance of the activity or obtainment of the profit or loss giving entitlement to them, are not used for tax purposes in the related tax return until the conditions for doing so established in the tax regulations are met, provided that the Group considers it probable that they will be used in future periods. Note 25 gives details of the assets recorded in this respect.

Current tax assets and liabilities are those which, respectively, are regarded as being recoverable or payable within 12 months as from the year end. Deferred tax assets and liabilities are those which, respectively, are expected to be recovered or paid in future years.

Deferred tax assets and liabilities are reviewed at each balance sheet date to verify that they remain in force, and the appropriate adjustments are made on the basis of the results of the review.

2.15 Tangible assets

In general, tangible assets are presented on the balance sheet at cost, this being the fair value of any consideration paid plus all cash payments made or committed net of accumulated depreciation and any value adjustment resulting from comparing the carrying value of each item with its recoverable amount.

Depreciation is calculated using the straight-line method on the basis of the acquisition cost of the assets less their residual value. The land on which buildings and other structures stand has an indefinite life and, therefore, is not depreciated.

The annual provisions for depreciation are charged to the consolidated statement of profit or loss under “Depreciation - Tangible assets” and are calculated on the basis of the following average years of estimated useful life of the various assets, as follows:

	Years of estimated useful life
Properties for own use	25 to 100
Furniture	6 to 16.6
Fixtures	5 to 16.6
Computer equipment and installations	4 to 8

At each balance sheet date, the consolidated entities assess whether there is any internal or external indication that a tangible asset is impaired (i.e. its carrying amount exceeds its recoverable amount). If any such indication exists, the carrying amount of the asset is written down to its recoverable amount and future depreciation charges are adjusted in proportion to the asset’s adjusted carrying amount and its new remaining useful life, in the event that a re-estimation of this is necessary. This reduction in the carrying amount is charged, as necessary to “Impairment or reversal of impairment of the value of non-financial assets (net)” in the consolidated statement of profit or loss.

Similarly, if there is an indication of a recovery in the value of a deteriorated tangible asset, the consolidated entities recognise the reversal of the impairment loss recognised in prior periods, through the corresponding credit to the heading “Impairment or reversal of impairment of the value of non-financial assets (net)” in the consolidated statement of profit or loss, and adjusts the future depreciation charges accordingly.

“Investment property” in the consolidated balance sheet includes the net values of land, buildings and other structures which are held either for rental purposes or to generate a possible capital gain on their sale as a result of possible future increases in their respective market prices.

Foreclosed assets that, depending on their nature and purpose, are classified as real-estate investments by the Group, are initially recognised at the lower of the fair value net of sales cost and the acquisition cost, which is understood as the net carrying value of the debts that give rise to them, with the net value calculated pursuant to the provisions of the applicable regulations as set out in Note 2.18. Subsequently, these foreclosed assets are subject to the corresponding estimated impairment losses that, as applicable, are generated; to this end, an appraisal is carried out on whether the lease operation meets the following requirements:

- the lessee’s payment capacity is sufficient to repay the amounts agreed in the contract, and
- the market value of the asset in the price of the lease exceeds its carrying amount.

In the event that either of these two points are not met, the estimated fair value will be calculated using the internal methodologies set out in Note 2.18.

Additionally, at least once every year, the estimated useful life of the elements of property, plant and equipment is reviewed, in order to detect significant changes in them that, if produced, will be adjusted through the corresponding correction charged to the statement of profit or loss for future years in concept of their depreciation by virtue of the new useful lives.

Repair and maintenance expenses relating to fixed assets for own use are charged to “Other administrative expenses” on the consolidated statement of profit or loss (Note 39).

2.16 Intangible assets

Intangible assets are identifiable non-monetary and non-physical assets that arise from an acquisition from third parties or have been developed internally.

2.16.1 Goodwill

The positive difference between the price paid in a business combination and the acquired portion of the net fair value of the assets, liabilities and contingent liabilities of the acquired entities is recognised under assets on the balance sheet as goodwill. Goodwill represents a payment made by the group in anticipation of the future economic benefits from assets of an acquired entity that are not capable of being individually or separately identified and recognised. It is recognised only if it has been purchased for valuable consideration through a business combination. Goodwill is not amortised, but at the end of each accounting period it is subject to analysis for any possible impairment that would reduce its recoverable value to below its stated net cost and, if found to be impaired, is written down against the consolidated statement of profit or loss.

In order to verify if any impairment has taken place, the goodwill acquired in a business combination will be allocated from the date of acquisition among the cash generating units of the acquiring entity which are expected to benefit from the synergies produced by the business combination, irrespective of whether other assets or liabilities of the acquired entity are allocated to these units or groups of units. Each unit or group of units among which the goodwill is distributed:

a) will represent the lowest level of detail within the entity to which the goodwill is assigned for internal control purposes; and

b) will not be larger than an operating segment, as defined in Note 27.8.

Therefore, in the annual impairment test on goodwill, the recoverable amount of the CGU (higher of fair value or value in use) containing the goodwill is compared with that unit’s carrying value.

To detect possible indications of goodwill impairment, value appraisals are undertaken generally based on the medium-term dividend discount model, having regard to the following parameters:

- Key business assumptions. The cash flow projections used in the measurement are based on these assumptions. For businesses engaging in financial operations, projections are made for variables such as: changes in lending volumes, default rates, customer deposits and interest rates, as well as capital requirements.

- The period covered by the projections: This is usually five years, after which a recurring level is attained in terms of both income and profitability. These projections take account of the economic outlook at the time of the valuation.

- Discount rate. The present value of estimated future dividends, from which a value in use is derived, is calculated from a discount rate taken as the capital cost of the entity from the standpoint of a market participant. To do this the Capital Asset Pricing Model (CAPM) is used.

- The rate of growth used to extrapolate cash flow projections beyond the year in which they are considered standardised. Based on long-term estimates for the main macroeconomic numbers and key business variables, and bearing in mind the current financial market outlook at all times, a rate of growth in perpetuity is estimated.

Goodwill impairment losses are not reversed in a subsequent period.

2.16.2 Other intangible assets

Intangible assets other than goodwill are carried in the consolidated balance sheet at acquisition or production cost, net of accumulated amortisation and any impairment losses.

Intangible assets may have indefinite useful lives when, on the basis of the analyses performed, it is concluded that there is no foreseeable limit to the period during which they are expected to generate cash flows and they are not amortised. Rather, at each accounting close, the Group reviews the assets’ remaining useful lives in order to ensure that they are still indefinite. The Group has not identified any assets of this kind.

Intangible assets with a finite useful life are amortised over the useful life, applying policies similar to those followed for the depreciation of tangible assets. The annual amortisation of intangible assets with finite useful lives is recognised under “Depreciation – Intangible assets” in the income statement and is calculated on the basis of the years of estimated useful life as follows:

	Years of estimated useful life
Computer software	3 to 14
Trademark	5
Customer relationships (Core Deposits) of Banco Grupo Cajatrés, S.A.U.	6 to 10

During 2020, the useful lives of computer software were re-estimated based on a functional, technical and strategic analysis, with the new useful lives ranging from 3 to 14 years, compared to 3 to 5 years in 2019.

The Group recognises any impairment loss in the carrying amount of these assets and makes a balancing entry under “Impairment or reversal of impairment of non-financial assets (net) - tangible assets” in the consolidated statement of profit or loss. The policies for recognising impairment losses on these assets and for reversing impairment losses recognised in prior years are similar to those for property, plant and equipment (Note 2.15).

2.17 Inventories

This item in the consolidated balance sheet includes the non-financial assets that the consolidated entities:

- hold for sale in the ordinary course of business,
- are in the process of making, building or developing for such purposes, or
- expect to consume in production or the provision of services.

Inventories are valued at the lower of their cost, including all acquisition and conversion costs and other direct and indirect costs incurred in bringing the inventories to their present condition and location, and their net realisable value. The net realisable value of inventories is their estimated selling price in the ordinary course of business, less the estimated cost of completing production and selling expenses.

The cost of inventories which are not ordinarily interchangeable is determined on an individual basis and the cost of other inventories is determined by applying the average weighted cost method. Decreases in and, if applicable, subsequent recoveries of the net realisable value of inventories, below their carrying amount, are recognised in the consolidated statement of profit or loss in the financial year they are incurred, under “Impairment or reversal of impairment of non-financial assets (net) - Other”.

The carrying value of inventories which are written off the consolidated balance sheet is recorded as an expense in the consolidated statement of profit or loss under “Other operating expenses” in the year the income from their sale is recognised.

For assets foreclosed or received in settlement of debts which, according to their nature and purpose (in production, construction or development), are classified as inventories, the Group applies criteria similar to those described in Note 2.18 for said assets.

2.18 Non-current assets and disposal groups classified as held for sale

Under this heading, assets whose carrying amount will be recovered principally through a sale transaction rather than through continuing use are recognised, provided that the sale is considered highly probable.

These are valued on the acquisition date and thereafter at the lower of carrying value and fair value of the estimated costs to sell. Assets that would otherwise be subject to depreciation and amortisation are not depreciated or amortised while they remain in the category of non-current assets held for sale.

In particular, repossessed real estate assets or assets received in settlement of debts by the Group in order to partially or fully meet the payment obligations of its debtors are considered non-current assets and disposal groups of items that are classified as held for sale, unless the decision has been taken to make continuing use of these assets or they are used in operations as leased properties.

- The carrying value at the date of acquisition of non-current assets and disposal groups of items that are classified as held for sale from foreclosures or received in settlement of debts is defined as the outstanding amount receivable of loans or credit facilities from which they originate net of any related provisions according to their accounting classification before receiving said assets. These repossessed assets or assets received in settlement of debts are treated as collateral. This carrying amount is compared with the previous carrying amount and the difference is recognised as a an increase or release of provisions, as applicable.

To estimate the provisions mentioned, the recoverable amount of the guarantee is taken to be fair value less estimated costs to sell of the repossessed assets or assets received in settlement of debts, since the Group has sufficient sales experience to ratify its capacity to realise the assets at fair value.

- To determine the fair value of selling costs, the repossessed assets or assets received in settlement of debts are measured initially on the basis, as a reference value, of the market value calculated in complete individual appraisals applying the policies and criteria described under Guarantees in Note 2.3. In addition, the Group assesses whether it is necessary to apply a discount to this reference value given its experience in sales and the average time that similar assets are held on the balance sheet.

  With the exception of the certain properties, which do not account for a significant amount in this portfolio, classified under Other properties, to which the discount on the reference value provided by the Bank of Spain is applied as an alternative solution given its experience and the information it has on the Spanish banking sector, the Group has developed internal methodologies for estimating discounts on reference values and selling costs, taking into account its experience in selling similar assets.

For the purposes of determining impairment after the foreclosure date or receipt as payment, when the fair value of costs to sell exceeds the carrying amount, the difference is recognised in the consolidated statement of profit or loss as income from impairment reversals, subject to the limit of the accumulated impairment since the initial recognition of said assets. When an asset has surpassed the average period for holding properties, the Company reviews the procedure for determining fair value. Therefore, no impairment reversal income is recognised for these assets.

The Group carries out regular comparison and reference exercises for the estimates made and has devised backtesting methods for comparing estimated and actual losses.

As a result of these analyses, the Group makes changes to internal methodologies when regular backtesting brings to light significant differences between estimated losses and actual losses.

The backtesting methods and analyses are also revised by the internal control department.

Gains and losses generated on the disposal of non-current assets and disposal groups of items classified as held for sale and impairment losses and impairment reversals, where applicable, are recognised under “Profit or (-) loss on non-current assets and disposal groups classified as held for sale not qualifying as discontinued operations” on the consolidated statement of profit or loss. The remaining income and expenses associated with these assets and liabilities are disclosed by nature.

2.19 Insurance transactions

The assets and liabilities of the Group’s insurance companies are recorded, depending on their nature, under the corresponding headings in the consolidated balance sheet.

The technical reserves for ceded reinsurance, calculated on the basis of the relevant reinsurance treaties applying the same criteria as for direct insurance, are recognised under “Assets under insurance or reinsurance contracts” (Note 14).

The technical provisions for direct insurance and accepted reinsurance recognised by the consolidated insurance company to cover the obligations arising from the insurance contracts in force at the end of the period are presented in the consolidated balance sheet under “Liabilities under insurance or reinsurance contracts” (Note 20).

In addition, the Group corrects the accounting asymmetries that arise in insurance transactions that are not covered by the Group’s insurance policies:

- are financially immunised,
- link the surrender value to the value of the assets specifically assigned,
- envisage a share in the profits of a related asset portfolio,
- are characterised by the fact that the policyholder assumes the investment risk.

The adjustment consists of symmetrically recognising the changes in the fair value of the financial assets linked to insurance activity classified in the categories “Financial assets not held for trading mandatorily measured at fair value through profit or loss” and “Financial assets at fair value through other comprehensive income”.

The balancing entry for these changes is the life insurance provision, when this is required by Spanish insurance legislation, or a liability account (with a positive or negative balance) for the portion not recorded as in the life insurance provision which is disclosed under “Other liabilities” on the consolidated balance sheet.

In accordance with accounting standards specific to the insurance sector, group insurance companies record a revenue for the amount of premiums issued during the year and an expense for the cost of claims when these are made known. These accounting practices require insurance companies to apportion the amounts credited to the statement of profit or loss and not accrued at that date at year-end.

The most significant accruals and deferrals made by the consolidated entities in relation to direct insurance purchased by them are: unearned premiums, benefits, life insurance when the investment risk is assumed by the policyholder, share in profits and returned premiums.

Life insurance provisions

They represent the value of the institution’s obligations net of the Policyholder’s obligations for life insurance at the end of the financial year.

Life insurance reserves are broken down into the unearned premium reserve for insurance whose period of coverage is equal to or less than one year plus, where appropriate, the provision for current risks and, for other insurance, the mathematical reserves.

- **Unearned premium reserve**

The unearned premium reserve relates to the fraction of the premiums in the year that is allocated to the period between the year-end date and the end of the contract coverage period. The reserve is calculated for each individual policy, applying the actuarial bases contained in its technical notes.

- **Provision for current risks**

This provision is set up for each line of insurance in so far as the amount of the unearned premium reserve is not sufficient to reflect the value of all the risks and expenses to be covered by the institution for the coverage period not elapsed at the end of the financial year.

The necessary claims study has been carried out to determine the need for the provisioning of the Current Risk Provision on the basis of the provisions of Art. 31 of the Insurance Regulation, with a positive balance, which shows that there is no obligation to record the aforementioned provision.

- **Mathematical reserves**

The mathematical reserves represents the difference between the actuarial present value of the entity’s future obligations and those of the policyholder or, if applicable, the insured party. Its calculation is made policy by policy, via an individual system and applying a prospective method, taking as a basis for calculation the inventory premium accrued in the year.

Calculation of the mathematical reserves was based on the provisions of the Regulation for the Organisation and Supervision of Private Insurance approved by Royal Decree 2486/1998 of 20 November, Royal Decree 239/2007 of 16 February and Order EHA/339/2007 of 16 February, as well as its subsequent amendments and the Resolutions of the Directorate General of Insurance of 6 July 2012 and 9 March 2015.

However, pursuant to the Second Transitional Provision of the Regulations, for insurance contracted before the entry into force of the Regulation for the Organisation and Supervision of Private Insurance, if the real yield obtained from the investments concerned in the financial year was lower than the technical rate used, the Company would calculate the mathematical reserves by applying an interest rate equal to the yield actually obtained.

The insurance company calculates the mathematical reserves of a significant part of its insurance portfolio in accordance with article 33.2 of the Regulation for the Organisation and Supervision of Private Insurance, measuring it by the maximum interest rate derived from the internal rate of return of certain investments allocated to the product, provided that certain requirements established in the applicable regulations are met by means of matching flows.

On 2 December 2015, Royal Decree 1060/2015 of 20 November was published on the organisation, supervision and solvency of insurance and reinsurance undertakings. It came into force on 1 January 2016 and its main purpose is to complete the transposition of European Solvency II regulations into Spanish law.

As a result of the foregoing, the institution has applied the fifth additional provision, which is mandatory for it, in relation to the interest rate for the calculation of technical provisions for accounting purposes of life insurance with respect to contracts entered into on or after 1 January 2016.

In 2017, the insurance company, pursuant to the provisions of section 1 of the fifth additional provision of Royal Decree 1060/2015, of 20 November, on the Regulation, Supervision and Solvency of Insurance and Reinsurance Companies, accepted, with regard to the interest rate to be used in the calculation of the life insurance provision for contracts concluded before 1 January 2016 and whose calculation is governed by the provisions of sections 1.a.1 and 1.b)1 of article 33 of the Regulation for the Organisation and Supervision of Private Insurance, to the option of adapting to the relevant temporary structure of risk-free interest rates provided for in article 54 of this Royal Decree, including, where appropriate, the component relating to the adjustment for volatility provided for in article 57 of this Royal Decree.

- **Reserves for benefits pending payment**

This represents the amount of the institution's outstanding obligations arising from claims occurring prior to the year-end date, which is equal to the difference between its total estimated or certain cost, including external and internal file management and administration expenses, and all the amounts already paid in respect of such claims.

In order to determine their amount, claims are classified by year of occurrence, with each claim being measured individually.

- **Reserves for benefits pending declaration**

The reserves for claims pending declaration has been estimated based on the information and experience in previous years of the Insurer, as established in article 41 of the Royal Decree 239/2007, of 16 February, amending the Regulation on the Organisation and Supervision of Private Insurance approved by Royal Decree 2486/1998 of 20 November.

- **Provision for claim settlement expenses**

It reflect the amount sufficient to cover the internal expenses of the institution necessary for the total settlement of the claims. The provision for benefits for settlement expenses has been estimated as set out in article 42 of Royal Decree 239/2007, of 16 February, amending the Regulation on the Organisation and Supervision of Private Insurance approved by Royal Decree 2486/1998 of 20 November.

Provision for profit sharing and returned premiums

It contains the amount of the benefits accrued in favour of the policyholders, insured parties or beneficiaries and the amount of the premiums that should be returned to the policyholders or insured parties, if applicable, by virtue of the behaviour experienced by the insured risk, as long as they have not been allocated individually to each of them.

Provisions for life insurance in which the investment risk is borne by the policyholders

The provision for life insurance in which it is contractually estimated that the risk of the investment is borne by the policyholder is determined on the basis of the technical notes for each type and on the basis of the investments concerned in order to establish the economic value of the policyholder's rights.

The Group carries out various procedures and has implemented controls to ensure the sufficiency of technical reserves, including:

- With regard to insurance reserves with mortality risk: the provision for current risks is calculated annually as detailed above. This calculation involves the preparation of a profit or loss account for the last two years of mortality risk in order to determine that the premiums collected, determined with the same mortality tables used for the calculation of technical reserves, are higher than the claims actually incurred. The fact that the mortality business yields profits ensures the sufficiency of the provisions made.

- With regard to insurance reserves with longevity risk: each year, the Group obtains real historical mortality assumptions in relation to this activity, for application in the Solvency II calculations (Best Estimate Liability and Capital Requirements (SCR)). For this generation of assumptions, the company's historical mortality rate in these products compared with the mortality tables applied in the collection of premiums and in the calculation of technical reserves. The fact that the reality does not differ from the tables applied ensures the sufficiency of the provisions made with these tables.

- Every month, from the second line of defence (control), the results obtained by the company are monitored by product, differentiating the financial result from the technical result (result associated with insurance risk). The observation that positive technical results are being generated in the different products ensures the sufficiency of the technical provisions set up.

- The Group has a specific Internal Audit function for the insurance activity which is set up as a third line of defence, independent from the rest of the company's units, which, as part of its action planning, periodically reviews the adequacy of the technical reserves associated with each insurance line.

- Lastly, the Group's external auditor issues the "Report on the Financial Condition and Solvency of the insurance company".

2.20 Provisions and contingent liabilities

When preparing the financial statements of the consolidated companies, their respective directors distinguished between:

- Provisions: credit balances covering present obligations at the date of the balance sheet arising from past events which could give rise to pecuniary losses for the entities that are considered likely to occur, are certain as to their nature but uncertain as to their amount and/or timing.

- Contingent liabilities: possible obligations that arise from past events and whose existence is conditional on the occurrence or non-occurrence of one or more future events not within the control of the consolidated entities.

The Group's consolidated financial statements include all the material provisions with respect to which it is considered more likely than not that the obligation will have to be settled. Contingent liabilities are not recognised in the consolidated financial statements, although they are disclosed in accordance with applicable regulations (Note 27.1).

Provisions, which are quantified taking into account the best information available concerning the consequences of the event from which they derive and are re-estimated at each accounting close if new information comes to light, are used to cover the specific obligations for which they were originally recognised and reversed in full or in part when such obligations cease to exist or decrease.

Provisions considered necessary in accordance with the above criteria are debited or credited to "Provisions or reversal of provisions" on the consolidated statement of profit or loss.

At year end, certain litigation and claims were ongoing against the consolidated companies arising from the ordinary course of their operations. The Group's legal advisers and directors consider that the outcome of such lawsuits and proceedings will not have a material effect on the consolidated financial statements in the years in which they are settled.

2.21 Consolidated statements of recognised income and expenses

In accordance with the options established in IAS 1.81, the Group has chosen to present separately a statement showing the components of consolidated profits ("consolidated statement of profit or loss") and a second statement which, on the basis of consolidated profits for the year, reflects the components of the remaining income and expenses for the year recognised directly in equity ("Consolidated statement of comprehensive income").

The "Consolidated statement of comprehensive income" shows the income and expense generated by the Group as a result of its activity during the year, distinguishing between items of income and expense that are recognised in profit and loss for the year and items of income and expense that, as required under current regulations, are recognised directly in consolidated equity.

In general, income and expenses recognised directly in equity are disclosed at the gross amount and the relevant tax effect is reflected under "Corporate Income Tax".

Therefore, this statement shows:

a) Consolidated profit/(loss) for the year.

b) The net amount of income and expenses recognised as “Other accumulated comprehensive income” in equity, which will not be reclassified to profit or loss.

c) The net amount of income and expenses recognised in equity, which may be reclassified to profit or loss.

d) Corporation tax accrued on the items indicated in (b) and (c) above, except for adjustments to other comprehensive income arising from investments in associates or jointly controlled entities accounted for using the equity method, which are presented on a net basis.

e) Total consolidated recognised income and expenses, calculated as the sum of the foregoing letters, showing separately the amount attributed to the parent and the amount attributed to non-controlling interests.

2.22 Total statement of changes in equity

The “Total statement of changes in equity” presents all changes in equity, including those arising from changes in accounting criteria and the correction of errors. This statement therefore reflects a reconciliation of the carrying value at the beginning and end of the year for all items forming part of consolidated equity, grouping movements on the basis of their nature into the following items:

a) Adjustments due to changes in accounting principles and correction of errors: Includes changes in consolidated equity due to the retroactive adjustment to financial statement balances because of changes in accounting principles or to correct errors.

b) Comprehensive income for the year: comprises an aggregate of all the aforementioned items recognised in the statement of comprehensive income.

c) Other changes in equity: includes the remaining items recognised in equity, such as capital increases or decreases, distribution of earnings, treasury share transactions, equity-based payments, transfers between equity items, and any other increase or decrease in consolidated equity.

2.23 Consolidated statement of cash flows

The following expressions are used with the following meaning in the consolidated cash flow statement:

- Cash flows: inflows and outflows of cash and cash equivalents, understood as on-demand investments.

- Operating activities: the ordinary activities of credit institutions. Activities involving financial instruments are regarded as operating activities, with certain exceptions such as the equity instruments classified as financial assets at fair value through other comprehensive income which are strategic investments and subordinate financial liabilities.

- Investing activities: the acquisition, sale or other disposal of long-term assets and other investments not included in cash and cash equivalents.

- Financing activities: activities that result in changes in the size and composition of equity and liabilities do not form part of operating activities.

For the purposes of preparing the consolidated cash flow statement, “cash and cash equivalents” are considered to be short-term, highly liquid investments with an insignificant risk of changes in value. The Group therefore treats the following financial assets and liabilities as cash or cash equivalents:

- The Group’s own cash, which is recognised in the consolidated balance sheet under “Cash and cash balances at central banks and other demand deposits” (Note 6).

- Net demand balances held with Central Banks, recognised in the consolidated balance sheet under “Cash and cash balances at central banks and other demand deposits” (Note 6).

- Net balances of demand deposits at credit institutions other than the balances at central banks. Debtor balances are recognised in the consolidated balance sheet under “Cash and cash balances at central banks and other demand deposits” (Note 6). Creditor balances are recognised under liabilities on the consolidated balance sheet under the heading “Financial liabilities at amortised cost – Deposits – Credit institutions” (Note 19.2).

3. <u>Risk management</u>

3.1 General principles

The Ibercaja Group's risk management is based on the strategic principles described below:

- Maintain a medium-low risk profile.
- Comply with regulatory requirements at all times, and with the capital and liquidity targets set in the self-assessment processes.
- Maintain strong risk governance with the effective involvement of senior management and the Board of Directors.
- Foster a risk-aware culture and support the organisation's suitable understanding of the level and nature of risks to which it is exposed.
- Maintain and reinforce the trust of customers, investors, employees, suppliers and other stakeholders.
- Maintain levels of credit, market and interest rate risk that ensure a medium-low risk profile and the objectives of profitability and solvency.
- Avoid concentration of risks in any form (individual, economic groups, sectorial, etc).
- Avoid the materialisation of operational, regulatory, legal or reputational risks through active and continuing risk management.
- Maintain a liquidity position that ensures that payment obligations can be met.
- Maintain suitable levels of risk-adjusted returns to ensure achievement of profit targets.

3.2 Catalogue of material risks for the Ibercaja Group

The material risks identified by the Ibercaja Group in the course of its business are as follows:

- Credit risk: the risk of loss due to borrowers' breach of payment obligations, and loss of value due to impairment in borrowers' credit quality. Includes the following sub-categories:
    - Concentration risk: These are defined as the risk of incurring losses as a result of a position or group of positions that are sufficiently important with respect to capital, total assets or the general risk level, and could endanger the solidity of the Group.
    - Real estate risk: Risk of impairment of properties used as collateral in financing transactions or acquired through foreclosure arising from periods of crisis in the real estate market.
    - Sovereign risk: This relates to the risk that the country in which the investment is made, often in the form of purchase of bonds and government debt, will default on its payment obligations, outside the normal risks of a common credit operation.
- Operational Risk: reflects potential loss resulting from a failure to adequately design or implement processes, personnel and internal systems, or a loss arising from external events. Includes the following sub-categories:
    - Reputational risk: Risk tied to the perception of stakeholders (customers, investors, employees, suppliers and others), from which economic losses may derive.
    - Legal risk: the possibility of financial loss due to failure to comply with applicable legal and administrative provisions, issuance of unfavourable administrative and judicial decisions, application of fines or sanctions in relation to any of the bank's operations, processes or activities, such as errors in legal opinions, contracts, bonds or any legal document, such as to preclude enforceability of a right or determine the legal impossibility of enforcing a contract due to failures of legal implementation.
    - Technological risk: the probability that the bank's ICT (information and communication technologies) services or infrastructure will not achieve the service levels necessary to support business processes with sufficient effectiveness, as a consequence of an event that affects the availability, integrity or confidentiality of the data, applications and networks that make up such infrastructure, causing economic loss or other types of loss.

- Market risk: the possibility of incurring losses due to maintaining market positions as a result of adverse movements in financial variables or risk factors (interest rates, exchange rates, share prices, commodity prices, etc.) that determine the value of those positions. This risk affects the trading portfolio and the “hold to collect and sell” portfolio.

- Interest rate risk: the risk that the financial margin or economic value of the Bank are affected by adverse variations in interest rates that impact the cash flows of financial instruments.

- Liquidity and financing risk: the possibility of incurring losses due to not having access to sufficient liquid funds to meet payment obligations.

- Business and profitability risk: the probability of incurring losses as a result of not generating sufficient profitable business volume to cover the costs incurred. In addition, the risk encompasses extraordinary threats, which may endanger the continuity of the business or the Bank.

- Insurance business risk. In addition to its banking business risk, Ibercaja Banco, as a financial conglomerate, must specifically manage and control its insurance business risk. Material risks of this business include interest rate risk, spread risk, concentration risk, counterparty risk, underwriting risk, operational risk and sovereign risk.

- Adequacy of own funds: Possibility of having an inadequate quantity or quality of capital to meet internal business objectives, regulatory requirements or market expectations.

3.3 Global risk management processes and tools

<u>Risk Appetite Framework (RAF)</u>

The Group’s risk management is organised through the Risk Appetite Framework (RAF). The key aim of the Ibercaja Group’s RAF is to establish a set of principles, procedures, controls and systems through which the Bank’s risk appetite is specified, communicated and monitored.

Risk appetite is the level or profile of risk that the Ibercaja Group is willing to accept and maintain, in terms of type and amount, and its level of tolerance. Risk appetite must be geared towards achieving the targets of the strategic plan, in accordance with the lines of action established in that plan.

The management of the various risks has the objective of attaining a risk profile that falls within the desired appetite level defined based on established limits and the most adequate management measures to do so are implemented.

The RAF contains the risk appetite statement, the risk limits and the duties and responsibilities of the various governing and management bodies that supervise implementation and monitoring.

The Risk Appetite Framework defined by Ibercaja Group is characterized by:

- Alignment with the strategic plan and capital planning.

- Integration into the entity’s risk culture, with the involvement of all levels of responsibility.

- Flexibility, capable of adapting to changes in the businesses and market conditions and therefore it must be regularly reviewed at least on an annual basis.

- Associated with the information management systems.

<u>Internal Capital/Liquidity Adequacy Assessment Process (ICAAP & ILAAP)</u>

The internal capital and liquidity adequacy assessment processes (ICAAP and ILAAP) seek to provide certainty about the risks to which the Bank is or may be exposed and its ability to remain viable, while maintaining an adequate level of capitalisation and liquidity and managing its risks effectively.

This requires prospective assurance that all material risks are identified, managed effectively (with an appropriate combination of measurement and controls), and covered by a sufficient amount of high-quality capital, in the case of ICAAP, and by a sufficient amount of liquid assets and stable sources of financing, in the case of ILAAP.

The purpose of ICAAP and ILAAP is to ensure an adequate relationship between the Bank's risk profile and the own funds that it effectively holds. To do this, a recurring process is carried out that allows:

In relation to capital.

- Identify material risks whose materialisation could impair the capital base of the Ibercaja Banco Group.
- Assess the Group's ability to manage the main risks identified: policies, mitigation limits, tools, governance and monitoring.
- Quantify capital needs, additional to Pillar 1, for material risks using internal methodologies.
- Conduct a capital planning exercise based on a projection of the future development of the business.
- Realise severe but plausible adverse scenarios.
- Assess the results of the self-assessment and identify whether there are capital shortfalls relative to the levels needed to cover the requirements of Pillar 1, Pillar 2, the combined buffer, the capital guideline and the economic quantification.
- Establish action plans to respond to any situation of capital shortage.
- Present a formal and unequivocal statement on the adequacy of the Group's capital.

In relation to liquidity.

- Identify the material risks whose materialisation could impair Ibercaja Banco's liquidity position.
- Assess the Group's ability to manage the main risks identified: policies, mitigation limits, tools, governance and monitoring.
- Assess the adequacy of the Group's funding strategy in line with the business model and its risk profile, as well as the extent to which financial planning contributes to improving the funding profile.
- Assess the Group's ability to cope with unexpected liquidity stress, considering the possibility of facing stress conditions specific to the nature of the Group, the financial system or a combination of both.
- Assess the availability of alternative sources of funding in case of changes in market conditions.
- Present a formal and unequivocal statement on the adequacy of the Group's liquidity.

<u>Recovery Plan</u>

Ibercaja Banco's recovery plan is a response to the requirement under Directive 2014/59/EU of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms, or "Bank Recovery and Resolution Directive" (BRRD). The main objectives of the plan are:

- To provide a detailed view of the Bank, including an analysis of its main lines of business and critical economic functions.
- To describe the process of development, approval and updating of the plan, and how it is integrated into the Bank's procedures.
- To describe in detail the model of escalation and decision-making in a situation of continuity, early warning and recovery.
- To identify the set of recovery indicators that are to be monitored periodically to anticipate any situations of severe stress.
- To set out the selected recovery measures, which could be taken in a recovery situation to restore Ibercaja's capital and liquidity position. For each recovery measure, a feasibility and financial impact analysis was carried out, an operational plan was designed for its implementation, a communication plan was rolled out, and needs were analysed from an information management point of view. In addition, a test of the effectiveness of the measures in the face of hypothetical stress scenarios is described.

- To design the internal and external communication plan to be carried out in a recovery situation.

- To describe preparatory measures.

These management frameworks (RAF, ICAAP & ILAAP and the Recovery Plan) are consistent with one another, form part of the risk management processes in place and are reviewed and approved by the Bank's Board of Directors on an annual basis.

3.4 Governance Model

The Ibercaja Group has a robust organisational structure that allows it to ensure effective risk management and control. The governance structure provides adequate channels of communication to convey information and decisions at all levels of the organisation.

The following are the Governing Bodies and Executive Committees that directly address risk management and control.

3.4.1 Governing Bodies

Board of Directors

The Board of Directors is the body responsible for ensuring a robust risk culture, establishing the strategic lines of risk management and control and approving policies, manuals and procedures relating to risk management.

Its risk management and control duties and powers include:

- Establishing and approving the Ibercaja Group's Risk Appetite Framework (RAF) after a report from the Large Exposures and Solvency Committee, and review it at least once a year or whenever necessary depending on the circumstances.

- Evaluating and supervising the risk profile and its alignment with the established framework and the Group's strategy, and approving the internal capital and liquidity adequacy assessment process (ICAAP & ILAAP) reports.

- To approve and periodically review the strategies and policies for accepting, managing, supervising and reducing the risks to which the Group is or may be exposed, including risks posed by the macroeconomic situation in which it operates in relation to the current stage of the economic cycle.

- To actively participate in the management of material risks covered by solvency regulations and ensure that the organisation has adequate resources for such management.

- To ensure that the necessary action plans and corrective measures are in place to manage limit overshoots.

- To establish and supervise the Group's risk information and control systems, following a report from the Large Exposures and Solvency Committee.

- To ensure that all aspects of capital planning are integrated with management in line with the scenarios used in the Strategic Plan, the Risk Appetite Framework and the Financing Plan.

The boards of directors of the subsidiaries are responsible for approving the respective risk appetite proposals once they have been validated by the Global Risk Committee and the Large Exposures and Solvency Committee.

The Ibercaja Group is a financial conglomerate and its insurance business is significant, so it jointly manages the risks arising from the banking and insurance businesses.

Large Exposures and Solvency Committee

The Large Exposures and Solvency Committee has had powers delegated to it by the Board of Directors to carry out the functions of framing and supervising risk management.

Its risk management duties and powers include:

- To report to the Board of Directors, prior to approval, on the Bank's Risk Appetite Framework (RAF), the Risk Appetite Statement (RAS), the internal capital and liquidity adequacy assessment process (ICAAP & ILAAP) reports and the Recovery Plan, ensuring that they are consistent with other policies and with the Bank's strategic framework.

- To review the effectiveness of the risk management framework and internal control systems.

- To periodically review compliance with risk appetite (significant risk exposures, breaches of limits and agreed management measures).

- To receive adequate information from management so as to be able to identify the risks faced by the Bank and its Group; to be able to assess and, where appropriate, propose measures to mitigate the impact of the risks identified.

<u>Strategy Committee</u>

The Strategy Committee has the core function of informing the Board of Directors of the Bank's strategic policy, ensuring that there is a specific organisation in place for its implementation.

<u>Audit and Compliance Committee</u>

The committee's duties are expressly stipulated in the Regulations of the Board of Directors. In particular: to inform the general meeting regarding any matters raised by shareholders with respect to areas under its authority; to supervise the effectiveness of the Bank's internal control, internal audit and risk management systems, including tax risks; to supervise the process of preparing and presenting regulated financial information; to propose the designation or re-election of the financial auditor; to establish appropriate relations with the external auditor and to receive information regarding its independence; to receive annual information from the external auditor confirming its independence with respect to the Bank or its Group; and to issue the relevant report.

3.4.2 Executive Committees

<u>Global Risk Committee</u>

Executive body responsible for defining and monitoring the Group's risk strategies and policies. The main functions and responsibilities of the Global Risk Committee are:

- To report periodically to the Large Exposures and Solvency Committee on the degree of compliance with the metrics established in the Risk Appetite Statement, proposing, where appropriate, the action plans required to correct overshoots or breaches.

- To submit the proposed RAF, the internal capital and liquidity adequacy assessment process (ICAAP & ILAAP) reports and the Recovery Plan to the Large Exposures and Solvency Committee for evaluation and analysis with a view to consistency with the Group's risk management policy and strategic plan.

- To evaluate and approve action plans in response to alerts or overshoots, prior to referral to the Large Exposures and Solvency Committee.

- To ensure that the Group has adequate procedures and means in place for the identification, measurement, follow-up and monitoring of the risk profile.

<u>Audit Committee</u>

The Audit Committee is responsible for preparing the Internal Audit Annual Operating Plan presented to the Audit and Compliance Committee, receiving regular information regarding the results set out in the internal audit reports and implementing the proposed improvement recommendations to mitigate any observed weaknesses.

The organisational scheme provides the Bank with a global structure of governance and risk management, in proportion to the complexity of the Ibercaja Group's business, with three lines of defence:

- First line of defence: Configured by the Group's risk-taking business and support units.

- Second line of defence: Located organisationally in the General Secretary's Office-Control Department as the head of the second line, it acts independently of the business units. The second line comprises the Risk Control functions, which monitor and report risks and review the application of management policies and control procedures by the first line, and the Compliance functions, in charge of reviewing that business is conducted in accordance with applicable legislation, regulations and internal policies.

- Third line of defence: Internal audit, as an independent function that provides an assessment and proposals for improving risk management and control processes.

3.5 Exposure to credit risk

Defined as the possibility of losses being generated due to borrowers defaulting on their payment and losses in value due to the impairment of borrowers' credit ratings.

3.5.1 Strategies and policies for the credit risk management

Credit risk management is geared towards facilitating sustained and balanced growth in loans and receivables while guaranteeing at all times the soundness of the Company's position in financial and equity terms, so as to optimise the return / risk ratio within levels of tolerance established by the Board of Directors based on the defined management principles and operational policies.

The Board of Directors approves the management framework, strategies, policies and limits for the management of this risk, following a report from the Large Exposures and Solvency Committee, documented in the "Credit Risk Management Framework", the "Irregular Assets Management Framework" and the "Risk Models Management Framework" and the various policy manuals that implement those frameworks. The manuals include, inter alia, the action guidelines for the main operating segments and maximum risk lines with the main borrowers, sectors, markets and products. The Board of Directors is responsible for authorising risks that exceed the competence of the operating circuit.

In the current context of the health pandemic, the Entity, through the various support measures (public and private) put in place as a result of the Covid-19 crisis, has offered its customers solutions in keeping with their financial condition. The company has also implemented the guidelines issued by the regulator on the treatment and accounting recognition of such aid. (Note 11.6.1)

The Entity has carried out exercises to identify borrowers affected by this crisis, in order to assess their payment capacity, and the customers and exposures identified as having a higher risk profile, the Entity has carried out various risk management and accounting recognition actions.

The impact of the Covid-19 crisis, the support measures granted and their characteristics, as well as macroeconomic forecasts have been considered in the projection of the financial statements for the coming years, with special attention to the foreseeable development of inflows and outflows of non-performing loans, accounting provisioning and solvency.

3.5.2 Credit risk granting, monitoring and recovery policies

The loan portfolio is segmented into groups of customers with homogeneous risk profiles susceptible to different treatment through the application of specific evaluation models.

a) In relation to the granting of credit risk, the following policies have been implemented:

- Classifications of risk for borrower groups through the establishment of prior exposure limits, in order to avoid inappropriate risk concentrations.

- Criteria for the admission of new operations and limits to granting powers, depending on the customer segment being financed.

- Methodology for operations analysis based on type and correspondence to different segments.

- Internal credit rating models integrated with decision-taking systems for the various areas of the retail business.

- Requirements necessary to provide each operation with legal safeguards.

- Risk mitigation techniques.

- Pricing policies in line with customers' credit quality.

The credit risk management policy is structured through a decentralised lending arrangement based on a formally established delegation of powers and set out in risk manuals.

The Bank has established in its “Admission Policies Manual” risk concession policies in accordance with Law 2/2011 of 4 March on Sustainable Economy, Order EHA/2899/2011 of 28 October on transparency and protection of customers of banking services and Bank of Spain Circular 5/2012, of 27 June on transparency of banking services and responsibility in the granting of loans and credit, the General Framework of Annex IX of Circular 4/2017 and in accordance with the Guidelines on Loan Origination and Monitoring (Guidelines on Loan Origination and Monitoring EBA/GL/2020/06) published in May 2020.

With respect to granting loans, the manual considers essential criteria to be the reasonableness of the proposal, the analysis of the borrower’s payment capacity and the prudent valuation of guarantees. Real-estate collateral is always appraised by independent valuation companies (authorised by the Bank of Spain).

In terms of banking services customer protection and transparency standards, the Group performs the following actions:

- Current rates (interest, fees and expenses) applied to the various financial products are displayed at branches.

- Rates in force are reported quarterly to the Bank of Spain.

- The rates applied in products can be consulted on the Company’s website (http://contransparencia.ibercaja.es).

- Customers are provided with documentation setting out contractual conditions before any contract is signed. A copy of the contract is subsequently given to the customer.

- Every January, customers receive personal reports giving details of interest, fees and expenses applied during the preceding year in the products they have contracted.

The Internal Audit Department, as part of the control actions performed at the branches, is responsible for overseeing compliance with the established policies and procedures.

b) In the area of credit risk monitoring, the main objective is to identify in advance any impairment in borrowers’ risk quality, to take corrective action and minimise the adverse impact of any entry into default of the exposure, or of classification of the exposure as Stage 2.

The credit risk monitoring function is carried out on the basis of individual monitoring of customers whose exposure or risk profile requires greater attention, monitoring at the portfolio level, as well as individual monitoring of the metrics and thresholds of the Risk Appetite Framework (section 2 of the Credit Risk Management Framework), and another series of operational or second level indicators, which complement the aforementioned metrics.

Some of the credit risk monitoring conducted at the Bank, including classification and estimation of allowances for exposures, is based on Annex IX “Analysis and Coverage of Credit Risk”, of Bank of Spain Circular 4/2017, of 27 November. Those regulatory provisions require institutions to have policies in place for credit risk assessment, monitoring and control that require the utmost care and diligence in the study and rigorous evaluation of the credit risk of transactions, both when granted and throughout their term of effect. Under this Circular, the Bank considers borrowers with respect to which exposure exceeds 3 million euros to be individually material borrowers.

The principles, procedures and key tools on which the monitoring function is based to carry out its work effectively are set out in the Bank’s Credit Risk Monitoring Policy.

c) Integrated management risk is completed by recovery policies aimed at avoiding or minimising potential default through specific recover circuits based on the quantity and nature of the operations concerned and with the involvement of various internal and external managers to tailor the actions required by each situation.

3.5.3 Country risk

This is defined as the possibility of incurring losses due to the failure of a country to comply with payment obligations due to circumstances other than normal commercial risk. Comprises sovereign risk, transfer risk and other risks inherent to international financial activities.

Countries are classified into six groups in accordance with Bank of Spain Circular 4/2017, on the basis of their rating, economic performance, political situation, regulatory and institutional framework, payment capacity and payment record.

In relation to sovereign risk, the Company has maximum limits for public debt issued by European Union States and other States, also based on their corresponding ratings.

3.5.4 Information on the credit risk of financial instruments

There follows a description of the credit quality of the portfolio of non-trading financial assets mandatorily measured at fair value through profit or loss (Note 8) and of the portfolio of financial assets at amortised cost (Note 11) at 31 December 2021 and 2020:

	Thousands of euros			
	31/12/2021			
	Stage 1	Stage 2	Stage 3	Total
Gross amount	**39,253,900**	**1,559,842**	**717,621**	**41,531,363**
Accumulated negative changes in fair value due to credit risk from non-performing exposures	**-**	**-**	**1,278**	**1,278**
Allowances for impairment of assets	**46,049**	**111,280**	**381,860**	**539,189**
Of which: calculated collectively	*46,049*	*96,904*	*286,866*	*429,819*
Of which: calculated separately	-	*14,376*	*94,994*	*109,370*
Net amount	**39,207,851**	**1,448,562**	**334,483**	**40,990,896**

	Thousands of euros			
	31/12/2020			
	Stage 1	Stage 2	Stage 3	Total
Gross amount	**37,712,925**	**1,677,854**	**1,012,938**	**40,403,717**
Accumulated negative changes in fair value due to credit risk from non-performing exposures	**-**	**-**	**2,241**	**2,241**
Allowances for impairment of assets	**52,154**	**132,330**	**460,616**	**645,100**
Of which: calculated collectively	*52,154*	*120,060*	*363,511*	*535,725*
Of which: calculated separately	-	*12,270*	*97,105*	*109,375*
Net amount	**37,660,771**	**1,545,524**	**550,081**	**39,756,376**

Impairment adjustments to collectively calculated assets amount to 2 thousand euros at 31 December 2021 (57 thousand euros at 31 December 2020) due to country risk.

In relation to the maximum level of exposure to credit risk, the most significant sectors of activity are detailed in relation to non-trading financial assets mandatorily measured at fair value through profit or loss (Note 8) and financial assets at amortised cost (Note 11), by transaction purpose:

	Thousands of euros	
	2021	2020
Public sector	10,571,973	7,453,249
Credit institutions	421,129	405,120
Real estate construction and development	1,044,664	1,033,184
Other production activities	9,229,100	10,525,004
Housing acquisition and refurbishment	18,385,389	19,052,798
Consumer and other household lending	765,958	807,713
Other sectors not classified	1,113,150	1,126,649
	41,531,363	**40,403,717**

With respect to the maximum level of exposure to credit risk, financial assets at amortised cost (Note 11) secured by collateral or credit enhancements are as follows:

	Thousands of euros	
	2021	2020
Mortgage guarantees	20,887,418	21,857,969
Pledges - financial assets	161,579	74,900
Off-balance sheet guarantees – public sector, credit institutions, mutual guarantee funds	3,278,296	3,175,311
Guarantees - public sector debt	1,615,394	1,620,857
	25,942,687	**26,729,037**

Guarantees received and financial guarantees granted break down as follows at 31 December 2021 and 2020:

	Thousands of euros	
	2021	**2020**
Value of collateral	20,621,799	21,535,458
Of which: guarantees risks on special watch	*1,003,794*	*1,124,234*
Of which: guarantees non-performing risks	*424,694*	*642,981*
Value of other collateral	7,120,648	7,344,364
Of which: guarantees risks on special watch	*696,350*	*713,748*
Of which: guarantees non-performing risks	*249,032*	*316,958*
Total value of the collateral received	**27,742,447**	**28,879,822**

	Thousands of euros	
	2021	**2020**
Loan commitments given (Note 27.3)	**3,220,412**	**3,288,448**
Of which: classified as non-performing	*5,383*	*5,732*
Amount recognised under liabilities on the balance sheet (Note 21)	4,174	4,898
Financial guarantees granted (Note 27.1)	**97,630**	**93,631**
Of which: classified as non-performing	*4,733*	*5,495*
Amount recognised under liabilities on the balance sheet (Note 21)	6,073	6,048
Other commitments given	**820,619**	**795,006**
Of which: classified as non-performing	*25,359*	*31,270*
Amount recognised under liabilities on the balance sheet (Note 21)	6,460	8,531

At December 2021 the LTV (loan to value, reflecting the relationship between the financial transaction balance and the value of the guarantee associated with that transaction) of the Ibercaja Group's mortgage portfolio stood at 50.16% (51.14% at December 2020).

The classification of non-trading financial assets mandatorily measured at fair value through profit or loss (Note 8), of fixed-income assets at fair value through other comprehensive income (Note 10) and financial assets at amortised cost (Note 11) that are impaired, distinguishing between those where impairment arises from non-payment and those where it emerges from other factors, is as follows:

	Thousands of euros	
	2021	**2020**
Customer default	572,801	839,140
Other factors	144,820	173,798
	717,621	**1,012,938**

The main factors taken into account to calculate impairment for reasons other than non-payment are those reflected in Note 2.3.

There are generally no non-performing financial assets that are not impaired. The only exceptions to this rule are transactions where the Public Sector is the titleholder or which are secured through a cash guarantee and the amount involved is insignificant.

Note 11.4.1 includes a breakdown of assets due and not impaired, stating whether they have been outstanding for less than 90 days.

3.5.5 Information concerning risk concentration, refinancing and restructuring

3.5.5.1 Information concerning risk concentration

Below is a breakdown of the carrying amount of the distribution of customer loans by activity at 31 December 2021 and 2020:

	Thousands of euros							
	31/12/2021							
				Collateralised loans Carrying amount based on latest available appraisal (loan to value)				
	Total	**of which: mortgage collateral**	**of which: other collateral**	**Less than or equal to 40%**	**Greater than 40% and less than or equal to 60%**	**Greater than 60% and less than or equal to 80%**	**Greater than 80% and less than or equal to 100%**	**Greater than 100%**
Public administrations	**672,711**	**48,679**	**334**	**4,782**	**21,835**	**21,241**	**381**	**774**
Other financial companies and individual entrepreneurs (financial business activity)	**1,628,474**	**7,571**	**1,615,223**	**5,056**	**2,463**	**59**	**1,615,115**	**101**
Non-financial companies and individual entrepreneurs (non-financial business activity) (broken down by purpose)	**8,036,651**	**2,209,609**	**115,307**	**677,892**	**612,908**	**459,033**	**248,411**	**326,672**
Real estate construction and development (including land)	993,549	968,088	18	100,323	170,838	282,314	199,624	215,007

3.5.5.2 Information concerning refinancing and restructuring

The Group follows a policy aimed at utilising operations refinancing and restructuring as credit risk management instruments which, when implemented prudently and appropriately, contribute to improving risk quality, based on individualised analyses focused on providing economic viability to borrowers that, at some stage of the transaction, undergo transitory difficulties to meeting their payments commitments promptly at the time they fall due. The policy is aimed at:

- Ensuring the economic feasibility of borrowers and operations (grant of interest free periods, increase in timeframes, etc.).
- Improving as far as possible the Group's risk position through the delivery of additional effective guarantees and the review of existing guarantees.

<u>Acceptance of transactions</u>:

In general, refinancing/restructuring transactions must meet the following requirements:

- Feasibility analysis based on the existence of the customer's intention and capacity to pay which although impaired with respect to inception, should exist under the new conditions.
- Bringing instalments into line with the client's real payment capacity following an up-to-date analysis of the borrower's supporting economic-financial situation.
- Assessment of the borrower's/operation's compliance record.

- Assessment of the effectiveness of existing guarantees and new guarantees to be provided. To this end, the following are considered effective guarantees:

  – Guarantees pledged over cash deposits, listed equity instruments and debt securities.

  – Mortgage guarantees over housing, offices and multi-purpose entities and rural properties.

  – Personal guarantees (guarantee deposits, new holders etc.) fully covering the guaranteed risk.

Sanction:

The branch network is not authorised to sanction refinancing or restructuring transactions. The transactions are authorised by a specific circuit other than the admission circuit, which is completely separate from the Commercial Network.

In 2012 Ibercaja adhered to the Code of Good Practice for the viable restructuring of debts secured by mortgages over habitual dwellings governed by Royal Decree 6/2012.

A breakdown of refinancing and restructuring balances at 31 December 2021 and 2020 can be seen below:

	Thousands of euros			
	2021		2020	
	Total	Of which: default/non-performing	Total	Of which: default/non-performing

3.5.6 Policies for the management of problematic assets

Ibercaja Banco, S.A. establishes specific policies relating to the management of assets of the real estate sector.

These policies are focused on favouring the compliance of the obligations of the borrowers and mitigate the risks to which the Group is exposed. In this sense, alternatives are searched for that allow for the completion and sale of the projects, analysing the renegotiation of the risks if it improves the credit position of the Group and with the basic purpose that the borrower can maintain his/her commercial activity. To do so, they keep in mind the previous experience with the borrower, the apparent willingness of payment and the improvement of the Group in terms of expected loss, seeking to increase the guarantees of the credits and not increase the customer's risk.

Additionally the Group supports the promoters once the promotions are finished, working together in the management and speeding up of sales.

In the case that the support measurements are not possible or sufficient, other alternatives are searched for such as the granting in payment or the purchase of assets, with legal claim and subsequent acquisition of real estate being the last option.

All those assets that form part of the Group's balance sheet are managed seeking their divestment or lease.

To do so, the Group has agreements with third parties or has instrumental companies, specialised in the management of urban projects, sale of real estate and lease of real estate assets.

The Group has specific Units to implement these strategies and coordinate the actions of instrumental subsidiaries, the branch office network and the rest of actors involved. Additionally, the Group has the website www.ibercaja.es/inmuebles as one of the main tools with which they disclose to the public interested in these assets.

3.5.6.1 Credit investment linked to development and real estate activities and to retail mortgages

On 31 December 2021 and 2020, the details of the financing for the real estate construction and development and the hedging thereof is the following:

	Thousands of euros							
	Gross carrying amount		Excess of the gross exposure on the maximum recoverable amount of the effective collateral (*)		Accumulated impairment		Net value	
	2021	2020	2021	2020	2021	2020	2021	2020
Financing for real estate construction and development (including land) (businesses in Spain)	**1,041,081**	**1,029,181**	**162,223**	**85,280**	**37,617**	**40,497**	**1,003,464**	**988,684**
of which: default/non-performing	57,701	79,927	31,061	38,696	28,745	34,457	28,956	45,470

Other land	*20,454*	*8,592*
Total	**1,041,081**	**1,029,181**

Below a detail of the collateral received and financial guarantees granted in relation to the financing for property construction and development is shown (including undeveloped land) on 31 December 2021 and 2020.

Collateral received:

	Thousands of euros	
	2021	2020
Value of collateral	1,027,909	1,028,265
Of which: guarantees default/non-performing risks	*42,091*	*57,041*
Value of other collateral	352,738	408,851
Of which: guarantees default/non-performing risks	*20,136*	*18,533*
Total value of the collateral received	**1,380,647**	**1,437,116**

Financial guarantees granted:

	Thousands of euros	
	2021	2020
Financial guarantees granted related to real estate construction and development	**5,347**	**5,973**
Amount recognised under liabilities on the balance sheet	2,306	2,804

On 31 December 2021 and 2020, the breakdown of loans to households for housing acquisition, is the following:

	Thousands of euros			
	Gross amount		of which: default/non-performing	
	2021	2020	2021	2020
Housing acquisition loans	**18,062,695**	**18,692,949**	**272,530**	**416,727**
Without mortgage loan	238,729	224,210	8,198	9,824
With mortgage loan	17,823,966	18,468,739	264,332	406,903

The breakdown of the loans with mortgage loan to households for housing acquisition according to the percentage that implies the gross carrying amount over the latest appraisal amount (loan to value) on 31 December 2021 and 2020 is the following:

	Thousands of euros					
	2021					
	Gross carrying amount based on latest appraisal amount (loan to value)					
	Less than or equal to 40%	**Greater than 40% and less than or equal to 60%**	**Greater than 60% and less than or equal to 80%**	**Greater than 80% and less than or equal to 100%**	**Greater than 100%**	**Total**
Gross carrying amount	5,391,568	6,924,348	4,902,202	377,912	227,936	**17,823,966**
of which: default/non-performing	38,095	69,579	83,629	30,327	42,702	**264,332**

	Thousands of euros					
	2020					
	Gross carrying amount based on latest appraisal amount (loan to value)					
	Less than or equal to 40%	**Greater than 40% and less than or equal to 60%**	**Greater than 60% and less than or equal to 80%**	**Greater than 80% and less than or equal to 100%**	**Greater than 100%**	**Total**
Gross carrying amount	5,394,865	7,227,198	4,993,412	534,422	318,842	**18,468,739**
of which: default/non-performing	49,009	96,534	133,142	57,881	70,337	**406,903**

On 31 December 2021 96,6% of the housing acquisition loan with real estate collateral has an LTV lower than 80% (95% on 31 December 2020).

3.5.6.2 Foreclosed or received assets in payment for debts.

As at 31 December 2021 and 2020, the following information relates to assets repossessed or accepted as payment for debts:

	Thousands of euros			
	31/12/2021			
	Gross carrying amount (*)	**Total allowances for impairment losses**	**Of which: Allowances for impairment losses from the time of the foreclosure**	**Carrying amount**
Real estate assets acquired from loans for real estate construction and development	**368,001**	**(246,009)**	**(150,440)**	**121,992**
Buildings and other completed constructions	33,230	(16,741)	(8,117)	16,489

Other foreclosed or received real estate assets in payment of debt	**65,055**	**(32,441)**	**(12,679)**	**32,614**
	542,241	**(326,197)**	**(185,264)**	**216,044**

(*) Amount before deducting the allowances for impairment loss

	Thousands of euros			
	31/12/2020			
	Gross carrying amount (*)	Total allowances for impairment losses	Of which: Allowances for impairment losses from the time of the foreclosure	Carrying amount
Real estate assets acquired from loans for real estate construction and development	**444,900**	**(286,929)**	**(175,151)**	**157,971**
Buildings and other completed constructions	36,522	(18,012)	(9,201)	18,510
Housing	*14,540*	*(7,902)*	*(4,076)*	*6,638*
Other	*21,982*	*(10,110)*	*(5,125)*	*11,872*
Buildings and other constructions under construction	3,578	(2,711)	(886)	867
Housing	*3,218*	*(2,433)*	*(743)*	*785*
Other	*360*	*(278)*	*(143)*	*82*
Land	404,800	(266,206)	(165,064)	138,594
Consolidated urban land	*104,560*	*(64,873)*	*(32,475)*	*39,687*
Other land	*300,240*	*(201,333)*	*(132,589)*	*98,907*
Real estate assets acquired in mortgage loans to households for housing acquisition	**107,931**	**(47,816)**	**(23,797)**	**60,115**
Other foreclosed or received real estate assets in payment of debt	**66,696**	**(32,668)**	**(12,390)**	**34,028**
	619,527	**(367,413)**	**(211,338)**	**252,114**

(*) Amount before deducting the allowances for impairment loss

The breakdown of the carrying amount of assets foreclosed or received as payment for debts classified by balance sheet item as at 31 December 2021 and 2020 is as follows:

	Thousands of euros				
	31/12/2021				
	Gross carrying amount	Allowances for impairment losses from lending	Accumulated depreciation	Allowances for impairment losses from the time of the foreclosure	Carrying amount
Tangible assets - Investment property	15,789	(2,330)	(262)	(4,441)	8,756
Other assets - Inventories	142,193	(25,422)	-	(87,756)	29,015
Non-current assets and disposal groups classified as held for sale	384,259	(112,821)	(98)	(93,067)	178,273
	542,241	**(140,573)**	**(360)**	**(185,264)**	**216,044**

	Thousands of euros				
	31/12/2020				
	Gross carrying amount	Allowances for impairment losses from lending	Accumulated depreciation	Allowances for impairment losses from the time of the foreclosure	Carrying amount
Tangible assets - Investment property	16,251	(2,204)	(565)	(4,049)	9,433
Other assets - Inventories	169,990	(34,789)	-	(92,831)	42,370
Non-current assets and disposal groups classified as held for sale	433,286	(118,384)	(133)	(114,458)	200,311
	619,527	**(155,377)**	**(698)**	**(211,338)**	**252,114**

3.6 Exposure to operational risk

This is defined as the risk of loss resulting from a lack of adequacy or failure of internal processes, personnel and systems, or a loss arising from external events, and therefore encompasses sub-categories such as conduct risk, technological risk or model risk, among others.

3.6.1 Strategies and policies for the operational risk management

The Board of Directors approves the strategies, policies and limits for the management of this risk, following a report from the Large Risk and Solvency Committee, documented in the "Framework of operational risk management".

The Group currently has a management an assessment model for this risk, which basically contemplates the following points:

- General aspects: definition of operational risk, categorisation and assessment of risks.
- Methodologies applied for the identification, assessment and measuring of operational risks.
- Scope of application of the methodologies and personnel that participate in the management of this risk.
- Indicators, limits and tolerance ranges.
- Generation of stress scenarios.
- Models of support to the management (management, control and mitigation of the operational risk): information derived from the previous methodologies and implementation of measures directed at the mitigation of this risk.

The scope of application of the model of management and assessment model of the operational risk is extended both to business units and support of Ibercaja Banco, and the Group companies.

Its application and effective use in each of the units and subsidiary companies are developed in a decentralised manner. For its part, the Market, Operational and Reputational Risk Control Unit, together with other units and subsidiaries, coordinates risk measurement and carries out risk monitoring, analysis and communication.

Finally, it should be noted that the Market, Operational and Reputational Risk Control Unit is incorporating into its activity those aspects linked to Environmental Risk that affect the Operational Risk area.

3.6.2 Procedures for measurement, management and control

The Group, in applying the adopted model for the operational risk management, use the following methodologies combined, which are supported by specific IT tools:

- Qualitative methodology, based on the identification and expert assessment of operational risks and the existing controls in the processes and activities, together with the breakdown and analysis of risk indicators. During 2020 they reviewed and self-assessed 585 operational risks, concluding in this process, a low risk profile.
- Quantitative methodology, supported in the identification and analysis of the real losses fluctuations in the Group, which are recorded in the database established for that purpose (BDP).

The quantification of real losses recorded in the data base of losses in 2021 shows the total annual net losses (net of direct recoveries and insurance) for operational risk events came to 39,584 thousand euros, corresponding to 15,457 events, of which 667 events for 22,182 thousand euros derive from write-downs linked to floor clauses (return of interest totalling 20,631 thousand euros and legal costs of 1,551 thousand euros). If the provisions linked to these losses from interest rate floor clauses and other provisions associated with different losses, which were also extraordinary, are discounted, the total annual net loss is 13,121 thousand euros.

Stripping out the exceptional impact certain losses such as interest rate floor clauses, real operational losses were small in relation to capital requirements, consistently with the overall result of the qualitative assessment mentioned above.

Streamlining in processes of operational risk management and control resulting from the established policies and methodologies, allow the Entity to calculate from December 2010 the capital consumption for Operational Risk by standard method, in accordance with that established in Regulation (EU) No. 575/2013.

3.7 Exposure to the interest rate risk

This is defined as the current or future risk to the Company's capital or earnings as a result of adverse fluctuations in interest rates affecting the positions of its investment portfolio.

The sources of the interest rate risk are the gap, base or optionality risks. In particular, gap risk arises from the different timing of interest rate-sensitive balance sheet instruments, as a result of differences in the timing of their repricing or maturities. Basis risk derives from the different benchmark indices used for repricing, interest rate-sensitive asset and liability instruments. Optionality risk arises from embedded or explicit options that arise when either the Entity or the customer have the option of altering future cash flows if it benefits them.

3.7.1 Strategies and policies for the interest rate risk management

The aim of risk management is to contribute to the maintenance of the current and future profitability in the adequate levels, preserving the economic value of the Company.

The Board of Directors establishes the strategies, policies and limits for the management of this risk, following a report from the Large Risk and Solvency Committee, documented in the "Manual of policies and procedures for the management and control of interest rate risk".

3.7.2 Procedures for measurement and control

The Group manages the exposure to the risk that derives from the transactions of their portfolio, both at the time of its agreement and in its subsequent monitoring, and incorporate to its analysis horizon the assessment established for the business and the expectations respect to the interest rates, as well as the proposals of management and hedging, simulating different behaviour scenarios.

The Company's tools measure the effects of interest rate movements on the intermediation margin and the economic value, simulate scenarios depending on the assumptions used for interest rate behaviour and business performance, and help estimate the potential impact on capital and on results of abnormal fluctuations of the market, so that the results can be considered in the establishment and review of risk policies and limits and in the planning and decision-making process.

As to optionality risk, behavioural models are available that provide the key assumptions on the sensitivity and duration of demand savings transactions, as their maturity date is not contractually specified, and on early repayments on loans, early redemption of time deposits, and duration of non-performing assets, always based on historical experience for different scenarios.

In the same way, the effect that the variations in interest rates have on the financial margin and economic value is controlled by the establishment of limits to the exposure. The limits allow for maintaining the exposure to the interest rate risk within the levels compatible with the approved policies.

Below, the sensitivity profile is shown of the balance of the Group to the interest rate risk on 31 December 2021 and on 31 December 2020, indicating the carrying amount of those financial assets and liabilities affected by this risk, which appear classified depending on the estimated term until the review date of the interest rate or maturity.

On 31 December 2021:

	Millions of euros						
	Terms until the review of the effective interest rate or maturity						
	Up to 1 month	**1 to 3 months**	**Between 3 months and 1 year**	**Sensitive Balance**	**Insensitive Balance**	**1 to 5 years**	**Over 5 years**
Assets	**12,337**	**7,081**	**13,883**	**33,302**	**18,404**	**6,523**	**11,881**

Financial liabilities at fixed rate hedged with derivatives	518	1,300	2,036	3,854	(1,144)	(1,076)	(68)
Financial liabilities at variable interest rate	87	5,684	1	5,772	6	-	6
Difference or Gap in the period	**5,119**	**(608)**	**5,040**	**9,551**	**(9,551)**	**(13,737)**	**4,186**
Difference or accumulated Gap	**5,119**	**4,511**	**9,551**	**9,551**	**(9,551)**	**(4,186)**	
Average gap	5,119	4,664	1,118	5,934			
% of total assets	9.99	9.1	2.18	11.58			

Sensitive balances will be considered those whose maturity or repricing occurs in the next twelve months. This period is established as a reference to quantify the effect of the variation of the interest rates on the annual intermediation margin of the Group.

