ROVI – First Half 2020 Financial Results

ROVI reports operating revenue growth of 8% and net profit growth of 83%

- **Operating revenue increased by 8% to 191.1 million euros in the first half of 2020, driven by (i) the strength of the specialty pharmaceutical business, where sales rose 4%, and by (ii) the toll manufacturing business, which grew by 31%. Total revenue increased by 8% to 191.7 million euros in the first half of 2020.**
- **For 2020, ROVI expects a mid-single-digit growth rate for the operating revenue. Notwithstanding, given the uncertainties associated to the development of the COVID-19 pandemic (which ROVI will continue to monitor closely), it is not yet possible to make a precise assessment of the impact that the pandemic will have on the current year.**
- **Sales of the heparin franchise (Low Molecular Weight Heparins (LMWH) and other heparins) increased by 23% to 104.0 million euros in the first half of 2020. Heparin sales represented 54% of operating revenue in the first half of 2020 compared to 48% in the first half of 2019. Sales of LMWH (Enoxaparin biosimilar and Bemiparin) increased by 24% to 101.0 million euros in the first half of 2020. Sales of the enoxaparin biosimilar increased 35% to 49.3 million euros in the first half of 2020 and sales of Bemiparin increased 14% to 51.6 million euros.**
- **Sales of Neparvis®, launched in December 2016, increased by 43% to 13.8 million euros in the first half of 2020.**
- **EBITDA increased by 60%, from 26.5 million euros in the first half of 2019 to 42.4 million euros in the first half of 2020, reflecting a 7.3 percentage point rise in the EBITDA margin to 22.2% in the first half of 2020.**
- **Net profit increased by 83%, from 16.2 million euros in the first half of 2019 to 29.6 million euros in the first half of 2020.**
- **ROVI filed its application for marketing authorisation for Doria® with the European health authority, the European Medicines Agency (EMA), through the Centralised Procedure on 27 December, 2019. After passing the validation phase satisfactorily, the dossier was admitted for evaluation on 30 January, 2020 and**

was released to the Stock Market through the publication of the material event with register number 286374 dated 31 January, 2020.

- **ROVI expects to hold its Ordinary General Shareholders' Meeting in October 2020 and will propose the distribution of a dividend of 0.1751 euros per share, as announced to the Market in February 2020, when the company released its 2019 full year results.**

Madrid (Spain), 27th July 2020, 8:00 AM CET - ROVI released today its financial results for the first half of 2020.

Juan López-Belmonte Encina, Chief Executive Officer of ROVI, said "first of all, I would like to thank health professionals around the world for their efforts in the face of this health crisis and express our condolences for the human losses it is causing. I would also like to thank all ROVI employees for their response to COVID-19. As a pharmaceutical company we are an essential company and the commitment of our staff has allowed us to operate normally. Regarding first half 2020 results, we reached 8% operating revenue growth, mainly driven by the strength of the specialty pharmaceutical business, where sales rose by 4%, and by the toll manufacturing business, which grew by 31%. We forecast continued growth thanks to, among other factors, our flagship product, Bemiparin, which grew by 14%. Likewise, we are already marketing our enoxaparin biosimilar in 13 countries and sales increased by 35% in the first half of 2020. We are in a phase of international expansion and hope that our enoxaparin biosimilar will enable us to be present in more than 120 countries in the long term. We are very excited about the potential of our LMHW franchise and aspire to become a benchmark player in this field worldwide. Furthermore, we expect our specialty business in Spain, supported by the good performance of products such as Neparvis[®], from Novartis, and Volutsa[®], from Astellas, to provide us with a sustainable and profitable growth opportunity in the future. Furthermore, the redirection of the toll manufacturing activities strategy towards high value-added products, backed by the high degree of technological specialisation of our plants in differentiated niches, enabled our toll manufacturing business to increase 31% in the first half of 2020. Likewise, high-double-digit growth for the toll manufacturing business is expected in 2020. In addition, the agreement signed with Moderna makes us very proud to be part of the supply chain of its finished vaccine against COVID-19, once approved, and help address a solution for this pandemic that affects us all. At the same time, we are confident of the potential of our current pipeline of R&D projects, making important investment efforts, since we trust they will be the company's growth engine in the future. We have high hopes of the potential of our long-acting injectable technology (ISM[®]). We concluded a Phase III trial with our ISM[®] technology (Risperidone ISM[®]) and have filed the dossier in Europe, likewise planning filing in the United States for the second half of 2020. We are also conducting a Phase I study for another

candidate, Letrozole, for which preliminary data also show positive results, reflecting our clear commitment to our ISM® technology”.

1. Financial highlights

<i>€ million</i>	1H 2020	1H 2019	Growth	% Growth

Note: certain numerical figures included in this document have been rounded. Therefore, discrepancies in tables between totals and the sums of the amounts listed may occur due to such rounding.

The consolidated financial statements of Grupo ROVI for the first half of 2020 and the comparative information for 2019 (balance sheet) and for the first half of 2019 (consolidated income statement and cash flow statement) are attached to this report (see Appendix 1).

2. Performance of the Group

Operating revenue increased by 8% to 191.1 million euros in the first half of 2020, driven by the strength of the specialty pharmaceutical business, where sales rose 4% and by the toll manufacturing business, which grew by 31%. Total revenue increased by 8% to 191.7 million euros in the first half of 2020.

<i>€ million</i>	H1 2020	H1 2019	% Growth
Specialty pharmaceutical business	156.4	151.0	4%
Toll manufacturing business	34.8	26.5	31%
Operating revenue	191.1	177.5	8%

Operating revenue decreased by 5% in the second quarter of 2020 compared to same period last year and by 11% compared to the first quarter of 2020. This was mainly due to (i) the extraordinary sales in March as a result of medicine stockpiling by the entire distribution chain because of COVID-19 crisis; (ii) the significant reduction of the hospital activity during the period of confinement; and (iii) the lack of product promotion by our salesforce among health professionals.

Sales of **prescription-based pharmaceutical** products rose 7% to 141.7 million euros in the first half of 2020.

