

**IZERTIS, S.A.** (hereinafter, "Izertis" or the "Company"), pursuant to the provisions of Article 227 of Law 6/2023, of 17 March, on Securities Markets and Investment Services, and related provisions, hereby informs you of the following:

### OTHER RELEVANT INFORMATION

IZERTIS has acquired 100% of the Catalan company ACK STORM, S.L. (hereinafter, "ACKstorm") and the Madrid-based consulting firm SADE CONSULTORÍA TÉCNICA, S.L. (hereinafter, "SADE"). Both acquisitions were formalized last week, in line with Izertis' inorganic growth strategy.

SADE is specialized in the development of custom software and managed services, with a strong focus on the Oil & Gas, gas distribution and petrochemical markets. Founded in 2003 and headquartered in Madrid, it currently has a team of more than 50 professionals, which has allowed it to develop tailor-made technological solutions for the management of oil and gas pipelines, as well as projects in complex industrial environments. It operates in multiple sectors, including insurance, banking, tourism and travel, industry, logistics, pharmaceuticals and technology.

SADE has a stable and recurring turnover, with an annual turnover of around 4 million euros. It closed the 2025 financial year with revenues of 4.11 million euros. The price of the transaction, made up of a fixed and a variable part, will be paid partly in cash and partly in IZERTIS shares, which will be subject to a *lock-up* commitment for a period of 48 months.

The acquisition of SADE strengthens the portfolio of industrial customers and other areas such as insurance and the presence in international markets especially linked to energy and the energy transition.

On another hand, ACKstorm, founded in 2002, is highly specialized in cloud-native, with the highest recognitions within the *partnership* programs of the large hyperscalers in the market (Google and AWS) and a consolidated track record in complex cloud transformation projects. ACKstorm is present in multiple sectors such as banking, energy, retail, industry, health, telecommunications or the public sector.

ACKstorm has presence in Barcelona and Madrid and has more than 50 professionals on staff between both locations. It is a high-growth entity, which closed in 2025 with a turnover of 16 million euros. The price of the transaction, made up of a fixed and a variable part, will be paid partly in cash and partly in IZERTIS shares, which will be subject to a *lock-up* commitment for a period of 48 months.

The acquisition of ACKstorm reinforces Izertis' profile as a reference partner in modernization projects, managed operation and infrastructures prepared for artificial intelligence at a national and international level.

In Gijón, April 20, 2026
