Pharma Mar, S.A. announces that health authorities in Canada, Qatar and South Korea have approved Zepzelca® (lurbinectedin) in combination with atezolizumab (Tecentriq®) for the maintenance treatment for adult patients with extensive-stage small cell lung cancer (ES-SCLC) whose disease has not progressed following first-line induction therapy with atezolizumab, carboplatin and etoposide.

Please find attached press release that Pharma Mar, S.A. will distribute to the media.

Canada, Qatar and South Korea Approve PharmaMar's Zepzelca® in combination with Atezolizumab for First-Line Maintenance Treatment of Small Cell Lung Cancer

- **Canada, Qatar and South Korea are the latest countries to approve the commercialization of the treatment.**
- **The treatment is available now in 18 territories worldwide.**

Madrid, August 3rd, 2026.- PharmaMar (MSE: PHM) announced today that health authorities in Canada, Qatar and South Korea have approved Zepzelca® (lurbinectedin) in combination with atezolizumab (Tecentriq®) for the maintenance treatment for adult patients with extensive-stage small cell lung cancer (ES-SCLC) whose disease has not progressed following first-line induction therapy with atezolizumab, carboplatin and etoposide.

The approvals by the Canada's Health Products and Food Branch (HPFB), the Health Qatar Ministry of Public Health (MoPH) and the Ministry of Food and Drug Safety of South Korea (MFDS) are based on the positive results from the Phase 3 IMforte¹ trial.

With these latest authorizations, the lurbinectedin–atezolizumab combination is now approved in 18 territories worldwide, including the European Union and the United States.

About PharmaMar

PharmaMar is a biopharmaceutical company focused on the research and development of new oncology treatments, whose mission is to improve the healthcare outcomes of patients afflicted by serious diseases with our innovative medicines. The Company is inspired by the sea, driven by science, and motivated by patients with serious diseases to

¹ Efficacy and safety of first-line maintenance therapy with lurbinectedin plus atezolizumab in extensive-stage small-cell lung cancer (IMforte): a randomised, multicentre, open-label, phase 3 trial - The Lancet

improve their lives by delivering novel medicines to them. PharmaMar intends to continue to be the world leader in marine medicinal discovery, development and innovation.

PharmaMar has developed and now commercializes Yondelis® in Europe by itself. In addition, Zepzelca® (lurbinectedin), in the US and other countries; and Aplidin® (plitidepsin), in Australia, each with different partners. In addition, it has a pipeline of drug candidates and a robust R&D oncology program. PharmaMar has other clinical-stage programs under development for several types of solid cancers: PM534 and PM54.

Headquartered in Madrid (Spain), PharmaMar has subsidiaries in Germany, France, Italy, Belgium, Austria, Switzerland and The United States. PharmaMar also wholly owns Sylentis, a company dedicated to researching therapeutic applications of gene silencing (RNAi) and contract-manufacturing (CDMO) of oligonucleotides. For more information, please visit: www.pharmamar.com.

About Zepzelca®

Zepzelca® (lurbinectedin), also known as PM1183, is an analog of the marine compound ET-736 isolated from the sea squirt Ecteinascidia turbinata. It is a selective inhibitor of the oncogenic transcription programs on which many tumors are particularly dependent. Together with its effect on cancer cells, lurbinectedin inhibits oncogenic transcription in tumor-associated macrophages, downregulating the production of cytokines that are essential for the growth of the tumor. Transcriptional addiction is an acknowledged target in those diseases, many of them lacking other actionable targets.

Tecentriq (atezolizumab) is a registered trademark of Genentech, a member of the Roche Group.
