Key highlights

Deferred tax assets. 2024 restatement.

The company considers that it is entitled to correct the double taxation situation that arose in the context of the IPO of 49% of Aena's shares.

The double taxation arose due to 1) the impossibility of revaluing the assets contributed by Aena's parent company at market value at the time of the incorporation of the Company; and 2) the taxation of the capital gain of the Company's parent company.

For accounting purposes, a deferred tax asset of € 288 million is recognised against reserves in accordance with the table below. This amount will be applied as the Company files the corresponding corporate income tax returns.

The corrections made to the comparative figures for each of the items included in the consolidated annual accounts are as follows:

MAG and Committed Fixed Rents 2025–27

MAG and Committed Fixed Rents 2025–27 (millions of euros)

The figures include Región de Murcia International Airport.

Real Estate (Leases and Financial Services):

- For contracts subject to CPI, an increase of 1% has been assumed.
- For contracts associated with high turnover assets (offices/warehouses) necessary to support other airport activities, it has been assumed that they remain at the same current contract volume.

Tenders in the first half of 2025:

- Specialty shops: 19 tenders (23 premises) were published, of which 16 tenders (17 premises) have been awarded. The MAG from the awarding of these tenders represent an overall recovery in the 2024 MAG of 125% in 2025 and 135% in 2026 (including rents from the new premises).
- Food and beverage: 16 tenders (17 premises) have been published, of which 9 tenders (13 premises) have been awarded. The MAG from the awarding of these tenders represent an overall recovery in the 2024 MAG of 108% in 2025 and 117% in 2026 (including rents from the new premises).

Appendix. Alternative Performance Measures

In addition to the financial information prepared under the International Financial Reporting Standards adopted by the European Union (IFRS-EU), the reported financial information includes certain alternative performance measures (APM) in order to comply with the guidelines on alternative performance measures published by the European Securities and Markets Authority (ESMA) on 5 October 2015, as well as non-IFRS-EU measures.

The performance measures included in this section rated as APM and non-IFRS-EU measures have been calculated using Aena's financial information, but they are not defined or detailed in the applicable financial reporting framework.

These APM and non-IFRS-EU measures have been used to plan, control and assess the Group's evolution. We believe that these APM and non-IFRS measures are useful for management and investors as they facilitate the comparison of operating performance and financial position between periods. Although it is considered that these APM and non-IFRS-EU measures allow a better assessment of the evolution of the Group's businesses, this information should be considered only as additional information, and in no case does it replace the financial information prepared according to the IFRS. Moreover, the way in which the Aena Group defines and calculates these APM and non-IFRS-EU measures may differ from the way in which they are calculated by other companies that use similar measures and, therefore, may not be comparable.

The APM and non-IFRS measures used in this document can be categorised as follows:

1. Operating performance measures

- **EBITDA or reported EBITDA:** EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation) is an indicator that measures the company's operating margin before deducting financial results, income tax and amortisations/depreciations. This is calculated as Operating profit plus amortisations (consolidated under IFRS and individual under General Accounting Plan). By disregarding the financial and tax figures, as well as

amortisation and depreciation accounting expenses that do not entail cash outflow, it is used by Management to assess the operating profit of the company and its business segments over time, allowing them to be compared with other companies in the sector.

In the note relating to the financial information by business segment of the annual report, it is indicated that the Chairman and Chief Executive Officer assesses the performance of the operating segments based on EBITDA.

- **Adjusted EBITDA:** The adjusted EBITDA is calculated as EBITDA + Fixed asset impairments + earnings from fixed asset disposals. The reconciliation of both EBITDA and adjusted EBITDA with the consolidated earnings also appears in the note relating to financial information by business segment in the annual report.
- **EBITDA margin:** The EBITDA margin is calculated as the quotient of EBITDA over total revenue and is used to measure the profitability of the company and its business areas.
- **EBIT margin:** The EBIT margin is calculated as the quotient of EBIT over total revenue. EBIT (Earnings Before Interest and Taxes) is an indicator that measures the company's operating margin before deducting financial results and income tax. It is used to measure the company's profitability.
- **OPEX:** This is calculated as the sum of Supplies, Staff costs and Other operating expenses and is used to manage operating or running expenses.

Appendix. Alternative Performance Measures

2. Measures of the financial position

- **Net Debt:** The Net Debt is the main APM used by Management to measure the Company's level of indebtedness.

It is calculated as the total 'Financial Debt' (Non-current Financial Debt + Current Financial Debt) that appears in the Consolidated Statement of Financial Position (see Note 10 of the condensed consolidated financial statements) less the 'Cash and cash equivalents' that also appear in said Consolidated Statement of Financial Position (for the individual statement, it is calculated under the General Accounting Plan).

The definition of the terms included in the calculation is as follows:

Financial Debt: this means all financial debt with a financial cost as a result of:

- a. loans, credits and commercial discounts;
- b. any amount due for bonds, obligations, notes, debts and, in general, similar instruments;
- c. any amount due for rental or leasing which, according to the applicable accounting regulations, should be treated as financial debt;
- d. financial guarantees assumed by AENA that cover part or all of a debt, excluding those guarantees related to debts of consolidated companies; and
- e. any amount received by virtue of any other kind of agreement that has the effect of commercial financing and which, according to the applicable accounting regulations, should be treated as financial debt.

Cash and cash equivalents: definition contained on p. 7 of IAS 7 'Cash flow statement'.

- **Net Financial Debt/EBITDA Ratio:** It is calculated as the quotient of the Net Financial Debt divided by the EBITDA for each calculation period. In the event that the calculation period is less than the annual period, the EBITDA of the last 12 months will be taken.
- The Group monitors capital structure based on this debt ratio.

The numerical reconciliation of these APMs has been included in the corresponding section of the Consolidated Management Report.
