SUMMARY DESCRIPTION OF THE MAIN TERMS AND CONDITIONS OF THE HEDGING AGREEMENTS AND HEDGING TRANSACTIONS

Not Applicable

WEIGHTED AVERAGE LIFE OF THE NOTES, INTERNAL RATE OF RETURN AND ASSUMPTIONS

General

The yields to maturity on the Class C2021-01 Notes will be sensitive to and affected by the amount and timing of delinquencies, prepayment and payment pattern, revolving and credit card usage, dilution and default on the Purchased Receivables, the level of the relevant interest reference rate, the occurrence of any Revolving Termination Events or Accelerated Amortisation Events or any Fund Liquidation Events, the issuance of a new Notes Series, the occurrence of an Optional Early Redemption Event or any Optional Repurchase Event and any other repurchases of the Purchased Receivables by the Seller. Each of such events may impact the weighted average lives, the internal rates of return, and the duration of the Class C2021-01 Notes.

The average life of or the potential yields on any security cannot be predicted, because the actual rate of repayment on the underlying assets, as well as a number of other relevant factors, cannot be determined.

Prospective purchasers of Notes should therefore not place undue reliance on any of these forward-looking statements. None of the Arrangers or any global coordinators, lead managers, bookrunners or underwriters assumes any obligation to update these forward-looking statements or to update the reasons for which actual results could differ materially from those anticipated in the forward-looking statements.

Weighted Average Lifes and Internal Rates of Return of the Class C2021-01 Notes

The "Weighted Average Life" (WAL) of the Class C2021-01 Notes refers to the average amount of time that will elapse from the date of issuance of the Class C2021-01 Notes to the date of distribution to the investor of each Euro distributed in reduction of the principal of such security. The Weighted Average Life of the Class C2021-01 Notes shall be affected by the available funds allocated to redeem the Class C2021-01 Notes.

The "Internal Rate of Return" (IRR) of the Class C2021-01 Notes refers to the rate of return that makes the net present value of all cash flows (both positive and negative) from the investment in the Class C2021-01 Notes equal to zero. The Internal Rate of Return of the Class C2021-01 Notes shall be affected by the available funds allocated to pay interests due on the Class C2021-01 Notes.

The model used for the purpose of calculating estimates presented in this document employs an assumed constant per MPPR (as defined below). The MPPR is an assumed monthly constant rate of payment of principal, when applied monthly, results in the expected portfolio of the Purchased Receivables balance and allows to calculate the monthly principal payment.

The information included in the tables below assume, among other things, that:

- (a) the Disbursement Date of the Notes Series 2021-01 is 28 June 2021;
- (b) the Scheduled Amortisation Starting Date is 26 June 2023;

- (c) the reference date of the Securitised Portfolio is 30 April 2021;
- (d) on the Disbursement Date of the Notes Series 2021-01, the Outstanding Principal Balances of the Purchased Receivables is equal to the Minimum Portfolio Amount which amounts to EUR 152,000,000 as of such date. New Receivables are purchased (if required) in order to maintain such Minimum Portfolio Amount, until the Scheduled Amortisation Starting Date of the Notes Series 2021-01;
- (e) the composition and the amortisation profile of the portfolio of the Purchased Receivables (and the new Receivables purchased during the Notes Series Revolving Period of the outstanding Notes Series) is similar to the composition and amortisation profile of the performing portfolio as at the reference date (for the avoidance of doubt, including delinquent accounts and excluding accounts having a negative Outstanding Principal Balance);
- (f) during the Notes Series Revolving Period of the outstanding Notes Series, only principal collections and/or any PDL Cure Amounts are applied to purchase new Receivables;
- (g) no new Receivables are transferred to the Fund (neither in the context of Initial Transfers nor Additional Transfers) after the Purchase Period immediately preceding the Scheduled Amortisation Starting Date of the Notes Series 2021-01;
- (h) no new issuance of further Notes Series occurs after the issuance of Notes Series 2021-01 and the Notes Series 2019-01 will be fully redeemed on the Notes Series 2019-01 Call Date corresponding to the Payment Date falling in June 2021;
- (i) the Seller does not repurchase any Receivables purchased by the Fund;
- (j) the rate of defaults on the Receivables (as per the definition of Defaulted Client Accounts) is assumed constant at 9.66%, which is based on the historical information provided by the Seller in April 2021;
- (k) interest payments on the Receivables will be received, if any at the applicable interest rate offered by SFC which as of the reference date stand at 20.04%. No adjustment of the applicable interest rate under the Credit Card Agreements is offered by SFC;
- (l) the Fund excess margin is constant and sufficient to cover the assumed rate of defaults on the Receivables (as per the definition of Defaulted Client Accounts);
- (m) a constant monthly principal payment rate (**MPPR**). In respect of the Class C Notes, the assumed MPPR is: (i) 2% in respect of scenario 1; (ii) 4% in respect of scenario 2; and (iii) 6% in respect of scenario 3, according to the following tables. These scenarios have been defined based on the historical information provided by the Seller as of April 2021;
- (n) the calculation of the weighted average life (in years) is calculated on an Actual/Actual basis;
- (o) the Notes Series 2021-01 Clean-Up Call Conditions will not be considered satisfied;
- (p) none of the Fund Liquidation Events are considered applicable;

- (q) payment of principal and interest due and payable under the Notes will be received on the 26th day of each corresponding Payment Date;
- (r) zero per cent investment return is earned on the Issuer Accounts;
- (s) no Revolving Termination Event has occurred;
- (t) no Accelerated Amortisation Event has occurred;
- (u) it is not necessary to use the Commingling Reserve or the General Reserve; and
- (v) at any time, the Fund will not receive any collection, insurance indemnification or any other amounts in relation to any Non-Purchased Receivables as described in the priority allocation rules set out in the Base Prospectus.

The actual characteristics and performance of the Purchased Receivables will differ from the assumptions used in constructing the tables set forth below, which are hypothetical in nature and provided only to give a general sense of how the principal cash flows might behave under varying monthly rate of principal payment scenarios. For example, it is unlikely that the receivables will pay at a constant monthly rate of principal payment until maturity. Any difference between such assumptions and the actual characteristics and performance of the Purchased Receivables, or actual monthly rate of principal payment of loss experiences, will affect the percentage of principal amount outstanding as well as interest payment over time and the Weighted Average Life and Internal Rate of Return of the Class C2021-01 Notes.

Subject to the foregoing discussion and assumptions, the following tables indicate the Weighted Average Life, Duration and the Internal Rate of Return of the Class C2021-01 Notes under the constant MPPR shown and depending on the exercise of the optional redemption of the Notes Series 2021-01 on the Notes Series 2021-01 Call Date.

Scenario Number 1 2 3					
Monthly Principal Payment Rate (MPPR) 2% 4% 6%

Cumulative Default Ratio is the ratio of (a) the cumulative Receivables arising from Defaulted Client Accounts in the Fund during the life of the Fund and (b) the sum of the Receivables transferred to the Fund during the life of the Fund.

The Weighted Average Lives of the Class C2021-01 Notes are subject to factors largely outside the control of the Fund and consequently no assurance can be given that the assumptions and estimates above will prove in any way to be realistic and they must therefore be viewed with considerable caution.