<i>€ million</i>	H1 2020	H1 2019	% Growth
Prescription-based pharmaceutical products	141.7	132.5	7%
LMWH franchise	101.0	81.7	24%
Biosimilar of enoxaparin	49.3	36.5	35%
Bemiparin (Hibor)	51.6	45.2	14%
Sales in Spain	33.3	35.5	-6%
International sales	18.3	9.7	88%
Neparvis	13.8	9.6	43%
Ulunar & Hirobriz	5.9	7.5	-21%
Volutsa	7.0	6.4	9%
Vytorin & Absorcol & Orvatez	15.9	15.4	4%
Medikinet & Medicebran	1.8	4.0	-55%
Other products	12.6	16.4	-23%
Discounts to the National Health System	-16.3	-8.6	89%
Contrast agents and other hospital products	14.4	16.7	-14%
OTC and Other	0.3	1.7	-82%
Total specialty pharmaceutical business	156.4	151.0	4%

Sales of the **heparin franchise** (Low Molecular Weight Heparins and other heparins) increased by 23% to 104.0 million euros in the first half of 2020. Heparin sales represented 54% of operating revenue in the first half of 2020 compared to 48% in the first half of 2019.

<i>€ million</i>	1H 2020	1H 2019	% Growth
LMWH franchise	101.0	81.7	24%
Biosimilar of enoxaparin	49.3	36.5	35%
Bemiparin (Hibor)	51.6	45.2	14%
Sales in Spain	33.3	35.5	-6%
International sales	18.3	9.7	88%
Other heparins ¹	3.1	3.1	-2%
Heparins franchise	104.0	84.8	23%

¹ Other heparins are reported in the "Contrast agents and other hospital products" line.

Sales of **Low Molecular Weight Heparins (LMWH)** (Enoxaparin biosimilar and Bemiparin) increased by 24% to 101.0 million euros in the first half of 2020.

Sales of the **Enoxaparin biosimilar** increased 35% to 49.3 million euros in the first half of 2020. ROVI commenced the marketing of its Enoxaparin biosimilar in Germany in 2017; in UK, Italy, Spain, France, Austria, Latvia and Estonia in 2018; and in Portugal, Poland, Costa Rica, Finland, and Sweden in 2019.

ROVI's low-molecular-weight heparin (LMWH), **Bemiparin**, showed a positive performance during the first half of 2020, with sales up 14% to 51.6 million euros. International sales of Bemiparin increased by 88% to 18.3 million euros. This significant increase was mainly linked to the increase in transfer prices to some partners due to the rise in LMWH raw material prices. ROVI expects international Bemiparin sales to increase by a high-double-digit percentage in 2020. Sales of Bemiparin in Spain (**Hibor**[®]) decreased 6% to 33.3 million euros in the first half of 2020 due to the significant reduction in the number of surgical operations performed during the period of confinement.

Sales of **Neparvis**[®], a specialty product from Novartis, launched in December 2016, indicated for the treatment of adult patients with symptomatic chronic heart failure and reduced ejection fraction, increased 43% to 13.8 million euros in the first half of 2020, compared to 9.6 million euros in the first half of 2019.

Sales of **Hirobriz**[®] **Breezhaler**[®] and **Ulunar**[®] **Breezhaler**[®], both inhaled bronchodilators from Novartis for patients with respiratory difficulties due to a pulmonary disease known as Chronic Obstructive Pulmonary Disease (COPD), launched in Spain in the fourth half of 2014, decreased 21% to 5.9 million euros in the first half of 2020, compared to 7.5 million euros in

the same period of the previous year, mainly due to Ulunar[®] Breezhaler[®] price reduction of 18% in the first half of 2020.

Sales of **Volutsa[®]**, a specialty product from Astellas Pharma indicated for the treatment of moderate to severe storage symptoms and voiding symptoms associated with benign prostatic hyperplasia, launched in Spain in February 2015, increased by 9% to 7.0 million euros in the first half of 2020.

Sales of **Vytorin[®]**, **Orvatez[®]** and **Absorcol[®]**, specialty products from Merck Sharp & Dohme ("MSD") indicated as adjunctive therapy to diet in patients with hypercholesterolemia, increased by 4% to 15.9 million euros in the first half of 2020. In the second half of 2018, the active principle ezetimibe went out of patent and the price of Absorcol[®] was reduced. Likewise, generics formulated with ezetimibe and simvastatin were marketed in the same period, so the price of Vytorin[®] was reduced to be competitive. In addition, Orvatez[®] price was reduced by 30% in the first half of 2020 due to the entrance of hybrid products formulated with ezetimibe and atorvastatine.

Sales of **Medicebran[®]** and **Medikinet[®]**, specialty products from Medice indicated for the treatment of ADHD (Attention Deficit and Hyperactivity Disorder) in children and teenagers, launched in December 2013 and marketed on exclusivity basis by ROVI in Spain, decreased by 55% to 1.8 million euros in the first half of 2020. In July 2019, Medikinet[®] (methylphenidate hydrochloride with a modified release) went out of protection for galenic innovation and its price was reduced by 50.3% on average.

According to IQVIA, Spanish innovative product market increased by 4% in the first half of 2020 compared to the same period of the previous year. Nevertheless, ROVI prescription-based pharmaceutical product sales increased 7% during the first half of the year, outperforming the market by 3 percentage points.

As a member of Farmaindustria, the Spanish pharmaceutical industry association, ROVI is subject to the collaboration agreement signed between Farmaindustria and the Spanish government in 2016. The parties have undertaken to work together to develop a new 2020 implementation agreement. Negotiations have not yet begun, and the company is unable to anticipate the final terms that the parties may agree on.

Sales of **contrast imaging agents** and other hospital products decreased by 14% to 14.4 million euros in the first half of 2020. This fall is mainly due to the significant reduction in the number of diagnostic tests performed during the period of confinement.

Toll manufacturing sales increased by 31% to 34.8 million euros in the first half of 2020 as a result of the redirection of our toll manufacturing activities strategy towards high-value-added products.