The Gap that appears in the box represents the difference between the sensitive assets and liabilities in each period, i.e., the net balance exposed to changes in prices. The average gap of the period is 5,107.6 million euros, 9.88% of the asset (5,933.7 million euros, 11.58% of the asset on 31 December 2020).

With data on 31 December 2021, the impact on the interest margin of the company before a raise of 200 basis points in the interest rates is 79.03 million euros, 19.07% on the interest margin of the next 12 months and before a decrease of 200 basis points is -70.58 million euros, -17.03% on the interest margin of the next 12 months (in December of 2020, 160.03 million euros and 40.45% before increases and -69.98 million euros and -17.69% before decreases) under the assumption of maintenance of size and structure of the balance and that the activity of the interest rates occurs instantly and are equal on all points of the curve, with a progressive floor ranging from minus 100 bp, rising by 5 bp each year to zero.

Meanwhile, the impact on the economic value of the Company in the event of a 200 basis points rise in interest rates is -245.65 million euros, -4.18% on the equity economic value and in the event of a 200 basis points decrease it is 82.99 million euros, 1.41% on the equity economic value (in December of 2020, 141.58 million euros and 2.27% in the event of increases and -47.73 million euros and -0.77% in the event of decreases) under the assumption that the activity of the interest rates occur instantly and are equal on all the points of the curve, with a progressive floor ranging from minus 100 bp, rising by 5 bp each year to zero.

3.8 Exposure to liquidity risk

It is defined as the possibility of incurring losses due to not having access to sufficient liquid funds to meet payment obligations.

3.8.1 Strategies and policies for the liquidity risk management

The management and control of the liquidity risk are governed by the principles of financial autonomy and balance equilibrium, guaranteeing the continuity of the business and the availability of sufficient liquid resources to fulfil the payment commitments associated with the cancellation of the liabilities on their respective maturity dates without compromising the capacity of answering before strategic opportunities of market.

The Board of Directors establishes the strategies, policies and limits for the management of this risk, following a report from the Large Risk and Solvency Committee, documented in the “Manual of policies and procedures for the management of liquidity risk”.

The strategies for attracting resources in the retail segments and the use of alternative sources of short-, medium- and long-term liquidity, allow the Group to have the necessary resources to attend the solvent credit demand derived from the commercial activity and maintain the positions of treasury within the parameters of management established in the Framework of risk appetite and in the Liquidity manual.

3.8.2 Procedures for measurement and control

The measurement of the liquidity risk considers the estimated treasury flows of the assets and liabilities, as well as the guarantees or additional instruments that it has to ensure alternative sources of liquidity that could be required.

Likewise, the evolution established for the business and the expectations respect to the interest rates are incorporated, as well as the proposals of management and hedging, simulating different behaviour scenarios. These procedures and analysis techniques are reviewed with the necessary frequency to ensure their correct operation.

Progress is made in the short-, medium- and long-term to know the needs of financing and the compliance of the limits, that have in mind the most recent macroeconomic tendencies, for its incidence in the evolution of the different assets and liabilities of the balance sheet, as well as in the contingent liabilities and derived products. In the same way, the liquidity risk is controlled via the establishment of tolerance ranges compatible with the approved policies.

In addition, the Company is prepared to affront possible crisis, both internal and of the markets in which they operate, with action plans that guarantee sufficient liquidity at the lowest cost possible.

At 31 December 2021, the Company's available liquidity amounted to 15,250 million euros (14,959 million euros at 31 December 2020), coupled with an issuance capacity of 8,776 million euros (8,380 million euros at 31 December 2020). Total availability stood at 24,027 million euros (23,339 million euros at 31 December 2020), 687 million euros up on the close of last year. During 2021, wholesale maturities were outstanding for a nominal amount of 605 million euros: covered bonds (525 million euros), securitisation bonds owned by third parties (80 million euros). In addition, they have carried out repurchases of issuances for 14 thousand euros, instrumented in Securitisation bonds.

The collateral policy with the B1E includes pledged assets with a discounted value of 6,938 million euros as at 31 December 2021 (31 December 2020: 6,278 million euros), of which it has drawn down 5,959 million euros, leaving it with 1.051 million euros (31 December 2020: 892 million euros) available to meet its liquidity needs.

In addition to the policy mentioned, the Company has very different sources of financing. There is a large base of retail deposits of 33,298 million euros (32,256 million euros at 31 December 2020), of which 85% had stable balances. The Bank also has financing collateralised by securities in the amount of 6,560 million euros (6,056 million euros at 31 December 2020), 512 million euros of which is transacted with central counterparties. In addition, wholesale issues of a total 2,786 million euros (3,327 million euros at 31 December 2020), characterised by diversification of maturities, and deposits from the Group's financial institutions amounting to 309 million euros (796 million euros at 31 December 2020), and deposits from other customers of 3,400 million euros (3,242 million euros at 31 December 2020), among others.

The Company's balance sheet does not have major exposures of liquidity risk in their assets or in their financing sources.

In relation to other contingent risks, the Group controls the position of:

- Financing received from investment funds and pension plans with clauses that cause the reimbursement depending on reversals in the credit qualification of Ibercaja Banco. At the end of 2021, there was no amount affected by the reversal of a qualification scale.

- Liability derivatives for 250 million euros, that have required the contribution of additional guarantees for 253 million as well as asset derivatives for 4 million euros, for those that have received additional guarantees for 4 million euros. In addition, those transacted through the clearing house contributed additional collateral of 21 million euros.

- Financing collateralised by securities of 601 million euros, which required the provision of additional collateral of 142 million euros in cash (collateral includes both repurchase agreements and reverse repurchase agreements).

- International card transactions with CECA cards require collateral of 11 million euros in fixed income.

Ibercaja Banco has signed framework agreements of compensation or “netting”, and their appendices of guarantee exchange, with all the entities that operate in OTC (over the counter, for its letters in English) derivatives and in simultaneous transactions. Their signature is a prerequisite for those entities with which this type of transaction will be started. Ibercaja Banco participates as a direct member in the central chambers of compensation of simultaneous transactions LCH Clearnet and MEFFClear, and in Eurex for the operation with some classes of derivatives of interest rates, being a normal market practice extended among the participants after regulation EMIR goes into effect.

Below a breakdown is offered of the available liquidity:

	Thousands of euros	
	2021	**2020**
Cash and central banks	6,183,416	7,319,717
Available in policy	1,050,679	891,981
Eligible assets not included in the policy	7,590,280	6,421,078
Other marketable assets not eligible by the Central Bank	425,796	326,665
Accumulated available balance	**15,250,171**	**14,959,441**

On 31 December 2021, the capacity to issue covered bonds was 8,776 million euros (8,380 million euros on 31 December 2020).

The LCR (Liquidity Coverage Ratio) of the Ibercaja Group as at 31 December 2021 amounts to 452% (468% as at 31 December 2020). The breakdown of liquid assets at 31 December 2021 under the criteria established for calculating the LCR ratio is as follows:

	Thousands of euros					
	31/12/2021			**31/12/2020**

Total on 31 December 2021	**37,766,108**	**1,383,325**	**651,200**	**1,869,589**	**8,971,462**	**367,631**	**51,009,315**
Total on 31 December 2020	**36,193,873**	**1,636,669**	**926,745**	**2,685,645**	**8,793,922**	**472,884**	**50,709,739**
2021 gap period	**(37,730,283)**	**1,240,411**	**803,396**	**1,173,654**	**3,190,679**	**22,846,135**	
2020 gap period	**(36,122,373)**	**513,356**	**562,115**	**262,515**	**2,658,113**	**22,573,770**	
Accumulated gap (without demand savings) 2021	**-**	**1,240,411**	**2,043,807**	**3,217,461**	**6,408,140**	**29,254,275**	
Accumulated gap (without demand savings) 2020	**-**	**513,356**	**1,075,471**	**1,337,987**	**3,996,100**	**26,569,870**	

Includes maturities of principal and interests and does not take assumptions of a new business.

The amounts shown in the table above correspond to the undiscounted contractual amounts.

The maturity of the demand deposits is not determined contractually. It has been entered in the first time slot (demand) even though for the most part, these deposits are stable.

The financing of the rest of the customers include the implicit derivative in the structured deposits.

Loan commitments amounted to 3.220 million euros (3.288 million euros at 31 December 2020). While these commitments are available immediately for the customers, and therefore would have "demand" nature in accordance with IFRS 7, in the practice of cash flow outputs they are distributed in all the time slots.

In relation with the financial guarantee contracts issued, the nominal amount of the guarantee does not necessarily have to represent an actual obligation of settlement or of liquidity needs, which will depend on if they meet the conditions so that the amount of the committed guarantee should be settled.

The Group only hopes to produce a cash outflow in relation with financial guarantee contracts that have qualified as non-performing and special watch. The amount that is expected to be settled of these contracts is recorded under “Provisions for contingent risks and commitments”, in the heading Provisions (Note 21), for an amount of 16,707 thousand euros (19,477 thousand euros on 31 December 2020).

Long-term wholesale financing maturities are shown in the following boxes.

On 31 December 2021:

	Thousands of euros						
	On demand	Up to 1 month	1 to 3 months	Between 3 months and 1 year	1 to 5 years	Over 5 years	Total
Senior debt	-	-	-	-	50,000	-	50,000
Government-backed debt	-	-	-	-	-	-	-
Subordinated and preferential	-	-	-	-	850,000	-	850,000
Bonds and mortgage- and sector-covered bonds	-	-	-	19,444	1,416,026	165,000	1,600,470
Securitisations	-	3,343	6,664	29,551	131,190	114,792	285,540
Promissory notes and certificates of deposit	-	-	-	-	-	-	-
Wholesale issues	**-**	**3,343**	**6,664**	**48,996**	**2,447,215**	**279,792**	**2,786,010**
Financing with long-term secured securities	**-**	**-**	**-**	**-**	**5,959,000**	**-**	**5,959,000**
Maturities in the period	**-**	**3,343**	**6,664**	**48,996**	**8,406,215**	**279,792**	**8,745,010**
Accumulated maturities	**-**	**3,343**	**10,007**	**59,002**	**8,465,217**	**8,745,010**	

The wholesale issues appear as net treasury shares. However, multi-seller covered bonds appear for their gross amount issued while the treasury shares are recognised as available liquidity in accordance with the preparation criteria of the LQ statements of the Bank of Spain.

On 31 December 2020:

	Thousands of euros						
	On demand	Up to 1 month	1 to 3 months	Between 3 months and 1 year	1 to 5 years	Over 5 years	Total
Senior debt	-	-	-	-	-	-	-
Government-backed debt	-	-	-	-	-	-	-
Subordinated and preferential	-	-	-	-	850,000	-	850,000
Bonds and mortgage- and sector-covered bonds	-	-	225,000	300,000	1,435,470	165,000	2,125,470
Securitisations	-	3,052	6,097	31,895	155,724	155,189	351,956
Promissory notes and certificates of deposit	-	-	-	-	-	-	-
Wholesale issues	**-**	**3,052**	**231,097**	**331,895**	**2,441,194**	**320,189**	**3,327,426**
Financing with long-term secured securities	**-**	**-**	**-**	**-**	**5,400,000**	**-**	**5,400,000**
Maturities in the period	**-**	**3,052**	**231,097**	**331,895**	**7,841,194**	**320,189**	**8,727,426**
Accumulated maturities	**-**	**3,052**	**234,148**	**566,043**	**8,407,237**	**8,727,426**	

The wholesale issues appear as net treasury shares. However, multi-seller covered bonds appear for their gross amount issued while the treasury shares are recognised as available liquidity in accordance with the preparation criteria of the LQ statements of the Bank of Spain.

The diversification policy at the time of the maturities of the wholesale issues, will permit the Company to cover the maturities of the next financial years, maintaining ample liquidity.

Thus, keeping in mind the available liquidity (15,250 billion euros), the Company could cover the total of the maturities of the long-term wholesale financing (2,786 billion euros). Additionally, it is able to issue 8,776 billion euros (total availability of 24,027 billion euros).

3.9 Exposure to other risks

3.9.1 Exposure to market and counterparty risk

3.9.1.1 Strategies and policies for the market and counterparty risk management

a) Market risk

This is defined as the possibility of incurring losses due to maintaining market positions as a result of adverse movements in financial variables or risk factors (interest rates, exchange rates, share prices, etc.) that determine the value of those positions.

The Bank manages the market risk, trying to obtain an adequate financial profitability in relation to the assumed risk level, keeping in mind certain levels of overall exposure, exposure due to segmentation rates (portfolios, instruments, ratings), structure of the portfolio and portfolio/risk objectives. In their management and control they apply analysis of sensitivity and simulation of stress scenarios for the estimation of their impact in the profits and equity.

The Board of Directors approves the strategies, policies and limits for the management of this risk, following a report from the Large Exposures and Solvency Committee, as documented in the "Capital Markets Department Policy Manual".

For the market risk management, they have policies on identification, measuring, monitoring, control and mitigation as well as policies on transactions in that relative to their trading, revaluation of positions, classification and valuation of portfolios, cancellation of transactions, approving of new products, relationships with intermediaries and delegation of duties.

b) Counterparty risk

The possibility of default by counterparties in financial transactions (fixed income, interbank, derivatives, etc.).

The Board of Directors approves the strategies, policies and limits for the management of this risk, following a report from the Large Exposures and Solvency Committee, documented in the "Manual for Lines of Risk" of Ibercaja Banco.

For the management of the counterparty risk, the Company has policies for identification, measuring, monitoring, control and mitigation. Additionally the "Manual of Lines of Risk of Ibercaja Banco" establishes the criteria, methods and procedures for the granting of lines of risks, the proposal of limits, the process for formalisation and documentation of transactions, as well as the procedures for monitoring and controlling the risks for financial institutions, public administrations with rating and listed and/or qualified companies with rating, with the exception of promoting entities.

The lines of risk are established essentially depending on the ratings assigned by the credit qualification agencies, of the reports that these agencies issue and of the expert analysis of their financial statements.

For the granting of transactions related with the counterparty risk to the entities previously mentioned, it will be the Capital and Balance Sheet Management Unit and the Governing Bodies in charge of managing the assumption of risk, attending to the fixed limits for the lines of credit.

The Company uses specialised tools for the management, control and measuring of the counterparty risk, with the aim of considering the risk consumption of each product and gather the risk consumption at the Group level under one application.

3.9.1.2 Procedures for measurement and control

a) Market Risk

The portfolios exposed to Market Risk are characterised for their high liquidity and for the absence of materiality in the trading activity, which implies that the Market Risk assumed by the trading activity is insignificant as a whole.

The Company monitors the progression of the expected loss of the management portfolio given a trust level of 99% and a time horizon (1 day or 10 days) as a result of the variations of the risk factors that determine the price of the financial assets via the VaR indicator (Value at risk).

The VaR calculation is carried out with different methodologies:

- The parametric VaR assumes normalcy of the relative variations of the risk factors for the calculation of the expected loss of the portfolio given a trust level of 99% and a time horizon (1 day or 10 days).

- The diversified parametric VaR keeps in mind the diversification offered by the correlations of the risk factors (interest rates, exchange rates, shares listing, etc.). It is the standard measure.

- The non-diversified parametric VaR assumes the lack of diversification among those factors (correlations equal to 1 or -1 according to the case), and is useful in stress or change periods of the risk factors correlations.

- The Historic Simulation VaR uses the relative variations made in the last year of the risk factors to generate the scenarios in which the loss potential of the portfolio is evaluated given a trust level of 99% and a time horizon.

- The Shortfall VaR measures, given a calculated VaR at 99% and with a time horizon of 1 day, the expected loss in 1% of the worst results beyond the VaR. It provides an average of the losses in case of breakage of the VaR.

- In any case, the impact in absolute terms of the VaR is relativised regarding capital.

Thus, at 31 December 2021, the measurement of VaR presents the following values:

Thousands of euros **Confidence level: 99%**	**Parametric diversified VaR**	**Parametric VaR vs *PR.***	**Parametric non-diversified VaR**	**Parametric non-diversified VaR vs *PR.***	**Historical Simulation VaR**	**Historical Simulation VaR vs PR.**	**Shortfall VaR**	**Shortfall VaR vs PR.**
Time horizon: 1 day	(4,769)	0.15%	(12,966)	0.40%	(6,587)	0.20%	(6,587)	0.20%
Time horizon: 10 days	(15,080)	0.46%	(41,003)	1.25%				

The calculation on 31 December 2020 of the VaR, presented the following values:

Thousands of euros **Confidence level: 99%**	**Parametric diversified VaR**	**Parametric VaR vs *PR.***	**Parametric non-diversified VaR**	**Parametric non-diversified VaR vs *PR.***	**Historical Simulation VaR**	**Historical Simulation VaR vs PR.**	**Shortfall VaR**	**Shortfall VaR vs PR.**
Time horizon: 1 day	(5,422)	0.16%	(9,831)	0.29%	(4,411)	0.13%	(5,430)	0.16%
Time horizon: 10 days	(17,147)	0.51%	(31,089)	0.93%				

Likewise, and supplementing the VaR analysis, stress tests have been performed that analyse the impact of different scenarios of the risk factors on the value of the portfolio being measured.

b) Counterparty risk

The limits authorised by the Board of Directors are established by investment volume weighted by the borrower's credit rating, the term of the investment and the instrument type.

Additionally, the legal limits are respected for the concentration and grand exposures in application of Regulation (EU) No. 575 / 2013.

The monitoring systems ensure that the consumed risks are kept within the established limits at all times. They incorporate controls regarding the variations produced in the ratings, and in general of the borrower's solvency.

Among the techniques for counterparty risk mitigation appear the compensation or netting master agreements, the guarantee agreements, the reduction of portfolios in the case of adverse credit events, the reduction of the lines of risk in the case of decreases in the rating or negative news of some company and the timely monitoring of the companies' financial information.

With those entities with whom they have agreed on a compensation of risks and an agreement on guarantee contribution, in accordance with the requirements demanded by the Bank of Spain, the risk may be computed by the net resulting position.

3.9.2 Exchange rate risk management

It is defined as the possibility of incurring in losses derived from the negative fluctuations in the exchange rates of the currencies in which the assets, liabilities and transactions are denominated off the Company's balance sheet.

The Company does not maintain significant positions in foreign currency in a speculative nature. They do not hold open positions in foreign money that is not speculative of a significant amount either.

The Company's policy is to limit this type of risk, mitigating it generally speaking, at the time it presents itself via the agreement on symmetrical active or passive transactions or via financial derivatives that allow their coverage.

3.9.3 Exposure to sovereign debt

Below, the following information is detailed regarding the exposure to sovereign debt, which includes all the positions with public entities, on 31 December 2021 and 2020:

- Breakdown of the carrying amount of the exposure per country:

	Thousands of euros	
	2021	**2020**
Spain	13,421,612	11,149,836
Italy	1,382,405	1,025,440
Portugal	67,788	89,445
France	240,733	23,494
United States	100,972	-
Other	6,311	10,694
Total gross amount	**15,219,821**	**12,298,909**
(Impairment losses)	*(180)*	*(821)*
Total net amount	**15,219,641**	**12,298,088**
of which: from the insurance company	*4,196,302*	*4,893,693*

- Breakdown of the carrying amount of the exposure per portfolio in which the assets are recorded:

	Thousands of euros	
	2021	**2020**
Financial assets at fair value through profit or loss	6,278	7,416
Financial assets at fair value through other comprehensive income	4,641,651	4,838,244
Financial assets at amortised cost	10,571,892	7,453,249
Total	**15,219,821**	**12,298,909**
of which: from the insurance company	*4,196,302*	*4,893,693*

The carrying amount shown in the above table corresponds to the maximum credit risk exposure in relation to each financial instrument.

- Breakdown of the term to residual maturity of the exposure per portfolio in which the assets are recorded:

	Thousands of euros					
	2021					
	Up to 3 months	**From 3 months to 1 year**	**1 to 3 years**	**3 to 5 years**	**Over 5 years**	**Total**
Financial assets at fair value through profit or loss	-	-	4,596	1,682	-	6,278
Financial assets at fair value through other comprehensive income	159,382	246,561	786,869	528,504	2,920,335	4,641,651
Financial assets at amortised cost	733,675	242,951	2,233,291	2,168,689	5,193,286	10,571,892
Total	**893,057**	**489,512**	**3,024,756**	**2,698,875**	**8,113,621**	**15,219,821**
of which: from the insurance company	*159,382*	*244,535*	*800,249*	*538,458*	*2,453,678*	*4,196,302*

	Thousands of euros					
	2020					
	Up to 3 months	**From 3 months to 1 year**	**1 to 3 years**	**3 to 5 years**	**Over 5 years**	**Total**
Financial assets at fair value through profit or loss	-	-	1,347	6,069	-	7,416
Financial assets at fair value through other comprehensive income	51,287	458,161	835,536	717,024	2,776,236	4,838,244
Financial assets at amortised cost	9,330	251,571	264,504	1,885,920	5,041,924	7,453,249
Total	**60,617**	**709,732**	**1,101,387**	**2,609,013**	**7,818,160**	**12,298,909**
of which: from the insurance company	*57,254*	*458,161*	*807,711*	*724,223*	*2,846,344*	*4,893,693*

- Other information

  – Fair value. The fair value of instruments in the portfolio of financial assets held for trading, the portfolio of financial assets designated at fair value through profit or loss and the portfolio of financial assets at fair value through other comprehensive income matches the carrying amount indicated above.

    Note 26 specifies the valuation methodology of the portfolio of financial assets at amortised cost, in which it is observed that the fair value detailed does not differ significantly from the carrying amount. The fair value associated to the sovereign risk is obtained via valuation techniques from level 1 (the description of them is given in Note 26).

  – The effect of a rise of 100 basis points in the interest rate would have an effect on the fair value of -5.13% (-5.85% in 2020).

3.9.4 Reputational risk management

Reputational risk is defined as the unfavourable impact that an event may cause in the corporate reputation of the entities that form part of the Group. It is associated to a negative perception on behalf of the stakeholders (customers, employees, company in general, regulators, shareholders, suppliers, counterparties, investors, market analysts, etc.) that affects the capacity of the Group to maintain the existing business relationships or establish new ones.

The management of this risk aims at protecting one of the main intangible assets, corporate reputation, by preventing events that may have an adverse effect.

Reputational risk has a wide relationship with the rest of the risks due to the amplifying effect that it can have on them. In the majority of the occasions, reputational risk appears due to the materialisation of other risks that could affect any of the entities of the Group, especially with the regulatory risk or regulatory incompliance (imposing sanctions, especially in the case that they were presented to the public). To do so, the policies and procedures directed at ensuring the compliance of the applicable regulations, whether internal or external, are added.

Additionally, and as a key function of control, to mitigate the risk of suffering possible negative impacts derived from regulatory incompliance, the Company and different financial institutions of the Group have a verification function for regulatory compliance, with supervisory powers in areas especially relevant such as the prevention of money laundering and terrorism financing, the protection of the investor in the sale of financial instruments and lending of investment services (MIFID), the behaviour regulations in the area of Stock Market, the regulations on communication of transactions suspected of abusing the market, etc.

The Group grants, therefore, the maximum relevancy to the management of the corporate reputation as a method to prevent, avoid and/or manage possible reputational risks, and for its positive impact on the creation of value. Reputation metrics are constructed and regularly measured so as to monitor the perception of the Company by the general public, customers and employees and the Group's evolving footprint in social media. The results are the basis for identifying strong points, improvement areas, possible focuses for reputational risk and to elaborate the action plans to improve the reputation.

In 2021, the Group continued to measure its reputational risk, identifying strengths and areas for improvement and continuing action plans to enhance its reputation involving the Group's main areas.

3.10 Climate risk management

Ibercaja is working on the inclusion of the ESG factors in the admission and monitoring of credit risk, in line with the EBA Guidelines on the Arrangement and Monitoring of Loans, which defines the internal governance mechanisms and procedures of financial institutions in relation to loan transactions and concessions. In this regard, it included in its admission policies an analysis of the potential impact of ESG factors, both in aspects that may mark an inherent risk (activity sector, the geographical area of the operations, etc), as well as in other idiosyncratic aspects of the counterparties (internal policies, mitigation measures, penalties and/or disputes, sustainable investment plans, etc.). In aspects relating to the monitoring of the production activity portfolio, monitoring will commence of the changes in the exposure of the Ibercaja Group to those sectors that may have a greater ESG risk, in particular, to climate change risks.

In this vein, Ibercaja has worked on the development of an Exclusions Policy that limits the impact of the ESG factors on the Entity's credit risk.

This work will continue in 2022 to completely integrate the ESG risks in the area of management activity and control thereover.

In this same vein, the asset managers of the Financial Group (Ibercaja Pensión and Ibercaja Gestión), committed to the development of society and the care and protection of the environment through socially responsible investment, are developing an internal and progressive model of investment selection and the management of non-financial risks that is being incorporated into the traditional essential analysis. Likewise, in 2021, the following policies were approved:

- Sustainability Policy, to evidence and formalise the commitment of the Financial Group with sustainable development and value creation through its activity and to establish the global action framework for the Group in matters of sustainability, containing the commitments voluntarily assumed to promote long-term sustainable, inclusive and environmentally-friendly growth, with a long-term vision (Regulation (EU) 2019/2088).

- The Sustainability Risk Integration Policy, which establishes the principles, processes and governance framework, governing ESG risk integration in the investment decisions.

- Exclusions Policy, to ensure that the investment policies are not exposed to unethical, irresponsible or unsustainable activities, and to contribute to the attainment of the UN Sustainable Development Goals (ODS) in the framework of the ESG Risk Integration Policy.

- Adverse Incident Policy for the identification, analysis and management of the impacts of the investment decisions that may have negative effects on sustainability factors (EU Regulation 2019/2088).

- Implication Policy, including the general principles, criteria and procedures to foster the long-term involvement of shareholders in listed companies (RDL 4/2015)".

With regard to liquidity management risk, the decline in value of additional liquid assets for ESG assets was included as a novelty (including climate and environmental risks) within the main types of risk.

In the area of market risk management, work was carried out in the sphere of portfolio management, through the monitoring of indicators that define ESG criteria (which include aspects related with climate and environmental risks) and certain asset selection criteria that enable private fixed income and equity portfolios to be characterised.

Lastly, in the area of operational risk, the Entity has adapted the Operational Risk Management Framework, allowing consideration of the ESG factors by including climate and environment risk among the operational risks. Likewise, the Entity updated the operational risk map by including an identification of physical risks in the area of climate and environmental risks, also including them in the assessment tools.

4. Appropriation of profit and earnings per share

4.1 Appropriation of profit

The proposed appropriation of the profit of Ibercaja Banco, S.A. from the 2021 financial year, which the Board of Directors will propose for its approval to the General Shareholders' Meeting, and that which was approved from the 2020 financial year are the following:

	Thousands of euros	
	2021	**2020**
Distribution		
To dividends:	98,140	3,849
To retained earnings:	26,175	4,122
Legal reserve	-	-
Capitalisation reserves (*)	*1,825*	-
Voluntary reserve	*24,350*	*4,122*
Profit/(loss) for the year	**124,315**	**7,971**

(*) This reserve will be unavailable for the period, with the conditions and exceptions envisaged in article 25 of Corporation Tax Law 27/2014, of 27 November,

As a consequence of the economic impacts generated by COVID-19, and with the aim of preserving the regulatory capital of credit institutions, the European Central Bank issued a recommendation on 27 March 2020 urging European banks under its supervision, including Ibercaja Banco, to refrain, at least until 1 October 2020, from distributing dividends or entering into irrevocable commitments to distribute dividends for 2019 and 2020, as well as from buy back shares to remunerate shareholders. This recommendation was updated on 27 July 2020, extending the limitation until 1 January 2021.

Subsequently, on 15 December 2020, the European Central Bank again amended its recommendation, urging banks to be very prudent in deciding on dividend amounts or buy back shares to remunerate shareholders until 30 September 2021. It also urges credit institutions that intend to implement dividend or share buy-back measures to remunerate shareholders to contact their joint supervisory teams, in the framework of the supervisory dialogue, to discuss the prudence of such measures.

It should be noted that during the second semester of 2021, the European Central Bank has decided, in view of the improvement in the Eurosystem's macroeconomic expectations for the period 2021-2023, not to extend this recommendation on dividend payouts, urging, however, banks to maintain prudence in deciding whether to distribute dividends or to buy back shares to remunerate shareholders and to consider the impact of variable remuneration payments on their ability to maintain a strong capital base.

The General Shareholders' Meeting of Ibercaja Banco held on 15 April 2021 approved the distribution of a dividend against 2020 results in the amount of 3,849 thousand euros, in full compliance with the aforementioned recommendations of the European Central Bank. The dividend was paid on 16 April 2021.

On 5 October 2021, the Board of Directors of Ibercaja Banco, taking into the account the aforementioned recommendations agreed, in accordance with the provisions of article 277 of the Corporate Enterprises Act, to distribute to the shareholders an interim dividend of 47,000 thousand euros in proportion to their respective holdings in the share capital of the Bank. This interim dividend was paid in full on 7 October 2021.

Below, is the accounting statement prepared in accordance with the legal requirements and which demonstrated the existence of sufficient liquidity to distribute the interim dividend approved:

	Thousands of euros
Profit before tax from 1 January 2021 to 31 August 2021	**91,178**
Estimate of corporation tax.	(38,916)
Legal reserve	-
Attributed profit/(loss)	-
Maximum amount of possible distribution	**52,262**
Amount to be distributed	**47,000**

	Thousands of euros
Balance in cash and cash equivalents at 1 January 2021	**7,377,476**
Cash flows from operating activities	(1,660,791)
Cash flows from investing activities	(20,103)
Cash flows from financing activities	(16,099)
Effect of exchange rate fluctuations	-
Balance in cash and cash equivalents at 31 August 2021	**5,680,483**
Interim dividend distributed	(47,000)
Balance in cash and cash equivalents at 31 August 2021 following the dividend distribution	**5,633,483**

Additionally, the Board of Directors will propose to the General Shareholders' Meeting that they agree to distribute a dividend out of 2021 profits for 98,140 thousand euros, taking into account that the shareholders have already been paid an interim dividend of 47,000 thousand euros, and 51,140 thousand euros were pending distribution.

4.2 Earnings per share

Basic earnings per share: is determined by dividing the net profit attributable to the Group for the year by the weighted average number of outstanding shares, excluding the average number of treasury shares held, during that period.

Diluted earnings per share: for its calculation, both the amount of profit or loss attributable to ordinary shareholders and the weighted average number of shares outstanding, net of treasury shares, are adjusted for all dilutive effects inherent in potential ordinary shares (share options, warrants and convertible debt).

Basic and diluted earnings per share at 31 December 2021 and 2020 are detailed below:

	31/12/2021	31/12/2020
Earnings per share numerator		
Profit/(loss) attributed to the parent (thousands of euros)	150,985	23,602
Adjustment: Remuneration of other equity instruments AT1 (thousands of euros)	(17,150)	(17,150)
Adjusted profit (thousands of euros)	133,835	6,452
Earnings per share denominator		
Average weighted number of shares	214,427,597	214,427,597
Basic and diluted earnings per share (euros)	**0.62**	**0.03**

As at 31 December 2021 and 2020 there are no dilutive effects on the earnings per share calculation.

5. Information on the Board of Directors and Senior Management of the Parent

Under the provisions of the Bank of Spain Circular 4/2017, the “key management personnel and executives” of the Parent, are deemed to be those persons having authority and responsibility for planning, directing and controlling the activities of the Parent, directly or indirectly, including any member of the Board of Directors and Senior Management. By virtue of their positions, this group of persons is considered a “related party” and, as such, subject to the disclosure requirements described in this Note.

Persons who have certain kinship or personal relationships with “key management personnel and executives” are also considered related parties, along with controlling companies, with significant influence or significant voting rights from key personnel or any of the persons in their family environment. The transactions carried out by the Ibercaja Banco Group with related parties are disclosed in Note 43.

5.1 Remuneration to the Board of Directors of the Parent

The remunerations and other benefits received in 2021 by the members of the Board of Directors of the Parent, in their status as Directors or Secretary of the Board of Directors of the Parent is detailed below by item individually:

		Thousands of euros						
Members of the Board of Directors	**Position**	**Remuneration**		**Attendance fees**	**Life insurance premiums**	**Remuneration for membership on board committees**	**Other items**	**Total**
		Fixed	**Variable**					
José Luis Aguirre Loaso	Chairman	361.0	-	33.6	15.3	-	6.9	416.8
Jesús Bueno Arrese	First Deputy Chairman	-	-	46.2	34.8	-	4.3	85.3
Victor Iglesias Ruiz	Chief Executive Officer	394.2	87.0	33.6	2.0	-	5.6	522.4
Jesús Solchaga Loitegui	Member	-	-	42.7	-	30.4	4.4	77.5
Gabriela González-Bueno Lillo	Member	-	-	25.2	-	-	1.9	27.1
Vicente Cóndor López	Member	-	-	49.7	5.3	45.6	3.5	104.1
Jesús Tejel Giménez	Member	-	-	49.7	3.7	45.6	5.6	104.6
Félix Longás Lafuente	Member	-	-	39.9	4.0	-	4.9	48.8
José Miguel Echarri Porta (1)	Member	-	-	4.9	-	-	0.1	5.0
Enrique Arrufat Guerra	Member	-	-	23.8	5.3	-	6.9	36.0
María Pilar Segura Bas	Member	-	-	35.7	2.8	-	5.6	44.1
Jesús Barreiro Sanz	Non-Director Secretary	-	-	66.5	5.7	-	6.9	79.1
Emilio Jiménez Labrador (2)	Member	-	-	38.5	-	-	0.5	39.0

(1) Director of the Parent appointed on 28 October 2021.
(2) Director of the Parent who resigned from his/her position on 28 October 2021.

The remunerations and other benefits received in 2020 by the members of the Board of Directors of the Parent, in their status as Directors or Secretary of the Board of Directors of the Parent is detailed below by item individually:

		Thousands of euros						
Members of the Board of Directors	**Position**	**Remuneration**		**Attendance fees**	**Life insurance premiums**	**Remuneration for membership on board committees**	**Other items**	**Total**
		Fixed	**Variable**					
José Luis Aguirre Loaso	Chairman	360.9	-	28.0	13.8	-	6.7	409.4
Jesús Bueno Arrese	First Deputy Chairman	-	-	42.0	31	-	4.3	77.3
Victor Iglesias Ruiz	Chief Executive Officer	395.2	139.2	28.0	1.6	-	5.5	569.5
Jesús Solchaga Loitegui	Member	-	-	28.7	-	30.4	4.2	63.3
Gabriela González-Bueno Lillo	Member	-	-	17.5	6.5	19.0	1.8	44.8
Vicente Cóndor López	Member	-	-	44.8	4.8	45.6	3.0	98.2
Jesús Tejel Giménez	Member	-	-	41.3	3.4	26.6	5.5	76.8
Félix Longás Lafuente	Member	-	-	27.3	3.7	-	6.7	37.7
Emilio Jiménez Labrador	Member	-	-	42.7	-	-	0.6	43.3
Enrique Arrufat Guerra	Member	-	-	18.2	4.9	-	6.7	29.8
María Pilar Segura Bas	Member	-	-	23.1	2.3	-	5.5	30.9
Jesús Barreiro Sanz	Non-Director Secretary	-	-	52.5	5.1	-	6.7	64.3

In relation to the attendance fees to be received by the proprietary director appointed by the shareholder foundations Fundación Ordinaria Caja Badajoz and Fundación Caja de Ahorros de la Inmaculada de Aragón, it is hereby stated that:

- Generally, the attendance allowances are allocated, for the purposes of the above information, to the proprietary director appointed at the request of the mentioned shareholder foundation, although in the application of the sectoral legislation applicable to him, and inasmuch as the director is part of their governance and management bodies, they have been directly paid to the shareholder foundation.

In the section "Remuneration for membership on board committees", the gross amounts accrued by the Chairmen of the internal committees of the Board of Directors are calculated.

In the section "Other concepts" the insurance premiums other than life insurance (health and accident) are included.

The Company does not have any pension obligations with former or current members of the Board of Directors in their capacity as such.

5.2 Remuneration of senior management of the Parent

For the purposes of preparing the consolidated financial statements, those who have held the position of Chief Executive Officer were considered to be Senior Management staff, as well as employees of the Ibercaja Banco S.A. management team (Management Committee).

As at 31 December 2021, the Management Committee (including the Chief Executive Officer) is made up of 12 people, jointly identified as Senior Management.

The remunerations accrued by Senior Management are shown in the following table, as was previously defined, for 2021 and 2020:

	Short-term remuneration		**Post-employment benefits**		**Total**	
Thousands of euros	**2021**	**2020**	**2021**	**2020**	**2021**	**2020**
Senior Management	2,555	2,626	223	184	**2,778**	**2,810**

In 2021 and 2020, remuneration for pensions or life insurance premiums were not registered in the year for former members of Senior Management.

Also, in relation to the Long-term Incentive Plan described in Note 2.5, 1,017 thousand euros accrued relating to senior management.

5.3 Duties of loyalty of the Directors

As at 31 December 2021, with respect to the requirements of articles 229 and 230 of the Corporate Enterprises Act, the members of the Ibercaja Banco Board of Directors, as well as the persons related thereto referenced in article 231 of the aforementioned Law, have confirmed that they do not carry out, on their own account or the account of others, activities which actually or potentially constitute effective competition with those carried out by the Company or which, in any other way, permanently conflict with the Company's interests.

5.4 Transactions with significant shareholders

During 2021 and 2020, there have been no transactions outside the ordinary course of business or other than at arm's length with significant shareholders, except:

- Service level agreement (legal, fiscal, technological, marketing, communication, etc. council) formalised with Fundación Bancaria Ibercaja for the amount of 142,194 euros (142,867 euros as at 31 December 2020).

- Rental of Ibercaja Banco property used by Fundación Bancaria Ibercaja to carry out its activities for the amount of 99,294 euros (149,559 euros as at 31 December 2020).

- Service level agreement (use and management of installations, artistic assets, etc.) by Fundación Bancaria Ibercaja to Ibercaja Banco for the amount of 1,006,829 euros (1,028,627 euros as at 31 December 2020).

All the operations to be formalised with the shareholder foundations are previously reported by the Audit and Compliance Committee and are subject to the approval of the Board of Directors of the Parent.

6. Cash and cash balances at central banks and other demand deposits

The balances in this consolidated balance sheet heading as at 31 December 2021 and 2020 were as follows:

	Thousands of euros	
	2021	**2020**
Cash	221,486	239,019
Cash balances at central banks	5,961,332	7,079,491
Other demand deposits	205,806	254,099
	6,388,624	**7,572,609**

The average effective interest rate on debt instruments classified in this portfolio during 2021 was -0.39% (-0.32% during 2020).

7. Financial assets and liabilities held for trading

7.1 Breakdown of the balance and maximum credit risk - debit balances

The financial assets included in this category as at 31 December 2021 and 2020 are detailed below, classified by geographical areas, counterparty classes and type of instrument:

	Thousands of euros	
	2021	**2020**
By geographical areas		
Spain	2,467	4,869
Rest of the countries in the European Monetary Union	358	518
Rest of Europe	39	-
Rest of the world	-	116
	2,864	**5,503**
By counterparty classes		
Credit institutions	1,035	2,138
Other resident sectors	1,829	3,365
	2,864	**5,503**
By type of instrument		
Debt securities	-	-
Derivatives not traded in organised markets	2,864	5,503
	2,864	**5,503**

The carrying amount shown in the above table corresponds to the maximum credit risk exposure in relation to each financial instrument.

7.2 Breakdown of the balance - credit balances

The financial liabilities included in this category as at 31 December 2021 and 2020 are detailed below, classified by geographical areas, counterparty classes and type of instrument:

	Thousands of euros	
	2021	**2020**
By geographical areas		
Spain	7,828	4,001
Rest of the countries in the European Monetary Union	408	436
Rest of the world	539	1,193

Ownership interests in Investment Funds	1,666,941	824,170
	1,669,715	**855,962**

The Group classifies financial assets to this portfolio when their contractual terms do not give rise to cash flows consisting solely of principal and interest payments (SPPI test). The portfolio also includes equity assets (investment fund units) that are managed jointly with insurance liabilities ("Unit linked") measured at fair value, which make up almost the entire balance. The changes in "Holdings in the equity of Investment Funds" are due mainly to the acquisition of units ("Unit Linked") in 2021, in accordance with the Group's strategy of increasing the weight of these products with respect to traditional savings insurance, which gave rise to a net decrease in the liability heading of the consolidated balance sheet "Liabilities under insurance or reinsurance contracts".

The carrying amount shown in the above table corresponds to the maximum credit risk exposure in relation to each financial instrument.

In 2020, under the "Debt securities" heading, the Group, on the basis of the latest Business Plan approved by Sociedad de Gestión de Activos procedentes de la Reestructuración Bancaria (SAREB), decreased the value of the subordinated debt that it held in this entity, amounting to 10,350 thousand euros, reducing the carrying amount of this asset to zero. This decrease in fair value is recognised with a charge to "Gains/losses on financial assets not held for trading mandatorily measured at fair value through profit or loss, net" in the consolidated income statement.

In 2021, this subordinated debt was converted into registered shares of SAREB. The debt issue was fully redeemed and the new shares of the Company were classified under “Financial assets at fair value through other comprehensive income” on the consolidated balance sheet, without generating any impairment loss or effect on equity on the consolidated balance sheet or consolidated income statement, since both the issue and the Company’s shares had been fully impaired by then.

The average effective interest rate on debt instruments classified in this portfolio during 2021 was 0.60% (0.24% during 2020).

9. Financial assets at fair value through profit or loss

The financial assets included in this category as at 31 December 2021 and 2020 are detailed below, classified by geographical areas, counterparty classes and type of instrument:

	Thousands of euros	
	2021	**2020**
By geographical areas		
Spain	4,596	5,473
Rest of the countries in the European Monetary Union	2,855	3,129
	7,451	**8,602**
By counterparty classes		
Credit institutions	1,173	1,186
Resident public administrations	4,596	5,473
Non-resident public administrations	1,682	1,943
	7,451	**8,602**
By instrument type		
Debt securities	7,451	8,602
	7,451	**8,602**

The Group classifies to this portfolio the fixed-income assets that are managed jointly with insurance contract liabilities (“Unit linked”) measured at fair value.

The carrying amount shown in the above table corresponds to the maximum credit risk exposure in relation to each financial instrument.

10. Financial assets at fair value through other comprehensive income

10.1 Breakdown of the balance and maximum credit risk

The financial assets included in this category as at 31 December 2021 and 2020 are detailed below, classified by geographical areas, counterparty classes and type of instrument:

	Thousands of euros	
	2021	**2020**

Ownership interests in Investment Funds	*46,031*	*48,583*
Ownership interests in Venture Capital Funds	*13,675*	*9,469*
Total gross amount	**6,468,785**	**7,029,940**

The carrying amount shown in the above table corresponds to the maximum credit risk exposure in relation to each financial instrument.

At 31 December 2021 and 2020, “Other equity instruments” included the investment that the Bank holds in SAREB, which was fully impaired.

The entirety of losses from impairment related to the hedge against credit risk of debt securities, which are reversible, are detailed in the table above.

This heading includes a balance of 113,717 thousand euros (113,717 thousand euros at 31 December 2020) relating to the shareholding in Caser. In this respect, on 24 January 2020, Ibercaja Banco, S.A. signed a contract of sale with Helvetia Schweizerische Versicherungsgesellschaft AG for part of its shareholding in Caja de Seguros Reunidos, Compañía de Seguros y Reaseguros, S.A. (“Caser”), which represents 4.45% of the share capital and voting rights of this company. On 25 June 2020, Ibercaja obtained the pertinent regulatory authorisations to formalise the aforementioned sale, which materialised with an end price of 53 million euros. The recognition of this transaction led to a reclassification among Equity masses, from the “Other cumulative comprehensive income” to “Other reserves” amounting to 32 million euros. Ibercaja maintains a shareholding in Caser of 9.5%

The positive impact of this transaction on Ibercaja's fully-loaded Common Equity Tier 1 (CET1) ratio was 24 basis points.

Additionally, Ibercaja formalised an agreement for a modifying novation of its non-life insurance distribution contract on the same date with Caser (through the linked bancassurance operator, Ibercaja Mediación de Seguros, S.A.U.)

This novation has meant for Ibercaja, in addition to the full maintenance of the distribution fees, the collection of an initial fixed fee of 70 million euros not subject to review and not adjustable for any circumstance or event as supplementary consideration for the performance of insurance mediation activities as well as the collection of the variable payment for the total fulfilment of the Business Plan of the previous agency contract, which is settled with the signing of this new agreement.

Accordingly, at 31 December 2020, the Group recognised 15 million euros under "Other operating income" in the consolidated income statement (see Note 36), following the interpretation of the Spanish National Securities Market Commission regarding the application of IFRS 15 which, in this specific case, has a certain technical complexity, admitting different interpretations. The remaining amount of the initial fixed fee already paid, i.e. 55 million euros, is being accrued in the consolidated profit and loss account in accordance with the provisions of the aforementioned standard.

Finally, the signing of this contract will result in additional profit-sharing payments of up to 50 million euros over the next 10 years. Such receipts shall be recorded as revenue on an accruals basis.

The average effective interest rate on debt instruments classified in this portfolio during 2021 was 1.65% (2.01% during 2020), which includes the effect of the revenue reversals from risk hedging for interest rate risk.

10.2 Impaired debt securities

At 31 December 2021 and 2020 there were no impaired debt securities.

10.3 Credit risk hedges and others

The changes in the impairment losses recognised to cover the credit risk of the debt instruments included in this portfolio in 2021 and 2020 are presented below:

	Thousands of euros	
	2021	2020
Opening balance	**6,612**	**7,999**
Transfer charged to profit for the year	1,083	10,903
Reversal of provisions taken to income statement	(2,970)	(9,603)
Amounts used	-	(3,257)
Exchange differences and other movements	26	570
Closing balance	**4,751**	**6,612**
Of which:		
- Individually determined	-	-
- Collectively determined	*4,751*	*6,612*

The impairment losses indicated in this Note are recognised in the consolidated income statement under "Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss - Financial assets at fair value through other comprehensive income)".

11. Financial assets at amortised cost

The items making up this consolidated balance sheet caption at 31 December 2021 and 2020 are as follows:

	Thousands of euros	
	2021	2020
Debt securities (Note 11.2)	9,974,513	8,474,312
Loans and advances	31,014,887	31,252,513
Credit institutions (Note 11.3)	361,357	311,651
Customers (Note 11.4)	30,653,530	30,940,862
	40,989,400	**39,726,825**

11.1 Breakdown of the balance and maximum credit risk

The financial assets included in this category as at 31 December 2021 and 2020 are detailed below, classified by geographical areas, counterparty classes and type of instrument:

	Thousands of euros	
	2021	**2020**
By geographical areas		
Spain	39,955,871	39,304,955
Rest of the countries in the European Monetary Union	1,172,761	70,310
Rest of the world	399,957	996,660
Total gross amount	**41,528,589**	**40,371,925**
(Impairment losses)	(539,189)	(645,100)
Total net amount	**40,989,400**	**39,726,825**
of which: debt securities related to the insurance activity	*145,677*	*160,465*
of which: loans and advances related to the insurance activity	*3,555*	*28,428*
By counterparty classes		
Credit institutions	378,870	377,111
Resident public administrations	9,482,201	6,726,092
Non-resident public administrations	1,139,270	727,157
Other resident sectors	30,352,302	32,387,036
Other non-resident sectors	175,946	154,529
Total gross amount	**41,528,589**	**40,371,925**
By type of instruments		
Debt securities	9,974,555	8,474,475
Credits and loans	29,235,037	29,633,919

Other	703,603	536,283
Total gross amount	**41,528,589**	**40,371,925**

The carrying amount shown in the above table corresponds to the maximum credit risk exposure in relation to each financial instrument, except for:

- The asset corresponding to the current value of the fees outstanding on financial guarantees, registered under “Other” (in the breakdown by instrument type), amounts to 1,558 thousand euros as at 31 December 2021 (1,456 thousand euros as at 31 December 2020). In Note 27.1, the nominal value of the financial guarantees is broken down, which implies the maximum level of exposure to the credit risk.

This item also includes the balances of “Other financial assets” detailed in notes 11.3 and 11.4.

- The assets transferred to securitisation funds that were not derecognised from the balance, in accordance with that stipulated in Note 2.8, shall be registered under heading “Credits and loans” (in the breakdown by instrument type) and as at 31 December 2021 they amounted to 2,115,334 thousand euros (2,441,430 thousand euros as at 31 December 2020), with their breakdown detailed in Note 27.5. The maximum level of exposure to credit risk is collected by the value of all the positions of the Group in the mentioned securitisation funds, which amounts to 2,010,108 thousand euros as at 31 December 2021 (2,249,870 thousand euros as at 31 December 2020). The amount of the bonds issued by the securitisation funds that were subscribed by third parties outside to the Group amounts to 258,354 thousand euros as at 31 December 2021 (326,522 thousand euros as at 31 December 2020), with their breakdown detailed in Note 19.4.

11.2 Debt securities

The breakdown by financial assets included in the debt securities category as at 31 December 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Debt securities	**9,974,555**	**8,474,475**
Impaired assets	-	-
Total gross amount	**9,974,555**	**8,474,475**
(Impairment losses)	(42)	(163)
Total net amount	**9,974,513**	**8,474,312**

This heading includes, among others, SAREB bonds, with an irrevocable guarantee from the Spanish central government, whose nominal value at 31 December 2021 was 1,628,700 thousand euros (1,653,300 thousand euros at 31 December 2020).

In 2021, the Group sold a national public debt securities portfolio, for a nominal value of 320,000 thousand euros. The result of this transaction amounts to 18,686 thousand euros, which has been recognised under "Gains or losses on derecognition of financial assets and liabilities not measured at fair value through profit or loss, net - Financial assets at amortised cost" in the condensed consolidated interim income statement (Note 34). This transaction is not considered to be significant, hence the business model under which the assets concerned are managed is not questioned, in accordance with IFRS 9 and the Group's policies and methodological manuals.

In 2020, the Group carried out a sales transaction of the national public debt securities portfolio for a nominal value of 1,381,770 thousand euros, of which 300,000 thousand euros were executed through a forward sale in the first quarter of 2021. This sales operation was performed as a response to the extraordinary circumstances of the COVID-19 pandemic and the unusual scale of the challenges posed. This extraordinary sale transaction is consistent with the business model under which the assets concerned are managed (Maintenance of financial assets to receive their contractual cash flows, Note 2.2.4), in accordance with IFRS 9 and the Entity's policies and methodological manuals. The result of this transaction amounted to 147,721 thousand euros, of which 114,619 thousand euros were recognised in 2020 and 33,102 thousand euros were recognised in 2021 under "Gains or losses on derecognition of financial assets and liabilities not measured at fair value through profit or loss, net - Financial assets at amortised cost" in the consolidated income statement (Note 34).

The average effective interest rate on debt instruments classified in this portfolio during 2021 was 0.63% (0.66% during 2020).

11.3 Credit institutions

The breakdown of the financial assets included in the "credit institutions" category at 31 December 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Time or at notice:	**3,227**	**106,391**
Reverse repurchase agreements	-	106,391
Other accounts	3,227	-
Other financial assets:	**358,041**	**205,394**
Cheques payable by credit institutions	831	1,218
Cash guarantees	350,343	167,513
Other items	6,867	36,663
Impaired assets	**-**	**-**
Valuation adjustments	**89**	**(134)**
Total gross amount	**361,357**	**311,651**
(Impairment losses)	**-**	**-**
Total net amount	**361,357**	**311,651**

The average effective interest rate on debt instruments classified in this portfolio during 2021 was 0.05% (0.06% during 2020).

11.4 Customers

The breakdown by financial assets included in the Loans and advances to customers category as at 31 December 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Credits and loans	**29,235,037**	**29,633,919**
Commercial loans	562,519	450,769
Loans secured with collateral	20,085,277	20,754,757
Other term loans	6,521,467	6,240,819
Finance leases	452,226	463,997
Receivables on demand and other	803,795	633,133
Impaired assets	716,343	1,010,697
Valuation adjustments	93,410	79,747
Reverse repurchase agreements	**1,615,394**	**1,620,857**
Other financial assets	**342,246**	**331,023**
Financial transactions pending settlement	-	165
Cash guarantees	105,366	170,244
Financial guarantee fees	1,558	1,456
Other items	235,322	159,158
Total gross amount	**31,192,677**	**31,585,799**
(Impairment losses)	(539,147)	(644,937)
Total net amount	**30,653,530**	**30,940,862**

Finance leases in which the Group is the lessor are described below:

- The interest rate is variable.
- There is a purchase option in the lessee's favour arranged as the last instalment of the contract, through which the lessee may obtain the ownership of the asset at a cost which is significantly lower than the asset's market value at that time. As it may be considered reasonably certain that the lessee will exercise this purchase option, its value is recorded as a debt claim together with the rest of the minimum payments to be made by the lessee.

Details of finance leases for the year are as follows:

- At 31 December 2021, the gross investment totals 452,226 thousand euros (452,226 thousand euros at 31 December 2020).
- The present value of future minimum lease payments receivable during the non-cancellable part of the lease period (assuming that any existing rights to extend the lease or purchase options are not exercised) at 31 December 2021 is 163,682 thousand euros within one year (162,993 thousand euros in 2020), 246,104 thousand euros between one and five years (264,216 thousand euros in 2020) and 32,825 thousand euros at over five years (35,547 thousand euros in 2020).
- Unaccrued interest income totals 20,008 thousand euros in 2021 (22,373 thousand euros in 2020).
- The residual value of these leases amounts to 32,629 thousand euros at 31 December 2021 (36,732 thousand euros at 31 December 2020).
- Impairment adjustments to finance leases amount to 13,634 thousand euros at 31 December 2021 (18,190 thousand euros at 31 December 2020).

“Valuation adjustments” at 31 December 2021 included an amount of 22,317 thousand euros corresponding to the adjustment to the amortised cost of the covered assets pending accrual after the interruption of the macro-hedges described in Note 12.2 (31,262 million euros at 31 December 2020).

The average effective interest rate on debt instruments classified in this portfolio during 2021 was 1.09% (1.24% during 2020).

11.4.1. Overdue, impaired and unimpaired assets

There follows a breakdown of credit to customers considered to be impaired because of credit risk at 31 December 2021 and 2020, classified according to the period elapsed since the maturity of the oldest unpaid amount of each transaction at those dates:

	Thousands of euros					
	Not yet due	Up to 6 months	6 to 9 months	9 to 12 months	Over 12 months	Total
Balances as at 31 December 2021	118,042	51,965	29,675	29,100	487,561	716,343
Balances as at 31 December 2020	142,193	48,278	45,422	50,962	723,842	1,010,697

The detail of the impaired assets by counterparty classes is as follows:

	Thousands of euros	
	2021	2020
Resident public administrations	178	1,246
Other resident sectors	712,870	1,005,184
Other non-resident sectors	3,295	4,267
	716,343	**1,010,697**

In general, the matured assets are not considered impaired until the length of service of the non-payment surpasses 90 days. The detail of the unimpaired matured assets by counterparty classes and length of service as at 31 December 2021 and 2020 is as follows:

	Thousands of euros			
	2021			
	Less than one month	1 to 2 months	Between 2 months and 90 days	Total
Credit institutions	-	-	-	-
Resident public administrations	8	-	-	8
Other resident sectors	18,425	5,830	2,781	27,036
Other non-resident sectors	47	3	14	64
	18,480	**5,833**	**2,795**	**27,108**

	Thousands of euros			
	2020			
	Less than one month	1 to 2 months	Between 2 months and 90 days	Total
Credit institutions	-	-	-	-
Resident public administrations	68	73	-	141
Other resident sectors	23,903	4,923	3,768	32,594
Other non-resident sectors	49	13	11	73
	24,020	**5,009**	**3,779**	**32,808**

11.5 Credit risk hedges and others

The changes in the gross balance of financial assets included in this category in 2021 and 2020 are presented below:

	Thousands of euros			
	2021			
	Stage 1	Stage 2	Stage 3	Total
Gross balance at 1 January	**37,683,374**	**1,677,854**	**1,010,697**	**40,371,925**
Transfers:	(153,385)	105,720	47,665	-
from stage 1 to stage 2:	*(749,085)*	*749,085*	-	-

On 23 December 2021, Ibercaja Banco, S.A, formalised a sale contract for a doubtful loan book, with a nominal value of 51,260 thousand euros, in favour of LM IV B S,V and Axactor España S.L. The negative impact of the transaction, 9,623 thousand euros, is recognised under “Net gains or losses derecognised in financial asset and liability accounts not measured at fair value through profit or loss” in the consolidated income statement (Note 34).

The balance of provision utilisation in 2021 relates mainly to provisions covering transactions derecognised from the consolidated balance sheet amounting to 150,943 thousand euros (191,911 thousand euros in 2020). The balance of provision utilisation in 2021 also included provisions derecognised from the balance sheet covering the loan book referred to in the previous paragraph for 17,117 thousand euros.

“Other” includes releases generated by the write-downs of provisions for operations cancelled due to collections during the period.

The concept of “Other movements” includes the transfer of the non-performing loan allowance that the credit transaction had which were paid through the awarding or granting in payment for the overall or partial satisfaction of the debt, in accordance with the criteria described in Note 2.18.

The detail of the impaired losses by counterparty classes is as follows:

	Thousands of euros	
	2021	**2020**
Resident public administrations	178	821
Other resident sectors	535,716	641,948
Other non-resident sectors	3,295	2,331
	539,189	**645,100**

The various items recognised in 2021 and 2020 under “Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss - Financial assets at amortised cost” in the consolidated income statements for those years are presented below:

	Thousands of euros	
	2021	**2020**
Impairment losses credited to allowances for assets	88,270	224,177
Recovery of written-off assets	(8,375)	(5,831)
	79,895	**218,346**

The movement of the consolidated Loans and receivables derecognised in 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Balances at the start of the year	**631,126**	**818,454**

Main cash payment to the counterparties	(8,126)	(5,618)
Interest cash payment to the counterparties	(248)	(213)
Forgiveness	(30,456)	(66,975)
Limitation period	(777)	(384)
Foreclosure of tangible assets	-	(2,524)
Debt refinancing or restructuring	-	-
Sales	(3,624)	(268,615)
Other items	-	-
Balance at the close of the year	**747,775**	**631,126**

“Sales” in 2020 mainly includes the impact of the sale of a portfolio of non-performing loans with a nominal value of 269 million euros, which the Group sold to DSSV, S.A.R.R.L. The transaction resulted in a positive result of 3 million euros.

The accrued interest pending payment, registered in memorandum accounts, associated with impaired financial assets, amounts to 41,507 thousand euros as at 31 December 2021 (51,073 thousand euros as at 31 December 2020).

11.6 Impact of COVID-19 on classification and impairment of financial instruments (IFRS 9)

11.6.1. Measures implemented to mitigate the impacts of COVID-19

Since the beginning of the pandemic, the Group has offered COVID-19 support measures to its customers, which consisted of both moratoriums of existing loans and new financing with public backing, protected in the following legislative packages and sector agreements, to thereby reach a higher number of parties affected by this health crisis.

On 18 March 2020, Royal Decree-Law 8/2020 of 17 March on extraordinary urgent measures to address the economic and social impact of COVID-19 was published. On 1 April, Royal Decree-Law 11/2020 of 31 March was published, adopting urgent additional measures in the social and economic sphere to deal with COVID-19, which amended the previous Royal Decree-Law 8/2020, introducing modifications that improve or extend it.

One of the measures developed by these Royal Decrees is aimed at ensuring the protection of mortgage debtors in a situation of economic vulnerability, establishing a moratorium on the payment of their mortgage on their principal residence, loans secured by real estate used for economic activity, those secured by housing that was intended to rent and in which the debtor has ceased to receive rent due to the COVID-19 situation, as well as loan and credit contracts without mortgage collateral, including consumer loans. Banks could enter into such transactions until 29 September 2020.

It should be noted that, after the close of the 2020 financial year and prior to preparing these consolidated annual accounts, Royal Decree-Law 3/2021 of 2 February was published, adopting measures to reduce the gender gap and other matters in the Social Security and economic fields, which includes the measure to extend the application period for moratoriums, in line with the extension of the effects of the pandemic. In this way, the beneficiaries of any moratoriums, whether legal or under a sector understanding, are allowed to take advantage of them for a maximum cumulative duration of nine months, including those who had initially requested a moratorium for a shorter period. The deadline to apply for these moratoriums was extended to 31 March 2021.

Another of the measures adopted in Royal Decree-Law 8/2020 addressed the difficult economic situation that companies and the self-employed would have to face as a result of the health crisis by creating a 100 billion euro line of guarantees on behalf of the State to guarantee part of the financing that credit institutions grant to companies and the self-employed to meet their liquidity needs. This line has been managed by the Official Credit Institute (ICO) and its objective was to facilitate granting sufficient liquidity to maintain employment and alleviate the economic effects of COVID-19. Institutions could enter into such transactions until 1 June 2021, provided that they did not exhaust the amounts of guaranteed financing granted by the Instituto de Crédito Oficial before then.

Similarly, on 3 July 2020, Royal Decree-Law 25/2020 was published, approving the creation of a 40 billion euro line of guarantees on behalf of the State to guarantee part of the financing that credit institutions grant to companies and the self-employed to meet their needs for new investments. Institutions could enter into such transactions until 1 June 2021, provided that they did not exhaust the amounts of guaranteed financing granted by the Instituto de Crédito Oficial before then.

In addition, the publication of Royal Decree-Law 34/2020 of 17 November on urgent measures to support business solvency and the energy sector, and in the area of taxation, in addition to extending the application period for these publicly-guaranteed financing transactions until 1 June 2021, lays down an extension of the maturity and grace periods of these transactions for all debtors who so request. Specifically, the maturity of these transactions was be extended by a maximum of three years, provided that the total maturity of the guaranteed transaction does not exceed eight years from the date of the initial formalisation of the transaction, and the grace period for the repayment of the principal of the guaranteed transaction was increased by a maximum of twelve additional months, if the total grace period, taking into account the initial grace period, does not exceed twenty-four months.

Lastly, the Group adhered to the Sector Understanding on the deferral of financing operations for customers affected by the coronavirus crisis, approved by the Board of the Spanish Confederation of Savings Banks (CECA) and published on 16 April 2020. The purpose of this agreement was to establish the framework and general criteria for certain debtors affected by this health crisis to defer payment of mortgage loans or credits and personal loans or credits. Entities could enter into such transactions until 30 September 2020.

On 15 December 2020, CECA issued an addendum to the abovementioned Sector Understanding, adapting the term of the Sector Understanding until 30 March 2021, the latest date for submission of applications under this Sector Understanding, in line with the new provisions contained in the EBA/GL/2020/15 Guidelines.

Royal Decree-Law 5/2021, of 12 March, on extraordinary measures to support business solvency in response to the Covid-19 pandemic extended until 31 December 2021 the application period for ICO Avales COVID-19 lines developed under Royal Decree-Law 8/2020 and Royal Decree-Law 25/2020, and approved three levels of possible action regarding financing guaranteed by the ICO to strengthen business solvency. The Resolution of the Council of Ministers of 11 May 2021 approved the Code of Good Practices, to which the Bank adheres, and on the basis of which the three possible levels of action regulated by this Royal Decree-Law are structured:

- Extension of the maturity of guarantees.
- Conversion of guaranteed financing into participating loans.
- Transfers for reduction of outstanding principal of guaranteed loans.

Lastly, the Agreement of the Council of Ministers of 30 November 2021 approved the extension of the request for guarantees granted to companies and self-employed workers until 1 June 2022.

The detail of these transactions at 31 December 2021 and 2020 is as follows:

In addition to these support operations established in legal and sector-wide frameworks, the Group, in its desire to help its customers overcome this crisis, has renegotiated certain financial lease operations whose holders had accredited correct compliance with their financial obligations and who, as a result of COVID-19, are experiencing temporary financial difficulties. Until 31 December 2021, the Group had granted 290 transactions of this type (285 transactions at 31 December 2020), whose outstanding balance amounted to 271 thousand euros (2,170 thousand euros at 31 December 2020),

All the operations described above have been carried out in accordance with the provisions of the regulations of the Royal Decrees, as well as the guidelines and sector understandings.

The characteristics of the financial instruments under which these mitigation measures have been implemented are as follows:

- **Legal moratorium:** entails the suspension of the mortgage debt for a period of three months and the consequent non-application, during the period of validity of the same, of the early maturity clause that, where applicable, was included in the mortgage loan contract. During the period of validity, the Entity may not demand payment of the mortgage instalment, nor of any of the items comprising it (amortisation of the capital or payment of interest), either in full or as a percentage. Until 31 December 2021, legal moratorium measures have been formalised affecting 7,760 transactions, whose outstanding risk exposure amounts to 17,173 thousand euros (7,695 transactions with an outstanding risk of 39,743 thousand euros as at 31 December 2020). In accordance with IFRS 9, these measures have resulted in a non-substantial modification of the contract and therefore the affected assets have not been derecognised, although the Group has recognised the adjustment to the carrying amount of these assets as a result of the change in cash flows under “Impairment or reversal of impairment of financial assets not measured at fair value through profit or loss - Financial assets at amortised cost” in the consolidated income statement. In any case, the effect of the changes on the consolidated income statement in 2021 and 2020 was not significant.

- **Sectoral moratorium:** In this moratorium, the repayment of the principal of the loan is deferred for the term of the loan, although the customer will pay interest on the outstanding principal during this period. The term of the moratorium is a maximum of 12 months for mortgage loans or credits, and a maximum of 6 months for personal loans or credits. In the case of customers who are granted this moratorium after having exhausted the legal moratorium granted, the maximum term of the sectoral moratorium shall be reduced by the term of the legal moratorium. At 31 December 2021, the Group had formalised sectoral moratorium measures affecting 3,808 transactions, of which 2,641 transactions have been formalised after the customer has exhausted the legal moratorium granted, with the outstanding risk of transactions with this type of moratorium in force amounting to 8,360 thousand euros (3,645 transactions, of which 2,676 transactions have been entered into after the customer has exhausted the legal moratorium granted, bringing the outstanding risk of transactions with this type of moratorium in force to 326,386 thousand euros as at 31 December 2020).

