Rating Action: Moody's Ratings upgrades ratings in Madrid RMBS I, FTA and Madrid RMBS II, FTA, two Spanish prime RMBS transactions

07 Oct 2026

Milan, October 07, 2026 -- Moody's Ratings (Moody's) has today upgraded the ratings of four notes in Madrid RMBS I, FTA and Madrid RMBS II, FTA.

The notes are backed by residential mortgage loan contracts originated by Caja de Ahorros y Monte de Piedad de Madrid (later Bankia, S.A.), respectively, and serviced by CaixaBank, S.A. (after its absorption of Bankia, S.A.)

We affirmed the ratings of six notes that had sufficient credit enhancement to maintain their current ratings.

Issuer: MADRID RMBS I, FTA

....EUR 1340M Class A2 Notes, Affirmed Aaa (sf); previously on Dec 12, 2025 Upgraded to Aaa (sf)

....EUR 70M Class B Notes, Affirmed Aaa (sf); previously on Dec 12, 2025 Upgraded to Aaa (sf)

....EUR 75M Class C Notes, Affirmed Aaa (sf); previously on Dec 12, 2025 Upgraded to Aaa (sf)

....EUR 34M Class D Notes, Upgraded to Aaa (sf); previously on Dec 12, 2025 Upgraded to Aa1 (sf)

....EUR 21M Class E Notes, Upgraded to A2 (sf); previously on Dec 12, 2025 Upgraded to Baa3 (sf)

Issuer: MADRID RMBS II, FTA

....EUR 270M Class A3 Notes, Affirmed Aaa (sf); previously on Dec 12, 2025 Upgraded to Aaa (sf)

....EUR 63M Class B Notes, Affirmed Aaa (sf); previously on Dec 12, 2025 Upgraded to Aaa (sf)

....EUR 67.5M Class C Notes, Affirmed Aaa (sf); previously on Dec 12, 2025 Upgraded to Aaa (sf)

....EUR 30.6M Class D Notes, Upgraded to Aaa (sf); previously on Dec 12, 2025 Upgraded to Aa1 (sf)

....EUR 18.9M Class E Notes, Upgraded to Baa3 (sf); previously on Dec 12, 2025 Upgraded to Ba1 (sf)

RATINGS RATIONALE

The upgrades are prompted by an increase in credit enhancement for the affected tranches.

In both transactions, the sequential amortization and a continuous replenishment of the reserve fund via trapping of excess spread led to the increase in the credit enhancement available for the respective notes.

For the Class D notes, the most senior affected tranches, credit enhancement increased to 21.1% from 16.4% in Madrid RMBS I, FTA and to 21.0% from 16.1% in Madrid RMBS II, FTA since the last rating action in December 2025.

Key Collateral Assumptions

As part of the rating action, we reassessed our lifetime loss expectation for the portfolios reflecting the collateral performance to date.

The performance of the transactions has slightly improved since the last rating action. In Madrid RMBS I, FTA, 90 days plus arrears currently stand at 0.17% of current pool balance, down from 0.62% a year earlier, while cumulative defaults currently stand at 20.73% of original pool compared with 20.68% a year earlier. In Madrid RMBS II, FTA, 90 days plus arrears currently stand at 0.33% of current pool balance, down from 0.41% a year earlier, while cumulative defaults currently stand at 22.18% of original pool balance, compared with 22.15% a year earlier.

Based on the observed performance to date and the increase in our recovery rate assumption to 60% from 55%, we decreased the expected loss assumption as a percentage of original pool balance to 9.61% from 10.61% for Madrid RMBS I, FTA and to 10.28% from 11.34% for Madrid RMBS II, FTA. The expected loss assumptions as a percentage of current pool balance are broadly stable at 3.41% for Madrid RMBS I, FTA, compared with 3.42% previously, and 3.71% for Madrid RMBS II, FTA, compared with 3.64% previously.

We reassessed loan-by-loan information to estimate the loss we expect each portfolio to incur in a severe economic stress scenario. We maintained the MILAN Stressed Loss assumption at 10.50% for Madrid RMBS I, FTA and at 11.00% for Madrid RMBS II, FTA.