In November 2019, the toll manufacturing management units, ROVI Contract Manufacturing and Frosst Ibérica, merged into a single entity, ROVI Pharma Industrial Services, which furnishes manufacturing services with the highest degree of quality and competitiveness. The total integration of the production processes is expected to allow the company to attain greater synergies and levels of efficiency in its industrial operations.

Likewise, by the end of 2020, ROVI expects the toll manufacturing business to have increased by a high-double-digit percentage.

Sales outside Spain increased by 37% to 86.5 million euros in the first half of 2020, 26.5 million euros (or 31%) of which related to international subsidiaries, mainly due to recognition of Enoxaparin biosimilar sales. Sales outside Spain represented 45% of operating revenue in the first half of 2020 compared to 36% in the first half of 2019.

Other income (subsidies) increased by 61% to 0.6 million euros in the first half of 2020, compared to the same period of the previous year.

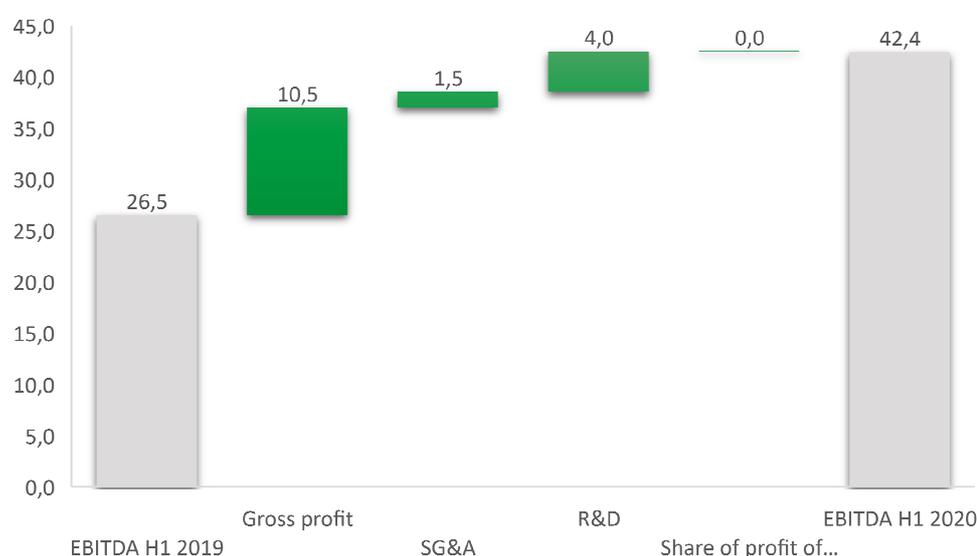

Gross profit increased by 10% to 112.3 million euros in the first half of 2020, the gross margin showing an increase of 1.4 percentage points from 57.4% in the first half of 2019 to 58.8%, mainly due to (i) the increase in toll manufacturing sales contributing higher margins to group sales; (ii) the increase in Bemiparin prices in hospitals due to rises in both LMWH raw material prices (caused by the African swine fever) and the demand for the product in hospitals to treat COVID-19; (iii) the improvement in enoxaparin margins in Spain, counteracting the drop in the margin on international sales of enoxaparin; and (iv) the end of the marketing of the Norgine B.V. product portfolio (Sintrom[®], Salagen[®], Cordiplast[®] and Estradem[®]), which had lower margins than the group. In the first half of 2020, LMWH raw material prices rose around 35% compared to same period last year. ROVI expects LMWH raw material prices to stabilise during the second part of 2020 or even to begin a change of trend towards the end of the year.

Research and development expenses (R&D) decreased 27% to 10.8 million euros in the first half of 2020. R&D expenses were mainly related to (i) the preparation of the Doria[®] registration dossier to be submitted to the U.S. Food and Drug Administration (FDA); (ii) the development of the Letrozole-ISM[®] Phase I trial; and (iii) the development of a new formulation of Risperidone-ISM[®] for a 3-monthly injection. ROVI expects R&D expenses to decrease for the full year by a low-double digit percentage.

Selling, general and administrative expenses (SG&A) decreased 3% to 59.1 million euros in the first half of 2020, mainly due to a drop in (i) promotion expenses (travel and congress expenses) incurred by the sales force; and (ii) expenses of international subsidiaries (including Portugal), which amounted to 4.0 million euros, compared to 4.8 million euros in the first half of 2019. In the first half of 2020, ROVI booked 2.5 million euros in personnel and other expenses related to the COVID-19 measures implemented (see section 6.2). Excluding expenses related to COVID-19, SG&A would have decreased by 7% to 56.6 million euros in the first half of 2020. In 2020, expenses related to international subsidiaries are expected to be around 9 million euros.

	H1 2020	H1 2019	% Growth
Employee benefit expenses	32.9	32.8	0%
Other operating expenses (exc. R&D)	26.2	27.8	-6%
Total SG&A expenses	59.1	60.7	-3%
<i>Expenses related to international subsidiaries</i>	<i>4.0</i>	<i>4.8</i>	<i>-17%</i>
<i>Expenses related to COVID-19</i>	<i>2.5</i>	<i>-</i>	<i>n.a.</i>
Total SG&A expenses excluding expenses related to COVID-19	56.6	60.7	-7%

EBITDA increased to 42.4 million euros in the first half of 2020, a rise of 60% compared to the same period of the previous year, reflecting a 7.3 percentage point increase in the EBITDA margin, which was up to 22.2% in the first half of 2020 from 14.9% in the first half of 2019.