- **COVID-19 ICO Lines:** Royal Decree-Law 8/2020 lays down that the Ministry of Economic Affairs and Digital Transformation will grant up to 100 billion euros in guarantees for financing granted by credit institutions to meet their needs arising from invoice management, working capital requirements, financial or tax obligations, payment of employee salaries or other liquidity needs that allow them to maintain economic activity. Companies and the self-employed have access to these guarantees, through the formalisation of new financing operations or the renewal of existing ones. As at 31 December 2020, the lines of guarantees activated by the Government now total the 100 billion euros set out in Royal Decree-Law 8/2020, in five lines, approved by Agreement of the Council of Ministers on 24 March, 10 April, 5 May, 19 May 2020 and 16 June. Of these total amounts, 67.5 billion euros have been earmarked for SMEs and the self-employed, 25 billion euros to other companies, 4 billion euros for issuing promissory notes, 2.5 billion euros for SMEs and the self-employed in the tourism sector and related activities, 500 million euros for the self-employed and companies for the acquisition or financial or operational leasing of road transport motor vehicles for professional use and 500 million euros for CERSA (Compañía Española de Reafianzamiento, S.A.)

  Additionally, Royal Decree-Law 25/2020 lays down that the Ministry of Economic Affairs and Digital Transformation will grant up to 40 billion euros in guarantees for financing granted by credit institutions to mainly meet their financial needs arising from new investments. Companies and the self-employed have access to these guarantees, through formalising new financing operations. Until 31 December 2021, the Government activated six tranches of this line of guarantees, some of which will be managed by the ICO, for a total of 26.8 billion euros, approved by the Council of Ministers on 28 July, 24 November, 22 December 2020 and 28 May 2021, the total amounts of which are earmarked for 15 billion euros for SMEs and the self employed, 8 billion euros for other companies, 2.5 billion to guarantee financing operations for companies and the self-employed that are in the process of executing an insolvency agreement within an insolvency proceeding (but are up to date with their obligations under the agreement and can prove this by means of a court or administrator’s report), 250 million euros to guarantee promissory notes issued on the MARF (Mercado Alternativo de Renta Fija) by companies that could not benefit from the tranche available under the first line as they were in the process of renewing their promissory note programme, 500 million euros to meet the investment and liquidity needs of SMEs and the self-employed in the tourism, hospitality and related activities sector, and 500 million euros to strengthen CERSA’s guarantees and increase the capacity of the MGSs.

  As at 31 December 2021, the number of transactions formalised by the Group for the self-employed, SMEs and other companies came to 19,643, with an outstanding balance of 1,667,880 thousand euros and an ICO guarantee amount of 1,286,160 thousand euros (17,082 transactions with an outstanding balance of 1,454,067 thousand euros and an ICO guarantee amount of 1,089,024 thousand euros at 31 December 2020).

The ICO Covid-19 guarantees do not affect the assessment of the significant increase in risk as this is assessed through the credit quality of the instrument. The Group considers that the COVID-19 ICO guarantees form a substantial part of the secured financing (full guarantee), as they are in any case new operations or renewals of existing credit lines with substantial modifications to the original terms and conditions. Therefore, the accounting treatment applied to them is based on the following assumptions in line with the specifications of IFRS 9: (i) the fee paid by the Group to the ICO is incorporated as an incremental cost in the calculation of the effective interest rate of the operation, and (ii) the flows expected to be obtained as a result of the execution of the guarantee are taken into account in the calculation of the expected loss on the transaction.

The Group has strengthened procedures both when granting moratoriums and for monitoring credit risk during the lifetime of the moratoriums and upon maturity. Transactions are analysed on the basis of the credit quality of the customer, without the granting of the moratorium in itself implying an automatic trigger for a significant increase in risk.

In addition, as evidence of payment no longer exists or has been reduced, the Group has introduced additional indicators to identify the significant increase in credit or impairment that may have occurred in certain transactions or groups of transactions and, where appropriate, they have been classified as Stage 2 or, where applicable, Stage 3.

In addition, account has been taken of the indications from the European Banking Authority (EBA) to not classify as refinancing moratoriums if they meet certain requirements. This is without prejudice to maintaining their status as refinancing if they were previously so classified or putting the exposure in the appropriate risk category as set out above.

Moreover, the accounting treatment of singular transactions, i.e. those not covered by the general frameworks described above, as well as of overdue arrears that have required additional support, is in line with the updated assessment of the customer's credit quality and the characteristics of the solution to be granted.

11.6.2. Effect on rating by credit risk stages

In the current economic context arising from the COVID-19 health crisis, banking regulators and supervisors around the world have recommended making appropriate use of the flexibility implicit in the regulatory framework, without undermining the adequate identification and hedging of credit risk. In line with these guidelines and recommendations, the Group has adapted its criteria for classifying financial instruments by stage according to their credit risk. The aim is to avoid automatisms and to allow greater flexibility in the application of expert judgement for the credit risk classification of operations, including those affected by legal and sectoral moratoriums, those that have been subject to a guarantee from the COVID-19 ICO line, and the treatment of refinancing. Following on from this, the existence of liquidity difficulties of borrowers with a good payment behaviour would not automatically lead to the amendments of the operations motivated by the COVID-19 crisis being identified as refinancing or restructuring at the time they are granted. These transactions may remain classified as normal as long as there are no reasonable doubts about their repayment and there has been no significant increase in their credit risk.

The Group has considered these guidelines and recommendations in its criteria for determining whether there is a significant increase in risk in its lending exposures. Furthermore, based on the recommendations of the European Banking Authority (EBA) and the European Securities and Markets Authority (ESMA), and in order to distinguish between exposures affected by temporary liquidity constraints (according to ESMA) and those that are actually affected by a situation of significantly increased risk, the Group refutes the presumption that there is a significant increase in risk in the case of operations affected by legal and sectoral moratoria, for the entire duration of the moratorium. However, those operations affected by sectoral moratoriums more than three months old and for which a low capacity to overcome this crisis is determined, based on the credit risk monitoring carried out by the Group, will be considered to have produced a significant increase in risk, with their consequent classification at Stage 2.

In addition, based on the results of the credit risk monitoring analyses of its loan portfolio described in Note 11.6.3, the Group has considered the classification at Stage 2 of those exposures in companies (not individually significant, since these are analysed by means of an individualised expert analysis) belonging to economic sectors especially affected by the health crisis or which, within the credit risk monitoring carried out by the Group, have been determined to have a low capacity to overcome this crisis.

11.6.3. Impact on credit risk impairment hedges

The current coronavirus pandemic (COVID-19) has continued to affect economic activity in 2021 due to the prolongation of containment measures. However, progress in the fight against the pandemic and the advance of the vaccination campaign, the improved capacity of economic agents to adapt to the pandemic, important additional fiscal policy measures, national and supranational policies, as well as the current recovery in demand are containing the impact on activity.

In this context, the Group, in its process of recalibrating the credit risk models in 2021, has updated, using the information available at year-end, the macroeconomic variables that affect the forward-looking information of the impairment coverage models. Hence, the probability of the occurrence of each scenario used was re-weighted (Note 2.3).

While in 2020, given the exceptional nature of the macroeconomic situation caused by COVID-19, in which unprecedented rates of falls and rebounds in the historical series of many variables have been observed and are estimated, the Group has considered, on the basis of the communications made by supervisors and supranational bodies to mitigate the treatment of short-term procyclicality in institutions' credit risk models, that, for those variables in which very distant peaks and troughs are reached, it is more prudent to draw up scenarios using the net effect of the variables, and it was thus decided to raise the probability of occurrence of the central scenario. Otherwise, in 2021, despite having reduced the level of uncertainty regarding the future economic forecasts, the Group has increased the weight of the pessimistic scenario, given the risks that have arisen especially during the last part of 2021, related with inflation, the supply chain and others of a geopolitical, which could delay the economic recovery and growth prospects of the projections issued by the European Central Bank or the Bank of Spain.

The main projected variables considered as at 31 December 2021 and 2020 are as follows:

	2021	2022	2023
GDP growth			
Base Scenario	6.5%	6.9%	2.7%
Best-case scenario	6.8%	7.6%	3.0%
Pessimistic scenario	2.7%	6.3%	2.0%
Unemployment rate			
Base Scenario	16.3%	16.0%	14.7%
Best-case scenario	16.0%	15.2%	13.6%
Pessimistic scenario	19.4%	18.9%	17.4%
Interest rate			
Base Scenario	(0.5%)	(0.4%)	(0.4%)
Best-case scenario	(0.5%)	(0.4%)	(0.4%)
Pessimistic scenario	(0.5%)	(0.5%)	(0.5%)
House price growth			
Base Scenario	1.5%	4.6%	4.0%
Best-case scenario	2.1%	6.0%	4.7%
Pessimistic scenario	(6.5)	3.3%	2.7%

	2020	2021	2022
GDP growth			
Base Scenario	(11.4%)	6.2%	6.3%
Best-case scenario	(11.4%)	8.6%	5.6%
Pessimistic scenario	(11.5%)	1.7%	5.8%
Unemployment rate			
Base Scenario	16.8%	18.4%	16.3%
Best-case scenario	16.8%	17.5%	15.1%
Pessimistic scenario	16.9%	19.3%	18.5%
Interest rate			
Base Scenario	(0.4%)	(0.4%)	(0.4%)
Best-case scenario	(0.4%)	(0.4%)	(0.4%)
Pessimistic scenario	(0.4%)	(0.6%)	(0.7%)
House price growth			
Base Scenario	(2.3%)	(1.8%)	(2.4%)
Best-case scenario	(2.3%)	(0.8%)	(2.7%)
Pessimistic scenario	(2.3%)	(9.7%)	(2.9%)

The weighting of the scenarios for 2021 and 2020 is as follows:

	2021	2020
Best-case scenario	10%	10%
Base Scenario	60%	70%
Pessimistic scenario	30%	20%

In addition, the Group analysed its loan portfolio taking into account the different types and segmentation of customers affected by the new economic situation (affected by ERTE, unemployment or equivalent circumstances), their characteristics (companies, individuals, self-employed, etc.) as well as the sector to which each borrower belongs (CNAE). Following this analysis, it was concluded that there are economic sectors particularly impacted by the COVID-19 crisis, such as air transport, hotels, restaurants and tourism, for which the Group has to be particularly prudent in determining credit risk coverage.

In 2020, the Group recognised a non-recurring provision of 90 million euros, which was recorded for accounting purposes under the heading “Impairment or reversal of the impairment of financial assets not measured at fair value through profit or loss and net gains or losses on modification - Financial assets at amortised cost”, 52 million of which has been recorded as a post model adjustment, in line with the multiple communications and recommendations of national and international regulators and supervisors regarding the treatment that credit entities must make to manage the credit risk of its financial assets faced with the high uncertainty existing at that moment of the pandemic, to cover the increase in credit risk of customers which are not in default at year-end 2021, but which, due to the persistent deterioration of the current macroeconomic situation, are expected to transition to Stage 2 in 2021, as the potential effect of the transitions between stages is not captured by the internal models.

Due to the extensions of the aforementioned governmental aid programmes and the recovery of economic activity, in 2021, there continued to be an absence of the default and stage transitions expected at 2020 year-end. This fact was evidenced in the analysis performed by the Entity regarding the operations of this type that have modified their Stage 1 accounting classification in December 2020 to Stage 2 in December 2021, observing that the impact on the impairment of these transactions amounted to approximately 6 million euros. This fact was ratified with the result of the recalibration of the models in 2021, especially in the company portfolio.

Therefore, at 2021 year-end, the Group maintained, due to prudence and faced with the validity and extension of the governmental support measures, an adjustment to the model of 52 million euros. The allocation of this subsequent adjustment to the stage and purpose model is explained on the basis of the progress of the transitions between stages of the moratorium and COVID-19 ICO operations observed in the Group during 2021 and in line with the loan portfolio change projections used in the Group’s Business Plan.

The breakdown by stage and by purpose of the subsequent adjustment to the model arranged by the Group for 31 December 2021 and 2020, due to the health crisis is presented below:

	Thousands of euros			
	31/12/2021			
	Stage 1	Stage 2	Stage 3	Total
Companies and self-employed	-	28,933	19,614	48,547
Mortgages to individuals	-	3,453	-	3,453
Other segments	-	-	-	-
Total	**-**	**32,386**	**19,614**	**52,000**

	Thousands of euros			
	31/12/2020			
	Stage 1	Stage 2	Stage 3	Total
Companies and self-employed	-	31,720	-	31,720
Mortgages to individuals	-	19,240	-	19,240
Other segments	-	1,040	-	1,040
Total	**-**	**52,000**	**-**	**52,000**

This post-model adjustment has a temporary nature, until the reasons for the post-model adjustment disappear or materialise,

The Group closely monitors the trend of both the sectors and the most relevant individual borrowers that could be affected by this crisis, in order to adapt its credit risk coverage to the different scenarios that may arise.

12. Derivatives - hedge accounting (assets and liabilities) and fair value changes of the hedged items in a portfolio with interest rate risk hedging

12.1 Derivatives - Hedge accounting

The breakdown, by product type, of the fair value of the financial derivatives designated as hedging instruments in fair value hedge and cash flow transactions at 31 December 2021 and 2020 is as follows:

	Thousands of euros			
	Fair value			
	Tax receivables		Tax payables	
	2021	2020	2021	2020
Interest rate swaps (IRSs)	71,866	142,020	275,690	216,202
	71,866	**142,020**	**275,690**	**216,202**

The carrying amount shown in the previous table represents the maximum level of exposure to credit risk with respect to the financial instruments included therein, except for the derivative assets contracted in which there are netting or compensation agreements, and that also have a collateral agreement consisting of the formalisation of deposits for an amount equivalent to the net fair value of the derivative transactions, so that in the event of default of the derivative operations by one of the parties, the other party is not required to satisfy the obligations associated with the deposit.

The main variations of the “Derivatives – hedge accounting” heading relate to the arrangement of the financial swaps to cover the risks of bonds indexed to inflation.

The Group has not offset the financial instruments that give rise to these guarantee deposits and has maintained the separate recognition of assets and liabilities without recording a net position, as the conditions described in Note 2.7 are not fulfilled. The breakdown of the carrying amount of the financial instruments associated with these agreements and asset and liability deposits that are generated with the counterparties (for both the hedging and trading derivatives that are detailed in Note 7.3), is as follows:

	Thousands of euros	
	Instruments subject to offset arrangements.	
	2021	2020
Derivative assets	250,311	25,283
Derivative liabilities	4,227	46,378

	Thousands of euros	
	Deposits subject to derivative offset arrangements	
	2021	2020
Deposits recognised under assets	4,150	70,217
Deposits recognised under liabilities	252,752	23,010

The purpose of all fair value hedges carried out by the Company is to hedge the risk of changes in the fair value of debt instruments, assets or liabilities issued at a fixed rate, due to changes in the reference interest rate. This risk is established in the increase of the fair value of the financial liabilities against reference interest rate decreases and decreases in the fair value of the financial assets in the event of their increases. To mitigate this risk, the Group arranges interest rate swaps, the value of which varies similarly and symmetrically to the changes in value of the hedged items.

The purpose of the cash flow hedges is to stabilise the impact on net interest income of interest associated with inflation-indexed public debt, eliminating the underlying risk of the benchmark index. To hedge this risk, interest rate swaps were arranged on the market that convert the issue’s inflation-indexed floating rate into a fixed rate.

In the event of ineffectiveness in fair value or cash flow hedges, the Bank mainly considers the following causes:

– Possible economic events affecting the Bank (e.g: default).

– Due to changes and possible differences with respect to the market in the collateralised and non-collateralised curves used in the valuation of derivatives and hedged items, respectively.

– Possible differences between the nominal value, settlement/repricing dates and credit risk of the hedged item and the hedging instrument.

Note 3 analyses the nature of the Group’s main risks covered by these financial instruments.

A breakdown of the maturities of the notional amounts of the hedging instruments used by the Group at 31 December 2021 and 2020 is shown below:

	Thousands of euros					
	2021					
	Up to 1 month	1 to 3 months	Between 3 months and 1 year	1 to 5 years	Over 5 years	Total
Fair value hedges	**21,000**	**950,000**	**705,128**	**1,372,650**	**365,000**	**3,413,778**
Interest rate swaps (IRSs)	**21,000**	**950,000**	**705,128**	**1,372,650**	**365,000**	**3,413,778**
Average interest rate	1.25%	-	-	-	0.03%	0.04%
Cash flow hedges	**-**	**-**	**-**	**300,000**	**503,500**	**803,500**
Interest rate swaps (IRSs)	-	-	-	300,000	503,500	803,500
Average interest rate	-	-	-	-	-	-

	Thousands of euros					
	2020					
	Up to 1 month	1 to 3 months	Between 3 months and 1 year	1 to 5 years	Over 5 years	Total
Fair value hedges	**-**	**227,948**	**6,000**	**3,058,900**	**1,485,000**	**4,777,848**
Interest rate swaps (IRSs)	-	227,948	6,000	3,058,900	1,485,000	4,777,848
Average interest rate	-	0.08%	4.00%	0.85%	1.52%	0.49%
Cash flow hedges	**-**	**-**	**200,000**	**-**	**423,500**	**623,500**
Interest rate swaps (IRSs)	-	-	200,000	-	423,500	623,500
Average interest rate	-	-	-	-	-	-

A breakdown of the hedging instruments used by the Group at 31 December 2021 and 2020 is shown below:

	Thousands of euros			
	2021			
	Notional	Assets	Liabilities	Change in the FV used to calculate hedging ineffectiveness
Fair value hedges	**3,413,778**	**67,361**	**(7,296)**	**(34,427)**
Interest rate swaps (IRSs)	3,413,778	67,361	(7,296)	(34,427)
Cash flow hedges	**803,500**	**4,504**	**(268,395)**	**(24,973)**

The following table shows the impact on the consolidated income statement and consolidated statement of other comprehensive income of the hedging relationships designated by the Group at 31 December 2021 and 2020:

	Thousands of euros			
	2021			
	Change in value of hedging instrument recognised in other comprehensive income	Ineffectiveness recognised in profit or loss	Amount reclassified from equity to profit or loss	
			Hedging interruption	*Recognition in profit or loss of the hedged transaction*
Fair value hedges	**-**	**(194)**	**-**	**-**
Transactions with clients	-	72	-	-
Loans	-	(76)	-	-
Fixed Income	-	(190)	-	-
Deposits taken (Money Market)	-	-	-	-
Equities	-	-	-	-
Cash flow hedges	**(29,572)**	**-**	**-**	**(25,465)**
Fixed Income	(29,572)	-	-	(25,465)

	Thousands of euros			
	2020			
	Change in value of hedging instrument recognised in other comprehensive income	Ineffectiveness recognised in profit or loss	Amount reclassified from equity to profit or loss	
			Hedging interruption	*Recognition in profit or loss of the hedged transaction*
Fair value hedges	**-**	**(364)**	**-**	**-**
Transactions with clients	-	205	-	-
Loans	-	(20)	-	-
Fixed Income	-	(212)	-	-
Deposits taken (Money Market)	-	162	-	-
Equities	-	(499)	-	-
Cash flow hedges	**27**	**-**	**-**	**11,802**
Fixed Income	27	-	-	11,802

At 31 December 2021 and 2020, there were no accounting hedges that failed the effectiveness test.

12.2 Fair value changes of the hedged items in a portfolio with interest rate risk hedging

As explained in Note 2.4, these gains or losses arising from changes in the fair value of the interest rate risk of the financial instruments effectively hedged in fair value macro-hedging transactions are charged or credited under these headings of the consolidated balance.

The breakdown of adjustments to financial assets and liabilities via macro-hedges at 31 December 2021 and 2020 is as follows:

	Thousands of euros			
	Fair value			
	Tax receivables		Tax payables	
	2021	2020	2021	2020
Mortgage loans	-	-	-	-
Financial liabilities	-	-	17,758	37,593
	-	**-**	**17,758**	**37,593**

With respect to the assets affecting the micro-hedges, Banco Grupo Cajatres, S.A.U. signed an option contract on interest rates in 2012, for which it would pay the positive difference between the floor rate and Euribor rate at 12 months (or zero if this difference is negative) on the current notional in each period in 2013-2026. The starting and maximum notional value of the option amounted to 2.672 billion euros, covering the cost of the floor value included in the mortgage loans in the portfolio on interest rate variations. In 2015 the Group decided to interrupt the micro-hedge. The change to the amortised cost of the hedged assets on the hedge interruption date, for an amount of 140.9 million euros, is accrued over the initially designated hedging period. At 31 December 2021, the adjustment pending accrual amounts to 22.3 million euros (31.2 million euros at 31 December 2020) and has been recorded since the interruption of the hedge under the heading “Financial assets at amortised cost - Customers” on the asset side of the balance sheet (Note 11.4). The cancellation of the derivative with the counterparty was made on the same day.

The nominal amount of financial liabilities corresponding to own issues, covered bonds, deposits and transactions with customers, covered by interest rate swaps (IRSs), amounted to 375,897 thousand euros at 31 December 2021 (450,897 thousand euros at 31 December 2020).

At 31 December 2021 and 2020, there were no accounting hedges that failed the effectiveness test.

13. Investments in joint ventures and associates

13.1 Investments in associates

This heading of investments in associates in the consolidated balance sheets as at 31 December 2021 and 2020 is broken down as follows:

	Thousands of euros	
	2021	2020
Equity instruments	75,976	76,820
(Impairment losses)	(128)	-
Total net amount	**75,848**	**76,820**

The balance of "Investments in subsidiaries, joint ventures and associates – Associates" of the consolidated balance sheets as at 31 December 2021 and 2020 included goodwill associated with these investments. The breakdown of this goodwill, based on the entity in which they originated, is shown below:

	Thousands of euros	
Company	**2021**	**2020**
Henneo	11,149	11,149
Total net amount	**11,149**	**11,149**

The movement of the impairment losses of the associated entities in 2021 and 2020 is as follows:

	Thousands of euros	
	2021	2020
Opening balance	**-**	**129**
Net transfers	**128**	**-**
Transfer charged to profit for the year	128	-
Recovered amount credited to profit for the year	-	-
Recovered amount credited to profit for the previous years	**-**	**-**
Amounts used	**-**	**(129)**
Other movements	**-**	**-**
Closing balance	**128**	**-**

13.2 Investments in joint ventures

Appendices I and II show a breakdown of the investments in joint ventures held by the Group at 31 December 2021 and 2020, with related details.

There are no impairment losses or goodwill associated with these investments.

14. Assets under insurance or reinsurance contracts

As at 31 December 2021 and 2020, the entirety of the budget under this heading of consolidated balances corresponds to the profit-sharing of the reinsured policies.

The reconciliation between the opening and closing balances under this heading in 2021 and 2020 is as follows:

	Thousands of euros
Balances as at 31 December 2019	**539**
Net transfers	(110)
Balances as at 31 December 2020	**429**
Net transfers	(39)
Balances as at 31 December 2021	**390**

15. Tangible assets

Movements in this consolidated balance sheet heading in 2021 and 2020 are as follows:

	Thousands of euros			
	For own use	Investment property	Assigned under operating lease	Total
Cost				
Balances at 1 January 2020	**1,349,339**	**410,979**	**87,716**	**1,848,034**
Additions	44,679	14,257	39,364	98,300
Disposals due to sales or through other means	(56,013)	(39,314)	(33,973)	(129,300)
Other transfers and other movements	(6,894)	1,466	(3,554)	(8,982)
Balances as at 31 December 2020	**1,331,111**	**387,388**	**89,553**	**1,808,052**
Additions	72,764	8,844	46,039	127,647
Disposals due to sales or through other means	(54,508)	(26,346)	(34,717)	(115,571)
Other transfers and other movements	13,953	9,045	6,610	29,608
Balances as at 31 December 2021	**1,363,320**	**378,931**	**107,485**	**1,849,736**
Accumulated depreciation				
Balances at 1 January 2020	**(704,075)**	**(97,093)**	**(13,735)**	**(814,903)**
Disposals due to sales or through other means	49,862	12,312	8,651	70,825
Allowances recognised in profit or loss	(39,069)	(6,658)	(9,124)	(54,851)
Other transfers and other movements	716	(856)	280	140
Balances as at 31 December 2020	**(692,566)**	**(92,295)**	**(13,928)**	(798,789)
Disposals due to sales or through other means	51,605	3,640	7,286	62,531
Allowances recognised in profit or loss	(40,485)	(6,420)	(9,386)	(56,291)
Other transfers and other movements	(10,397)	3,426	-	(6,971)

Balances as at 31 December 2020	**638,443**	**246,899**	**75,625**	**960,967**
Balances as at 31 December 2021	**656,681**	**255,953**	**91,457**	**1,004,091**

as at 31 December 2021, fully-amortised assets still in use amounted to 495,380 million euros (441,570 million at 31 December 2020).

In 2013, Ibercaja Banco, S.A. and Banco Grupo Cajatres, S.A.U. availed themselves of the possibility offered by Article 9 of Law 16/2012 to update the tax value of property, plant and equipment, and certain buildings for own use and property investments were accordingly updated.

The amount of the tax update in Ibercaja Banco, S.A. amounted to 17,888 thousand euros, generating a share of 5% to be paid for this update, for an amount of 894 thousand euros. Given the revaluation of assets as a consequence of a tax law not permitted in the IFRS-EU, the carrying amount of the assets did not incur any variation in consolidated terms.

At Banco Grupo Cajatres, S.A.U., the amount of the tax update amounted to 36,094 thousand euros, generating a share of 5% to be paid for this update, for an amount of 1,805 thousand euros. However, given that the fiscally revaluated assets had already been revaluated for accounting purposes in 2010 when the Institutional Protection Scheme founded the Company, there was no increase in their carrying amount since the new tax value did not surpass the carrying amount before the update in any case.

In the Ibercaja Banco, S.A. individual financial statements of 2016, the information required by section 12 of article 9 of Law 16/2012 is set forth on the updated elements that were found in the Company equity.

15.1 Property, plant and equipment for own use

The breakdown, according to its nature, of the parties that include the balance under this heading of the consolidated balance as at 31 December 2021 and 2020 is the following:

	Thousands of euros			
	Cost	**Accumulated depreciation**	**Impairment losses**	**Net balance**
Computer equipment and installations	238,430	(196,531)	-	41,899
Furniture, vehicles and other installations	388,009	(335,069)	-	52,940
Buildings	607,998	(129,673)	(102)	478,223
Construction in progress	8,230	-	-	8,230
Use rights under lease	88,444	(31,293)	-	57,151
of which: Branch offices	*61,878*	*(25,908)*	-	*35,970*
of which: Sale & lease-back	*26,096*	*(5,241)*	-	*20,855*
of which: Other	*470*	*(144)*	-	*326*
Balances as at 31 December 2020	**1,331,111**	**(692,566)**	**(102)**	**638,443**
Computer equipment and installations	216,220	(165,913)	-	50,307
Furniture, vehicles and other installations	369,204	(313,859)	-	55,345
Buildings	642,914	(165,325)	(14,796)	462,793
Construction in progress	4,689	-	-	4,689
Use rights under lease	130,293	(46,746)	-	83,547
of which: Branch offices	*99,425*	*(37,266)*	-	*62,159*
of which: Sale & lease-back	*26,612*	*(8,016)*	-	*18,596*
of which: Other	*4,256*	*(1,464)*	-	*2,792*
Balances as at 31 December 2021	**1,363,320**	**(691,843)**	**(14,796)**	**656,681**

No third party termination benefits were received in 2021 for asset impairment, and there were no pending termination benefits to be received as at 31 December 2020.

There are no significant material asset acquisition commitments for its own use or restrictions on its ownership as at 31 December 2021 and 2020.

15.2 Investment property

The rental income coming from the Group's investment properties amounted to 3,905 thousand euros in 2021 (4,141 thousand euros in 2020) (Note 36), other related expenses amounted to 1,079 thousand euros (1,591 thousand euros in 2020) (Note 37) and operating expenses were incurred due to depreciation and amortisation in an amount of 6,420 thousand euros (6,658 thousand euros in 2020) (Note 15).

88% of the net carrying amount of the investment properties (84% in 2020) is based on appraisals made by experts with recognised professional capacity and recent experience in the location and category of the investment properties subject to assessment. The valuations of these elements of real estate have been carried out by appraisers approved by the Group: TINSA, Sociedad de Tasación, Tasvalor, UVE Valoraciones, Gesvalt, Gevasa, Instituto de Valoraciones and Eurovaloraciones.

Note 18 sets out the criteria applied to determine the fair value of these assets.

The following table displays a classification by type of asset of the investment properties. The carrying amount (excluding impairment losses) of these assets, which was valued by an independent surveyor, is as follows:

	Thousands of euros			
	carrying amount (without impairment losses)		Of which: appraised by an independent appraiser	
	2021	2020	2021	2020
Investment property	**287,465**	**295,093**	**254,985**	**270,098**
Residential	110,741	83,884	107,992	82,739
Commercial and industrial	175,043	206,325	145,312	182,475
Agricultural	1,681	4,884	1,681	4,884

The fair value calculated by independent appraisals for the assets amounts to 261,565 thousand euros at 31 December 2021 (288,222 thousand euros at 31 December 2020).

Appraisals of rental assets have a level 2 in the fair value hierarchy (Note 18).

There are no significant commitments for the acquisition or maintenance of investment properties, nor restrictions on their ownership as at 31 December 2021 and 2020.

15.3 Property, plant and equipment assigned under operating lease

The Group includes the assets associated with renting contracts under this heading, which amount to 91,457 thousand euros as at 31 December 2021 (75,625 thousand euros as at 31 December 2020). In 2021, the rental income coming from these assets amounted to 16,475 thousand euros (15,350 thousand euros in 2020) (Note 36) and operating expenses due to depreciation amounted to 9,386 thousand euros (9,124 thousand euros in 2020) (Note 15).

15.4 Impairment losses

In 2021, 1,765 thousand euros of impairment losses on property, plant and equipment for own use and 2,649 thousand euros of impairment losses on investment property were recognised (impairment losses of 386 thousand euros and 1,085 thousand euros in 2020, respectively) (Note 40).

16. Intangible assets

16.1 Goodwill

The breakdown of the parties that include the balance of this heading of the consolidated balance as at 31 December 2021 and 2020 is the following:

	Thousands of euros	
Company	**2021**	**2020**
Banco Grupo Cajatrés, S.A.U.	128,065	128,065
Caja Badajoz Vida y Pensiones, S.A. de Seguros	16,869	16,869
	144,934	**144,934**

On 23 May 2013, the market was notified that Ibercaja Banco, S.A.U., Banco Grupo Cajatres, S.A. and its respective shareholder savings banks had agreed the inclusion of the banks through a share exchange process and subsequent merger by absorption of Banco Grupo Cajatres, S.A. into Ibercaja Banco, S.A.U.

On 25 July 2013, after satisfaction of the conditions precedent and the required administrative exemptions and authorisations having been secured, Ibercaja Banco became the owner of 100% of the share capital of Banco Grupo Cajatres, S.A. To this end, Ibercaja Banco carried out a 325.5 million euro capital increase subscribed for by the shareholders of Banco Grupo Cajatres, S.A. in exchange for all that bank's share capital. The new shareholders thereby obtained a joint holding of 12.20% in the share capital of Ibercaja Banco.

As a result of the difference between the consideration for the business acquired and the total at the acquisition date of the fair value of the assets and liabilities and the amount of the non-controlling interests, goodwill in the amount of 128,065 thousand euros was recognised in the consolidated financial statements. This goodwill takes into consideration, among other factors, the future results, the expected synergies of the combination of the acquirer and the acquiree and other intangible assets that do not qualify for separate recognition.

The goodwill associated with the company Caja Badajoz Vida y Pensiones, S.A. de Seguros was established as a consequence of the acquisition of 50% of this entity on 3 September 2014 that was not owned by the Group at the close of 2013.

This acquisition took place as part of the reorganisation of the Group's insurance business as a result of the takeover of Banco Grupo Cajatres, S.A.U. in 2013. In 2015 Caja Badajoz Vida y Pensiones, S.A. de Seguros (absorbed company) was merged by absorption into Ibercaja Vida, Compañía de Seguros y Reaseguros, S.A.U. (Absorbing Company).

For the purposes of distributing the goodwill of that referred to in Note 2.16.1, in accordance with IAS 36 Impairment of Assets, the Group considered that there was only one cash-generating unit coinciding with the entirety of its balance, since the goodwill is controlled at the highest level for the purposes of internal management and there are no differentiated operational segments, in accordance with that indicated in Note 27.8. Ibercaja Banco has therefore been considered to be the cash-generating unit to which the goodwill is allocated.

The Group determines the recoverability of goodwill at the end of each reporting period in accordance with paragraph 96 of that IAS by comparing the recoverable amount of the CGU (higher of fair value or value in use) containing the goodwill is compared with that unit's carrying value.

The Group calculated the value in use by the cash-generating unit which constitutes Ibercaja Banco at the close of the year based on the valuation made by an independent expert (Deloitte Financial Advisory, S.L.U.) It was concluded that there was no need to record any impairment of the same.

In accordance with IAS 36, value in use has been calculated using discounted cash flows. The projected flows are the potentially distributable dividends based on the expected profit in an explicit 5-year projected scenario, net of compliance with the minimum solvency requirements defined by the supervisor. These flows have been discounted using market rates adjusted to the estimated cost of capital in accordance with the capital asset pricing model (CAPM) (Note 2.16).

The main criteria used to calculate value in use are as follows:

- Cash flows estimated from the Company's business plan
  - The net interest margin recovered as a result of a slight steepening of the yield curve.
  - Increase in asset management fees (unit trusts and pension plans) due to the rise in balances, which is explained by the strategy of transferring customers' savings from demand accounts.
  - Increase in bank fees, mainly those related to means of payment.
  - Reduction of the personnel and general expenses, as a consequence of the different rationalisation plans set in place by the Bank.
  - Normalisation of the allowance for asset impairments from 2023 after leaving behind the impact of COVID-19.

It should be noted that the projections for previous years have been reasonably met with the results obtained in those years. However, on occasions, the downward deviations from the projections for previous years arose mainly from differences between the actual rates and the rate curve used or from some extraordinary event that could not have been known at the time the projection was made (e.g. the sale of a loan portfolio or foreclosure, since they are made when there is a perceived appetite in the market and the market is not always able to anticipate it). With the exception of these cases, the Entity's projections do not usually show other significant downward deviations. However, in some cases, these downward deviations have been offset by upward deviations in other income statement headings, either due to improved income statement performance or to the use of levers to offset negative impacts. Nevertheless, the preparation of the projections has taken into account the strategic line set by the Entity, so that it follows a continuous and clearly defined path.

Additionally, the economic consequences of COVID-19, together with the measures adopted by the government to contain its spread, add further uncertainty to the projections of distributable flows, due to doubts about future changes in the main macroeconomic variables, and the Group has therefore been extremely prudent in its estimates.

Based on the foregoing, the impact of the COVID-19 contingency was absorbed in 2020. This negative impact was the result of the expected losses due to the impairment of loan portfolios until 2022, until reaching the highest increase in bad debts and due to the expected development of the pandemic and its macroeconomic effects, which the Group expects to leave behind in 2023.

In any event, the Group expects these provisions to revert, depending on how the situation evolves, to pre-pandemic levels, which has justified the accounting and prudential relaxation measures approved by the supervisors, as the true and fair view of a large part of the banking assets in the long term is not being called into question.

These effects should be contrasted with an interest margin generation capacity similar to that projected in the previous business plan, a context of low interest rates and the new conditions of the European Central Bank's TLTRO III programme, which, together with the increase in concessions guaranteed by the ICO, offset the lower accrual of interest income from doubtful investments.

- Discount rate

  The discount rate has been calculated on the basis of the capital asset pricing model (CAPM). In this formula, the following has been taken into consideration: a risk-free rate of 3.24% (3.1% in 2020), which, given the current sovereign debt rate environment, has been estimated from the normalisation of the Spanish 10-year bond; a beta adjusted by the Blume methodology of comparable listed companies taking the average monthly data of the last 5 years of 1.27 (1.16 in 2020), and a market risk premium of 4.9% (5.4% in 2020). Taking these factors into consideration, the discount rate calculated on the basis of profit after tax is 9.5% (9.8% in 2020), while the discount rate calculated on the basis of profit before tax is 13% (14% in 2020).

- Rate of growth in perpetuity of the cash flow starting in 2025.

  The rate has been set at 1.8% (1.7% in 2020), a level similar to Spain's long-term growth estimates.

A sensitivity analysis of the valuation to reasonably possible changes in the key valuation variables (perpetual growth rate of cash flows, discount rate, credit cost adjustments due to the effect of changes in government measures to combat COVID-19 and the time window of the cash flow projection) has been performed, noting that in no case would the calculated value in use be lower than the carrying amount of the cash-generating unit, which would imply impairment of the goodwill. The discount rate should vary at 418 bp (119 bp in 2020) so that, after incorporating the effects at the recoverable amount that are a consequence of this change to other variables, the value in use of the cash generating unit is equal to its value carrying amount.

16.2 Other intangible assets

The detail of this heading is as follows:

	Thousands of euros			
	Cost	Accumulated depreciation	Impairment losses	Net balance
Computer software	195,140	(109,978)	(673)	84,489
Trademark	7,500	(7,500)	-	-
Customer relationships (Core deposits) of Banco Grupo Cajatrés, S.A.U.	45,031	(37,228)	-	7,803
Other	-	-	-	-
Balances as at 31 December 2020	**247,671**	**(154,706)**	**(673)**	**92,292**
Computer software	237,763	(117,539)	(673)	119,551
Trade mark	7,500	(7,500)	-	-
Customer relationships (Core deposits) of Banco Grupo Cajatrés, S.A.U.	45,031	(40,349)	-	4,682
Other	-	-	-	-
Balances as at 31 December 2021	**290,294**	**(165,388)**	**(673)**	**124,233**

The "Trademark" includes the estimated value of the brands of the now extinct savings banks that gave rise to Banco Grupo Cajatrés, S.A. (CAI, Caja Círculo and Caja Badajoz).

The cost of the asset "Customer relationships with Banco Grupo Cajatrés, S.A.U." includes the net present value that, at the time of the acquisition of this entity, implies the saving of costs that the demand deposits and term of the this entity represent with respect to other alternative financing sources.

Movements in this consolidated balance sheet heading throughout 2021 and 2020 are as follows:

	Thousands of euros				
	Computer software	Trade mark	Customer relationships of Banco Grupo Cajatres	Other	Total
Cost					
Balances at 1 January 2020	**162,637**	**7,500**	**45,031**	**-**	**215,168**

Balances as at 31 December 2020	**84,489**	**-**	**7,803**	**-**	**92,292**
Balances as at 31 December 2021	**119,551**	**-**	**4,682**	**-**	**124,233**

At 31 December 2021, fully-amortised intangible assets still in use amounted to 113,642 thousand euros (113,642 thousand euros at 31 December 2020).

17. Other assets

This heading in the consolidated balance sheets at 31 December 2021 and 2020 breaks down as follows:

	Thousands of euros	
	2021	**2020**
Accruals and deferred income	49,341	35,938
Inventories	197,903	221,025
Transactions in transit	2,292	2,052
Other	7,011	9,434
Total gross amount	**256,547**	**268,449**
(Impairment losses)	(108,250)	(112,923)
Total net amount	**148,297**	**155,526**

Impairment analysed in the above table relates entirely to Inventories.

Movements in Inventories during 2021 and 2020 are as follows:

	Thousands of euros		
	Foreclosed assets	**Other assets**	**Total**
Cost			
Balances at 1 January 2020	**152,006**	**88,892**	**240,898**
Additions	562	-	562
Disposals due to sales or through other means	(17,367)	(3,068)	(20,435)
Other transfers and other movements	-	-	-
Balances as at 31 December 2020	**135,201**	**85,824**	**221,025**
Additions	143	219	362
Disposals due to sales or through other means	(18,573)	(5,324)	(23,897)
Other transfers and other movements	0	413	413
Balances as at 31 December 2021	**116,771**	**81,132**	**197,903**
Impairment losses			
Balances at 1 January 2020	**(86,713)**	**(18,901)**	**(105,614)**
Transfer charged to profit for the year (Note 40)	-	(840)	(840)
Recovered amount credited to profits (Note 40)	752	-	752
Applications and other movements	(6,870)	(351)	(7,221)
Balances as at 31 December 2020	**(92,831)**	**(20,092)**	**(112,923)**
Transfer charged to profit for the year (Note 40)	(6,964)	(549)	(7,513)
Recovered amount credited to profits (Note 40)	-	-	-
Applications and other movements	12,039	147	12,186
Balances as at 31 December 2021	**(87,756)**	**(20,494)**	**(108,250)**
Net inventories			
Balances as at 31 December 2020	**42,370**	**65,732**	**108,102**
Balances as at 31 December 2021	**29,015**	**60,638**	**89,653**

In inventories, all foreclosed assets consist of real estate.

The valuations of the above assets have been restated principally in the last year. The valuations have at all times been carried out by experts with recognised professional capacity and recent experience in the location and category of the assets valued. The valuations of these elements of real estate have been carried out by appraisers approved by the Group: TINSA, Sociedad de Tasación, Tasvalor, UVE Valoraciones, Gesvalt, Gevasa, Instituto de Valoraciones and Eurovaloraciones.

Note 18 sets out the criteria applied to determine the fair value of these assets.
The breakdown of the inventory-related expenses for 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Costs to sell inventories sold during the year	6,961	12,745
Impairment losses on inventories (Note 40)	7,513	88
Impairment write-downs	7,513	840
Reversals of impairment write-downs	-	(752)
Total net amount	**14,474**	**12,833**

18. Non-current assets and disposal groups classified as held for sale

At 31 December 2021 and 2020, this consolidated balance sheet item breaks down as follows:

	Thousands of euros	
	2021	**2020**
Foreclosed assets	271,339	**314,769**
Residential	230,889	273,984
Industrial	28,997	29,751
Agricultural	11,453	11,034
Other assets	38,898	**64,806**
Residential	30,728	39,983
Industrial	1,821	21,692
Agricultural	6,349	3,131
Total gross amount	**310,237**	**379,575**
(Impairment losses)	(98,809)	(117,202)
Total net amount	**211,428**	**262,373**

Movements in this consolidated balance sheet heading in 2021 and 2020 are as follows:

	Thousands of euros		
	Foreclosed assets	Other assets	Total
Cost			
Balances at 1 January 2020	**310,949**	**63,798**	**374,747**

The Group has a Realisation Plan for non-current assets held for sale, which includes the Sales financing policy. The Plan entails the collaboration of the estate agent network, the disclosure of specific information on the Company's web page and the existence of a unit dedicated to the disposal of assets foreclosed as payment for debts.

According to the Group's historical experience, non-current assets held for sale remain on the balance sheet for an average of between one and three years. Since the majority relate to real estate assets, the Group considers it possible that part of these assets may remain on the balance sheet for longer than the Group's historical experience would indicate in view of the market situation.

Non-current assets are realised in cash, with a deferral for a prudent time period to preserve the Group's interests through adequate legal formulae or financing secured by mortgage under the usual conditions for this type of transactions.

There are no gains pending recognition since sales fulfil the following conditions:

- the purchaser is not controlled by the seller,
- the Group retains none of the significant risks or rewards associated with ownership of the asset sold,
- the Group does not retain any involvement in the asset's current management associated with ownership and does not retain effective control,
- the percentage of the sale financed by the entity for the purchase does not exceed that which the latter would obtain from a non-related credit institution,
- the purchaser's present and future payment capacity is sufficient to repay the loan, and
- the financing plan and conditions are similar to those granted by the Group to finance acquisitions of similar assets not owned by it.

In 2021, the Group financed 19.70% of sales (15.39% in 2020).

Loans granted during the year to finance sales of this type of assets amount to 14,097 thousand euros (7,676 thousand euros at 31 December 2020) and the accumulated amount of loans granted is 581,210 thousand euros (567,113 thousand euros at 31 December 2020).

The following table sets out a classification by type of asset of non-current assets for sale. In addition, the balance appraised by an independent appraiser is indicated.

	Thousands of euros			
	carrying amount (without impairment losses)		Of which: appraised by an independent appraiser	
	2021	2020	2021	2020
Non-current assets held for sale	**310,237**	**379,575**	**301,255**	**354,173**
Residential	261,617	313,967	255,566	297,666
Industrial	30,818	51,443	28,748	43,203
Agricultural	17,802	14,165	16,941	13,304

The fair value calculated by independent appraisals for the assets amounts to 365,117 thousand euros at 31 December 2021 (400,420 thousand euros at 31 December 2020).

The Group has a corporate policy that ensures the professional competence, independence and objectivity of external appraisal companies, in accordance with the provisions of the regulations, which require appraisal companies to meet the requirements of neutrality and credibility so that the use of their estimates does not undermine the reliability of their appraisals. This policy establishes that all the appraisal companies with which the Group works must be registered with the Official Register of the Bank of Spain and their appraisals must be carried out in accordance with the methodology established in Order ECO/805/2003 of 27 March.

The appraisal techniques are used generally by all appraisal companies depending on the type of real estate asset. By regulatory requirement, these companies generally employ observable market data and other factors that market participants would consider in setting the price, limiting as much as possible the use of subjective considerations and unobservable or unverifiable data.

In order to determine the appraisal value, the necessary verifications are carried out to ascertain the characteristics and real situation of the object of the appraisal, which, in accordance with the provisions of the aforementioned Order, are as follows:

- The physical identification of the property, by means of its location and ocular inspection by a competent technician, verifying whether its surface area and other characteristics match the description in the documentation used to carry out the valuation, as well as the existence of visible easements and its apparent state of construction or conservation.

- The state of occupation of the property and the use or exploitation for which it is intended.

- In the case of housing, the public protection regime.

- The architectural heritage protection regime.

- The suitability of the property for the urban planning in force, and, if applicable, the existence of the right to the urban development that is being valued.

Different valuation methods have been used to calculate the market value of the assets acquired depending on the type of asset involved. Generally speaking, the residual method has been used to value land and the construction work underway, the discounted cash flow method for assets for rent and the comparison method for finished buildings and elements thereof. The main features of these methods are as follows:

- Residual method: The final market value is determined on the basis of the projected selling prices of the units to be built. This amount is reduced by development, construction and financial costs and the developer’s industrial margin, to arrive at the price of the land. In those cases where the management and development period is higher than the normal average for a development, a project timeline is estimated and forecast cash flows are discounted at an appropriate market rate (dynamic residual method).

The following steps are used to calculate the residual value using the dynamic calculation procedure: the cash flows are estimated, the discount rate is chosen and the calculation formula is applied. The following shall be taken as cash flows: the collections and, where applicable, the credit deliveries expected to be obtained from the sale of the property to be developed; and the payments expected to be made for the various costs and expenses during construction or refurbishment, including payments for the credits granted. These charges and payments will be applied on the dates foreseen for the marketing and construction of the property.

The following requirements must be met for the use of the residual method:

- The existence of adequate information to determine the most likely property development to be carried out under the applicable planning regime or, in the case of land with completed buildings, to check whether it complies with the planning regime.

- The existence of sufficient information on construction costs, necessary development costs, financial costs, if any, and marketing costs to enable an estimate to be made of the normal costs and expenses for an average developer and for a development of similar characteristics to the one to be developed.

- The existence of market information allowing for the calculation of the most likely selling prices of the elements included in the development or in the building at the dates foreseen for their commercialisation.

- The existence of sufficient information on the performance of similar developments.

In order to be able to apply the residual method using the dynamic calculation procedure, it will also be necessary to have information on the construction or renovation periods, the marketing of the property and, where appropriate, the urban development management and the execution of the development.

• Discounted cash flow method: In order to determine the value of property rentals, the present value is calculated according to the market rent and/or present rent, taking into account the return required on each type of asset.

The calculation of the present value requires the valuer to estimate the cash flows, estimate the reversion value, choose the discount rate and apply the calculation formula.

For the use of the updating method, at least one of the following requirements must be met:

- There must be a rental market that is representative of comparable properties. In order to presume such an existence, there will be a need to have at least six pieces of rental income data on comparable properties that adequately reflect the current situation of this market and to have sufficient data on rental transactions or offers to identify suitable parameters to perform the homogenisation of rents on comparable properties.

- The existence of a lease on the property under valuation.

- The valued real estate is producing or is likely to produce income as real estate linked to an economic activity and there is also sufficient accounting data from the operation or adequate information on average structural ratios of the relevant branch of activity.

• Comparison method: This takes as a starting point the principle of replacement under which the property to be valued is compared with other properties, the value of which is known. The methodology is based on the obtainment of comparable homogeneous products, taking into account purchase-sales operations in the area, the supply of similar properties and the opinions of other real estate market operators. In order to arrive at a definitive value, the value obtained is adapted to the specific characteristics of the property, according to its physical and structural condition, the design and lay-out of its surface area, location and other factors (planning status, immediate environment etc.).

The following general rules are used to calculate the value by comparison:

- The qualities and characteristics of the appraised property that influence its value are established. In the case of buildings of an historic or artistic nature, in order to establish these qualities and characteristics, the particular value of the elements of the building that give it that nature is also considered.

- The real estate market segment of comparable properties is analysed and, on the basis of concrete information on actual transactions and firm offers, corrected where necessary, current cash purchase prices for these properties are obtained.

- A representative sample of the prices obtained after the previous analysis is selected from among the prices corresponding to the comparable properties, to which the necessary homogenisation procedure is applied. In the selection process, those prices that are abnormal must first be compared in order to identify and eliminate both those from transactions and offers that do not meet the conditions required in the definition of the market value of the goods concerned and, in the case of a valuation for the purpose foreseen in the aforementioned Order, those that may include speculative elements.

- The comparable properties are homogenised using the criteria, coefficients and/or weightings that are appropriate for the property in question.

- The value of the property, net of marketing costs, is assigned on the basis of the homogenised prices, after deduction of the easements and limitations of ownership that apply to it and that have not been taken into account in the application of the preceding rules.

In order to use the comparison method, the following requirements must be met:

- There must be a representative market for comparable properties.

- Sufficient data on transactions or bids to be able, in the area concerned, to identify appropriate parameters to perform the homogenisation of comparable properties.

- Sufficient information on at least six transactions or offers of comparable properties that adequately reflect the current state of that market.

Hence, real estate assets awarded have a level 3 in the fair value hierarchy,

19. Financial liabilities at amortised cost

The items making up this consolidated balance sheet caption at 31 December 2021 and 2020 are as follows:

	Thousands of euros	
	2021	**2020**
Deposits	**44,884,582**	**44,460,275**
Central banks (Note 19.1)	5,871,128	5,371,202
Credit institutions (Note 19.2)	745,174	1,207,820
Customers (Note 19.3)	38,268,280	37,881,253
Debt securities issued (Note 19.4)	**1,316,321**	**1,340,670**
Other financial liabilities (Note 19.5)	**1,084,210**	**826,435**
	47,285,113	**46,627,380**

19.1 Deposits - Central Banks

The breakdown, by transaction type, of the balances of this item in the accompanying consolidated balance sheets at 31 December 2021 and 2020 is shown below:

	Thousands of euros	
	2021	**2020**
European Central Bank	5,959,000	5,400,000
Valuation adjustments	(87,872)	(28,798)
	5,871,128	**5,371,202**

On 30 April 2020, the Governing Council of the European Central Bank made a number of amendments to the terms and conditions of these financing operations in order to further support the provision of credit to households and businesses to mitigate the economic effects of the health crisis. With the maturity of the TLTRO II programme (1,650,000 thousand euros), the Group participated in the fourth auction of the TLTRO III programme for an amount of 5,400,000 thousand euros maturing in 2023, which has been recorded under “Financial liabilities at amortised cost - Deposits at central banks” in the consolidated balance sheet. In addition, on 24 June 2021, the Group participated in the seventh auction of the TLTRO III programme for an amount of 559,000 thousand euros.

For institutions that meet a certain volume of eligible loans between 1 March 2020 and 31 March 2021, the ECB discounted the interest rate by 0.5% with respect to the average rate of the deposit facilities, reaching a total of -1% for the period from June 2020 to June 2021. Furthermore, these conditions were extended on 10 December 2020, establishing, in addition to the above, that, if a certain volume of eligible loans is met between 1 October 2020 and 31 December 2021, the -1% interest rate may be applied for the period between June 2021 and June 2022.

Institutions shall have the option to repay the financing early one year after the settlement of each transaction, on a quarterly basis.

In accordance with point B5.4.4 of IFRS 9 on the application of the effective interest rate method to financial assets and liabilities at amortised cost, the Group has opted to accrue interest in accordance with the specific periods of adjustment to market rates, so that interest for the period from June 2020 to June 2022 (i.e. -1%) will be recognised in “Interest income and similar – Liability interest in the consolidated interim income statement, assuming that the threshold of eligible loans giving rise to the extra-rate is met. This approach is subject to the assumption that the probability of meeting the funding target set by the ECB, i.e., that there will be growth in the eligible portfolio of more than 0%, is highly probable. For this purpose, the Group has relied on the growth and development estimates used in the Business Plan and on the performance of the portfolio’s actual origination after several months of monitoring.

The amount of this positive remuneration amounts to 68,352 thousand euros and 37,815 thousand euros at 31 December 2021 and 2020, respectively (Note 28).

In addition, the Group monthly monitors the origination performed to ensure compliance with the assumptions. To date, there is a comfortable margin over the limits established by the ECB, which endorses the Bank’s assumptions for the recognition of the accrual of interest generated by these liquidity auctions.

The average effective interest rate on debt instruments classified in this caption during 2021 was -1.01% (-0.93% at 31 December 2020).

19.2 Deposits - Credit institutions

The breakdown, by transaction type, of the balances of this item in the accompanying consolidated balance sheets at 31 December 2021 and 2020 is shown below:

	Thousands of euros	
	2021	**2020**
On demand	**21,365**	**9,975**
Other accounts	21,365	9,975
Time or at notice	**723,969**	**1,198,312**
Fixed-term deposits	113,807	526,295
Assets sold under repurchase agreements	600,972	632,633
Other accounts	9,190	39,384
Valuation adjustments	**(160)**	**(467)**
	745,174	**1,207,820**

The average effective interest rate on debt instruments classified in this caption during 2021 was 0.19% (0% during 2020).

19.3 Deposits - Customer

The breakdown of the balance under this heading in the consolidated balance sheets at 31 December 2021 and 2020, based on the geographical location, nature and counterparties of the transaction concerned, is indicated below:

	Thousands of euros	
	2021	**2020**
Geographic location		
Spain	38,141,024	37,751,833
Rest of the world	127,256	129,420
	38,268,280	**37,881,253**

Non-resident public administrations	13	13
Other non-resident sectors	127,243	129,407
	38,268,280	**37,881,253**

The average effective interest rate on debt instruments classified in this caption during 2021 was 0.04% (0.08% during 2020).

The item “Non-marketable mortgage covered bonds and bonds issued” (in the breakdown by nature) includes unique mortgage covered bonds issued under Law 2/1981 (25 March) governing the Mortgage Market in the amount of 1,100,470 thousand euros (1,625,470 thousand euros at 31 December 2020). The mortgage covered bonds were issued at variable or fixed rates of interest. The fixed-interest issues are hedged for interest-rate risk by means of interest rate swaps.

19.4 Debt securities issued

This heading in the consolidated balance sheets at 31 December 2021 and 2020 breaks down as follows:

	Thousands of euros	
	2021	**2020**
Nominal value of mortgage covered bonds (Note 44.1)	3,000,000	3,000,000
Treasury shares	(2,500,000)	(2,507,121)
Nominal value of other securities linked to transferred financial assets	258,354	326,522
Nominal value of preferred ordinary bonds	50,000	-
Nominal value of subordinated bonds	500,030	500,030
Valuation adjustments	7,937	21,239
	1,316,321	**1,340,670**

During 2020, mortgage covered bonds matured in the nominal amount of 900 million euros, (Note 44.1).

Details regarding each issue of preferred ordinary bonds are as follows:

Issue	Nominal interest	Maturity	Thousands of euros Nominal amount 2021	2020
2 December 2021	Mixed	2 December 2027	50,000	-
			50,000	**-**

On 2 December 2021, Ibercaja Banco, S.A. issued preferred ordinary bonds of 50 million euros, maturing on 2 December 2027. The issue price was 99,754% and will accrue a fixed annual coupon of 1.25% until 2 December 2022. From that date, they will accrue fixed interest at the swap rate of 1 year plus a margin of 1.25%.

A breakdown of the security issues associated with financial assets transferred is as follows:

Type	Nominal interest	Issuance date	Maturity date	Nominal value of issue	Thousands of euros Amount subscribed 2021	2020
TDA2 securitisation bonds	Variable	13.10.2005	(*)	904,500	48,162	63,926
TDA3 securitisation bonds	Variable	12.05.2006	(*)	1,007,000	51,359	62,069
TDA4 securitisation bonds	Variable	18.10.2006	(*)	1,410,500	60,415	78,928
TDA5 securitisation bonds	Variable	11.05.2007	(*)	1,207,000	34,647	42,413
TDA6 securitisation bonds	Variable	25.06.2008	(*)	1,521,000	12,388	13,766
TDA ICO-FTVPO securitisation bonds	Variable	15.07.2009	(*)	447.200	51,383	65,420
TDA7 securitisation bonds	Variable	18.12.2009	(*)	2,070,000	-	-
					258,354	**326,522**

(*) These bonds are redeemed as the mortgage loans that have been assigned to the relevant securitisation fund are repaid.

The average effective interest rate on debt instruments classified in this caption during 2021 was -0.14% (0.14% during 2020).

Details regarding each issue of subordinated bonds are as follows:

Issue	Nominal interest	Maturity	Thousands of euros Nominal amount 2021	2020
15 June 2007	Mixed	15 June 2022	30	30
23 January 2020	Fixed	23 July 2030 (*)	500,000	500,000
			500,030	**500,030**

(*) The Group reserves the right to redeem these issues once five years have elapsed as from the issue date. Early redemption by the issuer is also possible within five years as from the issue date for causes deriving from a change in the tax treatment of the product and/or its treatment as an equity instrument. Such redemption must be authorised by the competent regulator from time to time.

On 8 January 2020, Ibercaja Banco, S.A. agreed to make a buyback offer in cash to all holders of the subordinated obligations issue called “€500,000,000 Fixed Rate Reset Subordinated Notes due 28 July 2025”. Once this offer was concluded, Ibercaja accepted the purchase of Obligations for a nominal amount of 281,900 thousand euros, the settlement of which took place on 23 January 2020. Subsequently, Ibercaja met the selling interest of other investors who had not participated in the public offering, repurchasing an additional 77,700 thousand euros during the first half of that financial year.

Finally, on 28 July 2020, as anticipated in its “Other Relevant Information” communication to the CNMV on 3 June 2020, having obtained the necessary authorisations, the Group proceeded to carry out the early redemption of the remaining amount (140,400 thousand euros) of its issue of subordinated obligations called “€500,000,000 Fixed Rate Reset Subordinated Notes due 28 July 2025”. The nominal amount of 100 thousand euros has been paid for each outstanding security plus accrued and unpaid interest up to the aforementioned date (excluded), in accordance with the terms and conditions of the issuance prospectus.

On 16 January 2020, Ibercaja Banco, S.A. set the economic terms of an issue of subordinated obligations with a par value of 500 million euros and maturing on 23 July 2030. The issue price of the subordinated obligations was 100% and they will bear a fixed annual coupon of 2.75% until 23 July 2025, when Ibercaja has the option of carrying out early redemption. From this date, they will bear a fixed interest equal to the applicable 5 year Mid-Swap Rate plus a margin of 2.882%. The disbursement and closure of this issue took place on 23 January 2020.

The bonds qualify as Tier 2 capital instruments for the purposes of the own funds requirements to which it is subject under Regulation (EU) 575/2013 of 26 June 2013 on prudential requirements for credit institutions and investment firms.

These issues are subordinated and come behind all common creditors with respect to debt seniority.

Issues of subordinated bonds have been authorised by the competent Regulator to be classified as eligible own funds.

Interest accrued on the subordinated liabilities amounts to 14,391 thousand euros at 31 December 2021 (19,387 thousand euros at 31 December 2020).

The average effective interest rate on debt instruments classified in this caption during 2021 was 2.85% (3.36% during 2020).

Below follows a reconciliation of the carrying value of the liabilities originating from financing activities according to changes that generate cash flows and those that do not:

	Thousands of euros	
	2021	**2020**
Opening balance	**510,326**	**508,997**
Cash flows	50,000	-
Issue of preferred ordinary bonds	*50,000*	-
Subordinated bond issuance by Ibercaja Banco, S.A.	-	*500,000*
Redemption of subordinate bonds issued by Ibercaja Banco, S.A.	-	*(500,000)*
No impact on cash flows	(7,574)	1,329
Valuation adjustments	*(7,574)*	*1,329*
Closing balance	**552,752**	**510,326**

19.5 Other financial liabilities

This heading in the consolidated balance sheets at 31 December 2021 and 2020 breaks down as follows:

	Thousands of euros	
	2021	**2020**
Bonds payable	55,288	37,836
Guarantees received	50,458	29,076
Collection accounts	711,450	539,751
Special accounts	41,167	37,714
Financial guarantees	2,136	2,234
Other items	223,711	179,824
	1,084,210	**826,435**

“Other items” include deposits arranged for the net value of assets purchased or sold under repurchase agreements with the same counterparty on the basis of the offset agreements concluded for repos or reverse repos. The balance also includes lease liabilities amounting to 86,308 thousand euros (58,496 thousand euros during 2020, Note 2.10).

The Group has not offset the financial instruments that give rise to these guarantee deposits and has maintained the separate recognition of assets and liabilities without recording a net position, as the conditions described in Note 2.7 are not fulfilled. The carrying value of financial instruments covered by these agreements and deposits payable and receivable generated with the counterparties are as follows:

	Thousands of euros	
	Instruments subject to offset arrangements.	
	2021	2020
Assets under repos	-	-
Liabilities under repos	812	182

	Thousands of euros	
	Deposits subject to repo offset arrangements.	
	2021	2020
Deposits recognised under assets	310	1,060
Deposits recognised under liabilities	-	1,000

19.6 Information on average payment period for suppliers. Additional Provision Three. "Disclosure requirement" of Law 15/2010 of 5 July

Pursuant to Final Provision Two of Law 31/2014, of 3 December, amending Additional Provision Three of Law 15/2010, of 5 July, amending Law 3/2004, of 29 December, on measures to combat late payment in commercial transactions, and in connection with the information to be included in the notes to the financial statements on the deferral of payments to suppliers in commercial transactions, calculated in accordance with the Spanish Institute of Accounting and Auditing's Ruling of 29 January 2016, the information for 2021 and 2020 is as follows:

	2021	2020
	Days	
Average supplier payment period	16	25
Ratio of settled transactions	14	23
Ratio of transactions pending payment	151	102
	Thousands of euros	
Total payments made	747,710	566,606
Total payments outstanding	8,130	15,859

20. Liabilities under insurance or reinsurance contracts

At 31 December 2021 and 2020, the balances in this consolidated balance sheet heading were as follows:

	Thousands of euros	
	2021	2020
Technical reserves for:		
Unearned premium reserves (non-life)	-	-
Life insurance:	5,326,263	6,573,738
Unearned premium reserve and current risks	*23,260*	*22,475*
Mathematical reserves	*5,303,003*	*6,551,263*
Benefits pending payment	96,055	92,728
Profit sharing and returned premiums	5,470	4,396
Life insurance in which the investment risk is borne by the policyholders	1,693,706	851,005
	7,121,494	**7,521,867**

There is no accepted reinsurance at 31 December 2021 or 31 December 2020.

The reconciliation between the opening and closing balances under this heading in 2019 and 2020 is as follows:

	Thousands of euros
Balances as at 31 December 2019	**7,784,537**
Transfers	*7,521,167*
Reversals	*(7,784,537)*
Balances as at 31 December 2020	**7,521,167**
Transfers	*7,121,494*
Reversals	*(7,521,167)*
Balances as at 31 December 2021	**7,121,494**

On 17 December 2020, the Directorate General of Insurance and Pension Funds published by means of a Resolution the new biometric tables to be applied by insurance companies, as well as the technical guide on supervisory criteria related to them.

The main objective of this Resolution was to declare the admissibility of these new tables and the inadmissibility of certain previous tables, establishing their application in calculating new premiums, accounting provisions and the valuation of liabilities under Solvency II, distinguishing between the various types of insurance (mortality, individual and group survival insurance).

In addition, and with regard to survival insurance, this resolution provides that institutions may choose between full adaptation to the tables in 2021 or progressive adaptation over time, complying with a timetable set by the supervisor. This timetable requires at least 25% of the difference in tables to be collected by the end of 2021 and each year thereafter additional quarters are to be computed, so that by the end of 2024 the institutions are fully adapted to the new tables.

Ibercaja Vida has estimated the total impact of the change of tables at 9,153 thousand euros, coming entirely from the survival insurance of its portfolio. At the end of 2021 an accumulated provision for this item amounting to 6,079 thousand euros had been recorded. Therefore, at the end of 2021, 66.42% of the impact of the change of tables has been included in its accounts, which is much higher than the minimum percentage laid down in the Resolution of the Directorate General of Insurance and Pension Funds for 2021, taking advantage of the adaptation period.

In the aforementioned Resolution, the Directorate General for Insurance and Pension Funds published two tables with different applications:

- Tables second-order or realistic: these are biometric tables based on actually observed historical mortality. They shall be applied in the calculation of the best estimate in the area of solvency.
- First order tables: these incorporate prudential surcharges determined by the supervisor on the second-order tables and are the tables to be applied for the quantification of accounting provisions.