Our analysis also took into account the interest deferral triggers that allow interest on the Classes B, C, D and E Notes to be subordinated in the notes' payments waterfall, but still remaining positioned above the reserve fund replenishment. None of the triggers are breached as of today. We considered the likelihood of prolonged interest shortfalls on the Classes B, C and D Notes for both transactions in future to be negligible while there is some small probability for both Class E Notes.

The Class E Notes in Madrid RMBS II, FTA deferred interest from February 2013 to November 2018. While all interest shortfalls have been recouped, the transaction structure does not mandate interest-on-interest following non-payment of interest. The upgrade of Class E Notes has taken into account the permanent economic loss resulting from the six years over which interest was deferred without interest on deferred interest being due. Our analysis has also considered potential future interest deferrals.

Today's rating actions took into consideration the notes' exposure to relevant counterparties, such as servicer, account banks or swap providers as well as eligible investments for cash proceeds.

The principal methodology used in these ratings was "Residential Mortgage-Backed Securitizations" published in October 2024 and available at <https://ratings.moody.com/rmc-documents/429877>. Alternatively, please see the Rating Methodologies page on <https://ratings.moody.com> for a copy of this methodology.

The analysis undertaken by Moody's at the initial assignment of ratings for RMBS securities may focus on aspects that become less relevant or typically remain unchanged during the surveillance stage. Please see Residential Mortgage-Backed Securitizations methodology for further information on Moody's analysis at the initial rating assignment and the on-going surveillance in RMBS.

Factors that would lead to an upgrade or downgrade of the ratings:

Factors or circumstances that could lead to an upgrade of the ratings include (1) performance of the underlying collateral that is better than we expected, (2) an increase in available credit enhancement and (3) improvements in the credit quality of the transaction counterparties.

Factors or circumstances that could lead to a downgrade of the ratings include (1) an increase in sovereign risk, (2) performance of the underlying collateral that is worse than we expected, (3) deterioration in the notes' available credit enhancement and (4) deterioration in the credit quality of the transaction counterparties.

REGULATORY DISCLOSURES

For further specification of Moody's key rating assumptions and sensitivity analysis, see the sections Methodology Assumptions and Sensitivity to Assumptions in the disclosure form. Moody's Rating Symbols and Definitions can be found on <https://ratings.moody's.com/rating-definitions>.

The analysis relies on an assessment of collateral characteristics to determine the collateral loss distribution, that is, the function that correlates to an assumption about the likelihood of occurrence to each level of possible losses in the collateral. As a second step, Moody's evaluates each possible collateral loss scenario using a model that replicates the relevant structural features to derive payments and therefore the ultimate potential losses for each rated instrument. The loss a rated instrument incurs in each collateral loss scenario, weighted by assumptions about the likelihood of events in that scenario occurring, results in the expected loss of the rated instrument.

For any affected securities or rated entities receiving direct credit support/credit substitution from another entity or entities subject to a credit rating action (the supporting entity), and whose ratings may change as a result of a credit rating action as to the supporting entity, the associated regulatory disclosures will relate to the supporting entity. Exceptions to this approach may be applicable in certain jurisdictions.

For ratings issued on a program, series, category/class of debt or security, certain regulatory disclosures applicable to each rating of a subsequently issued bond or note of the same series, category/class of debt, or security, or pursuant to a program for which the ratings are derived exclusively from existing ratings, in accordance with Moody's rating practices, can be found in the most recent Credit Rating Announcement related to the same class of Credit Rating.

For provisional ratings, the Credit Rating Announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating.

Moody's does not always publish a separate Credit Rating Announcement for each Credit Rating assigned in the Anticipated Ratings Process or Subsequent Ratings Process.

These ratings are solicited. Please refer to Moody's Policy for Designating and Assigning Unsolicited Credit Ratings available on its website <https://ratings.moody's.com>.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

The Global Scale Credit Rating(s) discussed in this Credit Rating Announcement was(were) issued by one of Moody's affiliates outside the UK and is(are) endorsed for use in the UK in accordance with the UK CRA Regulation.

Please see <https://ratings.moody's.com> for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the issuer/deal page on <https://ratings.moody's.com> for additional regulatory disclosures for each credit rating.