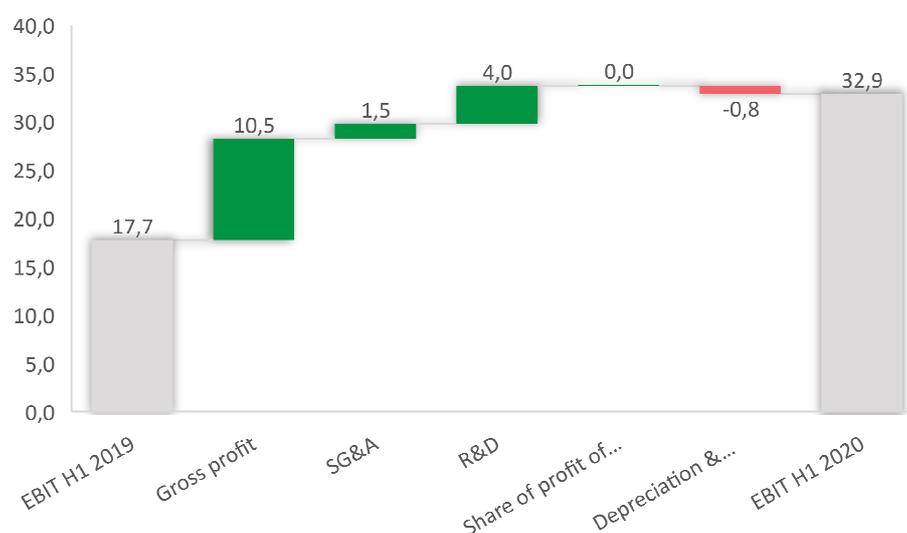

However, EBITDA "Pre-R&D", calculated excluding R&D expenses in the first halves of 2020 and 2019, increased by 29%, from 41.2 million euros in the first half of 2019 to 53.2 million euros in the first half of 2020, reflecting a 4.6 percentage point rise in the EBITDA margin to 27.8% in the first half of 2020 (see "w/o R&D costs" columns of the table below). Likewise, recognising the same amount of R&D expenses in the first half of 2020 as in the first half of 2019, EBITDA would have increased by 45% to 38.5 million euros, reflecting a 5.2 percentage point rise in the EBITDA margin to 20.1% in the first half of 2020, up from 14.9% in the first half of 2019 (see "Flat R&D costs" columns of the table below).

EBITDA	42.4	26.5	53.2	41.2	29%	38.5	26.5	45%
<i>% margin</i>	<i>22.2%</i>	<i>14.9%</i>	<i>27.8%</i>	<i>23.2%</i>	<i>4.6pp</i>	<i>20.1%</i>	<i>14.9%</i>	<i>5.2pp</i>

EBITDA excluding expenses related to COVID-19 ("recurrent EBITDA") increased to 44.9 million euros in the first half of 2020, a rise of 70% compared to the same period of the previous year, reflecting a 8.6 percentage point increase in the recurrent EBITDA margin, which was up to 23.5% in the first half of 2020 from 14.9% in the first half of 2019.

Depreciation and amortisation expenses increased by 9% to 9.5 million euros in the first half of 2020, as a result of the new property, plant and equipment and intangible assets purchases made during the last twelve months.

EBIT increased by 85% to 32.9 million euros in the first half of 2020, reflecting a 7.2 percentage point rise in the EBIT margin, which was up to 17.2% in the first half of 2020 from 10.0% in the first half of 2019.

However, EBIT “pre-R&D”, calculated excluding R&D expenses in the first half of 2020 and 2019, increased by 34%, from 32.5 million euros in the first half of 2019 to 43.6 million euros in the first half of 2020, reflecting a 4.5 percentage point rise in the EBIT margin to 22.8% in the first half of 2020 (see “w/o R&D costs” columns of the table below). Likewise, recognising the same amount of R&D expenses in the first half of 2020 as in the first half of 2019, EBIT would have increased by 63% to 28.9 million euros, reflecting a 5.1 percentage point rise in the EBIT margin to 15.1% in the first half of 2020, up from 10.0% in the first half of 2019 (see “Flat R&D costs” columns of the table below).

Net finance result amounted to -0.03 million euros (cost) in the first half of 2020 compared to -0.3 million euros (cost), mainly due to the gain related to exchange-rate derivative financial instruments.

The **effective tax rate** was 9.9% in the first half of 2020, compared to 7.5% in the first half of 2019, mainly due to the recognition in 2019 of negative tax bases ROVI had the right to use. Research and development tax credits decreased in the first half of 2020 as a result of the decrease in R&D expenses in the first half of 2020 compared to the same period of the previous year.

As of 31 December 2019, negative tax bases of the Group amounted to 34.9 million euros, of which 8.3 million euros will be used in the 2019 income tax and 4.1 million euros in the first half of 2020.

Net profit increased by 83%, from 16.2 million euros in the first half of 2019 to 29.6 million euros in the first half of 2020. However, net profit "pre-R&D", calculated excluding R&D expenses in the first halves of 2020 and 2019, increased by 32%, from 29.8 million euros in the first half of 2019 to 39.3 million euros in the first half of 2020 (see "w/o R&D costs" columns of the table below). Likewise, recognising the same amount of R&D expenses in the first half of 2020 as in the first half of 2019, net profit would have increased by 61% to 26.0 million euros (see "Flat R&D costs" columns of the table below).

In February 2020, ROVI announced it would propose payment of a **dividend** of 0.1751 euros per share with dividend rights out of the 2019 profit if the Ordinary General Shareholders' Meeting approved the application of the 2019 profit proposed by ROVI's Board of Directors. This proposed dividend would mean an increase of 119% on the dividend paid out of the 2018 profit (€0.0798/share) and represents a 25% pay-out. In May 2020, as a consequence of the COVID-19 crisis and according to what it is established on the Royal Decree 8/2020, of March 17, the ROVI Board of Directors agreed to postpone the holding of its Ordinary General Shareholders Meeting 2020 and put its dividend proposal under review. In this regard, as the Market has been informed by the release of "other relevant information", the Board of Directors agreed to set the date for holding its Ordinary General Shareholders' Meeting in October 2020 and to maintain the proposed dividend of 0.1751 euros per share, which was communicated to the Market in February 2020.

