**Pres releases**

## **CIE AUTOMOTIVE COMPLETES THE ACQUISITION OF ALUDEC GROUP**

**The integrated company specialises in the manufacture of decorative parts for the automotive industry**

Bilbao, 03.03.2026 – CIE Automotive announced today that, after the transaction has been cleared by the antitrust authorities, the acquisition of 100% of the share capital of Aludec, S.A. (hereinafter, “Aludec”) has been completed.

The transaction value (enterprise value) amounts to €200 million, which is equivalent to approximately 5 times the EBITDA for the current year.

The price of the transaction has been paid in cash and by means of cash available.

With around 1,300 employees and sales of approximately €160 million in 2025, Aludec has 8 manufacturing plants in four countries, including Spain, Portugal, Mexico and the United States. The company is a full-service supplier of decorative components for the automotive industry, specialising in the manufacture of plastic and metal parts for both the interior and exterior of vehicles.

According to Jesús María Herrera, CEO of CIE Automotive, “The integration of Aludec means, in the context of our diversification strategy, the creation of a new aesthetic components (branding) division. This transaction strengthens our position as a reference supplier for customers, as we can offer this new line of decorative products globally.”

And continues: “In addition to its excellent strategic and commercial positioning, Aludec has excellent profitability, a solid financial position and, above all, a very high level of cash generation, in line with that of CIE Automotive.”

On behalf of Aludec, S.A., its president, Vicente Villamarín, expresses his “satisfaction at integrating the company into a global group, which undoubtedly ensures growth within the sector and allows the legacy of my father, founder of the company in 1984, to continue.”
