"Mapfre continues improving profitability in all regions and business units. In addition to the boost from the Strategic Plan, our highly diversified business model, along with the enormous transformation and efficiency improvements, allow us to be optimistic about 2025 despite the persistent geopolitical challenges. The depreciation of some currencies is offset by higher interest rates in many countries," says Antonio Huertas, Chairman of MAPFRE.

MAPFRE S.A. hereby informs that, unless otherwise indicated, the figures and ratios in this activity report are presented under the accounting principles in force in each country (which generally do not apply IFRS 17 & 9), homogenized for comparison and aggregation between units and regions. As such, certain adjustments have been applied, the most relevant being: the elimination of the goodwill amortization in Spain and the elimination of catastrophic reserves in some Latin American countries. MAPFRE Group presents its financial statements under the applicable international accounting standards (IFRS). Definitions and calculation methodology for financial measures under IFRS used in this report are available at the following link: <https://www.mapfre.com/media/2025-06-alternative-performance-measures.pdf>

- In euros, premiums grow 5.3% with a relevant contribution from the IBERIA Savings business. At constant exchange rates, premiums are up 10.2% with Non-Life increasing 7.5% and Life 20.4%.
 - a) The depreciation of average exchange rates of main currencies compared with June 2024, particularly the Brazilian real, the US dollar, the Turkish lira and the Mexican peso, has influenced growth figures in euros.
 - b) In the Non-Life business lines, General P&C contracts slightly (-0.6%) as a result of currency depreciation and the slowdown of the agricultural business in Brazil, offset by the positive performance in IBERIA. Accident & Health grows (+4.8%) in the majority of regions. The Auto line reflects tariff increases and is growing 2.3%.
 - c) Regarding the Life business, premiums are up 15.7% with solid growth in IBERIA.
- The net result, which stands at €570 million, is up 23.6%, based on the following developments:

 - d) The effect of hyperinflation adjustments, with a net negative impact of €16 million (€36 million in 6M 2024).
 - e) Net realized capital gains add €32 million to results (€32 million in 6M 2024). In 2024, the first half included an extraordinary income of €25 million due to several tax adjustments.