Javier López-Belmonte Encina, Chief Financial Officer of ROVI, said that *“we are very happy with the results for the first half of 2020. We have been able to deliver an operating revenue growth of 8% in a difficult environment thanks to the strength of our leading products, which continue to enjoy good sales prospects, and an EBITDA margin rise of 7.3 percentage point, mainly as a result of the operational leverage contribution of our LMWH division, the expansion of our injectables toll manufacturing business and the reduction in operating expenses as a result of the absence of promotion during the confinement period. ROVI’s commitment to innovation is reflected in the figures for the first half of 2020. We are entering into a new phase of growth and we expect our robust balance sheet to allow us to take advantage of other opportunities to expand our sales base and improve the utilisation of our asset base”*.

3. Balance Sheet items

3.1 Capital expenditure

ROVI invested 7.3 million euros in the first half of 2020, compared to 8.6 million euros in the first half of 2019. Of the amount invested:

- 0.9 million euros corresponds to investment capex related to the injectable facility (Madrid), versus 0.4 million euros in the first half of 2019;
- 0.7 million euros relates to investment capex regarding the San Sebastián de los Reyes plant, versus 1.1 million euros in the first half of 2019;
- 0.7 million euros were invested in the Granada facility, versus 2.4 million euros in the first half of 2019;
- 0.8 million euros were invested in the Alcalá de Henares facility, versus 2.5 million euros in the first half of 2019;
- 3.1 million euros corresponds to the ISM[®] industrialization, versus 0.4 million euros in the first half of 2019;
- 0.4 million euros relates to investment capex regarding the Escúzar plant (the second heparin plant in Granada) versus 0.7 million euros invested in the first half of 2019 (linked to the bought of land for the plant construction); and
- 0.7 million euros relates to expenditure on maintenance and other capex, versus 1.2 million euros in the first half of 2019.

In addition, in the first half of 2019, ROVI invested 13.5 million euros in the acquisition of Polaramine[®].

	H1 2020	H1 2019	% Growth
Injectable plant	0.9	0.4	119%
San Sebastián de los Reyes plant	0.7	1.1	-37%
Granada plant	0.7	2.4	-69%
Alcalá de Henares plant (Frosst Ibérica)	0.8	2.5	-66%
ISM® industrialization	3.1	0.4	n.a.
Escúzar plant	0.4	0.7	-37%
Expenditure on maintenance and other capex	0.7	1.2	-43%
Total Capex	7.3	8.6	-15%
<i>Acquisitions</i>	-	13.5	n.a.

3.2 Debt

As of 30 June 2020, ROVI total debt decreased to 75.4 million euros. Debt with public administration, which is 0% interest rate debt, represented 15% of total debt as of 30 June 2020.

<i>In thousand euros</i>	30 June 20	31 December 19
Bank borrowings	45,000	52,116
Debt with public administration	11,159	11,689
Financial liabilities for leases	19,197	20,871
Derivative financial instruments	-	129
Total	75,356	84,805

As of 30 June 2020, bank borrowings decreased by 7.1 million euros. In December 2017, ROVI announced the European Investment Bank (EIB) granted it a loan to support its investments in Research, Development and Innovation. The loan was for 45 million euros. As of 30 September 2019, ROVI had drawn 5 million euros against this credit line at a variable interest rate of Euribor at 3 months + 0.844%. The latest interest rate paid was 0.551% (July 2020). As of 31 December 2019, ROVI had drawn the remaining 40 million euros. The credit matures in 2029, includes a grace period of 3 years with a fixed interest of 0.681%.

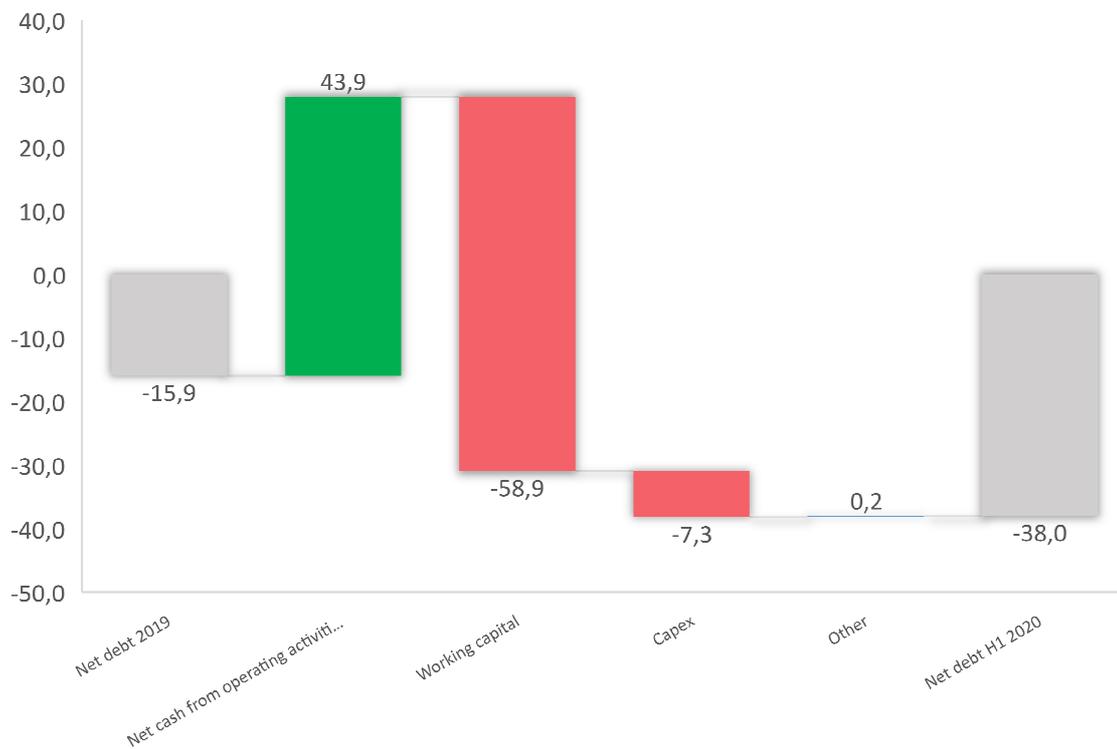

Likewise, since the beginning of the COVID-19 crisis, ROVI has signed credit policies for an amount of 45 million euros, in order to ensure the company's liquidity. As of 30 June 2020, ROVI had not used these credit policies. Thus, the Group is in a comfortable position to meet its payment obligations, debt maturities and any additional cash needs in the short and medium term.

