

De conformidad con lo dispuesto en el artículo 82 de la Ley 24/1988, de 28 de julio, del Mercado de Valores, Enel Green Power S.p.A. (la "Sociedad") informa del siguiente

HECHO RELEVANTE

La Sociedad y el Banco de Inversión Europeo ("BEI") han suscrito un acuerdo mediante el cual el BEI concederá a la Sociedad un préstamo de 440 millones de euros, ampliable por mutuo acuerdo de las partes hasta un máximo de 600 millones de euros, para la financiación del plan de expansión de las operaciones de la Sociedad en Italia.

Dicho préstamo tendrá una duración de 20 años y ha sido otorgado con una tasa de interés inferior a los intereses de mercado, por encontrarse totalmente garantizado por Enel, S.p.A. Asimismo, dicho préstamo será utilizado para financiar la instalación de plantas de energía eólica y fotovoltaica con una potencia de 840 MW y se enmarca dentro de la estrategia de crecimiento de la Sociedad prevista en el plan de negocio para el período 2010 - 2014.

Se adjunta al presente hecho relevante la versión inglesa de la nota de prensa publicada hoy en relación con la firma del referido acuerdo.

Lo que se comunica para público y general conocimiento, en Roma, a 10 de diciembre de 2010.

Dña. Francesca Romana Napolitano

ENEL GREEN POWER AND EIB SIGN AGREEMENT FOR FINANCING INVESTMENT IN RENEWABLES

- *Agreement signed for 440 million euros loan (that may be increased up to 600 million euros) to develop wind and photovoltaic projects in Italy.*

Rome, December 10th 2010 - Enel Green Power SpA ("EGP") and the European Investment Bank ("EIB") signed an agreement whereby EIB will grant EGP a loan of 440 million euros (that may be increased by further agreement of the parties up to 600 million euros) to help finance EGP's plan to expand its operations in Italy. EGP is the Enel Group company dedicated to the management and development of renewable energy.

The 20-year loan carries an interest rate well below the market benchmarks since it is also fully secured by Enel SpA.

More specifically, the EIB loan will help finance the installation of 840 MW in new renewables generation capacity by wind and photovoltaic plants. EGP plans to invest a total of around 1,300 million euros in this project.

For EGP this operation is part of the growth strategy outlined in its 2010-2014 business plan, which calls for significantly expanding installed capacity from its current level of about 5.9 GW to 9.2 GW, with a capex of 5.2 billion euros. EGP plans to pursue balanced growth in all of the technologies it currently uses (hydroelectric, wind, geothermal, solar and biomass) and the EIB loan will help make the financial structure of these wind and photovoltaic projects more competitive.

About Enel Green Power

Enel Green Power is a publicly listed company and part of the Enel Group. It is dedicated to renewable energy with a presence in Europe, North America and Latin America. It is one of the global leaders in its industry with a total installed capacity of around 5,900 MW and more than 600 plants in operation in 16 countries. The company and its subsidiaries produced 21 billion kWh of energy from water, sun, wind, geothermal and biomass in 2009.