Furthermore, at 31 December 2021 and 2020, Ibercaja Vida has analysed the adequacy of the new tables by comparing its actual experience with those that would be obtained in application of the new realistic, i.e. second-order, tables. The results obtained are shown in the following table:

2021

	Products	Actual Claims	Realistic Mortality Table	Estimated Claims	%
Death Risk Insurance	Life-savings insurance Risk insurance	1,074	PASS M/F 2020 2nd Order	1,412	76.07%
Insurance with Survival Risk	Rent insurance (Individual and Group)	1,802	PER M/F 2020 Ind 2nd Order PER M/F 2020 Gr 2nd Order	1,903	94.70%

2020

	Products	Actual Claims	Realistic Mortality Table	Estimated Claims	%
Death Risk Insurance	Life-savings insurance Risk insurance	1,216	PASS M/F 2020 2nd Order	1,653	73.56%
Insurance with Survival Risk	Rent insurance (Individual and Group)	1,969	PER M/F 2020 Ind 2nd Order PER M/F 2020 Gr 2nd Order	1,939	101.55%

As can be seen, in Death Risk Insurance there is a high sufficiency in the biometric hypotheses used in the calculation of the best estimate, since the real behaviour of the insured group (real deaths) is 76.07% (73.56% in 2020) of the behaviour obtained with the realistic mortality tables (second order). In other words, the company's mortality rate is lower than that determined by the realistic second-order table published by the supervisor.

In addition, sufficiency in Insurance with Survival Risk is verified because the real mortality of the insured group is 94.70% of the realistic longevity tables (second order), slightly above that indicated in the PER2020 second order table.

However, as explained above, the provision booked at year-end 2021 and 2020 has been calculated using the first-order tables, which represent a significant surcharge compared to the second-order tables. Therefore, once the adequacy of the second order tables has been verified with the company's experience, there is a very high probability that the provisions booked will cover future commitments, even if they are subject to some uncertainty.

20.1 Risk management under insurance contracts

The Group is exposed to market (interest rate, concentration, spread and variable income), liquidity, counterparty, operational and underwriting (life) risks under insurance contracts arranged and related transactions.

Ibercaja Vida has policies describing the management and control strategies applied to each of the abovementioned risks. These policies meet the Solvency II requirements that came into force on 1 January 2016 and have been approved by the Board of Directors.

Additionally, the Three Lines of Defence Model has been deployed in the Entity to assure effective risk management and supervision.

In addition, and with a risk-based approach, Ibercaja Vida has defined its Risk Appetite Framework (RAF), the main objective of which is to identify the risks to which the company is exposed and to determine tolerance limits for each of these risks, by establishing metrics with established compliance thresholds. This system makes it possible to monitor that the company is at all times within the threshold or risk appetite set by its Board of Directors.

In addition, and at least once a year, Ibercaja Vida carries out a Self-Assessment of its Risks and Solvency to obtain a prospective vision of the company's risks and solvency in different scenarios.

Market, liquidity, counterparty and operational risks affecting this activity are managed consistently throughout the Ibercaja group as indicated in Note 3 on Risk Management.

Insurance business risk relates to life underwriting, which is the risk of incurring losses due to an increase in the value of liabilities as a result of a departure from the assumptions (mortality, longevity, policy lapse, expenses, etc.) on the basis of which they were contracted. This risk spans a number of sub-risks, the most significant being:

- Mortality Risk: the risk of incurring losses due to an increase in mortality rates in relation to forecasts.
- Survival/Longevity Risk: risk of incurring losses due to an increase in the survival of insured parties in relation to forecasts.
- Surrender/Portfolio Downside Risk: the risk of incurring losses due to variance in surrender rates in relation to forecasts.

Among others, the Company applies the following procedures to manage these life insurance underwriting risks to which it is exposed:

- Application of prudent mortality and survival tables to manage the risk associated with each product and generally accepted in the industry.
- Limits on taking out the insurance.
- Medical selection when taking out the insurance.
- Updating pricing and withholding platform.
- Ongoing monitoring of matching flows in portfolios subject to matching adjustment.
- In addition, risk diversification is an essential technique to reduce Ibercaja Group's overall exposure. To this end, Ibercaja Vida spreads its business strategy among various products, thus increasing the diversification of underwriting risks.

The main actuarial assumptions used in measuring the mathematical provisions of the various forms of insurance in the portfolio for 2021 and 2020 are detailed below:

	2021						
	Coverage type	Tables used	Profit sharing		Form of distribution	Form of payment	Guaranteed average rate
			With or without profit sharing	Amount to be distributed			
Systematic savings	Mixed	GK80/GK95/PASEM2010/ PASEM2019R1º	No profit sharing	-	Individual	Regular premiums	0.32%
Savings-investment	Mixed	GK80/GK95/PASEM2010/ PASEM2019R1º	No profit sharing	-	Individual	Single premium	0.32%

20.2 Classification of insurance risk

The Group has a policy of diversifying insurance risks and there are mechanisms in place to detect any type of risk concentration. It is common practice to use treaty reinsurance to mitigate the risk of concentration or accumulation of guarantees above the maximum acceptance levels.

Set out below are the premiums issued classified based on their characteristics:

	Thousands of euros	
	2021	**2020**
Life-risk insurance premiums	75,549	73,606
Savings insurance premiums	825,974	883,695
	901,523	**957,301**
Premiums under individual policies	894,543	952,777
Premiums under group policies	6,980	4,524
	901,523	**957,301**
Regular premiums	356,739	372,128
Single premiums	544,784	585,173
	901,523	**957,301**
Premiums for policies with no profit-sharing	289,735	402,703
Premiums for policies with profit-sharing	6,561	4,460
Premiums for policies where the investment risk is assumed by the policyholder	605,227	550,138
	901,523	**957,301**

The premiums under the insurance contracts detailed in the table above are presented in the income statement item “Income from assets under insurance or reinsurance contracts”, which amounted to 904,463 thousand euros at 31 December 2021 (960,230 thousand euros at 31 December 2020). This heading also reflects income from reinsurance amounting to 2,940 thousand euros at 31 December 2021 (2,929 thousand euros at 31 December 2020).

According to the Directorate General of Insurance, individual insurance policies are those in which, despite a group policy being formalised, the premium payment obligations and inherent rights pertain to the insured. All insurance policies were arranged in Spanish territory.

Expenses under insurance and reinsurance contracts recognised in the income statement for 2021 amounting to 904,756 thousand euros (960,461 thousand euros in 2020) relate to the technical reserves associated with such contracts.

20.3 Sensitivity to insurance risk

Ibercaja Vida monitors its risk exposure by applying the standard formula determined in the Solvency II regulations, obtaining a solvency ratio of 265% at 31 December 2021 (220% at 31 December 2020), with the regulatory minimum being 100%.

In addition, as explained above, Ibercaja Vida has established a Risk Appetite Framework (RAF) which defines the risk accepted in the company and establishes a series of first level metrics to monitor compliance with this appetite. In addition, in each of the risk management policies approved by the company, a series of second-level metrics or early warnings are determined that enable deviations to be anticipated and measures to be taken.

Among other sensitivity analyses, these metrics measure impacts on economic value and margin in the light of variations in the risk-free curve. The results achieved as at 31 December 2021 are as follows:

- A progressive decrease of -50 basis points in the discount curve would generate a 1% increase in the economic value and a 0.4% increase in the one-year result.

- A progressive increase of +50 basis points in the discount curve would mean a reduction in economic value of 1% and a reduction in one-year earnings of 0.8%.

As most of the insurer’s portfolios are immunised and bearing in mind their classification for accounting purposes, any upward or downward change in the interest rate structure would not have a significant impact on the economic value and income statement.

21. Provisions

The breakdown of movements in 2021 and 2020 indicating the purpose of the provisions recognised in the consolidated balance sheet at 31 December 2021 and 2020, is as follows:

	Thousands of euros				
	Pensions and other post-employment defined benefit obligations	**Other long term employee remuneration**	**Lawsuits and litigation for outstanding taxes**	**Commitments and guarantees given**	**Other provisions**
Balances at 1 January 2020	**123,610**	**466**	**7,930**	**22,515**	**161,174**
Allowances charged to income statement					
Interest expense	2	-	-	-	-
Allowances to provisions and other	-	432	434	17,307	23,450
Staff expenses (Note 38)	2,359	-	-	-	151,041
Reversal of provisions taken to income statement	-	-	-	(20,435)	(35,424)
Provisions utilised	(311)	(776)	(584)	-	(13,539)
Other movements	(6,535)	-	-	90	(40,106)
Balances as at 31 December 2020	**119,125**	**122**	**7,780**	**19,477**	**246,596**
Allowances charged to income statement					
Interest expense	3	-	-	-	-
Allowances to provisions and other	-	562	1,019	7,887	8,611
Staff expenses (Note 38)	2,254	1,544	-	-	16,333
Reversal of provisions taken to income statement	-	-	-	(10,636)	(1,721)
Provisions utilised	(308)	(684)	(1,636)	-	(115,554)
Other movements	(31,835)	-	-	(21)	25
Balances as at 31 December 2021	**89,239**	**1,544**	**7,163**	**16,707**	**154,290**

The composition of the provisions items “Pensions and other post-employment defined benefit commitments” and “Other long-term employee remuneration” is broken down in Note 38 “Staff expenses”. Other movements discloses the variation of exterior commitments implemented through pension plans and insurance policies without breaking down the financial and actuarial components and the benefits paid, with the information provided in the aforementioned Note.

The caption “Provision – Commitments and guarantees given” reflects impairment losses associated with financial guarantees (Note 27.1) and other off-balance-sheet exposures (Note 27.3) granted by the Group.

Post-employment benefits and other long-term commitments

As mentioned in Note 2.13, the Group has undertaken certain post-employment commitments with personnel. These pension and long-term remuneration commitments, carried as provisions in the balance sheet at 31 December 2021 and 2020, are analysed below:

	Thousands of euros	
	2021	**2020**
Liabilities		
Externalised post-employment benefits	82,720	112,168
Non-externalised post-employment benefits	6,519	6,957
Fund for labour-related costs of the restructuring plan	-	122
Long-term incentive plan (Note 2.13.5)	1,544	-
	90,783	**119,247**

The net balance in the consolidated balance sheet for defined benefit plans breaks down as follows:

	Thousands of euros	
	2021	**2020**
Commitments relating to:		
Post-employment benefits (Note 38.2)	(4,361)	(29,314)
Other long-term remuneration - pre-retirement (Note 38.3)	(1,544)	(122)
(Shortfall)/Surplus	**(5,905)**	**(29,436)**
Impact of limit on assets	(473)	(638)
Net asset (liability) on balance sheet:	**(6,378)**	**(30,074)**
Assets linked to pensions (*)	78,998	84,845
Net pension assets (**)	5,407	4,328
Net pension (provision)	(90,783)	(119,247)

(*) Financial assets at the subsidiary Ibercaja Vida, S.A.
(**) Amount recorded under "Other assets" in the consolidated balance sheet.

The costs recognised in the consolidated income statement for employee benefits are as follows:

	Thousands of euros	
	2021	**2020**
Defined benefit plans	(2,254)	(2,359)
Contributions to defined contribution plans	(15,413)	(15,339)
interest expense and similar charges (net)	-	36
Transfers to provisions (*)	(561)	(412)
Actuarial gains (-) losses on long-term employee benefits	(1)	(20)
	(18,229)	**(18,094)**

(*) Includes annual provision for training, educational assistance for children, etc.

The amounts recognised in the consolidated statement of changes in equity are as follows:

	Thousands of euros	
	2021	**2020**
Actuarial gains/(losses) on post-employment benefits	14,635	849
Limitation on assets	(165)	(70)
	14,470	**779**

The main financial and actuarial assumptions used in measuring the commitments are as follows:

	2021	**2020**
Technical interest rate	0.68% - 1.12%	0.00% - 0.66%
Expected return on assets	0.68% - 1.12%	0.22% - 0.66%
Annual pension revision rate	0.00% - 2.00%	0.00% - 2.00%
Annual salary increase rate	2.00%	2.00%
Growth in Social Security contribution bases	1.00%	1.00%
Retirement age	63 - 67 years old	63 - 67 years old
Mortality tables	PER 2020 Col.1st order	PERM/F 2000P
Life expectancy		
Employees retiring in FY 2021/2020		
Men	24.18	22.66
Women	27.91	27.15
Employees retiring in FY 2041/2040		
Men	26.75	24.95
Women	30.30	29.21

The technical interest rates taken into account for calculating the present value of benefit flows are applied based on the duration of each commitment and the reference curve has been determined taking as a reference high-quality (AA) corporate bonds issued in the same currency and within the payment period estimated for the payment of the benefits at the date referred to in the financial statements. The method applied for building the discount rate curve is based on high-quality Euro-Denominated Corporate bonds (AA) selected by reference to Bloomberg data as the principal source.

The average weighted duration of the post-employment obligations is 11.33 years and the weighted average discount rate was 0.78%.

Other provisions

Below is the detail and movement during the nine months of 2021 in “Provisions - Other provisions” in the consolidated balance sheet:

	Thousands of euros					
	Balance at 31/12/2020	Transfers	Reversals	Amounts used	Other movements	Balance at 31/12/2021
Interest rate floor clauses	20,659	5,516	-	(16,006)	-	10,169
Provisions ERE (temporary redundancy plan)	207,379	16,333	-	(89,894)	-	133,818
Mortgage expenses	5,367	2,555	-	(5,456)	-	2,466
Delivery demands on account of home purchases (purchasers with or without guarantee)	10,330	278	(1,558)	(3,619)	-	5,431
Other provisions	2,861	262	(163)	(579)	25	2,406
Total	**246,596**	**24,944**	**(1,721)**	**(115,554)**	**25**	**154,290**

Costs of the workforce downsizing plan

At 31 December 2021, the “Provisions -remaining provisions” heading related to the labour cost of the redundancy plans in 2014, 2015, 2017 and 2020, pending payment in the amount of 133,818 thousand euros (207,379 thousand euros at 31 December 2020). In 2021, payments were made in the amount of 89,894 thousand euros. In 2021, an additional cost was estimated for the labour force reduction provision in 2020 amounting to 12,842 thousand euros (Note 38). During 2020, the funds associated with this item were released for 19,011 thousand euros, due to the expiry of a contingency linked to these labour costs from Cajatrés.

Interest rate floor clauses

In relation to the possible impact of the return of the amounts received as a result of the application of the so-called interest rate floor clauses, either as a result of the hypothetical annulment by the courts of the interest rate floor clauses, or by application of Royal Decree-Law 1/2018, of 20 January, on consumer protection measures in relation to interest rate floor clauses, the Company has provisions set up to cover a hypothetical legal risk arising from the potential elimination of interest rate floor clauses in mortgage loans.

On 11 April 2018, in a judgment handed down by the full court, when analysing one of these resolutions, the Supreme Court considered it to be valid, as it was a genuine transaction, where both parties, reducing their original claims, resolved in a free and informed manner to reach an agreement to avoid litigation on the possible unfairness of the interest rate floor clause. Both parties renounced claiming the consequences of the possible abuse of the floor clause due to lack of transparency, and therefore, given that all the resolutions are in keeping with the same pattern and were adapted with equal or greater transparency than the one analysed by the S.C., the Group considers that all the agreements it entered into with its customers are valid.

On 26 June 2018, when analysing an Ibercaja Banco resolution, similar to the one examined by the Supreme Court in its judgment of 11 April 2018, the court of first instance and preliminary investigations 3 of Teruel called on the Court of Justice of the European Union (“CJEU”) to provide a preliminary ruling (Case C-452/18), calling into question the doctrine established by the Supreme Court in its Plenary Judgment of 11 April 2018.

On 9 July 2020, the CJEU delivered its judgment in case C-452/18. The CJEU affirms, contrary to the opinion of Court 3 of Teruel and in line with that stated by the Advocate General in his conclusions issued on 30 January 2020, that it is possible for a bank and a customer to sign a novation or settlement agreement on a potentially abusive interest rate floor clause, by virtue of which the customer sees the rate of the floor clause reduced and for its part waives the right to claim against the bank for the alleged unfairness of the initial floor clause, provided that the customer gives his free and informed consent.

Subsequently, on 5 November 2020, when ruling on an appeal in cassation lodged by Ibercaja, the Spanish Supreme Court, applying the CJEU ruling of 11 July, considered that, given that the novation agreement signed by the customer with Ibercaja was a pre-established contract and its clauses were general conditions, there was a need to examine the transparency of its clauses. In doing so, it considered that the clause modifying the interest rate was transparent and therefore valid, but the clause containing the reciprocal waiver of the exercise of actions was not, as it was a generic waiver not limited exclusively to the floor clause. This changed the criterion laid down by the Spanish Supreme Court in its judgment of 11 April 2018 in relation to the novation agreements signed by the Company, and ordered Ibercaja to return to the plaintiff the interest charged in excess due to the application of the interest rate floor clause from the time it began to operate in the contract until the date of the novation, and from that date onwards, the Entity could continue to charge the customer the floor clause.

Also, it should be highlighted that the new statute-of-limitations period is applicable for the shares that have not indicated a special term, which fell from 15 years to 5 years (Art. 1964 of the Civil Code), except in Catalonia, which maintains the 10-year period due to its regional regulation, which means that those who have not claimed the floor clause of their novated loan will have their claim action barred if more than five years have elapsed since the novation contract. This assertion is supported by the case law of the CJEU, and in its judgment of 16 July 2020, the European Court ruled on the length of the limitation period for actions to enforce the restitutionary effects of the declaration of invalidity of an unfair term, stating that “a period of five years ‘does not appear’ to make it impossible in practice or excessively difficult to exercise the rights conferred by Directive 93/13” (CJEU of 16 July 2020, sec. 87), especially when the CJEU, in other cases, has considered three-year limitation periods to be in line with the principle of effectiveness (CJEU of 15 April 2010, Barth, C-542/08, para. 28) and two years (CJEU of 15 December 2011, Banca Antoniana Popolare Veneta, Case C-42772010, para. 25).

Despite the foregoing, the SC submitted to the CJEU, a prejudicial matter relating to the beginning of the calculation period to apply the statute of limitations, relating to the mortgage loan expense clause, which will serve as a base to determine the commencement date of the calculation of the statute of limitations period, for all the actions that complain about the abusive nature of a general condition arranged in the signing of a mortgage loan.

The IRPH clause in mortgage loans.

On 14 December 2017, the Spanish Supreme Court, in the face of disparate criteria from the various provincial courts, declared in a unification of doctrine, that the Mortgage Loan Reference Index (IRPH) was valid and not abusive, given that it is an official index and as such cannot be subject to a transparency analysis.

On 16 February 2018, the 38th Court of First Instance of Barcelona made a reference to the CJEU for a preliminary ruling (Case C125/18), calling into question the criterion laid down by the Court of Justice in its judgment of 14 December 2017.

On 3 March 2020, the CJEU ruled in Case C-125/18, in which it clarified that a clause that fixes the interest rate on the basis of an official reference rate is subject to the Consumer Directive 93/13, and therefore, a national judge can examine whether the reference rate has been informed to the consumer in a transparent manner, unless this official rate is applied to the loan contract by application of a mandatory rule, as is the case, for example, in the Spanish case, with agreed loans (VPO).

Following this ruling, the different Spanish provincial courts maintained different criteria. Some considered the interest rate clauses that include the IRPH to be transparent and, therefore, not abusive, and others, conversely, considered them to be non-transparent and declared the interest rate clause abusive; however, the latter agree that the loan contract cannot survive without this clause and, hence inclusion in the contract is possible, but with very different criteria, since some courts replaced it with the Euribor, others with the IRPH credit institutions.

In November 2020, the Spanish Supreme Court issued five rulings related to the IRPH, four of them referring to free loans, and one of them related to an agreed loan. In the first four cases, the Court concluded that, despite the fact that the IRPH clause is not transparent, since the customer was not informed of the past performance of the index, it is not considered to be abusive, since, from the point of view of contractual good faith, the clause does not create an imbalance in the obligations of the contract for the consumer, and, therefore, since it was agreed by the Entity with the customer in good faith, it cannot be declared abusive. In relation to the fifth ruling, concerning a VPO loan, the SC stated that this clause, whose interest rate is imposed by the application of a regulation, cannot be considered abusive, since the Entity acted in good faith, limiting itself to applying the interest rate to the loan that is imposed for these loans by law.

Through the order of 17 November 2021, the CJEU confirmed what it expressed in its ruling of 3 March 2020, clarifying that, for transparency to exist, it is not necessary to deliver a prospectus to the consumer before signing the contract that included the previous change in the index, or that the contract should include a specific definition thereof, since the information related to the IRPH “is subject to official communication”, and hence, an attentive shrewd consumer would easily have knowledge of this information when taking out their loan.

In the case of the Group, the largest loan book referenced to IRPH comes from agreed or VPO loans, in which the interest rate is mandatorily imposed by the government and, therefore, the clause of these loans is outside the scope of application of the Consumer Directive, as has been affirmed by the CJEU ruling.

The rest of the IRPH-linked loan book is scant and many of these loans have already been repaid. As a result, the number of claims received for this legal contingency has been very low.

At 31 December 2021, the Group had 26 outstanding claims pending resolution. In the remaining proceedings in which we have been sued (that is, a total of 21 procedures), all the final decisions are favourable for the Group.

Based on this background and given that current case law on this matter is in favour of considering the IRPH clause as a non-abusive clause, the Group has considered it appropriate not to provision any amount for this legal risk, as it considers the probability that the Group will have to part with resources that include economic benefits to settle this obligation to be remote.

Mortgage expenses

In its ruling of 23 December 2015, the Spanish Supreme Court declared the nullity of the expense clause of the mortgage clauses due to its abusive nature, since it attributed the payment of all expenses to the consumer. According to its criteria, there was a serious imbalance in the contract's features in favour of the lending banks and against the consumers. The nullity led to the expulsion of the loan contract clause, which means, in line with the Supreme Court doctrine set in its ruling of 23 January 2019 that the Spanish laws must apply to determine how pays each of the loan expenses.

The CJEU Ruling of 16 July 2020 recognises that, once the costs clause has been declared unfair, national law can be applied to regulate the distribution of the costs of mortgage creation and cancellation in the absence of an agreement between the parties. In these paragraphs, in particular, the Court expressly mentions the possibility of not refunding to the consumer amounts imposed on him by national law (such as Stamp Duty).

In short, the CJEU confirms the validity of the interpretation made by the Supreme Court in such a way that it will be up to the national judge to determine, in the absence of an agreement as the expense clause has been eliminated, which of the costs borne by the consumer were imposed on him by the provisions of national law. And these national provisions are the ones that have been applied by the Supreme Court in its case law.

In this regard, the Supreme Court established on the basis of its Ruling 49/2019, of 23 January 2019, the distribution rules that must be applied and these national provisions state that:

- Stamp duty: As stated in the prevailing legislation at the arrangement date of the loan, the borrower was the payer of the tax, which was confirmed by Supreme Court case law. Hence, this expense must be paid by the borrower until the entry into force of Royal Decree Law 17/2018, of 8 November, which established that the taxpayer in the mortgage loans was the bank and not the borrower.

- Notary expenses: In the absence of the contract clause regulating this detail, rule Six of Appendix II of Royal Decree 1426/1989, of 17 November, approving notary fees, indicated that “The payment obligation on the rights will correspond to those that requested the provision of functions or services of the Notary and, where appropriate, to the interested parties in line with the substantial and fiscal regulations, and if several payers exist, the obligation will be joint and several”. Given that the two parties are interested in arranging the loan in a public deed (the borrower must obtain a long-duration mortgage loan and reduced interest rate to acquire a property, and the bank to have an enforceable title registrable in the Property Register), both parties must bear this cost 50-50%.

- Registration expenses: In the absence of the contract clause regulating this detail, rule Eight of Appendix II of Royal Decree 1427/1989, of 17 November, approving property registrar fees, indicated that the registrars' fees will be paid by those in whose favour said right is immediately registered or noted, and it must also be paid by the person that has presented the document. Hence, as stated in the customs duty regulations, since the party interested in registering the mortgage is the bank, the bank must support such expense.

- Appraisal expenses: It must be indicated that in relation to this expense, in its Ruling 61/2021, of 27 January 2021, the TS set the criteria that this expense must be met by the bank, since the property is appraised to mortgage it and since the mortgage is set up in favour of the bank, the bank must bear said cost, unless the loan was formalised after the entry into force of Law 5/2019 of 15 March, regulating real estate credit contracts, which imperatively establishes that this cost must be borne by the borrower.

Agency expenses: In principle, the SC understood that under national law this cost must be borne by the Bank and the borrower equally, since the agency provides a double service, one in favour of the borrower: to settle the taxes that must be paid, and another in favour of the bank: file the deed in the Property Register. However, in a ruling in November 2020, the SC changed its criteria and established that the payment of agency expenses corresponds to the bank, since the main activity of the agent is to file the mortgage loan in the property register.

Despite the foregoing, we must take into account various milestones of great importance which have occurred or will definitely occur in the future which, in our opinion, may affect the quantification of this legal risk:

- In 2017, Ibercaja, amended the loan agreement expense distribution clause, agreeing with the debtor to fairly distribute these expenses (register expenses: from bank account expenses; notary expenses: first copy without enforceable purposes on the account of the customer and first copy with enforceable purposes on the account of the bank; taxes as per the Law, appraisal expenses on the account of the customer, although with promotional campaigns assumed by Ibercaja).

- In June 2019, Law 5/2019, of 15 March entered into force, on the law on real estate loans, which mandatorily set the distribution of the expenses on mortgage loans arranged with consumers, hence, based on this law, no new loan can be the subject of a claim with respect to the expense clause.

- The number of new claims that we believe are going to be filed vis-à-vis IBERCAJA are going to be reduced to a large extent as a result of the prescription. On 28 December 2020 (once 82 days had elapsed since the state of alarm in which the statute-of limitations periods were suspended), the new five-year period entered into force for the prescription of the amount claim actions, instead of fifteen years. This will allow, in our opinion, the whole loan book arranged before 28 December 2015 to be saved, which had not claimed before 28 December 2020 the refund of the amounts unduly paid for expense clauses. However, in light of the differing criteria of the various provincial courts, the Spanish Supreme Court submitted a prejudicial matter to the CJEU, so it could pronounce on the commencement date of the calculation of the statute-of-limitations period. According to its outcome, the Bank must re-estimate the provisions it has recognised to cover this legal risk.

Amounts paid on account to the Bank in connection with home purchases

According to the Supreme Court judgment of 21 December 2015, in the sale and purchase of homes under Law 57/1968, credit institutions that accept deposits from buyers into an account held by the developer without requiring the opening of a special account and the related security are liable to the buyers for the total amounts advanced by the buyers and deposited in the account(s) that the developer holds with such institution in the event of insolvency of the developer. At 31 December 2021, the Bank had recognised a provision in the amount of 5,431 thousand euros to cover amounts received on account for home purchases (10,330 thousand euros at 31 December 2020), regardless of whether they had been claimed judicially.

Other provisions

The remainder of the balance relates to the coverage of other ordinary business risks.

22. <u>Other liabilities</u>

This heading in the consolidated balance sheets at 31 December 2021 and 2020 breaks down as follows:

	Thousands of euros	
	2021	**2020**
Personnel expense apportionment	13,964	9,882
Transactions in transit	1,417	4,320
Contribution to Deposit Guarantee Fund (Note 1.8.2)	44,786	46,229
Other	162,847	152,841
	223,014	**213,272**

At 31 December 2021 and 2020, "Other" mainly includes supplier expenses that have been accrued by the Group.

23. Shareholders' funds and non-controlling interests

23.1 Shareholders' equity

The breakdown of shareholders' equity at 31 December 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Capital	214,428	214,428
Equity instruments issued other than capital	350,000	350,000
Retained earnings	621,589	602,663
Legal reserve	*59,215*	*59,215*
Goodwill reserve	*12,807*	*12,807*
Voluntary reserves	*527,083*	*511,313*
Capitalisation reserves	*22,484*	*19,328*
Revaluation reserves	3,288	3,297
Other reserves	1,960,567	1,966,640
Legal reserve	*13,671*	*13,671*
Accumulated reserves or losses on investments in jointly-controlled entities and associates	*(35,848)*	*(33,603)*
Other reserves	*1,982,744*	*1,986,572*
Of which: from the application of IFRS 9	*(115,872)*	*(115,872)*
Of which: from the issue of equity instruments other than capital	*(67,020)*	*(49,870)*
Profit/(loss) for the year	150,985	23,602
Interim dividends	(47,000)	-
Total	**3,253,857**	**3,160,630**

Equity instruments issued other than capital relate to an issue of preferential holdings, issued on 27 March 2018, in the amount of 350 million euros, known as "€350,000,000 Perpetual Non-Cumulative Additional Tier 1 Preferred Securites". The price of the emission was 100% and accrues a fixed annual coupon of 7%, which will be paid quarterly until 6 April 2023. From that date, fixed interest equal to the five-year swap rate plus a margin of 6.809% will accrue. In any event, payment of the remuneration is subject to certain conditions, and is discretionary for the issuer.

Preference shares are perpetual, without prejudice to their eligibility for redemption under certain conditions, at the discretion of the Bank. In addition, the nominal value of each of them may decrease to 0.01 euros if the Common Equity Tier 1 of Ibercaja Group falls below 5.125%. The payout and closing of this issue was carried out on 6 April 2018, and it was admitted for listing and trading in the AIAF fixed income market.

These shares were issued with the authorisation of the competent supervisor for classification as eligible tier-1 capital (Note 1.7.2).

Accrual and payment of the coupon of these instruments is recognised in "Other reserves" of equity. At 31 December 2021, this payment amounted to 24,500 thousand euros, 17,150 thousand euros net of the tax effect (24,500 thousand euros, 17,150 thousand euros, net of the tax effect at 31 December 2020).

In 2021, there have been movements in the Group's equity to comply with the requirements of article 25 of the Corporate Income Tax Law regarding the creation of a separate and appropriately titled restricted reserve for the amount of the reduction due to the capitalisation reserve.

As a result, the capitalisation reserve that was on the Group's consolidated balance sheet at 31 December 2020 was released with a credit to voluntary reserves in the amount of 7,528 thousand euros, leaving a capitalisation reserve for 2017 amounting to 11,799 thousand euros.

In addition, the Group has set up, with a charge to voluntary reserves, another capitalisation reserve for 2019, in accordance with the provisions of the aforementioned article of the Corporate Income Tax Law, amounting to 10,684 thousand euros, so that the carrying amount of the capitalisation reserves in the consolidated balance sheet totals 22,484 thousand euros (31 December 2020: 19,328 thousand euros).

In accordance with the definition of distributable items in the CRR regulations, in article 4, section 1, paragraph; the balance thereof, at 31 December 2021, amounted to 380,146 thousand euros (323,785 thousand euros at 31 December 2020).

“Interm dividends” includes the interim dividend out of 2021 profit, distributed among the shareholders in the last quarter of 2021 (Note 4.1).

23.1.1 Capital

Share capital at 31 December 2021 consisted of 214,427,597 shares (214,427,597 shares at 31 December 2020), with a par value of 1 euro each, fully subscribed and paid out, of the same class and series. The Bank’s shares are represented by bearer certificates.

The shareholders of Ibercaja Banco, S.A. are as follows:

	Thousands of euros	
	31/12/2021	**31/12/2020**
Fundación Bancaria Ibercaja	88.04%	88.04%
Fundación Caja de Ahorros de la Inmaculada de Aragón	4.73%	4.73%
Cajacírculo Fundación Bancaria	3.33%	3.33%
Fundación Ordinaria Caja de Badajoz	3.90%	3.90%

In 2020, 513,958 Ibercaja Banco shares were transferred from Fundación Caja de Ahorros de la Inmaculada de Aragón and Cajacírculo Fundación Bancaria to Fundación Bancaria Ibercaja, in accordance with the terms of the settlement agreement reached between the aforementioned shareholder foundations in relation to the payment of the price adjustment made by SAREB as payment of the compensation arising from the Integration Agreement between Ibercaja Banco and Banco Grupo Cajatrés.

23.1.2 Reserves

Appendix II includes a breakdown by company of the balance in “Accumulated reserves or losses on investments in jointly-controlled entities and associates” and the other accumulated reserves.

23.1.2.1 Legal reserve

In accordance with the consolidated text of the Corporate Enterprises Act, companies that record profits for the financial year must transfer 10% of the profits to the legal reserve until the balance in the reserve reaches at least 20% of share capital. The legal reserve may not be used to offset losses unless it exceeds the aforementioned limit and no other sufficient reserves are available for such purpose.

The legal reserve may be used to increase the share capital provided that the remaining reserve balance does not fall below 10% of the balance of share capital after the increase.

23.1.2.2 Goodwill reserve

The goodwill reserve is recognised pursuant to the previous Article 273.4 of the Corporate Enterprises Act, (eliminated in financial statements for periods commencing on or after 1 January 2016) and is not available for distribution. Law 22/2015 of 20 July on the Auditing of Accounts stipulates that in periods commencing on or after 1 January 2016, the goodwill reserve will be reclassified to voluntary reserves and will be unrestricted as from that date in an amount that exceeds the goodwill recognised on the assets side of the balance sheet.

23.1.2.3 Revaluation reserves

The revaluation reserves are the result of the accounting restatement carried out on the first-time adoption of IFRS-EU and may not be distributed, directly or indirectly, unless the capital gain has been realised, this being understood as when:

a) The part of the restated assets corresponding to the reserve has been written down.

b) The restated assets have been transferred or written off the balance sheet.

23.2 Non-controlling interests

The Group had no non-controlling interests in 2021 or 2020.

24. Accumulated other comprehensive income

24.1 Actuarial gains/(losses) on defined benefit pension plans

At 31 December 2021, cumulative actuarial losses on defined benefit pension plans amount to 13,612 thousand euros (23,741 thousand euros at 31 December 2020).

24.2 Hedging derivatives. Cash flow hedge reserve (effective portion)

At 31 December 2021, the amount of losses taken to equity for cash flow hedges amounted to 24,973 thousand euros (31 December 2020: gains of 8,551 thousand euros).

24.3 Financial assets at fair value through other comprehensive income

This heading on the consolidated balance sheets reflects the net amount of changes in fair value of assets which, as described in Note 2, must be classified as an integral part of the Group's consolidated equity, net of the relevant tax effect (detailed in Note 25.4).

A breakdown of valuation adjustments, net of the tax effect, and fair value hierarchies (detailed in Note 26) is as follows:

	Thousands of euros				
	2021				
	Valuation adjustments	Fair value	Fair value hierarchy		
			Level 1	Level 2	Level 3
Listed equity instruments	(5,749)	203,543	193,076	10,467	-
Unlisted equity instruments	44,643	142,133	-	113,717	28,416
Listed fixed income	16,388	6,118,358	5,987,798	130,560	-
Total	**55,282**	**6,464,034**	**6,180,874**	**254,744**	**28,416**

	Thousands of euros				
	2020				
	Valuation adjustments	Fair value	Fair value hierarchy		
			Level 1	Level 2	Level 3
Listed equity instruments	(10,432)	210,904	201,601	9,303	-
Unlisted equity instruments	44,305	142,967	-	113,717	29,250
Listed fixed income	39,091	6,669,457	6,350,334	319,123	-
Total	**72,964**	**7,023,328**	**6,551,935**	**442,143**	**29,250**

25. Tax position

25.1 Consolidated Tax Group

Within the framework of the spin-off process, and in accordance with applicable legislation, in 2011 Ibercaja Banco and la Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja (now Fundación Bancaria Ibercaja) decided to form a Corporation Tax Consolidated Group (No. 579/11). Since 2012, the other Group companies that could join the tax group have been included and therefore corporation tax is assessed on a consolidated basis.

As a result of the securities exchange in July 2013 in which Ibercaja Banco acquired control over Banco Grupo Cajatrés, as from the tax period starting 1 January 2014, Banco Grupo Cajatrés and its investees that met the relevant requirements were included in the consolidated tax group.

Fundación Bancaria Ibercaja is also the parent entity of the VAT group (No. 78/11) which includes all qualifying group companies which have voluntarily agreed to join.

25.2 Years open to inspection

The Group and its companies are subject to inspection by the tax authorities for Corporation Tax for 2013 and subsequent years; in terms of other taxes, they are subject to inspection for periods from December 2017 onwards. In this respect, in July 2020, tax audits were initiated in relation to the tax years 2013 to 2017, both inclusive, for the corporation tax of the Tax Group and several of its companies, as well as for the periods between July 2016 and December 2017, both inclusive, for value added tax and withholdings and payments on account on income from employment, professional activities and income from movable capital. These proceedings are ongoing.

Furthermore, in relation to the Corporation Tax of the tax consolidation group of Banco Grupo Cajatrés, a company absorbed by Ibercaja Banco in 2013, and of several of its companies, in July 2020 notification was received that inspection proceedings were commencing regarding supplementary tax returns and requests for rectification filed for 2011 to 2013. These proceedings are currently underway.

Due to possible different interpretations of the applicable tax regulations, there may be certain tax contingencies which cannot be objectively quantified. However, in the opinion of the Group's Board of Directors and Management, should these contingencies result in actual liabilities they will not have a significant effect on the financial position and the results obtained by the Group.

25.3 Reconciliation of book and tax income

The reconciliation of consolidated profit before taxes for 2021 and 2020 and Corporation Tax expense is as follows:

	Thousands of euros	
	2021	**2020**
Consolidated profit(loss) before tax	**214,773**	**53,470**
Corporation tax at the 30% tax rate	64,432	16,041
Effect of permanent differences	6,165	(1,958)
Other adjustments on consolidation	(1,677)	(174)
Tax deductions and tax credits	(2,143)	(1,163)
Write-off of deferred tax assets	-	19,210
Corporation tax expense for the year	**66,777**	**31,956**
Adjustments to prior-year tax expense	(2,989)	(2,088)
Total corporation tax expense	**63,788**	**29,868**
of which: current tax expense	*15,955*	*41,977*
of which: deferred tax expense	*47,833*	*(12,109)*

The item "Effect of permanent differences" includes 5,494 thousand euros at 31 December 2020, relating to the straight-line reversal over five years of impairment losses on shareholdings that were tax deductible in periods prior to 2013, under Royal Decree-Law 3/2016 of 2 December,

In 2020, the Group derecognised tax credits associated with tax loss carryforwards generated by a subsidiary of the Group prior to its entry into the tax group for the amount of 19,210 thousand euros,

In 2020, pursuant to the provisions of Transitional Provision 16 of the Corporation Tax Law, in line with the wording used in Royal Law Decree 3/2016 of 2 December, which adopts tax measures that pursue the consolidation of public finances and other urgent social matters, the Bank has included 22,867 thousand euros in its taxable basis to reverse impairment losses on debt securities in the equity of entities that were tax deductible from the Corporation Tax base during the tax periods prior to 1 January 2013. Furthermore, as a result of the sale and settlement of Companies during the year, it will no longer be necessary to include income of 2,130 thousand euros. As at 31 December, no amount remained to be included in the taxable basis in this respect,

Corporation Tax expense increased by 25,737 thousand euros in 2021 due to the deferred taxes related to the origination and reversal of temporary differences (decrease of 31,007 thousand euros in 2020), Years prior to 2015, income was generated that qualified for the then-applicable tax credit for reinvestment of extraordinary profits, the relevant reinvestment commitment having been fulfilled. The following table shows the extraordinary gains that resulted in the tax credit:

	Thousands of euros	
Year income obtained	**Income**	**Year of reinvestment**
1998	3,498	2001
1999	190	2001
2001	6,001	2002
2002	6,017	2002
2003	4,181	2003
2004	6,707	2004
2005	4,486	2007
2006	14,633	2005-2007
2007	3,380	2007
2008	101,953	2007-2011
2009	1,598	2008-2012
2010	4,403	2009-2010
2011	17,729	2010-2011
2012	1,406	2012
2013	1,165	2012-2013
2014	9,229	2013-2014

Note: data for 2010 and prior years relate to operations of Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja (now Fundación Bancaria Ibercaja).

25.4 Deferred tax assets and liabilities

Based on tax legislation in force in Spain, there are certain timing differences and tax credits that should be taken into account when calculating consolidated corporation tax expense. The balance of and movements in the deferred tax assets and liabilities recorded in the consolidated balance sheets at 31 December 2021 and 2020 are as follows:

	Thousands of euros	
	Deferred tax liabilities	**Deferred tax assets**
Balance at 1 January 2019	**1,326,708**	**176,613**
Prior-year restatement and other	(16,142)	(1,364)
Generated during the year	82,890	339
Applied during the year	(59,875)	(4,211)
Change in deferred tax assets and liabilities applied to equity	2,044	(4,216)
Balance at 31 December 2020	**1,335,625**	**167,161**
Prior-year restatement and other	(7,724)	458
Generated during the year	18,902	388
Applied during the year	(60,247)	(2,082)
Change in deferred tax assets and liabilities applied to equity	5,596	(6,476)
Balance at 31 December 2021	**1,292,152**	**159,449**

In accordance with the provisions of transitional provision thirty-nine of the Corporation Tax Law, as amended by Royal Decree-Law 27/2019, of 28 December, the income or expense recorded directly in reserves as a result of the first application of Circular 4/2017 that have tax effects will be included in equal parts in the taxable basis of each of the first three years starting on or after 1 January 2018. The amount included in the taxable basis for 2020 for this item was 10,733 thousand euros. At 31 December 2020, no amount remained to be included in this regard, hence, in 2021, no amount was included for this item.

Below follows a breakdown of the Group's deferred tax assets and liabilities by type of temporary difference and tax credit:

	Thousands of euros			
	Deferred tax assets		Deferred tax liabilities	
	2021	2020	2021	2020
Impairment of financial assets	694,726	691,219	631	631
Pension commitments and other provisions	89,180	81,926	-	-
Fixed assets	15,770	13,322	109,468	110,900
Foreclosed assets	38	1,468	-	-
Other adjustments	53,903	92,655	33,444	33,248
Total temporary differences with a balancing item in income statement	**853,617**	**880,590**	**143,543**	**144,779**
Temporary differences with a balancing item in equity	**27,532**	**21,936**	**15,906**	**22,382**
Tax credit for tax-loss carryforwards	407,274	417,124	-	-
Tax credit for deductions pending application	3,729	15,975	-	-
Total tax credits	**411,003**	**433,099**	**-**	**-**
	1,292,152	**1,335,625**	**159,449**	**167,161**

Below follows a breakdown of income tax relating to each item included in the statement of recognised income and expense:

	Thousands of euros	
	2021	2020
Actuarial losses and gains on defined benefit pension plans	(4,341)	(234)
Changes in the fair value of equity instruments measured at fair value through other comprehensive income	(7,684)	3,755
Items that will not be reclassified to profit or loss	**(12,025)**	**3,521**
Debt instruments at fair value through other comprehensive income	9,730	2,751
Valuation gains/(losses) taken to equity	*7,478*	*(1,106)*
Transferred to the income statement	*2,252*	*3,857*
Cash flow hedges	14,367	(12)
Other recognised income and expenses	-	-
Items that may be reclassified to profit or loss	**24,097**	**2,739**
	12,072	**6,260**

No significant temporary differences associated with investments in subsidiaries, branches and associates or interests in joint arrangements have arisen which could give rise to deferred tax liabilities not recognised on the balance sheet.

Under current tax and accounting regulations, certain temporary differences must be taken into account when quantifying the relevant corporation tax expense on continuing operations.

In 2013, Royal Decree-Law 14/2013 classed as assets guaranteed by Spain's Central Government those tax assets generated by impairment losses on loans or other assets as a result of the possible insolvency of debtors unrelated to the taxpayer; this status was subsequently extended to impairment losses on public corporations and on provisions for or contributions to pension plans and, if applicable, pre-retirement plans ("monetisable tax assets").

Monetisable tax assets may be converted into debt claims against the tax administration in the event that the taxpayer records book losses or the entity is liquidated or declared to be insolvent by a court. They may also be exchange for government securities once 18 years have elapsed as from the last day of the tax period in which the assets were recognised in the accounts. In order to maintain the Central Government's guarantee, the assets are subject to an annual charge of 1.5% of their amount as from 2016 (Note 37).

In 2021, the net amount of deferred tax assets and liabilities related to temporary differences amounted to 721,700 thousand euros (735,365 thousand euros at 31 December 2020).

As noted above, a portion of deferred tax assets arising from temporary differences are enforceable against the public authorities in the above circumstances (monetisable assets), meaning that recoverability is not dependent on the existence of future taxable profits, so the recognition of the relevant amounts is justified. as at 31 December 2021, deferred tax assets amounted to 634 million euros (629 million euros at 31 December 2020).

In addition, at 31 December 2021 there are deferred tax assets for tax-loss carryforwards and for unused tax credits amounting to 411,003 thousand euros (433,099 thousand euros at 31 December 2020). The vast majority of these tax assets result from the prior-year losses, which were extraordinary and non-recurring, due basically to the write-down of real estate assets in 2012 and of renegotiated assets in 2013, as disclosed in the financial statements for those years.

The tax credits described in the preceding paragraph were recorded for accounting purposes on the premise that future tax benefits might be obtained that will allow the tax-loss carryforwards to be offset in a reasonable time. According to applicable regulations, there is no time limit for offsetting these deferred tax assets.

According to Ibercaja Banco's business plan, which has provided the basis for the valuation of the Bank at 31 December 2021, sufficient future taxable profits will be generated to enable the recovery of these deferred tax assets and therefore the Company considers that there is convincing objective evidence for the recognition of the deferred tax assets. Note 16.1 describes the justification of the basic assumptions used in determining the business plan considered by the Company, as well as the justification of the significant deviations therefrom in previous years that could jeopardise its fulfilment.

According to the business plan estimates referred to above, in 2021 the estimated period for recovering these deferred tax assets is no more than 15 years.

26. Fair value of financial assets and liabilities

26.1 Breakdown

Set out below is the breakdown of the fair value of financial assets and liabilities at 31 December 2021 and 2020 compared with their corresponding carrying value reflected in the balance sheet at that same date. Similarly, a breakdown of fair value is included on the basis of the appraisal system (levels 1, 2 and 3):

	Thousands of euros				
	2021				
	Total balance sheet	Fair value	Fair value hierarchy		
			Level 1	Level 2	Level 3
Cash and cash balances at central banks and other demand deposits	6,388,624	6,388,624	-	6,388,624	-
Financial assets held for trading	2,864	2,864	-	2,864	-
Financial assets not held for trading mandatorily measured at fair value through profit or loss	1,668,437	1,668,437	1,666,941	-	1,496
Financial assets at fair value through profit or loss	7,451	7,451	7,451	-	-
Financial assets at fair value through other comprehensive income	6,464,034	6,464,034	6,180,874	254,744	28,416
Financial assets at amortised cost	40,989,400	43,759,819	8,027,646	3,640,451	32,091,723
Derivatives - Hedge accounting	71,866	71,866	-	71,866	-
Total financial assets	**55,592,676**	**58,363,095**	**15,882,912**	**10,358,549**	**32,121,635**
Financial liabilities held for trading	8,775	8,775	-	8,398	377
Financial liabilities at amortised cost	47,285,113	47,365,053	-	47,365,053	-
Derivatives - Hedge accounting	275,690	275,690	-	275,690	-
Total financial liabilities	**47,569,578**	**47,649,518**	**-**	**47,649,141**	**377**

	Thousands of euros				
	2020				
	Total balance sheet	Fair value	Fair value hierarchy		
			Level 1	Level 2	Level 3
Cash and cash balances at central banks and other demand deposits	7,572,609	7,572,609	-	7,572,609	-
Financial assets held for trading	5,503	5,503	-	5,503	-
Financial assets not held for trading mandatorily measured at fair value through profit or loss	853,721	853,721	824,170	-	29,551
Financial assets at fair value through profit or loss	8,602	8,602	8,602	-	-
Financial assets at fair value through other comprehensive income	7,023,328	7,023,328	6,551,935	442,143	29,250
Financial assets at amortised cost	39,726,825	43,033,735	6,548,679	3,636,832	32,848,224
Derivatives - Hedge accounting	142,020	142,020	-	142,020	-
Total financial assets	**55,332,608**	**58,639,518**	**13,933,386**	**11,799,107**	**32,907,025**
Financial liabilities held for trading	5,630	5,630	-	5,253	377
Financial liabilities at amortised cost	46,627,380	47,206,444	-	47,206,444	-
Derivatives - Hedge accounting	216,202	216,202	-	216,202	-
Total financial liabilities	**46,849,212**	**47,428,276**	**-**	**47,427,899**	**377**

The criteria used to determine fair value have been as follows:

- Level 1: using prices quoted on active markets for financial instruments.

- Level 2: using prices quoted on active markets for similar instruments or other valuation techniques in which all significant inputs are based on directly or indirectly observable market data.

- Level 3: using valuation techniques in which some significant inputs are not based on observable market data.

In particular, the valuation techniques used in levels 2 and 3 and assumptions used to determine fair value have been:

- Debt securities and interest rate swaps: Valuation techniques based on discounted flows using the interest rate curve and the market spread for similar instruments have been used.

- Options: valued by applying models accepted as standard in the market. In those cases where no valuation model is available, they are valued through the quotation provided by counterparties.

- Equity instruments measured at fair value: In general, provided that directly or indirectly observable market data is available, their fair value is obtained from listed prices or transactions in active markets for similar instruments. If sufficient market information is not available, fair value is determined by discounting the estimated cash flows, which are derived from business plans of the investees, generally for a period of five years, calculating a residual value for the remaining period. These flows have been discounted using market rates and adjusted at the average cost of capital.

- Financial assets at amortised cost – Loans and advances - Customers: The valuation technique used is based on discounting the estimated future cash flows, considering maturity and repricing dates and calculating interest based on the interbank interest rate curve, without considering a “spread” for credit risk. Additionally, the early amortisation of 1.38% of the total has been taken into account. This percentage is based on the Group’s historical data and is used in internal management.

The impact of a 100 basis point rise in the interbank interest rate curve would bring about a -2.18% reduction in fair value.

In this case, it is estimated that there are no major differences owing to the credit risk between the carrying value and fair value of customer loans since the Group has quantified the level of credit risk provisions for its loan risk portfolio in accordance with applicable accounting legislation and which is considered sufficient to cover that risk. Nonetheless, since there is no market for those financial assets, the amount at which they may be exchanged between interested parties could differ from the net value reflected since the potential acquirer would take into account the expected losses and recorded in accordance with applicable legislation and their best estimates of possible future losses.

- Customer deposits: The valuation technique used has been based on discounting the estimated future cash flows, considering maturity and repricing dates and calculating interest based on the interbank interest rate curve.

- Marketable debt securities and subordinated liabilities: Valued using market prices or spreads for similar instruments.

The reasons why there may be differences between the fair value and carrying value of financial instruments are as follows:

- In the fixed-income instruments issued, the fair value of the instrument varies depending on the development of market interest rates. The longer the residual life of the instrument, the greater the variation.

- In variable income instruments, fair value may differ from carrying value if margins relative to the reference interest rate have changed since the issuing of the instrument. If margins remain constant, the fair value coincides with the carrying value only on repricing dates. On all other dates, there is an interest rate risk for the flows that have already been calculated.

The Group performs an analysis to assess whether levels of fair value hierarchy in which financial instruments are classified may have changed. If transfers between these levels occur, they are treated has having taken place at the end of the quarter in which they are identified. During 2021 and 2020 there were no financial instruments no longer measured using level 2 and 3 criteria and which have been measured with level 1 criteria.

For certain financial instruments (mainly the portfolio of financial assets and liabilities held for trading, the portfolio of non-trading financial assets mandatorily measured at fair value through profit or loss and trading related to financial derivatives), there is a balancing entry in the income statement for fair value changes. Details of the effect on the income statement arising from changes in fair value are as follows, classified on the basis of the hierarchical level of the instrument's fair value:

	Thousands of euros	
	2021	**2020**
Level 1	7,114	(776)
Level 2	(40,897)	915
Level 3	103	(10,587)
	(33,680)	**(10,448)**

Set out below in the fair value hierarchy of Level 3 fair value, there is a reconciliation of opening balances to closing balances, separately revealing changes during the year attributable to the following:

	Thousands of euros			
	Financial assets held for trading	Financial assets not held for trading mandatorily measured at fair value through profit or loss	Financial assets at fair value through other comprehensive income	Financial liabilities held for trading
Balance at 1 January 2021	**-**	**29,551**	**29,250**	**377**
Profit/(loss) recognised in the income statement and/or statement of recognised income and expense	-	108	(239)	-
Purchases	-	-	159	-
Sales	-	-	(754)	-
Issues	-	-		-
Settlements and maturities	-	(28,162)	-	-
Transfers from or to Level 3 in or outside the portfolios described	-	-	-	-
Balance at 31 December 2021	**-**	**1,497**	**28,416**	**377**

	Thousands of euros			
	Financial assets held for trading	Financial assets not held for trading mandatorily measured at fair value through profit or loss	Financial assets at fair value through other comprehensive income	Financial liabilities held for trading
Balance at 1 January 2020	**-**	**90,980**	**30,494**	**387**
Profit/(loss) recognised in the income statement and/or statement of recognised income and expense	-	(10,475)	91	-
Purchases	-	-	150	-
Sales	-	(40,313)	(1,485)	-
Issues	-	-	-	-
Settlements and maturities	-	(10,641)	-	(10)
Transfers from or to Level 3 in or outside the portfolios described	-	-	-	-
Balance at 31 December 2020	**-**	**29,551**	**29,250**	**377**

The fair value of investments in venture capital funds is determined according to the valuations regularly provided by the fund manager. The valuation criteria are generally based on the guidelines set by the EVCA (European Private Equity Venture Capital Association).

Considering the amount of these investments, the Group believes that the changes that would occur in their fair value as a result of reasonably possible changes in the variables that determine the value would not have a significant impact on the results, total assets or equity of the Group.

26.2 Impact of COVID-19 on fair value hierarchy levels

The events outlined above related to COVID-19 have had a significant impact on the financial markets at certain times during the 2020 financial year, and especially in the first half of the financial year, in the weeks following COVID-19 being declared a global pandemic. With the announcement of tightening measures affecting most of the world's economies, there was a decline in liquidity, a widening of bid-ask spreads in some financial instruments and some loss of convergence among the various price contributors.

Subsequently, market conditions have been normalising. Certain assets have recovered some of their accumulated losses, liquidity has recovered and volatility has declined in most markets from the highs reached in the weeks following COVID-19 being declared a global pandemic. At the end of 2021 and 2020, no significant reduction in the price sources used to value financial instruments has been observed.

As a result, in 2021 and 2020, the Group has not identified any significant changes in the fair value hierarchy levels of the financial assets in its portfolio.

27. Other significant information

27.1 Contingent risks

The following table breaks down financial guarantees granted at 31 December 2021 and 2020 in accordance with the maximum risk assumed by the Group:

	Thousands of euros	
	2021	2020
Guarantees and other sureties	**768,105**	**737,212**
Financial guarantees	97,630	93,631
Guarantees and other sureties	670,475	643,581
Irrevocable letters of credit	**41,725**	**23,018**
Irrevocable documents issued	41,725	23,018
Irrevocable documents confirmed	-	-
Assets associated with third-party obligations	234	**234**
	810,064	**760,464**

A significant portion of these amounts will mature without any payment obligation arising for the Group and therefore the full amount recorded for these commitments cannot be considered to be an actual future need for financing or liquidity to be granted to third parties.

The income obtained from collateral instruments is recorded under the headings “Fee and commission income” and “Interest income” (in the amount relating to the restatement of the commission values) in the consolidated income statement and are calculated by applying the rate established contractually based on the nominal amount of the guarantee.

Provisions recorded to cover these guarantees, which have been calculated by applying criteria similar to those for the calculation of the impairment of financial assets at amortised cost, are included under the heading “Provisions - Commitments and guarantees given” in the balance sheet (Note 21).

At 31 December 2021 and 2020, the Group had not identified any contingent liability.

27.2 Assets loaned or pledged

The breakdown of these assets is as follows:

	Thousands of euros	
	2021	2020
Assets under repos	598,062	617,298
Assets associated with Bank of Spain policy (*)	3,215,603	2,570,266
Other	-	-
	3,813,665	**3,187,564**

(*) There is an additional 3,580,615 thousand euros (3,707,465 thousand euros in 2020) relating to own securitisation bonds and mortgage covered bonds that are also associated with the Bank of Spain policy obtained to secure monetary policy operations in the Eurosystem.

The fair value of the assets provided or used as security do not differ from their carrying amount.

27.3 Contingent commitments

At 31 December 2021 and 2020, the limits on financing contracts granted and the undrawn balances were as follows:

	Thousands of euros			
	2021		2020	
	Limit granted	Undrawn balance	Limit granted	Undrawn balance
Drawable by third parties	**6,423,437**	**3,220,412**	**6,408,498**	**3,288,448**
Available immediately	3,761,680	2,178,988	3,677,218	2,296,459
Available subject to conditions	2,661,757	1,041,424	2,731,280	991,989
Securities subscribed pending disbursement	**-**	**1,268**	**-**	**1,268**
Documents in clearing houses	**-**	**106,917**	**-**	**126,905**
	6,423,437	**3,328,597**	**6,408,498**	**3,416,621**

The amounts available relate to variable interest operations.

Provisions recorded to cover these exposures, which have been calculated by applying criteria similar to those for the calculation of the impairment of financial assets at amortised cost, are included under the caption “Provisions - Commitments and guarantees given” in the balance sheet (Note 21).

27.4 Third-party funds managed and marketed by the Group and securities depository

Details of the balance of off-balance sheet customer funds that have been marketed by the Group in 2021 and 2020 are indicated in the following table:

	Thousands of euros	
	2021	**2020**
Collective Investment Institutions	19,600,522	16,234,844
Pension funds	6,562,703	5,907,074
Insurance products	91,988	101,968
Discretionary portfolio management (*)	4,922,073	4,602,628
	31,177,286	**26,846,514**
Of which: managed by the Group	*31,053,343*	*25,814,364*

(*) Mainly includes discretionary managed Collective Investment Institutions.

Set out below is a breakdown of the securities deposited by third parties with the Group at 31 December 2021 and 2020:

	Thousands of euros	
	2021	**2020**
Fixed Income	1,147,598	1,113,273
Equities	2,793,202	2,588,749
	3,940,800	**3,702,022**

27.5 Securitisation of assets

The Group has securitised assets by assigning loans from its portfolio to a securitisation fund in which, due to the agreed transfer terms, the Company has continued to bear the substantial risks and rewards of the securitised assets and therefore these assets have been retained in full in the balance sheet. Details of the balances recorded in relation to these operations are set out below:

	Thousands of euros	
	2021	**2020**
Assets transferred to TDA Ibercaja 2, FTA in 2005	112,351	137,840
Assets transferred to TDA Ibercaja 3, FTA in 2006	167,066	197,836
Assets transferred to TDA Ibercaja 4, FTA in 2006	259,640	305,692
Assets transferred to TDA Ibercaja 5, FTA in 2007	268,203	313,746
Assets transferred to TDA Ibercaja 6, FTA in 2008	432,015	491,065
Assets transferred to TDA Ibercaja ICO-FTVPO, FTH in 2009	72,088	93,950
Assets transferred to TDA Ibercaja 7, FTA in 2009	803,971	901,301
	2,115,334	**2,441,430**

Note 11.1 provides details concerning the Company’s exposure in securitisation funds and the amount of securitisation fund liabilities that have been subscribed by non-Group third parties.

Note 26 details the calculation criteria for estimating the fair value of customer loans, under which the securitised assets included in the above table are recorded.

The fair value of the liabilities issued by securitisation funds at 31 December 2021 and 2020, which are backed by the transferred assets mentioned above, is as follows:

	Thousands of euros	
	2021	**2020**
Liabilities issued by TDA Ibercaja 2, FTA in 2005	112,407	136,906
Liabilities issued by TDA Ibercaja 3, FTA in 2006	165,529	192,725
Liabilities issued by TDA Ibercaja 4, FTA in 2006	258,198	298,965
Liabilities issued by TDA Ibercaja 5, FTA in 2007	268,835	259,101
Liabilities issued by TDA Ibercaja 6, FTA in 2008	420,383	466,713
Liabilities issued by TDA Ibercaja ICO-FTVPO, FTH in 2009	70,965	91,057
Liabilities issued by TDA Ibercaja 7, FTA in 2009	749,904	813,562
	2,046,221	**2,259,029**

27.6 Assets received under guarantees

Assets received under guarantees at 31 December 2021 amount to 5,384 thousand euros (6,709 thousand euros at 31 December 2020). The fair value of the assets received as security do not differ from their carrying amount.

27.7 Environment

The Group's operations as a whole are subject to environmental protection legislation. The Group considers that it complies substantially with these laws and that it has procedures in place designed to ensure they are met.

The Group has adopted the appropriate measures to protect and improve the environment and to minimise possible environmental impacts, and complies with current environmental legislation. During 2021 and 2020, no significant environment-related investments were made and no significant environment-related contingencies are considered to exist.

27.8 Segmentation

The ultimate decision-making body responsible for defining the operating segments is the Group's Management Committee. The Group has concluded that there are no distinct segments, as the results of its activities are not examined on an independent basis by Management, for the following reasons:

- The types of products marketed by the Group's insurance companies are, in part, substitutes for bank savings products and are subject to similar risks.
- The use of the commercial network of Ibercaja Banco, S.A. as the majority distribution channel for the products of the Group's insurance companies affects the relationship of dependence between the two sectors.
- The existence of a common customer base and the linkage of the two brands from the consumer's point of view mean that operational risk is interrelated between the two sectors of banking and insurance.
- All strategic, commercial and regulatory analysis is carried out at the Group level.

Nevertheless, in accordance with applicable regulations, information on the distribution of the Group's revenues by geographical area and product type have been included in this Note.

The Group carries out all its activity in Spain. The Group therefore considers it has a single geographical segment for operating purposes.

The breakdown of the Group's ordinary revenue (which includes interest income, dividend income, fees and commissions received, gains on financial assets and liabilities and other operating income) by type of product or service is as follows.

	Thousands of euros			
	Ordinary revenue from third-party customers		Gross margin excl. gains on financial assets and liabilities	
	2021	**2020**	**2021**	**2020**
Banking	994,570	1,056,949	799,046	774,872
Insurance	1,012,016	1,099,097	105,995	106,933
	2,006,586	**2,156,046**	**905,041**	**881,805**

The reconciliation between total ordinary income and gross income excluding gains and losses on financial transactions is shown below:

	Thousands of euros	
	2021	2020
Ordinary revenue from third-party customers	**2,006,586**	**2,156,046**
(Interest expenses)	57,097	99,125
Share of profit of entities accounted for using the equity method	5,589	579
(Fee and commission expenses)	19,509	16,636
(Net gains or (-) losses on the disposal of financial asset and liability accounts not measured at fair value through profit or loss)	46,108	128,856
(Net gains or (-) losses on financial assets and liabilities held for trading)	645	1,149
(Net gains or (-) losses on financial assets not held for trading mandatorily measured at fair value through profit or loss)	103	(10,476)
(Net gains or (-) losses on financial assets and liabilities designated at fair value through profit or loss)	-	-
(Net gains or (-) losses from hedge accounting)	(194)	(364)
(Net exchange differences)	557	852
(Other operating expenses)	78,553	78,581
(Liability expenses covered by insurance or reinsurance contracts)	904,756	960,461
Gross margin excl. gains on financial assets and liabilities	**905,041**	**881,805**

28. Interest income

The breakdown of the balance under this consolidated income statement heading in 2021 and 2020, based on the financial instrument portfolios from which the income originates, is as follows:

	Thousands of euros	
	2021	2020
Financial assets held for trading	-	-
Financial assets not held for trading mandatorily measured at fair value through profit or loss	85	181
Financial assets at fair value through profit or loss	-	-
Financial assets at fair value through other comprehensive income	95,251	111,533
Financial assets at amortised cost	423,097	493,287
Interest rate hedging derivatives	(37,378)	(11,026)
Other assets	516	1,008
Interest income from liabilities	68,352	37,815
	549,923	**632,798**

"Interest income from liabilities" includes interest income from the application of negative interest rates on liquidity auctions under the European Central Bank's TLTRO programme amounting to 59,074 thousand euros (31 December 2020: 33,173 thousand euros; Note 19.1).

29. Interest expense

The breakdown of the balance under this consolidated income statement heading in 2021 and 2020, based on the financial instrument portfolios from which the income originates, is as follows:

	Thousands of euros	
	2021	2020
Financial liabilities at amortised cost	81,055	119,568
Interest rate hedging derivatives	(50,108)	(59,367)
Insurance contracts	1,704	15,227
Other liabilities	1,572	9,285
Interest expense from assets	22,874	14,412
	57,097	**99,125**

"Other liabilities" includes interest expenses arising from the contribution made to the Deposit Guarantee Fund amounting to 275 thousand euros (505 thousand euros at 31 December 2020) (Note 1.8). In addition, at 31 December 2021, it also includes 1,207 thousand euros in interest expenses on lease liabilities (Note 2.10) (1,369 thousand euros at 31 December 2020).

30. Income from dividends

The amount recorded under this heading relates in full to dividends from equity instruments in the portfolio of Financial assets at fair value through other comprehensive income, amounting to 9,542 thousand euros at 31 December 2021 (5,208 thousand euros at 31 December 2020).

31. Share of profit of entities accounted for using the equity method

Appendix II provides a breakdown by company of the balance under this consolidated income statement heading in 2021 and 2020.