3.3 Free cash flow

Free cash flow (net cash generated (used) from operating activities minus (plus) property, plant and equipment and intangible assets purchases (sales) plus interest received) decreased to -22.3 million euros in the first half of 2020 compared to -19.4 million euros in the first half of 2019 mainly due to the increase of 77.3 million euros in the "inventories" line in the first half of 2020 (mainly as a result of higher heparin stock levels in the first half of 2020), compared to an increase of 28.3 million euros in the first half of 2019. This negative impact was partially offset by (i) the decrease of 14.8 million euros in Capex mainly as a result of the acquisition of Polaramine® in the first half of 2019; (ii) the decrease of 5.8 million euros in the "trade and other receivables" item in the first half of 2020, compared to an increase of 9.6 million euros in the first half of 2019; and (iii) the increase of 15.4 million euros in profit before income tax.

3.4 Gross cash position and net debt

As of 30 June 2020, ROVI had a gross cash position of 37.3 million euros, compared to 68.9 million euros as of 31 December 2019, and net debt of 38.0 million euros (equity securities plus deposits plus financial derivatives plus cash and cash equivalents minus current and non-current financial debt), compared to 15.9 million euros as of 31 December 2019.

Net cash used in operating activities amounted to -15.0 million euros in the first half of 2020, compared to 2.6 million euros in the first half of 2019. Net cash generated from operating activities excluding changes in working capital increased 85% to 43.9 million euros in the first half of 2020, from 23.7 million euros in the first half of 2019.

3.5 Working capital

Figures included in the balance sheet showed an increase in working capital in the first half of 2020 mainly due to (i) an increase of 77.0 million euros in the "inventories" line, mainly due to higher heparin stock levels in the first half of 2020; (ii) a decrease of 5.2 million euros in the "trade and other receivables" line; (iii) an increase of 12.4 million euros in the "trade and other payables" line; and (iv) a decrease of 32.0 million euros in the "cash and cash equivalents" item.

As of 30 June 2020, Social Security and Public Administrations total debt with ROVI amounted to 11.6 million euros, of which 5.2 million euros in Spain, 4.0 million euros in Portugal and 2.4 million euros in Italy.

4. Guidance for 2020

In 2020, ROVI expects **a mid-single-digit growth rate for the operating revenue**. The Company forecasts that it will continue to grow in line with the Spanish pharmaceutical market expenditure in the first five months of 2020, which, according to the Ministry of Health, Consumption and Social Welfare, showed a growth rate of 3.4%.

Notwithstanding, given the uncertainties associated to the development of the COVID-19 pandemic (which ROVI will continue to monitor closely), it is not yet possible to make a precise assessment of the impact that the pandemic will have on the current year.

Likewise, the potential increase in the discounts to the National Health System as a result of the COVID-19 impact may affect attainment of these growth forecasts.

ROVI expects its growth drivers to be Bemiparin, the license agreements, such as Neparvis[®] and Volutsa[®], the Enoxaparin biosimilar, its existing portfolio of specialty pharmaceuticals, new products acquired (Falithrom[®] and Polaramine[®]) and new contracts in the toll manufacturing area.

Likewise, ROVI stopped distributing Norgine B.V. Group products (Sintrom[®], Salagen[®], Cordiplast[®] and Estraderm[®]) at the end of 2019; then no sales related to these products will be booked in 2020. In 2019, sales related to Norgine B.V. Group products amounted to 14.5 million euros.

5. Research and Development update

ISM[®] technology platform

As the company has recently informed (by publication of the material event number 286374 dated 31st of January of 2020), a very important milestone has already been achieved with its long-acting injectable (LAI) antipsychotic Doria[®] (Risperidone ISM[®]). After the conclusion of the validation phase, the European health authorities have commenced the assessment process to grant marketing authorisation for this first product based in its leading-edge drug delivery technology, ISM[®]. In March 2019, the company announced topline results from the pivotal study of Risperidone ISM[®] "PRISMA-3"¹, which showed that primary and key secondary efficacy endpoints were achieved with both doses tested for the treatment of patients with acute exacerbation of schizophrenia. Besides, in July 2019, the company announced the completion of the Clinical Trial Program that will support the application for marketing authorization for Doria[®] for the treatment of schizophrenia. In addition, an open-label extension of the PRISMA-3 study² has already finished, which will provide clinical data on the long-term use of Risperidone ISM[®] (12 additional months).

Furthermore, ROVI informed of the decision to expand its industrial capabilities for the manufacture of Doria[®] with the incorporation of a second line for the manufacture of the syringe containing the solvent. The addition of this second line also provides the company with the necessary flexibility to the company to initiate the preparation of the industrial filling processes of Letrozole ISM[®], which will require the installation of a specific filling machine. As a result, ROVI has prioritized the submission of the Doria[®] dossier in Europe (already done) and subsequently, filing in the USA, targeting the second half of 2020.

On the other hand, the company already announced the commencement of the clinical development of Letrozole ISM[®], which represents the second candidate using the ROVI's ISM[®] technology platform. This new investigational medicine is, to our best knowledge, the first long-acting injectable aromatase inhibitor intended for the treatment of hormone-dependent breast cancer. The first phase I clinical trial (the LISA-1 study³) of Letrozole ISM[®] is currently ongoing and due to the study design ("dose escalation") and its exploratory nature, the finalisation date cannot be anticipated. Nevertheless, preliminary data confirm that this ISM[®] formulation

¹ Study to Evaluate the Efficacy and Safety of Risperidone In Situ Microparticles[®] (ISM[®]) in Patients With Acute Schizophrenia (PRISMA-3). [Clinicaltrials.gov#NCT03160521](https://clinicaltrials.gov/show/NCT03160521) [<https://clinicaltrials.gov/show/NCT03160521>]. This clinical program has had the support of the Industrial Technological Development Centre ("CDTI").

