DISCLOSURE OF OTHER RELEVANT INFORMATION

On 5 November 2025, MSCI announced the reincorporation of Naturgy as a constituent of its MSCI indices, effective on 25 November 2025.

MSCI indices serve as key benchmarks for tracking global financial markets performance and are widely used by investors, fund managers and analysts.

This inclusion reflects the recognition of the Company's increased free float market capitalization and liquidity, as well as compliance with other requirements established by MSCI.

This achievement will help to enhance Naturgy's visibility in the capital markets and broaden its potential base of institutional investors who track or use these indices as a benchmark.

The reestablishment of the free float and the return to the MSCI indices were key objectives of the Company's 2025–2027 Strategic Plan, which have now been achieved.
