Rating Action: Moody's Ratings upgrades mezzanine ratings in TDA 29, FTA, a Spanish RMBS

04 Mar 2025

Frankfurt am Main, March 04, 2025 -- Moody's Ratings (Moody's) has today upgraded the ratings of the Class B and Class C notes in TDA 29, FTA, a Spanish RMBS transaction. For the Class B notes, the rating action reflects the correction of a prior error in the analysis of the swap counterparty risk, and for the Class C notes the increased levels of credit enhancement available for the affected notes.

We affirmed the ratings of the Class A2 notes, as they have sufficient credit enhancement to maintain their current rating, and of the Class D notes for which the expected tranche loss is reflected in the current rating.

....EUR435M Class A2 Notes, Affirmed Aa1 (sf); previously on Oct 26, 2023 Affirmed Aa1 (sf)

....EUR17.4M Class B Notes, Upgraded to Aa1 (sf); previously on Oct 26, 2023 Affirmed Aa2 (sf)

....EUR9.3M Class C Notes, Upgraded to A1 (sf); previously on Oct 26, 2023 Upgraded to A3 (sf)

....EUR4.9M Class D Notes, Affirmed C (sf); previously on Jul 25, 2007 Definitive Rating Assigned C (sf)

Maximum achievable rating is Aa1 (sf) for structured finance transactions in Spain, driven by the corresponding local currency country ceiling of the country.

RATINGS RATIONALE

The rating action on Class B Notes reflects the positive impact of the correction of a prior error. In the previous rating action, we incorrectly assumed that issuer consent was not required for the swap counterparty to be able to transfer its obligations under the swap agreement. This led us to cap the rating of the Class B notes at Aa2 due to swap counterparty exposure. According to the transaction swap documents, however,

issuer consent is required.

Today's rating action corrects this error and considers the benefit of the issuer consent requirement for the swap counterparty to be able to transfer its obligations under the swap, leading to an upgrade. The rating of the Class B notes is constrained by the swap agreement entered between the issuer and HSBC Bank plc. As a result we capped the rating of Class B at Aa1 (sf).

Increase in Available Credit Enhancement

The rating upgrade on the Class C Notes is prompted by an increase in credit enhancement.

The non-amortizing reserve fund led to the increase in the credit enhancement available in this transaction. We considered the pro rata amortization of the notes, and switch to sequential upon certain conditions being met such as the pool factor falling below 10% of original pool balance.

For the Class C notes, credit enhancement increased to 4.48% from 3.69% since the last rating action on October 2023, prompting today's upgrade action.

Counterparty Exposure

Today's rating actions also took into consideration the notes' exposure to relevant counterparties, such as servicer, account banks or swap providers.

We assessed the exposure to HSBC Bank plc acting as swap counterparty. Our analysis considered the risks of additional losses on the notes if they were to become unhedged following a swap counterparty default by using the CR assessment as reference point for swap counterparties.

The principal methodology used in these ratings was "Residential Mortgage-Backed Securitizations" published in October 2024 and available at <https://ratings.moodys.com/rmc-documents/429877>. Alternatively, please see the Rating Methodologies page on <https://ratings.moodys.com> for a copy of this methodology.

The analysis undertaken by Moody's at the initial assignment of ratings for RMBS securities may focus on aspects that become less relevant or typically remain unchanged during the surveillance stage. Please see Residential Mortgage-Backed Securitizations methodology for further information on Moody's analysis at the initial rating assignment and the on-going surveillance in RMBS.

Factors that would lead to an upgrade or downgrade of the ratings:

Factors or circumstances that could lead to an upgrade of the ratings include (1) performance of the underlying collateral that is better than we expected, (2) an

increase in available credit enhancement, (3) improvements in the credit quality of the transaction counterparties and (4) a decrease in sovereign risk.

Factors or circumstances that could lead to a downgrade of the ratings include (1) an increase in sovereign risk, (2) performance of the underlying collateral that is worse than we expected, (3) deterioration in the notes' available credit enhancement and (4) deterioration in the credit quality of the transaction counterparties.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on <https://ratings.moodys.com/rating-definitions>.

The analysis relies on an assessment of collateral characteristics to determine the collateral loss distribution, that is, the function that correlates to an assumption about the likelihood of occurrence to each level of possible losses in the collateral. As a second step, Moody's evaluates each possible collateral loss scenario using a model that replicates the relevant structural features to derive payments and therefore the ultimate potential losses for each rated instrument. The loss a rated instrument incurs in each collateral loss scenario, weighted by assumptions about the likelihood of events in that scenario occurring, results in the expected loss of the rated instrument.

For any affected securities or rated entities receiving direct credit support/credit substitution from another entity or entities subject to a credit rating action (the supporting entity), and whose ratings may change as a result of a credit rating action as to the supporting entity, the associated regulatory disclosures will relate to the supporting entity. Exceptions to this approach may be applicable in certain jurisdictions.

For ratings issued on a program, series, category/class of debt or security, certain regulatory disclosures applicable to each rating of a subsequently issued bond or note of the same series, category/class of debt, or security, or pursuant to a program for which the ratings are derived exclusively from existing ratings, in accordance with Moody's rating practices, can be found in the most recent Credit Rating Announcement related to the same class of Credit Rating.

For provisional ratings, the Credit Rating Announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating.

Moody's does not always publish a separate Credit Rating Announcement for each Credit Rating assigned in the Anticipated Ratings Process or Subsequent Ratings

Process.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website <https://ratings.moodys.com>.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

The Global Scale Credit Rating(s) discussed in this Credit Rating Announcement was(were) issued by one of Moody's affiliates outside the UK and is(are) endorsed for use in the UK in accordance with the UK CRA Regulation.

Please see <https://ratings.moodys.com> for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on <https://ratings.moodys.com> for additional regulatory disclosures for each credit rating.
