OTHER RELEVANT INFORMATION

COX INFRASTRUCTURE GROUP, S.A.

Cox is awarded new electricity transmission projects in Brazil and Chile

The Company hereby announces the award of two electricity transmission projects in Brazil and Chile, representing estimated aggregate nominal regulated revenues of approximately €446 million and an estimated aggregate investment of €109 million.

In Brazil, Cox has been awarded Lote 6 of the Leilão de Transmissão 4/2026, with an initial Annual Permitted Revenue (RAP) of BRL 37.85 million per year (€6.2 million[1]). The Company estimates CAPEX of BRL 396 million (€64.5 million), approximately 18% below the BRL 480.3 million reference investment established by ANEEL, as a result of its technical assessment and execution capabilities. Aggregate nominal regulated revenues, including their adjustment over the operating period, are estimated at BRL 1.941 billion (€316 million). The project will have a 42-month construction period and is expected to create more than 1,300 jobs.

In Chile, Cox has been awarded Group 3 of the Panul–Los Boldos, with an initial Annual Transmission Value per Segment (VATT) of US$5.087 million per year (€4.6 million) and an estimated investment of US$50 million (€44.5 million). Over the 20-year remuneration period, including the applicable adjustments during the operating period, cumulative nominal regulated revenues are estimated at approximately US$145 million (€130 million). The award remains subject to final administrative formalization.

These new projects strengthen Cox's presence in the electricity transmission business in Latin America and further support its growth strategy focused on regulated assets generating long-term recurring revenues.

In Madrid, Spain, on 4 November 2026.