32. Fee and commission income

Fee and commission income accrued in 2021 and 2020, classified in accordance with the item generating the fees and commissions, is reflected in the following table:

	Thousands of euros	
	2021	**2020**
Contingent risk fees	8,643	8,581
Contingent commitment fees	2,723	3,421
Foreign currency exchange fees	107	90
Collection and payment services fees	123,161	113,084
Securities services fees	49,581	38,992
Non-bank financial product marketing fees	254,860	206,590
Other fees	18,420	20,013
	457,495	**390,771**

33. Fee and commission expenses

Expenses for fees and commissions accrued in 2021 and 2020, classified in accordance with the item generating the fees and commissions, are reflected in the following table:

	Thousands of euros	
	2021	**2020**
Fees and commissions assigned to other entities	6,809	5,792
Fees for securities transactions	2,442	2,605
Other fees	10,258	8,239
	19,509	**16,636**

34. Gains/(losses) on financial transactions

The breakdown of the balance under this consolidated income statement heading in 2021 and 2020, based on the financial instrument portfolios from which the balances originate, is as follows:

	Thousands of euros	
	2021	2020
Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit or loss.	**46,108**	**128,856**
Financial assets at fair value through other comprehensive income	7,508	12,856
Financial assets at amortised cost	40,779	125,366
Financial liabilities at amortised cost	(2,179)	(9,366)
Net gains/(losses) on financial assets and liabilities held for trading	**645**	**1,149**
Gains/losses on financial assets not held for trading mandatorily measured at fair value through profit or loss, net	**103**	**(10,476)**
Net gains/(losses) on financial assets and liabilities designated at fair value through profit or loss	**-**	**-**
Net gain/(loss) from hedge accounting	**(194)**	**(364)**
Adjustments to hedged instruments (fair value hedge)	34,233	48,655
Hedge derivative (fair value hedge)	(34,427)	(49,019)
	46,662	**119,165**

At 31 December 2020, the heading “Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit or loss – Financial assets at amortised cost” includes, among others, the impact of the sale of the national public debt securities portfolio explained in Note 11.2, which gave rise to a positive result of 114,619 thousand euros. As indicated in this Note, part of the nominal value of the portfolio was sold at term, generating a result of 33,102 thousand euros in 2021. Also, at 31 December 2020, it included the impact of the sale of a portfolio of non-performing loans with a nominal value of 269 million euros, which the Group sold to DSSV, S.A.R.R.L. The transaction resulted in a positive result of 3 million euros.

Also, at 31 December 2021, this heading included both the impact of the sale of the national public debt securities portfolio performed in 2021 (Note 11.2), which led to a gain of 18,686 thousand euros, and the impact of the sale of a non-performing loan portfolio arranged at the end of 2021 (Note 11.5), which led to a negative impact of 9,623 thousand euros.

At 31 December 2020, “Net gains or losses on the disposal of financial asset and liability accounts not measured at fair value through profit or loss - Financial liabilities at amortised cost” mainly reflected the impact of the subordinated obligations repurchase transaction performed in 2020, described in Note 19.4. The Group had to pay an average premium of 2.14%, which led to a negative result of 9,363 thousand euros.

Lastly, at 31 December 2020, “Net gains or losses on financial assets not held for trading mandatorily measured at fair value through profit or loss” mainly reflected the impact of the 10,350 thousand euros reduction in the value of SAREB’s subordinated debt (Note 8).

35. Exchange differences

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Translation into euro of monetary items denominated in foreign currency	389	1,376
Foreign currency trading	168	(524)
	557	**852**

No gain or loss was obtained on the cancellation of exchange differences recorded in consolidated equity, in accordance with the provisions of Note 2.5.3.

36. Other operating income

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Income from investment property (Note 15.2)	3,905	4,141
Income from other operating leases (Note 15.3)	16,475	15,350
Sales and income from provision of services	4,187	4,416
Other items	13,377	23,115
	37,944	**47,022**

At 31 December 2020, the heading “Other items” mainly includes the initial recognition of 15 million euros, as part of the 70 million euros already received by Ibercaja Mediación, for the signing of the novation agreement modifying Caser’s non-life insurance distribution contract (see Note 10).

37. Other operating expenses

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Operating expenses on investment properties (Note 15.2)	1,079	1,591
Contribution to National Resolution Fund (Note 1.8.1)	13,794	11,094
Contribution to Deposit Guarantee Fund (Note 1.8.2)	51,819	53,269
Other items	11,861	12,627
	78,553	**78,581**

At 31 December 2021, “Other items” includes the charge of 2,744 thousand euros (3,361 thousand euros at 31 December 2020) for converting deferred tax assets into debt claims against the Spanish tax administration (Note 25.4).

38. Staff expenses

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Wages and salaries	270,847	263,920
Social security contributions	68,638	68,660
Defined benefit plans	2,254	2,359
Contributions to defined contribution plans	15,413	15,339
Severance payments	16,333	151,072
Other staff expenses	1,698	1,218
	375,183	**502,568**

At 31 December 2021, the Entity recognised 1,544 thousand euros under “Wages and salaries” relating to the accrual of the management incentive multi-year plan (Note 2.13.5).

In December 2020, the management of Ibercaja Banco and employee representatives, as part of a redundancy programme, reached an agreement that envisaged a redundancy programme that would affect a maximum of 750 employees, establishing voluntary redundancy as a preferential selection criterion, either for reasons of age or due to the closure of the work centre. The departures of the participating employees will be staggered and will take place until June 2022. In accordance with point 165 of IAS 19 “Employee benefits” and the conditions established in IAS 37 “Provisions” for the recognition of restructuring costs, this plan has led to staff expenses amounting to 151,041 thousand euros being recognised under “Termination benefits” in the income statement for 2020. Note 21 includes the outstanding liabilities associated with this agreement. In 2021, an additional expense of 12,842 thousand euros was recognised, relating to changes in the departure dates of some employees, with respect to the remaining charges to a contingency tied to employment costs arising from prior years’ restructuring processes due to changes in social security legislation in 2021.

38.1 Number of employees

The distribution by category and gender of the Group's employees at 31 December 2021 and 2020 is as follows:

	31/12/2021			31/12/2020		
	Men	Women	Total	Men	Women	Total
GR. 1 senior management	9	3	12	9	3	12
GR. 1 Levels I to V	1,227	716	1,943	1,403	754	2,157
GR. 1 Levels VI to X	1,030	1,494	2,524	1,180	1,610	2,790
GR. 1 Levels XI to XIII	176	209	385	145	177	322
GR. 2 and Cleaning service	14	2	16	23	3	26
	2,456	**2,424**	**4,880**	**2,760**	**2,547**	**5,307**

At 31 December 2021 and 2020, the entire workforce is based in Spain.

The average number of Group employees in 2021 and 2020 is as follows:

	2021	2020
GR. 1 senior management	12	12
GR. 1 Levels I to V	2,082	2,143
GR. 1 Levels VI to X	2,688	2,804
GR. 1 Levels XI to XIII	394	386
GR. 2 and Cleaning service	23	26
	5,199	**5,371**

At 31 December 2021, the average number of Group employees with a disability of 33% or more is 50 (57 employees at 31 December 2020).

38.2 Staff expenses - post-employment benefits

Net figures recognised in the balance sheet for defined benefit post-employment plans at December 2021 and 2020 are as follows:

	Thousands of euros	
	2021	2020
Present value of obligations financed	(229,644)	(254,922)
Fair value of plan assets	225,283	225,608
(**Shortfall)/Surplus**	**(4,361)**	**(29,314)**
Impact of limit on assets	(473)	(638)
Net asset (liability) on balance sheet:	**(4,834)**	**(29,952)**
Assets linked to pensions (Note 21) (*)	78,998	84,845
Net pension assets (Note 21) (**)	5,407	4,328
Net pension (provision) (Note 21)	(89,239)	(119,125)

(*) Financial assets at the subsidiary Ibercaja Vida Compañía de Seguros y Reaseguros, S.A.
(**) Amount recorded under "Other assets" in the consolidated balance sheet.

The reconciliation of opening and closing balances reflecting the present value of post-employment defined benefit plan obligations during 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Initial value of obligations financed	**(254,922)**	**(265,205)**
Cost of services for the current year	(2,254)	(2,359)
Interest expense	(157)	(282)
Past service cost	-	-
Gains/(losses) on plan settlements and reductions	-	-
Recalculation of values:		
Gains/(losses) on changes in demographic assumptions	(6,594)	-
Gains/(losses) on changes in financial assumptions	12,433	(4,522)
Gains/(losses) due to experience	4,425	(1,526)
Benefits paid	17,425	18,972
Transfers and other	-	-
Final present value of obligations	**(229,644)**	**(254,922)**

The reconciliation of opening and closing balances reflecting the present value of post-employment defined benefit plan assets during 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Initial fair value of plan assets	**224,970**	**234,496**
Interest income	157	318
Gains/(losses) on plan settlements and reductions	-	-
Recalculation of values:		
Yield on plan assets excluding interest (expense)/income	-	-
Gains/(losses) on changes in financial assumptions	(3,443)	877
Gains/(losses) due to experience	7,483	6,018
Change in asset limit, excluding interest expense	166	(68)
Employer contributions	12,594	1,991
Member contributions	-	-
Benefits paid	(17,117)	(18,662)
Transfers and other	-	-
Final fair value of plan assets	**224,810**	**224,970**

The breakdown of the main types of plan assets at 31 December 2021 and 2020 is as follows:

	Thousands of euros	
	2021	**2020**
Shares	15.90%	13.74%
Debt instruments	79.19%	82.51%
Constructions	-	-
Demand deposits	4.91%	3.75%
Other assets	-	-
Total	**100.00%**	**100.00%**

The analysis of the expected termination of non-discounted post-employment benefits in the coming 10 years is as follows:

	Thousands of euros					
	2022	**2023**	**2024**	**2025**	**2026**	**2027-2030**
Probable post-employment benefits	15,435	14,914	14,367	13,800	13,209	56,928

Changes in the main assumptions will give rise to changes in the calculation of the obligations. The sensitivity of post-employment plan obligations to changes in the main assumptions is detailed below:

	Change in bps	Increase in assumptions	Decrease in assumptions
Discount rate	50 bp	(5.46%)	6.06%
Pension increase rate	50 bp	5.64%	(5.18%)
Salary increase rate	50 bp	0.18%	(0.17%)

The sensitivity analysis relates to individual changes in each assumption while the remainder remain constant.

The value of the obligation and the fair value of the assets for the purposes of the post-employment defined benefit plan for the current year and the previous four are as follows:

	2021	2020	2019	2018	2017
Present value of obligations financed	(229,644)	(254,922)	(265,205)	(256,700)	(264,016)
Fair value of plan assets	225,283	225,608	235,064	230,652	253,395
Surplus/(Shortfall)	**(4,361)**	**(29,314)**	**(30,141)**	**(26,048)**	**(10,621)**
Impact of limit on assets (Note 21)	(473)	(638)	(568)	(388)	(386)
Net asset (liability) on balance sheet:	**(4,834)**	**(29,952)**	**(30,709)**	**(26,436)**	**(11,007)**
Insurance contracts related to pensions (Note 21)	78,998	84,845	89,215	93,264	105,483
Net pension assets (Note 21)	5,407	4,328	3,686	4,565	4,261
Net pension assets (Provision) (Note 21)	(89,239)	(119,125)	(123,610)	(124,265)	(120,751)

38.3 Staff expenses - long-term remuneration for early retirees

The net figures recognised in the balance sheet for long-term remuneration payable to early retirees under defined benefit plans at December 2021 and 2020 are as follows:

	Thousands of euros	
	2021	2020
Present value of obligations financed	**(1,544)**	**(122)**
Fair value of plan assets	-	-
Net liability on balance sheet:	**(1,544)**	**(122)**
Assets linked to pensions	-	-
Net pension assets	-	-
Net pension (provision) (Note 21)	(1,544)	(122)

The reconciliation of opening and closing balances reflecting the present value of obligations under defined benefit plans for early retirees during 2021 and 2020 is as follows:

	Thousands of euros	
	2021	2020
Initial value of obligations financed	**(122)**	**(466)**
Cost of services for the current year	(1,544)	-
Interest expense	-	-
Past service cost	(561)	-
Gains/(losses) on plan settlements and reductions	-	-
Recalculation of values:	-	-
Gains/(losses) on changes in demographic assumptions	-	-
Gains/(losses) on changes in financial assumptions	-	-
Gains/(losses) due to experience	(1)	(20)
Benefits paid	684	364
Final present value of obligations	**(1,544)**	**(122)**

The analysis of the expected termination of other non-discounted long-term employee remuneration in the coming 10 years is as follows:

	Thousands of euros					
	2022	2023	2024	2025	2026	2027-2030
Probable long-term staff obligations	-	-	386	386	386	386

Changes in the main assumptions will not give rise to changes in the calculation of the obligations.

39. Other administration expenses

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Buildings, installations and office equipment	27,668	26,484
Equipment maintenance, licences, works and computer software	21,879	22,239
Communications	12,154	10,864
Advertising and publicity	5,771	5,003
Charges and taxes	18,170	20,221
Other management and administration expenses	83,424	68,209
	169,066	**153,020**

The item “Charges and taxes” includes the Tax on Deposits in Credit Institutions amounting to 10,685 thousand euros at 31 December 2021 (11,242 thousand euros in 2020).

- Other information

On 19 December 2019, the Bank’s General Shareholders’ Meeting appointed Ernst & Young, S.L. as auditor of Ibercaja Banco, S.A. for 2021, 2022 and 2023 to substitute PricewaterhouseCoopers Auditores, S.L.

The fees relating to the services provided by the audit company Ernst & Young, S.L. regarding the financial statements of Ibercaja Banco and the Group companies in the year ended 31 December 2021 are as follows:

	Thousands of euros
	2021
From audit services to the Group	862
From other assurance services	703
From other services	83
	1,648

The amount indicated in the previous table for audit services includes the total fees for these audit services, regardless of their billing date.

The other assurance services of the audit company relate mainly to limited reviews of the Group’s interim consolidated financial statements and other services requested of the auditor.

In 2021, no services have been provided by other companies that use the Ernst & Young brand.

The detail of the fees relating to 2020 agreed by the Bank with the audit firm PricewaterhouseCoopers Auditores, S.L. (auditor of Ibercaja Banco, S.A. until 2020) are provided below:

	Thousands of euros
	2020
From audit services to the Group	1,067
From other assurance services	503
From other services	561
	2,131

The fees accrued for non-audit services provided by the audit firm in 2020 relate mainly to limited reviews of the Group’s interim consolidated financial statements and other services requested of the auditor.

In 2020, no services have been provided by other companies that use the PricewaterhouseCoopers brand.

40. Impairment or reversal of impairment on non-financial assets

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Tangible assets (Note 15)	**4,414**	**1,471**
Property, plant and equipment	1,765	386
Investment property	2,649	1,085
Intangible assets (Note 16)	**-**	**-**
Goodwill	-	-
Other intangible assets	-	-
Other (Note 17)	**7,513**	**88**
	11,927	**1,559**

The increase in the provisions recognised under “Others” relates mainly to the recalibration effects of the 2021 internal model of the assets awarded.

41. Net gains/(losses) on derecognition of non-financial assets

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Gains (losses) on disposal of assets not classified as non-current assets held for sale	(5,594)	(3,066)
Gains/(losses) on disposal of shareholdings	395	19
	(5,199)	**(3,047)**

Gains/losses from the disposal of other non-current assets not classified as held for sale includes mainly the sale of land of a real estate subsidiary of the Group, which generated a loss of 4.4 million euros, with the remaining transactions being insignificant.

42. Profit/(loss) on non-current assets and disposal groups classified as held for sale not qualifying as discontinued operations

This consolidated income statement heading is analysed below for 2021 and 2020:

	Thousands of euros	
	2021	2020
Impairment gains/(losses) on other non-current assets for sale (Note 18)	(31,166)	(18,861)
Gains/(losses) on disposal of other non-current assets for sale	5,885	(969)
	(25,281)	**(19,830)**

The increase in the provisons recognised under “Impairment gains/(losses) on other non-current assets for sale” relates mainly to the recalibration effects of the 2021 internal model of the assets awarded.

43. Related parties

The balances recorded on the consolidated balance sheets at 31 December 2021 and 2020 and in the consolidated income statements for 2021 and 2020 are as follows:

	Thousands of euros									
	2021					2020

(*) Investment funds and companies and pension funds.
(**) Senior management, Board of Directors, relatives to the second degree and their related entities.

The financial operations included have been carried out in accordance with the usual operating processes of the Group's parent entity and at arm's length. Arm's length terms are also applied in other related party transactions. For these purposes, the preferred valuation method taken into account is the comparable uncontrolled price method.

44. Other disclosure requirements

44.1 Information on the mortgage market

In accordance with Royal Decree 716/2009, of 24 April, whereby certain aspects of Law 2/1981, of 25 March, governing the mortgage market and other rules on the financial mortgage system were developed, and Bank of Spain Circular 3/2010, of 29 June, the Board of Directors approved the "Loan and discount risk management policy and procedure manual" drawn up by the Company to guarantee compliance with legislation governing the mortgage market, including guidance on the following:

- The relationship between the amount of the loan and appraisal value (in accordance with MO ECO/805/2003) of the mortgaged property and the selection of valuation companies authorised by the Bank of Spain.

- The relationship between the debt and the borrower's capacity to generate income, verification of the information provided by the borrower and the borrower's solvency, and the existence of other additional guarantees.

- The balance between the flows deriving from the hedging portfolio and those deriving from the payments due on the instruments issued.

The General Shareholders' Meeting of Ibercaja Banco, S.A. is authorised to issue debentures or other fixed income securities and has empowered the Board of Directors to issue any kind of loans for a maximum amount, including mortgage securities.

Mortgage certificates are issued in accordance with Spanish legislation on the mortgage and securities markets. Under applicable legislation, the volume of mortgage covered bonds issued by an entity and not matured may not exceed 80% of the unamortised principal of all loans and mortgages in the eligible portfolio. The Company's Board of Directors approved a more restrictive limit, and therefore the above percentage of mortgage covered bonds issued may not exceed 65%. At 31 December 2021, the figure was 26.37% (29.54% at 31 December 2020).

Mortgage covered bonds are securities especially guaranteed by the issuer where the entire mortgage loan book arranged in its favour guarantees compliance with its payment commitments.

The level of over collateralisation or backing of mortgage covered bonds by the total mortgage portfolio is 446.78% at 31 December 2021 (409.76% at 31 December 2020).

At that date 99.56% of transactions in the mortgage portfolio have been formalised through loans (99.48% at 31 December 2020). Of these, instalments are collected on a monthly basis for 97.94% (97.69% at 31 December 2020). The operations formalised at variable interest rates are 99.38% of the total (99.45% at 31 December 2020) and of these, 78.32% are tied to Euribor (80.34% at 31 December 2020).

Set out below is information on the mortgage market:

- Information concerning the issue of mortgage covered bonds. Total amount of loans and mortgages pending repayment (irrespective of LTV level and including securitisations written off the balance sheet):

	Thousands of euros

At 31 December 2021 and 2020, the Company had no replacement assets in connection with issues of secured mortgage covered bonds and mortgage bonds.

44.2 Customer service

As it does every year, the Ibercaja Group's Customer Service Department prepares a report in compliance with the requirement of article 17.1 of Order ECO/734/2004 of 11 March on Customer Service Departments and Services and the Customer Ombudsman of Financial Institutions and the requirement of art. 25 of the Regulations for the Defence of the Ibercaja Group's Customers. This annual report is presented and submitted for the consideration of the Board of Directors of the Group companies and contains the summary of its activity over the year, a statistical analysis of the complaints, claims and suggestions dealt with and the decisions adopted, together with a summary of the main criteria with which a response has been given to the most significant claims, a series of recommendations and suggestions raised in their study. All of this due to its work within the group, which situates it as one of the units charged with guaranteeing adequate risk control, compliance with laws, regulations, supervisory requirements and the entity's internal policies and procedures, together with a unit favouring the prudent business conduct of the Ibercaja Group.

For these purposes, the Ibercaja Group comprises the following entities: Ibercaja Banco, S.A.; Ibercaja Leasing y Financiación, S.A., Establecimiento Financiero de Crédito; Ibercaja Gestión, Sociedad Gestora de Instituciones de Inversión Colectiva, S.A; Ibercaja Vida, Compañía de Seguros y Reaseguros, S.A.U.; Ibercaja Pensión, Sociedad Gestora de Fondos de Pensiones, S.A.; and Ibercaja Mediación de Seguros, S.A.U.

In accordance with the regulations and law just discussed, the Customer Service at the Ibercaja Group will present a statistical report to the Board of Directors of Ibercaja Banco S.A. regarding complaints and claims handled, the decisions taken, the general criteria followed when reaching these decisions and the recommendations or suggestions made to improve the Group's actions. A summary of this information is included below:

a. Claims processed

In 2021, the Customer Care Service (CCS) of the Ibercaja Group managed a total of 23,995 cases, which can be classified into two groups:

- Claims and grievances regarding mortgage arrangement costs and other clauses included in mortgage loan clauses: 11,561.

- Other claims, grievances and suggestions: 11,490, divided into 6,768 claims, 4,667 complaints and 55 suggestions.

b. Special out-of-court procedure for resolving claims relating to interest rate floor clauses under the terms of Royal Legislative Decree 1 of 20 January 2018

Since February 2017, the Ibercaja Group's Customer Care Service has also been responsible for resolving claims regarding interest rate floor clauses within the framework of Royal Decree Law 1 of 20 January 2017, through the Interest Rate Floor Clauses Claims Service (SERS). This service is voluntary for consumers and compulsory for Ibercaja, and consumer customers who do not use this procedure and go to court are not entitled to legal costs if Ibercaja agrees to their claims before the response to the lawsuit. In 2021, a total of 944 complaints were handled, about 20% of which were favourable. This year claims are also being resolved favourably for customers whose claims for the refund of novated loans in which only the surplus amounts collected for the floor clause are requested, from their activation to the date on which the novation was signed, in line with the Supreme Court case law, which has granted validity to these agreements.

The average time taken to resolve complaints and claims in 2021 was around 27 days for both procedures, which is within the current regulations. The service's efforts to resolve all complaints and claims within the set deadlines are evident.

General criteria contained in the decisions

The decisions have been issued with the utmost regard for good corporate governance and banking practices, transparency and consumer protection, taking into account the views formally expressed by customers and the reports issued by the branches, departments and Group companies concerned. Moreover, all decisions were reached on the basis of the contractual documents signed with the customers.

45. Financial statements of Ibercaja Banco, S.A. for the years ended 31 December 2021 and 2020

Set out below are the balance sheets at 31 December 2021 and 2020, together with the income statements, statements of recognised income and expense, total statements of changes in equity and statements of cash flow of the parent entity for the years ended 31 December 2021 and 2020, all such statements drawn up in accordance with Bank of Spain Circular 4/2017, as discussed in Note 1.2 to the individual annual accounts of Ibercaja Banco at 31 December 2021.

APPENDIX IV

ANNUAL BANKING REPORT

On 27 June 2014, the Official State Gazette published Act 10/2014 on the organisation, supervision and solvency of credit institutions, which transposed Article 89 of Directive 2013/36/EU of the European Parliament and of the Council of 26 June 2013 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms, amending Directive 2002/87/EC (CRD IV) and repealing Directives 2006/48/EC and 2006/49/EC.

In compliance with Article 87 and Transitional Provision 12 of Act 10/2014, credit institutions are required to publish, as an appendix to their audited financial statements and for each country in which they operate, the following information on a consolidated basis for the last completed financial year:

a) Name, nature and geographical location of the activity
b) Business volume
c) Number of equivalent full-time employees
d) Gross profit/(loss) before tax
e) Corporation tax
f) Grants and public aid received

Accordingly, all this information is set out below.

a) Name, nature and geographical location of the activity

Ibercaja Banco is a credit institution. Its registered office is located at Plaza de Basilio Paraíso 2 and it is filed at the Companies Registry of Zaragoza at volume 3865, book 0, sheet 1, page Z-52186, entry 1. It is also entered on the Bank of Spain Special Register under number 2085. Its corporate webpage (electronic headquarters) is www.ibercaja.es, where its bylaws and other public information can be viewed.

Ibercaja Banco, S.A. engages in the banking business and is subject to the standards and regulations governing banking institutions operating in Spain.

In addition to the operations carried out directly, the Bank is the parent of a group of dependant entities that engage in various activities and that, together with it, make up the Ibercaja Banco Group. The Bank is therefore required to draw up the Group's consolidated annul accounts, as well as its own individual annual accounts.

The consolidated Group carries out all its activity in Spain.

b) Business volume

Information on consolidated business volume is as follows, by country. Business volume for these purposes means gross income, as shown on the Group's consolidated income statement at the end of 2021.

	Thousands of euros
	31/12/2021
Spain	952,260
	952,260

c) Number of equivalent full-time employees

Equivalent full time employees by country were as follows at year-end 2021:

	Thousands of euros
	31/12/2021
Spain	4,880
	4,880

d) Gross profit/(loss) before tax

	Thousands of euros
	31/12/2021
Spain	214,773
	214,773

e) Corporation tax

	Thousands of euros
	31/12/2021
Spain	63,788
	63,788

f) Grants and public aid received

No grants or public aid were received by Ibercaja Banco, S.A. or any Group company in 2021.

Other information

The return on the Group's assets during the year, calculated as net profit divided by the total balance sheet, was 0.26%.

1 Letter from the Chairman and Chief Executive Officer

Letter from the Chairman and Chief Executive Officer

102-2, 102-4, 102-5, 102-6, 102-9, 102-14, 102-15, 103-1, 103-2

The **economic recovery** was widespread in all developed countries in 2021, largely thanks to progress in the vaccination process and despite uncertainties such as the persistence of the pandemic, supply problems and inflationary pressures.

Thus, although the economic improvement has been a verifiable fact, it is also true that the expected levels have not been reached, especially in Spain, which has recorded GDP growth of around 5%; however, the recovery to pre-pandemic production levels has not yet been completed.

Global **consumption** returned faster than expected, to the extent that the supply of some products could not meet the post-pandemic level of demand. This imbalance led to delays in delivery times, supply difficulties and, above all, price increases for raw materials and transport.

Another factor that has conditioned a slower recovery than expected has been the rise in **energy prices**, impacting the purchasing power of households and the margins of companies, which were affected by the increase in their production costs, especially in the case of industrial companies.

In this context, the policies of the main central banks began to be less lax at the end of the year, with various measures already being implemented to redirect the upward trend in the prices of goods and services.

In this context, in line with the sector's significant contribution in 2020 to mitigating the adverse economic effects of the outbreak of the pandemic, in 2021, **banks have been a key player in supporting the recovery of business and economic activity**.

Against this economic backdrop, the balance of activity of banks has been clearly positive, with significant dynamism in volumes, both in lending and, above all, in the management of savings; at the same time, non-performing loans have remained contained, notably reducing the need for provisions.

In addition, the sector has continued restructuring **its commercial network to adapt its structure to the current requirements of the environment, which entail greater digitalisation and the need for operational efficiency to** achieve reasonable levels of profitability.

All this finally crystallised in 2021 in a **general increase in the net profit** of financial institutions and a return to levels of return to shareholders that are already approaching the cost of capital.

Against this backdrop, in April 2021, Ibercaja presented its strategic roadmap for the next three years, the **Desafío 2023 Plan** (Challenge 2023 Plan), to reinforce its own independent project that gives continuity to 145 years of financial, economic, social and territorial function that has consolidated the Bank's distinctive DNA.

In the first year of the strategic three-year period, the Bank achieved profits of 151 million euros and a ROTE of 5.7%. At the same time, it continued to strengthen its financial soundness and solvency, ending the year with a common equity tier 1 ("CET1") fully loaded capital ratio of 12.7% and reducing the NPL ratio to 2.3%, with an NPL coverage ratio of 75.3%.

The **results** reflect the Bank's intense commercial activity to grow **in the corporate and personal banking segments**. A new Corporate Banking area was created at the beginning of the year, which boosted relations with these customers, capturing more than 5,400 new companies in 2021 and achieving growth of close to 7% in regular lending to this segment.

Overall (individuals, companies and institutions), new loans and credits were 5,421 million euros, returning to pre-pandemic levels.

In addition, the excellent performance of **asset management** was once again confirmed, with an increase of 5.78% in the national sector's share by volume of investment funds under management.

At the same time, the Bank intensified its **digital transformation**, responding to the acceleration in the digitalisation of society caused by the pandemic, as reflected in the almost 879,000 digital customers and more than 603,000 users of the mobile banking app at the end of 2021.

This year, in addition to implementing important new features and improvements in the online banking applications for businesses, individuals and the mobile app, the digital managers' project was launched. A team of professionals accompanies the customer, also through non-face-to-face channels, with a more personalised and specialised service. In this way, Ibercaja responds to its commitment to an omnichannel model focused on the customer experience and transfers the customer service model it provides in its physical branches to its non-face-to-face channels.

The Entity has also made steady progress towards being **a benchmark in sustainability**. In addition to accelerating the launch of specific investment and financing products and services to accompany its customers on their journey towards a more sustainable future, the action plan designed to integrate ESG (environmental, social and governance) risks into the Bank's overall risk management is being implemented.

Among other milestones achieved in this area, in 2021, Ibercaja became one of the **founding members of the Net Zero Banking Alliance**; offset all of its direct emissions in 2020, and organised its 1st Planet Week. This initiative is aimed at raising awareness and mobilising the participation of the Bank's employees and customers, as well as society at large, to convey the impetus that Ibercaja, its Financial Group and the Ibercaja Foundation are applying in their respective roadmaps to contribute to the achievement of the United Nations Sustainable Development Goals (SDGs).

The Bank continues to promote its **corporate purpose** **("to help people build the story of their lives because it will be our story")** in a year in which support for its employees, its customers and society has been essential to contribute to the necessary economic and social recovery underway.

Various measures deployed to mitigate the effects of the pandemic on customers have been maintained, such as the ICO lines for financing companies and the self-employed or the early payment of pensions and unemployment benefits, among others.

The Entity has supported institutions and public and private associations through collaboration agreements, initiatives such as Impulso Solidario (Wave of Solidarity) or Tu dinero con corazón (Your money with heart), thereby contributing to the development of the laudable and praiseworthy actions that favour social cohesion that they carry out.

The **Plan Desafío 2023**, launched this year, will guide the Bank's management in 2022, focusing on strengthening future competitiveness; driving transformation and growth in priority business segments; and consolidating a profitable business model that contributes to sustainable, inclusive and environmentally friendly growth.

To achieve this, the Bank has deep-rooted **strengths and proven competitive advantages**, including the Bank's staff's skills, commitment, and expertise. Their involvement in implementing the strategy, achieving the business goals, and the transformation itinerary constitute the most solid guarantee to ensure the successful future of this collective project, that is, Ibercaja.

102-21, 102-40, 102-42, 102-43, 102-44, 102-45, 102-46, 102-47, 102-54

> This 2021 Consolidated Management Report contains the most relevant economic and sustainability information on Ibercaja Banco and its subsidiaries.

Scope

The Consolidated Directors' Report brings together **all the relevant financial and sustainability information of the Ibercaja Group** in a **single document.** The aim is to make the best and most complete information available to all stakeholders transparently. This report provides an overview of the strategic lines, activities, business model, financial results and commitment to sustainability (environmental, social and personnel issues, governance, human rights, anti-corruption and anti-bribery). Its content is published on the corporate website (www.ibercaja.com) so that it is accessible to all interested parties.

> **OBJECTIVE**
>
> *The objective of this report is to provide stakeholders with the **best and most complete information** in a **transparent manner**.*

The **Appendix, "Requirements of Law 11/2018 on non-financial information and diversity"**, includes information pursuant to **Law 11/2018** amending the Spanish Commercial Code, the consolidated Spanish Corporate Enterprises Act approved by Royal Legislative Decree 1/2010, of 2 July, and Audit Law 22/2015, of 20 July, in relation to **non-**

financial information and diversity. This statement has been prepared taking into account the EC **Directives** on the presentation of non-financial reports and their supplement on **climate-related information**, as well as the recommendations provided by the ECB to the Bank in the field of climate and environmental risk disclosure. The contents identified in this Appendix form the Consolidated Statement of Non-financial Information.

The **reporting scope coincides** with that of the consolidated financial statements, which is 100% of the consolidation scope of the Ibercaja Banco Group, except for those aspects indicated in the final table of the "Requirements of Law 11/2018 on Non-Financial Information and Diversity" Appendix.

The objective of this report is also to address those aspects necessary for its consideration as a **Sustainability Report**, according to the criteria of the **Global Reporting Initiative (GRI)**, in line with the **"essential"** conformity option, whose directives have oriented Ibercaja's annual reports since 2005 and, in turn, serve as a **"Progress Report"**, in accordance with the reporting requirements of the **Global Compact**, relating to the 10 Principles of the United Nations Global Compact. It also includes the **implementation** report of the **United Nations Responsible Banking Principles**, signed by the Bank in 2019, together with the progress made in the report on **climate-related information**, in line with the recommendations of the **TCFD** (Task Force on Climate-Related Financial Disclosures), of which Ibercaja Banco became a member in August 2019.

This document also responds to the new requirements of the **Regulation (EU) 2020/852 on Taxonomy**, published on 22 June 2020 by the European Parliament and the Council in the framework of the European Green Pact, which aims to help create a fairer economy capable of generating employment equitably, by defining those economic activities that can be considered environmentally sustainable.

Materiality

Ibercaja periodically performs a **materiality study** to identify the priority financial, economic, social and environmental matters for its stakeholders and its business and thereby determine what information must be reported and its correct dimensioning. Significant aspects are deemed to be those matters that have a high probability of generating a significant impact, both on the business and in the valuations and decisions of the stakeholders.

With this approach, in 2015, the first materiality study was drawn up to identify those aspects that influence the ability to create value for Ibercaja and that are of interest to the people and/or groups with which it is related. This analysis is regularly updated to align it with each strategic cycle.

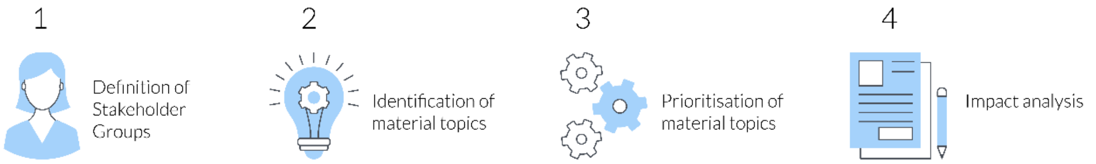
OBJECTIVE

Identify and prioritise relevant issues *ensuring alignment with the Bank's* ***new Strategic Plan*** *for 2021-2023.*

In 2021 Ibercaja performed a **new materiality analysis** applying the **double materiality approach under the European Non-Financial Reporting Directive** to identify and prioritise the material issues for the organisation and its stakeholders and ensure alignment with the **new Strategic Plan in effect at the Bank for 2021-2023**.

Methodology

Ibercaja has carried out its own methodology structured in **4 phases** of work and aligned with the standards on the subject (Global Reporting Initiative), stakeholders' requirements, and the best practices in the market. These 4 phases are:



1. Definition of key stakeholders for the materiality study.

Ibercaja has identified its priority stakeholders based on the materiality study. For each of them, the method of participation has been defined, the channels of communication and dialogue that the Entity has established to identify expectations and interests, and the method through which the relevant issues for these stakeholders will be assessed and prioritised.

According to the company's stakeholder map, those of a **priority** nature have been taken into account in the identification and prioritisation of issues of special relevance:

- **Customers**: various communication channels are used, such as regular surveys, suggestion boxes and customer service, among others.
- **Ownership and Investors**: a specific shareholder questionnaire was developed for materiality analysis and rating surveys, meetings, etc.
- **Employees**: an open survey of the entire workforce has been carried out; there is an internal employee portal, and regular focus groups, and an employee experience survey are conducted.

- **Suppliers**: There is an Ibercaja supplier portal, and a specific survey has been carried out for this analysis.
- **Company**: regular surveys, media and social media monitoring, etc. are conducted.
- **Competitors and benchmarks**: analysing public documentation from competitors in the sector and participating in industry associations to gain insight into trends and priorities.
- **Public Administrations**: legislation and regulatory requirements in ESG matters are analysed.
- **Media and opinion leaders**: media searches were carried out regularly and external experts are consulted.

2. Identification and assessment of relevant issues:

An **exhaustive internal and external analysis** has been carried out to **identify** and define the key ESG issues that should potentially guide Ibercaja's strategy and actions, and information reporting.

Internal analysis, where they have been evaluated:

- The **Plan Estratégico Desafío 2023** (Challenge 2023 Strategic Plan) and the Sustainability Roadmap, as essential pillars on which the relevance of Ibercaja's materiality is based.
- Commitments assumed by Ibercaja with respect to its stakeholders: **Code of Ethics**, **Corporate Purpose**, Mission, Vision and Values, manuals, regulations and corporate policies, among others.

- Results of the communication established in the usual channels with stakeholders (surveys, reports, mailboxes, meetings, questionnaires, etc.) and other specific analyses carried out.

External analysis, which has collected:

- **Regulatory requirements** and **recommendations** on ESG and Sustainable Finance.
- **Best practices and trends** in sustainability, focusing on sector-related aspects and the relevant issues gained in the financial industry.
- **External requirements and demands**: Media analysis, rating agencies' requirements, analysts and investors, among others.
- **Initiatives, partnerships and standards**: Global Reporting Initiative, WEF-IBC, Sustainable Development Goals, TCFD, etc.

The internal and external information analysis has been carried out with the aspiration, on the part of Ibercaja, to include a broad time horizon, taking into account the demands of the different stakeholders in the medium and long term, as far as possible. In this way, aspects such as Ibercaja's strategy, the regulatory roadmap for the coming years, trends in sustainability, as well as the future commitments assumed by the Institution have been considered.

From the internal and external analysis, Ibercaja obtained a list of **90 specific topics**, grouped into 15 relevant topics, aligned with industry expectations and responded to the programmes and initiatives included in the Bank's Desafío 2023 Strategic Plan.

Assessment of relevant issues:

Once the relevant issues had been identified, an internal and external consultation was carried out by means of **personalised questionnaires** for the main stakeholders to determine their priority, from the perspective of "Importance for Ibercaja" and "Importance for stakeholders", which will form the basis of the materiality matrix.

Importance for Ibercaja

Corporate Divisions

Business Divisions

Financial Group

Fundación Ibercaja

Importance for Stakeholders

Customers

Shareholders and Investors

Employees

Suppliers

Society at large

Opinion leaders

3. Prioritisation of material issues

The results of the assessments were structured in a materiality matrix reflecting the **priority** of the **15 relevant issues** identified.

Very high priority

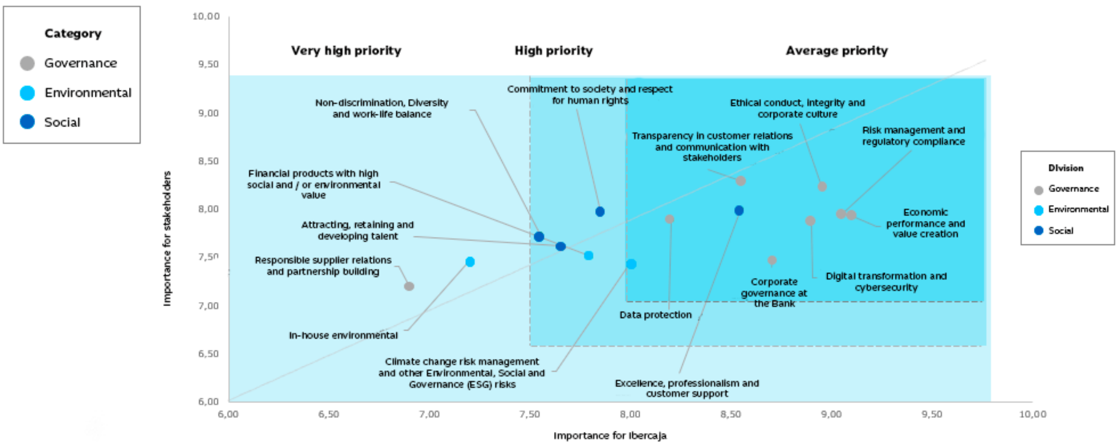
- Strategic aspects related to the generation of value for customers and shareholders and increased transparency towards all stakeholders.
- High standards of regulatory compliance and risk management.
- Highest standards in corporate culture, ethics and integrity.
- Digital transformation and cybersecurity.
- Excellence, professionalism and support in excellent customer service.
- Compliance with Corporate Governance best practices and standards.
- Ensuring absolute data privacy.
- Integration ESG aspects, and specifically those related to Climate Change, into the business and risk management.
- Transparency in customer relations and communication with stakeholders.

High priority

- Commitment to society and respect for human rights.
- Attracting and developing the best talent.
- Implementation of diversity, equality and work-life balance policies.
- Creation of products with high social and/or environmental value.

Average priority

- In-house environmental management.
- Conveying Ibercaja's commitments along its value chain.



The materiality matrix shows that all of Ibercaja's material issues are highly important **to both the Bank and its stakeholders**. Compared to the last materiality analysis in 2018, the relevant issues have evolved in 2021. These are strongly influenced by the regulatory environment and the current socio-economic context, including the pandemic. As a result of this analysis, the themes classified as "very high" priority in 2021 align with the Bank's strategic objectives. These issues include:

- Strategic aspects related to the **generation of value** for customers and shareholders, as well as increased transparency towards all stakeholders.
- Maintaining the highest standards in **ethics, integrity and corporate culture** of the Bank and high standards of regulatory compliance and risk management.
- The **digital transformation, transparency, communication and excellence in customer service** continue to be priorities for Ibercaja, as well as guaranteeing total data privacy.
- The integration of ESG aspects into business and risk management, particularly those related to climate change, also has the highest priority, reflecting the Bank's **commitment to sustainability** and the **fight against climate change**.

4. Impact analysis according to the dual perspective of materiality

The **dual perspective of materiality** is designed to **assess the impacts generated by the Bank on the environment and society**, as well as the **impacts that the environment may have on the business and the company**. It is an "inside-out" and "outside-in" analysis.

Ibercaja has analysed the qualitative impact of the very high priority themes based on this dual perspective:

Material issue and definition	Main environmental impacts on Ibercaja	Ibercaja's impact on the environment	SDG related
Ethical conduct, integrity and corporate culture Compliance with ethical principles and the specific commitments subscribed to voluntarily by the organisation and actions to improve the image and principles on which Ibercaja's Corporate Culture is based.	The correct management of these aspects is reflected in an improvement in Ibercaja's reputation with its stakeholders, ensuring regulatory and ethical compliance. To this end, the Entity must maintain a constant drive for employee training and stringent monitoring practices in these areas.	Having a corporate culture of integrity and ethics enhances trust in stakeholder relations while placing greater demands on all stakeholders. This results in increased investment security and increased job stability as the risk of regulatory non-compliance is reduced. This behaviour positively impacts stakeholders, who are favoured in this way. By demanding that they behave in the same way, they transfer these principles to the	8 DECENT WORK AND ECONOMIC GROWTH 10 REDUCED INEQUALITIES 16 PEACE, JUSTICE AND STRONG INSTITUTIONS
Risk Management and Regulatory Compliance Risk management model and compliance with applicable legislation and corporate policies and commitments.	Rigorous and continuous compliance is essential to avoid potential non-compliance and sanctions, which in turn boosts business stability and enhances reputation and stakeholder relations. In addition, it promotes the training of its employees on these issues and the supervision of monitoring systems in the three lines of defence.	Proper management of this aspect leads to greater confidence on the part of public administrations and greater security for the Bank's investors, employees, and suppliers due to a lower risk of non-compliance. In addition, the management of this aspect directly contributes to SDG 16.	16 PEACE, JUSTICE AND STRONG INSTITUTIONS 17 PARTNERSHIPS FOR THE GOALS
Economic performance and value creation Maintain adequate economic performance to ensure profitability, solvency and value creation for shareholders and investors.	A good economic performance will improve Ibercaja's positioning and stability, as well as attract new customers and investors attracted by a solvent and stable business. Ibercaja will maintain solvency controls and will continue to invest in training and recruiting the best team to achieve the solvency targets set by the Institution.	Creating value and economic profitability is key to consolidating the long-term stability of relations with stakeholders such as investors, customers, employees and suppliers and fosters their confidence in the Bank's profitability and solvency. Adequate economic performance and the creation of value for its shareholders enable the improvement of shareholders and society in general through the social action of its shareholder foundations.	8 DECENT WORK AND ECONOMIC GROWTH 11 SUSTAINABLE CITIES AND COMMUNITIES 12 RESPONSIBLE CONSUMPTION AND PRODUCTION 17 PARTNERSHIPS FOR THE GOALS

Transparency in customer relations and communication with stakeholders Mechanisms to ensure adequate, clear and transparent communication with stakeholders to manage expectations and identify and respond to their requirements.	Transparency is a key aspect of the relationship with stakeholders, which translates into better communication with more straightforward and more accessible channels of dialogue, which will allow greater alignment with their expectations of information and an improvement in the perception of investors and rating agencies. In addition, maintaining transparency and quality information requires the need to maintain efficient and secure communication channels, as well as to establish control procedures to ensure confidentiality in data storage and	Generating trust for all stakeholders, including customers, as the management of this aspect improves accessibility to the Entity's information. Likewise, the management of this aspect improves communication with stakeholders and, therefore, identifies their expectations, thus providing a better response to their needs. Furthermore, generating value for the investor can be highlighted, as it improves traceability in Ibercaja's operations and business, as well as more agile participation and more effective decision-making.	8 DECENT WORK AND ECONOMIC GROWTH 16 PEACE, JUSTICE AND STRONG INSTITUTIONS 17 PARTNERSHIPS FOR THE GOALS
The Entity's Corporate Governance policy Compliance with best practices in good corporate governance (including those aspects related to ESG governance).	Having a diverse, integral and capable Corporate Governance ensures correct decision making in the Entity, which translates into greater stability, reduced reputational risk and improved process efficiency. These aspects are directly related to attracting customers and investors. The governance structure must meet the objective of oversight, validation and control without impacting the loss of operational efficiency by slowing down decision-making.	Greater trust in Ibercaja and the establishment of more stable and lasting relationships, as a result of greater business stability, lower risk of default and proper management and decision-making (including ESG aspects). Shareholders benefit from good corporate governance as it provides stability, profitability and value creation. Compliance with best practices in corporate governance also benefits society and other stakeholders in general.	8 DECENT WORK AND ECONOMIC GROWTH 16 PEACE, JUSTICE AND STRONG INSTITUTIONS 17 PARTNERSHIPS FOR THE GOALS
Digital transformation and cybersecurity Identification and implementation of new digital solutions to streamline internal processes, boost efficiency, open up business opportunities and improve the customer experience while ensuring maximum system security and data protection.	Digitisation has a significant impact on increasing the efficiency and speed of processes. It is also associated with a reduction in costs and impacts on the environment, resulting from a digital service that requires less use of natural resources. In addition, the digitalisation process increases the need for investment in cybersecurity, given the possible risk of cyber-attacks, as well as the need to incorporate specialised human resources and tools (e.g., the use of cyber-attackers): Apps such as Ibercaja Pay).	Customers benefit from a more accessible, immediate and efficient service in their transactions (e.g. My manager), which in turn can be a difficulty for customers less familiar with digital services, who will receive the necessary support. In turn, employees and suppliers will see Ibercaja's demands in these areas increase and will have to train and adapt to an increasingly digital environment. Commonly for all stakeholders, digitalisation and cybersecurity improve relations with Ibercaja, resulting in a more agile, traceable and secure relationship.	8 DECENT WORK AND ECONOMIC GROWTH 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE
Excellence, professionalism and support for the customer Operations implemented by the Entity in order to achieve excellence in the provision of its services and the highest quality perceived by customers, and to continue to promote proximity and tailored solutions.	Ibercaja, with its professional and excellent service, has the potential to attract and retain customers, which translates into greater stability and business growth and, therefore, greater attraction and loyalty of investors. Ibercaja will continue to invest in the training of its team and innovation in order to continue providing the best personalised service.	Customers require quality and personalised services tailored to their needs and expectations. Among others, Ibercaja has improved accessibility with tools such as Ibercaja Próxima and the protection and support of the most vulnerable groups, for example, through the Retail Trade Support Plan. This range of services and the specialisation demanded translates into a higher demand for suppliers and employees. Proper management of this aspect translates into greater confidence, stability and value creation for all stakeholders.	8 DECENT WORK AND ECONOMIC GROWTH 17 PARTNERSHIPS FOR THE GOALS

Data protection

Management model that guarantees maximum protection of stakeholder data.

To the extent that Ibercaja responsibly manages the privacy and confidentiality of its stakeholders' data, damages and losses are avoided, and possible risks of non-compliance are reduced. Ibercaja ensures compliance with the controls implemented to avoid reputational and economic damage due to privacy breaches, sanctions or loss of personal data integrity.

Stakeholders have the right to control the use of their personal data with regard to the right of access, rectification and deletion. The modification of the personal data of customers, employees or other stakeholders (destruction, loss, theft, misuse, etc.) can lead to moral and financial damage and loss of trust. Proper management of them, therefore, generates confidence in all groups.

Climate Change Risk Management and other Environmental, Social and Governance (ESG) Risks

Identifying and managing ESG risks (including risks associated with climate change) and integrating them into Ibercaja's risk model.

Ibercaja's management of these risks results in Ibercaja's business being less exposed to them and greater alignment with regulation and stakeholder expectations. The current focus is on climate change risks. Ibercaja will continue to make progress in identifying and managing these ESG risks to meet regulatory and stakeholder expectations. This will enhance the Bank's solvency and reputation.

The management of this aspect allows Ibercaja's customers to have support and backing in the transition processes of their businesses (companies) and their personal contribution (individuals), towards a sustainable, low-carbon economy. While funding requirements may be tightened for activities with higher exposure to climate risks, the future benefit will reward this approach. The correct management of these aspects improves stakeholder confidence in Ibercaja as a result of greater alignment with the 2030 Agenda, the 2015 Paris agreement, the TCFD recommendations, legal requirements and complete climate risk management.

Rigour

Throughout compiling and presenting the information, **Ibercaja has had in mind the principles of balance, precision, clarity, periodicity and reliability** necessary to guarantee the maximum quality of the information contained therein.

External audit review

Ernst & Young, S.L. has issued an independent assurance report, with limited assurance scope in accordance with the ISAE 3000 (Revised) Standard, on the non-financial reporting and diversity indicators that respond to Law 11/2018, on the indicators that respond to the GRI Standards under the "Core" compliance option and on the Financial Services Sector Supplement of the GRI G4 Guidelines, in addition to the United Nations Principles for Responsible Banking (UNEP FI), as well as the requirements set out in Article 8 of Regulation (EU) 2020/852 of the European Parliament and of the European Council on establishing a framework to facilitate sustainable investments (known as the EU Taxonomy Regulation). This Report is included in the "Independent Verification Report" Appendix of this document.

Finally, Ernst & Young, S.L. has issued an Auditor's Report on Information related to the Internal Control over Financial Reporting (ICFR) System, which is included as an Appendix to the Annual Corporate Governance Report.

4 Presentation of the Group and its context

4.1. Description, shareholding and organisational structure

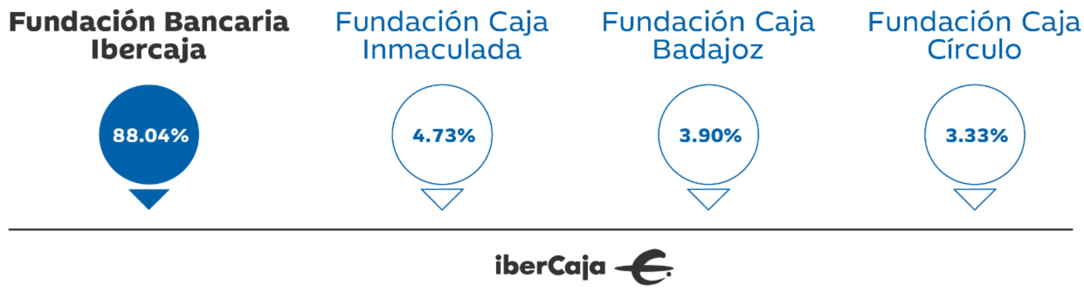
102-1, 102-2, 102-5, 102-45

> Ibercaja is a national banking entity specialised in the business of individuals and companies, whose objective is to generate value for its

The **Group primarily engages in retail banking, and carries out practically all of its business in Spain**. Its corporate purpose extends to all manner of general banking activities, transactions, business, contracts and services permitted under prevailing law and regulations, including investment and auxiliary services.

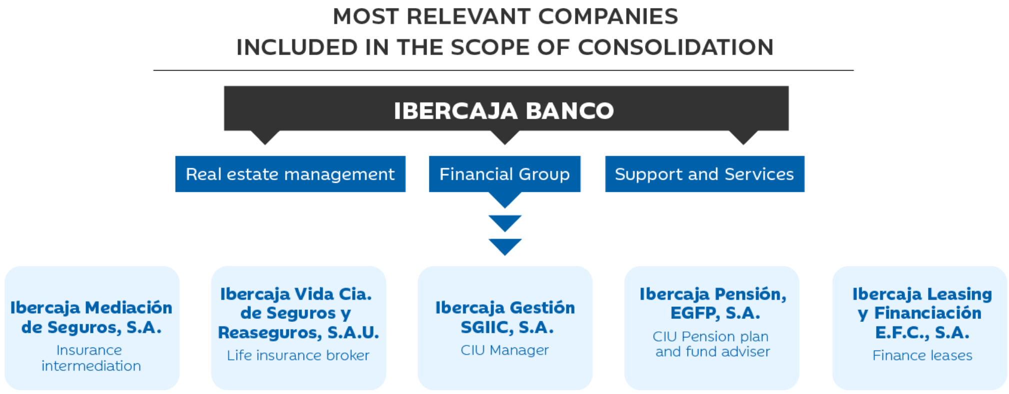
The Bank was created in 2011 following the spin-off and transfer to Ibercaja Banco of the financial business of the former Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja, now transformed into the Ibercaja Banking Foundation, in accordance with the provisions of the Banking Foundations Act. **In 2013, the Bank absorbed Banco Caja3**, an entity formed as a result of the spin-off and subsequent merger of the financial business of three former savings banks: Caja de Ahorros de la Inmaculada (currently Fundación Caja Inmaculada), Caja Badajoz (currently Fundación Caja Badajoz) and Caja de Ahorros Círculo de Burgos (currently Fundación Caja Círculo), which have since been transformed into foundations and are the Bank's current minority shareholders, together with Fundación Bancaria Ibercaja, which is its majority shareholder.

Shareholder Structure



From an organisational standpoint, **the Bank is the parent of a group of subsidiaries**. Of these, the most notable (due to their wide range of banking products and high levels of profitability) belong to the **Financial Group**, which comprises companies specialising in investment funds, savings and pensions, bancassurance and leasing/renting.

Organisational Structure



4.2 Purpose, mission, vision, values and Code of Ethics

102-2, 102-16, 102-40, 102-42

> We are a different kind of bank, driven by a corporate purpose focused on people and the environment. The mission, vision and values define this purpose and define our way of banking and the value proposition for

Corporate Purpose

Ibercaja's Corporate Purpose is **"To help people build the story of their lives because it will be our story"**. It is the Bank's raison d'être, which gives meaning to its professionals' daily work and is very present in its strategy. Ibercaja works by and for people; it wants to help, accompany and support them in their life decisions, building and walking together with mutual commitment.

For this Purpose to be fully present in all business decisions, to be visible, known and shared by the entire Organisation and to mobilise action, Ibercaja is working on **its activation** within the framework of the new **Desafío 2023 Strategic**

It is carried out through one of the Purpose and Sustainability Initiative Challenges. The aim is for the Corporate Purpose to be reflected in **our way of banking** and to be a lever for competitive differentiation. To this end, it has communicated internally and externally, proactively and systematically, and is developing the **Culture and Purpose project**, defining the Entity's relationship model based on the pillars of the Purpose.

Purpose is the cornerstone of our corporate culture and the challenge is for it to be present in the daily behaviour of all Ibercaja's professionals and in decision-making, providing a differential value that is sustained over time. Our aim is for the Purpose to be perceived by customers and for it to be present in all interactions with them and in the Entity's value proposition, so that they feel that we accompany them at the most important moments, in accordance with their needs and expectations. We are also working on the external activation of the Purpose, identifying the main levers in our area of action, which will help us to transform and improve the territories and the lives of their people.

The Purpose is completed by the **mission** and **vision**, based on the Bank's **corporate values**, which have marked the Bank's path since its foundation.

Mission

Ibercaja's mission reflects how the Institution should act to achieve its Purpose: **to improve the lives of families and businesses**, helping them manage their finances to give the customer efficient service and a personalised and quality advice, which will help the bank achieve its

MISSION

Contribute **to improve the life** of families and companies, **helping them to manage** their finances by offering a **personalised global financial service**, so they can attain their own objectives

Since its origins, Ibercaja has been committed to society and works on generating resources that are returned to society through shareholder foundations.

Ibercaja understands that, in the carrying out its activity, its contribution to society and the environment makes the company more robust and more sustainable. Therefore, it accepts the triple challenge of generating business, social and environmental benefits to drive the transition towards a more sustainable economy.

Vision

The **vision** sets the path for the Entity to follow, towards what we want to be, towards **our goal**: to be an excellent bank. Our commitment to our stakeholders and to caring for the environment focuses on promoting sustainable development, preserving natural resources and promoting a fairer and more inclusive society.

Values

Ibercaja's corporate values define its business culture and have guided its path since its beginnings. They are the basis of the entity's ethical commitments, reflected in its **Code of Ethics**.

Ibercaja Code of Ethics

The Entity has an **"Ethics Model"** consisting of:

Ibercaja's **Code of Ethics**, a key element that reinforces the Bank's corporate culture and ethical approach to management. The Code contains the Bank's ethical commitments and the principles of action that must be present in the day-to-day work of the people who make up Ibercaja, to make its corporate values

The **key principles** of conduct that define us and shape our ethical culture are:

- We are **rigorous**: we know and follow the rules
- We are **honest and trustworthy**
- For us, **the customer takes centre stage**
- We are **role models**
- **We take care of the** Bank's reputation and look after information
- We **take care in the use of the Entity's media**
- We are **committed to our environment**

The approval and subsequent updates of the Code are the responsibility of the Board of Directors.

To ensure that all employees are aware of and comply with the Code of Ethics, it is available in the Internal Regulations. In addition, reminders are regularly included in the Daily Information published for all staff. In addition, in 2022, we plan to carry out a **training workshop** on **Corporate Culture and Ethics** for all Ibercaja employees, which will serve to strengthen and consolidate these principles, as well as the values and behaviours that define our different way of banking.

The **Ethical Management Handbook**, which establishes the internal functions and processes necessary to ensure the implementation of the Code.

The **whistleblower channel**, which is a specific and independent channel for reporting possible violations of the Code and for queries about its interpretation. The communications received are treated confidentially, guaranteeing the protection of the people who use it and in accordance with data protection regulations. All of them are analysed by the Brand, Reputation and Sustainability Department, with the assistance of the competent departments or units in each case, reporting periodically on them to the Reputation and Sustainability Committee, which, where appropriate, will inform the competent governing bodies.

*Also included on the corporate website is www.ibercaja.com an **e-mail address** (rsc@ibercaja.es) to which anyone can send **queries about the Bank's Code of Ethics**.*

To ensure this channel's correct functioning and use, periodic reviews are carried out by Internal Audit. **Employees have a Whistleblower Channel** to report any violations of the Code of Ethics.

Corporate Brand

The Bank's **brand**, both internally and externally, is one of Ibercaja's most valuable intangible assets: it represents our identity, our values and our Corporate Purpose, and makes them visible at every point of contact with customers and society.

"El Banco del vamos" communication concept responds to our brand DNA, the result of our 145-year history, and helps convey our Corporate Purpose.

This concept is developed in all institutional and commercial actions, our positioning and our communication style. It helps us show ourselves as a Bank that is approachable, transparent, honest in the information we offer, proactive, committed and dynamic, where people and their important moments in life are at the centre of our decisions.

In 2021, within the framework of the new Strategic Plan, taking into account the major transformation of the sector and society at large, the positioning (the perceived attributes of the Value Proposition) and notoriety of Ibercaja in the market have been analysed, with the aim of designing the strategy to transfer the positioning (current or evolved) to the process of commercial attraction and loyalty, defining how it declines in commercial management for each of the priority financial needs.

The final objective is to define the key levers that will make Ibercaja a more attractive and differential project for the different stakeholders.

4.3 Economic and financial environment

103-1

> Economic recovery consolidates despite the persistence of the pandemic.

World economic landscape

The recovery of the **global economy** **has been consolidated throughout 2021**, despite the persistence of the pandemic with its different waves and the emergence of new SARS-CoV-2 variants. The IMF estimates that **global GDP growth reached 5.9% after the -3.1% drop in 2020.** This would have exceeded pre-crisis output levels.

According to these estimates, growth would have been higher in emerging countries (6.5%) than in developed countries (5.0%), which, moreover, were coming from a larger decline in 2020 (-4.5% versus -2.0%). The different impact of the pandemic by country and by economic sector has meant that, despite widespread growth in 2021, not all economies and not all industries have fully recovered.

China's economy was the first to emerge from the crisis and **grew by 8.1% in 2021, after 2.3% in 2020**. However, beyond the base effect of the statistics, there is a slowdown in growth linked to the lower dynamism of the construction and real estate sectors, which is prompting the authorities to implement expansionary fiscal and monetary policies.

The US economy led the recovery among Western countries, and its GDP was already higher than before the pandemic in the second quarter of 2021. **For the year as a whole, it would have grown by 5.6% after falling by -3.4% in 2020**. The labour market has shown a good tone throughout 2021, although employment has not recovered to pre-pandemic levels.

On the negative side, the rapid improvement in demand, in many cases outstripping the pace of supply recovery, has led to sharp price rises. Moreover, the generous fiscal policy to combat the crisis has aggravated the situation of public accounts that were already starting from a significant imbalance.

GDP trend by country (BASE 100=4Q19)

The greater severity of restrictions in the face of the various pandemic waves delayed the recovery of the **Eurozone** compared to other advanced regions. However, **from the second quarter onwards, the economy gained traction and could have ended the year with a GDP growth of 5.2% according to initial estimates,** which, however, would be insufficient to overcome the sharp fall it experienced in 2020 (-6.5%). Country developments have been highly dispersed due to the measures taken to curb the coronavirus and the relative dependence of the sectors most affected by these constraints. Moreover, fiscal policy has been more or less expansionary depending on the state of public finances, something that could change from 2022 thanks to the implementation of the Next Generation EU funds. The labour market recovery has been faster than expected, and the unemployment rate is already lower than before the pandemic. However, it continues to vary sharply across countries, from full employment in the Netherlands and Malta to double-digit rates in Greece and Spain.

Monetary policy and financial markets

Monetary conditions remained very loose throughout 2021. However, the increase in inflationary pressures in the latter part of the year is causing a change in the orientation of the **central banks** after years of fighting the risk of deflation. Price acceleration is more structural in the US, which may lead to intervention rate hikes in the coming months, while in Europe, quantitative easing will continue with debt purchases at least until the end of the third quarter of 2022, and intervention rate hikes are not expected at least until the end of the year.

2021 was a very positive year for most stock markets. The US S&P 500 rose by 26.9% and the European Stoxx 600 by 22.2%. The Ibex lagged somewhat behind with a rise of 7.9% and a close below the year's highs. All Stoxx 600 sectors closed 2021 in positive territory. The largest increases were in banking (34.0%), technology (33.7%), media (31.7%) and construction (31.1%). Only two sectors did not show double-digit gains: electricity (5.4%) and travel and leisure (3.7%).

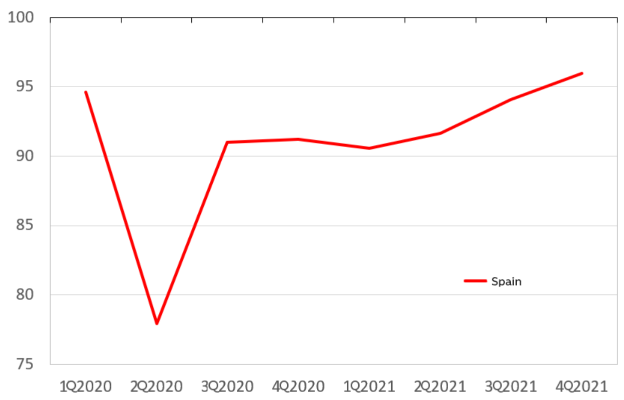
Interest rates on government debt remained at very low levels by historical standards in 2021, although there was some recovery from the lows reached in 2020. This rise could continue in 2022 due to rising price pressures and less expansionary central bank policies. **The 12-month Euribor traded around -0.50% for most of 2021; however,** this may change as upward movements in intervention rates begin to be priced in.

The Spanish economy

The recovery of **Spanish GDP** was somewhat disappointing during the first half of the year before gaining momentum in the second half. **In 2021 as a whole, GDP grew by 5.0%** according to the INE's first estimate, which is meagre if we take into account the -10.8% drop in 2020. Among the European economies that have published data, Spain remains the furthest away from pre-crisis output levels. The insufficient return to normality of the sectors most affected by the pandemic, which have a greater relative weight in the Spanish economy, and of private consumption explain this worse relative performance. The high savings generated during the previous year were channelled not into consumption but into investment, which was reflected in the good real estate figures, but not in GDP.

GDP in Spain (BASE 100= 4Q19)

Relative to 2019, **GDP** in 2021 was still **-6.4%** lower despite the aforementioned 5.0% rebound.



The insufficiency of the recovery was evident in the gross value added of professional and administrative services (-12.6% in 2021 compared to 2019), construction (-14.9%), trade, transport and accommodation (-15.5%) and entertainment and other services (-25.0%). In addition, financial services (13.7%), public administration, education and health (3.4%) and real estate activities (2.3%) performed well.

