Audax Renovables announces new projects and updates in its portfolio of 100% renewable energy generation.

Badalona, June 2, 2025 - Audax Renovables, S.A. (ADX.MC), a vertically integrated Spanish energy group that generates 100% renewable energy and supplies electricity and gas to customers in 7 European countries, is pleased to announce significant advances in its strategy of expansion and optimization of its generation portfolio.

Audax has incorporated the Yechar photovoltaic project, located in Campos del Río, Murcia, with a peak power of 112.2 MWp and the capacity to produce more than 187,000,000 kWh/year of 100% renewable energy, equivalent to 60,000 households. This project, managed by SPG Gestora Yechar, S.L., a company 100% owned by the Company, is currently in a *ready-to-build* state and will feature fixed structure technology. The project is expected to reach its COD (Commercial Operation Date) by the end of 2027.

The project complies with the milestones established by RDL 23/2020 and its subsequent updates and encompasses the generation of direct current (DC) energy through photovoltaic panels, its transformation into alternating current (AC), and its delivery to the Gestora Yechar 30/132 kV and Colectora 132/400 kV substations.

The Group has also decided to abandon projects in Italy with an estimated power of 30.7 MWp, which were in the *Grid Connection* state, as they were not technically and economically viable. The development portfolio in Italy stands at 168.2 MW with the possibility of expansion.

This update to the 100% renewable energy generation portfolio, with these additions and adjustments, means that **Audax's total project portfolio will increase from 955 MW to 1,037 MW**, thus consolidating its position as one of the main players in the renewable energy sector in Europe.

The Company is committed to the energy transition and sustainability, dedicated to the generation of clean and renewable energy. With a diversified geographical presence and a vertical integration strategy, Audax continues to drive its growth and contribute to a more sustainable future.
