For the purposes set out in Article 17 of Regulation (EU) No 596/2014 on market abuse and in Article 227 of Law 6/2023, of March 17, on Securities Markets and Investment Services and related provisions, Enagás, S.A ("Enagás" or the "Company") hereby informs you of the following:

Communication of Other Relevant Information

Madrid, 30th July 2026.

Enagás completes the acquisition of a 31.5% stake in the French TSO Teréga S.A.

Further to the Inside Information announcement released on 21 April 2026 under registration number 3167 regarding the share purchase agreement entered into between Enagás Internacional, S.L.U. and GIC, Enagás hereby announces that, following the fulfilment of the conditions precedent set out in such agreement, it has acquired from GIC a shareholding representing 31.5% of the share capital of Teréga S.A., after obtaining the European Commission's antitrust approval and all other necessary regulatory authorisations.

The amount paid by Enagás for the transaction comes to €573 million. Following completion of the acquisition, Teréga's shareholding structure is as follows: Snam 40.5%, Enagás 31.5%, EDF Invest (Ouestgaz) 18.0%, and Crédit Agricole (Predica) 10.0%.

Teréga is a French natural gas transmission and storage system operator (TSO) operating in the south-west of the country. It owns approximately 5,100 kilometres of gas pipelines and two underground storage facilities, representing around 16% of the French gas transmission network and 27% of the national gas storage capacity. Teréga's network is interconnected with Enagás' network through two cross-border interconnection points: Irún and Larrau.

The transaction is fully aligned with Enagás' Strategic Plan and will generate benefits for both companies and both countries, reinforcing security of supply. It will also contribute to the achievement of decarbonisation objectives while preserving the independence of both operators, in coordination with the Governments and Regulators of France and Spain.

Enagás' investment in the French operator strengthens the industrial development and European leadership of both companies. This technical and operational collaboration between the two operators will facilitate the development of projects from a regional Southern European perspective and will enhance efficiency among neighbouring Transmission System Operators (TSOs). Together with Natran, REN and OGE, Enagás and Teréga share the objective of developing the European hydrogen corridor H2med.

The acquisition of Teréga is fully compatible with Enagás' renewable hydrogen investment plan, contributes to improving the Company's growth profile and further strengthens both its dividend policy and its long-term sustainability.