The **labour market** **surprised favourably by recovering much faster than output,** the opposite of the usual post-crisis behaviour. On average over the year, the number of employed was virtually the same in 2021 as in 2019 and exceeded it by 1.1% in the fourth quarter according to LFS data. The unemployment rate fell to 14.8% on the annual average (13.3% in the last quarter) from 15.5% in 2020 and 14.1% in 2019. The number of ERTE workers fell from 925,000 in February to 126,000 in December.

> **GDP GROWTH**
>
> *The recovery has accelerated in recent quarters, and this dynamism may continue in the coming quarters, provided that activity continues to return to the sectors most affected by the pandemic. For future growth, beyond the mere rebound effect, it is essential to recover lost productivity, something to which the European Next Generation funds can contribute.*

The increase in energy prices has conditioned the behaviour of **inflation**. CPI accelerated from -0.5% in December 2020 to 6.6% in December 2021, with an annual average of 3.1% (after -0.3% in 2020).

Banking and regulatory environment

The Spanish banking system has played a key role in mitigating the effects of the pandemic on economic activity and, in collaboration with the authorities, in facilitating financing for households and businesses to meet their financial obligations in the current adverse context. **It is also a key factor in the recovery,** maintaining the flow of credit to finance the investment necessary to modernise the productive fabric and the transition towards a more sustainable economy. However, the sector faces important challenges, including the following: improving profitability that recurrently offsets the cost of capital, progress in digitisation, competition with new, less regulated players such as technology giants and Fintech companies, risks linked to cybersecurity, climate risk management and sustainable finance, and the uncertainties still hanging over the effects of the phasing out of support measures for businesses and households.

The **system's credit to households and companies is up 0.3% year-on-year**. Financing to non-financial companies rose 0.2% after overcoming the setbacks recorded during most of the year due to the base effect caused by the increase in financing for productive activities in the first months of 2020 under the ICO lines guaranteed by the State. Lending to households increased by 0.3% due to the momentum, observed in the last part of the year, of both lending for house purchases and consumer credit, which rose 1.1% and 1.4%, respectively.

The **retail deposits** in the system **rose 5.6% in the last twelve months.** Although the momentum generated by the health crisis has slowed, the increases are still significant. In companies, the variation reaches 8.9%, compared to 14.7% in December 2020, while in households, it rises by 4.6% vs 7.5% at the end of 2020. **Investment funds** increased their assets by **15.7% year-on-year,** both in terms of net contributions and returns obtained in a very positive scenario for the stock markets.

The effect of the pandemic on economic activity has not been reflected, in contrast to what was observed in previous crises, in an increase in non-performing loans contained mainly by public support measures such as ERTE, guarantees for access to credit and moratoriums. With data to November, the balance contracted by 4.7% compared with December 2020. The **NPL ratio** of credit to the resident private sector for credit institutions as a whole stood at **4.29%, 22 basis points lower than at the end of 2020**. However, the risk of credit quality deterioration in the economic sectors hardest hit by the crisis persists. Loans classified under special surveillance have increased, with the latest known data as at September, by 53% year-on-year, while refinanced or restructured loans, after declining in the pre-pandemic quarters, have moved to positive rates of change. After the extraordinary increase in 2020 in anticipation of future risks, asset impairment charges have been reduced to 2019 levels.

In the **regulatory sphere,** the Bank of Spain published **Circular 5/2021 on 22 September**, amending Circular 2/2016 of 2 February on the supervision and solvency of credit institutions, to develop certain macroprudential instruments, which make it possible to establish a countercyclical capital buffer requirement in specific sectors, limits on the sectoral concentration of credit in relation to bank capital, and requirements on the criteria for granting credit.

The Bank of Spain, by means of **Circular 6/2021 of 22 December,** has amended Circular 4/2017 of 27 November to credit institutions on public and confidential financial reporting standards and financial statement formats, and Circular 4/2019 of 26 November to financial credit institutions on public and confidential financial reporting standards and financial statement formats. The objective of the standard is to preserve the convergence of Spanish accounting regulations with the International Financial Reporting Standards adopted by the European Union (EU-IFRS).

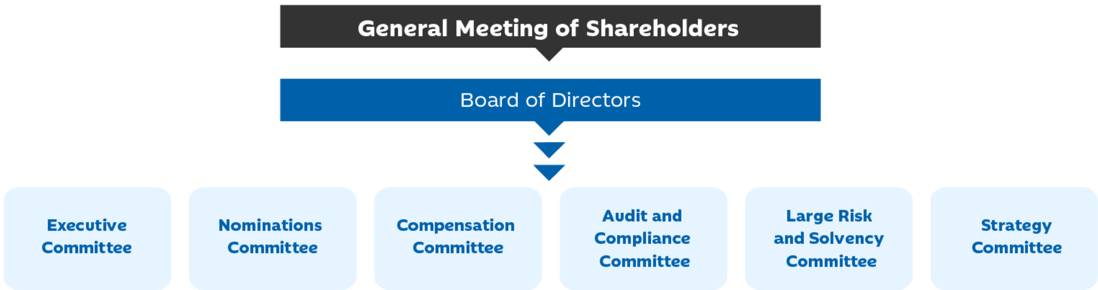
The **European Commission published on 27 October a proposal for a review of the regulation applicable to the banking sector**, which includes **legislative changes to implement the Basel III agreement**, taking into account the particular characteristics of the European banking sector. The proposal aims to strengthen the resilience of EU banks, without leading to significant capital increases, and introduces an extended transitional period, starting for some aspects in 2025. It also introduces rules on the management, monitoring and reporting to third parties of environmental, social and governance (ESG) risks, in line with the objectives set out in the EU Sustainable Finance Strategy.

4.4 Corporate governance

102-15, 102-16, 102-17, 102-18, 102-19, 102-20, 102-22, 102-23, 102-24, 102-25, 102-26, 102-28, 102-30, 102-31, 102-32, 102-35, 102-36, 103-1, 103-2, 103-3, 405-1

> Ibercaja's governance structure carries out its functions efficiently, guided by the rules and codes of good corporate governance.

The **internal governance model** consists of the **General Meeting of Shareholders and the Board of Directors,** which has an Executive Committee and five advisory committees.



The Ibercaja Group's governing bodies, along with their composition and their internal rules, are governed by the **Articles of Association and the Regulations of the Board of Directors**, the contents of which are compliant, among other regulations, with the law on the organisation, supervision and solvency of credit institutions, the Corporate Enterprises Act, the Audit Act, the guidelines issued by international bodies such as the EBA or the ESMA, and the Code of Good Governance of Listed Companies, which is taken as a benchmark of best practices in this field. **In this respect, it should be noted that**:

1. Separation of functions between the non-executive Chairman and the executive CEO.

2. The independent status of 55% of the members of the Board of Directors.

3. The chairmanship of all advisory committees by an independent director.

The **composition, independence** and manner of action of the governing bodies, the **codes of conduct and internal rules** of mandatory compliance, the established **monitoring systems**, the **communication policy and transparency**, the **fight against fraud and corruption** and **confidentiality in the handling of information** all form the **basis of Ibercaja's corporate governance**.

General meeting of shareholders

The General Shareholders Meeting is the **most senior decision-making body at the Bank** and its resolutions are binding on the Board of Directors. The General Meeting has the broadest of authorities to govern the Bank and may validly adopt resolutions regarding any matters submitted for deliberation, in accordance with applicable law and the Bank's own Bylaws.

The functioning of the General Shareholders Meeting is regulated in section 5 of the Articles of Association, which are accessible through the corporate website www.ibercaja.com in the Shareholders and Investors section (https://www.ibercaja.com/accionistas-e-inversores/gobierno-corporativo-y-politica-de-remuneraciones), setting out in articles 13 to 23 the regulation of the Meeting, the place and time of the meetings, the right to attend and representation, the rules governing the constitution of the general meeting, the drawing up of attendance lists, deliberation, the casting of remote votes prior to the meeting and the adoption of resolutions.

Board of Directors

Meanwhile, the Board of Directors has the **broadest of authorities to manage, administer and represent the Bank** and, except for those matters reserved for the General Meeting, it is the highest decision-making body at the Bank. The Board has six committees: Delegate Committee and the internal advisory committees on Appointments, Remuneration, Audit and Compliance, Major Risks and Solvency and Strategy.

The composition of the Board of Directors on 31 December 2021 was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr José Luis Aguirre Loaso	Proprietary
First Deputy Chairman	Mr. Jesús Máximo Bueno Arrese	Proprietary
CEO	Mr Víctor Manuel Iglesias Ruiz	Executive
Member	Ms Gabriela González-Bueno Lillo	Independent
Member	Mr José Miguel Echarri Porta	Proprietary
Member	Mr Vicente Cóndor López	Independent
Member	Mr Jesús Solchaga Loitegui	Independent
Member	Mr Jesús Tejel Giménez	Independent
Member	Mr Félix Santiago Longás Lafuente	Independent
Member	Mr Luis Enrique Arrufat Guerra	Proprietary
Member	Ms Maria Pilar Segura Bas	Independent

9.1	**36.36**	**54.54**	**25**
% of Executive Directors	% of proprietary Directors	% of independent Directors	Number of meetings

Composition of the Board of Directors

All appointments of the members of the Board of Directors have been favourably reported by the Appointments Committee, prior to their formal appointment, and have been subject to the mandatory individual and collective evaluation, in accordance with the terms established in the Policy for the assessment of suitability and diversity of directors and senior officers of the Bank, as required by current legislation.

The academic background, experience and professional career of the directors is available on the Entity's corporate website https://www.ibercaja.com/accionistas-e-inversores/gobierno-corporativo-y-politica-de-remuneraciones/consejo-de-administracion).

According to article 28 of the current statutes, directors shall hold office for a term of four years and may be re-elected one or more times for terms of the same duration. The appointment of the directors shall lapse when, upon expiry of the term, the next general meeting has been held or the legal term for convening the meeting that is to decide on the approval of the accounts of the previous financial year has elapsed.

As at 31 December 2021, the average term of office of directors was five years, taking into account that the current Chairman and Vice-Chairman were appointed as directors on the occasion of the incorporation of Ibercaja Banco in 2011, and that a proprietary director was appointed in October 2021.

The Chairman of the Board of Directors, Mr José Luis Aguirre Loaso, informed the Board of his intention to resign for reasons of age once the accounts for the 2021 financial year had been drawn up. The Board agreed to initiate the process of succession of the non-executive Chairman, such process being directed by the Appointments Committee, which has been assisted for this purpose by external specialist advice.

On 17 December 2021, at the proposal of the Appointments Committee, the Board of Directors unanimously agreed to propose Francisco Serrano Gill de Albornoz as a candidate for non-executive Chairman of the Board. This proposal is conditional both on the European Central Bank's positive assessment of the candidate's suitability and, should this take place, on the Bank's General Meeting of Shareholders appointing the candidate as a director. Pending this process, Mr Aguirre Loaso will continue to serve as non-executive Chairman.

Executive Committee

The **powers delegated** by the Board of Directors to the Executive Committee are expressly set out in the **Board of Directors' Regulations** and are as follows:

- Hear and adopt resolutions regarding proposals to grant, modify, novate or cancel risk transactions that fall within its competencies under the Policies and Procedures Manual to manage lending risk approved by the Board of Directors. It will also hear and adopt resolutions regarding proposals to acquire assets by the Entity in lieu of receivables that must be submitted to the Committee in accordance with the Asset Management Policies and Manuals.
- Hear and adopt resolutions regarding personnel matters (disciplinary cases, granting of leaves of absences, etc.), except in those cases in which the decision falls to the CEO or to the plenary Board of Directors' Meeting, since it involves employees that report directly to the CEO.
- Shall hear and adopt resolutions regarding matters relating to the Entity's assets (properties, expenses, purchases, etc.) and investments and divestments in investee companies that must be submitted for its consideration in accordance with internal Policies and Manuals, except for those that shareholders must decide at a General Meeting in accordance with the law.
- When appropriate, shall grant the necessary or advisable authority to execute the resolutions adopted.

The composition of the Executive Committee as at 31 December 2021 was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr José Luis Aguirre Loaso	Proprietary
Member	Mr Víctor Manuel Iglesias Ruiz	Executive
Member	Mr Vicente Cóndor López	Independent

% of Executive Directors	% of proprietary Directors	% of independent Directors	Number of meetings

Nominations Committee

The Nominations Committee is responsible for **proposing nominations** to the Board of Directors. It is specifically responsible for: evaluating the suitability of directors and senior managers of the Entity and the basic terms and conditions of their contracts, establishing a target for the gender less represented on the Board, making, together with shareholders at a general meeting, proposals for the nomination, re-election or removal of independent directors, reporting on motions to nominate or remove senior executives and key office holders, and examining and organising the succession of the Chairman and the CEO.

The composition of the Nomination Committee as at 31 December 2021 was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr Jesús Solchaga Loitegui	Independent
Member	Mr Félix Santiago Longás Lafuente	Independent
Member	Ms Maria Pilar Segura Bas	Independent

Compensation Committee

The Compensation Committee has the duty of **reporting, advising and proposing matters regarding compensation** for directors, general managers and similar personnel, and the remaining members of the so-called Identified Collective, i.e. the persons whose professional activity has a significant impact on the Bank's risk profile.

The composition of the Remuneration Committee as at 31 December 2021 was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr Jesús Solchaga Loitegui	Independent
Member	Mr Félix Santiago Longás Lafuente	Independent

0.00	**0.00**	**100.00**	**5**
% of Executive Directors	% of proprietary Directors	% of independent Directors	Number of meetings

Audit and Compliance Committee

The committee's duties are expressly stipulated in the Regulations of the Board of Directors. In particular: to inform the general meeting regarding any matters raised by shareholders with respect to areas under its authority; to **supervise the effectiveness of the Bank's internal control, internal audit and risk management systems, including tax risks**; to supervise the process of preparing and presenting regulated financial information; to propose the designation or re-election of the financial auditor; to establish appropriate relations with the external auditor and to receive information regarding its independence; to receive annual information from the external auditor confirming its independence with respect to the Bank or its Group; and to issue the relevant report.

The composition of the Audit and Compliance Committee, as at 31 December 2021, was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr Jesús Tejel Giménez	Independent
Member	Mr Jesús Máximo Bueno Arrese	Proprietary
Member	Mr Félix Santiago Longás Lafuente	Independent
Member	Mr José Miguel Echarri Porta	Proprietary
Member	Mr Vicente Cóndor López	Independent

0.00	**40.00**	**60.00**	**11**
% of Executive Directors	% of proprietary Directors	% of independent Directors	Number of meetings

Large Risk and Solvency Committee

The Committee has the primary duty of **advising the Board as to the overall current and future risk appetite** of the Bank and its Group, and the strategy in this respect. It also assists the Board with supervising the application of that strategy by the senior management by monitoring the Bank's solvency levels and proposing any action deemed appropriate for improvement.

The composition of the Large Exposures and Solvency Committee at 31 December 2021 was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr Vicente Cóndor López	Independent
Member	Mr Jesús Tejel Giménez	Independent
Member	Mr Jesús Máximo Bueno Arrese	Proprietary
Member	Ms Maria Pilar Segura Bas	Independent
Member	Mr Jesús Solchaga Loitegui	Independent

0.00	**20.00**	**80.00**	**15**
% of Executive Directors	% of proprietary Directors	% of independent Directors	Number of meetings

Strategy Committee

The Strategy Committee has the core function of informing the Board of Directors of the Company's strategic policy, ensuring that there is precise organisation for its implementation. The committee regularly **evaluated the Strategic Plan** approved by the Board of Directors, which is of great importance for the proper management of the Bank in the medium and long-term. It also implemented **quarterly follow-up measures** regarding the development of the budget and the specific implementation of the mandates set out in the Strategic Plan, reporting the conclusions obtained to the Board of Directors. It also monitors and reports to the Board of Directors on the sustainability policy.

The composition of the Strategy Committee as at 31 December 2021 was as follows:

POSITION	DIRECTOR	CATEGORY
Chairman	Mr José Luis Aguirre Loaso	Proprietary
Member	Mr Jesús Solchaga Loitegui	Independent
Member	Mr Félix Santiago Longás Lafuente	Independent

Suitability of the members of the Board of Directors

All members of the Board of Directors must **meet requirements** in order to be appointed and hold the position of director, in line with current regulations and those included in the **Entity's internal governance rules**.

Ibercaja has a **policy for assessing the suitability and diversity** of the members of the Board of Directors and key function holders at the Bank, in keeping with EBA/GL/2017/12 Guidelines and European Central Bank (ECB) Guidelines, on the assessment of suitability, establishing the criteria and systems that will be taken into account to assess the suitability of the members of the Board of Directors, general or similar managers, heads of internal control and other key function holders for the Entity's day-to-day operations.

To **assess the suitability of the aforementioned key posts** and positions, which, in any case, must take place prior to their appointment, the following will be taken into account:

- Their commercial and professional reputation.
- Their knowledge and experience.
- In the case of Board members, good governance aspects will also be considered, using indicators such as the ability to devote the amount of time required, independence of mind and the absence of significant conflicts of interest.

Care shall likewise be taken to ensure that the selection criteria take into **account the diversity** of knowledge, training, professional experience, age and gender, and are not implicitly biased in a way that could lead to discrimination (in particular, on the grounds of gender, ethnic origin, age or disability). In particular, the Entity will ensure that the selection processes are not implicitly biased to hinder the selection of women aimed at including women who meet the sought-after professional profiles among the potential candidates.

In the event that during the performance of their respective functions, any of the persons subject to the scope of the Policy is affected by a situation that modifies the criteria taken into account for the favourable assessment of their suitability for the performance of the position, the Entity will adopt the appropriate measures and notify the competent supervisory authority within a maximum period of fifteen working days.

Nevertheless, the Entity periodically promotes **training sessions** aimed at the members of the Board of Directors, whose content in various areas is determined according to the training needs of the directors, regulatory developments affecting credit institutions and relevant economic and social issues.

Performance assessment - self-assessment of the Board and committees

Law 10/2014, of 26 June, on the regulation, supervision and solvency of credit institutions assigns responsibility to the **Board of Directors** for the **oversight, control and periodic assessment of the effectiveness of the corporate governance system.** The European Banking Authority (EBA) Guidelines on internal governance (EBA/GL/2021/05) and the Bank of Spain's guidelines on the internal capital adequacy assessment process at credit institutions provide for the management body to periodically assess the individual and collective efficiency and effectiveness of its corporate governance activities, practices and procedures, as well as the functioning of the delegated committees. This obligation is stipulated in the Corporate Enterprises Act for listed companies and in the CNMV'S Code of Good Governance. These legal obligations and good practices are included in the Bank's Board of Directors' Regulations, which stipulate that one of the Board's duties is to prepare a self-assessment report of its performance annually and that of its internal committees Every three years, this performance evaluation is carried out by an external evaluator, the last external evaluation having been carried out in the 2019 financial year.

Remuneration of Governing bodies and Senior Management

The **position of member of the Board of Directors** is **remunerated** in accordance with article 34 of the Bylaws.

The **maximum amount of the annual remuneration of all the directors is approved by the General Shareholders' Meeting** and remains in force until their modification is approved. Unless otherwise resolved by the General Shareholders' Meeting, the distribution of remuneration among the directors shall be established by resolution of the Board of Directors, following a favourable report from the Remuneration Committee, taking into consideration the special duties and responsibilities inherent to the position, as well as sector and market practices (comparable sector based on size, market capitalisation, among other factors). Remuneration shall be set to reward the level of responsibility and career development of the Bank's Directors, ensuring both internal fairness and external competitiveness.

In particular, the **Board of Directors shall be responsible for setting the remuneration of the chief executive officer and the terms and conditions of his contract with the Bank**, in accordance with current legislation and the director remuneration policy.

In general, directors' remuneration shall be based on the following principles:

- **Prudent and effective risk management**: the Policy shall promote and be consistent with sound and effective risk management and shall not provide incentives to take risks beyond the level tolerated by the Entity.

- **Alignment with business strategy:** the Policy shall be consistent with the business strategy, objectives, values and long-term interests of the Entity and shall avoid conflicts of interest, ensuring that in the setting of performance targets to be achieved to which remuneration may be linked, there is no risk of such conflicts of interest.

- **Sustainability over time**, so as not to encourage the excessive or undue assumption of risk, and should be aligned with the Entity's solvency and capitalisation needs, maintaining adequate proportionality between the remuneration paid to directors and the responsibilities assumed and the volume of assets and nature of the Entity, also ensuring equality in the remuneration schemes of the directors from the point of view of gender diversity, and in particular, preventing excessive remuneration of independent external directors from circumventing their independence.

- **Alignment with long-term interests**: the valuation of any performance-based component shall focus on long-term results and consider the current and future risks associated with them.

- **Transparency**: the Policy shall be transparent and known to the persons to whom it applies from time to time so that they can have a clear idea at the beginning of the financial year of the total amount of remuneration they could achieve at the end of the financial year. Decisions taken by the governing bodies competent for remuneration matters shall be duly recorded in the minutes of the relevant meetings. The approved quantitative aspects in force from time to time shall be set out in an appendix to this Directors' Remuneration Policy.

- **Simplicity:** the rules for the management of remuneration shall be drafted clearly and concisely, simplifying as far as possible the description of the rules, the calculation methods and the conditions for their achievement.

- **Adequate ratio between fixed and variable components:** in those cases in which the remuneration system of a director provides for a variable component, the fixed component shall constitute a sufficiently large part of the total remuneration to allow the variable component sufficient flexibility to permit its modulation, to the extent that it is possible not to satisfy it by means of the "malus" clauses that have been established.

In order to avoid any excessive risk-taking, a maximum shall be set for the ratio between the fixed and the variable component of the total remuneration.

The remuneration policy of the members of the Board of Directors and senior management staff (Management Committee) is aimed at establishing a remuneration scheme **appropriate to the dedication and responsibility assumed**, all in accordance with the provisions of current legislation, and promoting sound and effective risk management, which does not imply an assumption of excessive risks.

The setting of global and specific targets for variable remuneration is linked to prudent risk management, with some of its main features in relation to *ex-ante* adjustments being as follows:

- **Depends on and is adapted to beneficiaries' individual performance and the Entity results**, considering the impact of the underlying economic cycle and the present and future risks.

- **Flexibility and alignment with the Entity's strategic interests** without limiting its ability to reinforce its solvency.

- **Setting certain upper and lower limits that clearly mitigate risks associated with their potential impact on the income statement and** the Entity's own funds.

Without prejudice to the foregoing, the Entity has established ex-post adjustment clauses for variable remuneration (*pre-malus*, *malus* and clawback clauses) that may be applied up to 100% of the total variable remuneration. In any case, the variable component of the remuneration may be reduced at the time of its performance evaluation, in the event of a negative performance of the Entity's results or of its capital ratios, either in relation to previous years or to those of similar entities, or a negative performance of other parameters such as the degree of achievement of budgetary targets, and provided that a requirement or recommendation by the competent authority to the Entity to restrict its dividend policy is in force.

Ibercaja's Remuneration Policy is coherent with the Sustainability Policy and the principles and values of the Bank with regard to managing environmental, social and corporate governance risks. It is in line with the provisions of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector with regard to establishing a remuneration system based on equal opportunities and non-discrimination, contributing to the Bank's good corporate governance, coherent with the internal code of conduct and mitigates an unreasonable assumption of risks.

In addition, a long-term incentive has been approved to align the interests of certain key executives of the Bank with the corporate strategy and long-term value creation. Three of its multi-annual objectives are related to sustainability: the percentage of female managers, CO_2 emissions and achievement of the major sustainability milestones contained in the Desafío 2023 Strategic Plan.

The position of member of the Board of Directors is remunerated, in accordance with article 34 of the Bylaws. Only the Chief Executive Officer and the Chairman receive a salary for the performance of their duties, as well as allowances for attending meetings of governing bodies, in accordance with the provisions of the Bylaws. The remuneration of the other directors, in their capacity as such, consists of (a) allowances for attending meetings of the Board of Directors and its committees, and (b) an annual allocation to be determined by the Board for directors with special dedication and duties (chair of the internal committees of the Board of Directors).

Hence the average remuneration of directors, including the CEO and the Chairman, (9 male directors and 2 female directors) amounted to 125.88 thousand euros. Furthermore, the average remuneration of directors in their capacity as such is 55.71 thousand euros (the average remuneration of male directors is 59.75 thousand euros and that of female directors is 35.5 thousand euros. This difference is due to the chairmanship of committees, the number of committees of which one is a member and the number of meetings of each committee).

Quantitative data on directors' remuneration are provided in the annual directors' remuneration report disclosed on the Entity's corporate website (https://www.ibercaja.com/accionistas-e-inverores/gobierno-corporativo-y-politica-de-remuneraciones/politica-de-remuneraciones) and for both directors and senior management in the Annual Corporate Governance Report (sections C.1.6 and C.1.7) also accessible through the corporate website (https://www.ibercaja.com/accionistas-e-inverores/gobierno-corporativo-y-politica-de-remuneraciones/informe-anual-del-gobierno-corporativo).

Conflicts of interest of the administrative, management and supervisory bodies

The members of the governing bodies of Ibercaja Banco **comply with the requirements established in the Corporate Enterprises Act**, and no conflicts of interest have been disclosed between persons, their private interests and other duties, and their activity at the Entity.

The board members must adopt the necessary measures to avoid situations where there may be a conflict of interest with the business and their duties to the Entity, as stipulated in the Board of Directors' Regulations.

No conflicts of interest of the Entity's directors that could affect the performance of their position as provided in article 229 of the Corporate Enterprise Act have been reported. In those specific situations where a director considers that a potential conflict of interest could be involved, the director has refrained from intervening in the deliberations and participating in the voting.

Internal Rules and Control Organs

103-1, 103-2, 103-3, 417-1

Ibercaja has established internal rules and control bodies to **ensure full and rigorous compliance** with the **Entity's good governance measures**, including the **following:**

- **Code of ethics**, which include a memorandum of operating conduct and security that affects all the Bank's employees.
- **Policy for managing the risk of non-compliance with regulations.**
- **Internal Code of Conduct in the securities market,** applicable to the Board of Directors, Senior Management and employees of the Entity who operate or whose professional activity is related to the securities market, or who may have access to privileged information or other relevant information of the Entity.
- **Body for reporting suspicious activities involving market abuse.**
- **Regulations for the Defence of the Customer** of the Ibercaja Group and the **Style Manual for customer service**, which contains the general criteria for customer service.
- **Retail savings product marketing manual**, in accordance with MiFID regulations.
- **Conflicts of interest policy**, prepared according to MiFID regulations, aims to objectively manage conflicts of interest that may arise between the Ibercaja Group and its customers.

- **Anti-money Laundering and Counter-Terrorism Financing Prevention Committee** (Internal Control Body-ICB) that has been commissioned the functions established in the anti-money laundering and counter-terrorism financing regulations.
- **Data Processing Officer** (DPO) of the Group and Privacy Office, whose duty is to ensure compliance with the personal data protection regulations.
- **Control body for the criminal risk prevention system.**
- **Tax compliance management and control model.**

Control Functions

The Group has an internal monitoring system in place to oversee the financial and operational risks inherent in its business activities. The **General Secretary's Office and Control area** bring together the **second line of defence**, formed by the Risk Control department and the Compliance department. The General Secretary of the Bank is also the Chief Risk Officer.

The **Risk Control Department** verifies compliance with the risk limits approved by the Board of Directors and the **Regulatory Compliance Department** supervises observance of the laws that govern the Group's business activities. In addition, the **Internal Audit Division** reviews the proper functioning of the risk monitoring systems, while verifying compliance with established policies, procedures and standards. The **Audit and Compliance Committee** of the Board of Directors supervises the effectiveness of internal audit and control and the systems for managing the risk of non-compliance with regulations.

The head of the Risk Control Department reports regularly to the Large Risk and Solvency Committee, while the heads of the Regulatory Compliance Department and the Internal Audit Department report regularly to the Audit and Compliance Committee. The chairmen of the committees, as well as the CRO, report to the plenary session of the Board of Directors within the scope of their respective areas of concern.

Commitment to privacy

103-1, 103-2, 103-3

All processes and actions of the Ibercaja Group are conducted with the utmost possible respect and protection for the privacy and security of personal data.

Privacy management is central to the design of internal actions, both commercially and technologically. The Ibercaja Group's data protection officer (corporate DPO) carries out his or her activity through the privacy branch and coordinates this function in all the Group's companies. Promotes maximum respect for privacy, above general standards, with a medium-term view to anticipate future obligations. Throughout 2021, several aspects have been reviewed, such as:

- **Improvement of internal rules and criteria** to achieve maximum effectiveness in protecting personal data when dealing with changes in processes, products or technological assets.
- **Constant improvement in the definition of special processes** for the blocking, erasure and conservation of data, making the legally mandated periods for the persistence of information compatible with absolute respect for the law in relation to the protection of such data.
- **Conducting both general and process-specific audits** to ensure the adequacy of the privacy framework to the internal dynamics of innovation and change.
- **Development of internal utilities** based on artificial intelligence tools aimed at creating a privacy innovation pipeline.

- **Training and outreach actions**, with recurrent privacy committees, internal communications and maintenance of a complete and clear internal regulatory corpus, as well as mandatory data protection courses and presence in professional exchange forums.

4.5 Business model and Strategic Plan

> Ibercaja's business model, with a robust retail profile, combines universality with specialisation by segments.

4.5.1 Business positioning and markets in which it operates

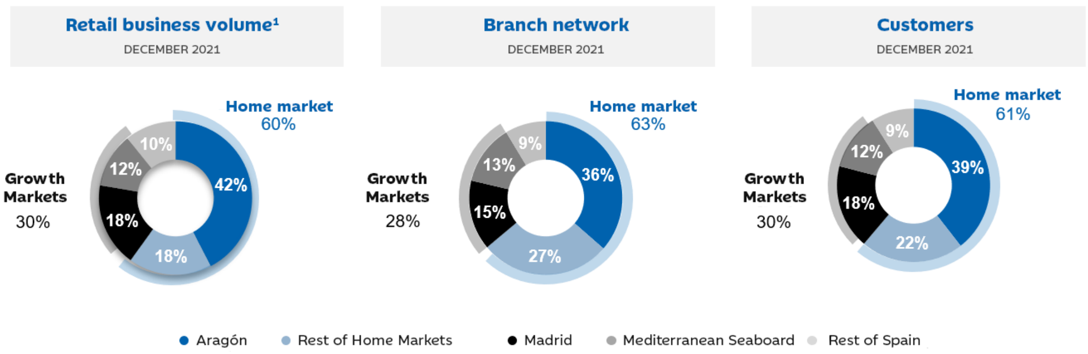
102-2, 102-4, 102-6, 102-7, 103-1, 103-2, 103-3

The Ibercaja Group, with a balance of **58,631 million euros**, is the **ninth largest in terms of asset volume in the Spanish banking system**. The Bank is developing a "universal banking" model to meet all the financial needs of its customers. It has a wide range of banking and financial products and services, focusing on first home mortgages, SME financing, asset management and life savings and risk insurance products.

The **retail nature of the business** is reflected in the balance sheet structure and the low-risk profile. Loans to individuals and small and medium-size enterprises account for almost 85% of loans and advances to customers, and retail deposits 80% of borrowings. At the national level, it has a market share of **2.4% in lending to households and non-financial corporations**, **3.6% in the individual house purchase segment**, and **2.7% in household and corporate deposits**, according to statistics published by the Bank of Spain.

Ibercaja owns its entire Financial Group, which is made up of subsidiaries specialising in the management of investment funds and pension plans, bancassurance, and leasing and renting, through which it offers a wide variety of products especially aimed at retail customers and which complement more traditional banking services. Ibercaja's Financial Group makes the Bank the **fourth largest financial institution in Spain in terms of asset management and life insurance** with 32,810 million euros in assets under management and technical provisions, reaching an aggregate market share in this range of products of **5.1% as at 31 December 2021.**

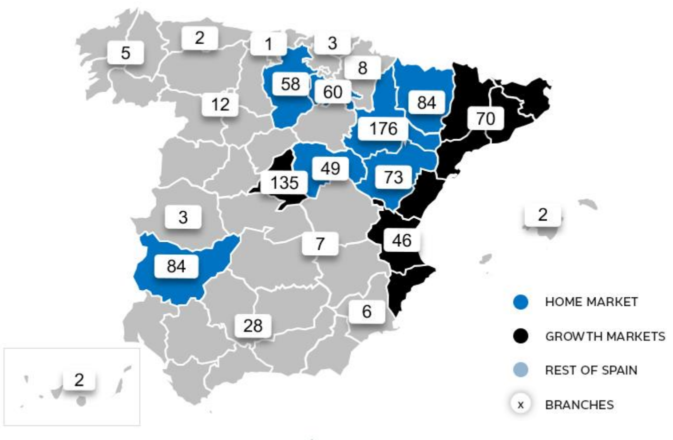
The Entity operates exclusively in Spain and has a **leading position in its traditional area of operation** (the autonomous communities of Aragón and La Rioja and the provinces of Guadalajara, Burgos and Badajoz), where **61% of customers** are concentrated and where **60% of retail business volume is obtained**. According to the Bank of Spain statistics, the market share in this territory, 31% in private sector deposits and 22% in credit reach 44% and 31% in Aragon. It also has a **significant presence in other areas of major economic significance, such as Madrid and the Mediterranean** (including the Autonomous Communities of Catalonia and Valencia), accounting for 18% and 12% of the Bank's customers, 18% and 12% of its turnover.



[1] Retail business volume in the ordinary course of business: loans and advances to customers ex reverse repos of assets and doubtful assets + retail deposits + asset management and insurance

At December 2021, the **network** totals **914 branches**, of which 255 are rural. Within the framework of the ERE agreement signed in 2020, **117 centres were closed during the year** out of the 199 planned. In line with a policy of economic streamlining, their closure was compatible in every case with the commitment to guarantee business continuity, conserve customer proximity, and maintain the Bank's presence in small towns and villages.

Distribution of Ibercaja Banco's branch network



The **distribution of offices by Autonomous Community** is 333 points of sale in Aragón, 135 in the Community of Madrid, 87 in Extremadura, 70 in Castilla y León, 70 in Catalonia, 60 in La Rioja, 56 in Castilla-La Mancha, 46 in the Community of Valencia, 28 in Andalusia and 29 in other Autonomous Communities.

The **number of employees** in the Group totals **4,880 employees (4,587 in the parent)**. In December 2020, the Management of Ibercaja Banco and the employees' representatives, as part of a redundancy programme enforceable until 30 June 2022, reached an agreement that envisaged a compensated lay-off plan. It affected a maximum of 750 employees, establishing voluntary participation as preferential selection criteria, either due to age or the closure of the centre of employment. Departures during 2021 amounted to 525 people, 70% of the agreed separations. The remainder of the phase-outs will be staggered until June 2022.

Commercial efficiency is being increased by **specialising more employees** to serve different types of customers and their specific needs. Supporting the branch network and providing a high value-added service are 212 managers specialising in corporate banking, 426 in personal banking, **and 76 in private banking.** Additionally, there are **83 digital managers** (67 digital personal banking managers and 16 digital customer managers) advising digital customers who need to engage with financial experts.

The situation created by the health crisis has accelerated the use of non-face-to-face services and digital assets through which customers can carry out their transactions in the most convenient and simple environment, whether online or via mobile phones. The **digitalisation strategy** being deployed by Ibercaja in recent years has enabled it to respond to the greater demand for online services while maintaining quality service. Digital customers reached 57.6%, compared to 54.1% in 2020, and the number of transactions carried out in the year accounted for 74.3% of the total. The **number of digital banking customers** who used any of the various channels last month reached **878,818**, a year-on-year increase of 4.3%, with notable advances in mobile banking users (+15.7%) and mobile payment (+51.1%).

Distribution of the number of transactions by channel and developments in remote banking

4.5.2 Goals and Strategies

102-2

In April 2021, the Chairman and CEO of Ibercaja presented the **new Strategic Plan 2021-2023**, which, under the name **"Desafío 2023"**, will be the roadmap for the Entity over the three-year period. The **main objectives** of this Plan are **to improve the Bank's recurrent profitability**, **to reinforce Ibercaja's leadership in customer experience** as a differential value and accelerate its transformation to **ensure its competitiveness** in the future while maintaining its own independent and sustainable project.

Two programmes have been defined for this purpose:

1) Customer and profitable growth

This programme is based on the **premise** that the entire organisation must **focus on the customer and on fully satisfying their needs** by anticipating, with a personalised value proposal, and offering them a global service that makes a difference.

The aim is to make customers feel closer to the Bank and perceive a unique experience regardless of the channel through which they interact with the Bank. In this way, an equitable monetisation of the value and utility provided by the service to the

On the commercial level, **three major focal points for action are enabled**:

1.1 Business banking

1.2 Risk insurance

1.3 Personal banking

establishing **two common initiatives** for the whole programme:

1.4 Model for charging for products and services: this will make it possible to customise the product and service offering and redefine new lines to help increase and diversify the offer, while maximising revenues.

1.5 Knowledge of the customer and business intelligence: in-depth knowledge of each customer and optimal business intelligence will facilitate the development of a differential offer, adapted to the needs of each customer at all times, with an omnichannel approach.

2) Productivity and Efficiency

It aims to enable the organisation to **redirect resources and focus them on value creation,** reducing less productive operating costs, so that these savings are used to accelerate the Bank's digital and operational transformation.

To this end, it is undertaking two major initiatives:

2.1 Development of the operating model: focuses on four lines of work

2.2 Base budget 0: implementation of a new budgeting methodology for the efficient allocation of available resources, knowing in advance the real costs assigned to each task and process.

In addition, two blocks of cross-cutting initiatives have been established for the two programmes:

1) Value initiatives

These measures aim to **improve risk awareness** and advanced **risk management**. Risk-adjusted profitability is the basic criterion for decision making as well as for the orientation of business growth.

The main initiatives are:

1.1 IRB Model: launched in the previous Plan, seeks to achieve an integrated management of risks at the Organisation, improve the Bank's competitive position and enable the sectoral comparison in

1.2 Pricing and efficient capital allocation: deployment in the management of the RAROC methodology to set prices based on risk-adjusted returns and capital consumption.

1.3 Data governance: Building on the progress made in the past 2018-2020 Plan, this initiative aims to complete a corporate framework that ensures transparency and reliability of the information, streamlines decision-making and maximises commercial and risk management performance.

2) Enabling initiatives

Technology, people and corporate purpose are the basic pillars to make the Bank a more agile, innovative and flexible organisation, with a corporate culture focused on creating value for customers and shareholders.

These initiatives include:

2.1 Development of the technology model to make technology a competitive advantage, improve the efficiency and agility of processes, align ICT capabilities and services with business objectives and

2.2 Strategic people planning: shaping a new people management model that drives internal development, mobilises talent and identifies the workforce's needs to meet the Bank's strategic challenges.

2.3 Purpose and sustainability: this initiative meets the ECB's expectations in the four areas established by the Supervisor: strategy and business model, governance and risk appetite, risk management and disclosure. The lines of work, in which the initiative is materialised, and its objectives are as follows:

- *ESG risk management:* incorporating climate-related and environmental risks into cross-cutting risk processes as well as into existing risk policies and procedures.
- *Sustainable business strategy:* aligning the Group's commercial strategy with the principles of responsible banking and accompanying customers in the transition to a sustainable future and a low-carbon economy.

- *Communication and reporting:* creating an ongoing and transparent communication framework that reinforces the organisation's commitment to sustainability.
- *Synergies with shareholder foundations*: developing lines of collaboration with shareholder foundations to respond to the main social and environmental needs of the Bank's territories of operation.

The medium-term financial targets announced in the presentation of the Strategic Plan have subsequently been revised upwards, taking into account that they were designed at the end of 2020 and since then the degree of uncertainty about the impact of COVID-19 on the progress of the economy and, particularly, on the Bank's business has been significantly reduced. The following table shows the main financial figures at the end of 2021 and the new medium-term target:

Medium-term objectives	DEC 2021	MEDIUM-TERM OBJECTIVES
SOLVENCY		
Ratio CET1 (fully loaded)	12.7%	12.5%
Total capital ratio (fully loaded)	17.4%	17.0%
Ratio pay-out	65%	60% (*)
PROFITABILITY		
ROTE	5.7%	c. 9%
Recurring efficiency ratio	64.2%	≈55%
ASSET QUALITY		
Cost of risk	35 bp	30 bp
NPL ratio	2.3%	c. 2.5%
Problem asset ratio	4.0%	c. 4%
Coverage rate of Problem assets	69%	>65%

(*) The Bank has revised the target pay-out upwards from the previous 50%.

4.5.3 Impact of the COVID-19 crisis

On 11 March 2020, the World Health Organisation classified COVID-19 as an international pandemic. To cope with this situation in Spain, under Royal Decree 463/2020, of 14 March. a State of Alarm was declared, with diverse restrictions on mobility and on the exercise of non-essential activities, which was extended until 22 June. In October, in response to the resurgence of the infection, Royal Decree 926/2020 of 25 October re-decreed the state of alarm, which was extended until 9 May 2021. Global and Spanish economic activity has been significantly affected by the health crisis caused by COVID-19. Both the European and Spanish authorities implemented various measures to try to limit the impact of the pandemic.

> *Below are details of the most **significant impacts of the crisis** on strategic guidance, objectives, activities and results of the Bank, the support provided to customers, as well as other organisational and management measures.*

Impact on strategic orientation and objectives

The transformation of the Bank brought about by the initiatives launched in the 2018-2020 Strategic Plan meant that Ibercaja had the **means and resources to face the crisis** caused by COVID-19 in much more favourable conditions than the previous one in 2008, so that a strategic reorientation was not necessary. In 2021 the Entity launched a new Strategic Plan, "Desafio 2023", which outlines the objectives and strategies for the next three years, detailed in chapter 4.5.2 Objectives and strategy of the management report.

Organisational measures adopted by Ibercaja to mitigate the effects of COVID-19

The organisational and health and safety measures are described in chapter 6.4 Commitment to our employees in the management report.

Family and company protection measures

> *Through different Royal Decrees, the Government established **legislative moratoria** for individuals and professionals which, temporarily suspend payment commitments as receivables. Member banks of the Confederación Española de Cajas de Ahorro (CECA) provided a **sectoral moratoria**, in which Ibercaja participated to extend the scope of the mortgage moratoria approved by the Government.*

- On 18 March 2020, **Royal Decree-Law 8/2020** of 17 March on extraordinary urgent measures to address the economic and social impact of COVID-19 was published, and on 1 April **Royal Decree-Law 11/2020** of 31 March, was published, extending and amending the previous Royal Decree-Law 8/2020. The measures implemented under these regulations is the establishment of a **deferral of payment on mortgage and non-mortgage debts** under certain circumstances. Banks could enter into such transactions until 21 September 2020. Subsequently, Royal Decree-Law 3/2021 of 2 February extended the application deadline to 31 March 2021.
- On 16 April 2020, the Spanish Confederation of Savings Banks (CECA) published the **sectoral agreement** establishing a moratorium that extended the scope of the mortgage moratorium approved by the Government until 30 September 2020 and subsequently extended to 30 March 2021.

> *The government implemented **credit lines**, partially guaranteed by the state through the Official Credit Institute (ICO), to maintain productive activity.*

- **Royal Decree-Law 8/2020** of 17 March, created a **100 billion guarantee line** to meet the liquidity needs of companies and the self-employed. Financial institutions could formalise operations of this type until 1 June 2021. **Royal Decree-law 25/2020** of 3 July, approved the creation of a **new guarantee line of 40 billion euros** to meet the investment needs of companies and the self-employed until 1 June 2021. Royal Decree-Law 27/2021. **Royal Decree-law 27/2021** of 23 November, extended the deadline for applying for the guaranteed credit lines until 30 June 2022.
- **Royal Decree-law 34/2020** of 17 November extended **the maturity and grace periods of these guaranteed operations** for all debtors who request it. The maturity may be extended by a maximum of three years, provided that the total maturity of the transaction does not exceed eight years from the date of initial arrangement. At the same time, the grace period for the repayment of the principal is increased to a maximum of 12 months, without exceeding 24 months.
- **Royal Decree-law 5/2021** of 12 March **approved the renegotiation framework for debtors with guaranteed finance**. The Agreement of the Council of Ministers of 11 May 2021 established the **Code of Best Practices (CBP)** for the above-mentioned renegotiation, which was subsequently amended on 30 November 2021 to extend the deadlines for the measures contained therein. The CBP sets out that debtors may request the application of three types of measures, either at once or successively, by proving compliance with the requirements set out in the regulation.

1. Extension of the maturity of guarantees.
2. Conversion of guaranteed financing into participating loans.

3. Transfers for reduction of outstanding principal of guaranteed loans.

The application deadline for the first two measures is 1 June 2022 and for the third measure 1 June 2023.

Ibercaja joined the CBP on 20 May 2021. In this way, it reinforces its commitment and support to companies in complex and uncertain situations.

At the end of 2021, the Group had formalised **moratorium operations** under Royal Decree-Laws 8/2020 of 17 March, and 11/2020 of 31 March, as well as the private moratorium under the sectoral agreement for an amount of 741 million euros, of which 97% or 715 million euros have matured. The **outstanding balance, 26 million euros**, is almost entirely secured by mortgages and **89% is due in the next three months**. It should be noted that the amount of overdue arrears classified in stage 3 and stage 2 represent 3.3% and 26.5% of the exposure, respectively.

The Entity actively participates in the processing of financing operations within the **ICO Liquidity and Investment** lines established in Royal Decree-Laws 8/2020 of 17 March and 25/2020 of 3 July to support companies and the self-employed affected by the economic effects of the crisis. Up to December 2021, a total of **19,643 operations** have been formalised for an aggregate amount of **2,137 million euros**, 80% of them for SMEs and the self-employed. The **drawn balance, 1,668 million**, represents **20% of financing to companies** and only 1.9% is within Stage 3. The amount guaranteed by the Spanish State through the ICO amounts to 77% of the outstanding balance. Most of the guaranteed credit lines mature between 2023 and 2028. As at 31 December 2021, in accordance with Royal Decree-Law 34/2020, the maturity or grace period of 36.6% of the total amount granted had been extended. In addition, 43% of the outstanding balance remains subject to grace periods. The maturity of these grace periods is concentrated in the second quarter of 2022.

In relation to the **CBP**, the impact of the measures envisaged therein has been very low, as only 6.8 million euros of deferrals have been granted and there have been no requests from customers in relation to the other measures (participating loans and write-offs).

Impact on the Group's activity, results and financial condition

The **impact of COVID-19 on the Group's business activity** in 2021 **was not significant**. Business dynamism has picked up and the growth targets for the strategic segments have been met. On the credit side, the **credits and loans being arranged, 5,421 million euros, recovered to pre-pandemic levels** and normal financing to companies increased 6.9% year-on-year. At the same time, **customer funds gathering performed favourably**, with growth of 7.3% in the year. Asset management activity reached a record level for the Entity, with advances in market share in investment funds (22 b.p.) and pension plans (6 b.p.).

In relation to the **quality of the credit portfolio no signs of deterioration have been perceived**. Non-performing assets continued to decline, more sharply than the sector as a whole (-29.2% vs -4.7% according to the latest available information from the Bank of Spain as at November), and the NPL ratio fell to 2.30%. Sales of real estate assets reactivated (+52%) after the standstill in 2020. Refinancing continued to fall (-26.9%) and the percentage of the loan portfolio classified as stage 2 is very low (5.0%). Exposure to economic sectors that have been particularly affected by the economic consequences of the COVID-19 pandemic, such as transport and warehousing, hotels and restaurants, and arts, entertainment and recreation, together amount to 631 million euros, representing only 2.0% of gross lending. However, the Group performed on ongoing monitoring of the main indicators to anticipate possible negative effects.

Ibercaja has a **sound solvency position which has been strengthened during 2021**. The CET1 phased-in ratio reached 13.41%, well above the minimum requirements communicated by the Supervisor. The CET1 fully loaded ratio was 12.71%, 12 basis points higher than in 2020.

At the end of the year, the **available liquidity** exceeded **15.25 billion euros** and comfortably covered debt maturities.

The **most relevant impact of the pandemic in 2020** was an **extraordinary provision for credit risk of 90 million euros**, of which **52 million euros was recorded as a post-model adjustment (*post model adjustment*)** to cover the increased credit risk of customers who due to the deterioration of the macroeconomic situation could move to stage 2 in 2021. At year end, it has been decided to maintain this post model adjustment as described in note 11.6.3 of the annual accounts.

The **result for the 2021 financial year** amounts to **151 million euros**, 127 million euros more than in 2020.

Expected trends in activity and results

The effect of COVID-19 on the economy has been gradually moderated by the progress of vaccination, the lifting of restrictions, the recovery of activity in the most affected sectors and the economic support measures implemented by the European and Spanish authorities. In this context, and taking into account the positive progress of the business in 2021, Ibercaja does not expect its activity and results to be pressured by the crisis. However, it cannot be ruled out that a hypothetical worsening of the macroeconomic environment would lead to lower lending activity and higher impairment losses.

4.5.4 Lines of the Group's Business Model

102-2, 102-4, 102-6, 102-9, 103-1, 103-2, 103-3, 417-1, FS6, FS14

> *Ibercaja is committed to a universal banking model, focused on retail business and based on a solid relationship with the customer, advice, quality of service and innovation.*

It serves a **stable base of 1.8 million customers (management units)**: comprising households, companies and public and private institutions. According to their financial needs, the segmentation of customers allows us to offer them a **diversified portfolio of products and tailor-made solutions through specialised managers**. The Entity offers basic banking services and other complements, such as insurance, investment funds and pension plans, all marketed through its highly specialised financial group, whose companies it owns in full.

Ibercaja's commercial strategy is based on:

1. **Specialisation aims to meet the customer's financial needs and expectations through specifically qualified managers specialising in personal, private, and** corporate banking.

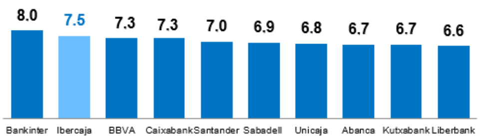
2. **Advice:** advisory services have become a differentiating factor that characterises Ibercaja. In 2012, the Bank was the first Spanish bank to obtain AENOR certification for excellence in personal banking advice, and since 2007 it has held the European Seal of Excellence 500+, awarded by the European Foundation for Quality Management (EFQM), which was renewed this year under the updated EFQM Model, making it the first financial institution to obtain it.

3. **Omni-channel relationship model:** the customer decides the most appropriate way to interact with the Bank according to their preferences, needs, characteristics, context and life cycle. The omnichannel system provides you with a unique and recognisable experience to use personal interaction for your advisory needs while using digital channels for your daily transactions. Omni-channel customers generate the highest revenues, with an average number of products and services purchased far higher than those operating only in branches.

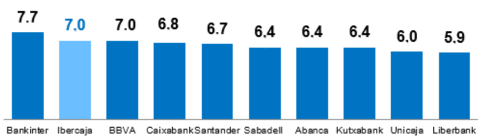
4. **Personalised product offer:** The production of the Group's subsidiaries enjoys a solid reputation and enables a customised offer tailored to each type of customer, their personal and financial circumstances and the level of risk they are willing to take.

The customer is constantly evolving, so it is important to deepen our understanding of their expectations and their experience of the Bank. Satisfaction surveys conducted by polling individuals and companies allow us to ascertain their perception of the Entity, evaluate the services offered and identify those aspects that may be improved. According to the results obtained in the sectoral report on the Satisfaction of Private Customers in the Financial Sector (BMKS), carried out by the consultancy firm Stiga, Ibercaja ranks second among its peers in terms of overall satisfaction, loyalty and recommendation.

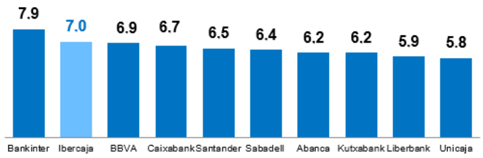
Overall satisfaction



Loyalty

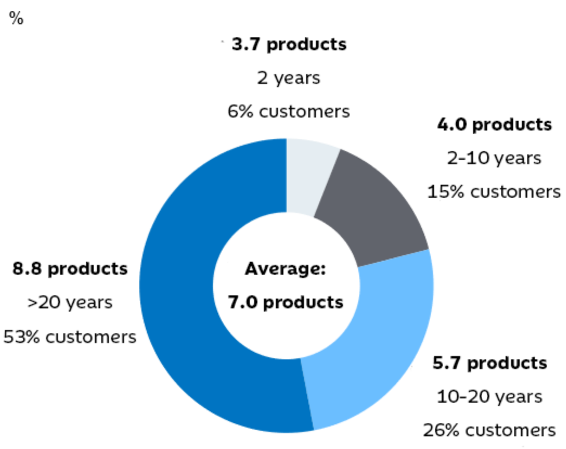


Word of mouth



Average number of products and services per customer

The level of customer satisfaction is translated in terms of ***commitment*** *and* ***engagement*** *with the Entity.*



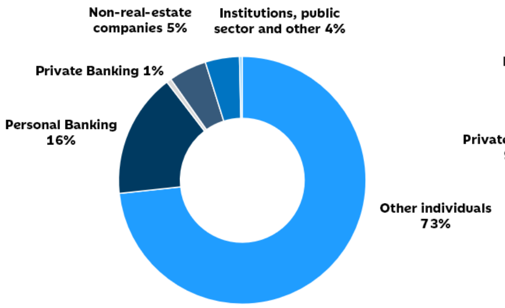
Ibercaja's business model distinguishes the following **segments** depending on the **commercial strategy** defined for each type of customer:

1. *Personal Banking*
2. *Private Banking*
3. *Other individuals*
4. *Non-real estate productive assets*
5. *Real estate productive assets*
6. *Institutions, public sector and others*

The distribution by segment of the number of customers and retail business volume at the end of 2021 is shown in the following charts:

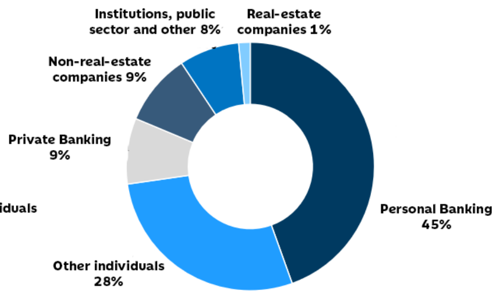
Number of customers

%



Retail business volume

%



The most relevant segments are described below:

PERSONAL BANKING

Personal banking encompasses over 290,000 customers with a **savings balance of more than 100,000 euros or 75,000 euros outside the Home Market**. The customer care model for this group is based on a personal manager who proposes the best investment strategy for the customer's profile and preferences. The **426 specialised managers**, based on their knowledge of the customer, offer him/her investment alternatives, mainly funds, pension plans and insurance, adjusted to his/her risk profile, objectives and experience in financial products.

Personal banking customers generated a retail business volume of **44,000 million euros (45% of the total)**. This segment contributes over 50% of the Group's retail customer loans with a mix, in which almost 50% is an asset management and insurance. The average number of products and services contracted per customer is 13.7.

The last year has seen the **digital personal banking model** take root, a new way of working whereby customers with a digital profile (with little or no presence in the branch) receive the same service provided by the branch through a digital banking manager supported by specific tools and with a timetable adapted to this type of model. The current team of **67 managers, serving almost 40,000 customers**, has grown in 2021 and, given the success of this model, will continue to expand over the coming years.

Personal banking advisers are trained with internal and external means. Most of them have specific qualifications, such as EIP (European Investment Practitioner) and EIA (European Investment Assistant), endorsed by the European Financial Planning Association (EFPA).

AENOR

*In 2021, Ibercaja renewed the **certification of service excellence management for the personal banking segment,** issued by Aenor.*

This stamp reinforces the Bank's leadership in professional advisory services in terms of customer savings management, and is accompanied by the **personal asset management advisory services certification**, also granted by Aenor, held by the Bank since 2012.

PRIVATE BANKING

Private banking is aimed at **customers or household management units with financial wealth in excess of 500,000 euros (300,000 euros in Extremadura)**. The customer is assisted by a private banking manager who analyses their needs and provides them with the best investment alternatives and financial-tax planning. The range of financial assets available to this private banking community is extensive: securities listed on Spanish and foreign markets, investment funds both of Ibercaja and of external suppliers, SICAVs, structured deposits, etc.

The assets under management of more than **11,000 family groups**, amount to almost **8.5 billion euros**, of which around **75% are in asset management and insurance**. The average number of products contracted per customer exceeds 21.

The year 2021 was particularly relevant for the private banking segment due to the volume of business achieved, particularly in the **discretionary portfolio management** service, which exceeded 3 billion euros. This figure means that almost 35% of customers opt for this formula, compared to 15% of the sector as a whole. In addition, 56% of the investment funds of private banking customers are under discretionary portfolio management contracts.

The work team assigned to the private banking services is made up of **76 people**, distributed among the branches of Madrid, Zaragoza, Logroño, Valencia, Guadalajara, Barcelona, Burgos, Seville and Badajoz, as well as the customer service offices of Huesca, Teruel and Pamplona.

OTHER INDIVIDUALS

This segment **provides the largest number of customers, 1.3 million, and a turnover of almost 28 billion, representing 28% of the Group's total.** The management of the branch network in this collective focuses on capturing new customers and consolidating the loyalty of existing ones. The Bank carries out its mission through proposals adapted to personal needs, depending on the risk profile and available income.

Ibercaja has continued to support families affected by COVID-19 by maintaining the advance payment of pensions and unemployment benefits, facilitating access to public aid and offering solutions for customers in vulnerable situations.

Changing customer habits have driven the **growth of remote transactions**. In response to this demand, the Bank has strengthened its non-face-to-face operations, increasing to **16 (47 at the end of January 2022) the number of digital managers** serving 38,000 customers.

The Entity continues to enjoy the **confidence of its customers in the management of their financial assets**. The strong growth of funds, especially off-balance sheet funds, has been supported by increased household savings and favourable market conditions.

The Bank has maintained its **commitment to financing housing for individuals**, a sector in which it has historically specialised, adapting its offer to the different types of customers; in the case of the youngest customers, financing up to 95% of the value of the property, to facilitate their emancipation and access to homeownership.

In the last quarter of the year, under the slogan **"Madrileños siempre hemos estado juntos"** (we people of Madrid have always been together), an ambitious campaign was launched to attract 6,000 customers in the Madrid region. Customer support, proximity, and commitment to the territory and society are the values that the Bank wishes to highlight to drive this growth and constitute a differential business model.

The main strategic challenges and trends that will mark the activity of Retail Banking (personal banking, private banking and other individuals) in the near future are:

Value proposition	*To offer customers value propositions that meet their financial needs, both personally and professionally, providing them with personalised advice and content to improve their financial education and help them make decisions.*
Consolidate Personal and Private Banking	*Consolidate progress in the personal and private banking segments.*
Digitalisation	*Continue to drive digitalisation and non-face-to-face customer service channels.*
ESG Products	*Expand the range of financing and investment products with ESG criteria, showing customers how they can use their assets to help build a more sustainable and caring world.*

NON-REAL ESTATE PRODUCTIVE ASSETS

This segment includes **almost 90,000 customers** with a turnover of more than **9.2 billion euros**.

One of the Bank's strategic objectives is to gain a presence in the corporate world by broadening the diversification of its business. In this regard, the Desafío 2023 Plan sets out the roadmap and the transformations to be undertaken in the 2021-2023 cycle. To achieve the proposed goals, a **new Corporate Banking Area Division** has been created, to which the **specialised commercial network** reports, comprising **212 managers, 8 Corporate Business Centres, 16 Corporate Areas** in the main branches and a **Corporate and Syndicated Banking Financing Unit**. In addition, the focus on companies with a turnover of less than two million euros has been strengthened by increasing the number of **commercial business managers to a total of 130.**

The main lines of action within the framework of the Strategic Plan are:

1. Offer the customer a differential value proposition in terms of quality of service and excellent experience.
2. Simplify and digitise processes, improving operational agility and customer responsiveness.
3. The data as a basis for profitable business growth, as well as for anticipating possible credit deterioration.
4. Progress of business models and collaborative capabilities.

The **commercial offering** was expanded in 2021. In terms of investment products, a range of investment funds has been created, especially designed for companies, to enable them to manage their cash flow more efficiently and make the most of their surplus liquidity.

In terms of financing products, a line of sustainable products and another related to Next Generation EU funds have been opened. In May, an alliance was signed with the consulting firms Mazars and Silos, through which the Bank offers companies a clear and defined working model to articulate successful proposals for transformation projects that are eligible for Next Generation EU Funds.

Lastly, work was done to highlight the Group's experience as a specialist in employment plans for SMEs.

The **online banking service for companies** has incorporated the possibility of contacting and scheduling appointments through **"My Manager"** and the **"Priority"** service, which guarantees immediate attention to any customer query.

The **Ecosistema Más Empresa** (Ecosystem Plus Enterprise) initiative promoted by Ibercaja and its Foundation has been consolidated. It is a platform for innovation and a meeting point to stimulate economic activity, improve competitiveness, exchange knowledge and generate business value. Its 5,000 members from more than 2,500 companies can access mentoring programmes, tools, workshops, trend reports, and webinars to share best practices, identify common challenges, and create solutions to make everyone better while establishing a network of professional contacts.

Customers in the retail, professional, agricultural and livestock sectors and the self-employed in general are strategic for Ibercaja due to the important business opportunities they generate in the areas of financing, insurance and collection and payment services related to their professional activity, as well as others related to their particular needs.

In 2021, the range of value-added services associated with the POS was expanded with the launch of the **new Plazox service**, which offers instant financing at the time of sale. To increase the number of new customers, the **Vamos Comercios, Profesionales, and Agro accounts** have continued to be marketed. Various commercial actions were also launched during the year to link and build customer loyalty by contracting financing products, insurance, cards or payment and collection solutions, mainly. In the case of customers in the agricultural sector, we have provided the **CAP management service** in several Autonomous Communities.

The main strategic challenges and trends that will shape corporate business activity in the near future are:

Market share	*Consolidate Ibercaja's presence in these segments* ***by increasing its market share****.*
Integrated management	*Promote the* ***comprehensive management*** *of these customers, specifically Personal Banking and Wealth Management customers with professional activities on their own account, who have professional needs that we must respond to in order to be their main entity.*
Next Generation EU Funds	*Facilitate the dissemination and access of these customers to the* ***Next Generation EU Funds****, boosting the digitisation and growth of businesses by implementing new projects framed within the initiatives promoted by these funds.*
Support for entrepreneurs	*Intensify the participation of professionals and microenterprises in the* ***"Ecosistema+ Empresas" and "Ibercaja Emprende"*** *initiatives.*

PROGRESS IN DIGITAL TRANSFORMATION AND MULTI CHANNELLING

Digital transformation, a key pillar of the "Desafío 2023" Strategic Plan, aims to provide Ibercaja with the most advanced technological solutions that enable it to offer a quality service adapted to the digital capabilities and needs of each customer while at the same time contributing to boosting business generation and efficiency.

The impact of COVID-19 demonstrated the robustness of the Entity's digital channels and the capacity to achieve the objectives set both in terms of channel usage and the level of satisfaction generated. In 2021, we worked to implement new digital capabilities aligned with the Group's business objectives. The progress made with the entry into a transformational project such as the Financial Sandbox, the growth in digital sales to 36.4% and the consolidation of leadership in customer satisfaction with digital channels are noteworthy.

Mobile banking

- **Top-rated app:** Customer satisfaction with the app continued to increase, maintaining its leadership as the best rated in the Spanish financial sector.
- Launch of a **New Sales Environment** that integrates all the products marketed in the app.
- Contribution to financial inclusion by implementing cash pick-up and delivery at home or at branches through **Correos Cash**.
- Implementation of **new risk insurance consultation and service functionalities** in collaboration with Caser.

Relationship management

- **"Mi Gestor"** (My Manager) has been deployed to all managers in the branch network. The functionality allows individuals and businesses to chat, exchange documents and arrange appointments easily and securely, both in digital and mobile banking.
- **Digital managers** serve non-face-to-face customers who need to engage with financial experts. In 2021 the number of managers has grown by more than 70% to 83 people.
- The new **Contact Center** tool has been a significant step forward in terms of efficiency and quality in the specific services it supports through digital and automated processes.

Financial sandbox

This controlled testing environment enables the development and testing of innovative projects through collaboration between financial institutions, Fintech, technology companies and regulators. The Pension for Consumption project "Pensumo", developed jointly by Ibercaja and the Fintech Pensumo, was selected in the first call.

Promotion of virtual sales

One of the Strategic Plan objectives is for digital sales of the Bank's main products to reach 45% by 2023. Improved non-face-to-face sales processes have led to digital channels:

a. **36.4%** of **total sales**.

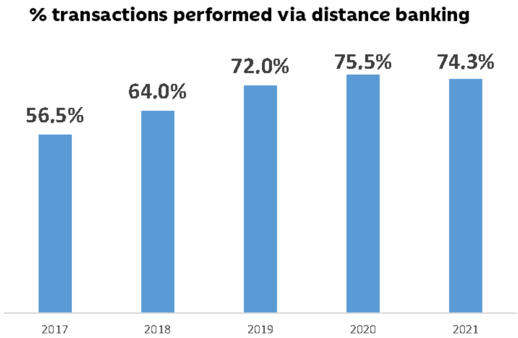
b. **13.4%** of **non-subrogated mortgage loans**.

