of Audax Renovables, S.A.

ANNEX 1

Press release

Audax enters the telecommunications business through an agreement with MasOrange

- **Audax places itself as a pioneering independent energy retailer in Spain, offering an integrated energy and telecommunications services package**
- **Through this strategic partnership, Audax will provide mobile, fibre and landline services in Spain**
- **With this agreement, Audax is making progress with its 2026–2030 Strategic Plan**

Badalona, 7 April 2026. Audax, an energy group with a presence in nine countries, has signed a strategic partnership with MasOrange, the leading operator by number of customers, to supply mobile, fibre and landline services in Spain.

Supported by MasOrange's solid infrastructure and network, Audax has become the first independent supplier in Spain to offer a package combining energy with energy services and telecommunications.

Through this partnership, Audax aims to provide its customers with an integrated package of essential services, enabling them to achieve greater savings, convenience and simpler management of their utilities. In this regard, consumers who sign up for energy and telecommunications services with Audax will benefit from a direct monthly discount on their bill.

MasOrange's networks combine high-capacity fibre and 5G mobile technology, placing them among the most advanced connectivity infrastructures on the Spanish market. This technological platform will enable Audax to offer high-speed connectivity and reliable telecommunications services to its customers.

Steady progress in its Strategic Plan 2026–2030

With this milestone, Audax is making headway in its plans to become a multi-service digital company and is expanding its client-focused product ecosystem, in line with the objectives set out in its Strategic Plan 2026–2030.

As part of this roadmap, and as announced in November 2025, the company aims to reach 19,000 fibre customers and 30,000 mobile lines by 2030 as a result of the implementation of the new model in Spain and Italy. The telecommunications business unit is part of a broader strategy to diversify services, alongside other energy and digital offerings.

Óscar Santos, Chief Executive Officer of the Audax Group, highlights: *"Our decision to enter the telecommunications sector is driven by our aim to offer customised, high-value-added solutions to the customers who put their trust in Audax. Furthermore, partnering with MasOrange gives us the opportunity to work with a leading provider in the field of connectivity."*

About Audax

Audax is the energy company that helps people and businesses get the most out of their energy. We are a vertically integrated energy group that generates 100% renewable energy and supplies electricity, gas and energy efficiency solutions.

With a presence in 9 countries and over 800 professionals, we supply electricity and gas to more than 462,000 customers and manage a portfolio of wind and solar generation with over 1GW of installed capacity.

We are a listed company and have a solid financial position. We are built on three pillars: data-driven customised solutions, proven financial strength and a commitment to transparency. We are energy managers, we transform complexity into something simple and efficient, so that customers can focus on what really matters.