² Study to Evaluate the Efficacy and Safety of Risperidone ISM[®] in Patients With Acute Schizophrenia: Open Label Extension (PRISMA-3_OLE). [Clinicaltrials.gov# NCT03870880](https://clinicaltrials.gov/ct2/show/NCT03870880) [<https://clinicaltrials.gov/ct2/show/NCT03870880>]. This clinical program has had the support of the Industrial Technological Development Centre ("CDTI").

³ Evaluation of IM Letrozole ISM[®] Pharmacokinetics, Safety, and Tolerability in Healthy Post-menopausal Women (LISA-1). [Clinicaltrials.gov#NCT03401320](https://clinicaltrials.gov/ct2/show/NCT03401320) [<https://clinicaltrials.gov/ct2/show/NCT03401320>]. This clinical program has had the support of the Industrial Technological Development Centre ("CDTI").

provides a prolonged release of letrozole which produces a sustained suppression of oestrogenic hormones. The company will be gathering more clinical data from this trial during the following months to better characterise the pharmacological profile of Letrozole ISM®; afterwards, in 2020, ROVI is planning to discuss with regulatory authorities these results as well as the next steps for continuing the clinical development of this novel long-acting injectable aromatase inhibitor.

Lastly, ROVI's R&D team has recently started development of a new formulation of Risperidone ISM® for a 3-monthly injection, which would complement the current formulation of Doria® for the maintenance treatment of patients with clinically stable schizophrenia. This development is still in an initial phase.

6. Key operating and financial events

6.1 Moderna and ROVI Announce Collaboration for Outside the United States Fill-Finish Manufacturing of Moderna's COVID-19 Vaccine Candidate

ROVI informed (by publication of the inside information with register number 322 dated 9 July, 2020) of the collaboration with Moderna, Inc. (Nasdaq: MRNA), a clinical stage biotechnology company pioneering messenger RNA (mRNA) therapeutics and vaccines to create a new generation of transformative medicines, for large-scale, commercial fill-finish manufacturing of Moderna's mRNA COVID-19 vaccine candidate (mRNA-1273) at ROVI's facility in Madrid, Spain.

As part of the agreement, ROVI will provide vial filling and packaging capacity by procuring a new production line and equipment for compounding, filling, automatic visual inspection and labeling to support production of hundreds of millions of doses of the vaccine candidate intended in principle to supply markets outside of the U.S. starting in early 2021. ROVI will also hire additional staffing required to support manufacturing operations and production.

"Moderna is committed to helping address the COVID-19 crisis. We are pleased to partner with ROVI to potentially supply hundreds of millions of doses of finished mRNA-1273, once approved, and help address the need for a vaccine against COVID-19 around the world," said Juan Andrés, Moderna's Chief Technology Operations and Quality Officer. *"ROVI's experience as a global manufacturer of drug product and expertise in fill-finish will be an important partnership for us to establish dedicated supply chains that can meet the needs of different countries and regions. I am delighted to be working with ROVI again".*

"We are very happy about the collaboration with Moderna, whose vaccine against COVID-19 is one of the frontrunners in the race to solve this health crisis. We would be thrilled for ROVI to

form part of the solution to this pandemic that is affecting all of us and to support Moderna in supplying it on a wide scale. Our proven experience and capabilities as a toll manufacturer of injectables has allowed us to reach this agreement, which would help strengthen our manufacturing area and would, in all probability, provide us with a significant growth opportunity in the area. Likewise, I would like to thank the Ministry of Health and the Spanish Medicines Agency for making themselves available and providing their support, which has been of fundamental importance, during this entire process”, said Juan López-Belmonte, Chief Executive Officer of ROVI.

6.2 ROVI informs on the impact of COVID-19 on the company’s activities

ROVI reports (by publication of the relevant information number 1365 dated 2nd of April of 2020) that, since the beginning of the propagation of COVID-19, the company has been executing the contingency plans necessary to guarantee the health and safety of its employees and those who work with it, as well as to ensure the continuity of the business and fulfil its responsibility to supply medicines to the hospitals of Spain and Europe.

To this end, the company has adopted a number of initiatives in line with the recommendations made by the authorities. Among them, we highlight the fact that ROVI has reduced the processes that must be performed in person at its facilities to a minimum. Thus, a significant part of the workforce is working from a distance. In the cases where home working is not possible, particularly at the manufacturing plants, ROVI is keeping all its production activities at a kind of normal activity level, with the relevant safety measures, in order to ensure that its medicines continue to be available to patients during the health crisis.

ROVI considers that it is extremely important to keep its manufacturing plants in operation in order to fulfil its responsibility as a pharmaceutical manufacturer. Therefore, the company wishes to acknowledge the commitment and responsibility shown by those of its employees who are physically present at work every day and, for these employees, has approved a bonus of 20% of their salary corresponding to the duration of the State of Alarm decreed by the Spanish government. Likewise, in order to work with the greatest safety and maintain the continuity of the production activities, ROVI recommends avoiding the use of public transport for travelling to the plants and assumes the cost of private transport and parking spaces for those employees who so require.

ROVI’s sales behaved in line with company’s expectations in the first half of 2020. As a consequence, the company confirms the growth forecasts reported previously for 2020, which placed growth in operating revenue in mid-single-digit figures, i.e. from 0% to 10%. Notwithstanding, given the uncertainties associated to the development of the current situation (which ROVI will continue to monitor closely), it is not yet possible to make a precise assessment

of the impact that the pandemic will have on the current year. ROVI expects the main negative impact on group sales to take place in the second half of 2020.