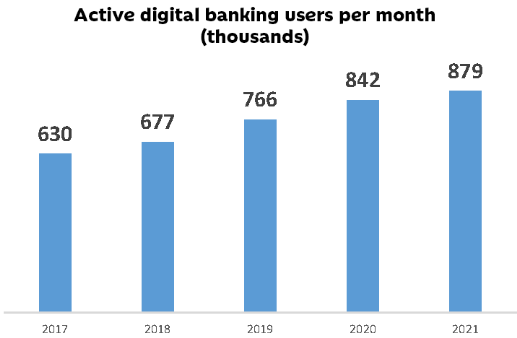
c. **91.4%** of **pre-qualified loans.**

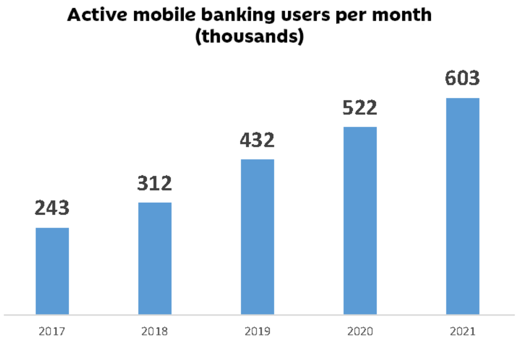
d. **29.4% and 19.6%** of **pension plans and investment funds, respectively.**

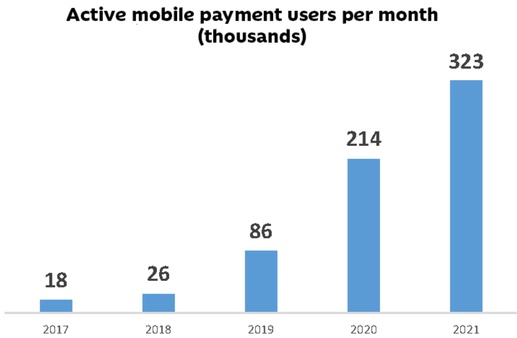
e. **5.2%** of **non-life risk insurance.**

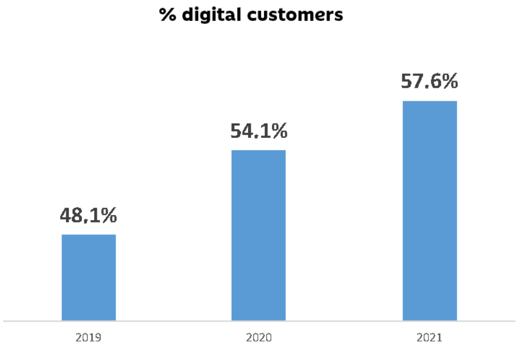
In addition to the new digital capabilities implemented in the non-face-to-face channels, the Marketing Automation System, **Adobe Campaign**, has enabled optimal integration between the Entity's business intelligence and the different communication and relationship channels.











BUSINESS MODEL AND SUSTAINABILITY

Since it was formed 145 years ago, the Bank has maintained a **sustainability commitment,** which is reflected in the social, economic and environmental approach of its activities. The Group is aware that financial institutions have a key role in sustainable development, mobilising the necessary capital flows and integrating environmental, social and corporate governance risks and opportunities into management. In 2020, the Board of Directors approved the **Group's Sustainability Policy**. This document reflects the commitment to sustainable growth and establishes the framework for global action in sustainability.

Ibercaja incorporates sustainability into its business model through different channels, including most notably:

- **Financial product offerings** which contribute to achieving sustainable development by reducing the carbon footprint and by mitigating the effects of economic activity on the climate: catalogue of investment funds and pension plans managed with ESG criteria, financing of renewable energy projects, financing to companies committed to sustainability and the environment, offering in the rental of cero emission vehicles, etc.

- Environmental care in **energy and property management**: central headquarters recognised as a green building in line with ISO 14001.

- **The Organisation's commitment to the Sustainable Development Goals** of the 2030 Agenda; signing of the United Nations Principles for Responsible Banking, together with the Bank's inclusion in the New Deal for Europe "CEO's call to action" initiative and the recommendations of the Task Force for Climate-Related Financial Disclosures (TCFD).

- **Commitment to employees:** development of their capabilities, Family Responsible Company Seal, training in sustainable finance, corporate volunteering, etc.

- **Commitment to society:** its social sensitivity is manifested in its daily activities and in obtaining resources that revert to society through the generation of wealth and welfare and through the social action of the Bank's shareholder foundations.

> ***Sections 2 and 6*** *of this document explain in further depth and quantify the aspects related to* ***sustainability****.*

FACTORS AND TRENDS THAT MAY AFFECT THE FUTURE PERFORMANCE OF THE GROUP

The trends for 2022 are framed in a context in which a certain degree of control of the health crisis means that the sectors most affected by the pandemic will be reactivated, and other sectors will gradually reach pre-pandemic levels of activity and employment. There is the threat to development posed by escalating inflation, which erodes household consumption capacity, squeezes business margins and hampers competitiveness. A fiscal policy to support the recovery and the arrival of European funds will allow investments in infrastructure, digitalisation and the environment to modernise and relaunch the economy.

On the banking side, the negative interest rate situation, which puts pressure on credit revenues, could change in the context of the measures to curb the inflationary situation mentioned above. In this scenario, **the Group's objectives and strategies focus on boosting the profitable growth of loans**, in particular, those aimed at companies, maintaining the pledge for other alternative income sources which, in turn, provide the customer with value-added products and services, such as investment funds and pension plans, accelerating the growth in risk insurance at the same time. Reducing non-performing assets and the cost of risk, together with monitoring NPLs, are a priority at a time when a large part of the moratoriums and deferrals on ICO loans granted in 2020 are due to expire. Cost reduction is a permanent objective, given the narrowing of margins, competition between institutions and the growing offer of financial services by new players.

Digitalisation in all areas of business must continue to progress to boost digital proximity with the customer, to make their relationship with the Bank easier and more efficient and to foster efficiency and productivity. Lastly, it is necessary to favour the transition towards a sustainable economy by developing the guidelines expressed in the Bank's Sustainability Policy and the Roadmap of the "Desafío 2023" Plan.

The **specific strategic challenges for each business area** in the short and medium term have been described above in their corresponding sections.

4.5.5 Financial Group

102-5, 102-45, 103-1, 103-2, 103-3, FS6

> *The Financial Group's activity enables it to provide customers with investment solutions of recognised prestige, expert support to strengthen their relationship with the Bank, as well as to diversify the business and generate recurring income.*

Created in 1988 and wholly owned by Ibercaja, the division is made up of savings and income generation mix **companies specialising in investment funds, savings and pension plans, bancassurance and leasing/renting**. Its products, which are aimed at both individuals and companies, are distributed mainly through the branch network and digital channels, complementing the Bank's range of banking products and services.

> **DIFFERENTIATING VALUES**
>
> *The **innovation** and **specialisation of the offer** are **differential values of the Ibercaja Financial Group**.*

The companies that form part of the Financial Group are:

IBERCAJA BANCO

100% WHOLLY OWNED BY IBERCAJA

IBERCAJA GESTIÓN	CIU manager	Equity 18.4	Fashion share 5.8%	#6
IBERCAJA PENSIÓN	Pension plan management company	Equity 7.6	Fashion share 6.0%	#4

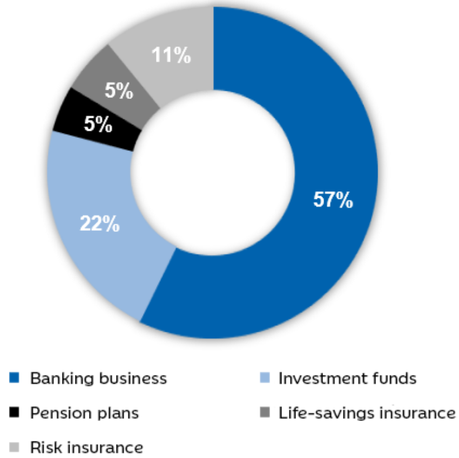
IBERCAJA MEDIACIÓN	Insurance intermediation	Premiums 0.3	Alliance with Caser	caser seguros

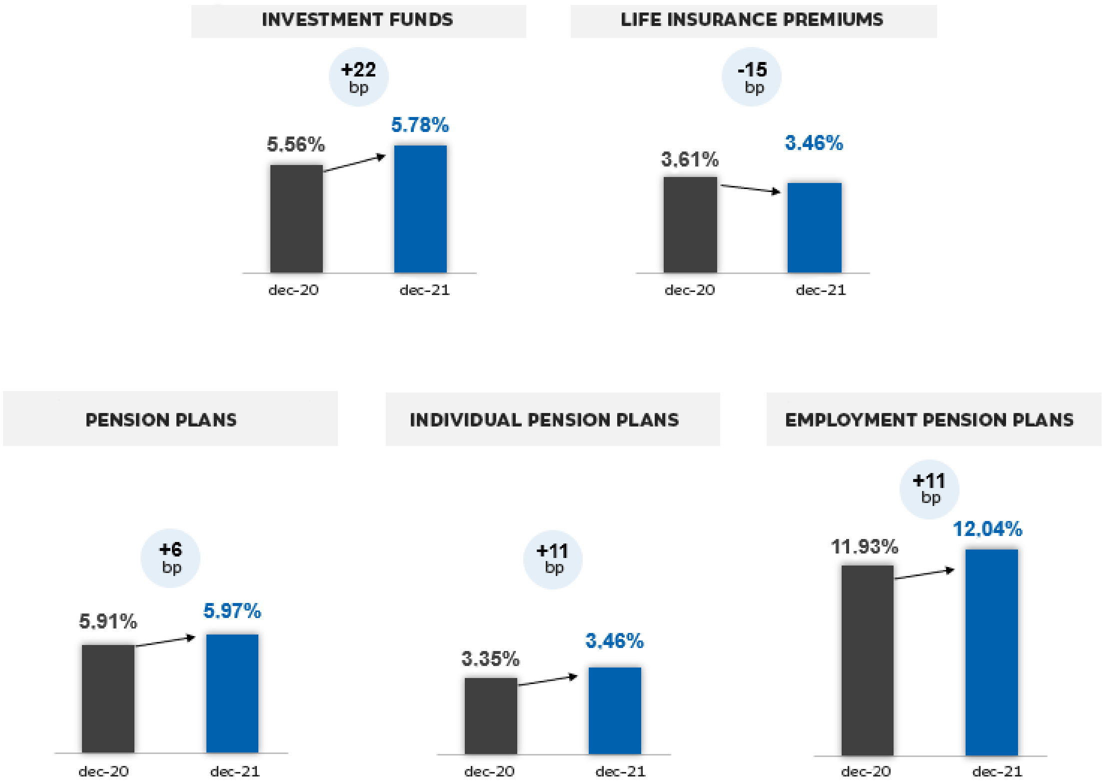
Figures expressed in billions of euros.

Contribution to recurrent revenues:

The **assets under management and insurance** account for **43% of the Group's recurrent revenues and 47% of the retail customer funds** managed by the Entity, giving rise to one of the most diversified mix of savings and income generation in the Spanish banking system.



Ibercaja achieved market share gains in the most significant segments:



Note: INVERCO, with the publication of the April investment fund statistics, standardised the criteria for exclusion from the assets of funds that invest in the manager's own funds (funds of funds). This change led to a decrease in the system's overall net worth and a readjustment of quotas, bringing Ibercaja Gestión's shareholding at the end of December 2020 to 5.56%.

Sustainability:

The Financial Group is part of Ibercaja's **"purpose and sustainability" strategic initiative**, led by the Brand, Reputation and Sustainability Division. The initiative began in 2021 and will run until 2023. The objective of the Financial Group is to identify risks and opportunities in this area, responding to the sustainability, regulatory and market challenges of its component companies. In this way, the Financial Group promotes different actions linked to governance, regulatory adaptation, risk management and the development of the sustainable products business, having achieved the following **sustainability achievements in 2021:**

Governance:

- The Financial Group forms part of Ibercaja's **Reputation and Sustainability Committee** to manage the sustainability strategy with a consolidated vision.
- **New policies** relating to sustainability have been developed and approved:
  - **Sustainability Policy**, to evidence and formalise the Financial Group's commitment to sustainable development and value creation through its activity and to establish the global action framework for the Group in matters of sustainability, containing the commitments voluntarily assumed to promote long-term sustainable, inclusive and environmentally-friendly growth, with a long-term vision[1].
  - **The Sustainability Risk Integration Policy**, which establishes the principles, processes and governance framework, governing ESG risk integration in the investment decisions.

[1] In compliance with the provisions regarding transparency in the incorporation of sustainability risks in investment management of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 (SFDR).

- **Exclusions Policy**, to ensure that the investment policies are not exposed to unethical, irresponsible or unsustainable activities, and to contribute to the attainment of the UN Sustainable Development Goals (SDGs) in the framework of the ESG Risk Integration Policy.
- **Adverse Incident Policy** for identifying, analysing and managing the impacts of the investment decisions that may negatively affect sustainability factors (EU Regulation 2019/2088)[2].
- **Implication Policy**, including the general principles, criteria and procedures to foster the long-term involvement of shareholders in listed companies[3].

- In addition, the Financial Group already had an **ESG Committee** to promote the implementation of responsible investment strategies in asset management.
- As a sign of the commitment of the Financial Group and its management companies to sustainable investment, in 2021, Ibercaja Gestión adheres to the **United Nations Principles for Socially Responsible Investment (UNPRI)**, to which Ibercaja Pensión had already adhered in 2011.
- In 2021, both managers signed up for the Net Zero Asset Managers initiative to achieve CO2 neutrality for themselves and their portfolios by 2050 and joined the **Carbon Disclosure Project** engagement platform. This is an independent non-profit organisation that maintains the world's largest database of corporate climate change information and enables investors to manage their environmental impacts better.

[2] Pursuant to Art. 4.1.a and 4.2 of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability disclosures in the financial services sector (SFDR).
[3] In compliance with the requirements of article 224 bis of the Consolidated Text of the Securities Market Act, approved by Royal Legislative Decree 4/2015, of 23 October, introduced by Act 5/2021, of 12 April, amending the Consolidated Text of the Capital Companies Act, approved by Royal Legislative Decree 1/2010, of 2 July, and other financial regulations, with regard to the promotion of long-term shareholder involvement in listed companies.

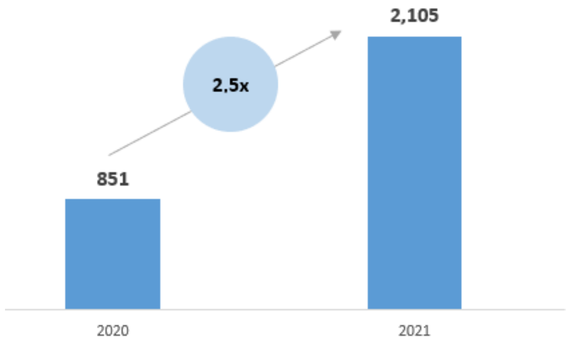
ESG risk management:

- Identification of Material Sustainability Risks **(physical and transitional)**.
- Selection of tools to provide **ESG data** for use by all companies, facilitating investment decision-making and regulatory reporting.

Business development:

- **Launch of new sustainable products:**
  - Two investment funds, one pension plan and one SICAV that meet sustainability characteristics (*).
  - Two sustainable leasing products: "Leasing Sustainable Crops" and "Leasing Photovoltaic Energies".
  - In addition, pending launch in early 2022, both a savings insurance and a discretionary management portfolio promoting sustainability have been developed.
- Ibercaja is thus already providing **sustainable investment solutions** to the tune of 2.105 billion at the end of 2021:

ESG investment trend (million euros)



(millions of euros and number)		Equity	△ Equity	Unitholders
PENSION PLANS		669	350	48,052

SICAV		4	4	175
Asguard (*)		4	4	175
	Total	**2,105**	**1,254**	**121,169**

(*) New products launched in 2021.

- A business plan for sustainable products has also been designed.

Regulatory adaptation:

- Adaptation to the **Disclosure Regulation**:
    - Policy development.
    - Adaptation of pre-contractual information.
    - Disclosure of ESG obligations on websites.
- Adaptation to the Directive on **encouraging long-term** shareholder engagement
    - Since 2021, asset managers have had a global **proxy advisor** who advises them on exercising their voting rights based on ESG criteria.

Solidarity activity:

- This activity has been undertaken intensively in 2021 through Ibercaja **Sustainable and Solidarity FI and Ibercaja Sustainable and Solidarity Pension Plan**. To this end, a **Steering Committee and a Technical Committee** have been set up to steer and supervise the distribution of funds and the internal and external communication of the initiative. In 2021 it distributed **585,000 euros in three major items**:
    - **Five major projects received a total of 460,000 euros:**
        - Unicef's "Protecting the most vulnerable children from the effects of the COVID-19 pandemic in Senegal with basic supplies".
        - Cruz Roja's "Improving the employability of people in a situation or at risk of social exclusion and facilitating their integration in the workplace and active inclusion processes".
        - LG Smart Green's "Reforestation and ecosystem recovery in Alpedroches (Guadalajara) in the Alto Tajo".
        - Fundación Oxigeno's "Micro-plastics, macro-litter. Environmental education and volunteering to improve our rivers and beaches".
        - Caritas' "RE- Fashion. We recycle clothes, we incorporate people in the workplace".
- **Through their votes**, the unitholders of the Plan and Fund had the opportunity to distribute the grants with varying amounts among these projects.
        - Six projects of small organisations working in the fields of disability, illness, social exclusion and environmental protection received a total of 45,000 euros.

- Twelve Food Banks in Zaragoza, Huesca, Teruel, Guadalajara, Rioja, Burgos, Badajoz, Madrid, Barcelona, Lleida, Valencia and Seville received 80,000 euros to meet urgent needs.

Management of collective investment undertaking

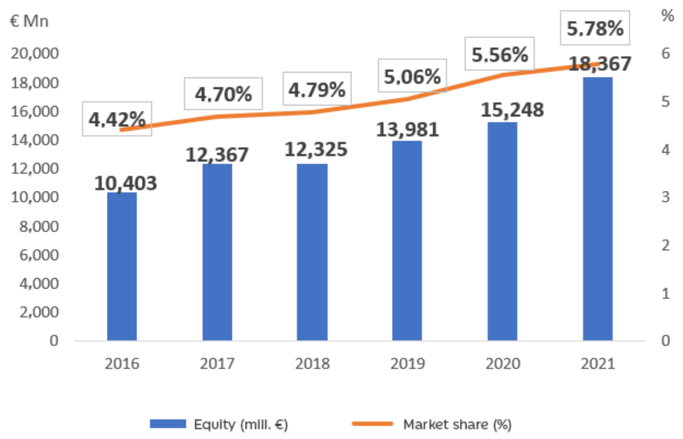
Ibercaja Gestión, SGIIC, S.A. is the company tasked with managing the Group's collective investment undertakings (CIUs).

The **assets managed by Ibercaja Gestión**, **18,367 million euros**, were up by 20.5% vs 15.7% of the sector, achieving a new record in assets under management. Renewed investor confidence and positive developments in the financial markets contributed to this excellent performance.

- **Net contributions** totalled 2,337 million euros, more than 100% higher than in 2020, making it the fifth banking group with the best fund gathering figures in Spain during the year, 9.1% of the industry's total.
- **The weighted average return** was 5.0%; 77% of the funds managed by Ibercaja Gestión ended the year with positive returns and 100% in the range of profiled funds.

The **market share**, **5.78%** (source: INVERCO), reached a new all-time high, having increased by **22 basis points** since the previous December. In the last five years, assets under management have grown by 76.6% and, in the last ten years, the volume invested in funds by the Bank's customers has quadrupled. The Management Company consolidates its position in the **sixth Group in the sector ranking.**

Trends in assets and market share in investment funds:



Ibercaja Gestión has **63 investment funds** adapted to any market situation and to different investor profiles. In addition, it manages **13 SICAVs in Spain** with a volume of **72 million euros** and maintains a **management agreement for the Luxembourg-domiciled SICAV**, Ibercaja Global Internacional, which has assets of 45 million euros.

The **increase in the weight of absolute return funds**, which increased their volume by 113.5% in 2021, and the positive performance of **equity funds**, which grew by 30.7% in a very favourable year for the stock markets, stand out in the changes in the weight of the different families in the total assets under management.

Distribution of investment fund assets by type (source: INVERCO)

	2021		2020		2019	
	€Mn	%	€Mn	%	€Mn	%
Fixed income funds	6,611	36.0	5,595	36.6	4,841	34.6
Equity funds	3,061	16.7	2,341	15.4	2,262	16.2
Mixed funds	5,757	31.3	5,378	35.3	4,554	32.6
Global funds	46	0.3	47	0.3	135	1.0
Guaranteed funds	647	3.5	835	5.5	967	6.9
Absolute return funds	2,245	12.2	1,052	6.9	1,222	8.7
Total	**18,367**	**100.0**	**15,248**	**100.0**	**13,981**	**100.0**

The **focus on diversification**, through portfolios of profiled funds (funds of funds combining investment in bonds and equities), combined with the demand for **investment solutions governed by ESG criteria** were the **key growth drivers in the year.** The portfolios increased their assets by 42%, while the funds managed with ESG criteria multiplied by 2.7 times the 2020 volume at the end of the year. Within the range of sustainable solutions, Ibercaja Sostenible y Solidario FI has consolidated its position as one of the manager's largest funds, with more than 36,000 participants and 825 million in assets, which has enabled it to support various social and environmental projects. In 2022, the range of sustainable solutions will be further boosted with two new launches at the beginning of the year: Ibercaja Confianza Sostenible FI and Ibercaja Infraestructuras FI.

In February, two funds were launched, Ibercaja Renta Fija Empresas FI and Ibercaja Diversificación Empresas FI, designed to channel the stable surplus liquidity of companies and institutions. The objective of both is to enhance the returns, with controlled volatility, obtained in traditional liquidity management instruments. These funds were well received by this type of customer, with inflows of more than 121 million euros.

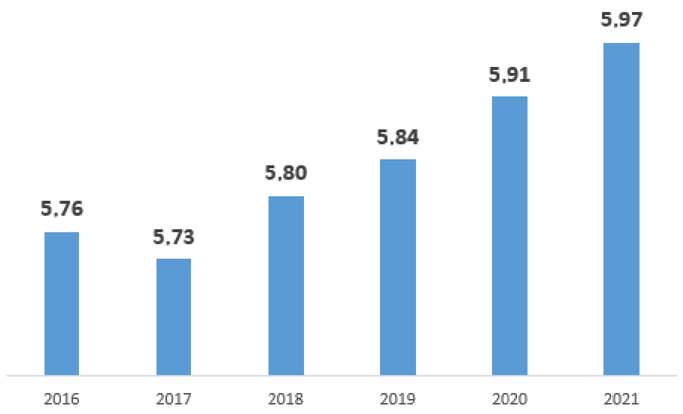
In the 2021 edition of the **Expansión-AllFunds Bank** awards, Ibercaja Gestión was recognised as "Best Asset Allocation Manager" and was a finalist in the "Best National Manager" and "Best Fixed Income Manager" categories.

Pension plan management

Ibercaja Pensión, EGFP, S.A. is the Group company engaged in managing different kinds of pension plans. The company is a signatory of the United Nations Principles for Responsible Investment and a founding member of Spainsif, the Spanish forum for Socially Responsible Investment.

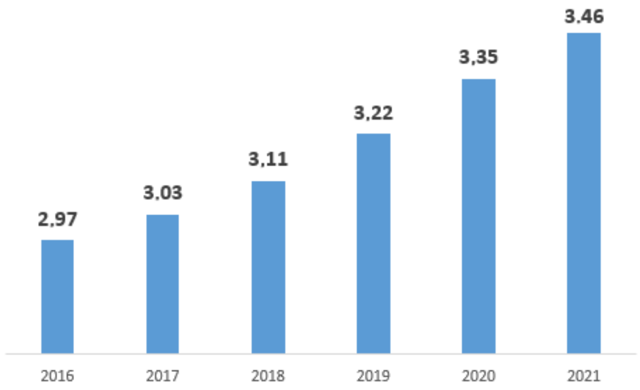
The **assets managed** at year-end, **7,640 million euros**, were 9.0% up on 2020 (sector 8.0%). The **market share** reached an all-time high of **5.97%** after adding **6 basis points during the year**, and the Management Company climbed to **fourth position** in the sector ranking (source: INVERCO).

Trend in pension plan market share:



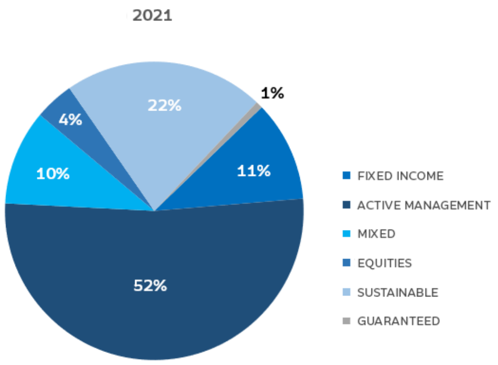
Savings managed in **individual system pension plans** increased by 12.3% to **3,090 million euros**, significantly above the variation experienced by the sector (+8.9%). Customer contributions amounted to 102 million euros in a context marked by reducing the legal limit for tax-deductible annual contributions. The **market share**, **3.46%**, advances **11 basis points** from December 2020, moving the company to **sixth in the sector ranking** (source: INVERCO). The number of customers with individual plans increased by 6,645, reaching 244,165 by the end of 2021.

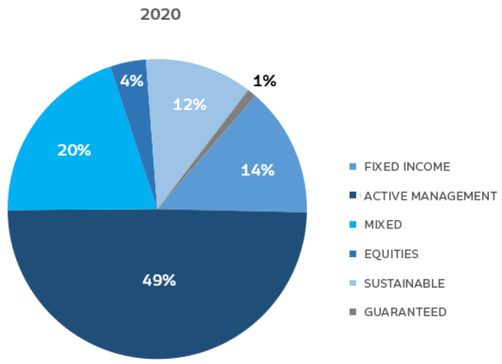
Trend in personal pension plan market share:



In the **distribution of individual pension plans by type**, the **substantial expansion of products with a sustainable profile** stands out, accounting for 22% (670 million) of total assets, compared to 12% in 2020. **The active management range consolidated with 52% of the volume** and the weight of fixed income and guaranteed plans continued to decline, with 12% of the total, down from 15% a year ago.

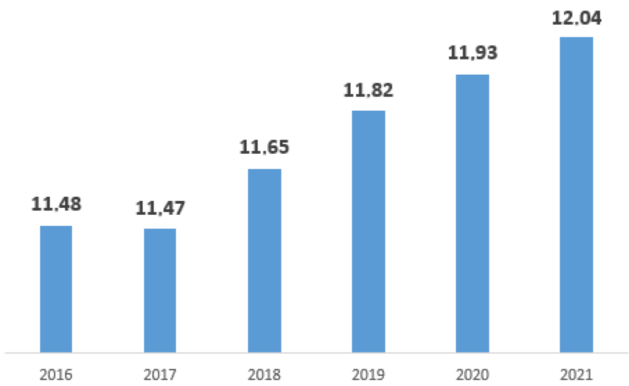
Distribution of individual pension plans by type:





Assets managed in **employment plans** amounted to **4,548 million euros**, up 6.8% on 2020 (sector -5.9%). The **market share**, **12.04%**, adds **11 basis points** and the company consolidates its position in **third place** among Spanish fund managers (source: INVERCO). This system comprises 69,091 unitholders through 15 plans. Ibercaja Pensión administers two of the ten largest employment plans in the country.

Work pension plan market share trend:



In the 2021 edition of the **Expansion All Funds Awards**, Ibercaja Pensión was a finalist in the category of best pension fund manager, the sixth consecutive time it has been nominated, having won the award on four occasions. The Sustainable and Solidarity PIP was also a finalist for the fourth consecutive year in the "Best Solidarity Fund" category.

Ibercaja Pensión

XXXIIIII FUND AWARDS 2021 EXPANSION-ALLFUNDS BANK
Finalist Best National Pension Fund Manager 2020

Ibercaja Sustainable and Solidarity Pension Plan

XXXIIIII FUND AWARDS 2021 EXPANSION-ALLFUNDS BANK
For the fourth year running:
Finalist in the Best Solidarity Fund category

Insurance business

The Group's insurance business is carried on through **two companies operating in the life and non-life lines**, providing products and specialised support to Ibercaja Banco's branch network:

- **Ibercaja Vida Compañía de Seguros y Reaseguros S.A.U.** specialises in life insurance, with a proven track record in the bancassurance business since 1996. The Entity produces life savings and life risk insurance that it brokers through Ibercaja Mediación and distributes through Ibercaja Banco's commercial network and digital channels. The volume of technical provisions of the insurer, 6,775 million euros at the end of 2021, represents a market share of 3.46% (source: ICEA). The solvency ratio is well above the legal limit of 100%, reaching 265% in December 2021.

- **Ibercaja Mediación de Seguros S.A.U.** is engaged in general insurance brokerage. Through the Bank's branch network and digital channels, it markets risk insurance (life and non-life) and retirement savings for individuals and companies. The company's activity also extends to operations regulated by Royal Legislative Decree 1/2002, which approves the Consolidated Text of the Pension Plans and Funds Regulation Act. The Bank has a strategic alliance with Caser in the non-life insurance area.

LIFE-SAVINGS INSURANCE

Ibercaja Vida produces an extensive range of life savings products: systematic savings insurance, investment savings (life annuities, temporary annuities, capital plans and insured pension plans) and unit-linked. The amount of premiums and the number of policies are shown in the table below:

	2021	2020	2019
No. policies	446,418	489,335	531,554
Savings insurance premiums (€ million)	826	884	862

Mathematical provisions for life insurance savings, 6,643 million euros, declined 3.4%, impacted by the low-interest-rate environment. Systematic savings insurance accounts for slightly less than 40% of the total due to the diversification towards link products, given policyholders' need to make their assets profitable in the current financial context. As a result, the Unit Linked balance at the end of December 2021 will reach a volume of 1,690 million euros, almost double that of 2020. The market share in this segment was 9.95%. The portfolio of investment savings products, mainly annuities and life annuities, amounted to 2,235 million euros. As a result of the temporary closure to marketing, given the current scenario of negative interest rates and the inherent loss ratio of the product, the managed volume decreases by 7.1% in 2021.

Distribution of mathematical provisions for life insurance savings:

	2021		2020		2019	
	€Mn	%	€Mn	%	€Mn	%
Systematic savings insurance	2,531	38.1	3,425	49.8	4,243	58.3
Savings and investment	2,235	33.6	2,404	35.0	2,509	34.5
Unit Linked	1,690	25.5	850	12.3	314	4.3
Other	187	2.8	199	2.9	211	2.9
Total	**6,643**	**100.0**	**6,878**	**100.0**	**7,277**	**100.0**

RISK INSURANCE

The **risk insurance premiums** brokered by Ibercaja Mediación, **284 million euros**, grew by 3.0% compared to the previous year and policies totalled 983,032.

- **Life insurance premiums** increased by 2.6% to **78 million euros**. Ibercaja Vida, with 73 million euros of premiums brokered in individual life insurance, it is the leading insurer in the life insurance business. The rest of the premium volume of life insurance policies comes mainly from Caser. New production is up 53% year-on-year.

(€ million)	2021	2020	2019
Life insurance premiums	78	76	78
. Of which: Ibercaja Vida (*)	73	71	72

(*) In addition, Ibercaja Vida produces premiums of 3 million euros in group risk insurance linked to the pension plan for Ibercaja Banco employees.

- **Non-life insurance premiums**, **206 million euros**, increased 3.1%. The boost in activity is the result of the commercial effort and the alliance with Caser to distribute this type of insurance through the branch network. New production associated with the agreement with Caser increased 45.6%, while the backlog rose 6.6%. The most noteworthy advances were in death insurance (+19.5%), civil liability (+9.5%) and home insurance (+5.8%). The market share in non-life insurance premiums, at 0.54%, remains at similar levels compared to 2020 (source: in-house creation based on data published by ICEA).

(€ million)	2021	2020	2019
Non-life insurance premiums	206	200	198
Of which: agreement with Caser	183	172	170

Ibercaja Mediación has promoted various **actions throughout 2021 to boost the non-life insurance business:**

- "Yavoiyó", home insurance with specific coverage for second homes.
- Rent protection, insurance that protects the owner of a rented property or premises against rent default.

- Inmuebles Flexible, aimed at Communities of Owners, which includes new coverage and the improvement and extension of some of the existing ones.
- In line with Ibercaja's sustainable business strategy, Caser Auto insurance has been adapted to the needs of electric vehicles, in addition to the inclusion of the Autohelp service.

Leasing and Renting

Ibercaja Leasing y Financiación S.A. specialises in financing productive activities through leasing and renting. It provides the branch network with products for SMEs and professionals to finance their fixed-assets investments, offering renting to companies, the self-employed, and individuals.

The **outstanding risk**, **562 million euros**, remains stable compared to 2020. The **market share** amounts to **2.86%** source: Spanish Leasing and Renting Association). The **amount of new contracts** reached **247 million euros.** Of the total number of new operations, 56.21% were for financing non-industrial vehicles, 22.58% for industrial vehicles, 15.50% for machinery, 2.21% for computer equipment and the rest (3.50%) for real estate, furniture and other facilities. It must be highlighted that approximately four out of ten transactions arranged corresponded to the vehicle renting business. As a result, the fleet of leased vehicles totals 4,765 units.

The **default ratio** of Ibercaja Leasing y Financiación S.A., **1.93%**, is significantly lower than the average for financial credit institutions (6.56% at November 2021). In turn, the **coverage ratio** stood at **69%** of doubtful balances.

The Company's commitment to caring for the environment is evident in the commercial campaigns carried out during the year. The sustainable mobility offer has been boosted by offering customers the possibility of contracting 100% electric vehicles, totally ecological and with zero emissions, making a wide range available to cover different needs. The marketing of **two new sustainable products has also been launched**: the **leasing of sustainable crops**, aimed at financing investment in farms that optimise water consumption and allow higher crop yields, and the **leasing of photovoltaic energies**, which facilitates the financing of investments in energy efficiency installations initially intended for self-consumption.

Ibercaja Leasing has obtained the prize awarded by the Spanish Leasing and Renting Association for the most sustainable operation carried out in November 2021 in relation to the sustainable crops product.

5 Significant information of the Ibercaja Group: main aggregates

5.1 Highlights for the period at the Ibercaja Group

102-7, 102-10, 103-1, 103-2, 103-3

> In a complex context for business development, the Group's specialisation strategy, the strength of its hallmarks and the quality of its balance sheet have proven their worth.

> *In the first year of the "Desafío 2023" plan, Ibercaja's commercial activity has been very dynamic, achieving **notable advances in key segments** for the business strategy, such as **asset management**, **insurance distribution** and **company financing**.*

- **Retail funds**, 70,163 million euros were up 7.3% thanks to **asset management and insurance**, whose volume **grew** 12.9%, bringing its share of total managed savings to 47.1%.
- The **assets of the investment funds** managed by Ibercaja Gestión **maintained their upward trend**, totalling 18,367 million euros, with an increase of 20.5% over the year, above the 15.7% recorded by Spanish CIIs as a whole. Contributions, 2,337 million euros, were double those of a year earlier, and the market share, 5.78%, was **up 22 basis points**.
- The volume under management in **pension plans** increased by 9.0%, allowing the market share of 5.97% to add **6 basis points**. In **individual and work plans,** the share of each of them rises **by 11 basis points.**

- The **sustainable and supportive investment**, materialised in investment funds and pension plans, **multiplies its assets by 2.5 times in one year**, demonstrating the Group's commitment to sustainability.

- The **credits and loans being arranged, 5,421 million euros**, **recovered to pre-pandemic levels** and almost 60% of them are allocated to companies. Lending for house purchases has been revitalised in recent months so that new production in the fourth quarter was more than 70% higher than the average of the first three quarters, stabilising the portfolio in the latter part of the year. Also noteworthy was the strong dynamism of the volume of outstanding loans, 15.7% higher than in 2020.

- The new Corporate Banking Area has given a **significant commercial boost to the productive activities business**. **Standard loans to companies grew 6.9%,** increasing the market share by eight basis points in the year. Ibercaja, in collaboration with experienced consultancy firms, has made available to customers an advisory service to access funds from the NextGenration EU plan to take advantage of the investment opportunities that these funds represent.

- **New life and non-life premium income rose** 33% year-on-year to **66 million euros**.

*The Group reported a **net profit** of **151 million euros, 127 million more than the previous year**. Typical banking revenues grew 2.5%, thanks to the progress in the asset management business, while provisions for credit and real estate risk normalised after the extraordinary provisions made in 2020 to cover the potential economic impact of the pandemic on the loan*

- The interest margin reflects the repricing of the mortgage portfolio due to the decline in the yield curve and the lower contribution of debt securities. Fees increased 16.9% due to the excellent performance of off-balance-sheet managed savings. As a result, **overall recurrent revenues increase by 2.5% and exceed the stability target for 2021.**

- Recurrent operating expenses rose 5.4% year on year. **In the coming months, the cost base will include the effect of the Redundancy Plan** signed by the Entity with the workers' representatives in December 2020. The departures of the employees covered by the redundancy programme will take place progressively until June 2022, so it will be a catalyst for profitability in the coming year.

- Write-offs of foreclosed loans and real estate, at 114 million euros, were 119 million euros lower than in the previous December due to lower NPL entries and because an extraordinary provision of 90 million euros was set aside in 2020 to cover the potential impact on the loan portfolio of the economic effects of COVID-19. The **cost of risk** falls to **35 basis points**, which is significantly below the cost, 71 basis points, of 2020.

- The dividend distribution of 98.14 million euros, which the Board of Directors will propose to the General Meeting of Shareholders, represents a **pay-out of 65%.**

> ***The reduction of non-performing assets on the balance sheet*** *continues without the weak economic environment having translated into a decline in the credit quality of lending, which is highly hedged. The bank maintains the* ***strength of its capital ratios*** *with a* ***CET1***

- The **non-performing assets** decrease by **29.2%, compared to the change, -4.7%, in the sector** (latest information as at November), with the NPL ratio falling by 91 basis points to 2.30%. The positive gap with respect to credit institutions as a whole widened to 199 basis points. The **coverage ratio of non-performing exposure** rose by over 11.4 percentage points to **75.31%**.

- The **aggregate of problem exposure, doubtful and foreclosed assets** was reduced by 373 million euros. The **problem asset ratio, 3.97%**, has fallen by 110 basis points since December 2020. The **coverage ratio** of these assets, **68.79%**, rises by almost seven percentage points.

- The Group has a **sound funding structure** based on the deposits of retail customers, who account for **79.8%** of outside funding, so the loan-to-deposit ratio (LTD) ratio is below 100%. The **Group's liquid assets** represent **26.0% of the balance sheet** and comfortably cover all wholesale debt maturities.

- The **CET1 fully loaded ratio added 12 basis points to 12.71%**, exceeding the Group's medium-term target. The total capital ratio is 17.43%, one of the highest in the Spanish banking system. These ratios are above the PRES 2021 requirements and those that will come into force in March 2022.

Assets

The **total assets** of the consolidated balance sheet amounted to **58,631 million euros**, compared to 58,401 million euros in December 2020; the 0.4% increase was mainly due to the growth in the securities portfolio.

Loans and advances to customers recognised as financial assets at amortised cost, and financial assets not held for trading, which must be measured at fair value through profit or loss, came to **30,655 million euros**, 0.9% less than at year-end 2020. In gross terms, i.e., without value adjustments for impairment of assets and other impairments, the loan portfolio amounted to 31,195 million euros. "Healthy" lending, at 28,862 million euros, excluding non-performing assets and reverse repos, declined by 93 million euros or 0.3% year on year. The profile of the Group's portfolio is low risk, with home loans accounting for 63% of the total. Without losing this specialisation, the Bank is progressively increasing its share of corporate loans, representing 28% of the total performing lending balance.

Distribution of loans and advances to customers by purpose:

	Figures in thousands of euros			
	31/12/2021	31/12/2020	Change	Change (%)
Loans to households	19,818,759	20,382,751	(563,992)	(2.8)
Housing	18,100,029	18,614,885	(514,856)	(2.8)
Consumer loans and other	1,718,730	1,767,866	(49,136)	(2.8)
Corporate loans	8,015,693	7,497,607	518,086	6.9
Real estate development	973,401	940,570	32,831	3.5
Non-real estate productive activities	7,042,292	6,557,037	485,255	7.4
Public sector and other	1,027,984	1,075,429	(47,445)	(4.4)
Gross loans, ex impairments and reverse repos	28,862,436	28,955,787	(93,351)	(0.3)
Reverse repurchase agreements	1,615,394	1,620,857	(5,463)	(0.3)
Impaired assets	717,621	1,012,938	(295,317)	(29.2)
Gross loans and advances to customers	31,195,451	31,589,582	(394,131)	(1.2)
Impairment losses and others	(540,425)	(647,178)	106,753	(16.5)
Loans and advances to customers	30,655,026	30,942,404	(287,378)	(0.9)

The **normal loans to companies** amounted to 8,016 million, an increase of 6.9%. The market share of credit to non-financial corporations climbed eight basis points to 1.5%. The **financing of non-real estate productive activities** rose by 7.4%, due to the boost given to the corporate business, a key element in Ibercaja's strategy of diversifying its credit mix. Although of reduced importance, exposure to real estate development increased by 3.5%, in line with the reactivation of this sector in the residential sector. **Home loans** declined by 2.8%. Its main component, **home loans**, dipped by 2.8%. New production is still insufficient to compensate for natural maturities of the portfolio and higher early redemptions because of the accumulated savings pool and the level of retail deposit rates. However, there was a clear recovery in the last months of the year due to the boom in formalisations, so the portfolio in the fourth quarter remained virtually unchanged from the third quarter. In turn, **consumer credit and other financing to households,** with a limited weight in overall investment, fell by 2.8% due to a 4.4% decline in consumer credit, in an environment in which household spending is still recovering slowly.

Loans and credits being arranged totalled **5,421 million euros**, reaching pre-pandemic levels. New production to companies totalled 3,188 million euros, lower than the figure obtained in 2020 due to the base effect, since last year, it was enormously boosted by the granting of ICO credit lines partially guaranteed by the State with which companies stockpiled liquidity to mitigate the economic effects of COVID-19. The loans arranged for house purchases amounted to 1,431 million euros, similar to last year's amount. It is worth noting that they are revitalising after the sluggishness of previous months so that new production in the fourth quarter was more than 70% higher than the average granted during the first three quarters of 2021. In terms of geographic markets, Madrid and the Mediterranean Arc accounted for more than 51% of the year's new loans, while the Traditional Area accounted for 34%. In addition, the arrangement of working capital loans for companies exceeded 7,450 million, 15.7% more than in December 2020.

Asset quality indicators (non-performance rate, foreclosed assets and coverage)

Equity and problem asset coverage	3,770,479	3,825,221
Texas Ratio (%)	33.41%	42.68%

The **asset quality indicators** **are evolving favourably** without the weakness of economic activity in some sectors and the maturity of most of the mortgage moratoriums being reflected in their trajectory. Impaired loans and advances to customers, at 718 million euros, declined 29.2% in the year due to the slower pace of NPL entries (down 26%) and the sale of a 51 million-euro portfolio of non-performing loans. Meanwhile, the volume of recoveries remained stable at 22% of the initial balance of non-performing loans. The contraction of impaired assets in Ibercaja has been significantly higher than that of the sector (-4.7% according to the latest statistical information from the Bank of Spain at the end of November).

The NPL ratio, 2.30%, is one of the lowest in the Spanish banking system. This ratio fell by 91 basis points compared to the end of 2020, widening the favourable spread vis-à-vis all banks to 199 basis points (130 basis points at the end of 2020). The coverage ratio of non-performing loans rose from 11.4 p.p. to 75.31%, one of the highest among comparable institutions.

The **foreclosed real estate portfolio**, recorded under the balance sheet headings investment property, inventories and non-current assets held for sale, totalled **542 million euros gross**, down 12.5% on December 2020, mainly as a result of the recovery in sales, up 52% on the previous year, following the upturn in the real estate market. Land sales amounted to 100 million, 56% of the total. The performance of inflows was also more favourable, falling by 10% year on year. The coverage of all real estate is 60.16%, with land coverage reaching 68.43%. The net value of foreclosed assets, at 216 million euros, decreased by 14.3%, representing only 0.4% of the balance sheet.

Problem assets, amounting to **1,260 million euros**, the sum of non-performing loans and advances to customers and foreclosed properties, fell 373 million euros or 22.8% in relative terms. Excluding hedges, net problem assets, at 393 million euros, declined 36.4% to 0.7% of assets. The ratio of problem assets, 3.97%, fell by 110 basis points during the year and the coverage ratio amounted to 68.79%, up almost seven percentage points in December 2020. The Texas ratio, which relates non-performing assets to equity and coverage, decreased to 33.41%, thus improving by 9.3 percentage points in the year.

The Group's refinancing and debt restructuring policy aims to help borrowers experiencing temporary financial difficulties meet their obligations and, where possible, improve risk quality by securing additional collateral. **Refinanced loans** amounted to 539 million euros, down 26.9% on year-end 2020 and accounting for only 1.7% of gross loans and advances to customers. 61.1% of refinanced loans are classified as non-performing, and their coverage is 42.7%. On 20 May 2021, Ibercaja adhered to the Code of Best Practices (CBP) to renegotiate guaranteed financing in Royal Decree-Law 5/2021, of 12 March, on extraordinary measures supporting business solvency in response to the COVID-19 pandemic. The CBP sets out the conditions under which financial institutions will provide debtors with the measures available to companies and the self-employed to renegotiate the conditions of ICO-COVID financing operations. At the end of 2021, the impact of these measures was very low, as only 6.8 million euros of deferrals were granted and there were no requests from customers in relation to the other measures envisaged in the CBP.

Regarding the loan portfolio distribution **by stage**, 5.0% of exposure is included in stage 2 (7.3% for all important Spanish institutions at the end of September), and its degree of coverage is 7.1%. This low level responds to the mortgage bias of Ibercaja's portfolio and a prudent policy of risk concession.

The **Group's portfolio of fixed-income securities, shares and participations in companies** amounts to **18,214 million euros**, of which 7,314 million euros correspond to the insurance business.

The **portfolio affected by banking activity**, 10,901 million euros, increased by 1,992 million euros in the year.

- The **ALCO portfolio** managed by the parent company increased by 2,023 million euros to 10,462 million euros due to acquisitions, mainly Spanish public debt, to restore it after the sale of securities in 2020 and to make the excess liquidity on the balance sheet profitable. This portfolio is made up of low-risk bonds, mainly Spanish government debt (63%) and Sareb bonds (16%), with an average duration, including coverage, of 5.3 years. The objective here is to soundly manage balance sheet interest rate risk, generate recurring earnings to strengthen the interest margin and help maintain comfortable levels of liquidity. According to the accounting classification, 94% of these financial assets are classified at amortised cost.
- **Equity**, 403 million euros, comprised investments in unlisted companies in strategic sectors for the Bank or intended for the territorial development of the regions in which the Bank operates, together with listed shares of domestic and foreign companies. The decrease for the year is 27 million euros.

The portfolio assigned to insurance activity, 7,314 million euros, declined by 243 million.

- **Fixed income**, 5,603 million euros, mainly Spanish public debt and that of credit institutions, decreased by 1,099 million, mainly due to the transfer from systematic savings insurance to Unit Linked. These assets are mainly classified as "Financial assets at fair value through other comprehensive income".

- **Equity**, 1.711 million euros, rose by 856 million euros, owing to Ibercaja Vida's increased investment in units in investment funds that are managed jointly with liabilities under insurance contracts (unit-linked) measured at fair value.

The **asset balance with central banks, credit institutions and cash** is **6,750 million euros**. The decrease in the year of 1,134 million euros, mainly concentrated in the heading "cash balances at central banks", is basically due to the aforementioned purchases of fixed-income securities.

Liabilities to central banks and credit institutions amounted to **6,616 million euros**, 0.6% more than in December 2020. At 5,871 million euros, funding from the ECB increased by 500 million euros, mainly due to the allotment of 559 million euros in the TLTRO III auction in March 2021. At 745 million euros, deposits from credit institutions fell by 463 million euros, mainly due to a decrease of 412 million euros in time deposits and a decrease in the volume of repurchase agreements with other institutions.

Breakdown of cash and assets at credit institutions and deposits from credit institutions and central banks

	Figures in thousands of euros			
	31/12/2021	31/12/2020	Change	Change (%)
Cash and cash balances at central banks and other demand	6,388,624	7,572,609	(1,183,985)	(15.6)
Credit institutions (financial assets at amortised cost)	361,357	311,651	49,706	15.9
Cash and credit institutions	6,749,981	7,884,260	(1,134,279)	(14.4)

Deposits from credit entities	745,174	1,207,820	(462,646)	(38.3)
Deposits from central banks and credit institutions	6,616,302	6,579,022	37,280	0.6

The **tangible assets** amount to **1,004 million euros**, an increase of 43 million euros since December, due to an increase of 18 million euros in property, plant and equipment for own use, as well as in operating leases and investment property of 16 million euros and 9 million euros, respectively. **Intangible assets**, **269 million euros**, comprise goodwill, other items generated from the acquisition of Caja3 and computer software. The development of strategic and regulatory projects explains the increase of 32 million in this heading.

The **tax assets**, **1,304 million euros**, decreased by 3.1%, due to a 3.3% decrease in deferred tax assets, because of their offset in the corporate income tax for 2021.

Equity and liabilities

Customer deposits ended the year with a balance of **38,268 million euros**, 1.0% higher than at the end of 2020. This change resulted from a 2.7% increase in retail deposits, partially offset by the maturity of 525 million euros of covered bonds and the lower repurchase agreements. The increase in retail deposits, sight savings and traditional time deposits without covered bonds or repos was significantly lower than a year earlier when it reached 10.4%. Companies have made use of the liquidity accumulated, taking advantage of the ICO guarantee lines, and household deposits have significantly moderated their pace of growth as uncertainty has been reduced and as a result of the Bank's strategy of diversifying savings towards other financial assets with higher expected returns for the customer.

The **debt securities issued**, **1,316 million euros**, decreased by 24 million euros due to the combined effect of the maturity of securitisation liabilities and the issuance of senior preferred debt, eligible for MREL requirements, for 50 million euros.

Liabilities under insurance or reinsurance contracts, **7,121 million euros**, declined 5.3% due to the negative impact of low-interest rates on the performance of life savings insurance and the strategy of the Entity to encourage the transfer to unit-linked.

The **retail funds** under management on and off the balance sheet, **70,163 million euros**, increased 7.3%. In addition to the increase mentioned above in retail deposits, asset management and insurance grew 12.9% to 33,031 million euros. This item accounted for 47.1% of the Bank's total customer funds and 80% of the year-on-year increase.

Details of total retail customer funds

	Figures in thousands of euros			
	31/12/2021	31/12/2020	Change	Change (%)
Retail deposits	37,131,170	36,165,311	965,859	2.7
Demand deposits	34,673,081	33,014,125	1,658,956	5.0
Term deposits (exc. mortgage-backed bonds)	2,458,089	3,151,186	(693,097)	(22.0)
Asset and insurance management	33,031,334	29,245,650	3,785,684	12.9
Total retail funds	**70,162,504**	**65,410,961**	**4,751,543**	**7.3**

Provisions on the liability side of the balance sheet, **269 million euros**, comprise funds for pensions and similar commitments, outstanding labour costs and other provisions. The net change of 124 million euros was mainly due to the use of balances from previous years associated with redundancy plans, interest rate floor clauses and the Group's pension commitments to its employees.

Equity totalled **3,270 million euros**, 52 million more than at year-end 2020. The 93 million-euro growth in shareholders' equity offset the 41 million-euro decrease in "Accumulated other comprehensive income".

5.3 Income statement

103-1, 103-2, 103-3

> Ibercaja achieved a net profit of 151 million euros, a considerable improvement on the figure for the previous year.

Main headings of the income statement:

	Figures in thousands of euros			Change (%)
	31/12/2021	31/12/2020	Change

Taxes	(63,788)	(29,868)	(33,920)	113.6
Consolidated profit/(loss) for the year	**150,985**	**23,602**	**127,383**	**539.7**
Profit/(loss) attributable to the Parent	**150,985**	**23,602**	**127,383**	**539.7**

The **interest margin** totalled **493 million euros**, **down 7.7% year-on-year**, mainly due to the decline in revenues from lending, the lower contribution from the fixed income portfolio and the lower contribution from the Group's insurance business. Part of this impact, caused by the low-interest rates, has been offset by the lower cost of retail and wholesale funding and the favourable conditions of the financing obtained from the ECB in the TLTRO III auction. In this respect, the Bank, considering the trend in eligible credit and business projections, has accrued interest at -1%.

Revenues from lending fell 14.1%, mainly due to lower unit yields. The average rate, at 1.19%, contracted 17 basis points from 2020 as a result of the repricing of the mortgage portfolio following the decline in the 12-month Euribor, lower market interest rates on corporate financing and the high volume of ICO loans formalised with a reduced yield to which the cost of the guarantee is imputed. It should be noted that the mortgage portfolio has already fully reflected the decline in the benchmark.

The **retail saving cost** fell due to the lower balance and rate of term deposits and the charging of negative interest, in certain circumstances, on credit balances on demand accounts.

The yield on loans and advances to customers fell 17 basis points year-on-year to 1.19%, while the cost of retail savings fell one basis point to -0.02%, bringing the **customer spread** to 1.21%, 16 basis points lower than the 1.37% recorded at the end of 2020.

The **yield on the fixed income portfolio** is 34 million euros and represents 6.2% of interest income. The year-on-year decrease, 23 million, is due to the decrease in the average return (0.34% vs 0.66% in 2020) due to the rotation of securities following sales in 2020.

The **cost of wholesale issues** amounted to 33 million, 37.8% less than in 2020, due to the maturity of non-renewed mortgage covered bonds and because until July 2020 part of the subordinated wholesale debt issued in 2015 remained on the balance sheet and was refinanced last year by another lower-cost issue.

The **Group's balance sheet spread** stood at 0.85% at the end of 2021, 11 basis points lower than the previous year.

Breakdown of interest margin:

(figures rounded to millions of euros)	2021			2020			Change 21/20		
	Balance average	Perf Cost	Perf Cost (%)	Balance average	Perf Cost	Perf Cost (%)	Effect volume	Effect rate	Change net
Financial intermediaries	7,912	67	0.85	6,234	54	0.87	15	(1)	13
Loans and advances to customers	28,862	343	1.19	29,400	399	1.36	(7)	(49)	(56)

Costs of insurance activity	7,291	2	0.02	7,632	15	0.20	(1)	(13)	(14)
Other liabilities	5,270	5	---	5,175	4	---	0	1	1
LIABILITIES (d)	**57,865**	**57**	**0.10**	**55,479**	**99**	**0.18**	**4**	**(46)**	**(42)**
Customer spread (a-b)			**1.21**			**1.37**			
Balance sheet spread (c-d)			**0.85**			**0.96**			

Note: In accordance with accounting regulations, income derived from the application of negative rates is recognised according to its nature. "Financial intermediaries" on the assets side includes the negative interest on the financial intermediaries' balances on the liabilities side, the most significant of which is the income from TLTRO III. Symmetrically, "Financial intermediaries" on the liabilities side include negative interest on financial intermediaries' balances on the assets side.

Net fees and exchange differences totalled **439 million euros, 16.9% more than in 2020**. Marketing and asset management fees rose 25.5%, due to the higher volume of assets under management in off-balance-sheet products and the increase in success fees, because of the excellent performance of the markets in the year. Fees from banking activity increased 3.3%, mainly due to the 8.9% rise in collection and payment services fees, while those associated with securities trading and contingent liabilities and commitments declined.

Net fees and commissions:

	Figures in thousands of euros			
	31/12/2021	31/12/2020	Change	Change (%)
Fees for contingent liabilities and commitments	11,366	12,002	(636)	(5.3)

Net fees and commissions and exchange differences	**438,543**	**374,987**	**63,556**	**16.9**
Fees for marketing and asset management	288,925	230,218	58,707	25.5
Banking fees and commissions	149,618	144,769	4,849	3.3

Recurrent revenues, the aggregation of the interest margin and net fees and commissions, **were 2.5% higher at 931 million euros**. The excellent performance of fees, especially those linked to asset management, offset the decline in the interest margin, basically affected by the trend in the yield curve, which put pressure on the performance of the credit and fixed income portfolios. Recurrent revenues amounted to 243 million euros in the fourth quarter, 5.4% more than in the same quarter of 2020 and above pre-pandemic levels, thanks to the commercial dynamism focused particularly on asset management.

The **dividend income** amounted to **10 million euros**, compared to 5 million euros the previous year. The increase is explained by the Caser stake (3.5 million euros) and by the fact that in 2020 many companies suspended dividend distributions for reasons of prudence in view of the COVID-19 crisis.

Gains from lending transactions stood at **47 million euros**. This mainly includes realised capital gains of 33 million euros on the forward sale in 2020 of a national public debt securities portfolio, which became effective in the first quarter of 2021. Compared to a year earlier, the decrease is due to the fact that 115 million euros of capital gains were recognised in 2020 on the part of the cash sale of the debt mentioned above portfolio at amortised cost.

The **net of other operating income and expenses** in the income statement includes, inter alia, income and expenses from insurance and reinsurance contracts, income and expenses from non-financial activities and contributions to the Deposit Guarantee Fund (51.8 million euros), to the National Resolution Fund (13.8 million euros) and the expense of the asset benefit from the conversion of deferred tax assets into a receivable from the Spanish tax authorities (2.7 million euros). In 2021 this heading shows an **expenditure of 41 million euros, compared to 32 million euros a year earlier**. The higher expense was mainly due to the 15 million euros recorded in 2020 under "Other operating income" for signing the novation agreement amending the non-life insurance distribution contract with Caser.

The **results of entities accounted for using the equity method** amount to **6 million euros**. The improvement compared to a year earlier comes from the result of Rioja Nueva Economía, following the sale of its subsidiary Energía de Alternativas Eólicas Riojanas.

Gross income was **952 million euros**, 4.9% lower than at the end of 2020. The contraction was due to lower net trading income, as recurrent revenues rose 2.5% year on year to account for 98% of gross income.

Operating expenses, **611 million euros**, were down 14.9%. Excluding the impact of the costs arising from the ongoing Redundancy Proceedings (151 million euros endowed in 2020 and 12.8 million euros of additional cost in 2021), the **recurring expenses**, **598 million euros**, increase by 5.4%, returning to 2019 levels once the operating cost-saving measures adopted in 2020 by COVID-19 have been finalised.

Personnel expenses, excluding one-offs, increased by 31% due to the achievement of certain variable remuneration targets in 2021 and the accrual of the multi-year incentive plan (ILP). The cost savings from the redundancy programme will materialise progressively, as the redundancies of employees under the plan are being staggered until they end in June 2022. At December 2021, there have been 525 departures out of the 750 approved and the closure of 117 branches out of the 199 planned.

Other administrative expenses and write-downs increased by 9.3% due to the slowdown in projects and activities in 2020 as a result of the emergence of COVID-19 and the launch of the Strategic Plan, which has increased the cost of external services and technical reports associated with the implementation of the various initiatives envisaged therein.

Breakdown of operating expenses:

	Figures in thousands of euros			
	31/12/2021	31/12/2020	Change	Change (%)
Wages and salaries	(270,847)	(263,920)	(6,927)	,2.6
Social security contributions	(68,638)	(68,660)	22	0.0
Contribution to pension funds and insurance policies	(17,667)	(17,698)	31	(0.2)

Personnel expenses	**(375,183)**	**(502,568)**	**127,385**	**(25.3)**
Buildings, installations and office equipment	(27,668)	(26,484)	(1,184)	4.5
Systems maintenance, licences, IT development and software	(21,879)	(22,239)	360	(1.6)
Communications	(12,154)	(10,864)	(1,290)	11.9
Advertising and publicity	(5,771)	(5,003)	(768)	15.4
Charges and taxes	(18,170)	(20,221)	2,051	(10.1)
Other management and administration expenses	(83,424)	(68,209)	(15,215)	22.3
Other general administrative expenses	**(169,066)**	**(153,020)**	**(16,046)**	**10.5**
Depreciation and amortisation	**(66,973)**	**(62,918)**	**(4,055)**	**6.4**
Operating expenses	**(611,222)**	**(718,506)**	**107,284**	**(14.9)**
Recurring operating expenses	**(598,380)**	**(567,465)**	**(30,915)**	**5.4**
Staff costs ex WAP costs	(362,341)	(351,527)	(10,814)	3.1
Other general admin. expenses + depreciation and	(236,039)	(215,938)	(20,101)	9.3

The **cost-to-income ratio**, defined as the quotient of recurring operating expenses and gross income, stood at **62.8%**. The **recurrent efficiency ratio**, measured as recurring expenses over recurrent revenues, is **64.2%**.

Before write-downs, the recurring income was **333 million euros,** 2.4% less than a year earlier, as the increase in recurrent revenues did not fully offset the increase in operating expenses.

Provisions and write-downs reported as losses on impairment of financial assets, non-financial assets, non-current assets held for sale and allowances for provisions, 127 million euros, reduced by 43.8% in relation to 2020.

The **provisions for loans and foreclosed real estate**, **114 million euros,** amount to 119 million less than in 2020, as a non-recurring provision of 90 million euros was set up in the previous year to cover the potential impact of the economic effects associated with COVID-19. Stripping out this extraordinary provision, the decrease was 20.1% due to lower entries in NPLs. The **Group's cost of risk**, calculated as the ratio of credit and real estate impairments to average exposure, was **35 basis points**, lower than the normal cost for 2020 as a whole of 43 basis points.

The heading **provisions** includes provisions for pensions, litigation, pending tax litigation, commitments and guarantees given and other provisions. It records a **charge of 6 million euros** basically for contingencies related to interest rate floor clauses and mortgage loan expenses, in contrast to the release of 14 million euros in 2020, due to the reversal of a provision set up in 2019 associated with the repurchase of subordinated bonds and the expiry of a contingency linked to labour costs.

Other gains and losses include the results of the sale of property, plant and equipment and business interests, as well as the payment of fees for the marketing of foreclosed properties. This heading recorded an **income of 0.7 million euros**, compared to a loss of 4 million euros in 2020. The improvement is due to the higher result from the disposal of assets as a result of the economic recovery.

The Group's **pre-tax profit** amounted to **215 million euros**. After deducting the amount paid in corporate income tax, the **net profit attributable to the parent company** is **151 million euros,** 127 million more than in 2020.

The **ROTE** (ratio of net income to average tangible equity) reached **5.7%,** compared to 0.9% in 2020.

5.4 Funding and liquidity structure

Retail deposits are the basis of the Group's outside funding.

Ibercaja has traditionally employed a **conservative liquidity policy**, as it seeks to finance the growth of its lending activity with retail customer funds. The Bank prudently manages its liquidity and ensures that its source have of financing are balanced and well-diversified, anticipating fund needs to honour its obligations as these fall due without conditioning its investment activity to the climate of wholesale financing markets.

The basic principles governing **this strategy** are: active management through an **ongoing monitoring system**, based on internal limits and indicators documented in the Liquidity Manual; establishing **measures and actions to respond to crisis scenarios (contingency plan)**, harnessing the various alternatives offered by the market to diversify investments in relation to their duration and ensure an appropriate mix of highly-liquid instruments; and maintaining a significant **guarantee asset buffer at the ECB** to cover possible tensions.

Liquidity risk is measured by taking into account the **estimated cash flows from assets and liabilities** and any **additional collateral or instruments** that may be needed so as to ensure alternative sources of liquidity. **Short, medium and long-term outlooks** are prepared to gauge financing needs and limit compliance. These forecasts take into account the latest macroeconomic trends because of their impact on the performance of the assets and liabilities shown on the balance sheet and contingent liabilities and derivative products. Liquidity risk is also controlled by establishing **exposure limits**, within ranges compatible with the approved policies.

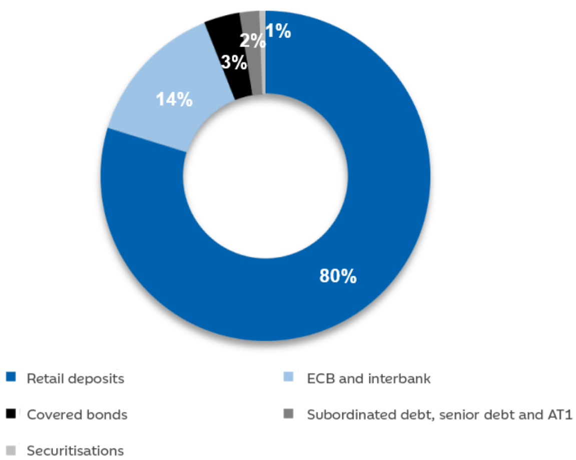
__Note 3.8.__ to the __annual accounts for 2021__ provides a more detailed explanation of the __Bank's strategy and policies for managing liquidity risk__, as well as the associated measurement and control procedures.

Retail customer deposits are the **main source of outside funding, accounting for 79.8% of the total**. The loan to deposit ratio (LTD) stands at 78.2%. It declined by 2.9 percentage points during the year, mainly due to a 2.7% increase in retail deposits.

Wholesale funding supplements funding obtained from individuals and companies. It is centred on the medium and long term and includes repos and balances held by the Group at the ECB, mortgage bonds, securitisations, subordinated liabilities and other issues.

The **central bank deposits**, **5,871 million euros**, came entirely from TLTRO III tenders. Ibercaja has borrowed an additional 559 million euros this year to the 5,400 million at the end of 2020. As a result, its weight in total outside funding has risen from 11.6% in December 2020 to 12.6% at 31 December 2021.

Breakdown of funding structure



Deposits from credit institutions, **745 million euros**, accounted for 1.6% of borrowed funds, compared with 2.6% at the end of 2020. The decline of 463 million euros was due to a reduction of 412 million euros in term deposits and a decrease in the volume of repurchase agreements with other institutions.

Customer deposits, 82.2% of total funding (82.1% in December 2020), increased by 1.0% from 37,881 million euros at the end of the previous year to **38,268 million euros** in December 2021. The change was due to a 2.7% rise in retail deposits, partially offset by the maturity of 525 million euros of special mortgage covered bonds and lower repurchase agreements.

