Macro Context Update & Spanish Retail Market Evolution

The Current Macro-Economic Context

EROSKI, Part of you.

Context

Geopolitical context has not had serious consequences on the Spanish market regarding raw materials, supply chain, commodities, etc.

The economy has experienced a **strong inflationary period**, with a tightening of monetary policy in 2023

Growth forecast for the Spanish economy of around 1.9% in 2024, **confirming expectations**

The decline in inflation will be slower, partly due to the withdrawal of anti-crisis measures

In 2024, food prices will continue to increase but at a slower pace (+4.7% foods and +3.9% fresh foods)

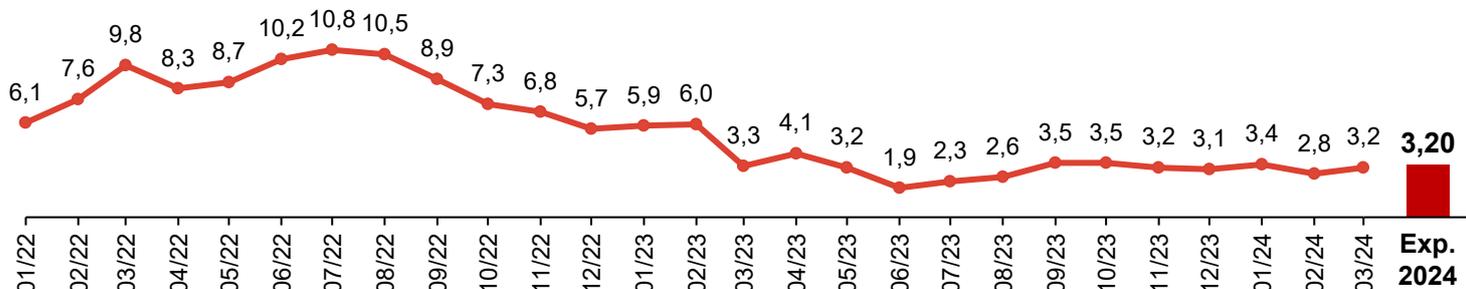

The labor market will remain in 2024 one of the main resilient pillar of the Spanish economy

Interest rates will remain high for at least the first half of the year in 2024

- The downward trend in Food sub-indexes is expected to be more intense in fresh foods, which are by nature more volatile, than in than in processed foods

Food & non-alcoholic beverages (%)