Regarding the possible impact of COVID-19 on each one of the areas of the company, the following may be highlighted:

1. The World Health Organisation (WHO) has recommended ROVI's low-molecular-weight heparins (LMWHs), Bemiparin (Hibor®) and the Enoxaparin biosimilar, sales of which accounted for 47% of the company's operating revenue in 2019, as essential medicines for people hospitalised in intensive care units due to COVID-19. For this reason, in view of the habitual use of the product in hospitalised patients, the company believes that there will be a rise in LMWH sales in hospitals during the period of the health crisis. On the other hand, ROVI expects that the significant reduction in the number of surgical operations performed during the period of confinement may, likewise, affect the division's sales. The industrial shutdown that took place in China at the beginning of the year and the current shutdown in Europe, combined with the evolution of African swine fever in China, confirm the price increase in sodium heparin for this first part of the year.
2. A majority of ROVI's innovative products are indicated for the treatment of chronic diseases and therefore, consumption of these products should remain stable in the short term. However, the confinement measures, which favour the habit of staying at home, combined with the fact that it is impossible for the sales force to promote the products among health professionals, could provoke a slowdown in the sales of the pharmaceutical specialities division if the isolation measures adopted in the health crisis were to be prolonged.
3. As we have mentioned previously, as of today's date, production activities remain at normal capacity at all the plants, although productivity has been impaired by the various preventive measures concerning sanitisation and safety in relation to COVID-19. ROVI is very proud and satisfied with its employees' response to this crisis. However, the current situation and its potential impact is so unpredictable and volatile that the foregoing assessment of the plants' operations could be affected in the event of infections within their workforces.
4. R&D activities are continuing and, as of today's date, ROVI is not aware that there will be any kind of delay in the approval process for Doria® in Europe or registration of the medicine in the United States. Notwithstanding, the company understands that the efforts of the European Medicines Agency are currently focused on COVID-19 and does not rule out delays in the approval process for the medicine under the current circumstances. Likewise, for registration of the medicine in the United States, the company depends on third-party assistance, which means that ROVI cannot be certain that the registration application will not be filed later the date reported previously (second half of 2020).

ROVI is continuing with its transformation process and the execution of its strategic plan. To date, the impact of the health crisis has not changed the Group's plans. Said strategic plan focuses on (i) the expansion of its enoxaparin biosimilar, with which it aspires to become a benchmark player in the low-molecular-weight heparin sub-market, and (ii) Doria® and Letrozol®, both of which are candidates that validate its extended-release drug delivery system, ISM®.

ROVI is also contributing to the provision of new solutions that help to improve the health situation of society overall and has taken the necessary steps to donate a million surgical masks and a thousand special protection suits to the Ministry of Health, Consumption and Social Welfare, taking account of the difficulties that the National Health System is having in accessing individual protection equipment at the present time. With this contribution, ROVI wishes to assist in the indispensable work carried out by the health professionals who are working nonstop to combat the COVID-19 pandemic in Spain.

ROVI wishes a swift recovery to all those affected by coronavirus and sends special recognition to the health professionals, the State security forces and all the other professionals who, in order to protect all of us, are on the battlefield in the fight against the virus. Likewise, ROVI would like to thank all its employees for their commitment, responsibility, involvement and determination, especially those who continue to travel to its work centres every day.

6.3 ROVI announces the commencement of the assessment process to obtain marketing authorisation for Doria® in the European Union

ROVI informed (by publication of the material event number 286374 dated 31st of January of 2020) that, after the conclusion of the validation phase, the European health authorities have commenced the assessment process to grant marketing authorisation for Doria®, a long-acting anti-psychotic injection for the treatment of schizophrenia, based on the ISM® technology patented by ROVI, in the European Union (EU).

ROVI filed its application for marketing authorisation for Doria® with the European health authorities, the European Medicines Agency (EMA), through the Centralised Procedure on 27 December, 2019. After passing the validation phase satisfactorily, the dossier was admitted for evaluation on 30 January, 2020.

It is forecast that the assessment phase of the Centralised Procedure used by the Company to register this medicine in the EU may take around one year. It should, however, be noted that the assessment process is subject to interruptions and delays in the event that the European health authorities require additional information. Likewise, mention should be made of the fact that the outcome of the registration process (which may be positive or negative) cannot be known until it has concluded.

ROVI will continue to provide information on the milestones deemed significant in this authorisation as the calendar for registration of the medicine in the European Union advances, as well as the registration of the same medicine with the U.S. Food and Drug Administration (FDA), which it is planned to commence in the second half of 2020.

"We are continuing to progress with the approval phase of Doria® and are now closer to marketing it. We have confidence in the product's potential and hope that we will soon be able to offer a therapeutic alternative for the treatment of this chronic, serious and progressive disorder", said Juan López-Belmonte, ROVI's Chief Executive Officer.

About ROVI

ROVI is a pan-European pharmaceutical company specializing and engaging in the research, development, contract manufacturing and marketing of small molecules and biological specialties. The company, in a continuous international expansion process, has subsidiaries in Portugal, Germany, the United Kingdom, Italy, France and Poland and has a diversified marketing portfolio of more than 40 products, among which its flagship product, Bemiparin, already marketed in 56 countries all over the world, should be highlighted. Likewise, in 2017, ROVI commenced the marketing of its enoxaparin biosimilar, developed in-house, in Europe. ROVI continues to develop the ISM® Platform technology, a leading-edge line of research in the field of prolonged drug release with proven advantages. For more information, please visit www.rovi.es

Forward-looking statements

This news release contains forward-looking statements. Such forward looking statements involve known and unknown risks, uncertainties and other factors which might cause the actual results, financial condition, performance, or achievements of ROVI or industry results, to be materially different from any future results, performance, or achievements expressed or implied by such forward looking statements. The statements in this press release represent ROVI's expectations and beliefs as of the date of this press release. ROVI anticipates that subsequent events and developments may cause these expectations and beliefs to change. However, while ROVI may elect to update these forward-looking statements at some point in the future, it specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing ROVI's expectations or beliefs as of any date subsequent to the date of this press release.

Alternative performance measures

This press release may include certain Alternative Performance Measures ("APMs") not prepared under IFRS-EU and not reviewed or audited by either the Company's auditors or an independent expert. Furthermore, the way in which the Group defines and calculates these measures may differ from the way in which other companies calculate similar measures. Consequently, they may not be comparable.