Debt securities issued, **1,316 million euros**, decreased 1.8% to 2.8% of borrowings, compared to 2.9% in 2020. The decrease of 24 million euros was due to the combined effect of the maturity of securitisation liabilities and the issuance of senior preferred debt, eligible for compliance with MREL requirements, for 50 million euros.

Composition of outside funding:

Figures in thousands of euros and %	31/12/2021		31/12/2020		Change	
	BALANCE	%	BALANCE	%	BALANCE	%
Central bank deposits	5,871,128	12.6	5,371,202	11.6	499,926	9.3
Deposits from credit entities	745,174	1.6	1,207,820	2.6	(462,646)	(38.3),
Customer deposits	38,268,280	822	37,881,253	82.1	387,027	1.0
. Of which: retail deposits	37,131,170	79.8	36,165,311	78.4	965,859	2.7
Debt securities issued	1,316,321	2.8	1,340,670	2.9	(24,349)	(1.8)
AT1 issue	350,000	0.8	350,000	0.8	---	---
OUTSIDE FUNDING	**46,550,903**	**100.0**	**46,150,945**	**100.0**	**399,958**	**0.9**
Retail financing	37,131,170	79.8	36,165,311	78.4	965,859	2.7
Wholesale financing	9,419,733	20.2	9,985,634	21.6	(565,901)	(5.7)

The **available liquidity**, **15.25 billion euros**, represents 26.0% of assets. Taking into account the issuance capacity of covered bonds and covered bonds, 8,776 million, the **total liquidity available** is **24,027 million euros**.

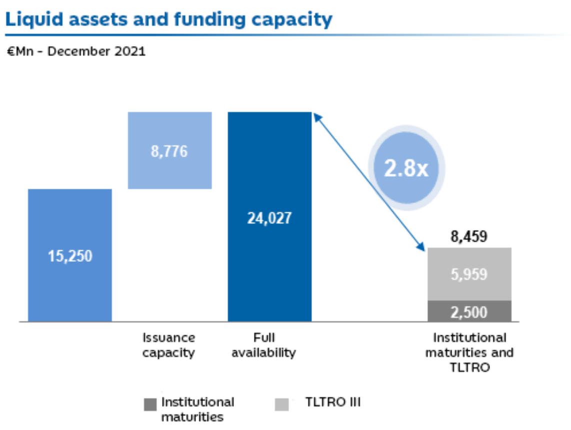
Liquidity metrics remain at very comfortable levels. The liquidity coverage ratio (LCR), which measures the level of high-quality liquid assets free of charges needed to overcome a liquidity stress scenario at 30 days, stands at **452.0%**, well clear of the 100% regulatory requirement. The **NSFR** ratio is **152.2%**. This indicator shows the proportion of funding for one year covered by stable liabilities, the aim being to ensure an even balance sheet structure that limits excessive reliance on short-term wholesale funding.

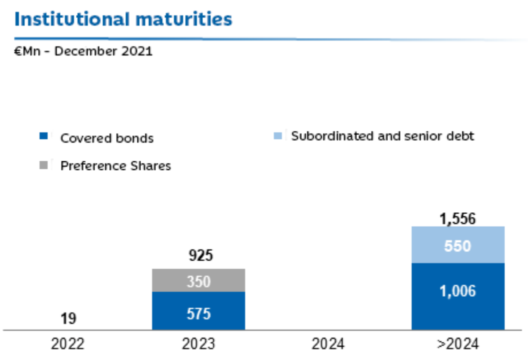
Liquidity Indicators:

Figures in thousands of euros and %	31/12/2021	31/12/2020
Cash and central banks	6,183,416	7,319,717
Available in policy	1,050,679	891,981
Eligible assets not included in the policy	7,590,280	6,421,078
Other assets not eligible for ECB	425,796	326,665
AVAILABLE LIQUIDITY	**15,250,171**	**14,959,441**
Issuance capacity for mortgage covered and public-sector covered bonds	8,776,402	8,379,866
TOTAL AVAILABLE LIQUIDITY	**24,026,573**	**23,339,307**
Available liquidity/total assets (%)	26.0%	25.6%
Loan-to-deposit ratio (%)	78.2%	81.1%
LCR (%)	452.0%	468.1%
NSFR (%)	152.2%	151.5%

The collateral policy with the ECB includes pledged assets with a discountable value of 6,938 million euros, of which Ibercaja has drawn down 5,959 million, and therefore maintains an **available balance** de **1,051 million euros**, which the Entity can access to meet its liquidity needs.

The **maturities of wholesale market issuances** present a staggered redemption schedule through to 2027. The total liquidity available, 24,027 million euros, covers 2.8 times the debt maturities and the amount taken in the TLTROs III auction.





Expected liquidity trends and fluctuations:

Business development projections suggest that the Group will have adequate levels of liquidity in the short and medium term, in line with both internal management and regulatory limits. The Bank has a high weight of retail funding, which is highly stable, and wholesale issues are of little relevance and staggered maturity. However, in the event of a hypothetical increase in liquidity tensions in the economy or a contraction in the credit market affecting liquidity and the deposit base, the Group, in addition to its current comfortable liquidity position, has various sources of funding (issuance of senior debt and covered bonds, as well as recourse to ECB funding through pledging of fixed-income securities, own issues and securitisation of assets), as well as recourse to ECB financing through the pledging of fixed income, own issues and asset securitisation) and, if necessary, would implement the specific Contingency Plan it has established for crisis situations.

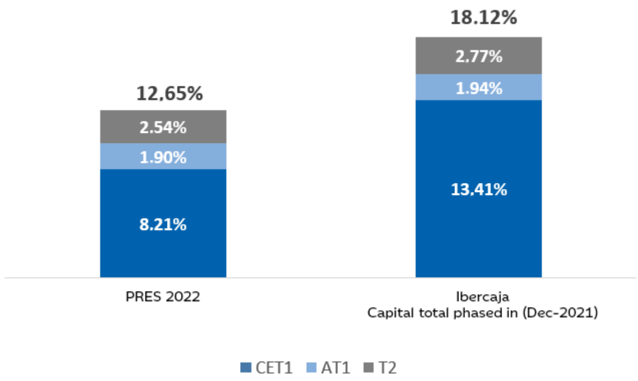
5.5 Capital management

> Solid solvency ratios well above regulatory requirements and exceeding medium-term targets.

The **Group's capital management** is designed to ensure **that regulatory requirements are fulfilled at all times and to maintain an adequate relationship between the risk profile and own funds**. Capital adequacy is self-assessed by the Bank on a regular basis through processes to identify, measure and aggregate risks in order to determine the capital needed to cover them. Above and beyond minimum regulatory capital requirements, the Group sets itself a capital target that exceeds actual needs and it forecasts capital sources and consumption on the basis of business performance and expected results in the midterm.

Based on the expected changes in Ibercaja Banco's capital and solvency ratios, Ibercaja Banco will be able to cope with potential stress scenarios. However, in the event that an extraordinarily adverse change in the macroeconomic climate, in applicable regulations or in the banking business requires the Group to resort to alternative capital sources in order to cover a possible shortfall, the Group, following the European Banking Association (EBA) guidelines and recommendations, as well as the provisions of Law 11 of 18 June 2015, on the recovery and resolution of credit institutions and investment firms, has defined a recovery plan aimed at prevention and at guaranteeing its capacity to respond accordingly to any possible deterioration in its solvency or funding capacity.

In February 2022, Ibercaja has received the decision regarding the new minimum prudential capital requirements from the European Central Bank once the results of the Supervisory Review and Evaluation Process (SREP) are known.



This decision means that Ibercaja Banco must maintain, **from 1 March 2022, a Common Equity Tier 1 phased-in (CET1) ratio of 8.21% and a Total Capital phased-in ratio of 12.65%.** This total capital requirement includes the minimum Pillar 1 requirement (8%, of which CET1 4.5%), the Pillar 2 requirement (2.15%, of which at least 1.21% must be met with CET1) and the capital conservation buffer (2.5%).

The Ibercaja Group's total capital at 31 December 2021 amounts to 3,270 million euros and represents a **total capital ratio** of **18.12%**. The **phased-in CET1 ratio**, which measures the relationship between Tier 1 capital and risk-weighted assets, was **13.41%.** Based on the PRES in force from 2022, these capital levels imply an excess of CET1 and total Capital of 5.47 and 5.20 percentage points, respectively. The **ratio pay-out, 65%**, is one of the highest in the Spanish banking system.

Solvency performance and key indices

(Figures rounded to million euros and %)	Phased in		Fully loaded	
	31/12/2021	31/12/2020	31/12/2021	31/12/2020
Tier 1 capital	2,770	2,835	2,640	2,640
Common Equity Tier 1	2,420	2,485	2,290	2,290
Additional Tier 1 capital	350	350	350	350
Tier 2 capital	500	500	500	500
Total Capital	3,270	3,335	3,140	3,140
Risk-weighted assets	18,052	18,248	18,014	18,191
RWA density (RWAs/total assets)	30.79%	31.25%	---	---
Tier I (%)	15.35%	15.53%	14.65%	14.51%
CET1 (%)	13.41%	13.62%	12.71%	12.59%
AT1 (%)	1.94%	1.92%	1.94%	1.92%
Tier 2 (%)	2.77%	2.74%	2.78%	2.75%
Total capital ratio (%)	18.12%	18.27%	17.43%	17.26%
Leverage ratio (%)	6.01%	6.26%	5.75%	5.85%
MREL ratio based on RWA (%)	18.39%	18.27%		
MREL ratio based on LRE (%)	7.21%	7.36%		

In terms of fully loaded, the **total capital ratio** increased by 17 basis points to **17.43%**, one of the highest in the sector, while CET1 rose to **12.71%**, both ratios exceeding the Bank's medium-term target. The **increase in the year in CET1 was 12 basis points**, due to the decrease of 1% in risk-weighted assets, mainly due to the contraction of non-performing loans.

The **leverage ratio** shows the ratio of a credit institution's capital to assets, irrespective of the degree of riskiness of those assets. The 3% leverage ratio requirement, set by the EU Banking Reforms that came into force on 27 June 2019, has become mandatory on 28 June 2021.

In September 2020, in the context of the COVID-19 crisis, the ECB allowed credit institutions to temporarily exclude certain exposures to central banks from the denominators of their leverage ratios, an option taken up by Ibercaja. In June 2021, the ECB extended this measure until the end of March 2022 so that, as at 1 April 2022, exposures to central banks will again have to be included in the leverage ratio.

At the end of 2021, the **fully-loaded leverage ratio of the Ibercaja Group** far exceeds the minimum requirement, reaching 5.75%.

The new Bank Recovery and Resolution Directive (BRRD2) sets 1 January 2024 as the date for compliance with the **MREL requirements** and sets an intermediate requirement to be met by 1 January 2022. Both are to be expressed as a percentage of risk-weighted assets and leverage ratio exposure.

According to the Bank of Spain's notification of the latest decision of the Single Resolution Board, the Group must have **as at 1 January 2024,** a percentage of own funds and eligible liabilities of **18.59% of risk-weighted assets (21.09% including the combined requirement of capital buffers)**. The requirement **in terms of leverage ratio was 5.21%**. The intermediate requirement at 1 January 2022 is 15.38% with respect to risk-weighted assets (17.88% including the combined capital buffer requirement) and 5.21% in terms of the leverage ratio. The Ibercaja Group's MREL ratio at December 2021 amounts to **18.39% of risk-weighted assets and 7.21% of leverage ratio exposure, levels above those required at 1 January 2022**. The requirements established for 1 January 2024 are aligned with the Bank's financing and capital plan.

According to the definition of Distributable Items in the CRR, the balance of Distributable Items, at the individual level of Ibercaja Banco as at 31 December 2021, amounts to **380 million euros.**

6 Commitment to sustainability: management progress. Non-Financial Information Statement (NFS)

6.1 Sustainability strategy

102-12, 102-15, 102-16, 102-19, 102-20, 102-21, 102-26, 102-28, 102-30, 102-31, 102-32, 102-43, 102-44, 103-1, 103-2, 103-3, 305-3, 201-2

> Ibercaja is committed to ensuring that its business objectives promote sustainable development, integrating environmental, social and good governance aspects into its strategy and business decision-making.

Events such as the **Paris Agreement of 2015** on climate change, the pandemic we are experiencing and the ensuing economic crisis have marked a turning point in our societies, which are moving decisively towards the **new socio-economic paradigm of sustainability**. This is a challenge that banks, in particular, key players in the economy, must take up. We play a leading role in the change towards a sustainable world and our decisions are based on its impact on the climate, the social changes that are taking place, and the governance of companies and institutions. At Ibercaja, we not only move towards sustainability, we actively promote it.

> **CHALLENGE**
>
> *The challenge that Ibercaja has taken on is to ensure that the **business objectives promote sustainable development, preserving natural resources and promoting a more just and inclusive society.***

Since the start, Ibercaja has been an entity with a clear **social commitment** to the development of its activity, focused on supporting the country, the business fabric and the most vulnerable groups. Along these lines, it continues moving forward to respond to the growing sustainability-related needs.

CORPORATE PURPOSE

"Help people build their life story because it will be our story"

In carrying out its financial activity, Ibercaja is very mindful of its **Corporate Purpose**: *"Helping people to build the story of their lives"*, and is aware that its actions must promote a balance between economic growth, social cohesion and the preservation of the environment. Ibercaja is a signatory to the ten principles of the Global Compact, is firmly committed to the Sustainable Development Goals of the 2030 Agenda, and is a signatory to the **United Nations Principles for Responsible Banking** to advance in the configuration of a sustainable banking system.

Sustainability Policy

The Ibercaja Group's **commitment** to sustainable growth was endorsed with the approval in December 2020 by the Board of Directors of the **Sustainability Policy**, a document that sets out this commitment and establishes the **global action framework** for sustainability, containing the commitments voluntarily undertaken by Ibercaja with its stakeholders to promote sustainable, inclusive and environmentally-friendly growth, with a long-term vision.

Ibercaja's sustainability strategy is based on five cornerstones:

ESG RISKS: *identification and management for its gradual integration into the Entity's global risk analysis.*

SUSTAINABLE BUSINESS: *analysing needs and identifying business development opportunities that accompany customers in the transition to a sustainable economy, including climate change.*

PEOPLE: *The company is committed to the integral development of its employees, providing them with the necessary training for the new context and promoting the reconciliation of work, personal and family life.*

TRANSPARENCY *for all its stakeholders, promoting communication of the business's financial and non-financial aspects.*

PROTECTION OF THE ENVIRONMENT *and its resources, mitigating climate change and favouring the development of a more inclusive and egalitarian society.*

Principles of Sustainability

Sustainable development is based on certain ***principles of action*** *that cover any type of activity or decision to be addressed:*

Maximum respect for and promotion of ***ethics and good governance.***

Promotion of the ***Sustainable Development Goals of the 2030 Agenda****, promoting the goals they pursue through its business activity.*

Defence of human rights *in line with the UN Global Compact.*

Promotion of the ***personal and professional development*** *of employees.*

Prudent and global management of all ***financial and non-financial risks****.*

Defence of ***transparency****, promoting clear, complete and truthful communication.*

Contribution to ***social integration****.*

Defence of the environment*, contributing to the decarbonisation of the economy and promoting sustainable activities aligned with the objectives of the Paris Agreement and the European Green Pact.*

Ibercaja has a governance structure that allows it to manage sustainability adequately.

Additionally, the following **Committees and Working Groups** have been set up:

- **The Sustainability Communication Working Group**, with a cross-cutting function, aims to define messages and plan contents and channels to achieve a greater scope and effectiveness of said communication.
- **Family Responsible Company Committee**, responsible for implementing the FRC plan to ensure a healthy balance between the personal, family and working lives of employees. Ibercaja has earned the FRC (Family Responsible Company) badge, which certifies its proactive commitment to ensuring a suitable work-life balance.
- **Environment Team**, comprising volunteer employees from various areas and departments, who are asked to come up with actions for raising awareness and driving best environmental practices across the Group.

2021 - 2023 Strategic Plan

desafío 2023

Given the relevance that sustainability has for the Entity, within the new Strategic Plan defined for 2021-23, the **Purpose and Sustainability Initiative** has been established, **an enabling transversal line of work**, with the **Steering Committee** as a sponsor, to integrate Corporate Purpose into our culture and sustainability into the organisation's strategy. For the latter objective, cross-cutting and multidisciplinary teams are working on the following lines of action:

1. ESG Risk Management

To identify, integrate, manage and control ESG risks, advancing prudent risk management in line with supervisory expectations and commitments.

An **Action Plan for climate and environmental risk management** was prepared in 2021, which responds to the ECB's expectations and has been assessed as adequate by the supervisor, both in terms of content and feasibility. As a highlight, the policies and manuals for managing credit, market, liquidity and operational risks have begun to include aspects related to environmental climate risks. Regarding **Credit Risk**, work has been done to align the approval processes with the requirements of the new EBA Guidance on Loan Origination and Monitoring. Progress has also been made in the development of a **mapping of climate and environmental risks**, which will allow for a better understanding of these risks and their transmission channels to prudential risks. More detailed information on these aspects is included in chapters 6.12. and 7 of this consolidated directors' report.

2. Sustainable Business Strategy

To align commercial strategy with the Principles of Responsible Banking, responding to the needs of our customers and the objectives of society. In this way, we accompany our customers in the transition to a sustainable future and a low-carbon economy.

This year, an **impact analysis** was carried out to detect the main risks and opportunities related to climate change, and the framework of the **GSA business strategy** to be undertaken in the coming years was designed to respond to the main expectations and needs of our customers in terms of sustainability. Progress has also been made in the **communication and awareness of our customers** in sustainability to accompany them in the transition to a decarbonised economy.

Also, in 2021, the **offering of ESG products** has been expanded, both in investment and financing. In financing products, the focus has been on supporting energy efficiency improvements and access to Next Generation grants. In addition, to accompany our clients on this path to sustainability, various agreements have been signed **(Extremadura Avante Agreement and IDEA Agreement)** focusing on the energy efficiency of buildings. A **collaboration agreement, ACIERTA ASISTENCIA**, has also been signed for advice, management and energy efficiency works.

More complete information on the sustainable business strategy can be found in chapter 6.3. of this report.

3. Communication and Sustainable Impact

Creating a framework of permanent and continuous communication over time with our stakeholders reinforces the Ibercaja Group's commitment to sustainability and transparency.

In 2021, holding the **1st Ibercaja Planet Week**, an initiative carried out from 18 to 24 October, coinciding with the celebration of the **International Day for Combating Climate Change,** was a highlight. The aim has been to accompany **customers, employees and society** on the road to sustainability. Under the slogan ***Protecting the environment and fighting climate change***, various business conferences, round tables, volunteer actions, publications in the sustainability blog, competitions, eco-advice, etc., were organised nationwide, achieving wide dissemination and repercussions among customers, employees and society.

A **proactive sustainability communication** has been maintained during the year, with 26 press releases, nine communication reports in the written media, 15 collaborations with media experts and the organisation of several sustainability events. In addition, we actively participated in celebrating the 2nd anniversary of the signing of the Principles of Responsible Banking.

4. Our Footprint-Synergy with foundation shareholders

To develop and promote lines of collaboration with the shareholder Foundations, which respond to the main social and environmental needs of our territories of action, making the commitment of the entire Ibercaja Group more visible and achieving a greater impact on society and the environment.

Of particular note is the project **"Vamos juntos hacia la sostenibilidad"** (Let's move towards sustainability together), in collaboration with the Ibercaja Foundation, aimed at the Bank's customers, to accompany them on the necessary path towards the integration of ESG aspects in their business and help them, with training and support, to align their activity with the Sustainable Development Goals. A **specific line of sustainability training** has also been prepared for both companies and individuals. In addition, a new line of work has been developed to implement **environmental actions**, with the firm commitment to contribute to the mitigation of climate change.

The sustainability project is completed with a **Professional Development Plan** that includes a specific line of **training in sustainability** to accompany and train our professionals in the new skills necessary for them to help our customers along this path.

Supervisory expectations of the European Central Bank: Climate and Environmental Hazards Guide

In November 2020, the European Central Bank (ECB) published its ***"Guidance on climate-related and environmental risks"***, containing 13 supervisory expectations developed in 4 blocks on the management and communication of these risks. The aim of this document is to **raise the financial sector's awareness and preparedness** so that **these risks are considered in governance frameworks, corporate strategy and transparent communication**, thereby improving its climate and environmental reporting.

The four blocks identified are:

BUSINESS MODEL AND STRATEGY	RISK GOVERNANCE AND APPETITE	RISK MANAGEMENT	DIVULGATION
Business environment	Governing bodies	Risk management framework	Disclosure Policies and Procedures
Business strategy	Risk appetite framework	Credit risk	
	Business structure	Operational risk	
	Information	Market risk	
		Scenario analysis and stress test	
		Liquidity risk	

ACT NOW

*We must act now to overcome the challenges of climate change. We are confident that **together we will build a better future**.*

This year, Ibercaja has informed the ECB **of the steps** taken to integrate climate risks, as well as its **action plan** to respond to supervisory expectations regarding the management and communication of climate and environmental risks. This plan has been approved by the Board of Directors, the Management Committee and the Sustainability Committee of Ibercaja and has been assessed by the supervisor as being both **adequate** in terms of content and feasibility. Implementation has started in 2021 and will continue throughout the strategic cycle.

Ibercaja's commitments to sustainability

Net Zero Banking Alliance (NZBA)

In April 2021, Ibercaja signed, as a **founding member of the Net Zero Banking Alliance (NZBA)**, an initiative of the United Nations that promotes the commitment of the banking sector worldwide to achieve carbon neutrality in respect of CO2 emissions by 2050. Meanwhile, Ibercaja Gestión and Ibercaja Pensión signed up to the **Net Zero Asset Managers** initiative in 2021, with the commitment to achieve neutrality of their own and their portfolios' CO2 emissions by 2050 at the latest.

In 2021, all of our direct emissions will have been offset, thus achieving **neutrality of Scope 1 and 2 emissions** for the first time.

This year we began to analyse the carbon footprint of the loan portfolio in order to make progress in its measurement for the establishment of decarbonisation objectives and action plans.

Principles of Responsible Banking

Ibercaja has been a signatory since 2019 of the **United Nations Principles for Responsible Banking**, as a framework for action for a financial system that acts as a lever for sustainable development.

UNEP FINANCE INITIATIVE | PRINCIPLES FOR RESPONSIBLE BANKING

THE PRINCIPLES TO WHICH WE ARE COMMITTED ARE:

1. **Alignment** of our commercial strategy with SDGs
2. **Impact**: increase our positive and reduce our negative impacts; manage ESG risks

3. **Customers**: responsible action and promote sustainable practices and activities

4. **Stakeholders**: active listening, participation and collaboration with stakeholders to achieve ESG objectives

5. **Corporate governance and goal setting**: effective corporate governance and responsible banking culture; ambitious targets for our impacts

6. **Transparency and Accountability**: review our implementation of the Principles and be transparent in reporting on our positive and negative impacts and our contribution to society.

Chapter 6.11 *explains how we have made progress in implementing these Principles during 2021.*

UNEP-FI

The Bank also forms part of the UNEP-FI **United Nations Environment Programme Finance Initiative**, which seeks to mobilise private sector financing for sustainable development by fostering a financial sector that positively impacts people and the planet.

TCFD

In 2019 Ibercaja adhered to the recommendations of the **Task Force on Climate-Related Financial Disclosures (TCFD)**, as a guide for the development of climate-related disclosures, so that the climate-related financial information published is consistent, reliable, comparable and clear and allows investors to take into account climate-related risks and help adaptation to climate change. Thus, Ibercaja includes detailed information on these matters in section 6.12. of this Management

Other sustainability commitments

> *Ibercaja has adhered to, among others, the following initiatives that reflect its commitment to sustainability:*

- Since 2005, Ibercaja has prepared its Annual Report in line with the GRI (**Global Reporting Initiative**) standards, providing accurate information on financial and non-financial aspects.
- Ibercaja Banco has been a signatory of the **United Nations Global Compact** since 2006, confirming that the activity carried out is performed in accordance with the principles established by this initiative, with the Bank reporting annually on its involvement.
- It participates in the **Sectoral Sustainable Finance Group and in the Sustainability Observatory**, coordinated by CECABank, in which legislative progress and supervisory expectations in sustainability are analysed to identify the applicable requirements and provide a response through action plans.
- It aligns with the **Sustainable Development Goals** of the 2030 Agenda, also supporting their internal and external distribution.
- Ibercaja is a signatory of the **Alliance #CEOPorLaDiversidad**, led by Fundación Adecco and Fundación CEOE, whose mission is to unite companies around a common and innovative vision of diversity, which accelerates the development of strategies that contribute to business excellence, the competitiveness of talent and the reduction of inequality and exclusion in Spanish society.

- **Collective Commitment to Climate Action**: In December 2019, Ibercaja signed the Spanish financial sector's climate commitment within the framework of COP25, promoted by the AEB, CECA and ICO. The agreement specifies the collective commitment of the main Spanish banks to measure the carbon footprint of their balance sheets and reduce the climate impact of their financial activity.

- Ibercaja holds the **RSA and RSA+ seals** awarded by the Government of Aragon since its creation in 2017, revalidated each year, which recognise those entities in the Autonomous Community committed to corporate social responsibility.

- In 2019, the Entity obtained the **FRC certificate** as a **Family Responsible Company**, awarded by Fundación Más Familia. This certification recognises companies committed to the well-being of their employees and promotes the active management of work-life balance and equality.

- As a sign of the commitment of the Financial Group and its managers to sustainable investment, in 2021, **Ibercaja Gestión has adhered to the United Nations Principles for Socially Responsible Investment (UNPRI)**, to which **Ibercaja Pensión had already adhered in 2011**, with a Socially Responsible Investment Policy published on its website (www.ibercaja.es).

- In addition, both fund managers have joined the **Carbon Disclosure Project**, an engagement platform and non-profit organisation that administers a system for companies to disclose environmental information so that investors can better manage their environmental impacts.

6.2 Our contribution to Sustainable Development Goals

Ibercaja promotes the objectives of sustainable development, based on the conviction of achieving the greatest possible contribution to sustainable development for people and the planet.

In 2015, all United Nations Member States adopted the **Agenda 2030 for Sustainable Development**. It represents the international commitment to address the social, economic and environmental challenges we face, putting people, the planet, prosperity and peace at the centre, under the motto of "leaving no one behind". To this end, the **17 Sustainable Development Goals (SDGs)** were established.

In order to achieve these objectives, the involvement of everyone is necessary: society and the public and private sectors. Business has a very important role to play in achieving this **new development model**.

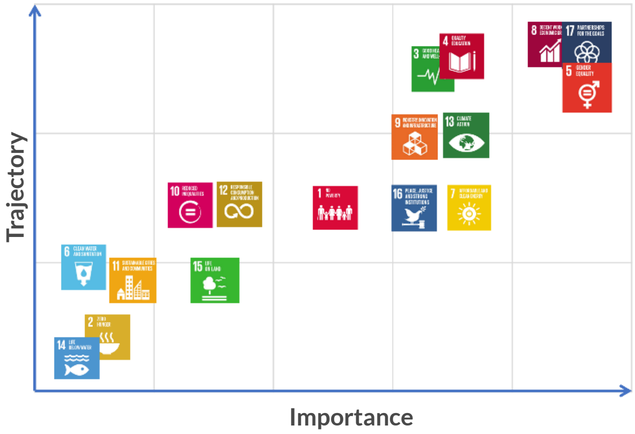
BUSINESS STRATEGY OF COMPANIES

The business strategy of companies must take into account ***social, environmental and good governance aspects****, to achieve* ***"sustainable development for all that meets the needs of the present, without compromising the requirements of future generations".***

In this line, **financial institutions** have to play a very important role, among other areas, in the mobilisation of the capital flows needed to finance sustainable development.

At Ibercaja, the SDGs serve as a guide for progress in sustainability and for the development of specific actions, focusing especially on those where our contribution can be greater. In order to achieve maximum effectiveness, efforts are aligned with those Objectives more directly linked to financial activity and the activities of the Shareholder Foundations.

In 2018, an SDG materiality analysis was carried out to identify the SDGs that Ibercaja has the greatest capacity to influence, broaden their impact, and launch new projects. Establishing the purpose of each ODS for the Bank, we identified the actions already underway at the Bank, and assessed their trajectory and scope. The result was a **graph that relates the importance of the Goals and makes visible those SDGs that are most relevant for Ibercaja**, where the contribution can be more significant.



Ibercaja prioritises the following objectives

Among the main projects carried out in Ibercaja throughout 2021 that have contributed the most to achieving these SDGs are the following:

efr certification as a family responsible company.

More than **100 measures for work-life balance and social benefits** for the people who make up the Entity.

Promotion and awareness of **healthy living habits**, both internally and externally.

Sports sponsorship and the organisation of popular and specialised sporting trials, which promote the most extensive **participation** possible.

Strengthening the participation of employees therein, reinforcing the values of effort and teamwork, along with the benefits for **health**.

Creation of the internal communication channel **Ibercaja with you**, from which healthy habits and information in this area are promoted.

Pandemic contingency plan, in order to protect the health of customers and employees

In-house training for the largest number of professionals in financial and sustainability matters, actively contributing to the development of internal talent. **This training offer includes a specific course on the SDGs and the 2030 Agenda**, in partnership with the Global Compact.

Organisation of talks, conferences and seminars and **educational activities** for companies and society in general.

"Sustainable Tuesdays", a series of online talks aimed at employees to raise awareness and promote sustainable behaviour towards people and the planet.

Good Habitz Platform, a training proposal with multiple possibilities and online resources to enhance the talent and well-being of employees.

"Educa Initiative", developed by the Ibercaja Foundation, focused on parents and educators, placing at their disposal proposals that contribute to completing the education of youngsters and actively promoting their development.

Linking the **principle of equality** to all people management policies

Promotion of the continuous development of skills and abilities, managing talent, which does not understand gender.

Plan Leader, a programme that promotes female leadership at the Entity, eliminating barriers to achieving gender equality.

Work-life balance measures allow all employees to balance their personal, family, and work life.

Ibercaja's Sustainability Policy.

Promoting the inspiring **leadership model**, which encourages communication and participation, creating an appealing environment to attract and retain talent.

Partnership agreements with Special Employment Centres and entities that promote **the inclusion in the labour market** of people with disabilities or at risk of exclusion.

Internship programme for university students with the Human Age Institute Foundation focused on **disabled students**.

Boosting growth in their territories of action, participating in the main projects and developing programmes to promote **entrepreneurs**.

Ecosystem + Companies: meeting point and inspiration for entrepreneurs and companies, in which to learn and share the latest trends.

Technological transformation, the main lever for change in business models.

Project **Digital Challenge**, which provides all Ibercaja employees with mobile work equipment, improving their working conditions and the quality of service to customers.

Ibercaja Mobile Banking, the main digital pledge in the area of individual customers.

Ibercaja Pay: mobile payment. Ibercaja customers can now register their cards with the main payment platforms.

Adaptations at ATMs and websites to improve **universal accessibility** to financial services.

Correos Cash Service, to improve the accessibility of cash for our customers in rural areas.

Cash Back Service to enable our customers to withdraw cash in shops.

Ibercaja's environmental policy, updated in 2021, implemented at the organisation to minimise the negative impacts of our activity on the environment.

Environmental Management System implemented and certified pursuant to ISO Standard 14001-2015.

Internal and external environmental awareness-raising campaigns.

Planet Week, Ibercaja's awareness-raising and positioning initiative to accompany its employees, customers and society on the path towards a more sustainable economy.

Internal **environmental suggestions mailbox** to channel the concerns of our people.

Development of **investment and financing products** with ESG criteria.

Impulso Solidario Initiative, which encourages employees of Ibercaja Banco, Financial Group and Foundation to participate in projects of non-profit organisations that improve the environment and the lives of the most disadvantaged groups.

Active collaboration through agreements with the main economic and social players of the territories in which it operates.

Alliances that favour significant progress in **sustainability** and socially responsible investment.

The **main initiatives** of which Ibercaja forms part are:

"Let's move towards sustainability together"

In line with our corporate purpose and to contribute to the necessary transition towards a more sustainable economy and position ourselves as drivers of change, **Ibercaja Banco and Fundación Ibercaja** intend to accompany **other companies in integrating sustainability into their strategy** by making different resources available to them.

To this end, we have designed a support plan aimed at our **corporate customers, who are sensitive to sustainability and social and environmental issues,** creating a **range of sustainable financial products** adapted to their financing and investment needs, as well as offering them **advice on how to access the Next Gen Funds.** And the Ibercaja Foundation has launched the **"Let's move towards sustainability together"** initiative.

It is a **free, nationwide project that will enable companies to contribute to the achievement of the SDGs through awareness-raising, training and the opportunity to collaborate in different Fundación Ibercaja projects**, thus joining forces and multiplying the scope and impact of these actions.

6.3 Commitment to customers

102-6, 102-7, 102-43, 102-44, 103-1, 103-2, 103-3, 201-2, 305-3

> Customers are the heart of the Entity's strategy,
> with service quality and advice being its hallmarks.

Hence, Ibercaja's Sustainability Policy includes the following **commitments** assumed by the Bank **with its customers**:

- Work on **getting to know each customer in depth**, to always offer them the **products, services** and information they need**, adapted to their expectations and requirements.**
- Align the business strategy with the **United Nations Principles for Responsible Banking:**
  - Identifying **impacts and needs** derived from sustainable development.
  - **Adapting the offer** to respond to these new needs, which promote sustainable business models and practices.
  - **Sensitising** our customers in the necessary transition towards a decarbonised economy, also **identifying** their **sustainability preferences**.
- Helping our customers to optimise the management of their finances, in a simple way, with the best **advice, tools and information**, thereby promoting their financial education.
- Paying particular attention to **transparency in the communication and marketing of products**, providing the necessary information for the customer to be able to make informed advised decisions, avoiding information manipulation and protecting their integrity and honour.
- Always protecting the **confidentiality** of customer data, maintaining the highest security standards.
- Establishing efficient **dialogue channels** that allow us to listen to our customers, as a basis for long-term mutual commitment, offering the **highest quality of service**.

- Providing maximum diligence to **prevent and avoid the financing of illegal practices**, complying with the Regulations for the Prevention of Money Laundering and Terrorist Financing.

Impact analysis

In order to achieve sustainable development for all to promote a fairer, more inclusive and environmentally friendly society, it is essential to take into account social, environmental and good governance aspects within the business. Since its origins, Ibercaja has always been an institution with a **clear social calling**, **contributing to the development of the territories** in which it operates and placing **people at the centre** of its decisions, which is the hallmark of its way of banking.

Since their approval in 2015, Ibercaja has been closely watching the **Sustainable Development Goals**. Therefore, the main contributions that the Bank can make to the goals were identified, taking into account all 169 targets. **Ibercaja has set social and environmental objectives** that are part of the FRC work-life balance plan, its Environmental Management System, as well as the new Desafío 2023 Strategic Plan, within the Purpose and Sustainability initiative; **objectives that will help us boost our positive impacts and reduce our negative ones**.

To respond to the commitment to align commercial strategy with the Principles of Responsible Banking, in 2020, Ibercaja initiated an **analysis of the impacts that climate risks** could have in Spain.

The aim of this study is to analyse the main impacts of climate change, especially in the areas where Ibercaja carries out its activities, in order to **identify the main risks and opportunities** and establish objectives in those areas in which the Institution can make a greater contribution to sustainable development, accompanying its customers.

Now Ibercaja has placed special emphasis on **climatic and environmental factors**, due to the **urgency of the start of actions in this regard, in accordance with supervisory expectations, and due to the greater regulatory development in this regard.**

Two types of risks associated with climate change are defined:

- **Physical risks**, which arise from the direct effects of climate change, such as increases in the frequency and intensity of extreme weather events and changes in the balance of ecosystems. These risks can manifest themselves acutely (in the form of specific events such as floods or storms) or chronically (changes in weather patterns).
- **Transition risks**, linked to the transformation to a decarbonised economy, stem from regulatory changes (political and legal risks, such as strict limits on carbon and other greenhouse gas emissions) and technological changes (e.g. all-electric transport systems) required to achieve the decarbonisation goal, as well as market and reputational risks.

> ***A qualitative analysis of sustainability factors has been carried out, focusing on climate-related risks and paying special attention to the impact on those risks considered to have the greatest impact on the Bank's area of operation and in***

Fifty-nine per cent of recurrent revenues is in the form of net interest income. This income originates from loans and advances to customers, which account for 53% of our assets. Retail lending is the most important component of the Bank's lending business. The mortgage portfolio is particularly notable within this segment, as it accounts for more than 32% of the loan portfolio. For this reason, **an analysis of the climate risks of real estate collateral** has been undertaken using reports provided by Sociedad de Tasación.

In the assessment of **transition risk**, the results reveal that the energy ratings of the properties in Ibercaja's portfolio are in line with the national housing stock in Spain (according to the Observatory 2030 Guide - CSCAE, Higher Council of Architects' Associations of Spain), with a higher percentage of homes rated as sustainable (categories A and B) standing out in Ibercaja's portfolio.

From this analysis, we derive considerations for the ESG business strategy, which encourages investment in sustainable housing and the financing of energy efficiency improvements that can be undertaken in our customers' homes.

> ***Encouraging energy efficiency improvements in our housing financing portfolio, as well as a business opportunity, will help reduce the carbon footprint of our business and contribute to the transition to a more sustainable economy.***

The second segment with the largest volume is the financing of **productive activity (corporate segment)**, accounting for more than 12% of the loan portfolio volume. For this reason, an analysis of Ibercaja's portfolio has been carried out using a tool designed by ECODES (Ecology and Development Foundation), a national benchmark in sustainability and climate change, in collaboration with the Statistics Service of the Autonomous University of Barcelona, which estimates the predisposition to climate vulnerability and physical and transition risks of the Entity's portfolio, as a segmentation mechanism for the analysis of the portfolio.

In this sense, the possible effects of physical risks have been analysed theoretically by sector of activity in Spain. Ibercaja's portfolio has been analysed below; in the analysis of the **production activities segment**, both the volume of exposure that each sector represents with respect to the total portfolio and its predisposition to climate vulnerability and exposure to physical and transition risks have been considered, in order to determine which sectors are most relevant for Ibercaja, for further analysis.

In those industries flagged as most vulnerable to climate risks, the main risks relate to their CO2 emissions intensity. Given their significant weight in the Bank's portfolio, the manufacturing industry and the agriculture, livestock, forestry and fishing sectors are particularly notable in this regard. Other industries that are also predisposed to climate vulnerability are less material as they account for a smaller share of the portfolio, such as the power supply, water supply, transport and storage sectors, etc.

Companies in the manufacturing industry may have a greater need for financing to move towards a low-carbon production model. In contrast, other financing needs may arise in the agriculture sector to adapt to the effects of the physical risks of climate change. In short, both sectors may require significant CAPEX investments to undertake these transformations and adaptations. To address these financing needs, specific products have been designed, and further progress will be made in 2022 in developing new solutions to help the company on its path to sustainability.

> ***Promoting the improvement of the company's energy efficiency, as well as a business opportunity, is the way to its adaptation to decarbonisation, thus contributing to its productive transformation and the reduction of the carbon footprint of our activity.***

Thus, energy efficiency in buildings, sustainable mobility and efficiency in production processes are the axes that will guide our activity.

We will add value by accompanying the company in the process of identifying opportunities, applying for public aid and aligning with sustainable development.

To best manage the risks and opportunities derived from climate change, Ibercaja is working on a project related to including **ESG factors in the different phases of risk management**. In terms of **credit risk**, this project is based on aligning its admission and monitoring processes with some of the sections of the **new EBA Guidance on Loan Origination and Monitoring**, defining the internal governance mechanisms and procedures of financial institutions in relation to credit operations and credit concessions.

Commercial offer

To promote sustainability among our customers, we have launched our **communication plan** with a newsletter that addresses home energy efficiency, and we have created content to feed a new website offering a whole host of helpful energy efficiency tips.

In most cases, improving efficiency requires investment. To enable easier access to energy efficiency improvements, specific financing products have been developed that offer more attractive prices and repayment periods (including interest-only periods), among other attractive terms and conditions.

This year we added **new financing products** aimed at financing the energy efficiency of private properties, homeowners' associations and productive activities, in addition to the Vamos Coche loan, which was our first product to offer a price advantage if the purpose is a new or second-hand vehicle with "eco" or "zero" certification.

- Vamos Coche (Let's Go Car)
- Vivienda +Sostenible (More Sustainable Housing)
- Edificio + Sostenible (More Sustainable Building)
- Inversión +Sostenible (More Sustainable Investment)
- Photovoltaic Energy Leasing
- Sustainable Crops Leasing

Also, thinking about companies and the necessary support that Ibercaja must provide them, a line of products and services has been designed, from Business Banking, related to the ***Next Generation Funds***, to help them in the necessary transition towards a more sustainable economy. In addition, the project Vamos Juntos hacia la Sostenibilidad (Let's move towards sustainability together) has been launched in collaboration with the Ibercaja Foundation.

These products are over and above others that have already been in place for several years, which are intended to **support youths** with their first major expenses and, in particular, support their investment in education.

- University Tuition Loan
- Erasmus grant advance loan
- Youth Loan 2000

In addition, we have developed **specific products to collaborate with the Community of Extremadura to promote energy efficiency in buildings**, being selected as a collaborating entity of the **Avante Extremadura** project.

Since last March, **Ibercaja has been a collaborating entity of the IDAE (Institute for Energy Diversification and Saving)**, **participating in disseminating its programmes among customers and offering special financing operations in the efficiency programmes promoted** by this Institute.

To facilitate the improvement of the energy efficiency of properties, Ibercaja has begun to offer its customers an **advice service, subsidy management, work execution and, of course, financing, in collaboration with Acierta Asistencia**, a company of the CASER Group. This service offers an assessment of the energy efficiency of the building and the customer can ultimately choose to make it a "turnkey" service, thus affording them the best possible solution for their property with the help of specialised professionals. Initially, the commercial action has begun by offering the service to homeowners' associations in the city of Madrid, to extend the service to other homeowners' associations and individuals throughout Spain.

With the aim of involving the customer in the **circular economy and responsible consumption**, Ibercaja has incorporated a new section in **Ibercaja Connect's Consíguelo shop**, which includes reconditioned products. It also aims to **make high-quality technology products more accessible to all customers** through competitive pricing and free financing.

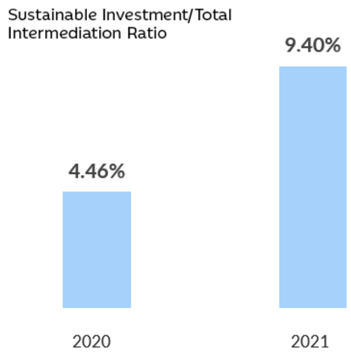
When it comes to sustainable consumption, Ibercaja Renting incorporates a **new Sustainable Renting section**, where customers can find an extensive range of electric vehicles, including two new models from the TESLA brand, a global leader in this sector.

To facilitate the understanding of the impact of **sustainable investment**, specific content has been published on our **vamos con tu futuro website**.

In 2021, the marketing of **two new ESG investment funds**, **Ibercaja Renta Fija Sostenible and Ibercaja New Energy**, has begun, one completing the more conservative range and the other providing a fund with a specific objective of reducing greenhouse gas emissions.

In addition, the **SICAV Asguard**, the first SICAV in Spain with an ESG rating, **was established in 2021.**

To complete the ESG range in finalist savings, the **PIP Megatrends** has been launched, which completes a range of four pension plans that allows us to maintain a leading position in ESG commercial offerings.



These developments have resulted in investment in ESG products exceeding 2 billion euros, increasing the sustainable investment ratio from 4.46% in 2020 to 9.40% at the end of December.

Regulatory framework for sustainable finance

In order to facilitate private savings flows towards sustainable investments, it is necessary to unify criteria to define what these investments look like, increase transparency and regulate the information investors receive in order to be able to make an informed decision. To this end, the **Sustainable Finance Disclosure Regulation (SDFR)**, which entered into force on 10 March, was defined as part of the EU Sustainable Finance Action Plan.

This Regulation is complemented by the **EU Taxonomy Regulation**, which defines the criteria for determining whether certain investments can be considered environmentally sustainable.

In 2021, Ibercaja undertook the necessary developments to comply with the requirements of these regulations. Specifically:

- Publication of the **Policy for the Integration of Sustainability Factors in Investment Decisions** of the Entity.
- Statement of major **adverse impacts** on sustainability.
- Adaptation of the **pre-contractual information** for products affected by Regulation 2088 (investment funds, pension plans, savings insurance and delegated portfolio management).

Universal Accessibility

At the end of 2019, the **Service for Deaf People** was launched to support access to financial products for people with hearing disabilities. It is available to all the Entity's customers and is provided in person at the Main Office in Zaragoza.

In 2020, considering those with visual impairment, **new ATMs included a high contrast screen** to enable information to be more easily viewed.

In addition, a new mobile banking functionality, **VoiceOver**, was implemented, allowing **people with visual impairments** to "hear" the fields and data presented on the screen and the interaction they are performing.

Also, in 2020 Ibercaja launched the mobile banking App Initiation Mode: it is a service that enables customers who have never used online banking to familiarise themselves with a straightforward easily. Users of this new tool will benefit from the professional advisory services of experts, which will help them resolve any queries. Aimed especially at older people, this project was developed on the basis of an initiative of Impulso Innovador (which promotes innovation through proposals from the Bank's employees) and had the collaboration of COAPEMA (Aragonese Council for the Elderly).

Moreover, since 2020, the **My Manager** functionality is also available in the new digital banking. This is a digital channel for a direct relationship between a customer and their manager from any location, allowing them to establish a conversation, send messages, share documents and manage appointments.

In 2021, **to reinforce the possibilities that can be offered to customers in rural areas or small towns** who are being most disadvantaged by the closures of bank branches of all financial institutions, increasing the existing options in the provision of the cash service for our customers, the **Correos-Cash** initiative has been deployed, which makes it possible to "withdraw and deposit money" at a Correos branch, including having the money sent to the customer's home address. It will be carried out through the Ibercaja app. Cash can be sent at a Correos branch or at an Ibercaja branch. Cash can be paid in at any of the branches of the Post Office set up for this purpose. This is in addition to the cash service in shops, **Cash Back**, which allows you to make a withdrawal with your Ibercaja card at an Ibercaja POS once you have made a purchase at the shop.

Customer services

To facilitate communication with its customers, Ibercaja has a **Customer Care Service (CCS)** so that customers and users of its services can send in their complaints, claims, suggestions and proposals for improvement. A total of 23,995 applications have been submitted in 2021. Details of the figure and the variation with respect to 2019 and 2020 are included below:

Requests dealt with by the CCS

TYPES	2019	2020	2021	CHANGE 20/19	CHANGE 21/20
Interest rate floor clauses	596	622	944	4.3%	51.70%
Arrangement fees	3,738	6,340	11,561	41%	82.35%
Claims and complaints	7,139	9,233	11,435	29.3%	23.84%
Suggestions	36	42	55	16.6%	30.95%
Total (*)	**11,509**	**16,237**	**23,995**	**41%**	**47.77%**

(*) Total 2019 figures do not coincide that those contributed in the 2019 Directors' Report, since the Personal Data Protection rights are no longer dealt with by this Service and have not been included.

The high number of claims requesting the nullity of clauses and compensation for mortgage loan arrangement costs, which is the type of claim with the highest volume in practically the entire Spanish financial system, is due to the confirmation of the jurisprudential criterion by the Court of Justice of the European Union (16 July 2020) and the Supreme Court 457/2020 (24 July 2020) of the division of notary fees in half between the customer and the entity and the full attribution to the lender of appraisal, registration and agency fees. The Court of Justice of the European Union has yet to decide on the "dies a quo", which is the date on which the five-year limitation period for claims begins to run. However, with the criteria established by the Legal Department in 2020, a new procedure was drawn up for the payment of mortgage constitution expenses in those consumer claims that Ibercaja considers not time-barred to prevent these claims from becoming lawsuits, whether the claim was filed through a lawyer or directly by the customer, in order to achieve savings in legal costs for the Entity in those cases in which it is unequivocally known that if the matter goes to court, the decision will be unfavourable to the Entity. This procedure has been modified throughout the year 2021, incorporating the payment of these expenses also in novations and subrogations, cases that it had first been decided to exclude.

As for the so-called "interest rate floor clauses", the trend reflects the work done by the Entity in recent years in resolving this type of claim, having included this year the return of the floor in novated loans from the activation of the clause to the date of the novation.

The **average time to resolve complaints and claims** is around 27 days, which is within current regulations. By 31 December 2021, 97.3% of all incidents received had been handled (82.2% in 2020).

GUIDE TO SERVICES

In 2021 Ibercaja has adapted to the new Guide on customer services and the latest Bank of Spain Circular.

The most important new developments this year are the work to adapt Ibercaja Banco's CCS to the new Guide on the criteria for the organisation and operation of customer services published by the Bank of Spain last July and the preparatory work for the implementation of the new model confidential statements on the register of complaints contained in Bank of Spain Circular 4/2021 of 25 November, to supervised institutions, on models of confidential statements on market conduct, transparency and customer protection, and on the register of complaints, which will require the first confidential statements to be sent in March 2023, reporting data for the second half of 2022.

6.4 Commitment to our employees

102-7, 102-8, 102-10, 102-12, 102-35 102-36, 102-43, 102-44, 103-1, 103-2, 103-3, 401-2, 401-3

> The dedication and professionalism of the people who work at Ibercaja and their involvement and commitment to the project make them the main ambassadors of the brand.

The Ibercaja Group has a **staff** of **4,880 people**, of whom 4,587 work at the Bank, the parent company. **96%** of the Ibercaja Banco workforce have permanent contracts, the average length of service stands at 21 years, and the average age is 47. The collective agreement fully covers the employees of Ibercaja Banco.

4,587 people
IBERCAJA BANCO TEAM

Ibercaja Banco has a **human team** of **4,587 professionals** (data as a December 2021), 96.27% of whim have an indefinite contract.

96% PERMANENT EMPLOYEES

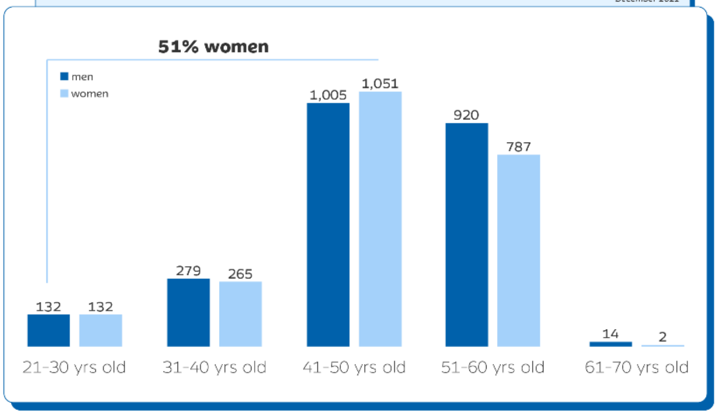
Of these, 772 perform their work in central services, which means that 83% of the total workforce works in the branch network.

83% OF EMPLOYEES IN BRANCH NETWORK

Women currently account for **49%** of the workforce, having increased significantly in recent years (37% in 2005, 44% in 2014, 45% in 2015, 46% in 2016) and remaining stable in the last three years (48% in 2018 and 2019). In the under-50 age bracket, **51%** of employees were female; this means that the percentage of women in the Bank's average age is one point higher than that of men.

	51% MEN	**49% WOMEN**	TOTAL
People	2,350	2,237	**4,587**
Average age	47 years old	46 years old	**47 years old**
Average lenght of service	21 years old	21 years old	**21 years old**

December 2021



We are Ibercaja...

2021 is the second year in which we have had to reconcile the management of the health crisis triggered by COVID-19 with the Bank's strategic roadmap, which has seen the launch of the Desafío 2023 Plan.

In 2021, we began to rewrite the future, in which **Health Care**, **Communication** and **Resilience**, have been essential pillars in the management of people in a new context full of uncertainties but also opportunities.

The People Department faces the challenge of **becoming an attractive organisation for Talent**: reinforcing the behaviours that define our culture; developing a differential value proposal so that the people in the organisation live and feel the best experience and are the main promoters of the Ibercaja brand, in short, making our corporate purpose a reality, now more than ever:

OUR PURPOSE

"Help people build their life story because it will be our story"

2021. Start of the strategic cycle

THE ROADMAP FOR 2023

"To become an attractive organisation for talent"

Within the framework of the new Desafío 2023 Strategic Plan, and in Ibercaja's conviction that people are the key to achieving success through their Talent, professionalism and commitment, in 2021, the People Department began a strategic reflection on its contribution to the lines of the new **Plan Desafío 2023**, defining a new **Map of Strategic Initiatives**, which includes the renewal of the Department itself.

Report of the People Area Management – 2021

The Model is defined through 5 strategic lines, materialised in specific objectives:

Specific objectives	
Talent Development and Recruitment	• Identify profiles capable of taking on greater responsibilities and coordinating projects, evolving professional careers, and making them more transversal. • Identify talent shortages and fill them with external recruitment • Define recognition policies linked to value added.
Education and training programmes	• Increase our capabilities aligned to strategic objectives: advisory programmes, sales, profitability-risk, business, new technical skills, leadership, new ways of working...
Incentivising	• To become a more attractive company for talent, applying recognition policies linked to the value contributed.
Culture of Service and Collaboration	• Activate the corporate culture and purposes, through action plans that integrate the behaviours defined in the relationship model in our day-to-day life (processes), implementing initiatives that promote innovation, participation, FRC culture, well-being, sustainability... • To become a flatter organisation that encourages participation and innovation.
Systems and Data	• Advancing data management to enable information-based decision making. • To become the central node for the aggregation and distribution of individual and collective information for the personalised and comprehensive management of each employee.

12 KEY MILESTONES IN 2021

1

Being excellent even in difficult times

In this particular year, Ibercaja wanted to award the **Commitment Award to the entire workforce** and, in particular, to recognize the work of all those who have been on the front line. In this edition, the outstanding work of **633** male and female employees has also been recognised.

2

Agreement on the implementation of the ERE

On December 20, 2020, the Agreement was reached for the application of an ERE in Ibercaja in 2021 and 2022. With this process, Ibercaja satisfactorily meets the objectives of the negotiation: **Voluntary**, **Structural Optimization** and **Efficiency Improvement**.

3

2nd inFemenine Week (LeaderA Plan)

The **LiderA Plan** seeks to continue advancing in the new inspiring leadership model, focusing on women's access to managerial positions, through the improvement of their aspirations, the support of mentors, measurement and objectification.

4

Call for internal competitions

In 2021, a total of 18 places are announced (9 for access to Level VIII and 9 for access to Level X), in accordance with the provisions of C°C°. Testing date: during the month of May 2022.

5

Salary gap study

In 2021 we have carried out a study of the Salary Gap at Ibercaja, observing that the salary difference at Ibercaja stands at **12.1%**, in line with the sectoral context, motivated by the bank's historical gender evolution.

6

Impulso Solidario Awards

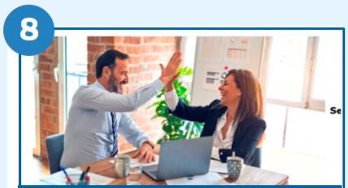
After three editions, the Bank launched an **extraordinary call** in order to alleviate the effects of the health, economic and social crisis caused by Covid-19. In 5 years this project has achieved the involvement of **70% of the workforce.**

7

Business indicators in data analytics

In 2020, business data has been integrated and various data sources analyzed, with the aim of answering business questions related to human capital and acting accordingly to obtain a real improvement in its activities and results.

8



Preparing for digital design

Discovery workshops, Ingorfafías, videos or little tricks to optimize the use of tools, are part of the material available in Paraninfo for the management of technological change in Ibercaja.

9

Ready for the digital challenge? 1st Master's Degree in Financial and Wealth Advice and Digital Banking

With the aim of strengthening the financial training of different STEM profiles recently incorporated into the Bank, in 2021 the 1st edition of this Master will be launched, which has 150 hours of internships in offices complementary to the theoretical training received in the Virtual Classroom.

10

We lay the foundations of the culture project

Understand the current experience of Ibercaja employees, to build a **relationship model** with great impact and results, creating an evolutionary model based on data that ensures the improvement of the employee experience and that this has repercussions on the customer experience .

11

I Planet Week

From October 18 to 24, different activities were carried out to give visibility to our strategic position in terms of Sustainability and make our corporate Purpose a reality, accompanying and helping on the path towards a more sustainable world.

12

This Christmas, we are more Ibercaja than ever before

Under the slogan "*This Christmas We are more Ibercaja than ever before*", this year we are holding a very special campaign with the aim of bringing our stakeholders closer to the values that represent the Ibercaja brand.

1. Being excellent even in difficult times

> ***In 2020 we faced a challenging year for everything and everyone. But despite this, at Ibercaja we have been up to the task of supporting our customers from the outset as an essential service.***

In a context of unprecedented crisis, we have once again demonstrated that Ibercaja's differential value is its people, professionals who demonstrate every day that values such as commitment, self-improvement and teamwork are the key to success and have been recognised as such

For this reason, this year, the **COMMITMENT 2020 AWARD** was awarded to all the Bank's professionals, and in particular, the work of all the colleagues who have been on the "front line" in the branch network was explicitly recognised.

EXCELLENT TEAMS Awards

117 Branches
80 Managers
633 Recognitions

Therefore, exceptionally in 2021, a greater number of branches and management figures have been recognised, with a total of **633 awards**.

The current health situation once again conditioned the presentation of these awards, but all the winners received a **piece designed** exclusively for this edition, as well as the personal recognition of our CEO.

2. Agreement on the implementation of the ERE

On 20 December 2020, the Agreement was reached for the Application of a Redundancy Proceedings at Ibercaja.

With this process, Ibercaja satisfactorily fulfils the negotiation objectives:

- **Voluntariness**, as a priority criterion for involvement.
- **Optimisation of the structure**, adapting it to the current market.
- Improved levels of **efficiency**, competitiveness, productivity and profitability.

AGREEMENT TO APPLY FURLOUGH SCHEME

- **750** max. no. of affected workers
- **30,06,2022**, plan deadline
- **199** maximum number of offices affected by closure

Main Redundancy Indicators:		
Total voluntary accessions	811	
Separations 2021	525	70%

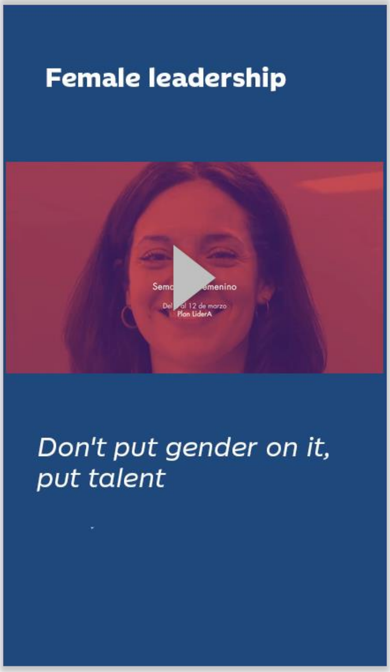
3. 2nd inFemenine Week (LeaderA Plan)

From 8 to 12 March 2021, the 2nd Ibercaja inFemenine week kicked off.



An initiative framed within the **FRC Plan** to raise awareness among employees, customers and society of the importance of building diverse and egalitarian teams.

At Ibercaja, women currently represent 49% of the workforce (51% in age brackets under 50), and the proportion of women in management positions is 31%.

The LeaderA Plan seeks to further advance our Inspirational Leadership Model by focusing on women's access to leadership positions through raising aspirations, flexibility, ambassadorial support, measurement and objectification to ensure progress.

To achieve this, it is necessary to promote initiatives that raise awareness among women and men of the importance of diversity in all areas of the organisation, breaking down barriers and overcoming stereotypes.

Throughout the week, inspiring voices, ambassadors of our LeaderA Plan, reminded us of the skills that women bring to our Leadership model. These included: Tenacity, Initiative, Self-improvement, Innovation, Courage and Excellence

Female leadership

49% female presence

51% in age brackets below 50 years of age

Applications for vacancies for women in managerial positions

27% to 32%

Concessions of vacancies to managerial positions

28% to 35%

51% of the promotions given to WOMEN

TOP LEADERS

25% to 28%

+36% of women in managerial positions in 50% of territorial divisions

Main activities of the week

SPECIFIC SITE. We inaugurate the week by launching a specific website to gather all the information related to the FRC Model and the activities developed during the "2nd inFemenine Week".

LeaderA AMBASSADORS. Our LeaderA Plan ambassadors conveyed the skills that women bring to Ibercaja's inspirational leadership model: tenacity, initiative, self-improvement, courage and excellence.

SHOWCASE YOUR TALENT CYCLE. The cycle of Webinars was presented in the context of the inFemenine week to empower people's talent through self-knowledge and the improvement of personal branding. More than 300 people took part in the different workshops: "My Ideal Self", "Positive Influence Model", "Discover the essence of your personal brand".

The "RAISE YOUR VOICE" SURVEY, where more than 450 people participated, allowed us to share reflections on Diversity and Women's Leadership. These same questions were transferred to Social Media, obtaining valuable information about the users' opinions.

FACE TO FACE WITH... Led by journalist Pilar Estopiñá, we talked to two female directors of the Entity with different backgrounds who shared their experience and vision of female leadership at different times in their lives.

SOCIAL MEDIA. Social Media allowed us to amplify the online dissemination of the 2nd inFemenine Week, supporting the effort made to organise a programme of activities without physical presence, reaching more than **11,000 users** and nearly **2,500 interactions**.

#SemanaenFemenino

#CEOPorLaDiversidad ALLIANCE promoted by Fundación Adecco and Fundación CEOE, which Ibercaja joined in 2019.

This initiative aims to unite CEOs from different companies around a common and innovative vision of diversity, equity and inclusion to act as ambassadors helping to accelerate the development of strategies that contribute to business sustainability, talent competitiveness and the reduction of inequality.

With this management commitment, we continue to promote the FRC culture, thus reinforcing the inclusive model in which the organisation works to achieve effective equality.

4. Call for internal competitions

On 27 August, the Entity's Board of Directors approved the holding of internal competitions for access to Level VIII and Level X by training.

Pursuant to Art. 27 of the Collective Bargaining Agreement for Savings Banks and Savings Institutions in force, the conditions relating to the call for applications are as follows:

- Total number of places: **18** (9 for access to Level VIII and 9 for access to Level X)
- Date of testing: During the month of **May 2022**

The syllabus selected for the entrance exams will include, among others, contents that are part of the compulsory-regulatory training that the staff must currently take to carry out their duties:

- MiFID II Regulations and Products (30 hours)
- Prevention of Money Laundering and Terrorist Financing (9 hours)
- GDPR (1 hour)
- IDD Regulations and Insurance Products (25 hours)
- Law on Real Estate Credit Contracts (10 hours)
- Sustainability (30 hours)
- Enterprise Risk and Product Management (30 hours)

The **Guide to the Opponent**, where information related to this process can be consulted, has been produced: syllabus, didactic resources, consultation channel, tutorials...

5. Salary gap study

In recent years, we have made positive progress in gender equality, increasing women's participation and reducing the gender pay gap.

The gender pay gap measures the difference between the pay received by men and women.

In 2021 we conducted a Pay Gap study at Ibercaja, with the following conclusions:

Wage Gap Study

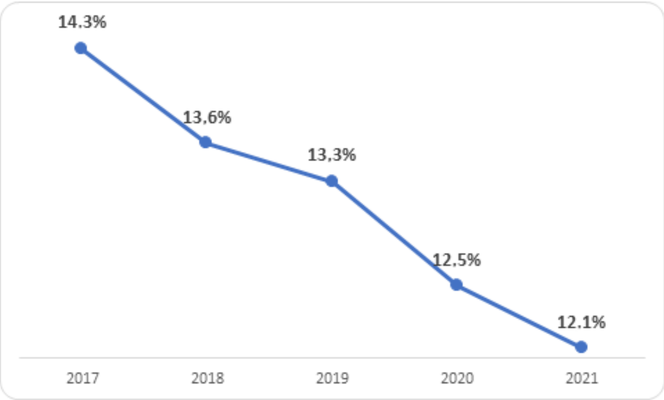
↓

The wage gap at Ibercaja is in line with the sectoral context, mainly due to the Bank's historical gender composition.

- *Among the workforce under 40 years of age, there is an equal number of men and women. If we take the workforce under 50 years of age as a reference, we find that there is a majority of women compared to men (51%).*
- *The average age of men and women is very similar, at around 48 years old. The average length of service is 22 and 21 years (men and women, respectively).*
- *There is a numerical superiority of men over women from levels I to V, from levels VI-XI we find a majority of women over men, and from levels XII - XIV there is parity between both sexes.*

As a result of the collective redundancies carried out in the Entity, the largest number of departures corresponded to older employees, and consequently, those with more seniority.

This has contributed to the fact that the **salary gap** between women and men **has narrowed** over the years, evolving as follows:



6. Impulse Solidario Awards

> ***"imPULSO SOLIDARIO" is a participation initiative aimed at the Bank's employees within the framework of our corporate purpose "Helping People to build the story of their lives, because it will be our story".***

The initiative aims to turn the organisation's professionals into ambassadors of the social causes that move them. The employees are the ones who propose non-profit social projects and through a vote, the whole organisation is involved in the final decision.

After three editions, the Bank launched an **extraordinary call for applications** in order to alleviate the effects of the health, economic and social crisis caused by Covid-19.

The winning associations have been selected by Ibercaja's staff, among the 24 projects also proposed by its employees, aimed at helping the most vulnerable people and groups in this crisis.

The three projects that received the most votes were:

- *Significant loss of income for the research "Duchenne Muscular Dystrophy".*
- *"Covid is not the end of Leukaemia".*
- *"I understand you now"*
